The Abuſes committed by the Inhabitants of a pretended privileged Place, adjoining to the Borough of *Southwark*, near *London*, called *Suffolk-place* or the *Mint*, had been long complained of, and was at length become a very great Grievance. Such great Numbers of Debtors, ſheltering themſelves therein from the Purſuit of their Creditors, were now become ſo audacious as to bid open Defiance to the Officers appointed to put the Laws in Execution. It was now therefore become high Time to put an End to ſo ſhameful an Abuſe, and to prevent the like for the future. This was accordingly done, by an Act of Parliament, (of the 9th Year of King *George* the Firſt, Cap. xxviii.) *For the more effectual Execution of Juſtice in a pretended privileged Place, in the Pariſh of* St. George, *in the County of* Surry, *commonly called the* Mint, *&c.* whereby it was made Felony to obſtruct the Execution of any Writ, Rule, or Order of any Court of Law or of Equity, or of any Eſcape Warrant, or Warrants of Juſtices:——And the Sheriff of *Surry* was impowered to raiſe the *Poſſe Comitatus*, for the taking by Force any Debtor out of the ſaid *Mint:* And ſundry other Regulations are, in the ſaid Statute, ordained for effectually preventing that or any other Place from committing ſuch open Breaches of Law and Order for the future. So that from this Time forward there has none dared to ſet on Foot any pretended privileged Place or Sanctuary any where in *Great-Britain* or *Ireland*, for the ſheltering or ſcreening of Debtors from the due Courſe of Law.

A View of the Coinage of Mr. *Wood*'s new Copper Money for the Kingdom of *Ireland.*

In this Year, Mr. *William Wood* (whom we have elſewhere mentioned as a great Proprietor in Iron and Copper-works) having obtained a Patent for the coining of ſo large a Quantity of Copper Half-pence and Farthings, for the Uſe of the Kingdom of *Ireland*, as to the Amount of 100,000*l. Sterling*, both Houſes of the Parliament of that Kingdom, in their Addreſſes to the King, warmly repreſented, " That, under Colour of the ſaid Patent, great Quantities of Half-" pence of different Impreſſions, *and of much leſs Weight* than is required by the Patent, had " been imported and attempted to be uttered in this Kingdom.——And that even although the " Terms of the ſaid Patent had been ſtrictly complied with, there would have been a Loſs to the " Nation of at leaſt 150 *per Cent.* by the ſaid Coinage, and much greater, in the Manner the ſaid " Half-pence have been coined."

For our Part, we do not well comprehend how 150*l.* can be loſt on 100*l.* [wherefore this 150 *per Cent.* muſt be relative to ſome other Part of the Repreſentation, or elſe there muſt have been ſome Miſtake in tranſcribing of this parliamentary Repreſentation;] but, waving that, we ſhall only briefly note, that Mr. *Wood* alleged, in his own Vindication, that both by the Patent of King *Charles* the Second, *Anno* 1680, and by that of King *James* the Second, *Anno* 1684, a *Half-penny* was to weigh 110 Grains, whereas Mr. *Wood*'s Half-penny weighed $116\frac{3}{4}$ Grains, and was better Copper than the ſaid Half-pence; but he is ſilent as to the Parliament's Objection, of the Quantity of Copper in his Half-penny being leſs than required by the Patent. In fine, ſuch a Spirit was raiſed in *Ireland*, both within Doors and without, and by Pamphlets, News-papers, *&c.* againſt that new Copper Coin, partly becauſe the Patent was given to one who was not a Native of *Ireland*, and that the ſaid Coin was altogether ſtamped in *England*; and partly alſo, that ſince a great Profit was thereby to be made, that Benefit ſhould not have accrued principally to the Public; (which Reaſon, we confeſs, ſeems to carry great Weight with it) and (we may add likewiſe) that great Pains had been taken by Party-men in *Ireland*, to inflame the People there againſt the receiving or paſſing the ſaid new Copper-money in any Payments; that his Majeſty, in Compliance with the Repreſentations of the Parliament of *Ireland*, and the then general Diſpoſitions and Inclinations of the People of that Kingdom, was graciouſly pleaſed to revoke his ſaid Patent, ſo far as that, inſtead of 100,000*l.* in Copper Coin, Mr. *Wood* might be permitted to ſend to *Ireland* only 40,000*l.* in all, to be current only to ſuch as pleaſed voluntarily to accept of them; though to Mr. *Wood*'s conſiderable Detriment. Yet if the Repreſentations of Mr. *Wood* be true, that the whole current Caſh of *Ireland* does not exceed 400,000*l.* and that the Cuſtoms, Exciſe, Hearth-money, and Quit-rents amount to 500,000*l.* *per Annum*, ſo as that *one-fourth* Part more than all the ſaid current Caſh of that Kingdom is annually paid into their Exchequer; then, ſurely, this Addition of 100,000*l.* to the current Caſh of the Kingdom would have been a Benefit to Trade. And that if Mr. *Wood*'s Coin was not to be received, they ſhould ſeriouſly have ſet about the ſubſtituting a competent Quantity of other Copper Coin in its Stead.

Mr. *Wood*'s Account of the whole current Caſh of *Ireland* at this Time. *Vide Annum* 1721.

Notwithſtanding of a Rebellion which broke out in the Year 1715, and of a dangerous Conſpiracy againſt the eſtabliſhed Conſtitution, diſcovered at the Cloſe of the preceding Year 1722,

A. D. 1723 yet ſuch is the Spirit and Genius of the *Britiſh* Nation for Commerce, that it was ſeen and obſerved by all inquiſitive People, to be ſtill conſtantly flouriſhing. *Eraſmus Philips*, Eſquire, an Author then of good Credit, gives us an Inſtance thereof in his Pamphlet, publiſhed *Anno* 1726, (ſecond Edition) intitled, *The State of the Nation in Reſpect of her Commerce, Debts, and Money*, which acquaints us, That from the Year 1701 to the Year 1723, the Amount of the *Britiſh* Cuſtoms was ſo conſiderable, that the *net Money* paid into the *Exchequer*, on an Average, or one Year with another, for the ſaid twenty-three Years, was 1,446,022 *l. per Annum*; even excluſive of Seizures: (Which Account nearly coincides with that before exhibited *Anno* 1715) And with Seizures it amounted to 1,467,593 *l.* net Money *per Annum.*

The vaſt net Amount of the Cuſtoms of *Great Britain.*

The ſaid Mr. *Philips*, in his above-quoted Pamphlet, gives us the Quantity of Silver and Gold coined in the *Tower of London*, between the Years 1701 and 1724, *viz.* in *Silver*, only 175,464 Pounds Weight; and in *Gold* no leſs than 241,183 Pounds Weight; which, valuing a Pound of Gold at 44 *l.* Sterling, makes the Gold coined in *England* in twenty-three Years Time to amount in Value to 10,612,052 *l.* Sterling. Which vaſt Coinage of Gold in thoſe Years was owing to our putting too high a Value on Gold in Proportion to Silver, whereby Foreign Nations were encouraged to import Gold upon us in Exchange for our Silver. Which Inconveniency, as we have ſeen, was remedied by reducing Guineas from 1 *l.* 1 *s.* 6 *d.* to 1 *l.* 1 *s.* by the Advice of Sir *Iſaac Newton.*

The Amount of the Coinage of Gold and Silver in *England* for twenty-three Years paſt.

After the Confuſion and ſhameful Jumble of the *French* Company or Society of the *Indies*, made by the Authority of the Duke of *Orleans*, Regent of *France*, during the Minority of King *Louis* XV. which conſolidated Company was compoſed of the original Capital of the *Weſtern* Company, and of 25 Millions of Livres added thereto, upon the Union of the *Eaſt-India* Company therewith; it was in this Year 1723, judged requiſite, for reſtoring Things to ſome Order, that a Reviſion ſhould be made of the Actions poſſeſſed by the Proprietors of this ſame conſolidated Company, for diſtinguiſhing (as was ſpeciouſly alleged) between ſuch as had acquired their Property fairly, and by Purchaſe, and ſuch as had by Stock-jobbing forced themſelves into the Company's Books. The King therefore fixed the Capital at 112 Millions of Livres, the annual Intereſt on which was fixed [*if any Thing can be called fixed in* France, *but the Power of their Monarch*] at 8 Millions; to be paid out of the Farm of Tobacco, and the Profits of the *Furs* from *Canada*. And the Commerce of the *Indies* was aſſigned to that Company as a collateral Security for the preſent, to be employed for enlarging the Funds and for diſcharging the Incumbrances thereon.——Yet, till many Years after this Time, the *Eaſt-India* Trade of *France* was managed in a very languid Manner, they having been obliged to pay off many old Debts, to rebuild their Ships and Factories, and to lay out above 15 Millions for improving of *Louiſiana*, and for compleating the ſuperb Works of *Port l'Orient*.——But *Orry* coming to be at the Head of the *French* Finances, *Anno* 1737, he ſo effectually ſupported and improved the *Eaſt-India* Company, that their public Sale at *Port l'Orient* in 1742 amounted to 24 Millions of Livres, (or about one Million Sterling) which greatly alarmed *England* and *Holland*, who did not at firſt know that all this fine Appearance was chiefly ſupported by the Crown, until the War with *England*, *Anno* 1744, obliged *Orry* to declare to the Company, *That they muſt now ſtand on their own Legs.* Notwithſtanding all which, and the Stop of their Dividends at that Time, they have ſince vaſtly improved their *Eaſt-India* Commerce and Power there, even almoſt to the preſent Time.

A View of the *French Eaſt India* Trade at and after this Time.

1724 After much Debate in ſeveral of the General Courts of the *South-Sea* Company, concerning the Utility of attempting a *Greenland Trade* or *Whale Fiſhery*, wherein it was too plainly ſhewn, that former *Greenland* Companies were ſo unſucceſsful as to have run out their intire Stock or Capital; and that ſome foreign Nations have ſundry Advantages over our People in Reſpect to this Fiſhery; this Company at length reſolved to commence the ſaid Fiſhery. It was certainly a well-intended and popular Reſolution, and was agreeable to the Powers granted by the firſt Act of Parliament, and to the Royal Charter, for erecting of this Company, as well as to Part of the Denomination or Title given to it by the ſaid Royal Charter. In order for the better ſucceeding therein the Company had procured an Act of Parliament, of this 10th Year of King *George* the Firſt, (Cap. xvi.) *For encouraging the Greenland Fiſhery*: "Whereby the Duty of three Pence *per* "Pound Weight on Whale-Fins was repealed; and that Whale-Fins, Oil and Blubber of "Whales, caught and imported in *Britiſh* Ships, (whereof the Commander and at leaſt One-third "of the Mariners to be *Britiſh* Subjects) ſhould abſolutely be Cuſtom-free for ſeven Years, from "*Chriſtmas* 1724."

The *South-Sea* Company reſolve to commence a *Greenland* or Whale Fiſhery; and their Motives for it.

And by an Act of Parliament of the 12th of this King, (Cap. xxvi.) "This Freedom from "all Cuſtom whatever was extended to *Davis's-Streights* and the Seas adjacent, and alſo compre"hended therein *Seal-Oil*, *Seal-Skins*, or any other Produce of *Seals*, or other Fiſh or Creatures, "taken or caught in any of the ſaid Seas." Which laſt Paragraph had alſo in View the large *White Bears*, ſo commonly found on the Ice there; and alſo to *Sea-Horſes* or *Morſes*, alſo very numerous in thoſe Seas.

Yet, it being too late for the Fiſhery of the preſent Year, they directed *twelve* fine Ships, of 306 Tons each, to be built in the River *Thames*, and proper Quantities of *Hemp* from *Riga*, and *Caſk Staves* from *Hamburgh*, to be got ready for the enſuing Spring: The Company having alſo hired the Duke of *Bedford*'s great Wet-Dock at *Deptford*, for the Uſe of their Ships and Stores, and for curing of their Oil and Whale-Fins.

In this ſame Year 1724, the *South-Sea* Company alſo ſent out their rich annual Ship for *Carthagena* and *Portobello*, in the *Spaniſh Weſt-Indies.*

Another annual *South Sea* Ship ſent to the *Spaniſh Weſt-Indies.*

We

The *Sinking-Funds* State at *Chriſtmas* 1724.

We think it may at this Time be proper to take Notice of the Increaſe of the famous *Fund* erected by the *Britiſh* Parliament, *Anno* 1717, named the *Sinking-Fund*, which Increaſe proceeded from the Surpluſſes of the other three already deſcribed Funds, *viz.* the *Aggregate*, the *General*, and the *South-Sea* Funds, either by paying off Part of their Capital or principal Debt, or elſe by a Reduction of the Rate of their Intereſt payable by the Public. The ſaid *Sinking-Fund* therefore, we may obſerve, was, on the 31ſt of *December* 1724, thereby increaſed to 653,000 *l.* which Fund will be much more conſiderably increaſed from and after *Midſummer* 1727, as will be ſeen in due Time.

The famous *Pragmatic-Sanction* for keeping all the Dominions of the Houſe of *Auſtria* united under one Sovereign.

In the Cloſe of this ſame Year 1724, the Emperor *Charles* VI. executed and again confirmed the *Pragmatic-Sanction and perpetual Law, with regard to the Rule and Order of the Succeſſion and indiſſoluble Union of all his hereditary Kingdoms and Provinces*, which he had ſettled in the Year 1713, ſo as they ſhould always remain cloſely united under one ſole Perſon, [*viz.* on his Daughter, the preſent Empreſs-Queen.] "For preventing the Diſmembering and Diviſion thereof among the "Heirs of our auguſt Family," (ſays he) "either within *Germany* or without; ſo as to be a "perpetual and irrevocable Law: That the eldeſt Male Heir, and in Failure of Males the eldeſt "Female Heir, ſhall for ever ſucceed to *all* the Dominions of the Houſe of *Auſtria*." This was thought a good Means for preſerving an Equilibrium of Power in *Europe*; and ſo far we have judged proper to mention it, as we think it a Benefit to the General Commerce of the World; ſince, without ſuch an Equilibrium of Power, the Freedom of Commerce might hereafter be overturned, by the mere Will of ſome one over-grown Tyrant. This famous *Pragmatic-Sanction* was ſolemnly agreed to by moſt of the Potentates of *Europe*, before that Emperor's Death, altho' it has ſince appeared how little it has been regarded even by Potentates who by ſolemn Treaty guaranteed it.

The Succeſs of the firſt Year of the *South-Sea* Company's *Whale* Fiſhery.

In the Year 1725, the *South-Sea* Company commenced their unfortunate Whale Fiſhery. Their *twelve* new Ships brought Home 25½ Whales: And, though this was ſcarcely a ſaving Voyage, it was nevertheleſs the very beſt Year of any of the Eight in which they carried on that Fiſhery. It muſt be noted, That the Nation having intirely relinquiſhed this Trade for ſo many Years paſt, there was not an *Engliſhman* to be found who knew any Thing of the *Greenland* or Whale Fiſhery. The Company was therefore neceſſitated to have all their *Commanders*, *Harponeers*, *Boat-Steerers*, *Line-Veerers*, and *Blubber-Cutters*, from *Fohrde* in *Holſtein*, (ſome few Natives of *Scotland* excepted, who on this Occaſion left the Service of the *Hollanders*) who had before this Time been conſtantly employed either by the *Hamburghers*, *Bremers*, or *Hollanders*. Thoſe *Holſteiners* coſt the Company this Year 3,056 *l.* 18 *s.* 3 *d.* although but 152 in Number; not only becauſe they were all what is uſually called Officers in that Fiſhery, and conſequently had more Wages and Allowances than the common Sailors, but had alſo their Charges borne by the Company, both in coming every Year from and returning back to *Holſtein* to their Families, as was alſo their conſtant Practice when employed by other Nations: Whereas above double their Number, *viz.* 353 *Britiſh* Subjects employed on thoſe twelve Ships, coſt but 3,151 *l.* 15 *s.* 5 *d.*

The Funds of the *Bank of England* reduced.

In this ſame Year 1725, was paſſed an Act of the *Britiſh* Parliament, of the 11th of King *George* the Firſt, (Cap. ix.) *For continuing the ſeveral Annuities to the Bank of England until Midſummer* 1727, &c.—Whereby the yearly Fund, on the principal Sums of 1,775,027 *l.* 17 *s.* 10½ *d.* and of 2,000,000 *l.* due to that Corporation, were reduced from 5 to 4 *per Cent.* from and after *Midſummer* 1727: Whereby all the Funds of the *Bank* were put on an equal Footing with thoſe of the *South-Sea* Company; excepting only the *Bank*'s original Capital of 1,600,000 *l.* which ſtill remained at 6 *per Cent.*

Hereby alſo it is made Felony to counterfeit, alter, eraſe, or forge the *Bank of England*'s Notes, and alſo the Endorſements thereon.

☞ This Act alſo made it *Felony* to alter, forge, or counterfeit *Bank-Notes*, or to eraſe or alter any Endorſement thereon; or to tender in Payment, utter, vend, exchange, or barter, any ſuch *Bank-Note*, (knowing the ſame to be altered, forged, eraſed, or counterfeited) with Intention to defraud the *Bank*, or any other Perſon or Body-politic.

The vaſt Increaſe of the *French* Sugar *Weſt-India* Trade.

About this Time, the *French* firſt began to ſupply, in conſiderable Quantities, the *European* Markets with their Sugars from *Martinica*, *Hiſpaniola*, &c. formerly and almoſt totally ſupplied by *us*, (though in Part they are ſtill ſupplied by the *Portugueſe Braſil* Sugars, and, of late, by the *Dutch* from *Surinam*.) And in a few Years after, by their great Application, they gained from *us* almoſt all or the greateſt Part of that very profitable Branch of Commerce. The anonymous Author of *the preſent State of the Britiſh and French Sugar Colonies*, printed *Anno* 1740, makes the *French* Sugars exported to the *European* Markets amount to ſo vaſt a Quantity as 80,000 Hogſheads yearly. And that the *Indico* raiſed by the *French* in their *Weſt-India* Colonies amounts in Value to *one Million* of Sterling Money; Three-fourths of which they ſell to other Nations. And they alſo export to other *European* Nations, in *Cocoa*, *Cotton*, *Ginger*, *Rum*, (he might have added, *Coffee*, &c.) about 250,000 *l.* yearly. To all which let there be added the Freight thereon;—the great Number of Perſons both in *Europe* and *America*, as well as in their Ships, conſtantly maintained thereby;—the great Conſumption of the Product and Manufactures of *France*, both in the *Weſt-Indies*, and on the *African* Coaſts for the Purchaſe of their Slaves; and then we need not wonder, that even ſo long ago as the Year 1701, the then new *French Council of Commerce*, in a Memorial, could ſay, "*That the Navigation of* France *owed all its Increaſe and Splendor to the Commerce of its Sugar Iſlands; and that it could not be kept up and enlarged otherwiſe than by that Commerce!*"

The *South-Sea* Company's ſecond Year's *Whale* Fiſhery's Succeſs.

Twelve more Ships being built by the *South-Sea* Company, they, in the Year 1726, ſent out their whole twenty-four Ships on their ſecond Voyage on the *Whale Fiſhery*, to *Greenland* and *Davis's Streights*. In which they ſucceeded conſiderably worſe than in their firſt Voyage, having brought

A. D. 1726

brought Home but ſixteen Whales and an Half. [☞ The Meaning of the Half-Whale here and elſewhere is, when two Ships (perhaps of different Nations) happen to ſtrike the ſame Whale, which by common Cuſtom is equally divided between them.]

Remarks on Mr. Philips's State of Britain's *East-India* Trade.

In Mr. *Philips*'s *State of the Nation in reſpect to her Commerce, Debts and Money*, already quoted, he gives us a ſummary View of the *Engliſh Eaſt-India* Company's Trade, and of its Benefits to the Public, about which however Men are ſtill far from being generally agreed.

I. He ſays, " The Company's Sales have for many Years paſt exceeded 2,200,000 *l.* yearly." Which is probably true; conſiſting of wrought and raw Silk, Callicoes, Saltpetre, Drugs, Tea, Coffee, Cotton and Cotton-yarn, *Carmenia* Wool, *&c.*

II. " That 1,000,000 *l.* thereof may probably be conſumed at Home." [This, it is to be feared, is rather under computed.]

III. " That the Company's Exports annually to *India* are to the Value of 500,000 *l.* in Bullion " and Manufactures." [This is but a ſtrange Jumble, to mix *Bullion* and Manufactures together in one groſs Sum, which are always eſteemed the Reverſe of each other.]

IV. To the Million conſumed at Home, he adds, " 400,000 *l.* to be deducted for the Draw-" back allowed at the Cuſtom-houſe upon the 1,200,000 *l.* re-exported." And concludes,

V. " That the remaining 800,000 *l.* is or ſhould be the annual Gain to the Nation by the " *Eaſt-India* Trade."

Now, to this Balance of national Gain ought certainly to have been added the Total of our Manufactures exported to *India*. What he adds is very true, " That the Company's Trade " maintains very many People at Home, as well as conſiderable Numbers of our People in *India*, " who bring Home much Wealth to their native Country." But what he ſays about our *Eaſt-India* Trade's having brought down the Price of other *European* Wares which we uſed, before we entered into it, ſeems of little Conſideration in this State of the Company. " Moreover," (ſays he) " if the ſaid *Eaſt-India* Merchandize re-exported do pay or anſwer for ſuch *European* Goods, " for which (without this Trade) we muſt have paid in Caſh, it is in Effect the ſame as if it " brought in ſo much Caſh or Bullion. As this Trade alſo furniſhes us with what otherwiſe we " muſt neceſſarily have bought of the *Dutch*," [meaning, we preſume, *Salt-petre*, *Pepper*, and *Drugs*] " poſſibly the Nation's yearly Profit by it may be near one Million Sterling.

" Laſtly, In Contemplation of the vaſt Exportation of Silver from all *Europe* to *Eaſt-India*, " there buried ſince 1602, ſo as never to return, computed to amount to 150 Millions Sterling; " had that vaſt Sum remained to this Day in *Europe*, whereby our Proportion of Caſh would " have been treble to what it now is, the Conſequence would have been, *That Commodities and* " *Labour would, probably, have riſen in a treble Proportion*; and, in Effect," [according to him] " we ſhould not have been richer in ſuch a Caſe than we are at preſent."

He has here forgotten, Iſt, The National Benefit from a very great annual Sum paid for the Cuſtom of *Eaſt-India* Goods conſumed at Home! ſaid to amout to above 300,000 *l.* And, IIdly, That a conſiderable Part of the Million of *Eaſt-India* Commodities, annually conſumed or remaining at Home, is worked up in our great and very profitable Manufactures of Silk and Cotton; and much of the Drugs are alſo employed therein.

The *Engliſh Eaſt-India* Company has new Privileges granted to it by K. *George* I. with Power to erect three Corporations in *India*, viz. *Fort St. George*, *Bombay*, and *Fort William* in *Bengal*, or by the Name of *Calcutta*.

In this ſaid Year King *George* the Firſt, upon the humble Petition of the *Eaſt-India* Company, granted them a new Charter of Confirmation: With ample Powers for them to erect a Corporation at *Fort St. George*, by the Name of *The Mayor and Aldermen of Madraſpatan in the Eaſt-Indies.* And another Corporation at and within the Factory and Town of *Bombay*, by the Name of *Mayor and Aldermen of Bombay*. Alſo a third Corporation, within the Factory of *Fort William* in *Bengal*, by the Name of *The Mayor and Aldermen of Calcutta at Fort William in Bengal.*——With perpetual Succeſſion to each of the ſaid *three* Corporations, and a Common Seal;—to make By-Laws;—and to try Cauſes both Civil and Criminal, *High-Treaſon* excepted.

The Money Circulations of *England* conſidered.

In *Philips*'s before-named Piece, ſpeaking of *the Circulation of Money*, he ſuppoſes, " That " *France* is to *England* as *Eight* is to *Three.*—That their Specie" [*i. e.* Money] " is perhaps pro-" portionable. Yet there is a greater Shew of Money in *England* than in *France*: But if the " Circulation of *France* were equal to that of *England*, *France* would appear of Courſe ſo much " richer than *England*!

l.
" 1. Poſſibly" [ſays he] " the *real* yearly Rents of *England* may be - - --- 20,000,000.
" it being ſuppoſed that our Lands are not taxed at Half their Value.
" 2. The Cuſtoms of *England* produce annually about - - - - - - --- 1,600,000.
" 3. Which Cuſtoms, on an Average of 30 *per Cent. ad Valorem*, make the
" Value of our annual Imports to be about - - - - - - - - - - - - - --- 5,300,000.
" 4. And our Re-exportations may be about - - - - - - - - - - - --- 1,500,000.
" 5. The other Duties and Funds may be about - - - - - - - - - - --- 2,199,328.
" 6. If there be *eight* Millions of People in *England*, I believe I ſhall not exceed
" in ſuppoſing them to conſume in Manufactures about - - - - - - - - --- 16,000,000.
" 7. Now although the Intereſt ariſing from mortgaged Lands be included in
" the before-named Rental, yet the Mortgages themſelves are often transferred,

A. D. 1726

“ and may therefore be deemed Money in Circulation: And theſe have been com- “ puted at *one fifteenth Part* of the whole Value of the Lands, or about	26,000,000.
“ 8. The National Debt about	53,000,000.
“ 9. The Malt-Tax about	600,000.
“ So that the whole Money-Tranſactions of this Nation ſeems to be about	126,199,328.

This Mr. *Philips* ſpeaks of as a ſtupendous Thought!

Now, although this Computation may in general be thought liable to ſome Exception, yet ſome Parts of it may hereafter ſtrike out new Lights, or at leaſt ſtart *new Thoughts*, for juſter Computations.

Affairs of the *Oſtend Eaſt-India* Company.

Whilſt *Britain* and the *States-General* of the *United Netherlands* were remonſtrating at *Vienna*, and promulgating Acts of Parliament and Placarts againſt the Continuance of the *Oſtend* Company's trading to *India*, that Company's General Court or Aſſembly reſolves in this Year to make a Dividend of 12 *per Cent.* to their Proprietors, and to maintain their then Settlement at *Coblore*, on the Coaſt of *Coromandel*, and their Factories at *Bengal*, and their Trade to *Canton* in *China*. Nevertheleſs, we ſhall ſoon ſee an End put to that Company! For, although neither Gratitude for paſt Benefits, nor Regard for the cleareſt and ſtrongeſt Treaties, could prevail at *Vienna*, the Reſolutions of the two Powers, ſo nearly intereſted in the Suppreſſion of that Company, by *main Force*, became too ſtrong to be much longer reſiſted.

One Hundred *Hackney Chairs* added to the former Number in *London*.

The weſtern Suburbs of *London* ſo greatly increaſing, wherein Perſons of Quality and Diſtinction uſually reſide, the Legiſlature, in this 12th of King *George* the Firſt, by a Clauſe in *an Act for granting an Aid to his Majeſty by laying a Duty upon all Victualers*, &c. impowered the Commiſſioners for Hackney Coaches and Chairs to add one Hundred Hackney Chairs to the former Numbers, ſo as the whole exceed not four Hundred in Number: Each of which ſhall continue to pay *ten* Shillings *per Annum* for their Licences.

Forging the Hands of the Caſhiers of the *Bank*, and of the Bonds, and Indorſements on Bonds, of the *Eaſt-India* and *South-Sea* Companies made Felony.

By an Act of Parliament of the ſaid 12th of King *George* the Firſt, *For better ſecuring the Monies and Effects of the Suitors of the Court of Chancery*, &c. it was made “ Felony without Benefit of “ Clergy, not only to forge or counterfeit the Name or Hand of the Accountant-General of the “ Court of Chancery, and of the Regiſter and Clerk of the Report-Office; but likewiſe the “ Name or Hand of any of the Caſhiers of the *Bank of England*, to any Certificate, Report, “ Entry, Indorſement, Declaration of Truſt, Note, Direction, Authority, Inſtrument, or Writ- “ ing whatſoever, in order for the receiving or obtaining Money or Effects of Suitors in *Chancery*: “ As alſo any Bond or Obligation under the Seals of the *Eaſt-India* and *South-Sea* Companies, or “ any Indorſement thereon.”

1727

The *South-Sea* Company's third Voyage on the *Whale* Fiſhery, its Succeſs.

The *South-Sea* Company having built another new Ship for the *Whale* Fiſhery, they, in this Year 1727, ſent out their whole twenty-five Ships on that Fiſhery; wherein were employed 1,106 Men, *viz.* 762 *Britiſh* Subjects and 344 Foreigners. This too proved an unfortunate Voyage, having loſt two of thoſe Ships; beſide that the remaining twenty-three Ships brought Home but 22½ Whales.

The Fiſhery of *Penſylvania* legally encouraged.

The great River and Bay of *Delawar* in *Penſylvania*, and the Seas adjoining, abounding with Fiſh of various Kinds, fit for foreign Markets, whereby the Trade of *Great Britain*, as well as the Inhabitants of the ſaid Province of *Penſylvania*, would reap conſiderable Benefits, eſpecially by enabling the latter to purchaſe more of the *Britiſh* Manufactures than at preſent they are able to do. For this End an Act of Parliament now paſſed, in the 13th and laſt Year of King *George* the Firſt, *For the importing of Salt from Europe into the ſaid Province of Penſylvania*, in *Britiſh* Ships, navigated as by the Acts of Navigation; for curing their Fiſh, in like Sort as is practiſed in *New-England* and *Newfoundland*, by Virtue of an Act of the 15th of King *Charles* II.

Liverpoole's ſudden and rapid Increaſe in Magnitude, Wealth and People.

Nothing can more obviouſly demonſtrate the amazing Increaſe of *England*'s Commerce, in leſs than two Centuries paſt, than the great Increaſe of many of its Commercial and Manufacturing Towns; ſuch, for Inſtance, as the Town and Port of *Liverpoole*, in *Lancaſhire*, which in our Days is become the greateſt Emporium of the *Britiſh* Empire, next after *London* and *Briſtol*: And, although it is allowed to be an ancient Corporation and Borough, was nevertheleſs ſo inconſiderable in Point of Populouſneſs and Magnitude, even in the laſt Generation, as not to have been made a diſtinct Pariſh within itſelf, until the Year 1699, by an Act of Parliament of the 10th and 11th of King *William*, when alſo a new Pariſh-Church was erected, there being only a Chapel there till then. In the Year 1715, it was ſo much increaſed, that, by an Act of the 1ſt of King *George* the Firſt, a ſecond Pariſh and Church was erected in it. The Author of the third Volume of the *Tour through the whole Iſland of Great Britain*, publiſhed *Anno* 1727, obſerves, “ That in “ his firſt Viſit to *Liverpoole*, *Anno* 1680, it was a large handſome thriving Town.—At his ſecond “ Viſit, ten Years after, it was become much bigger; and, as the Inhabitants reported, twice “ as large as it was twenty Years before,” [*i. e.* about *Anno* 1670:] “ But at his third “ Viſit, *Anno* 1726, it was more than double its Bigneſs of the ſaid ſecond Viſit in the Year “ 1690. And it is ſtill increaſing in Wealth, People, Buſineſs, and Buildings.”

The Town of *Mancheſter*'s vaſt increaſe.

This ſame Author, treating of *Mancheſter*, in the ſame County, obſerves, “ That, within a “ very few Years paſt, here, as at *Liverpoole*, and alſo at *Froome*, in *Somerſetſhire*, the Town is “ extended in a ſurpriſing Manner; being almoſt double to what it was a few Years ago. So “ that, taking in all its Suburbs, it now” [*i. e.* *Anno* 1727.] “ contains at leaſt 50,000 People!

"—That the grand Manufacture which has ſo much raiſed this Town is that of Cotton in all its "Varieties, which, *like all our other Manufactures*, is very much increaſed within theſe *thirty* or "*forty* Years."——The ſaid Cotton Manufacture is probably at leaſt as ancient as the Middle of Queen *Elizabeth*'s Reign; ſeeing *Cambden* makes mention of *Mancheſter* Cottons. The raw Material *Cotton Wooll*, in thoſe early Times, came probably to us ſolely from the *Levant*; but *now* our *American* Colonies ſupply us abundantly with that and many other valuable Productions.——Nevertheleſs, this vaſt Place is properly but a mere Village in Point of Government, as having no Officer higher than a Conſtable: Whereby it may poſſibly be the largeſt *mere* Village in *Chriſtendom*, according to our legal Senſe of that Term!

The like Increaſe, and very near as ſudden, has happened to the Town of *Birmingham*, in *Warwickſhire*; which, in Point of Government, is as much a Village as *Mancheſter*. Its vaſt Increaſe is intirely owing to its Iron and Hard-ware Manufacture, of a great Variety of Sorts: Whereby it is ſaid to employ or ſupport upwards of 30,000 People.

Birmingham's great Increaſe.

In *March* this Year departed this Life, the incomparably great and excellent Sir *Iſaac Newton*, aged 85, Preſident of the Royal Society, Maſter of his Majeſty's Mint: Probably the greateſt Philoſopher, and undoubtedly the greateſt Mathematician in *Europe*; whoſe intire Character however we are far from pretending to draw. It ſhall only ſuffice *us* to ſay, in one Word, That he has not left his Equal, in all Probability, on the Face of the whole Earth; having, even by all the Learned of foreign Nations, been allowed the Pre-eminence; and to be the unrivalled Glory of the *Britiſh* Name and Nation!

The great Sir *Iſaac Newton*'s Death, and brief Encomium.

In this Year the General Court of the *South-Sea* Company agreed to diſcharge all the Borrowers of Money on their Stock and Subſcriptions, in the famous Year 1720, who had not already repaid the ſame; on Condition of their paying back only 10 *per Cent.* of the Money ſo borrowed.

The Borrowers on *South-Sea* Stock and Subſcription to be diſcharged, on their paying 10 *per Cent.*

In the ſame Year the *Royal African* Company's General Court came to ſundry Reſolutions, for carrying on their Trade, and for preventing the ſeparate Traders from interfering with them.—For reducing their then nominal Capital Stock, ſo as every 800 *l.* be reduced to 100 *l.* and ſo as their whole Capital ſhall not exceed 400,000 *l.* including therein a certain Quantity of additional Stock, to be created in their corporate Capacity, and to be ſold out to Individuals, for enabling them to carry on their ſaid Trade. All which however came to nothing!

The *African* Company's Proceedings.

The Iſland of *Madagaſcar* lying within the *Eaſt-India* Company's Limits of Trade, an Act of Parliament, of this 13th Year of King *George* the Firſt, was obtained, *To enable the* South-Sea *Company, with the Licence and Conſent of the* Eaſt-India *Company, to take in Negroes there, and to deliver the ſame at* Buenos-Ayres: The *South-Sea* Company giving Security to the *Eaſt-India* Company not to break Bulk any-where within the Limits of the latter Company, nor to ſail or go to any Coaſt, Iſland, Port or Place, within their Limits, other than to the ſaid Iſland of *Madagaſcar*, under Forfeiture of their Ships, Furniture, and Ladings, and of double the Value. This Act to continue for *ſix* Years only; and the *South-Sea* Company was thereby limited to four Ships annually, and to carry to *Madagaſcar* nothing but the neceſſary Proviſions, *&c.* ſolely for the Purchaſe of Negroes. It was about this Time that the ſaid *South-Sea* Company actually employed upwards of thirty Ships and Sloops (beſide their great annual Ship) in their Negroe Trade to the *Spaniſh* Ports of *America*, and in making Returns for the ſame.

The *South Sea* Company legally licenced, with the Conſent of the *Eaſt-India* Company, to purchaſe Negroes at *Madagaſcar*.

By another Statute, of this ſame Year and Seſſion, *For enlarging the Time for hearing and determining Claims by the Truſtees for raiſing Money on the Eſtates of the late Directors of the* South-Sea *Company and others*, the net Produce of thoſe Eſtates is directed to be applied ſolely for the Benefit of the ſaid Company.

The Produce of the late *South-Sea* Directors, *&c.* Eſtates, to be ſolely enjoyed by that Company.

In this Year *William Burnet*, Eſquire, the then worthy Governor of *New-York* Colony, having duly conſidered, That the main Support of the *French* Colony of *Canada* was the *Fur* and *Peltry* Trade with the *Indians*; and that, moreover, their Towns of *Quebec* and *Montreal* were chiefly ſupplied with *European* Merchandize by our Merchants of *New-York*, at a much cheaper Rate than they had them from *France*; he rightly inferred, That if the Traders of *New-York* were totally debarred from carrying their Goods to *Canada*, they might themſelves directly, or at firſt Hand, ſupply the *Indian* Tribes on and near the Lakes of *Canada* with *Engliſh* Merchandize: For that End he obtained an Act of the Aſſembly of *New-York*, for opening a moſt profitable Trade directly with thoſe *Indian* Nations who till now had dealt intirely with the *French* of *Canada*. For which Purpoſe the *New-York* Aſſembly was at the Expence, this very Year, of building and fortifying a trading Place at *Oſwego*, on the Eaſt Bank of the Lake *Ontario*, where they continued to keep a Garriſon, (till they were aſſaulted and driven out by the *French* from *Canada*, in the Year 1757, that Fort having been too ſlightly built) and had upwards of 300 Traders there, who conſtantly met the *Indians* from *Canada*, and from the great Lakes Weſt and North from the Lake *Ontario*, and South from the Lake *Erie*. This was a promiſing Step towards our maſtering all the inland Trade of *North-America*, by erecting fortified Truck-houſes on the farther Lakes in and Weſt of *Canada*. But, in ſucceeding Times, the *French* in thoſe Parts were, through our ſhameful Supineneſs, ſuffered to make gradual Encroachments on the Boundaries of that and our other Northern Provinces of *America*, till it became very near too late to put a Stop to their Career.

The Governor and Aſſembly of *New-York* take prudent Meaſures for extending their *Indian* Trade.

Oſwego Fort, in *New-York* Colony, its advantageous Situation; till loſt to the *French* of *Canada*.

By a Statute of the ſame 13th of King *George* the Firſt, (Cap. iii.) *For redeeming ſundry Annuities transferrable at the* Bank of England, *and the Annuities payable on ſtanding Orders*, &c. All the redeemable Annuities transferrable at the *Bank*, and thoſe aſſignable at the *Exchequer*, which

were

were not ſubſcribed into the *South-Sea* Company in the Year 1720, were now paid off by the Sinking Fund.

The Goodneſs of the Woollen Manufacture in the Counties of *Glouceſter*, *Somerſet*, and *Wilts*, to be regulated by an Inſpector:

By another Statute, of this ſame Seſſion of Parliament, *For the better Regulation of the Woollen Manufacture*, &c. the Juſtices of the Counties of *Glouceſter*, *Wilts*, and *Somerſet*, are impowered to appoint a certain Number of Inſpectors in each of thoſe Counties, with a Salary of 30 *l.* each yearly; who ſhall, on every Week-Day, have Power to enter into and inſpect all Mills, Work-houſes, and Tenter-grounds of Clothiers, *&c.* concerned in the manufacturing and milling of mixed or medley Woollen Broad Cloths, for meaſuring, and otherwiſe examining the Goodneſs thereof; and ſhall ſtamp his Name thereon with a Leaden Seal, if found ſufficient Cloth. This Office is inſtead of the ancient one of *Aulneger*, and alſo of the ſubſequent Inſpectors, which, for Want of ſufficient Checks, were become uſeleſs. Theſe Inſpectors were to lay their Regiſter-Books before every general Quarter-Seſſion for each County, with an Account of all Penalties and Forfeitures incurred by the Makers of inſufficient Cloths.

And alſo the Dying of Black Cloth every-where in *England*.

Logwood not to be uſed in the Dying of *Blue* Cloths.

By another Statute of this Seſſion, *For preventing Frauds and Abuſes in the Dying-Trade*, Penalties are inflicted on Dyers of Black-Bays, and other Woollen Goods, without *Woad*, *Indico*, or *Madder*. And a Penalty is alſo inflicted on every Perſon uſing *Logwood* in the Dying of *Blue* in any Kind of Woollen Goods.

The *Oſtend Eaſt-India* Company quite aboliſhed.

After all the Buſtle which the *Auſtrian Netherlanders* and the Court of *Vienna* had ſo long made about their *Oſtend* Company's Trade to the *Indies*, the Arguments urged by *Britain* and *Holland* were ſo cogent and ſo effectually powerful, that the Emperor found himſelf neceſſitated now firſt to ſuſpend that Company's Charter for ſeven Years, and afterward to revoke it intirely!

Gibraltar in vain beſieged by *Spain*.

The *South-Sea* Company's Effects in *America* ſeized a 2d Time by *Spain*.

The King of *Spain* having now in vain laid Siege to *Gibraltar*, before any formal Declaration of War againſt the Crown of *Great Britain*, he at the ſame Time directed to be ſeized all the Effects of the *South-Sea* Company in *America*, with the great Ship *Prince Frederick* and its Cargoe at *La Vera Cruz*, to the Amount of upwards of 120,000 *l.* Sterling. And this was the ſecond Time that the Court of *Madrid* found, [or thought they found] their Account in ſuch ſudden Seizures; whereby the Precariouſneſs of this Company's Trade to the *Spaniſh Weſt-Indies* did now but too plainly appear!

The Increaſe of *Great Britain*'s *Sinking-Fund*, and a View of its Operation, provided it had been punctually applied for paying off the National Debts.

The great National Debt a conſiderable Obſtruction to the Commerce of *Britain*.

At *Midſummer* this Year, the Reduction of the Intereſt on the National Debs from 5 to 4 *per Cent.* took place; whereby the famous *Sinking-Fund* was increaſed to above one Million *per Ann.* Had thoſe whoſe Province it properly was to keep punctually to the paying off at leaſt *one Million* of the Public Debts annually, from this Year 1727 to the Year 1739, when we declared War againſt *Spain*, in how much eaſier a Situation would the Nation then have been? Inſtead of which frugal Meaſure, that ſacred *Fund* has been either directly or indirectly ſacrilegiouſly and wantonly violated, to the inconceivable Damage of the Nation's Commerce, which otherwiſe would have long ſince been greatly eaſed by the aboliſhing of ſuch Taxes, Duties, and Cuſtoms, as are at preſent very conſiderable Clogs on our Manufactures and foreign Commerce, by enabling our Rivals to underſell us at foreign Markets, to our unſpeakable Detriment! ☞ By the neceſſary Operation of the ſaid *Sinking-Fund* of only *one Million yearly*, it was very plainly ſhewn by a judicious Pamphlet, intitled, *An Eſſay on the Public Debts of this Kingdom*, “ That, ſuppoſing the then National Debt of *fifty Millions*, and the ſaid *Sinking-Fund* of *one Million*, to be both at 4 *per Cent.* Intereſt, the latter increaſing annually in like Proportion as ſuch a Sum put out at *Compound-Intereſt*, would do, the whole National Debt would have been diſcharged by the Year 1756.

“ Thus, (for Illuſtration) at *Midſummer* 1728, one Million would be paid off; and at *Midſummer* 1729 the *Sinking-Fund* would be 1,040,000 *l.* and that ſame Year and Term the Debts would be leſſened 2,040,000 *l.* At *Midſummer* 1730, the *Sinking-Fund* would be increaſed to 1,080,000 *l.* and the Debts would be leſſened 3,121,600 *l.*—and ſo on to the ſaid Year 1756, when the ſaid *Sinking-Fund* would be increaſed to 30 Millions, and the total Amount of the Debts paid would be 50 Millions.

“ Again (ſays our ſaid well-known Author, Mr. *John Adlam*, long ſince dead) ſuppoſing the 50 Millions had been at 3 *per Cent.* from *Midſummer* 1727, then at *Midſummer* 1751, (inſtead of 1756) the *Sinking-Fund* would be increaſed to 30 Millions, and the Debt of 50 Millions would then be diſcharged.”

The ſaid Author farther judiciouſly and honeſtly demonſtrated the Damage and Obſtructions which would happen, if the *Sinking-Fund* ſhould be miſapplied or diverted from its annually leſſening the Public Debts.

We ſhall here only farther note, That upon this ſecond Reduction of the Intereſt of our National Debts, their Market-Price advanced very conſiderably.

A Law for the improving the Fiſheries and Manufactures of *Scotland*.

In this ſame Year, an Act of Parliament paſſed, *For encouraging and promoting Fiſheries, Manufactures, and other Improvements, in that Part of* Great Britain *called* Scotland. Whereby the Crown was impowered to appoint Commiſſioners for managing the Application of the Funds for improving Fiſheries and Commerce there: And the ſaid Commiſſioners were annually to lay before the King any Alterations neceſſary for improving of the Fiſheries and Manufactures of that Country.

A.D. 1727 By a Statute of the 1ſt Year of King *George* II. (Cap. viii.) *For granting an Aid to his Majeſty, by Sale of Annuities to the* Bank of England, *at* 4 *per Cent. charged on the Duties on Coals and Culm,* &c. the *Bank* Fund was increaſed by 70,000 *l.* Intereſt, on 1,750,000 *l.* advanced on thoſe Duties, redeemable by Parliament. And the *Bank* hereupon thought it prudent to declare a Reduction of the yearly Dividend on their Capital Stock from 6 to 5½ *per Cent.* from *Lady-day* 1728.

The *Bank of England*'s Fund increaſed, and the Dividend on their Capital Stock leſſened.

By this ſame Statute a Million of the National Debt was paid off out of the *Sinking Fund*, viz. 500,000 *l.* to the *South-Sea* Company, which was to be paid off by ſinking ſo much of the undiſtributed Stock forfeited by the late Directors, &c. *Anno* 1720; which was to go to pay the Company's Debts. Hereupon that Company ſunk 250,000 *l.* from the Capital Stock, and the like Sum from *South-Sea* Annuity Stock.

The *Sinking-Fund* pays off one Million of National Debt, *viz.* 500,000 *l.* to the *South-Sea* Company;

And 500,000 *l.* was in like Manner paid to the *Bank of England*, being Part of the two Millions added to their Capital by an Act of the 3d of King *George* I. whereby the Total of their Capital Stock was reduced to 4,875,027 *l.* 17 *s.* 10½ *d.*

and 500,000 *l.* to the *Bank of England.*

1728 By a preliminary Convention between *Great Britain* and *Spain*, ſigned at the *Pardo*, near *Madrid*, on the 6th of *March* 1728, it was agreed, on the one Hand, "That his *Britannic* Majeſty ſhould "withdraw his Fleets from the Coaſts of *Spain*, and from the *Spaniſh Weſt-Indies*; and that the "contraband Trade, and other Cauſes of Complaint, which the *Spaniards* may have in Relation "to the Ship *Prince Frederick*; and the Reſtoring of Prizes taken on each Side, ſhall be decided "at a future Congreſs."

Peace between *Great Britain* and *Spain* reſtores the *South-Sea* Company's Effects and Trade.

On the other Hand, *Spain* agrees, 1ſt, "Immediately to raiſe the Blockade of *Gibraltar*. "2dly, To order the Ship *Prince Frederick*, with her Cargo, to be delivered up to the *South-Sea* "Company's Agents at *La Vera Cruz*. And, 3dly, to reſtore the Commerce of that Company "with *Spaniſh America*, agreeable to the *Aſſiento* Contract."

Dr. *Berkley*, Dean [ſince Biſhop] of *Derry*, having obtained a Patent from King *George* the Firſt, for erecting a College in *Bermudas*, for the Inſtruction of Youth in all Manner of liberal Sciences, he ſailed thither this Year, taking with him ſeveral Tradeſmen and Artiſts, and certain Stores and Merchandize, and a good Library. He ſailed firſt for the Continent of *North America*; where, maturely weighing the Practicability of his wild though well-intended Scheme, which was for educating the Children of the Inhabitants of the Continent and Iſlands of *America*, at the ſmall *Bermudas* Iſles, in the midſt of a tempeſtuous Ocean, far removed from any Land, either Continent or Iſland, and every Way improper for that Purpoſe; he was ſo well adviſed, at length, as to return to his Deanry, without ſo much as ſetting Foot on the now almoſt-worn-out *Bermudas* Iſles!

Biſhop *Berkley*'s well-meant but impracticable Project of erecting an Univerſity at the *Bermudas* Iſles.

By a Treaty of Peace and Commerce between the King of *Great Britain* and the Emperor of *Morocco*, ſigned at *Mequinez*, it was now ſtipulated,

An honourable Treaty of Peace and Commerce between *Great Britain* and *Morocco.*

"Iſt, That all *Moors* and *Jews*, Subjects of *Morocco*, ſhall be allowed a *free* Traffic for *thirty* "Days" [*i. e.* to buy and ſell] "in the City of *Gibraltar* and at the Iſle of *Minorca*, though not "to reſide at either Place; but to depart with their Effects, without Moleſtation, to any Part of "the *Morocco* Dominions.

"II. On the other Hand, the *Britiſh* Subjects in *Barbary* ſhall not be obliged to appear before "the *Cadi*, or the Juſtices of the Country, but only before the Governor of the Place: And "the *Britiſh* Conſuls are to take Cognizance of, and adjuſt the Differences they may have with "the Natives of the Country.

"III. The menial Servants of *Britiſh* Subjects, though Natives of the Country, either *Moors* "or *Jews*, ſhall be exempted from Taxes of all Kinds.

"IV. *Britiſh* Subjects taken on board of foreign Ships by the Subjects of *Morocco* ſhall immediately be ſet at Liberty, and ſent to *Gibraltar*.

"V. Proviſions may be freely bought, and other Neceſſaries, for his *Britannic* Majeſty's "Fleets, or for his City of *Gibraltar*, in any Port of the Emperor of *Morocco*, at the Market "Prices; and ſhall be ſhipped off without paying Cuſtom."

Theſe Conceſſions from that *barbarous* People are extremely honourable to *Britain*; but they would be no longer kept than we are Maſters at Sea, and are in Poſſeſſion of the moſt important Fortreſs and Port of *Gibraltar*!

Toward the Cloſe of the Reign of King *George* the Firſt, the Colonies of *South* and *North Carolina* were grievouſly afflicted with Invaſions from the *Indians* in their Neighbourhood, whereby the People were unable (even with what Aſſiſtance they could procure from neighbouring Colonies) to withſtand thoſe Savages. And the Lords Proprietors being unwilling to take upon themſelves the Expence of this *Indian* War, the Deputies of thoſe Colonies humbly beſought the King to take them under his Protection. Whereupon the Duke of *Beaufort*, the Lord *Craven*, Sir *John Colleton*, *James Bertie*, Eſquire, *Dodington Greville*, Eſquire, *Henry Bertie*, Eſquire, *John Cotton*, Eſquire, *Joſeph Blakes*, Eſquire, *Mary Dawſon*, and *Elizabeth Moore*, being the Repreſentatives of the original Proprietors of *Seven-eighth Parts* of thoſe two Provinces, (either in their own Right, or in Truſt) declaring, by Petition to his Majeſty, their Willingneſs

Carolina's Charter ſurrendered to the Crown, whereby it was made a Regal Colony. Since divided into two ſeparate Governments.

neſs to ſurrender their Charters to the Crown for a valuable Conſideration. Hereupon an Act of Parliament paſſed, in the 2d Year of King *George* II. *For eſtabliſhing an Agreement with Seven of the Lords Proprietors of* Carolina, *for the Surrender of their Title and Intereſt in that Province to his Majeſty.* In Conſideration whereof the ſaid Seven Proprietors were to be paid the Sum of 17,500 *l.* (being 2,500 *l.* for each ſeventh Part) and 5,000 *l.* more for the Arrears of Quit-Rents, *&c.* due to them. Thus for ſo ſmall a Sum as 22,500 *l.* were ſeven eighth Parts of thoſe fine Provinces made Regal Governments from and after the 1ſt of *June* 1729. And as the Lord *Carteret* (ſince Earl of *Granville*) choſe to retain the other remaining *eighth Part* of *Carolina* in his own Right, a Clauſe in the ſaid Act of Parliament " provides or ſaves to his Lordſhip, his Heirs, Executors, " Adminiſtrators, and Aſſigns, all ſuch Eſtate, Right, Title, *&c.* to one undivided eighth Part " or Share of the ſaid Provinces, and one-eighth Part of all Arrears of Quit-Rents, *&c.* there- " of.——Notwithſtanding which the Government of the whole is hereby made intirely *regal.*"

Carolina has greatly flouriſhed, ſince it was brought under the immediate Government of the Crown.

And in this regal State *Carolina* (under two ſeparate Governors, Councils, and Aſſemblies) has wonderfully flouriſhed and increaſed in Trade and Commerce, and has extended its Plantations farther back or weſtward.——Proper Supplies and Relief having been ſent thither by the Crown; whereby the neighbouring *Indians* were reduced to live in a peaceable Condition till very lately, when alſo they have again been reduced to reaſonable Terms, after much Bloodſhed.

The Succeſs of the *South-Sea* Company's fourth *Whale Fiſhing* Voyage.

In this ſame Year 1728, the *South-Sea* Company ſent out their twenty-three remaining Ships for their *Whale* Fiſhery, and returned with only the Blubber and Fins of *eighteen* Whales; which was an undoubtedly loſing Voyage.

There was, at this Time, printed in the new Edition of *Harris*'s Collection of Voyages, a Liſt of the Dividends made by the *Dutch Eaſt-India* Company, from the Year 1605 to 1728, both Years included, 12½ *per Cent.* being the ſmalleſt Dividend made for one whole Year in all that Number of Years, and 75 *per Cent.* the higheſt. Thoſe Dividends were ſometimes all in Money; at other Times in Bonds, bearing an Intereſt at 4 or 3½ *per Cent.* Sometimes alſo they were made in *Mace*, *Cloves*, and *Pepper*; but always in Money ſince the Year 1698. So that in the ſaid Space of 124 Years they had, on an Average, divided ſomewhat more than 24 *per Cent.* one Year with another, or in all 2,784½ *per Cent.* in the whole of the ſaid 124 Years; or about *eighteen* Millions Sterling, on their intire Capital of 650,000 *l.* Sterling, drawn moſtly from other Nations: Beſide which, we are to conſider the great Sums paid by this Company to the State, for the frequent Renewals of their Privileges, amounting to more than its ſaid original Capital. And, in the third Place, the vaſt Eſtates gained by the numberleſs Officers of all Sorts in the Company's Service ſince its firſt Eſtabliſhment. 4thly, What an immenſe Sum muſt have been laid out by the Company, in the Building and Repairs of their Ships, *&c.* in the Employment given to ſo many Thouſands of People thereby, and by the Manufactures and Merchandize exported: All which, and other Profits accruing to the State by this Commerce, has undoubtedly greatly overbalanced all the *Silver* which from the Beginning has been exported to and never returns from *India*. And we cannot here avoid obſerving, that all theſe Conſiderations are equally applicable to our own *Engliſh Eaſt-India* Company, though perhaps in a ſomewhat leſſer Degree! And may therefore juſtly ſerve for a farther Defence of our *Eaſt-India Commerce.*

In this ſame Year, the *Britiſh* Houſe of Commons preſented to the King a Repreſentation or particular Account of the National Debts, contracted before *Chriſtmas* 1716, and how much thereof has been ſince diſcharged by the *Sinking-Fund*, tho' till now but in its Infancy. " Which " Debt ſo diſcharged amounted to 2,698,416*l.* 9*s.* 7¾*d.* ſince *Chriſtmas* 1716.——That by the " ſeveral Reductions from 6 to 5, and from 5 *now* to 4 *per Cent.* on the greateſt Part of the " Public Debts, ſo great Savings of Intereſt have been made, that the ſaid *Sinking-Fund* may now " be eſtimated to be about 1,200,000 *l. per Annum*; and will be every Year increaſing from the " farther Savings of the Intereſt of the remaining Debts from Time to Time, as they ſhall be " paid off. Which Increaſe of the *Sinking-Fund* from 400,000 *l.* to about 1,200,000 *l.*" [ſince *Midſummer* 1727.] " being in the Hands of the Government, and applicable from Time to Time " to the Diſcharge of the Principal, makes a Gain and Profit to the Public equal to the Diſ- " charge of One-third of the principal Debt; ſo that the ſaid additional 800,000 *l.* to the *Sink-* " *ing-Fund*, if valued at *twenty-five* Years Purchaſe, at which Rate all Annuities are *now* currently " ſold, makes a real Profit to the Public of *twenty Millions!*——And if, notwithſtanding the " many Difficulties this Nation has laboured under,—by an unnatural Rebellion, and by the " many heinous Plots and Conſpiracies ſince formed, for overturning the Religion and Liber- " ties of our Country:——And notwithſtanding the embroiled Condition of the Affairs of " *Europe*,—we have been able to diminiſh the National Debts ſo much already; *what may we* " *not hope for in regard to a ſpeedy and ſenſible Diſcharge of them for the future?*" Upon which Repreſentation we ſhall only in brief remark, as many have before done, That although the then and ſucceeding Miniſtries had afterward many ſuch Difficulties to ſtruggle with as are above enumerated, more ſurely might have been done for increaſing the *Sinking-Fund*, by abſolutely preſerving it inviolable; although it be allowed, that it would have been attended with many and great Difficulties, conſidering that a ſecond unnatural Rebellion, and two very expenſive Wars have happened ſince that Repreſentation was made. What is paſt needs not to be enlarged on; but ſurely hereafter, (eſpecially in Times of Peace) a determined National Frugality ought zealouſly to be cultivated *; and it is earneſtly to be hoped and wiſhed, That, in order to increaſe the ſaid *Sinking-Fund*, the Public might be enabled to avail itſelf from a rational Reduction of the Salaries of many uſeleſs Offices and Employments in the Revenue, *&c.* the Fee-ſimple whereof (it is humbly apprehended) would probably amount to a greater Sum than perhaps many may apprehend, were a ſtrict Enquiry made thereinto.

National Frugality is the beſt Means for getting rid of National Incumbrances.

---

* *Non intelligunt Homines quantum* Vectigal *ſit* Parſimonia! Cicero.

A.D. 1728

The vaſt Benefits of *Jamaica*, and alſo of our other Sugar-Iſles to the Commerce, Shipping and Manufactures of *Great-Britain*.

In a Vindication of the Iſland of *Jamaica* at this Time, from certain Aſperſions on the Conduct of the Planters and of their Aſſembly, and pleading for ſome Favours from the Legiſlature of *Great-Britain*; it was computed, "That the Trade of that Iſland employs 300 Sail of Ships and above 6000 Seamen, and that the very Duties on the Imports from thence amount to near 100,000*l. per Annum.*——That there are eight fine Harbours in it, beſide many Coves and Bays where Ships may ſafely ride: There are alſo 84 Rivers which diſcharge into the Sea, and ſeven Times as many leſſer Rivers and Springs which run into them.——That its principal Productions, beſide Sugars, are Cotton, Ginger, Piemento, Mahogony Wood, Logwood, and Indico. That very little of the four laſt-named Commodities are imported from the reſt of the *Britiſh* Plantations: So that, but for *Jamaica*, we ſhould be obliged to purchaſe them of the *French*, *Dutch*, and *other Nations*.——That *Cotton* is neceſſary to work up with Wooll in many of our Manufactures, *&c.*——Ginger is chiefly exported, though great Quantities are likewiſe uſed at Home.——Their *Piemento* leſſens the Conſumption of Spices, which are only to be had of the *Dutch* at their own Rates.——That *Indico, Logwood, Fuſtick, &c.* are uſed by Dyers, and are abſolutely neceſſary in many of our Manufactures; and that before we had thoſe Commodities of our own, we paid five Times the Prices for them we now do, and for ſome of them more.——That, before our *Weſt-India* Plantations were ſettled, we paid the *Portugueſe* from 4 to 5*l. per C. Weight* for *Muſcovado* Sugars, now ſold from 22 to 35*s.* as in Goodneſs.——And above 5*l. per Cwt.* for Ginger, now commonly ſold at 22*s.* 6*d.*——That our *Dyers Wares* were bought of the *Spaniards*, to whom we paid for *Logwood* from 100 to 130*l. per Ton*, which may now be had at 9*l. per Ton*; and other Goods uſed in Dying, proportionably. So that, by having thoſe Plantations, we not only ſave ſo much as was formerly paid for thoſe Commodities to *Foreigners*, but we are alſo able to furniſh other Nations therewith: And our Manufacturers, by having them at *leſs Prices* than they formerly had them, are enabled to ſell their Commodities proportionably cheaper, which is undoubtedly a very great Advantage to the Nation." (*Boyer's Political State of Great-Britain*, Vol. xxv. for *February* 1728.)

Dyers Wares, their Cheapneſs a great Benefit to *Britiſh* Manufactures.

This Vindication, or Survey of the Benefits of *Jamaica*, and of our other *Weſt-India* Colonies, to their Mother-country, places them in ſo advantageous a Light, and gives alſo ſo clear, though ſuccinct, a View of our Commerce with them, as well merits a Place in this Work.

A View of the Circumſtances and Commerce of the *Daniſh Eaſt-India* Company.

In this ſame Year, the *Daniſh Eaſt-India* Company, reſiding at *Copenhagen*, publiſhed Propoſals for a new Subſcription to be taken at *Altena*, near *Hamburgh*, for enlarging their ancient Capital Stock.

I. "The new Subſcribers to be equally intitled to all the Benefits and Privileges, which the old Members poſſeſs, in reſpect of the Trade, Shipping, Forts, Settlements, Revenues, Houſes, and other Effects whatever.

II. "The old Capital, conſiſting of 250,000 Rix-dollars, divided into 250 Shares, each being of 1000 Rix-dollars, to retain likewiſe equal Benefits with the new Subſcribers.

III. "The Company, after this Union with the new Subſcribers, were, in their joint Capacity, to pay off their intire Debts, conſiſting of 160,000 Rix-dollars: but the old Proprietors were not to be intitled to any Dividend till the Year 1733.

IV. "The Actions, or Shares, of the new Subſcribers to conſiſt of 1000 Rixdollars each, and the half Shares to be 500 Rix-dollars: For each Transfer to pay two Rix-dollars to the Company, and half a one to the Poor.

V. "The Company's Creditors may take new Actions thereof for the Debts due to them.

VI. "The King, by his Octroy, declares, that the Shares ſhall not be liable to any Seizure or Stop, upon any Account whatever." [*The Reader needs not to be told that* Denmark *is an abſolute Monarchy!*]

VII. "The Money, ariſing by new Subſcriptions, to be wholly employed for ſending out Ships to *Tranquebar*," [their own Fort on the Coaſt of *Coromandel*] "*Bengal*, and *China*.

VIII. "The four additional or new Directors may be all Foreigners; and 10 Shares to be the Qualification-ſtock of every Director. Every ſingle Share ſhall have one Vote in the General Courts; and a Proprietor of 20 Shares ſhall have 20 Votes; and none ſhall have any more Votes than 20, although their Shares be ever ſo many.

IX. "If any two Directors ſhall be diſſatisfied with the Conduct of the other Directors, they may ſummon a General Court to acquaint the Company therewith.

X. "The General Courts have plenary Power to do whatever they ſhall judge convenient for the Advantage of the Company.

XI. "The new Shares to be ſubſcribed ſhall not exceed 2,250, *i. e.* in the whole; and the new or additional Stock ſhall not exceed 2,250,000 Rix-dollars."

N. B. There were 25 other Articles of leſſer Importance, and are therefore omitted.

To

To theſe Propoſals the old Company (for removing of any Objections which might be made in reſpect to their then Circumſtances) added, "That they had very valuable Effects, ſuch as, the Town of *Tranquebar*, a very important Place, with 200 Pieces of Cannon, beſide Ammunition, and a yearly Income of 10,000 Crowns, and alſo ſeveral Duties and Revenues, increaſing every Year in Proportion to the Increaſe of Inhabitants. That, beſides, they have the Caſtle of *Danneburg*, on the rich Coaſt of *Coromandel*, conveniently ſituated for Trade, and particularly for Pearls and Diamonds: Alſo *Porto-novo*, on the ſame Coaſt: Two Ships with their Cargoes, now at Sea, bound to *Tranquebar*, and ſome other Ships and Factories, *&c.*" From all which Particulars, a nearly exact State of the *Daniſh Eaſt-India* Company's Circumſtances and Commerce, may be gathered; not much, however, to their Advantage.

Ships arrived in one Year in the Port of *London*.

Ships arriving at *London*, from foreign Ports, between *Chriſtmas* 1727, and *Chriſtmas* 1728, *viz. Britiſh* Ships, 1,839: Foreign Ships, 213: Coaſters, 6,837; in all, 8,889 Ships; which Number is, of later Years, conſiderably increaſed.

A Loan by the *Bank* of *England*, to the Government, of 1,250,000 *l.* at 4 *per Cent.*

By an Act of the *Britiſh* Parliament, in the ſecond Year of King *George* the Second, *For raiſing the Sum of* 1,250,000 *l. by Sale of Annuities to the Bank of* England, *&c.* that Corporation advanced the ſaid Sum to the Public, at 4 *per Cent.* Intereſt, charged on the *Surplus*'s of the Fund of Lottery 1714; redeemable from *Midſummer* 1730, by Payments of not leſs than 500,000 *l.* at a Time. Yet this receiving of ſo low an Intereſt obliged the *Bank* to lower their Dividend from 3 to 2¼ *per Cent.* at *Michaelmas* 1730, for that half Year.

Two new Pariſhes erected in the North-eaſtern and Eaſtern Suburbs of *London*.

In this ſame Year 1729, the Hamlet of *Spital-fields*, long ſince become a vaſtly-extended Suburb, chiefly by the very great Number of Silk-manufacturers therein, and in which new Streets were more and more increaſing, was, by an Act of Parliament, *For making the ſaid Hamlet a new Pariſh, &c.* accordingly ſo made, and endowed as one of the 50 new Churches, by the Name of *Chriſt-Church*; this Pariſh was before a Part of the Pariſh of *St. Dunſtan*'s, *Stepney*.

And by another Act, of the ſaid ſecond Year of King *George* the Second, another new Pariſh was erected in the Hamlet of *Wapping-Stepney*, alſo taken out of *St. Dunſtan*'s Pariſh, *Stepney*, by the Name of *St. George in the Eaſt*, ſituated in the Street named *Ratcliff-highway:* That eaſtern Suburb being of late Years conſiderably increaſed by the Increaſe of our Commerce and Shipping.

A Law for farther regulating of *Watermen*, *Wherrymen*, and *Lightermen* on the River *Thames*.

By a Statute, of the ſaid ſecond Year of King *George* the Second, *For making more effectual ſeveral Acts paſſed relating to Watermen, Wherrymen and Lightermen, rowing on the River* Thames, *and for better ordering and governing them*, the ſeveral following Regulations were made; as,

I. "No Waterman, *&c.* but a Houſe-keeper, or who at leaſt has ſome known Place of Abode, ſhall take an Apprentice, under 10 *l.* Penalty: And ſuch Apprentice to be duly regiſtered, as well as the Maſter, and alſo his Place of Abode, by the Clerk of the Watermens Company: And on Neglect of ſo regiſtering any Apprentice, and alſo the Maſter's Place of Abode, that Company may turn ſuch Apprentice over to another Maſter.

II. "No Apprentice ſhall be truſted with the ſole Care of a Boat, (between *Graveſend* and *Windſor)* till he be 16 Years of Age, if a Waterman's Son; or 17 Years of Age, if a Landman's Son; under the Penalty of ten Shillings on the Maſter.

III. "None but ſuch as ſhall have ſerved ſeven Years to any Waterman, Wherryman, or Lighterman, (except Trinity-houſe Men; Fiſhermen; Ballaſt-men; and Perſons employed in rowing or navigating *Weſtern Barges*, *Mill Boats*, *Chalk Hoys*, *Faggot* and *Wood Lighters*, *Dung Boats* and *Gardeners Boats*; in ſuch Manner as has been accuſtomed by Allowance of a former Statute) ſhall row or cauſe to be rowed or worked any Boat, Wherry, Lighter, or other Veſſel on the ſaid River for Hire or Gain; on Forfeiture of 10 *l.* or elſe Impriſonment. Yet Owners of Keys, (or Quays) between the *Hermitage Bridge* and *London Bridge*, may uſe their large Crafts or Lighters as heretofore, for the carrying of Goods and Merchandize to and from their Keys and to and from Ships, and to employ therein Watermen, *&c.* duly qualified. Penalties to be raiſed by the Rulers of the Watermens' Company, for the Benefit of their Poor."

Naval Stores to be preſerved in *America* for the Royal Navy, and alſo to be imported from *Scotland*.

The laſt Statute we ſhall mention of this ſecond Year of King *George* the Second, is, *An Act for better Preſervation of his Majeſty's Woods in* America, *and for the Encouragement of the Importation of naval Stores from thence*; *and to encourage the Importation of Maſts, Yards, and Bowſprits from* Scotland. Which, after reciting a former Statute for this Purpoſe, enacts, "That from the 29th of *September* 1729, no Perſon in the Colonies of *Nova-Scotia*, alſo in *New-Hampſhire*, the Province of *Maine*, the *Maſſachuſet's-Bay*, *Rhode-Iſland*, and *Providence-Plantation*; the *Naraganſet-Country*, or *King's-Province*; and *Connecticut*, all in *New-England*; as alſo in *New-York* and *New-Jerſey*, in *America*; or in any other Province in *America*, now belonging, or that ſhall hereafter belong to the Crown of *Great-Britain*; ſhall preſume to cut, fell or deſtroy any white *Pine* Trees, fit for maſting the Royal Navy; (except only ſuch as are the Property of private Perſons) notwithſtanding the ſaid Trees do or may grow within the Limits of any Townſhip laid out, or to be laid out hereafter, without his Majeſty's royal Licence firſt obtained.—— IIdly, And whereas King *William* and Queen *Mary*'s Charter, in the third Year of their Reign, granted to the Province of the *Maſſachuſet's-Bay*, did reſerve to themſelves and Succeſſors all Trees of the Diameter of 24 Inches and upwards, at 12 Inches from the Ground, growing in that Province, on any Soil or Ground not before granted to any private Perſons; in order, therefore, to make that Reſervation more effectual, it was now enacted, that no Perſon within

"the

A. D. 1729

the ſaid Province ſhall ſo cut or deſtroy any ſuch white *Pine* Trees, *on any Land or Soil, not granted to private Perſons before the 7th of* October 1690; under the Penalties of the Act of the 8th of King *George* the Firſt. IIIdly, New and more moderate Premiums are granted for the following naval Stores to be raiſed and imported from *America*," [needleſs to be here again recited] "viz. *Maſts*, *Yards*, *Bowſprits*, *good Tar*, *Pitch* and *Turpentine*: And ſuch naval Stores imported ſhall repay thoſe Premiums, when re-exported.———A Premium is alſo enacted for the Importation of Maſts, Yards, and Bowſprits from *Scotland*, where" (as this Act ſets forth) "there are in ſundry Parts great Store of Pine and Fir Trees." [But ſo very difficult to bring down to Sea-ports, as has rendered that Part of this Act and of that of the 8th of King *George* the Firſt, hitherto quite impracticable]

On the 12th of *October* 1729, the King of *Denmark*, by a new Charter to his *Eaſt-India* Company, takes it into his immediate Protection, intending to make it one of the moſt flouriſhing of any in *Europe*. The Subſtance of which Charter is, *viz.*

The *Daniſh Eaſt-India* Company's Charter.

I. "He grants the Company 40 Years after the Expiration of its preſent Term: During which Time none but ſuch as ſhall be authoriſed by them ſhall carry on any Commerce beyond the *Cape of Good Hope*, on Forfeiture to this Company of their Ships and Merchandize.

II. "The Company's Ships and Merchandize ſhall, on no Pretence, be arreſted, detained, or ſearched.

III. "The Capital of Stock ſhall be exempted from all Duties and Impoſitions, either in Time of War or Peace; and even the Stock of the Subjects of ſuch Nations, with whom the *Daniſh* King may at any Time be at Enmity, ſhall not be ſtopped or ſeized, on any Pretence whatever.

IV. "This new Company ſhall conſiſt of 750 Shares of 1000 Crowns each, *Daniſh*, (including the Stock of the old Company, being 250,000 Crowns) There ſhall be alſo half Shares of 500 Crowns each."

N. B. This is a royal Eſtabliſhment of the Propoſals of this Company, in the preceding Year, with ſome Variation.

At length, in *November* 1729, was concluded the famous Treaty of *Seville*, between *Great-Britain*, *France*, and *Spain*; for *Peace*, *Union*, *Friendſhip*, and *mutual Defence*: Whereby the ſaid three great Potentates,

The Treaty of *Seville* between *Great-Britain*, *France* and *Spain*.

I. "Renew all former Treaties of Peace and Friendſhip.

II. "They mutually guarantee each others Dominions, and the Rights and Privileges of their Commerce, in what Parts ſoever of the World; each Potentate for this End to furniſh 8000 Foot and 4000 Horſe: Or elſe Ships of War and of Tranſports, or elſe again in Money inſtead of either.

III. "The *Britiſh* and *French* Courts having alleged that, in the Treaty of *Vienna*, (*Anno* 1725) there were divers Clauſes, which infringed the Articles of ſeveral Treaties of Commerce; his Catholic Majeſty declares, that he never meant to grant, by Virtue of the ſaid Treaty, any Privilege contrary to the above-named Privileges and Treaties.

IV, V. "All neceſſary Orders ſhall be diſpatched on both Sides for the Execution of former Treaties of Commerce both with the *Engliſh* and *French* Nations.

VI, VII. "Commiſſaries ſhall be appointed on both Sides, between their *Britannic* and *Catholic* Majeſties, in four Months Time, to examine and decide what concerns the Ships and Effects taken at Sea, and the reſpective Allegations relating to Abuſes in Commerce, as well in *Europe* as in *America*. As alſo with reſpect to *France* and *Spain*.

VIII. "The ſaid Commiſſaries ſhall finiſh their Commiſſion within three Years; or ſooner if poſſible.

IX, X, XI, XII, XIII. "Theſe Articles relate to the placing of *Spaniſh* Garriſons into *Leghorn*, *Porto Ferajo*, *Parma*, and *Placentia*, for Don *Carlos*'s eventual Succeſſion to *Tuſcany*, *Parma*, and *Placentia*: All the contracting Parties agreeing to guarantee the ſaid Succeſſion.

XIV. "The States General of the *United Provinces* ſhall be invited to accede to this Treaty;" [as they ſoon after did in this ſame Month and Year]

By the two ſeparate Articles of the ſaid Treaty of *Seville*, it was more expreſsly ſtipulated, for the greater Exactneſs, that the Treaties of Peace and Commerce at *Utrecht*, between *Great-Britain* and *Spain*, in which are comprized the Treaty of 1667 and of 1715, as alſo the *Aſſiento Contract* of 1713, and its farther Explanation, *Anno* 1716, ſhall from this Day (even during the Examination by the Commiſſaries) remain in their Force and Vigour; for which end, the *Catholic* King ſhall diſpatch his Cedulas to his Vice-Roys, &c. in *America* as well as in *Europe*, as ſhall alſo his *Britannic* Majeſty to his Governors, &c. for the Releaſe of all Ships and Merchandize; and particularly the *South-Sea* Company's Ship, Prince *Frederic*, and her Cargo ſhall be immediately reſtored: All which under the before-named Guarantee.

In the Acceſſion of the States General of the *United Provinces*, they were to furniſh only 4000 Foot and 1000 Horſe; and on the Part of the other Allies, they were to guarantee the aboliſhing of the *Oſtend Eaſt-India* Company, *&c.* and the *Catholic* King engages, that entire Satisfaction ſhall be given them [*i. e.* the *Dutch*] for their Grievances, as well in the *Weſt-Indies* as in *Europe*, and to re-eſtabliſh their Commerce, agreeable to former Treaties: And, laſtly, to grant them all the commercial Privileges enjoyed by the Nations moſt favoured.

The fifth Voyage of the *South-Sea* Company's Ships on their Whale Fiſhery.

In this ſame Year, the *South-Sea* Company's 23 Ships went out on the *Whale* Fiſhery; and, one of them being loſt, the other 22 Ships brought Home 27½ Whales; which was ſtill a loſing Trade; the Company's net Loſs by this ſingle Year's Trade, (beſide *Wear* and *Tear*) being 6904*l.* 8*s.* 4*d.*

The *Dutch Eaſt-India* Company has a Renewal of their excluſive Grant for 21 Years longer.

In this ſame Year, the *Eaſt-India* Company of the *United Netherlands* obtained of the States-General a Prolongation of their *Octroi* or Charter of an excluſive Trade to *India* for 21 Years beyond their preſent Term: For which Privilege that Company paid into the Treaſury of the Republic 3,600,000 Guilders, [or about 330,000*l. Sterling*] their Power, Pomp, and Wealth in *India*, and more eſpecially in the Iſle of *Java*, even at this Time equalling thoſe of ſome conſiderable Monarchs.

Penſilvania's great Increaſe of People, Trade, *&c.* and its Productions for Exportation.

In the Province of *Penſilvania*, great Improvements were conſtantly making in Commerce, Shipping, and Agriculture: Many Ships and Sloops conſtantly built at *Philadelphia*, *Newcaſtle*, &c. which they moſtly diſpoſe of to our Sugar Colonies, and the reſt they uſe in the carrying their own Product, conſiſting of Caſk-ſtaves, Lumber, Pork, Peaſe, Flour, Biſket, *&c.* in Exchange for Sugar, Rum, Moloſſus, and *Spaniſh* Money. Great Numbers of *Germans* are annually adding to this already-populous Province, as well as from *Britain* and *Ireland*. The following is a Liſt of People arrived there from *Europe*, *Anno* 1729, *viz.*

Engliſh and *Welch* Paſſengers and Servants, - - - - - - - - - - - - -	267
Scots Servants, -	43
Iriſh Paſſengers and Servants, - - - - - - - - - - - - - - - - - - -	1,155
Palatine Paſſengers, -	243
And, in *Newcaſtle* Government alone, there arrived this Year, of Paſſengers and Servants, moſtly from *Ireland*, [by reaſon of Rack-rents there, as it is ſaid] about	4,500
Total arrived in this Year only, - - - - - - - - - - - - - - - -	6,208

No Marvel, then, that this Province is in ſo thriving a State, its Conſtitution being, moreover, ſo excellent, and the Encouragement afforded to new Comers, by abſolute Freedom, Liberty of Conſcience, Lenity of Laws, gentle Taxes, *&c.* ſo as really to be a Pattern for all other Governments on the Continent.

A brief Inquiry whether *England* or *Great-Britain* was at this Time in a proſperous State.

As Party-rage ran very high at this Time, (*viz. Anno* 1729) the Friends of the Miniſtry found themſelves obliged to prove, by *Facts*, what was before generally known to be undoubtedly true, that *Britain* was then in a thriving Condition, *viz.*

1. By the low Intereſt of Money, thereby evidently demonſtrating a greater Plenty of Money than formerly.

2. This Plenty of Money has raiſed the Price of Lands, from 20 and 21 Years, to 25, 26, and 27 Years Purchaſe. An evident Proof that there are more Perſons able and ready to purchaſe Land than formerly.

3. Another clear Evidence of our increaſed Wealth in *Britain*, is, the great Sums of late expended in the incloſing and improving of Lands, and in opening of Mines.

4. In the great Increaſe of Jewels, Plate, and other rich Moveables, much beyond elder Times.

5. The increaſed Value of our Woollen Goods exported in ſix Years, ending at *Chriſtmas* 1727, (the Account of the Year 1728 not being as yet made up) which exceeds the Value of the ſix preceding Years, by 475,000*l.* And the like may be ſaid of the Increaſe of our Exportations of *Coals*, *Lead*, *Tinn*, and *Lead-ore*.

6. The like Increaſe of foreign Goods exported, which in the three laſt Years did exceed in Value the three preceding Years, by 535,000*l.*

7. Laſtly, there will be found an Increaſe in the Tonnage of the Shipping of *England*, in the laſt ſix Years, beyond what it was in the preceding ſix Years, of 238,000 Tons. All which are undoubted Marks of increaſing Wealth, and of the general Balance of Trade running in our Favour.

As for the only two Objections hereunto, *viz.* Iſt, The Courſe of Exchange between us and *Holland*, running to our Diſadvantage; and, IIdly, Our great Paper-credit: The firſt is to be accounted

A. D. 1729 counted for by *Amſterdam*'s being, as it were, the Center of Exchanges to and from all Parts of *Europe*, and particularly between *Britain* and *Holland*, and thence between *us* and moſt other Nations, and conſequently, that the great Sums of Intereſt in our public Funds, chiefly remitted by Way of *Amſterdam*, and the frequent ſelling out of Foreigners in our Funds, as the Intereſt thereon becomes gradually leſſened more and more. Alſo the great Importations of Corn in Years of Scarcity, from *Dantzic*, *Hamburgh*, and the *Netherlands*, which, in the ſingle Year 1728, amounted to 800,000*l.* paid for by the Way of *Holland.* Moreover, the Balance we pay to the Northern Countries, for our moſt neceſſary naval Stores, *&c.* being moſtly remitted by the Way of *Amſterdam*, is ono conſiderable Cauſe of the Exchange thither running ſometimes againſt us. Theſe and ſuch-like Reaſons may well account for the Courſe of Exchange running retrograde between us and *Holland*; which therefore cannot be a juſt or certain Rule to determine the Balance of Trade, or whether the Wealth of *Britain* be increaſing or decreaſing. Laſtly, as we have ſufficiently ſhewn in the Introduction to this Work, the Increaſe of Paper-credit proves quite the contrary of what the Objectors intend, ſince it is not the Cauſe, but the demonſtrable Effect and Proof of national Riches.

A new and regulated *Eaſt India* Company propoſed to Parliament.

1730 The *Engliſh Eaſt-India* Company's Term for the Redemption of their Capital, and of their excluſive Trade, being near its Expiration, (*viz.* on three Years Notice from *Lady-day* 1733) a powerful and ſtrenuous Oppoſition to its Renewal or Prolongation was, at this Time, raiſed by certain Merchants and Gentlemen, who, foreſeeing that the Company would apply to the Legiſlature for a longer Time in their excluſive Privileges, determined to be beforehand with them; and therefore in *February* 1730, [*N. S.*] they preſented to the Houſe of Commons their Petition and Propoſals, *viz.*

" They offered to advance 3,200,000*l.* for redeeming the Fund of the Company, by five ſe-" veral Payments, the laſt to be at *Lady-day* 1733, to be allowed an Intereſt of 4 *per Cent.* till the " laſt-named Term, and only 2 *per Cent.* from and after that Term: *Provided*,

" I. That they might be incorporated, and in all Reſpects veſted with all the excluſive " Privileges and Trade of that Company: Yet ſo, as not to trade in one *joint Stock* or in their " corporate Capacity; but that the Trade ſhould be free and open to all his Majeſty's Subjects, " who ſhould pay *one per Cent.* of the Value of their Exports to *India*, in Conſideration of their " taking out a Licence from this propoſed Corporation. *Provided* alſo,

" II. That this Trade be ſolely carried on from the Port of *London.* And

" III. That this propoſed Company's Term be *thirty-one* Years, and to be redeemed on three " Years Notice.

" IV. That, moreover, for enabling this propoſed Corporation to defray the Expence of Forts " and Settlements in *India*, as well as the Preſervation and Enlargement of the Trade, they may " be impowered to levy a Duty of 5 *per Cent.* on the groſs Value of all the Merchandize which " ſhall be imported from *India.*"

And the Advantages thereby propoſed to accrue to the Nation.

The Benefits to the Public, by this Propoſal, they ſet forth, in brief, to be,

" I. That by receiving but 2 *per Cent.* Intereſt, an Annuity of 92,000*l.* would be added to the " *Sinking Fund*, which, at 25 Years Purchaſe, was worth 2,500,000*l.* to the Public.

" II. That, as the laying open the Trade to *Africa* is agreed to be attended with great national " Advantages; ſo the thus laying open the Trade to *Eaſt-India* (or the reducing it into a Kind of " *Regulated Company*) will be attended with the following Advantages, *viz.* It will neceſſarily oc-" caſion a larger Exportation of our own Product and Manufactures to *India.*

" III. It will employ a much greater Number of Ships and Seamen.

" IV. It will greatly lower the Prices of all *Eaſt-India Commodities* conſumed at Home.

" V. It will enable us to ſupply foreign Markets, *cheaper* and in *greater Quantities*, with *Indian* " Merchandize; whereby ſome new Branches of Traffic may be gained and others preſerved, " more eſpecially in *Africa* and *America*, and alſo in ſome Parts of *Europe.*" [Here the Propoſers ſhould have been more explicit]

" VI. It will neceſſarily advance the *Cuſtoms* and *Exciſe*, and thereby leſſen the national Debt, " *&c.*

" VIII. They allege," (but give no particular Reaſon for ſuch their Allegation) " that great " Advantages may accrue by employing our Shipping in Freights, from one Part of *India* to an-" other, more than the preſent Company has ever been able to do.

" IX. It will prevent Perſons, acquainted with the Trade to *India*, from being under the Ne-" ceſſity, for Want of Employment here, of ſeeking it in foreign Nations, and even will bring " Home thoſe who are already engaged that Way." [This had a Reference to certain *Engliſhmen* engaged in the *Oſtend* and *Swediſh Eaſt-India* Companies]

Theſe were the plauſible and principal Arguments made uſe of to the Legiſlature, or within Doors: Which yet were more abundantly amplified and improved without Doors, in ſundry printed Pamphlets and News-papers, which carried them, as is uſually the Caſe, much beyond rational Probability.

Their Out-door Arguments or Inducements, for alluring of Subſcribers to this Scheme, were, " I. Certain Intereſt, from the Public, of 4 *per Cent.* for the firſt two Years, and 2 *per Cent.* " certain afterward.

" II. The additional annual Profit ariſing from the before-named Licences.

" III. The 5 *per Cent.* on all Goods imported would bring a conſiderable Surplus over and " above the Expence of ſupporting the Forts and Factories; ſince" [as they alleged] " the pre- " ſent Company's Forts and Settlements do, one with another, more than anſwer their own Ex- " pence. And even although this propoſed Company ſhould be obliged to pay the preſent Com- " pany a Sum of Money for their Forts and Settlements;" [could theſe Propoſers make any Doubt of ſo juſt and equitable a Point?] " yet in a few Years there would a farther annual Profit " accrue, ariſing from the ſaid Duties. For,

" IV. Even ſuppoſing the Trade, under this propoſed Company, ſhould not increaſe," (as however they were confident it would) " beyond the Amount of *three Millions* yearly, at the pub- " lic Sales; yet 5 *per Cent.* thereon would yield 150,000*l.* *per Annum*, which makes 86,000*l.* " more than will compleat the Annuity or Intereſt of 4 *per Cent.* Wherefore,

" V. It may be concluded, that the annual Dividend will not at any Time be leſs than 5 to 6 " *per Cent.* to the Subſcribers; ſince, as the Exportations and Importations ſhall increaſe, in like " Proportion will the Dividends neceſſarily increaſe."

General Reaſons for the Parliament's rejecting the Petition againſt the *Eaſt-India Company.*

The Advantages of the Company's Propoſals for a Renewal of their Grant.

Yet, notwithſtanding of all the before-mentioned and ſuch-like plauſible Reaſonings, without Doors, and of all that their Friends could urge within Doors; the Houſe of Commons rejected their Petition, becauſe, 1ſt, It was *certainly*, at leaſt, hazardous to turn the *Eaſt-India* Trade into a new Channel. 2dly, It was *uncertain*, whether the propoſed Subſcription would readily fill in due Time. 3dly, Or whether their flattering Expectations would anſwer, either with reſpect to the Subſcribers, or to the Nation. 4thly, Whether the King's Cuſtoms might not be diminiſhed inſtead of being increaſed. 5thly, Whether by the new Method of a *Regulated Trade*, the Nation's general Commerce to *India* might not in ſome Degree be hurt and diminiſhed? For who can foreſee all the Advantages which other *European* Nations, trading to *India*, would be able to gain over us by this Alteration, or the Hurt *our* Trade might receive from the *Indian* Princes, *&c.* To quit therefore a *preſent Certainty* for a *future* (though *plauſible*) *Uncertainty*, was not judged ſafe nor prudent. This ſame Oppoſition, however, drew from the preſent Company very conſiderable Advantages to the Public. *Firſt*, by occaſioning the Company to give up *one per Cent.* of the Intereſt payable on their Capital of 3,200,000*l.* And, *ſecondly*, to pay, moreover, for the Benefit of the Public 200,000*l.* for the Service of the current Year, over and above the ſaid Abatement of *one per Cent.* of their Intereſt, *viz.* from 5 to 4 *per Cent.* or from 160,000*l.* to 128,000*l.* *per Annum*, whereby 32,000*l.* *per Annum* would be immediately added to the *Sinking Fund*, which the Company nevertheleſs were legally intitled to for ſix Years longer. Whilſt the Bill was depending in Parliament, Abundance of anonymous Letters and Eſſays were publiſhed in Pamphlets and News-papers, againſt excluſive Companies in general, and more eſpecially againſt this Company's excluſive Trade, in particular: All the Arguments which had been advanced for above 100 Years paſt, (of which we have largely treated in this Work) againſt *Monopolies* in this and other mercantile Companies, being on this Occaſion brought again into the Light, and re-publiſhed, with ſome few new Improvements. " They were for having the Government to take the Sup- " port of the Forts, Factories, Embaſſies, *&c.* in *India*, into their own Hands, out of the large " Cuſtoms on the *India* Trade, which ſhould thenceforth remain free and open to all *Britiſh Sub-* " *jects.* For" (ſay they) " the more free and open that Trade is, the more profitable it will be " to the Nation.——And although it may be true, that the laying the *Eaſt-India* Trade open, " would leſſen the Profit of Individuals in that Trade, by their ſtriving to out-do and underſell " one another; yet the Gain to the Nation would" (in their Opinion) " be vaſtly greater, as " the emulous private Adventurers, by thruſting themſelves into *new* Ports and Countries, in *Ara-* " *bia*, *Perſia*, *India*, *China*, *&c.* would undoubtedly occaſion the exporting of much more of our " Manufactures and Product than the Company can do.—And that, on the other Hand, a *joint* " *Stock Company* can never trade ſo frugally and advantageouſly, either for themſelves or for the " Nation, being in Fact but *one Buyer* and *one Seller.*—Who, moreover, manage their Trade with " a Pride and Expence more becoming the State of Kings than of Merchants; and their Gover- " nors and Agents in *India* live like Princes." [And ſo they doubtleſs would do under a regulated Company, or if they were under the King's immediate Authority, being at ſo vaſt a Diſtance from *Europe*] " They alſo expect *to be followed by the Markets*, and therefore do not " ſtir from their Warehouſes. Whereas, on the contrary, private Traders *would follow the Mar-* " *kets*, would puſh into every Creek and Corner, and would narrowly look into the Conduct of " their Agents in *India.*——That the aboliſhing of the preſent Company would, moreover, de- " ſtroy the pernicious Practice of *Stock-jobbing*, ſo fatal to Perſons and Families.——That when " almoſt all the maritime Nations of *Europe* are now running into this Trade, which will doubt- " leſs diminiſh our own Commerce thither; it ſeems the moſt effectual Means for driving them " out of this Trade to lay it open to all our People." Theſe and other ſuch-like Arguments, (ſome of which were at leaſt inconcluſive, if not fallacious) were freely urged, both within and without Doors, and were ſupported by many eminent Merchants. *Laſtly*, for farther corroborating

A. D. 1730

borating the Oppoſition to the Bill for prolonging the *Eaſt-India* Company's Privileges, three ſeveral Petitions were preſented to the Houſe of *Commons:* The *firſt*, from the Merchants, Traders, &c. of *London*, in Behalf of themſelves and all other his Majeſty's Subjects. The *ſecond*, from thoſe of *Briſtol:* And the *third*, from thoſe of *Leverpoole*; all to the ſame Effect, *viz. Againſt confirming the excluſive Trade to* India *to the preſent Company alone: And for obliging that Company to grant Licences to the reſt of his Majeſty's Subjects to trade thither, under proper Terms and Conditions: Alſo praying to be heard by their Counſel at the Bar of the Houſe, againſt paſſing the ſaid Bill:* Which Petitions were rejected.

The *Eaſt-India* Company's Reply and Vindication.

On the other Hand, it is but Juſtice to the preſent *Eaſt-India* Company, to exhibit the principal Points then ſo judiciouſly by them urged, by way of Reply, in their own Behalf, *viz.*

" I. That at preſent it ſeems to be agreed on all Sides, that the *Eaſt-India* Trade is a beneficial one to this Nation, and conſequently is neceſſary to be preſerved. But the main Queſtion, is, which is the beſt Method to preſerve it to *us*, *viz.* whether by a Company veſted with excluſive Privileges and Regulations, ſuch as the Legiſlature ſhall from Time to Time direct; or, whether the Trade ſhall be left quite open to every Adventurer who ſhall pay for a Licence from this Company?

" II. It is but too probable, that the preſent great Oppoſition to the Company proceeds, in a great Meaſure, from the great Gains which the Company makes:——For the Enemies of this Company are forced to go back almoſt 40 Years to ſearch out former Miſmanagements; having nothing to allege againſt their preſent Conduct.

The vaſt Sum in Cuſtoms paid yearly by the *Eaſt-India* Company.

" III. That the Company at preſent employs a vaſt Stock in Trade, their Sales amounting to about three Millions yearly. And the Cuſtoms accruing to the Public are immenſely great, and anſwer the Appropriations made of them by Parliament better than moſt other Duties; they bringing in net Money, clear of all Drawbacks and Debentures, *three hundred thouſand Pounds yearly*. Would it then be prudent in the Legiſlature to let them" [*i. e.* the ſaid Cuſtoms] " fall without a *Certainty* of *at leaſt as much* in the Room of them?

" IV. That the Forts and Factories do at preſent coſt the Company 300,000*l.* yearly; and doubtleſs the Government could not maintain them for ſo little. That thoſe Forts and other Buildings are queſtionleſs the Company's Property, who actually purchaſed them of the old Company, and are of *very great Value*; who, then, ſhall ſet an equitable Price on them? What Certainty have the Government, when they are in their Hands, that the propoſed open Trade will be always ſufficient to maintain ſo vaſt an Expence of Cuſtoms and Forts as 600,000*l.* yearly? For, as every Man is, by the propoſed Scheme, left at Liberty, (and will doubtleſs make uſe of it) *to trade or not to trade thither, as it may ſuit his Intereſt*; it may happen, that one Year there may go *fifty* Ships for *India*, and another Year perhaps not *five*. And theſe being all *ſeparate* Traders, the Government can have no Certainty nor Security from them, nor indeed from any other but an incorporated Body, who have a great Deal to loſe, and who are able to bear the ill Fortune of ſome particular Years Trading, without preſently laying it aſide.

" V. That by the ſeparate Traders out-bidding one another in *India*, for the Sake of Diſpatch, the Prices of Goods there would be raiſed ſo high, as at length *not to be worth the buying*. And, for the like Reaſon, at Home they would ſo under-ſell each other *till the Goods would not be worth ſelling*; which was the Caſe for the ſmall Time that the two Companies [the *old* and the *new* ones] and the ſeparate Traders contended againſt each other; whereby they all did very much hurt the Trade.

" VI. That an united Company will always be more diligent to watch the Encroachments and Attempts of other *European* Nations in *India* than ſeparate Traders will or can be, whoſe Views naturally are contracted within the narrow Circle of their own private Intereſt alone.

" VII. That although the Company have a Claim to a Perpetuity in this Trade, by the Act of the 10th of Queen *Anne*, Cap. xxviii. yet, ſome Doubts ariſing touching the Certainty of this Right, becauſe that Act only repeals the *Proviſoes* in former Acts, which directed *that the Privileges of Trade ſhould ceaſe when the Fund ſhould be redeemed, but does not explicitly enact a Perpetuity of this Trade to the Company, in the ſame Terms as the Act of that ſame Seſſion expreſsly does in Favour of the* South-Sea *Company*. This Company, being unwilling that their Title to this Trade (however ſtrong) ſhould prove the Occaſion of Diſputes hereafter, are therefore content to take up with a *temporary Certainty* in Lieu thereof, and, moreover, to give the Public almoſt 400,000*l.* for the ſame, by giving 200,000*l.* in Money, and farther conſenting that their Annuity of 5 *per Cent.* which is not redeemable till the Year 1736, be *now* reduced to 4 *per Cent.* whereby they loſe an Annuity of 32,000*l.* for ſix Years to come, valued at 192,000*l.*"

Some other leſs important Arguments were at this Time advanced on both Sides, which are needleſs to be particulariſed, becauſe already mentioned in other Parts of this Work, from the very Commencement of the Trade to *India*. And as there is in Reality nothing *new* which can be hereafter advanced on this truly important Subject, on either Side, now and formerly ſo fully explained; we ſhall hereafter ſpare ourſelves the needleſs Trouble of enlarging thereon in any future Controverſy, concerning the *Eaſt-India* Commerce; after aſſuring the Reader, that the Author of this Work has ſtudied Impartiality in this, as in other Parts of the Work, as much as poſſible. To conclude, the Legiſlature paſſed the Bill in the Company's Favour, intitled, *an Act*

The *Eaſt-India* Company's Fund legally reduced, and their excluſive Term prolonged to 1769.

(*Anno 3tio Georgii* II*di*) *For reducing the Annuity or Fund of the united* Eaſt-India *Company, and for aſcertaining their Right of Trade to the* Eaſt-Indies, *and the Continuance of their Corporation for that Purpoſe, upon the Terms therein mentioned.* Whereby, after a full Recital of former Statutes and Charters, the Company agrees, and it is enacted, " That their preſent yearly Fund of 160,000*l.* " be reduced to 128,000*l.* or from 5 to 4 *per Cent.* from *Michaelmas* 1730; in Conſideration " whereof, and of 200,000*l.* to be paid by them, for the public Service of this preſent Year 1730, " all their excluſive Privileges of Trade to the *Eaſt-Indies* are continued and prolonged from " *Lady-day* 1736, to *Lady-day* 1766, and three Years Notice then to be given; in all, including " the ſaid three Years Notice, to *Lady-day* 1769, being 33 Years; when, on Re-payment of their " intire Capital of 3,200,000*l.* their *excluſive* Privileges of Trade ſhall ceaſe and determine. Yet, " nevertheleſs, the Company ſhall continue as a Corporation *for ever*, to enjoy the *Eaſt-India* " Trade in common with all other Subjects." There was in this Act one ſingle Clauſe only, of any Importance, which had not been in any former Statute relating to this Company, and aroſe from a Doubt maliciouſly and unaccountably ſtarted by the Company's Enemies, *viz. Whether the three Years Notice ſhould be fully expired before they loſe their excluſive Privileges.* That Clauſe therefore enacted, " That, *upon the Expiration of the ſaid three Years*, and Re-payment, *&c.* as " above, their excluſive Right ſhall ceaſe."

We have been the fuller here, on the Objections againſt this Company, becauſe the Objections again ſtarted, *Anno* 1754, (for the like private Ends) in certain Pamphlets and News-papers, were the very ſame as *now* exhibited; there not being one ſingle Argument or Objection then advanced, any Way eſſentially different from the before-named ones; for the Subject has been ſo long canvaſſed by Men of Judgment and Experience, that no Room is at length left to ſay any Thing materially *new* on the ſaid Subject.

" The Company, moreover, at any Time, on one Year's Notice after *Lady-day* 1736, might be " paid off their whole Capital, by any Payments not leſs than 500,000*l.* at a Time: And ſo on, " from Time to Time, on ſuch yearly Notices by Parliament." The Company were hereby " likewiſe debarred from poſſeſſing in *Great-Britain*, Lands, Tenements, *&c.* exceeding ten thou-" ſand Pounds yearly Rent. Laſtly, two general Proviſos were added, for ſaving the Privileges, " *&c.* of the *South-Sea* and *Levant* Companies." In conſequence of this Reduction of the Company's Fund, they firſt reduced their half-yearly Dividend from 8 to 7 *per Cent*, at *Chriſtmas* 1732.

The Royal *African* Company's Inability to ſupport their Forts: The *Britiſh* Parliament, this Year, and continued it many Years after, voted 10,000*l.* for that End.

The Royal *African* Company, declining more and more, ſo as not to be able to ſupport their Forts and Factories, on the Coaſt of *Africa*, and the Trade being thereby laid open, ſo as to endanger them, the *Britiſh* Parliament, in this ſame Year, granted 10,000*l.* for that Purpoſe, by an *Act for raiſing* 550,000*l. by Exchequer-bills*, &c. of this third Year of King *George* the Second: Which Sum of 10,000*l.* was granted by Parliament annually till the Year 1744, when, by Reaſon of the War with *France* and *Spain*, 20,000*l.* was granted for that End: The two following Years 10,000*l.* was again granted annually for the ſame Purpoſe: But nothing was granted for the Year 1747.

The *South-Sea* Company's Whale Fiſhery this Year.

The *South-Sea* Company's remaining 22 *Greenland* Ships brought Home 12 Whales in the ſaid Year 1730. And their net Loſs by this Year's Fiſhery was 8,921*l.* 5*s.* 9*d.* beſide *Wear* and *Tear.*

The *French Eaſt-India* Company's Trade much increaſed of late.

The *French Eaſt-India* Company's Trade by this Time was become ſo conſiderable, that, inſtead of one Ship from *India* once in two Years, there arrived four Ships from thence in this Year 1730.

And that of the *Engliſh Eaſt-India* Company.

Yet ſo much ſuperior was the *Engliſh Eaſt-India* Company's Trade, that in the Spring of this ſame Year 1730, there ſailed no fewer than 17 Ships from *India.*

Iron found and refined in the *Britiſh American* Plantations; as alſo *Lead* and *Copper.*

In the *Britiſh American* Provinces of *Penſilvania*, *Virginia*, and *Maryland*, there were about this Time found Mines of *Iron-ſtone*, which they ſoon after learned to ſmelt down into Pigs and Sows, and then to draw them out by flatting Mills into Bars. They have alſo found Lead; and they had before found Copper in *New-York.*

In this ſame Year, the *South-Sea Company*'s great Ship, the *Prince Frederic*, which had been long detained at *La Vera Cruz*, in the *Spaniſh Weſt-Indies*, occaſioned by the Differences between *Great-Britain* and *Spain*, arrived ſafe in the *Thames*, laden, for that Company's Account, with 400,000 Dollars or *Spaniſh Pieces of Eight* in Specie, 190,000*lb.* Weight of *Cochineal*, 47,000*lb.* Weight of *Indico*, and 167 Ton-weight of *Logwood*, beſide what came in *private* Trade: Suppoſed altogether to be worth 350,000*l. Sterling.*

So unuſual a Quantity of Cochineal, in the Company's fine Vaults, gave occaſion to the Author of this Work to carry down thither two Phyſicians, (long ſince dead) whereby they were quite ſatisfied that the ſaid Inſect was, in all reſpects, the ſame with our *Britiſh Lady-Bird*: And that it was purely by that Inſect's feeding on the fine red Juice or Sap of the *Mexico* Shrub or Tree, called the *Prickly Pear*, that this *Lady-Bird* acquired its ſuperior Excellence, agreeable to what had before been aſſerted by divers Authors.

We may here alſo, for once at leaſt, preſent our Readers with a Liſt of the chief Exportations and Importations for the ſingle Month of *May*, in the Year 1730, from *London* only, *viz.*

Exported,

Wt.—Coffee from *Mocha* 5,000 Bales.

The *Whale* Fiſhery on the Coaſt of *New-England* was proſperous in this ſame Year; and the *Rice* raiſed in *Carolina* (now a very thriving Colony) continues to increaſe, ſince, by a Clauſe in an Act of Parliament in the preceding Seſſion of the 3d of King *George* the Second, (Cap. xxix.) *For granting Liberty to carry* Rice, *&c.* they are permitted to ſhip the ſame to any Place in *Europe* South of *Cape Finiſterre*, without firſt being landed in *England*, (or being made an enumerated Commodity) whereby they are open to all the Coaſts of *Spain* and *Portugal* in the Ocean, and of *Spain* and *France* in the *Mediterranean*, beſides *Italy* and the Gulph of *Venice*, and all the *Spaniſh* and *Portugueſe* Iſles——Provided however, That it be all carried in *Britiſh* Ships, navigated as by the Acts of Navigation; and no other Commodity be ſo carried but *Rice* only. That Commodity not being able to bear the Expence of its being what is called an *enumerated* one, [*i. e.* its being firſt landed in ſome Part of *Great Britain* before carried to a foreign Market.]

The *Whale* Fiſhery on the *New-England* Coaſt, and *Rice* from *Carolina* greatly increaſed.

☞ By the Statute of the 8th of King *George* the Second, (Cap. xix.) this beneficial Privilege is extended to the *Rice* of the Colony of *Georgia*. The Conſequence of both which well-judged Laws has been, that our ſaid *Plantation Rice* has beaten out the *Rice* of *Verona* and *Egypt*, wherever it is carried.

The *Britiſh Plantation Rice* has ſupplanted the *Rice* of *Verona* and of *Egypt*.

On the 29th of May, 1730, the *French* King made certain Regulations for his *Council of Commerce*, which had been firſt erected *Anno* 1700, which he will have now to be termed the *Royal Council of Commerce*, viz.

New Regulations in the *French* Royal Council of Commerce.

" I. That it be compoſed of the *Duke of Orleans*, the Cardinal *de Fleury*, &c. To meet every " fifteen Days, or oftener as the King ſhall direct.

" II. The Keeper of the Seals, the Secretary of State for foreign Affairs, and the like for the " Marine, and the Comptroler-General of the Finances, ſhall make Reports in each of the prin-" cipal Matters relating to their reſpective Departments.

" III. All their Arrets and Orders ſhall be ſigned by the Chancellor and the other great " Officers.

" IV. Reports to be made to the King of any Branch of Commerce, either inland or foreign, " that may require his Conſideration and Protection: together with the preſent State of any " Manufacture, in order for perfecting the ſame."

The Suburbs of *London* ſtill farther increaſing on every Side, two other new Pariſhes were in this Year erected, *viz.* one called *St. George* in *Bloomſbury*, near the Market of that Name; and the other in the Hamlet of *Lime-houſe*, and called *St. Anne*, at *Lime-houſe*. Another new Pariſh, named *St. Paul*'s, was in this ſame Year erected in the Town of *Deptford*, near and almoſt joining to the Suburbs of *London*, the great Increaſe of that Town, by Means of the Dock, Dock-yard, Storehouſes, *&c.* of the Navy-Royal, chiefly occaſioning ſo great an Acceſſion of Workmen, Trades-people, *&c.* that the old Pariſh-Church was too ſmall to contain the Inhabitants of ſo large a Town.

Two more new Pariſhes erected in the Suburbs of *London*, and alſo one at *Deptford*.

The great Benefit of Light-Houſes to all naval Commerce is allowed by all Men; and many ſuch are in *Great Britain* of long ſtanding. In this ſame 3d Year of King *George* the Second a Statute was made, *For confirming a Patent granted by her late Majeſty Queen* Anne *to William Trench, Eſquire, deceaſed, for erecting a Light-Houſe upon the Iſland or Rock called* Skerries, [near *Holyhead*, at the Iſle of *Angleſea*, &c.] whereby the Duties granted for maintaining the ſaid Light-Houſe are made perpetual,

The Duties for the Light-Houſe of the Rock called *Skerries*, near *Holyhead*, made perpetual.

perpetual, it being a very great Benefit to all Ships and Veſſels navigating the *Iriſh* or *St. George's Channel*, or the Sea between *England* and *Ireland*.

Archangel ſtill a conſiderable Port of Commerce, eſpecially for the immenſe Quantity of *Tar* brought from thence; as well as from other Parts of *Ruſſia*.

The *Czarina* of *Ruſſia* having in this Year 1730 reſolved to re-aſſume the Monopoly of *Tar*, as practiſed by the great *Czar*, *Peter* I. (it having been a very conſiderable Branch of his Revenue) it was at the Port of *Archangel* that the greateſt Quantity of *Tar* was uſually delivered, moſt of which was taken off by the *Dutch* and *Hamburghers*, to the Amount as was computed of 40,000 Laſts yearly, each laſt containing eleven Barrels. This Trade made *Archangel* ſtill much frequented by foreign Ships; although the new City of *Peterſburg* has much eclipſed its former Traffic, as have alſo the Ports of *Riga*, *Revel*, and *Narva*, ſince the Conqueſt of *Livonia* by *Ruſſia*; from which four laſt-named Ports there is alſo conſiderable Quantities of *Tar* exported.

Spices imported from the *Eaſt-Indies* in ten *Dutch* Ships.

Ten *Dutch Eaſt-India* Ships arriving at one Time this Year in *Holland*, it may be worth the noting how much Spice of all Kinds they brought Home, (*Cloves* only excepted, of which they brought none) *viz.* of

Brown Pepper - - - - - - - - ---	3,145,392	Pound Weight.
White Pepper - - - - - - - - ---	3,904	
Nutmegs - - - - - - - - - - ---	94,918	
Mace - - - - - - - - - - - ---	65,604	
Cinnamon - - - - - - - - ---	640,000	

Beſide 20,000 lb. Weight of *Long Pepper*, 4,623 lb. of *Cubebs* or *Pepper Duſt*, and 6,500 lb. of *Cardamums* from *Ceylon* and *Java*.

The reſt of the Cargo of thoſe ten Ships.

The other principal Parts of the Cargo of thoſe ten Ships were, 1,580,115 lb. Weight of *Powder Sugar*.—1,450,000 lb. of *Saltpetre*.—90,000 lb. of *Tin*, from *Siam*.—559,250 lb. of *Sapan* and *Caliatour* Wood.—6,500 lb. of *Indico*.—550 lb. of *Mother of Pearl*.—130,000 lb. of *Cowries*.—306,000 lb. of *Coffee*, from *Java*, *Ceylon*, and *Mocha*.—36,000 lb. of *Cotton-Yarn*, from *Tutucorin* and *Java*.—600 Pieces of *Painted Silk Stuffs*.—And 98,850 Pieces of various Denominations of *Callicoes*. But no *Tea* nor *Laquer'd Ware*.

This Cargo will ſhew the principal Articles of the *Dutch* Importations from *India*: But there came no Ships at this Time from *China*.

The *South-Sea* Company's commercial Affairs.

A brief Account of the famous Fair of *Porto Bello*.

Great Uneaſineſs was expreſſed at this Time on Account of the Court of *Spain*'s delaying to ſend the *Cedula* or Licence for the *South-Sea* Company's great Ship the *Royal-Caroline*, now ready laden with a very rich Cargo for the *Spaniſh Weſt-Indies*, [*i. e.* for the Fair of *Porto Bello*] the *Spaniſh Galeons* being already ſailed from *Cadiz*; leſt *Porto Bello* Fair ſhould be over before our ſaid Ship ſhould arrive there. That Port and Fair being appointed for the Merchants of *Chili* and *Peru*, and of all the Weſtern Ports and Shores of *South America*, at a Time fixed to come and ſupply themſelves with the Merchandize of *Europe*. When the *Galeons* arrive, Notice is diſpatched by Couriers from *Carthagena* to *Panama*, *Lima*, *Cuſco*, *St. Jago*, and other Parts, with Notice alſo of the Time for holding that Fair, whither the Merchants reſort in Caravans with their Treaſure; who, when ſupplied with the Goods they want, return Home to their ſeveral Abodes, and leave *Porto Bello* a poor and almoſt deſolate Place, till next Fair happened. It is thought, that by this almoſt only proſperous Voyage of the *South-Sea* Company's Ship the *Royal-Caroline*, that Company, one Way or other, might clear 70,000 *l.* real Profit.

Great Complaints were alſo at this Time made without Doors againſt the Supercargoes and Factors of the Voyage in the *South-Sea* Ship the *Prince-Frederick*, juſt returned Home from the *Spaniſh Weſt-Indies*, on Account of Malverſations relating to Monies taken upon Bottomree, *clandeſtine* Trade, &c. needleſs now to be farther enlarged on ſince the ſaid Commerce of that Company is never like to be revived any more.

The vaſt Amount of Cuſtom paid by the *Engliſh Eaſt-India* Company on their Tea imported.

The vaſt Imports of three of their Ships from *Coaſt and Bay*.

In this ſame Year, four of our *Engliſh China* Ships arrived, bringing Home no leſs than 1,707,000 lb. Weight of *Tea*; the Duty on which, at 4 *s.* *per* Pound, amounted to 341,000 *l.* Sterling: And, ſuppoſing that One-third of this *Tea* was fairly exported by Certificate, the Duty of which is drawn back by Debenture, then the net Duty of the Remainder was 227,600 *l.* What an immenſe Sum is this to be paid to the Public for one ſingle Commodity! Moreover, only three of the Company's Ships from *Coaſt and Bay*, this ſame Year, brought Home the following Goods, *viz.* no leſs than 371,000 Pieces of the many and various Kinds of *Callicoes* and *Indian Silks*, all to be re-exported.—Alſo 73,000 great Pounds of *raw Silk*.—682,000 lb. Weight of *Saltpetre*.—93,000 lb. of *Pepper*.—192,000 lb. of *Redwood*.—2,200 of *Cotton-Yarn*.—16,800 lb. of *Shellack*.—And 9,000 lb. of *Sticklack*.

The great Shoals of *Herrings* move near two Months ſooner South than uſual; with Remarks thereon.

Under the Years 1169, 1204, 1306, and more particularly under the Year 1313, we have treated of the various Removes or Migrations of the greateſt or principal Shoals of *Herrings* in the Seas of *Europe*; which at laſt, ſome Centuries ago, fixed their Delight on the Coaſts of the *Britiſh* Ocean. Yet, as what has *once ſo been* may hereafter *be again*, when leaſt looked for, we ought not therefore greatly to be ſurprized if thoſe delicious Fiſh ſhould again remove their Favours to ſome other Coaſt. What at preſent has given Occaſion for this Remark is, the Account given in the Summer of this Year 1730 by the Herring Fiſhers, which it ſeems did much ſurprize them, *viz.* That Shoals of *Herrings* from the *North* had come *Southward* near two Months before their uſual Time; particularly, in the Seas between *England* and *Ireland* great Shoals of them were taken in *July* that Year, not only off the *Frith of Clyde* in *Scotland* and off *Londonderry* in the North of *Ireland*, but as far *South* as the Bays of *Dublin* and *Wexford*. Had this Humour of thoſe Fiſh continued or increaſed in ſucceeding Years, it might poſſibly have diminiſhed their Numbers at the uſual *Northern* Parts, where they have ſo long been predominant, as at the Iſles of *Lewes*

A. D. 1730 and *Shetland*, whither the *Scotch* and *Dutch* Fiſhers in great Numbers reſort for that Fiſhery: And ſuch an Alteration in ſo great a Branch of Commerce would, doubtleſs, have occaſioned a conſiderable Change in the commercial State of ſeveral Countries of *Europe*. But nothing extraordinary of that Kind has ſince happened.

In this Month of *Auguſt* this Year, there was ſaid to have been ſhipped by the *Engliſh Levant* or *Turkey* Company no fewer than 10,000 Pieces of Broad Cloth, in four Ships, for the *Levant*; which demonſtrates the very great Importance of that Company's Commerce to the Nation.

The *Engliſh Turkey* Company's great Exportation of Woollen Cloth.

In the ſame Year, and in the Month of *October*, we find the following remarkable Importations of Goods from the *Engliſh American* Colonies, which were intirely *new* and moſtly *unexpected* Productions in thoſe Colonies; which, though not very conſiderable in themſelves, are nevertheleſs well worth remarking, as a great Increaſe of moſt Part thereof has ſince fortunately happened, *viz.*

2 Tons of *Iron*, from our Iſland of *St. Chriſtophers*, found in that Part of the Iſland which formerly was poſſeſſed by the *French*.

50 Hundred Weight of *Hemp*, raiſed in *New-England* and *Carolina*.

72 Bags of *Wool*, from and produced in the Iſlands of *Jamaica*, *St. Chriſtophers*, &c.

40 Tons of *Iron*.—30 Hundred Weight of *Copper Ore*.—156 Quintals of *Bees-wax*.—3 Hundred Weight of *Hemp*.—3 Hundred Weight of *raw Silk*: All theſe five Articles raiſed and produced in the Province of *Virginia*.

Remarkable new Productions imported from the *Britiſh* Colonies in *America*.

Importations this Year by the *Hudſon's-Bay* Company, *viz.* 11,040 *Coat and Parchment Beaver-Skins*.—4,404 Ditto of *Cubs*.—3,330 damaged and Stage *Parchment*.—990 Ditto *Cubs*.—1,648 *Martins*, and 3,130 damaged Ditto.—380 *Otter Skins*.—890 *Cat Skins*.—260 *Fox Skins*.—540 *Woolverins*,—410 *Black Bear Skins*.—190 *Woolves Skins*.—And 30 *Wood Shocks*.——By this Trade we now ſave much Money which we formerly ſent to *Ruſſia* for theſe uſeful *Peltry*, now intirely purchaſed with our own coarſe Woollen and other Manufactures and Product.

The conſiderable Benefit to *Britain* of the *Hudſon's Bay* Company's Trade inſtanced and explained.

We ſhall cloſe this promiſing Year 1730 with a Quotation from *Keyſlar's* Travels through a great Part of *Europe*, in this ſame Year, (an Author of Credit and Eſteem) in Favour of our modern *Engliſh Silk*-Fabrications, *viz.* "In *Italy* itſelf the *Silks* of *Engliſh* Manufacture are moſt "eſteemed, *and bear a greater Price than thoſe of* Italy: So that, at *Naples*, when a Tradeſman "would highly recommend his *Silk Stockings*, &c. *he proteſts they are right* Engliſh."

The great Credit of the *Engliſh Silk* Manufactures even in *Italy* itſelf.

1731 As the Condition, Importance, and Value of all the *Britiſh* and ſome of the foreign Colonies in *America* were, in the Year 1731, ſet in a much clearer and more modern Light than, poſſibly, ever before, in a judicious Tract of 114 Octavo Pages, intitled, *The Importance of the* Britiſh *Plantations in* America *to this Kingdom*, &c. *conſidered*, London 1731. We think a ſhort Abſtract of it will be proper and uſeful, with ſome few Remarks.

A View of the State and Importance of all the *Britiſh* Iſles in *North-America*, and of the great Importance of the *Britiſh* Continent Colonies.

He begins with the *Iſlands*, &c.

"1. If the Iſland of *Tabago* juſtly belongs to this Kingdom (as he is informed it does) it is "ſurpriſing it hath not been ſettled by *us*; ſince, though not quite ſo large as *Barbadoes*, it is "ſuperior to it for good Roads, convenient Rivers, and Richneſs of Soil.

Tabago,

"2. *St. Lucia* ſeems to be quite loſt to us!——For, ſince the *French* expelled Captain *Uring*, "(ſent thither by the Duke of *Montague*) in the Year 1725, they are become more numerous "there than before.

St. Lucia,

"3. *St. Vincent* and *Dominica* are likewiſe poſſeſſed by the *French*. Whoſe Intercourſe with the "*Indians* of both Iſlands, (who generally ſpeak *French*, and who are taught by them to deſpiſe "all other Nations) and that quiet Poſſeſſion the *French* keep of them, give the People of *Martinica* and *Gardeloup* the pleaſing Proſpect of ſeeing all of them ſettled and fortified by them. "Either of which Iſles, with regard to Extent and Fruitfulneſs, is very little inferior to *Barbadoes*, and in Point of Conveniency of Roads and Harbours for Shipping *far ſuperior!* They "both lie between the Iſles of *Granada* and *Martinica*, the former of which is one of the oldeſt "Settlements the *French* have in that Part, producing a vaſt Quantity of Sugar, Cotton, and "Cocoa.

St. Vincent, and *Dominica*, doubtful Iſlands.

"4. *Dominica* lies next to *Martinica*, and between that and the Iſles of *Gardeloup*, *Grandeterre*, "*Marigalante*, and *Deſeada*; all fine and large Iſlands belonging to the *French*, whoſe Increaſe "in thoſe Iſlands within a few Years paſt is prodigious! So that we may reaſonably reckon, that "they are not fewer in Number of People than all the *Engliſh Leeward* Iſles, with *Barbadoes* "included.

Dominica, *Martinica*, *Gardeloup*, *Grandterre*, and *Marigalante*, all are *French* Iſlands.

"5. The *Engliſh Leeward* Iſles" [ſo called with reſpect to *Barbadoes*, the Eaſternmoſt and Windwardmoſt of all the *Weſt-India* Iſles] "are *Antigua*, *Nevis*, *St. Chriſtophers*, and *Montſerrat*.— "Theſe four Iſlands, together with thoſe of *Barbuda*, *Anguilla*, *Tortola*, and *Spaniſh-Town*, all "ſettled on by the *Engliſh*, may be modeſtly conſidered altogether, as at leaſt of equal Conſequence to *us* as *Barbadoes*; and are capable of vaſt Improvements;" which *Barbadoes* is not; but is rather declining and wearing out too faſt.

Engliſh Leeward Iſles are, *Antigua*, *Nevis*, *Montſerrat*, *St. Chriſtophers*; together with *Barbuda*, *Anguilla*, *Tortola*, and *Spaniſh-Town*, are at leaſt equal in Value all together to *Barbadoes*.

"6. The Iſle of *Euſtacia* is poſſeſſed by the *Dutch*, and is about three Leagues from *St. Chriſtophers*; and, though very inconſiderable in Extent and Produce, yet it drives a great Smuggling Trade with our Iſlands, by Means of their Ships from *Africa*, in underſelling our own

Dutch Leeward Iſles *Euſtacia* and *Saba*.

“ People with their Negroes. *Saba* Iſle, a little to the *Leeward*, is alſo poſſeſſed by the *Dutch*, but is very inconſiderable.

St. Martins and *St. Bartholomew*, partly *French* and *Dutch*, inconſiderable.

“ 7. A little more Northward lie the Iſles of *St. Martin* and *St. Bartholomew*; both inconſiderable, and both partly inhabited by *French* and partly by *Dutch*.

Santa Croce valuable, and yet unſettled.

“ 8. *Santa Croce* has been twice poſſeſſed by the *Engliſh*, who have as often been beat out by the *French*: Is not much leſs than *Barbadoes*, and inferior to none in Point of Healthfulneſs, Fertility, good Roads and Bays. Yet at preſent it is not ſettled.

St. Thomas Iſle belongs to *Denmark*.

“ 9. Northward lies the Iſland of *St. Thomas*, poſſeſſed by the *Danes*; remarkable only for its Harbour, and its being a Free-Port, and for Smuggling.

Porto Rico Iſle is neglected by *Spain*.

“ 10. Due weſt from *St. Thomas* lies the Iſle of *St. John de Porto Rico*, inhabited by very few *Spaniards*; chiefly by a lawleſs Sort of People: And, though inferior to none in Point of Fertility, has nevertheleſs been much neglected by *Spain*.

Hiſpaniola, between *France* and *Spain*.

“ 11. *Hiſpaniola* is divided between the *French* and *Spaniards*. The former greatly thriving and multiplying; the *Spaniards* daily decreaſing, many of their fine old Houſes and Plantations being left deſolate. Inſomuch, that the *French* are reckoned to be double the Number of the *Spaniards* in that large Iſland, (including the Slaves of both) and to be *already* poſſeſſed of the greateſt Part of the Iſland. The few *Spaniards* remaining there look upon the whole Iſland as gone, upon the firſt Rupture between the two Crowns. The almoſt amazing Improvements of the *French* here, ſince the Reign of our King *William*, ſhew what great Things may be done by able Miniſters even under an arbitrary Prince.——This Iſland *alone* is of *more Value than all our Poſſeſſions in thoſe Parts*,—has excellent Harbours, Bays, and Rivers;—and, if we except *Cuba*, far exceeds all the reſt of the *Weſt-India* Iſlands.

The *Britiſh* Iſle of *Jamaica*, its brief commercial Hiſtory.

“ 12. Thirty Leagues Weſt of *Hiſpaniola* lies our Iſland of *Jamaica*, in Length 150, in Breadth 50 Miles. Of the Importance of which we may partly judge from the Quantity of its Produce annually ſhipped off for us, *viz.* in *Sugar alone* 10,000 Tons. In *Cotton*, *Indico*, *Ginger*, *Pimento*, *Rum*, *Lime-Juice*, *Cocoa*, *Mahogony-wood*, &c. 2,000 Tons more. Thus, not leſs than 12,000 Tons of our own Shipping are conſtantly employed in that Service only; over and above what is employed between *Jamaica* and the Northern Continent Colonies. Great are the Advantages accruing to *Britain* from the *Trade* between *Jamaica* and the *Spaniards* of *Mexico*, &c. The Riſe whereof ſprung from the Treaty of 1670, [called the *American Treaty*] whereby Peace was firſt ſettled between the two Nations in *America*; and 'till the Commencement of Queen *Anne*'s War, that Trade was carried on, with ſmall Interruption, to the Value of near 300,000 *l.* yearly, in various *European* Merchandize, Negroes, Proviſions, *&c.* for all which our People were paid in good *Pieces of Eight*.

“ *Jamaica*, however, afterward regained much of that clandeſtine Trade; by which, and by their Privateers, and the Money ſpent by the Ships of War ſtationed in thoſe Seas, they became rich and populous, until after the *South-Sea* Company's *Aſſiento* Factors ſettled there; when again much of their illicit Trade was loſt;” [and ſaid with too much Truth to be carried on by the others.]

A digreſſive View of the ſmall *Dutch* Iſles of *Curaçoa*, *Aruba*, and *Bonaire*.

“ 13. Much of that clandeſtine Trade removed to the *Dutch* Iſle of *Curaçoa*, from thence grown up to be very conſiderable in Commerce and Shipping, though of itſelf a mere barren Spot, with only a commodious Harbour, and an happy Situation in reſpect to the *Spaniſh Weſt-Indies*. It is ſupplied with Proviſions from the two neighbouring *Dutch* Iſles of *Aruba* and *Bonaire*; and, though yielding nothing of itſelf, is yet a Market for all Things; there having been ſometimes ſeen in its Harbour ſixty or ſeventy Sail of Ships together.

Cuba Iſland, by far the moſt important to *Spain* of all in *America*.

“ 14. *Cuba* Iſland is to the *Spaniards* the moſt important by its Situation of any they have in all *America*. It is about 700 Miles in Length, and from 120 Miles to a much ſmaller Breadth in ſome Parts. It has an excellent Soil, infinite Numbers of Cattle, and fine Tobacco; great Quantities of aromatic Drugs and Dyers Stuffs. It has alſo fine Bays and Havens. What renders it ſo *particularly* beneficial to *Spain* is its ſafe and well-fortified Harbour and Port called *Havanna*, being the *Rendezvous* of all the *Spaniſh* Fleets and Shipping bound to *Europe* from any Part of the Coaſts of *New-Spain*, &c. to the Weſtward or Leeward of the *Caracca's*. Yet the *Spaniards* have been far from cultivating this fine Iſland ſo well as might have been done.

The *Bahama* Iſles partly poſſeſſed and all of them claimed by *Great Britain*; though of little Value, and why.

“ 15. The *Bahama* Iſlands, though very numerous, and producing many Things uſeful and neceſſary, and all claimed by the Crown of *Great Britain*, yet there are but four of them inhabited by *Engliſh* People, *viz. Providence*, the principal one; *Eleutheria*; *Harbour-Iſland*, and *Green-Turtle-Key*. Yet for Extent and Goodneſs of Soil *Abaco* is the beſt, though not yet ſettled. And, to ſay the Truth, were it not for the Prevention of Pirates ſettling there, none of theſe Iſles would be worth our while to keep a Governor, Forts, and Garriſons therein,” [*viz.* chiefly at *Providence*] “ conſidering how many finer ſituated Colonies we have ſtill to improve.” [He might alſo have likewiſe added, *for the Prevention of other* European *Nations from ſettling on thoſe Iſlands*; as there are ſeveral ſuch who would gladly ſettle thereon, were it not for our ſuperior Naval Power.]

On the CONTINENT.

A.D. 1731 What our Author ſays of *Carolina* by no Means comes up to what we have elſewhere noted from very good Authority; to which therefore we refer.

Virginia and *Maryland*, a practical Computation of their joint Benefit to their Mother Country from the *Tobacco* Trade alone.

“ 16. *Virginia* and *Maryland* are moſt valuable Acquiſitions to *Britain*, as well for their great
“ Staple Commodity, *Tobacco*, as for ſome *Pitch*, *Tar*, *Furs*, *Deer Skins*, *Wallnut-tree Planks*,
“ *Iron in Pigs*, and *medicinal Drugs*.

“ 17. *Maryland* is of the ſame Nature and Produce as *Virginia*: And both together ſend over
“ annually to *Great Britain* 60,000 Hogſheads of *Tobacco*, weighing, one with another, 600
“ Pound Weight, which at 2½ *d*. *per* Pound, comes to 375,000*l*. And (he thinks) that the Ship-
“ ping employed to bring Home their *Tobacco* muſt be at leaſt 24,000 Tons; which, at 10*l*.
“ *per* Ton, is 240,000 *l*. the Value of the Shipping; the greateſt Part thereof by far being
“ *Engliſh*-built, continually and conſtantly fitted and repaired in *England*. The Freight at 1 *l*.
“ 10 *s*. *per* Hogſhead” [the loweſt] “ is 90,000 *l*.; and the Petty-Charges and Commiſſion, on
“ each Hogſhead, not leſs than 1 *l*. or 60,000 *l*. Which two laſt-named Sums jointly, *viz*.
“ 150,000 *l*. we undoubtedly receive from thoſe two Provinces upon *Tobacco* only. The net
“ Proceeds of the *Tobacco* will be 225,000 *l*. All which are returned in Goods; only there will
“ farther remain more with *us* about 5 *per Cent*. Commiſſion and Petty-Charges on the ſaid Goods,
“ being 11,250*l*. There will be farther imported in the Tobacco Ships from thoſe two Pro-
“ vinces, *Lumber*, to the Value of 15,000 *l*. Two-thirds whereof is clear Gain, it not coſting
“ 4,000 *l*. in that Country, firſt Coſt in Goods; and, as it is the Maſter's Privilege, there is no
“ Freight paid for it. *Skins* and *Furs* about 6,000 *l*. Value; 4,000 *l*. of which is actual Gain to
“ *England*. So the whole Gain to *England* amounts to about 180,000 *l*. annually.

“ Thoſe two Provinces moreover produce excellent *Flax*; alſo *Wooll* equal to our beſt *Engliſh*
“ *Wooll*; of both which they make Manufactures: And what they do not manufacture themſelves
“ they exchange with *Penſylvanians*, for *Rum*, *Sugar*, *Moloſſes*, *Salt*, &c. This Author had ſeen
“ two very promiſing *Iron-Works*, one in *Virginia*, the other in *Maryland*; both of them cloſe to
“ Water-Carriage as well as to the Woods. So that, if they have not Leave to import their Iron
“ Duty-free, they muſt manufacture it for themſelves, which will in Time leſſen the Exportation
“ of our Iron Wares.

“ The Trade of theſe two Provinces to all other Parts of *Great Britain* is inconſiderable:
“ Not employing above 1,000 Tons of Shipping to the Sugar Iſlands, and in all other Trades
“ on their own proper Account. Yet there is a great Number of Veſſels reſort to both Provinces,
“ of and from our other Continent Colonies.

Penſylvania's marvelous Increaſe of White Inhabitants in ſo ſhort a Time, and the Cauſes aſſigned for it.

“ 19. That *Penſylvania*, which has not any peculiar Staple, (like *Carolina*, *Virginia*, and *Mary-*
“ *land*) and was begun to be planted ſo late as 1680, ſhould at preſent have more White Inha-
“ bitants in it than all *Virginia*, *Maryland*, and *both the Carolina's*, is extremely remarkable! And,
“ although the youngeſt Colony on the Continent,” [*Georgia* was not as yet planted] “ they
“ have by far the fineſt capital City of all *Britiſh America*, and the ſecond in Magnitude. The
“ Cauſes uſually aſſigned for this vaſt Increaſe of White People there, in ſo ſhort a Time, are
“ theſe, *viz*. 1ſt, Their kind Treatment of the *Indians* their Neighbours, hereby rendering that
“ Province abſolutely ſafe from their Attempts. Some indeed have gone ſo far as to aſſert, That
“ they are the only *Britiſh* Colony that have treated the poor *native Indians* with Humanity: For
“ that no other *Britiſh* Province admits of the Evidence of an *Indian* againſt a White Man: Nor
“ are the Complaints of *Indians* againſt White Men duly regarded in other Colonies, whereby
“ thoſe poor People endure the moſt cruel Treatment from the very worſt of our own People
“ without Hope of Redreſs! And all the *Indian* Wars in our Colonies were occaſioned by
“ ſuch Means. 2dly, The Excellency of *Penſylvania*'s Laws; whereby Property is effectually
“ ſecured to all its Inhabitants. 3dly, The unlimited *Toleration* for all Manner of religious Per-
“ ſuaſions, without permitting any Claims to *Eccleſiaſtical Power* to take Place. All Men who are
“ Proteſtants are indifferently eligible to the Magiſtracy and Legiſlature, let their private Opi-
“ nions be what they will, *without any religious Teſt!*

Penſylvania's Product, Commerce, and Benefit to *Great Britain*.

“ The Product of *Penſylvania* for Exportation is, *Wheat*, *Flour*, *Biſket*, *barrelled Beef and Pork*,
“ *Bacon*, *Hams*, *Butter*, *Cheeſe*, *Cyder*, *Apples*, *Soap*, *Myrtle Wax*, *Candles*, *Starch*, *Hair-powder*,
“ *tanned Leather*, *Bees-wax*, *Tallow Candles*, *Strong Beer*, *Lint-ſeed Oil*, *Strong Waters*, *Deer Skins*,
“ *and other Peltry*, *Hemp*, (which they have encouraged by an additional Bounty of three Half-
“ pence *per* Pound Weight, over and above what is allowed by Act of Parliament) ſome little
“ *Tobacco*, *Lumber*, [*i. e.* ſawed Boards and Timber for building of Houſes, *Cypreſs* Wood,
“ Shingles, Caſk Staves and Heading, *Maſts and other Ship Timber*] alſo *Drugs* of various Sorts,
“ (as *Saſſafras*, *Calamus aromaticus*, *Snake-Root*, &c.) Laſtly, (adds our Author) The *Penſylva-*
“ *nians* build about 2,000 Tons of Shipping yearly for Sale, over and above what they employ
“ in their own Trade, which may be about 6,000 Tons more. They ſend great Quantities of
“ Corn to *Portugal* and *Spain*, frequently ſelling the Ship as well as Cargo: And the Produce of
“ both is ſent thence to *England*, where it is always laid out in Goods and ſent Home to *Pen-*
“ *ſylvania*.——They receive no leſs than from 4,000 to 6,000 Piſtoles from the *Dutch* Iſle of
“ *Curaçoa* alone, for Proviſions and Liquors. And they trade to *Surinam* in the like Manner,
“ and to the *French* Part of *Hiſpaniola*, as alſo to the other *French* Sugar Iſlands; from whence
“ they bring back Moloſſes, and alſo ſome Money. From *Jamaica* they ſometimes return
“ with all Money and no Goods, becauſe their *Rum* and *Moloſſes* are ſo dear there. And all the
“ Money they can get from all Parts, as alſo *Sugar*, *Rice*, *Tar*, *Pitch*, &c. is brought to *Eng-*
“ *land*, to pay for the Manufactures, &c. they carry Home from *us*; which (he affirms) has
“ not for many Years paſt been leſs than 150,000 *l*. *per Annum*. They trade to our Provinces

“ of

“ of *New-England*, *Virginia*, *Maryland* and *Carolina*, and to all the Iſlands in the *Weſt-Indies*, (except the *Spaniſh* ones) as alſo to the *Canaries*, *Madeira* and the *Azores* Iſles; likewiſe to *Newfoundland* for *Fiſh*, which they carry to *Spain*, *Portugal*, and up the *Mediterranean*; and remit the Money to *England*, which, one Way or other, may amount to 60,000*l.* yearly; but, without their Trade to the *French* and *Dutch* Colonies in the *Weſt-Indies*, they could not remit ſo much to *England*: Neither could they carry on their Trade with the *Indians* if they did not take off the *Rum* and *Moloſſus*, as well as the Sugars of thoſe Colonies, in Part of Payment of the Cargoes they carry thither.

New-York and *New-Jerſey*'s Commerce and Advantages to *Britain*.

“ 20. *New-York* and the two *Jerſeys* have the ſame Commodities as *Penſilvania* has for Exportation, except that they do not build ſo many Ships. *New-York* alſo has lately found in her Bowels the richeſt *Copper-mine* that perhaps was ever heard of; great Quantities of which have been lately brought to *England*. This, and the *Iron-mines* of *Virginia*, *Maryland*, and *Penſilvania* might be brought to ſupply *Great-Britain* and *Ireland* with all we want of thoſe Metals; which, too, would be paid for with our own Manufactures, inſtead of paying 300,000*l.* of our Caſh for thoſe Metals to *Sweden*, *&c.* *New-York*, it is true, ſends fewer Ships to *England* than ſome other Colonies do, but thoſe they do ſend are richer, as dealing more in Furs and Skins with the *Indians*: and” (he thinks) “ they are at leaſt of equal Advantage to *us* with *Penſilvania*, both as to the Money they ſend us, and the Manufactures they take of us. The City of *New-York* is a moſt delightful Place, and has near as many Inhabitants as *Philadelphia* has, and its Country one of the pleaſanteſt in the Univerſe.

New-England's Commerce and Advantages to *Britain*.

“ 21. The Soil of *New-England* is not unlike that of *Great-Britain*. It has at leaſt 120,000 *white* Inhabitants,” [he means here only the *Maſſachuſet's Bay*] “ employing about 40,000 Tons of Shipping in their foreign and coaſting Trades, and above 600 Sail of Ships, Sloops, *&c.* about one half of which Shipping trades to *Europe*. Their Fiſheries have been reckoned annually to produce 230,000 Quintals of dried Fiſh, which, being ſent to *Portugal*, *Spain*, and up the *Mediterranean*, yield 12 *s. per* Quintal, being 138,000*l. Sterling*. And as their *Salt*, *Rum*, and *Moloſſus*, as alſo their Proviſions and Utenſils, are purchaſed for the Refuſe Fiſh which is not fit for the *European* Market, and for the Oyl made from the Fiſh; the ſaid Sum may be ſaid to be *all gained out of the Sea*. By this Fiſhery and their other Commerce, they are ſaid to employ at leaſt 6000 Seamen: And adding to the above Sum the Freight and Commiſſion, all earned by our own People, and reckoned at *one-third* more, the whole will be 172,500*l.* all remitted to *Great-Britain*. There is, moreover, their *Whale Fiſhery*, employing about 1,300 Tons of Shipping. To *Europe* alſo, and to the *Weſt-Indies*, they ſend great Quantities of Lumber of all Sorts and of Proviſions,” [the ſame as mentioned under the Head of *Penſilvania*] “ the Produce whereof is likewiſe remitted to *England*. They alſo trade to the Bay of *Honduras* for *Logwood*. And as they build Shipping very cheap, they can afford to ſell their Lumber, *&c.* to our Sugar Colonies at a lower Rate than any other People can. Many of thoſe *New-England* Ships are loaded from the Sugar Iſlands directly for *England*. From *New-England* alſo we have the largeſt Maſts in the World for our Navy-Royal. From thence alſo, as from our other Continent Colonies, we receive all the Gold and Silver that they can ſpare, none of which ever returns to them: For we give them, in exchange, all Manner of wearing Apparel; Woollen, Braſs, Iron and Linnen Manufactures, *Eaſt-India* Goods, *&c.* in all, to the Value of 400,000*l.* yearly.

Newfoundland's Benefit to *Great-Britain*.

“ 22. *Newfoundland*, though very thinly inhabited by us, is nevertheleſs of vaſt Benefit to us: We make, one Year with another, about 200,000 Quintals of Fiſh there, which, at 12 *s. per* Quintal, comes to 120,000*l. Sterling*; which may be reckoned all clear Gain to this Kingdom; the Oil of the Fiſh paying for Salt, *&c.* As this Gain is obtained by the mere Labour of our People, and as the Fiſhery is greatly helpful to the breeding of able Seamen, *the natural Strength of this Kingdom*; as moreover we have from *Newfoundland* great Quantities of Peltry, *i. e.* the Furs and Skins of many Kinds of wild Beaſts; as, *Deer*, *Fox*, *Otter*, *Seal*, *Minx*, and *Bear*, with ſome *Beaver*; we ought therefore greatly to prize *Newfoundland*.

The *Hudſon's Bay* Trade beneficial to *Great-Britain*.

“ 23. The *Hudſon's-Bay* Trade employs generally three Ships from *London*, carrying thither coarſe *Duffle Cloth or Blanketing*, *Powder* and *Shot*, *Spirits*, *&c.* And in Return brings Home vaſt Quantities of Peltry of many Kinds, Bed-feathers, Whale-fins, *&c.* And as that ſmall Company makes a large Dividend of 8, or (formerly) 10 *per Cent.* on their Capital of about 100,000*l.* beſide the Employment they give to our People in fitting out and loading thoſe Ships; it may truly be ſaid to be an advantageous Commerce, proportioned to its Bulk.

The *Bermudas* Iſles their Condition, *&c.*

“ 24. The *Bermudas Iſlands* were formerly eſteemed extremely fertile: But they ſeem now to be wearing out apace. In Queen *Anne*'s War, they are ſaid to have had above 100 Brigantines and Sloops, though now not above half that Number. They take of us whatever Neceſſaries they have Occaſion for, and pay us in Money, which they get by trading amongſt the *Sugar Iſles*, *&c.* and alſo with Chip-hats for Women, and whatever elſe they can procure.”

A Summary of the total Gain and Benefit accruing to *Great-Britain* from all her *American* Plantations.

Thus we have, in brief, a politico-commercial, and, in Part, a natural Survey of all our Colonies, excepting *Nova Scotia*, at that Time, in effect, no Colony at all; being moſt unaccountably neglected till of late Years: And, although written thirty Years ago, ſince which Time many Alterations and Improvements have happened in all or moſt of thoſe Colonies, of which we have elſewhere taken Notice; yet the main Foundation of their reſpective Trades and Productions being always the ſame, and many Points relating thereto being treated ſo diſtinctly and methodically, as to give much Light thereinto, more eſpecially to ſuch as are not practical Merchants, we thought it well merited the Room it has taken up. The ſaid Author's Concluſion, is, “ *That Great-Britain gains one Million Sterling by her* American *Colonies*; (excluſive of what we gain

A. D. 1731

“ by any Trades for *Negroes*, or for dry Goods, with the *Spaniards* in the *Weſt-Indies*) *And that, in* “ *and by our Colonies alone, we maintain and employ at leaſt eighteen thouſand Seamen and Fiſhermen.*” Nevertheleſs, we have, in ſeveral other Parts of this Work, made it plainly appear, that even this Author's aboveſaid Account of the Benefits we receive from our *American Plantations* is far from comprehending all the Advantages we receive from thence.

In this ſame Year, the Legiſlature, by an Act of the 4th of King *George* the Second, Cap. v. paid off one Million of the joint Stock of *South-Sea* Annuity Stock, from and after *Michaelmas* 1731, which was accordingly divided to the ſeveral Proprietors, at the Rate of 6¼ *per Cent.*

One Million or 6¼ *per Cent.* paid off out of the Sinking Fund from the joint Stock of *South-Sea* Annuities.

In the ſame Year, that Company ſent out their remaining 22 Ships on the Whale Fiſhery, one of which was loſt, and the other 21 Ships brought Home 14 Whales, which was far from being a ſaving Voyage. At the Company's Dock there had at this Time been invented a new Sort of Gun for ſhooting with Gunpowder the Harpoons into the Bodies of Whales, at a greater Diſtance than the ſaid Harpoons could be thrown by Hand; and the Ships were accordingly provided with ſome of them, which were uſed both in this and the next Year's Fiſhery, with ſome Succeſs. They were chiefly uſeful in calm Weather, though ſcarcely practicable in blowing Weather, which moſtly happens in the *Greenland* Seas. And although the foreign *Harpooneers* could not eaſily be brought to uſe them, as being out of their uſual Method; yet in a Ship fitted out by Mr. *Elias Bird* and Partners, two Years later, out of the three Whales brought Home, two of them were ſaid to be killed by that new-invented Gun.

The *South Sea* Company's Whale Fiſhery this Year.

In this Year 1731, a Company or Partnerſhip was ſet on foot in *Sweden*, for trading from *Gottenburg* to the *Eaſt-Indies*, by Authority of the King of *Sweden*'s Octroi, to one *Henry Koning*, a rich and underſtanding Merchant, with ſuch others as ſhould join him, excluſively of all others, for fifteen Years, to all or any Parts from beyond the *Cape of Good Hope* to *Japan*: But they were not to trade in or at any Place, within the ſaid Limits, belonging to any other *European* Nation, or State, without their Permiſſion. And above a Million of Rixdollars was preſently ſubſcribed by Natives and Foreigners. To pay to the Crown an hundred Dahlers *per Laſt* for every Ship they employ, and two Dahlers more *per Laſt* for Port-duties. This new Company may be ſaid to have partly ſprung out of the Ruins of the *Oſtend* Company; many or moſt of its Subſcribers and Managers were Foreigners for a long Time, and chiefly *Britiſh* Subjects; the native *Swedes* being at firſt unacquainted with that Trade: But by a ſubſequent Treaty or Agreement concluded between the *Swediſh* Court and our *Engliſh Eaſt-India* Company, there were no *Britiſh* Subjects (after a certain fixed Term) to be employed in the Service of the ſaid *Swediſh* Company.

Sweden ſets on foot an *Eaſt-India* Company.

The Company has had its Octroi renewed, and continues annually to ſend one or two Ships to *China*: But as there is not Conſumption enough in *Sweden* for their Cargoes, both this Company and that of *Denmark* are ſaid not a little to damage our own and the *Dutch Eaſt-India* Trade, by running in upon our widely-extended Coaſts, Tea, China-ware, Silks, &c. and alſo by ſupplying foreign Parts with ſuch *Eaſt-India* Goods as we formerly ſent thither.

A Law having been made in the 7th and 8th of King *William* the Third, prohibiting the landing of any Goods in *Ireland*, of the Growth or Product of the *Engliſh American Plantations*, unleſs they ſhall have been firſt landed in *England*, and have paid the Duties there: Which Law being conſtrued to extend to all Manner of *American* Merchandize, as well unenumerated as enumerated, an Act of Parliament, of this 4th of King *George* the Second, Cap. xv. *For importing from the ſaid Plantations, directly into* Ireland, *Goods not enumerated in any Act of Parliament*, explains that firſt-named Act of Parliament ſo far in favour of *Ireland*, “ That all Goods from *America*, *not enumerated*,” [*i. e.* which might be carried from our Plantations directly to foreign Parts, without landing them firſt in *England*] “ might, in like Sort, be landed in *Ireland*, in *Britiſh* Ships, navi-“ gated as in the *Navigation Acts*.” This was doing no more than barely Juſtice to *Ireland*, by putting her only on a *Par* with foreign Countries, in reſpect to ſuch unenumerated Goods. The *enumerated Commodities*, at this Time, were, *Sugars*, *Tobacco*, *Cotton-wooll*, *Indico*, *Ginger*, *Dying-woods*, *Moloſſus*, *Rice*, *Furs*, *Copper-ore*, *Pitch*, *Tar*, *Turpentine*, *Maſts*, *Yards*, and *Bowſprits*; imported from, and the Growth and Product of the ſaid *Britiſh American Plantations*; all which muſt firſt be landed in *Great-Britain*, (except the Rice of *Carolina*, carried to any Place *ſouth* of *Cape Finiſterre.)*

A Law of the *Britiſh* Parliament this Year permits unenumerated Goods from *America*, to be landed in *Ireland*, without obliging them to be firſt landed in *England*.

In the ſame Year, (4th of *George* the Second, Cap. xxvi.) an Act of Parliament paſſed, *That all Pleadings in Courts of Juſtice in* England, *and in the Court of Exchequer in* Scotland, *ſhall be in the* Engliſh *Language*. The Preamble to which declares, “ That many and great Miſchiefs fre-“ quently happen to the Subjects of this Kingdom, from the Proceedings in Courts of Juſtice “ being in an unknown Language; thoſe who are ſummoned and impleaded having no Know-“ lege or Underſtanding of what is *alleged for* or *againſt* them in the Pleadings of their Lawyers “ and Attorneys, who alſo uſe a Character not legible to any but Perſons practiſing the Law. “ All Pleadings therefore and Writings ſhall henceforth be in the *Engliſh* Language, (excepting “ in the Court of Admiralty) and not in *Latin* nor *French*, and all Deeds and other Writings “ ſhall be in a common legible Hand and without Abbreviations.” Strange, that this was not enacted long before!

Law-pleadings and Law-writings enacted to be in the *Engliſh* Language and in a legible Hand.

By a Statute of the ſaid 4th of King *George* the Second, Cap. xxxiii. *For obviating a Doubt*, &c. the ſecond Penny, to be paid for Penny-poſt Letters and Parcels, on Delivery thereof, when carried beyond *London*, *Weſtminſter*, and *Southwark*, and their reſpective Suburbs, and as far as within ten Miles thereof, and not paſſing by the *General Poſt*, and from thence tranſmitted by the *Penny-*

The ſecond Penny legally confirmed to be paid for Penny-poſt Letters and Packets, going beyond the Bills of

Mortality and within ten Miles of *London*.

poſt, which had before been voluntarily paid by the Perſons receiving thoſe Letters, is now legally confirmed; becauſe in many Caſes the Carriers of thoſe Letters are obliged to travel on Horſeback to Places at a conſiderable Diſtance from *London*.

The *Norvegian* Colony in *Greenland* abandons that inhoſpitable Country.

In this ſame Year, the *Daniſh* or *Norvegian* Colony which, in the Year 1721, we have ſhewn was ſent to replant *Old Greenland*, returned Home from thence; that Climate being found ſo cold, and the Country ſo barren, that even *Norvegians* themſelves could not live in it. Yet it ſeems the Clergyman who went out with this Colony, having converted about 600 of the native Savages to the Chriſtian Religion, generouſly determined to remain with thoſe poor People, for the Benefit of their Souls! *(Rara Avis in Terris!)*

A very rich *South-Sea* Ship returns from *Porto Bello*.

In this ſame Year, the *South-Sea* Company's great *Aſſiento* Ship, the *Royal Caroline*, arrived in ten Weeks from *Porto Bello*, her Lading being immenſely rich: She ſailed from *England* ten Months before, with perhaps the richeſt outward-bound Lading of any Ship that ever ſailed from hence. This was probably (according to ſome) the only gainful Voyage which this Company ever made to the *Spaniſh Weſt-Indies*; Diſputes ariſing ſoon after between the two Nations, concerning contraband Trade, on one Side, and the Violences of the *Spaniſh Guarda Coſtas*, on the other; which at length broke out into open War.

A freſh Controverſy adjuſted concerning the *Toll* at paſſing the *Sound* of *Denmark*, with Remarks.

At this Time, the States General of the *United Netherlands* had a Diſpute with the Court of *Denmark* about the renewing of the Tarif, which ſome Years ago expired, for regulating the *Toll* to be paid by *Dutch* Ships paſſing through the famous Streight of the *Sound*, into and from the *Baltic* Sea. It is true, there is a Proverb in *Holland*, *That the Keys of the* Sound *are at* Amſterdam. Yet thoſe Keys [*i. e.* a ſtrong Squadron of Ships of War to be ſent annually to keep that Paſſage open] are extremely coſtly as well as hazardous. It was however amicably made up on the ſame Terms as before, and as we and other Nations pay: It ſeems evidently the true Intereſt of the Court of *Denmark* to conduct itſelf with great Moderation towards the mercantile Shipping of the ſeveral Nations of *Europe* paſſing this famous *Sound*; ſeeing that any new and extravagant Demands, on that Score, might reaſonably be ſuppoſed capable of uniting of ſo many powerful Opponents as would be able to call in Queſtion the very Foundation on which that *Toll* has ſtood, though for ſo many Ages paſt.

A temporary *Portugueſe Eaſt-India* Company erected.

In this ſame Year, the King of *Portugal* granted his Octroy, "For one occaſional Voyage of "one Ship only, for *Surat* and the Coaſt of *Coromandel*, and back to *Portugal*, excluſive of all "others; for which End a Company or Partnerſhip was eſtabliſhed, whoſe Capital was limited to "600,000 *Cruſados*; the Subſcribers were, ſome Time after the Return of the Ship, to be paid "back their Principal and their Dividend of the Profits."

Hereupon the *Britiſh* Conſul at *Liſbon* gave due Warning to all *Britiſh* Subjects living in *Portugal*, to avoid being any Way concerned in this Voyage; as, by an Act of Parliament of the 9th Year of King *George* the Firſt, (particularly aimed at the then *Oſtend Eaſt-India Trade)* ſuch *Britiſh* Subjects as ſhall ſubſcribe to or any Way encourage foreign Companies trading to the *Eaſt-Indies* ſhould forfeit all his Stock therein, and treble the Value; and any of our King's Subjects going to or being found in the *Eaſt-Indies* (other than thoſe of our *Eaſt-India* Company) were thereby declared guilty of an high Crime and Miſdemeanor, &c.—as has been ſhewn under the Year 1723. Which Warning had the deſired Effect.

London's vaſt Exports and Imports.

In and during this ſame Year 1731, there was re-exported from the Port of *London* alone, in only two of the enumerated Commodities imported from the *Britiſh American* Colonies, *viz.* of *Tobacco* 15,787,155 *lb.* Weight *averdupois*; and of *Sugar* 58,446 Ct. Weight, of 112 Pounds to the Ct. Weight; or 6,545,952 *lb.* Weight: Which equally ſerves to demonſtrate the vaſt Benefit of our Plantations to their Mother-country, and the vaſt foreign Commerce of the City of *London*, the whole Exports whereof in this one Year conſiſting of no fewer than 105 Articles or different Species of Merchandize (many of which were very conſiderable ones), as in the Woollen Manufacture alone, *viz.* 894 Suits of Apparel.—2,216 Pair of Blankets.—3,847 Dozen of Caps.—10,437 Dozen of Caſtors and Felts.—Cloths long and ſhort, 4,822.—Coverlids, 385.—Flannel, 48,436 Yards.—Garments, 1,577.—Haberdaſhery 827 *C.wt.*—Hoſe, 7,773 Dozen.—Kerſies and Dozens, 2,319.—Perpets, 1,995.—Plains, 9,640 Goads.—Rugs, 713.—Stuffs and Bays, 38,915 Pieces, beſides vaſt Quantities of Wheat, Beans, Peaſe, and Oats. Bacon, Biſcuit, Cheeſe, Flour, *Eaſt-India* Goods in vaſt Quantities; Iron, Copper, and Braſs Ware; Lead and Tinn, tinn'd Plates, Linen, *Threads*, and *Tapes*, Sail-cloth, &c.

And of *London*'s Imports, there were 85 different Species of Merchandize, conſiſting of many Sorts of Drugs, Spices, Cotton, Deer-ſkins, Ivory, Indico, Gums, Goat-ſkins, Iron, many Kinds of dying Woods and Oils, naval Stores, Rice, Rum, Turpentine, Wine, Wooll, &c.

By the *Vienna* Treaty, 1. The *Emperor*, *Britain*, and *Holland*, guarantee each other's Dominions, and the two latter ſolemnly guarantee the *Pragmatic Sanction*.

In this ſame Year 1731, was concluded the famous Treaty of *Vienna*, between the Emperor *Charles* the Sixth, the King of *Great-Britain*, and the States General of the *United Netherlands*, for a mutual Guarantee of each others Dominions, and in a moſt eſpecial Manner.

"1. For guaranteeing with all their Forces the Order of Succeſſion which the ſaid Emperor "had eſtabliſhed by a ſolemn Act, *Anno* 1713, [and again confirmed, *Anno* 1724] in favour of "Primogeniture for all his Heirs of both Sexes, ſo as that the eldeſt of either Sex ſhall ſucceed "to all the hereditary Dominions of the Houſe of *Auſtria* indiviſibly for ever," commonly called the *Pragmatic Sanction*.

"2. For

A. D. 1731

“ 2. For the *Spaniſh* Infant Don *Carlos*,” [now King of *Spain*] “ eventually to ſucceed to the “ Dutchies of *Tuſcany*, *Parma*, and *Placentia*.” *France* afterward agreed to this *Pragmatic Sanction*.

“ 3. The Emperor, by the 5th Article of this Treaty, engages to cauſe all Commerce and Na- “ vigation to the *Eaſt-Indies* to ceaſe *immediately* and *for ever* in the *Auſtrian Netherlands*, and in all “ the other Countries which were formerly under the Dominion of *Spain*, in the Time of King “ *Charles* the Second,”—[this Clauſe alſo reſpects his Territories in *Italy* and *Sicily*] “ in ſuch “ Manner that neither the *Oſtend Company* nor any other ſhall at any Time contravene this Treaty. “ ——Excepting that the ſaid *Oſtend Company* may ſend *for once only*, two Ships to the *Eaſt-Indies*, “ which ſhall return to *Oſtend*, and there ſell their Cargoes.

2. The *Oſtend* Company abſolutely aboliſhed for ever.

“ 4. But, by a ſeparate Article, the Guarantees before-ſpecified of each others Dominions, in “ the 1ſt Article of this Treaty, are not to be extended to any Diſturbance which the *Turks* may “ hereafter give to the Dominions of the Houſe of *Auſtria*.” This laſt was a very proper Exception in the two Maritime Powers to make; ſince otherwiſe they might have involved themſelves in War with the *Ottoman Porte*, to the intire Loſs of their *Turkey* Trade to *France*, which has already conſiderably enlarged her Trade to the *Levant*. (*Collection of Treaties*, Vol. IV. *Anno* 1733.)

3. The Guarantee of the *Pragmatic Sanction* now made by *Great-Britain* and the States General is not to extend to any Wars between the Houſe of *Auſtria* and the *Turks*.

France, finding us to bear quietly their fortifying of the Paſs of *Niagara* in the *Iroquois* Country, had in this Year 1731, the Audaciouſneſs to erect a Fort at *Crown-Point*, in the Center of the ſaid *five Nations*, and within the undoubted Limits of *New-York* Colony, and this Fort, as well as another erected by them in the ſame Country, named *Ticonderoga*, they held till both were taken by us, in the Year 1759. And yet this moſt bare-faced Encroachment and nearer Approach towards the Ocean, our then Government, to their Diſgrace, did not ſufficiently attend to.

France fortifies *Crown-Point* and *Ticonderoga* in the *Iroquois* Country, and within the Limits of *New York* Province.

The Merchants trading to the *Britiſh* Sugar Colonies and the Planters, having petitioned the Houſe of Commons, “ complaining againſt the *Britiſh* Continent *American* Colonies, for their “ carrying on a Trade with the foreign Sugar Colonies of the *French* and *Dutch*, from whence “ they were ſupplied with *Sugar*, *Rum*, *Moloſſus*, &c. inſtead of thoſe of our own Sugar Colonies, “ as well as with foreign *European* Goods and Manufactures; contrary to the Tenor or Intention “ of the Laws in being, and of the Treaty with *France*, *Anno* 1686;” [of which ſee our Abſtract under that Year] “ And they alleged, that as this new Method of Trade” (firſt begun to be complained of in the Year 1715) “ increaſed, and enriched the Colonies of other Nations, ſo it “ was injurious to the Trade of this Kingdom, *and greatly impoveriſhed the* Britiſh *Sugar Colonies*; “ and therefore praying Relief therein.” Whereupon a Committee was appointed, upon whoſe Report a Bill was brought in, and paſſed the Houſe of Commons, “ *For the better ſecuring and encouraging the Trade of his Majeſty's Sugar Colonies*. It was indeed dropped in the Houſe of Peers: Yet, as being a Subject of the greateſt Conſequence to our *American* Commerce and Colonies, we ſhall exhibit an Abſtract of that Bill, as it was ſent up to the Houſe of Peers, *viz.*

A ſummary View of the famous Diſpute or Controverſy between the *Britiſh Sugar Colonies* and the Northern *Continent Colonies*.

Allegations of the Sugar Colonies.

Section I. “ No *Sugar*, *Rum*, or *Moloſſus*, of the Plantations of foreign Nations, ſhall be im- “ ported into *Britain* or *Ireland*, or to any of the King's Dominions in *America*, under Forfeiture “ of Lading, Ship and Furniture.

II. “ Aiders, Aſſiſters, and Receivers, in landing any ſuch foreign Sugars, &c. were to forfeit “ treble the Value thereof.

III. “ The *Onus probandi*, or Proof that the Sugar, &c. ſo ſeized, was the Product of the *Bri-* “ *tiſh* Plantations, ſhall lye on the Proprietor of ſuch Goods.

IV. “ Maſters of Ships, taking in, at Sea, or in any Creek, Harbour, or other Place, any ſuch “ foreign Sugar, &c. in order to be landed in *Great-Britain* or *Britiſh America*, ſhall forfeit “ 200*l.*

V, VI. “ The Maſters of Ships lading Sugars, &c. at the *Britiſh* Sugar Colonies, bound to “ any other Part of the King's Dominions, ſhall, before he ſails, deliver to the Collector of the “ Port a true Account of his Lading, and take of him a Certificate thereof, with the Mer- “ chant's Name who ſhipped them, and of him to whom conſigned; and, when arrived at his in- “ tended Port, ſhall take an Oath and ſign a true Manifeſt of his Lading.

VII, VIII. “ And whereas great Numbers of Horſes, and great Quantities of Lumber have “ been exported from our Continent Colonies to the foreign Sugar Colonies, whereby they are “ enabled more eaſily to carry on their ſaid Sugar Plantations. None ſuch were to be tranſported “ hereafter to thoſe foreign Colonies: And when any ſuch Goods are to be ſhipped from the Con- “ tinent Colonies, the Maſter ſhall give a Bond for 500*l.* that they ſhall not be carried to any “ foreign Sugar Colony, &c.

IX, X. “ Governors, Cuſtom-houſe Officers, &c. conniving at any fraudulent Importation of “ foreign Sugars, &c. to forfeit 300*l.*

XI. “ Nothing in this Act ſhall extend to reſtrain the uſual Importation of Sugars from the “ Dominions of *Portugal*.”

Let us next, as briefly as poſſible, hear the Allegations on both Sides for and againſt this Bill.

In

In ſupport of the Bill, it was urged, both within Doors and in ſundry Pamphlets and News-papers, "That the ſupplying the *French* and *Dutch* Sugar Colonies with Shipping often ſold to "them, *Proviſions*, *Horſes*, and *Lumber*, from our Continent Colonies, had been practiſed ever "ſince the Peace of *Utrecht*; and that the ſo doing, not only made thoſe neceſſary Commodities "cheaper to them than they could have them any where elſe, but it alſo obliged the Importers to "take in Payment great Quantities of the ſaid *French* and *Dutch* Sugars, Rum, and Moloſſus, to "the infinite Detriment of the *Britiſh* Sugar Colonies; and, what is ſtill more grievous and de-"trimental to the Public, that Intercourſe affords our Northern Continent Colonies an Oppor-"tunity of being ſupplied with *French European* Merchandize, although prohibited by Law.

"2. That the Quantity of *Sugar now* made in *America* being greater than *Europe* can conſume, "it is of conſequence to *us* not to give Foreigners a Preference for the Vent of *their own Produce*, "in any Part of his Majeſty's Dominions.

"3. The *French* having Power (by the above-quoted Treaty) to ſeize on our Ships trading to "their Colonies, it is manifeſt that it muſt either be for their Advantage, or elſe from Neceſſity, "that they ſuffer it.

"4. That for the Encouragement of our Continent Colonies to perſiſt in the ſaid Trade, they "have the *Rum* and *Moloſſus* from thoſe foreign Colonies, without the high Duties paid for them "when imported into *Britain*:—That *Moloſſus* was formerly of little or no Value to the *French* "Planter, (becauſe *Rum* was detrimental to *France* as interfering with the Conſumption of their "*Brandy*) until the *French* found they could ſell it to our Continent People, in return for Tim-"ber, Horſes, Oxen, and Proviſions, ſo needful for them; whereby alſo they ſaved ſo much "Money in Specie;—and that even the Money which our Continent People receive at our own "Sugar Iſlands (in Payment for their Lumber, Proviſions, Horſes, *&c.*) is now carried to the "*French* Sugar Iſlands for the Purchaſe of their *Moloſſus* and *Rum!* Near one half of the Goods "which our Continent People carry to *our own* Sugar Iſlands, being now paid for in Money, and "not by *Barter*, as formerly; whereby the *French* are enabled to increaſe their Settlements, and "alſo their Negro Trade.

"5. That this Intercourſe, moreover, enhances the Price of Negroes to our own Sugar Co-"lonies, as well as of Proviſions, Lumber, *&c.* being a great Diſcouragement to them, and more "eſpecially to *Jamaica*, and *St. Chriſtopher*'s, where there are large Quantities of Land for new "Settlements.

"6. ☞ That there are Perſons ſtill living, who very well remember, that there were great "Quantities of Proviſions and other Requiſites for planting, ſent from *Old England* to our Sugar "Colonies, becauſe at that Time our Northern Continent Colonies were not able fully to ſupply "them: Whereas *now* the chief Benefit which the ſaid Northern Colonies yield to their Mother "Country, is, their being able to ſupply our Sugar Colonies with thoſe Neceſſaries much cheaper "than they could have them elſewhere: And that our ſaid *Continent* People ſhould be kept to "that Way alone of trading to our *Weſt-India* Iſles, together with their Fiſheries, and their raiſ-"ing of *naval Stores*, *Flax*, *Hemp*, *Indico*, &c. allowing them, however, any other Commerce to "foreign Countries, not detrimental to their Mother Country.

"7. That, whereas it is alleged by the Continent People, that if they were reſtrained from "ſupplying the *French Sugar Iſles*, they might be ſupplied from their own Continent Colonies with "Lumber, from their Settlements at *Mobile*, *Penſacola*, and *Fort Louis*, in the Bay of *Apalachy*, "whereby" (ſay the Advocates for the Continent People) "they would be put upon greatly "improving and peopling their ſaid Colonies, and thoſe of *Miſſiſippi*, from whence ſome Ships "have already begun to bring Lumber to the *French* Sugar Iſlands; and with the ſame, and alſo "with Proviſions, *&c.* from *Canada*." This the Sugar Iſland Advocates abſolutely denied, ſaying, moreover, "That thoſe *French* Continent Colonies could not take off their *Rum* and *Moloſſus* in "Return; and that *Canada* is a barren Country, and its River only navigable in the Summer "Months.

"8. That whereas formerly *we* ſupplied even *France*, as well as *Holland*, *Germany*, *Italy*, &c. "with Sugars; it is chiefly by the above Means that we are now almoſt ſolely confined to the "Home Conſumption of *Great-Britain*; being in a great Meaſure excluded from *Ireland*, (by "clandeſtine Importations) and from the Northern Continent *American* Colonies, who, inſtead of "carrying their Product to our own *Sugar Colonies*, as formerly, do now carry the ſame to our "Rivals, in exchange for their Rum and Moloſſus.

"9. That with reſpect to *Barbados*, in particular, they are at a great Expence in their Fortifi-"cations and their Militia, without any Charge to the Crown; beſide the 4½ *per Cent.* in *Specie*, "which they pay to the Crown on all their Exports, and which amounts to about 10,000*l.* yearly. "That, moreover, *Barbados* employs conſtantly 1000 of our own Seamen, and 10,000 Tons of our "Shipping: And that the Kingdom gains annually from this ſmall Iſle" [little larger than the Iſle of *Wight*] "95,000*l.* *Sterling*. Whereas the *French* and *Dutch* pay much lower Duties than "*Britiſh* Subjects do, both at Home and in their Plantations.

The *Dutch Sugar Colonies* of late much improved.

"10. That of late the *Dutch* have extended their Colonies at *Surinam*, *Eſekebe*, and *Barbecies*," [Places on the Continent, in the Province of *Guiana*] "making much greater Quantities of Su-"gar, Rum, and Moloſſus, than formerly; a great Part of which they ſell to our Continent "Colonies, in return for Horſes, Proviſions, and Lumber.

"11. Laſtly,

A. D. 1731

"11. Laſtly, it was aſſerted, that the Produce of our Sugar Iſlands may be eſtimated and valued at 1,500,000 *l. per Annum*, which is ſo much additional Wealth to *Great-Britain:* And that the actual and direct annual Gain ariſing, one Way or other, to *Great-Britain*, from our ſaid Sugar Colonies, can be no leſs than 1,200,000 *l. per Annum*; ariſing, 1ſt, from the vaſt Quantities of *Britiſh* Manufactures conſumed by them. 2dly, From the like Manufactures and Product ſent to the *Guinea* Coaſt for the Purchaſe of Negroes for the ſaid Sugar Iſlands. And, 3dly, From the accumulated Freight of the Shipping employed in thoſe two Branches,—the Gain on the Sugars re-exported,—the Cuſtoms,—the Commiſſion,—the victualling and refitting of the Ships, *&c.*——It was alſo alleged, that four fifth Parts of all the Gains of a Sugar Plantation center in *Great-Britain*, and the other fifth Part formerly centered in the Northern Colonies ſolely, but now one half of that 5th Part is taken away in Caſh, and carried to the *French* Plantations, to buy their Sugar, Rum, and Moloſſus."

On the other Hand,

It was urged in Behalf of the *Britiſh* Northern Continent Colonies of *America*, viz. *New-England*, *Rhode-Iſland*, *New-York*, *Penſilvania*, and the *Jerſeys*.

The Allegations of the *Britiſh* Northern *Continent* Colonies, in their own Defence.

"I. That as all the *Sugar*, *Rum*, and *Moloſſus* of our Sugar Iſles are taken off at high Prices by *Great-Britain* and our ſaid Northern Colonies; it would be very impolitic to obſtruct the latter from taking *Moloſſus*, and even *Rum*, from the *French* Iſlands, for the Supply of their *Indian* Trade, and much more of their Fiſheries; ſeeing our own Sugar Colonies are unable to ſupply the immenſe Quantity of *Moloſſus* which thoſe two Trades demand; more eſpecially as from the *French* Iſlands they receive in Payment *Silver* and *Cocoa*, as well as *Moloſſus*, (but ſeldom *Sugar* or *Rum*) which *Silver* comes ultimately to *Great-Britain* to pay for the Balance of Trade: And the ſaid Northern Colonies diſtil the *Moloſſus* into *Rum*, for the above-named Purpoſes.

"II. That by this Trade the Northern Colonies are enabled to make ſuch conſiderable Remittances to *England*, in ready Money, as they could procure no where elſe but by their Traffic with the foreign Colonies, as well as by *Indico*, *Cocoa*, *Sugar*, and *Rum*, both from *Britiſh* and foreign Colonies; for enabling them to pay for the great Quantities of *our* Manufactures which they yearly take of us.

"III. That if the Northern Colonies were not permitted to ſupply the *French* Iſlands with *Lumber*, they could have them, though ſomewhat dearer, from their own Colonies in the Bay of *Apalacky*;" [this is anſwered already under Article VII.] "and that our Horſes would be of little or no Uſe, if not bought up by the *French*, who, beſides, could have them (as alſo *Mules*) from the Coaſts of *New-Spain* and *New-Andaluſia*, and from the *Dutch* Iſle of *Curaçoa*.

"IV. That the *Britiſh* Sugar Iſles employ no Ships but for their own Sugars and ſome few other Commodities, and what Aſſiſtance they afford to the *Negro Trade:* Whereas, for every Ship which they uſe, the Northern Continent Colonies employ *ten* at leaſt, and not only uſe great Quantities of *Britiſh* Goods themſelves, but moreover do ſupply the *Indian* Nations behind them with vaſt Quantities thereof, whereby they ſet on work a much greater Number of Hands in *Great-Britain* than the Sugar Iſlands can do.

"V. That the late great Improvements in the *Dutch* and *French* Sugar Colonies are purely owing to their *Induſtry* and *Frugality* on one Hand, and, on the other, to the *notorious Luxury and Extravagance of the People in our Sugar Iſles*, who, inſtead of endeavouring to regain their former Trade, by lowering their Prices, would now gain it by Force, by the Help of an Act of Parliament, to oblige all the Subjects of *Great-Britain*, both at Home and in *America*, to take off their Merchandize on their own Terms, for the Support of the ſaid Luxury and Extravagance *for which they have been ſo long famous.*——That the high Prices of their Sugars have been the Means of loſing their former *European* Markets; and, if continued to be raiſed higher, will loſe all that is ſtill left. Inſomuch, *that in the End the Subjects of* Great-Britain *alone muſt ſupport theſe People in Luxury and Indolence.*———That *Barbados* was formerly wont to trade with the *French* and *Dutch*, and, by taking off their Sugars, prevented their ſeeking out for other Markets, whereby they" [*i. e. Barbados*] "gained the Sugar Trade almoſt intirely into their own Hands: But they loſt it again in the Year 1715, by laying a Duty on foreign Sugars, *&c.* too high to be ſupported.

"VI. That the Conſumption of *Rum* in *New-England* is ſo great, that an Author on this Subject aſſerts, that there has been 20,000 Hogſheads of *French Moloſſus* manufactured into *Rum*, at *Boſton*, in one Year: And as one Gallon of *Moloſſus* will make a Gallon of *Rum*, this will amount to 1,260,000 Gallons of Rum in one Year: So vaſt is the Demand for that Liquor, by their *Fiſhery*, and by the *Indian* Trade. If then, the Trade from *New-England* to the *French* Iſlands was to be prohibited, how much would our *American* Fiſhery and the *Indian* Trade ſuffer for want of Rum? Seeing that all the *Rum* from our own Sugar Colonies is now intirely taken off by *Great-Britain* and her Colonies. And if our Northern Colonies ſhould buy up all the Moloſſus and Rum which our Sugar Iſlands can make, then, not only the Duty on Rum imported into *Britain* and *Ireland* would be ſunk, which now produces a large Sum, but the *French* would bring their Rum to the *European* Markets, and would probably run it in upon us. About 40 Years ago," [*i. e.* about the Year 1690] "the Moloſſus were intirely waſted in *Jamaica*, where they produced fine Sugars long before they made any Rum, which they at length learned to make from the *Barbadians*, and now make it better than do their Teachers. At firſt, our Northern Continent Colonies took off *all* that they made; but when they came to excel in

1731

“ the Goodneſs of it, ſo as that they found it would better anſwer to ſend it to *England*, they thereby raiſed the Price ſo high, that now very little of it is taken from *Jamaica* by our Northern Colonies. In fine, if the Northern *American* Colonies and *Great-Britain* do now actually take off *all* the Sugar, Rum, and Moloſſus, which our Sugar Iſles do or can poſſibly produce; and that our ſaid Northern Continent Colonies do, moreover, take off ſuch vaſt Quantities of Rum and Moloſſus from the *French* of *Martinica*, and do likewiſe get a great Deal of them, from *Surinam*, *Guadaloupe*, *Granado*, *Cape-François*, *Cayenne*, &c. ſhould, all but our own Sugar, Rum, and Moloſſus, be abſolutely prohibited, many great Inconveniencies would follow, *viz.* 1ſt, We ſhould loſe the Employment of ſeveral thouſand Tons of Shipping, in the Trade between the Northern Colonies and thoſe foreign Sugar Colonies. 2dly, The ſaid Northern Colonies could not poſſibly be ſupplied with near the Quantity of Rum and Moloſſus which they need for the carrying on the moſt profitable Trades before-named. 3dly, This would put a moſt dangerous *Monopoly* into the Hands of our own Sugar Planters, ſo as that the *Indian* and Fiſhery Trades of our ſaid Colonies could not afford to pay the Rates which would be demanded, even ſuppoſing our Iſlanders could make ſufficient Quantities of thoſe Goods for both the *American* and *Britiſh* Conſumption. 4thly, It would greatly increaſe the *French* Shipping and Navigation; not only in bringing Lumber, Horſes, *&c.* to their own Sugar Iſlands, but in carrying thence to *Europe* all their Rum and Moloſſus, where no doubt they would find Markets for them, as they already do for their Sugars, ſo as to have beaten us out of, and to underſell us in *Holland*, and at *Hamburgh*, *Cadiz*, &c. 5thly, And if the *Barbadians* Complaint be true, *viz.* That their Lands are ſo far worn out, that it requires the Labour of three Negroes to produce as much Sugar as could formerly be raiſed by the Labour of one Negroe, they need but remove to *Jamaica*, where they may have excellent freſh Land enough; and as the Value of ſuch new Land is a Trifle, when compared to the Value of the Stock required for a Sugar Plantation, which is the main Article for eſtabliſhing ſuch a Plantation, they have that intire to carry along with them to *Jamaica*; and the Charge and Trouble of their removing thither would be amply compenſated by the abundant Product of thoſe new Lands, and which conſequently would enable them to underſell the *French* and *Dutch* Plantations, the only ſeeming Means left for our recovering the Trade of the Re-exportation of our Sugars. 6thly, That from the foreign Sugar Colonies our Northern Colonies bring back conſiderable Quantities of Gold and Silver, along with their Sugar, Rum and Moloſſus; whereby they are enabled to pay to *Great-Britain* for the vaſt Quantities of its Product and Manufactures, which they take of their Mother Country, and which, without this Trade ſo much complained of, they could not poſſibly pay for. Laſtly, That the prohibiting the Continent People from purchaſing of the foreign Colonies their Sugar, Rum, and Moloſſus, or even the laying high Duties on them, would utterly deſtroy a Commerce of ſuch great Conſequence to the Northern Colonies, as that without it they could not carry on their Fiſheries,—their Trade for Peltry with the *Indians*, and their Navigation. Neither could they diſpoſe of the Product of their Lands and Labour, a great Part of the Profits whereof centers in *Great-Britain*, in Payment of the Manufactures, *&c.* they have from thence.———Upon the whole,” [ſay the Advocates for the Northern *Britiſh* Colonies] “ the *ſecret* and *real* View of the *Sugar Iſlands*, is, to gain the abſolute Monopoly of *Sugar* and *Rum* (with reſpect to the Subjects of *Great-Britain)* to themſelves; that ſo they may have it in their Power to exact what Prices they ſhall pleaſe from the Buyers.”

Notwithſtanding all which plauſible Allegations on both Sides, in a Matter of great Importance to our commercial Intereſts, there was nothing legally decided until two Years later, *viz.* till the Year 1733. And indeed where ſuch material Alterations are required to be made in a long-eſtabliſhed, or even connived Courſe of any important Branch of Commerce, great and ſerious Deliberation, and mature Obſervation and Conſideration, ſeem abſolutely requiſite in a Nation, like ours, whoſe principal Support depends ſo much on Commerce and Plantations.

1732

A Million of Money paid off the *South-Sea* Capital, by the *Sinking Fund*, with which that Company paid off their Bond-debt.

By a Statute of the 5th Year of King *George* the Second, Cap. xvii. one Million of Money was paid off the *South-Sea Company*'s Capital Stock, out of the Sinking Fund, from and after *Midſummer* 1732; but that Company having a large Bond Debt, occaſioned by the Miſmanagements in the Year 1720, their General Court, inſtead of dividing the ſaid Money to the Proprietors, agreed to pay off one Million of Bonds therewith, whereby ſo much of their Capital Stock was annihilated, being 6¼ *per Cent.* which was accordingly written off from each Proprietor's Account.

The *Hat* Manufacture diſcouraged in the *Britiſh Ame-rican* Plantations, for good Reaſons.

The Hat-Manufacture being long ſince brought to Perfection in *England*, and great Quantities thereof annually exported to ſundry foreign Parts, and particularly to the *Britiſh American* Plantations, till of late Years, that great Quantities of Hats have been made in the ſaid Continent Plantations, and from thence exported to foreign Markets, which were heretofore ſupplied therewith from *Great-Britain*. For Remedy whereof, it was now enacted, by Cap. xxii. of the ſaid 5th Year of King *George* the Second, *To prevent the Exportation of Hats out of any of his Majeſty's Colonies or Plantations in America*, &c. “ That no Hats or Felts whatever ſhall be exported from any of the ſaid Plantations to foreign Parts, nor ſhall be laden on any Horſe, Cart, or other Carriage, with that Intent, under Forfeiture thereof, and of 500*l.* for every ſuch Offence, and Aiders or Abettors therein ſhall forfeit 40*l.* and Cuſtom-houſe Officers, permitting Entries of ſuch Hats to be made, ſhall forfeit their Office and 500*l.*———None ſhall make Hats in the ſaid Colonies, but ſuch as ſhall have ſerved an Apprenticeſhip thereto, of ſeven Years.——— And no Maſter to have at any Time above two Apprentices, nor ſhall he employ any Negroe in that Manufacture.” The Conveniencies, in point of Cheapneſs, which the *Americans* have beyond their Mother Country, by the Plenty of Beaver, Hare, Coney-wool, and many other Furs, gave them ſuch Advantages, that had they not been thus reſtrained, they would ſoon have ſupplied

A. D. 1732

ſupplied all the World with Hats. And as our People are continually increaſing in thoſe Plantations, we can ſcarcely too often inculcate the Opinion of knowing and intelligent Men, that nothing will be able to prevent thoſe People from Manufactures interfering with ours, but their being conſtantly employed in raiſing naval Stores, and other rough Materials for our own Manufactures, ſuch as, *Silk*, *Flax*, *Hemp*, *Iron*, &c.

The Production of Coffee in the *Britiſh American* Colonies encouraged.

Conſiderable Quantities of Coffee being by this Time produced in, and begun to be imported from *Jamaica* into *Britain*, the Legiſlature, for its Encouragement in our *Britiſh* Plantations, by an Act of this ſame fifth Year of King *George* the Second, Cap. xxiv. *For encouraging the Growth of Coffee in his Majeſty's Plantations in* America, reduced the inland Duty thereof, coming from thence, (but of none other) from 2*s.* to 1*s.* 6*d.* *per lb. Wt.* It ſeems, that the *French* at *Martinica*, *Hiſpaniola*, (and at the *Iſle de Bourbon*, near *Madagaſcar)* had ſomewhat the Start of us in this new Production, as had alſo the *Dutch* at *Surinam*; yet none ſuch as yet comes up to the Coffee of *Arabia*, from whence all the reſt of the World originally had theirs. Yet, in Length of Time, our People, as well as thoſe of other Nations, may bring it to good Perfection, whereby our ſaid Colonies will be the better enabled to take off more of our Product and Manufactures, whilſt we ſhall ſave a great Deal of the Price we now pay for the Coffee of the *Eaſt*.

The 8th and laſt Year of the *South-Sea* Company's *Greenland* Trade.

In the ſaid Year, the *South-Sea Company* again ventured to ſend out their remaining 21 Ships on the *Whale Fiſhery*. It was the laſt Attempt they made for recovering to *Great-Britain* that valuable Branch of Trade, as finding themſelves to be very great Loſers thereby. Thoſe Ships brought Home 24½ Whales; which likewiſe proved a very loſing Voyage.

A View of the *South-Sea* Company's total Loſs by their Whale Fiſhery, with Reflections in favour of them.

And now that Company having ventured full as far as (and many thought farther than) in Prudence they ought to have done in the ſaid Whale Fiſhery, in conſideration of their having, for eight Years together, been conſiderable Loſers in every one of thoſe Years; it was judged to be high Time to lay it aſide intirely. Wherefore they ſold off all their Ships, Stores, and Utenſils: And, upon finally ſtating the Accounts of this Fiſhery, it appeared,

	l.	*s.*	*d.*
That their total Iſſues or Diſburſements, on Account of their ſaid *Greenland* or Whale Fiſhery, preparatory to and during the ſaid eight Years, amounted to the Sum of	262,172	9	6
And the total Amount of the Sales of their Oil and Whale-fins, in the ſaid eight Years Time, as alſo of the Sale of all their Ships, Stores, and Utenſils, was but	84,390	6	6
So the net Balance or Loſs ſuſtained by this *Greenland* Fiſhery, in principal Money alone, (without reckoning the Intereſt on the Money advanced in each of the ſaid eight Years) was	177,782	3	0

It has been uſually computed, that if a *Greenland* Ship brought Home but *three* Whales, it would be a reaſonably-gainful Year: But, moſt unfortunately for the *South-Sea Company*, they had not, in all the ſaid eight Years Fiſhery, brought Home at the Rate of one intire Whale *per* Ship, taking one Year with another. It has, moreover, been a Maxim among the Whale-fiſhing Adventurers, *that one good fiſhing Year in ſeven* uſually makes up the Loſſes of ſix preceding bad Years. But it was very unhappy that all the ſaid eight Years happened to be bad, not only to the Company, but to moſt of the Adventurers of other Nations. It muſt, however, be allowed by all, that this Company, by ſuſtaining ſo great a Loſs as 237,142*l.* 6*s.* 2*d.* (Intereſt included) for endeavouring to promote ſo national a Benefit, has greatly merited the Favour of the Public. And, moreover, that if this Fiſhery could have been brought to be profitable to the Company, it would moſt certainly have been a gainful one to the Nation, as will plainly appear in the following and ſuch-like Reſpects, *viz.*

The great Benefits accruing to the Public by a ſucceſsful Whale Fiſhery.

I. By ſaving great Sums of Money ſent annually beyond Sea for the Purchaſe of Oil and Whalebone, which we abſolutely cannot be without.

II. By building and employing ſo great a Number of ſtout Ships as probably this Company would have employed, (perhaps as far as 100) had Succeſs attended their Fiſhery.

III. By the great Number of good Seamen, of whom this Fiſhery is allowed to be an excellent Nurſery; the Company actually employing annually 950 to 1100 ſuch; beſide thoſe employed at the Dock in Sail-making, and in the Rope-yard, Cooperage, &c.

IV. By the Number of Ship-builders, Coopers, Rope-makers, Sail-makers, and Labourers; and alſo the Employment given to Butchers, Bakers, Brewers, Diſtillers, Painters, Smiths, Turners, Slopſellers, Ship-chandlers, and all the other numerous Trades depending on the fitting out of Shipping.

V. Laſtly, by the Benefit accruing to the *landed Intereſt*, from the great Quantity of Proviſions of various Kinds, conſumed by the Men in thoſe Ships, as well as to the public Revenue by the Exciſe and Cuſtoms paid for Liquors and many other Things uſed in this Trade.

Now, if from the laying aſide of this one ſingle and ſmall Branch of Trade, ſo many Perſons were diſmiſſed to the wide World, to ſhift for themſelves and Families; and ſo many Trades and Occupations were to ſuffer a conſiderable Diminution of the former annual Emoluments; (as by the Print of *Hercules*'s Foot, they framed a Judgment of his whole Bulk and Stature) we are, in ſome Meaſure enabled, on the one Hand, to frame an Idea of the immenſe Benefit and Profit ariſing to this Nation from its preſent general and total foreign Commerce: As, on the other Hand, we may form a clear Judgment of the inexpreſſible Miſery, Depopulation, and Deſolation, which a general Declenſion of Commerce would bring upon this now happy Nation! It may not therefore be amiſs, on this Occaſion, to exhibit the whole Quantity of the *Proviſions* of all Kinds expended by the *South-Sea* Company in their ſaid eight Years *Whale Fiſhery*, as a farther (though but ſmall) Teſtimony of the Benefits accruing to the Public by our Navigation and Commerce, *viz.* *Beef* and *Pork* 1,380 Hundred Weight, 2 Quarters, 15 Pounds—*Beer* 466 Tons, 1 Barrel, 22 Gallons—*Stockfiſh* 10 Tons, 9 C. Wt. 3½ Quarters—*Brandy* 1,758½ Gallons—*Butter* 448 Firkins—*Cheeſe* 240 C. Wt. 3 Quarters, 2 lb.—*Peaſe* and *Oatmeal* 1,157½ Buſhels—*Bread* and *Flour* 1,044 C. Wt. 2 Quarters, 14 lb.—*Grout* or *Grots* 110 Hogſheads.——All which *Proviſions* coſt the Company no ſmaller a Sum than 43,778 *l.* 2 *l.* 3 *d.*

The *Dutch Eaſt-India* Company's Dividend, for the Year 1732, 25 *l. per Cent.*

Remark on the different Conduct of that Company from that of the *Dutch Weſt India* Company.

In the ſame Year the *Dutch Eaſt-India* Company reſolved to make a Dividend of 25 *per Cent.* to their Proprietors, for the Year 1732, to be paid in *May* 1733: Which ſhews the immenſe Benefit as well as the prudent Management of that Company, who (it is ſaid) never yet divided at any one Time the intire Profits they made by their immenſe Commerce, but always reſerved what we call a Neſt-Egg, for Accidents. Whilſt, on the other Hand, the *Dutch Weſt-India* Company, who at firſt and for ſome Time made vaſt Profits by their Commerce, took a quite contrary Courſe, by making large and extravagant Dividends, which raiſed the nominal but depreſſed the real and intrinſic Value of their Stock. So that when their firſt Difficulty came upon them from the *Portugueſe*, in the Middle of the laſt Century, they had not Means ſufficient to prevent their being driven out of *Braſil* by the laſt-named Nation, to their inexpreſſible Loſs. And the like happened to that Company a few Years after, by their being driven out of the fine Countries of *New-York* and *New-Jerſey*, and Hundreds of Families who had ventured their All in that Company were with it undone! A Leſſon for all ſuch trading Companies to uſe the greateſt Caution in their annual Dividends!

Ancona, in the Papal Territories, made a Free-port.

In this ſame Year Pope *Clement* XIIth erected his City of *Ancona*, on the *Adriatic* Shore, into a Free-port for all Nations, beſtowing on ſuch Perſons and Families as ſhould ſettle there ſundry conſiderable Exemptions from Taxes and Burdens, as alſo ſundry Exemptions from Duties, *&c.* on ſuch foreign Ships as ſhould reſort to that Port for Commerce. This has ſince had ſome conſiderable Effect, that City and Port being now more frequented than formerly.

A View of the State of *Ireland*; of its Number of People, and its Manufactures.

The Proſperity of the Kingdom of *Ireland* being very much for the Intereſt and Glory of *Great Britain*, the Wealth, Strength, and Populouſneſs whereof undoubtedly contributing to our own; we ſhall here obſerve, That an ingenious anonymous Piece was publiſhed in this Year, in Vindication of that Country from the Clamours raiſed about the clandeſtine Trade of Running of *Wool* and *Woollen Goods* from *Ireland* to foreign Parts, with the beſt Remedy for the ſame. [In a Letter to a Member of Parliament.]

Ireland's People increaſe in Proportion in the Decreaſe of their Sheep-Walks.

I. In general he undertakes to ſhew, "That although the Quantity of *Wool* and *Woollen Yarn* ſent from *Ireland* to *England* be leſs at preſent than formerly, and is daily decreaſing; yet it is not occaſioned from a greater Quantity thereof being run beyond Sea, but from other after-mentioned Cauſes; which he introduces by ſhewing the total Quantities of *Wool* and *Yarn* imported into *England* in different Periods, from 1687 downward; and that, in proportion to the gradual Decreaſe of that Importation, *Ireland* generally has increaſed in People; becauſe, meeting with other Employment, firſt by Tillage and ſince by their *Linen* Manufactures, they have bred much fewer Sheep, having turned much of their Sheep-Walks into Tillage and the Paſture fit for Black Cattle and Horſes."

II. He obſerves, "That in the Year 1672, the People of *Ireland* were computed to amount to 1,100,000, and in 1684 they were 1,200,000: That ſoon after King *William*'s Reduction of *Ireland* they did not exceed 1,040,000," [occaſioned doubtleſs by ſo many of their Papiſts going beyond Sea to *France*, *Spain*, &c.] "But that, in the Year 1725, they were riſen again to at leaſt 1,670,000 People.——That the Devaſtation in 1641, and the Encouragement given to Papiſts toward the End of King *Charles* the Second's Reign, diſcouraged Proteſtants from ſettling there;—and thoſe there already being indolent, by Reaſon of the Cheapneſs of Land and Proviſions, the Bulk of their Lands (the People being few) was employed in grazing of Cattle and Sheep, which occaſioned a great Increaſe of the Exportation of Wool to *England.*—That the great Increaſe of People there, about the Year 1725, by the Increaſe of their Linen and other Manufactures, having brought thither much more Wealth, more Tillage was wanted, and the Sheep-Walks were much leſſened. Thus (he thinks it evident, that) the Decreaſe of the Importation of Wool and Yarn to *England* does not proceed from a greater, or indeed ſo great, a Quantity thereof being at this Time run beyond Sea, but purely from the laſt-named Cauſes, and to the Increaſe of Dairies, and of the Conſumption of more Sheep and Wool, to feed and cloath their People."

The Increaſe of the *Linen* Manufacture of *Ireland* is continually decreaſing that of their *Wool*.

III. "It was therefore a very wiſe Meaſure of *England*, in encouraging the *Linen* and *Hempen* Manufactures of *Ireland*, as the only effectual Way to employ their Poor, and prevent the Increaſe of their *Wool*; as may be ſeen by the few Sheep there are now in the *Linen* Counties, compared to former Times; more particularly in the Province of *Ulſter*, wherein the Linen Manufacture is univerſally ſpread, they not having Sheep enow to ſupply their Markets with Food, nor the People with Clothing. In moſt Part alſo of the other three Provinces of *Ireland*, the Sheep-Walks are conſtantly decreaſing, and Tillage, Dairy, and feeding of Black Cattle and Horſes, increaſing along with the Linen Manufacture, ſpreading faſt into moſt Counties.

"And,

" And, although it is not denied, that ſmall Quantities of Wool and its Manufactures are ſtill " clandeſtinely exported, yet it does not go out in ſuch Quantity as has been imagined from the " Decreaſe of the Export of Wool and Yarn to *England*. Our Brethren of *England* may there" fore ſee," (ſays this ingenious *Iriſhman*) " That, if prudent Meaſures be taken, *Ireland* in a " little Time will have no more *Wool* nor *Woollen* Manufacture than is neceſſary for its own " Conſumption.

IV. " Thus" (continues he) " even the greateſt Part of the *Wool* of *Ireland* is now neceſſary " to employ the Clothiers in *Dublin*, who ſupply moſt Parts of that Kingdom with Woollen " Goods.——It is alſo certain, That moſt of the Woollen and Bay Yarn ſpun in the Weſt of " *Ireland*, as well as a great Quantity from *Dublin*, is exported to *England*."

Reflexions on this Account of the *Linen* Manufacture.

We ſhall only add hereunto, That as the Quantity of all Kinds of Linen imported into the Port of *London* alone, in only the Year 1731, was very near *fourteen Millions of Ells*, from *Holland*, *Germany*, and the *Eaſt Country*; the greateſt Part of which is again exported to our Plantations in *America*, and our Factories in *Africa*, &c. and as the Poor of *Scotland* and *Ireland* generally live nearly as cheap, as the Poor in thoſe ſaid firſt-named foreign Countries, it is to be hoped, that all Manner of Encouragement will be given (as indeed has in a great Meaſure already been done) for their manufacturing the ſame, inſtead of foreign Nations; but moſt eſpecially inſtead of the People of *Ruſſia*, *Poland*, and *Pruſſia*, to whom we pay a great annual Balance in Money for their ſaid Linen, Naval Stores, &c.

The Quantity of *London*'s Shipping and Sailors.

The Number of Ships belonging to the Port of *London*, according to Mr. *Maitland*'s Account for the Year 1732, which, in his Survey of *London*, he ſays was taken from the General Regiſter at the Cuſtom-houſe,—from 15 Tons to 750 Tons, was 1,417 Ships; containing 178,557 Tons, navigated by 21,797 Men. Of which Ships there were 130 from 300 to 500 Tons, and 83 from 200 to 300 Tons; all the reſt were under 200 Tons, excepting the great *South-Sea* Company's Ship of 750 Tons.

Homeward Cargoes of *ten Dutch India* Ships.

Ten *Dutch Eaſt-India* Ships being arrived this Year in *Holland* from *Batavia*, their vaſt Cargoes may be worth recording in this Work, *viz.* 10,700 Pieces of Silk Stuffs, and 81,985 lb. Wt. of *Raw Silk*, *Bengal*—86,515 Pieces of Callicoes—1,419,427 lb. of Pepper, black and white and long Pepper—653,552 lb. Tea—Nutmegs 389,940 lb.—Mace 136,906 lb.—128,000 lb. of Cinnamon—Sugar, powdered and candied, 924,341 lb.—Candied Nutmegs 80,000 Pots—6,850 lb. of *Cardamums*—*Java* Coffee 1,872,375 lb.—Cubebs 5,200 lb.—592,028 lb. Saltpetre—11,700 lb. *Benzoin*—1,015 lb. *Borax*—200 lb. *Aguil-wood*—285,069 lb. *Caliatour-wood*—125,419 lb. *Cowries*—72,843 lb. Cotton-yarn—17,100 lb. Gumlack—1,500 Pieces of walking Canes—11,222 lb. Indico—21,487 lb. *Curcuma*—1,810 lb. Mother of Pearl—1,445 lb. *China Root*—556,215 lb. *Sapan-wood*—64 lb. Powder of Pearl—23,600 lb. *Malacca* Tin—and 67,141 lb. *Siam* Tin—(beſides a rough Diamond, 2 Diamond Rings, and 2 Gold Boxes.)

A compendious View of the Eſtabliſhment of the new Colony of *Georgia* in *America*.

In this ſame Year, a Number of Gentlemen of Diſtinction and Worth ſet on Foot one of the moſt diſintereſted, charitable, and (to the Public) beneficial Deſigns that was ever undertaken. Hitherto all our *American* Colonies were profeſſedly planted *for the immediate Benefit of the Undertakers:*—But this was ſolely for a national and charitable Purpoſe, without any other Benefit to the Undertakers than what reſults from the Pleaſure of doing Good. Moſt of them were Members of Parliament, who having lately had Occaſion to obſerve the Miſery of the Priſoners confined in our Gaols for Debt, were thence moved with Compaſſion for the Relief of ſuch-like unfortunate Objects, who, were they ſettled in ſome new Colony in our Plantations, might, inſtead of a Burden and Diſgrace, prove a great national Benefit; and that moreover many perſecuted and other Proteſtants from beyond Sea might take the Benefit of ſuch a Colony for ſetting up their Reſt there, with the free Enjoyment of their Civil and Religious Liberties. There was ſtill a great Part of the Charter-Limits of *South-Carolina* remaining unplanted, Southward, next to *Florida*, which it was highly the Intereſt of *Great Britain* to occupy and plant as ſoon as poſſible, leſt either the *Spaniards* from *Florida*, or the *French* behind it, from their Uſurpation of *Miſſiſippi*, ſhould ſeize on and plant what they ſo found unoccupied; more eſpecially as the latter People greatly lament their not having any Footing on any Part of the Eaſtern Shores of *North America*, ſo as to communicate more eaſily with their Sugar-Iſlands, their Voyages to and from their *Miſſiſippi* Colony being by no Means ſo convenient for receiving thence Supplies of Proviſions, Lumber, &c. which therefore they were ſtill obliged to take from our *Britiſh* Continent Colonies. This Vacancy then was judged abſolutely requiſite to be filled up as ſoon as poſſible.

Theſe Reaſons were ſufficiently cogent for Gentlemen of ſo public-ſpirited a Character and Diſpoſition to make the Attempt. But firſt they were to be authorized by his Majeſty's perpetual Charter, which they obtained in this ſame Year, on the 9th of *June*; " impowering twenty-one " Gentlemen by Name, and ſuch others as they ſhould from Time to Time elect into their Body, " to be Truſtees for eſtabliſhing the Colony therein named *Georgia* in *America*, bounded between " the moſt Northern Stream of the River *Savannah* and the moſt Southern Stream of the River " *Alatamaha*," [above 100 Miles] " along the Sea-Coaſt, and extending Weſtward from the " Heads of the ſaid Rivers in direct Lines to the *South-Sea*, with the Iſlands within twenty " Leagues of the Sea-Coaſt.——The ſaid Truſtees were thereby impowered to receive and ma" nage the Contributions of all Perſons and Corporations inclined to give Money for the tranſ" porting of People to and ſettling them in the ſaid Country. This Corporation was made " capable in Law to hold and purchaſe Lands, &c. in *Great Britain*, to the Value of 1,000*l.* " yearly, and in *America* to an unlimited Value, for the ſaid Charitable Purpoſe.—Their Common" Council to conſiſt of fifteen Perſons, with Power to make them up twenty-four," [as they afterward were.]——" This Corporation might iſſue Commiſſions to others, for collecting Con-" tributions.——Yielding annually to the Crown *four Shillings* for every 100 Acres of Land " which they ſhall grant to any Planter; which Quit-Rent to begin to be paid *ten* Years from " and after the reſpective Dates of ſuch Grants.——*Georgia* to remain for ever an independant " Province; ſave only that the Government of its Militia ſhall remain in the Governor of *South-" Carolina:* But the Government of the Colony in other Reſpects to be in the Truſtees for " twenty-one Years, when it was to be veſted in the Crown.—Liberty of Conſcience and Freedom " of Worſhip allowed to all its Inhabitants, Papiſts alone excepted.—Lands to be granted to any " Perſon (not exceeding 500 Acres) on ſuch Terms as to the Common-Council ſhould ſeem proper. " ——No Truſtee to hold Lands nor Office in *Georgia.*—The Grants of Lands to be regiſtered " here in the Office of the Auditor of the Plantations."———With reſpect to the Progreſs made by thoſe Truſtees, it may be truly ſaid, that they took all poſſible Pains for executing the Truſt: They erected two good Towns, *Savannah* and *Frederica*, at the North and South Extremities of the Province, beſide ſeveral Villages and ſmall Forts, and one more famous one among the *Indians*, called *Auguſta*, with a ſmall Garriſon for the Protection of the *Indian* Trade, 240 Miles Weſt from the Sea, up the River *Savannah:* A common Nurſery-Garden for White Mulberry-trees, for the Production of *Silk.*——They procured foreign Vine-Dreſſers for improving the *native Vines*, which in great Abundance run up the talleſt Trees and bear ſmall Grapes; and they have alſo ſent thither many Sorts of Vines from *Europe*; as alſo ſome *Piedmonteſes*, ſkilled in the winding of Silk and tending the Silk-worms.——For ſeveral Years alſo, they and other Lords and Gentlemen, by Subſcription, maintained a travelling Profeſſor of *Botany*, for collecting the moſt precious Plants and Seeds in various *American* Climates, to be tranſplanted to *Georgia.*——Yet, by having ſeveral idle Drones, Drunkards, and downright Rogues, the Proſperity of this Colony was at firſt much retarded, as it was alſo by frequent Alarms from the *Spaniards*; and, it muſt be confeſſed, in part alſo, by an ill-judged though well-meant Utopian Scheme, for limiting the Tenure of Lands, and for the Excluſion of Negro Slaves; both which Miſtakes have ſince been rectified. By the planting of *Georgia*, *Carolina* has felt the Benefit of being able to run out (as they term it) much Land, which, till that new Frontier-Barrier was eſtabliſhed, they had no Inclination to do, whereby thoſe Lands have been raiſed to five Times their former Value about *Port-Royal* and toward the River *Savannah.* *Georgia* therefore cannot fail to be of great Service to *us* on many Accounts. The *Britiſh* Navy may, in its Bays and Harbours (in Caſe of a War) ſafely lie in wait for the *Spaniſh Galeons*, or for the *French* from *Miſſiſippi*, in going to *Europe* through the dangerous Gulph of *Florida*, whilſt the neighbouring *Spaniſh* Port of *St. Auguſtine* is almoſt choaked up with Sand. The Truſtees of *Georgia* erected a Fort in the Nation of the *Upper Creeks*, almoſt 400 Miles from the Sea, and not above 40 Miles from the neareſt *French* Fort in *Miſſiſippi*, whereby all that Tract of Country is kept Poſſeſſion of for *us!*

Georgia's particular Benefit to *South-Carolina*, and alſo for annoying our Enemies.

Georgia produces a great Variety of excellent Plants and Drugs; Orange-trees in ſome Parts of it; great Plenty of Horſes and Black Cattle already raiſed; and the *Saltſburgers* of *Ebenezer* long ſince raiſed more Corn than they conſumed. There is Plenty of Wild-fowl, and alſo Fiſh on its Coaſts. And ſince it has fallen under the Government of the Crown, it gradually increaſes in People and Improvements more and more. But of the Excellency of this new Province, and of the adjoining one of *Carolina*, for raiſing the richeſt Productions upon Earth, we have ſaid ſo much in our Introduction to this Work, and of Colonel *Purry*'s Diſplay of the peculiar Excellency of the Latitude of 33 Degrees, that we ſhall not need here to enlarge farther thereon; after obſerving a Miſtake in the Manner of granting parliamentary and other Supplies for the planting of *Georgia:* For had the whole Money granted at different Times by Parliament, and alſo what was collected by private Donations, been in one accumulated Sum, and laid out at once for one grand Embarkation thither, with Tools, Arms, Stores, Plants, Seeds, *&c.* it would have more completely and ſpeedily effected what the Truſtees ſo earneſtly wiſhed for, than the Method they were through Neceſſity obliged to follow, of ſending many annual ſmall Embarkations: For ſo large an Embarkation and Colony ſent at once would have been near and ready to adviſe and aſſiſt one another, whereby they would have been enabled to proceed alſo more chearfully and ſucceſsfully.

The Authority of the *Hollanders* to oppoſe the new *Spaniſh* Company from *Cadiz* to *Eaſt-India.*

The Court of *Spain* was this Year put upon a Project for erecting an *Eaſt-India* Company, to trade to the *Philippine Iſles* directly from *Cadiz*, by the *Cape of Good Hope.* And although it concerned all the other *European* Nations trading to *India*, yet it more eſpecially concerned the *Dutch* to oppoſe it, as it is directly contrary to the latter Part of the Vth Article of the Treaty of *Munſter*, *Anno* 1648, between *Spain* and them; and as the ſame Article was lately ſucceſsfully made uſe of againſt the *Oſtend* Company of the *Spaniſh* or *Auſtrian Netherlands*; it may be yet more ſtrongly oppoſed to the Erection of this new Company, *viz.*—" Moreover, it is ſtipulated and agreed, That the " *Spaniards* ſhall confine their Navigation in the *Eaſt-Indies* in ſuch Manner *as it is at preſent poſſeſſed " by them, without having it in their Power to extend the ſame any farther:* As alſo the Inhabitants " of the *Netherlands* ſhall abſtain from frequenting thoſe Places which belong to the *Caſtilians* in " the *Eaſt-Indies!*" Now the *Eaſt-India* Trade, *as then poſſeſſed by Spain*, was practiſed *ſolely* from *New-Spain* to the *Philippines*, and back to the Port of *Acapulco*; but no *Eaſt-India* Trade at all from *Spain* by the Way of the *Cape of Good Hope!* Wherefore the *Dutch* at this Time moſt juſtly and zealouſly, and in the End effectually, oppoſed ſo palpable a Contravention of that Treaty.

An authentic View of the Conſtitution, *&c.* of the *Britiſh American* Colonies.

Purſuant to an Order of the *Britiſh Houſe of Commons*, directed to the *Lords Commiſſioners of Trade and Plantations*, in the latter End of the laſt or the Beginning of this ſame Year 1732, relating to the Diſpute ſtill ſubſiſting between the Sugar Colonies and the Northern Continent Colonies of *America*; the ſaid Board reported, with reſpect to any Laws made, Manufactures ſet up, or Trade carried on there, detrimental to the Trade, Navigation, or Manufactures of *Great Britain*, as follows, *viz.*

A. D 1732

I. With Reſpect to the Laws, it is premiſed, " That many of the *Britiſh* Colonies in *America* " are immediately under the Government of the Crown; namely, *Nova-Scotia*, *New-Hampſhire*, " the *Jerſies*, *New-York*, *Virginia*, the two *Carolina's*, *Bermudas*, the *Bahama Iſlands*, *Jamaica*, " *Barbadoes*, and the *Leeward Iſlands*.

The different legal Conſtitutions of the ſeveral *Britiſh* Colonies in *America*.

" II. Others are veſted in the Proprietors, as *Penſylvania*, *Maryland*; and not long ſince the " *Bahama's* and the two *Carolina's* alſo.

" III. There are likewiſe three Charter-Governments, *viz.* the *Maſſachuſet's Bay*, called *New-* " *England*, the Conſtitution whereof is of a mixed Nature; where the Power ſeems to be divided " between the King and the People, but in which the People have much the greateſt Share; for " here the People do not only chuſe the Aſſembly, but the Aſſembly chuſes the Council alſo, " and the Governor depends on the Aſſembly for his annual Support; which has ſo frequently " laid their Governors under Temptations of giving up the Prerogative of the Crown, and the " Intereſt of *Great Britain*. The other two Charter-Governments are *Connecticut* and *Rhode-* " *Iſland*; or rather they are *Corporations*, where almoſt the whole Power of the Crown is dele- " gated to the People: For they chuſe their Aſſembly, their Council, and their Governor like- " wiſe annually; and hold little or no Correſpondence with our Office. All theſe Colonies, how- " ever, by their ſeveral Conſtitutions, have Power of making Laws for their better Government " and Support; provided they be not repugnant to the Laws of *Great Britain*, nor detrimental " to their Mother-Country: And in the *Maſſachuſet's Bay* alſo, if their Laws are not repealed " within *three* Years after they have been preſented to the King, they are not repealable by the " Crown after that Time.

" IV. *Maryland*, *Connecticut*, and *Rhode-Iſland*, not being under any Obligation by their reſpec- " tive Conſtitutions to return authentic Copies of their Laws to the Crown, for Approbation " or Diſallowance, or to give any Account of their Proceedings; we are very little informed of " what is doing in any of thoſe Governments." [*Strange indeed!*]

" V. All the Governors of the Colonies (which are under Appointment) ought, within a " reaſonable Time, to tranſmit Home authentic Copies of the ſeveral Acts by them paſſed, to " go through a proper Examination.

" VI. The following Complaints have, however, been lately made to this Board againſt ſome " Plantation Laws, *viz.*

" In the *Maſſachuſet's Bay*, an *Act* was made for the Encouragement of the making *Paper*; " which Law interferes with the Profit made by the *Britiſh* Merchant on foreign Paper ſent thi- " ther, being almoſt the only Sort of Paper ſent thither.

Manufactures in *Britiſh America* interfering with thoſe of *Great Britain*.

" In *New-York* there is a Duty of 2 *l.* laid on all *Negroes* imported from *Africa*, and of 4 *l.* on " all *Negroes* imported from any other Place.

" By the Charter of *Penſylvania*, the Proprietor is obliged to offer the Laws of that Province " to the Crown, for Approbation or Diſallowance, within five Years after they are paſſed; and " if, in ſix Months after preſented to the King, he does not repeal them, it is not in his Power " to repeal them afterward.

" VII. That in *New-England*, *New-York*, *Connecticut*, *Rhode-Iſland*, *Penſylvania*, and in the " County of *Somerſet* in *Maryland*, they had fallen into the Manufacture of *Woollen* Cloth and " *Linen* Cloth, for the Uſe of their own Families only.——

" For, 1ſt, the Product of thoſe Colonies being chiefly Stock" [*i. e.* Cattle] " and Grain, " the Eſtates of the Inhabitants depended wholly on Farming, which could not be managed with- " out a certain Quantity of Sheep, their *Wool* would be intirely loſt were not their Servants " employed during Winter in manufacturing it for the Uſe of their Families.

" 2. That Flax and Hemp being likewiſe eaſily raiſed, the Inhabitants manufactured them in- " to a coarſe Sort of Cloth-Bags, Traces, and Halters, for their Horſes; which they found did " more Service than thoſe they had from any Part of *Europe*.——☞ That, however, the Height " of Wages and high Price of Labour in general in *America* rendered it impracticable for People " there to manufacture their *Linen* Cloth at leſs than 20 *per Cent.* more than the Rate in *England*, " or *Woollen* Cloth at leſs than 50 *per Cent.* dearer than that which is exported from hence for " Sale. It were to be wiſhed, that ſome Expedient might be fallen upon to divert their Thoughts " from Undertakings of this Nature: So much the rather, becauſe thoſe Manufactures, in Pro- " ceſs of Time, may be carried on in a greater Degree, unleſs an early Stop be put to their " Progreſs, by employing them in *Naval-Stores*. Wherefore we take Leave to renew our repeated " Propoſals, That reaſonable Encouragement be given to the ſame. Moreover, we find that " certain Trades carried on, and Manufactures ſet up there, are detrimental to the Trade, Na- " vigation, and Manufactures of *Great Britain*. For the State of thoſe Plantations varying almoſt " every Year, more or leſs, in their Trade and Manufactures, as well as in other Particulars, " we thought it neceſſary for his Majeſty's Service, and for the Diſcharge of our Truſt, from " Time to Time, to ſend certain general Queries to the ſeveral Governors in *America*, that we " might be the more exactly informed of the Condition of the ſaid Plantations, among which " there were ſeveral that related to their Trade and Manufactures, to which we received the fol- " lowing Returns, *viz.*

“ 1. *New-Hampſhire.*

“ The Governor, in his Anſwer, ſaid, That there were no ſettled Manufactures in that Province, and that their Trade principally conſiſted in *Lumber* and *Fiſh.*

“ 2. *Maſſachuſet's Bay*, in *New-England.*

“ The Governor informed us, That in ſome Parts of this Province, the Inhabitants worked up their *Wool* and *Flax* into an ordinary coarſe Cloth, for their own Uſe; but did not export any. That the greateſt Part of both *Woollen* and *Linen* Cloathing worn in this Province was imported from *Great Britain*, and ſometimes from *Ireland*. But, conſidering the exceſſive Price of Labour in *New-England*, the Merchants could afford what was imported *cheaper* than what was made in that Country.

“ That there was alſo a few *Hatters* ſet up in the maritime Towns. And that the greater Part of the *Leather* uſed in that Country was manufactured amongſt themſelves.——That there had been for many Years ſome *Iron-works* in that Province, which had afforded the People *Iron* for ſome of their neceſſary Occaſions: But that the *Iron* imported from *Great Britain* was eſteemed much the beſt, and wholly uſed by the Shipping. And that the *Iron-works* of that Province were not able to ſupply the twentieth Part of what was neceſſary for the Uſe of the Country.

“ 3. *New-York.*

“ That they had no Manufactures in that Province that deſerved mentioning; their Trade conſiſting chiefly in *Furs*, *Whalebone*, *Oil*, *Pitch*, *Tar*, and *Proviſions.*

“ 4. *New-Jerſey.*

“ No Manufactures here that deſerve mentioning: Their Trade being chiefly in *Proviſions* exported to *New-York* and *Penſylvania.*

“ 5. *Penſylvania.*

“ Its chief Trade lay in the Exportation of *Proviſions* and *Lumber*; having no Manufactures eſtabliſhed; their Cloathing and Utenſils for their Houſes being all imported from *Great Britain.*

“ 6. From *New-Hampſhire* farther Advices, *viz.*

“ That the *Woollen* Manufacture of this Province is much leſs than formerly; the Common Lands on which the Sheep uſed to feed, being *now* divided into particular Properties, and the People almoſt wholly cloathed with *Woollen* from *Great Britain.*—That the manufacturing of *Flax* into *Linen* (ſome coarſer, ſome finer) daily increaſed by the great Reſort of People from *Ireland* thither, who are well ſkilled in that Buſineſs.—And that the chief Trade of this Province continued, as for many Years paſt, in the Exportation of *Naval-Stores*, *Lumber*, and *Fiſh.*

“ 7. Later Accounts from *Maſſachuſet's Bay*, in *New-England*, *viz.*

“ The Aſſembly have voted a Bounty of *thirty* Shillings for every Piece of *Duck* or *Canvas* to be made in this Province.——Some other Manufactures are carried on there; as the making of *Brown Hollands*, for Womens Wear; which leſſens the Importation of *Callicoes*, and ſome other Sorts of *Eaſt-India* Goods.——They alſo make ſome ſmall Quantities of Cloth made of *Linen* and *Cotton*, for ordinary Shirting and Sheeting.——By a *Paper-mill*, ſet up three Years ago, they make to the Value of 200 *l.* Sterling yearly.——There are alſo ſeveral *Forges* for making of *Bar-Iron*, and ſome Furnaces for *Caſt-Iron*, (or hollow Ware) and one *Slitting-mill*:—And a Manufacture of *Nails.*

“ The Governor writes, concerning the *Woollen Manufacture*, That the Country People, who uſed *formerly* to make moſt of their Cloathing out of their *own Wooll*, do not *now* make a third Part of what they wear, *but are moſtly cloathed with* Britiſh *Manufactures.*——The ſame Governor, [*Belcher*] by ſome of his Letters of an older Date, *in Anſwer to our annual Queries*, writes, That there are ſome few *Copper Mines* in this Province; but ſo far diſtant from Water-Carriage, and the *Ore ſo poor*, that it is not worth the digging.——The Surveyor-General of his Majeſty's Woods writes, That they have in *New-England ſix Furnaces* and *nineteen Forges*, for making of *Iron*:——And that, in this Province, *many Ships are built for the French and Spaniards*, in return for *Rum*, *Moloſſes*, *Wines*, and *Silks*, which they truck there, by Connivance!——Great Quantities of *Hats* are made in *New-England*, of which the Company of Hatters of *London* have likewiſe lately complained to *us.*——That great Quantities of thoſe *Hats* are exported to *Spain*, *Portugal*, and *our Weſt-India* Iſlands.——They alſo make all Sorts of *Iron-work* for Shipping.——That there are ſeveral *Still-Houſes* and *Sugar-Bakers* eſtabliſhed in *New-England.*

“ 8. Later Advices from *New-York*, viz.

“ There are no Manufactures here that can affect the Manufactures of *Great Britain.*——There is yearly imported into *New-York* a very large Quantity of the *Woollen* Manufactures of this Kingdom, for their Cloathing, which” [as the Preſident of the Council of this Province writes] “ they would be rendered incapable to pay for, and would be reduced to the Neceſſity of making for themſelves, if they were prohibited from receiving from the foreign *Sugar-Colonies*, the *Money*, *Rum*, *Sugar*, *Molaſſes*, *Cocao*, *Indico*, *Cotton-wool*, &c. which they at preſent take in return for Proviſions, Horſes, and Lumber, the Produce of that Province and of *New-Jerſey*; *of which, he affirms, the* Britiſh *Sugar-Colonies do not take off above one half!* ☞ But the Company of *Hatters* of *London* have ſince informed *us*, that *Hats are manufactured in great Quantities in this Province!*”

“ 9. *New-*

" 9. *New-Jerſey.*
" No particular Returns from this Province.

" 10. From *Penſylvania* later Advices, *viz.*
" The Deputy-Governor writes, That he does not know of any Trade carried on in that Pro-
" vince that can be injurious to this Kingdom: And that they do not export any *Woollen* or
" *Linen* Manufactures: All that they make (which are of a coarſer Sort) being for their own
" Uſe.——We are farther informed, That in this Province are built many Brigantines and ſmall
" Sloops, which they ſell to the *Weſt-Indies.*

" 11. *Rhode-Iſland.*
" The Governor informs us, (in Anſwer to our Queries) That there are *Iron-Mines* there;
" but not a fourth Part *Iron* enough to ſerve their own Uſe. But he takes no Notice of any Sort
" of Manufacture ſet up there.

" 12. *Connecticut.*
" No Return from the Governor of this Province." [By its Charter, as we have already ſeen, *almoſt independent*, or, to the Shame of the Nation, *holding little or no Correſpondence with the Board of Trade*; ſince, by ſuch Privileges of former Charters granted by the Crown, before the Importance of thoſe Countries was foreſeen or underſtood, they may in Time do very great Miſchief to their Mother Country, as alſo to other *Britiſh* Colonies in *America*, in ſundry Reſpects.] " But" (ſays this Report of the Board of Trade) " we find by ſome Accounts, That the Produce of this
" Colony is Timber, Boards, all Sorts of *Engliſh* Grain, Hemp, Flax, Sheep, Black Cattle,
" Swine, Horſes, Goats, and Tobacco.——That they export Horſes and Lumber to the *Weſt-*
" *Indies*, and receive in Return *Sugar*, *Salt*, *Moloſſes*, and *Rum.*——We likewiſe find, that their
" Manufactures are very inconſiderable; the People there being generally employed in *Tillage*;
" ſome few in Tanning, Shoe-making, and other Handicrafts; others in Building, Joyners,
" Taylors, and Smiths Work, without which they could not ſubſiſt."

☞ No Report is made concerning *Carolina*, the *Bahama* nor the *Bermuda* Iſles: And as for *Newfoundland* it is ſcarcely to be called a Plantation, and *Hudſon's Bay* not at all.

" The *Sugar* Colonies, *viz. Jamaica*, *Leeward-Iſlands*, and *Barbadoes.*
" By the laſt Returns which we have had from thoſe Iſlands to our circular Queries, we do not
" find that they have any other Manufactures eſtabliſhed, beſide thoſe of *Sugar*, *Moloſſes*, *Rum*,
" and *Indico*, of their own Produce. Theſe, with *Cotton*, *Aloes*, *Pimento*, and ſome other Produc-
" tions of leſs Note, are their whole Dependance; which are Commodities no way interfering
" with the Manufactures of this Kingdom.———In the Year 1724, Mr. *Worſley*, then Governor
" of *Barbadoes*, informed us, That of *Cotton* they made *Hammocks*, a few *Stockings*, and *Nets* for
" Horſes."

" From the foregoing State" (continues the *Report*) " it is obſervable, That there are more
" Trades carried on and Manufactures ſet up in the Provinces on the Continent of *America* to the
" Northward of *Virginia*, prejudicial to the Trade and Manufactures of *Great Britain* (particu-
" larly in *New-England*) than in any other of the *Britiſh* Colonies; which is not to be wondered at:
" For their Soil, Climate, and Produce, being pretty near the ſame with *ours*, they have no Staple
" Commodities of their own Growth to exchange for *our* Manufactures; which puts them under
" greater *Neceſſity*, as well as under greater Temptation of providing for themſelves at Home:
" *To which may be added, in the Charter Governments, the little Dependance they have upon their*
" *Mother Country, and conſequently the ſmall Reſtraints they are under in any Matters detrimental to her*
" *Intereſts!*

" And therefore, we would humbly beg Leave to report and ſubmit to the Wiſdom of this
" honourable Houſe, the Subſtance of what we formerly propoſed in our *Report* on the *Silk*,
" *Linen*, and *Woollen* Manufactures herein before recited; namely, Whether it might not be
" expedient to give thoſe Colonies proper Encouragements for turning their Induſtry to ſuch
" Manufactures and Products as might be of Service to *Great Britain*, and more particularly to
the Production of all Kinds of *Naval-Stores.*
" *Whitehall*, *Feb.* 15, 1731-2. *Paul Dockminique* &c."

From the foregoing Report, the great Uſefulneſs of the Inſtitution of the *Board of Trade and Plantations* may evidently be ſeen: Notwithſtanding it too plainly appears alſo, That in Anſwer to their annual Queries ſent to our Plantations, the Governors of the Northern Colonies (as in the Inſtances above of *New-York* and *Penſylvania*) may frequently impoſe on that *Board*, in Favour of their reſpective Governments; which, it is humbly apprehended, might be eaſily and effectually prevented by our *Britiſh Legiſlature.*

We will not preſume to ſay how much farther thoſe annual Returns from the Plantations may be or have lately been improved; but ſurely the before-named ones are lame in ſome Reſpects: Neither ſhall we preſume to offer our peremptory Opinion (though we have known that ſome have done it in private Converſation) how far the Reports of the Board of Trade, concerning the ſaid annual Returns from *America* ſhould be made public; ſince of that the King, his Miniſtry, and Council, muſt be the moſt proper Judges.

We ſhall only ſay farther, That defective as the above Report to Parliament is, it is undoubtedly to be preferred before the Accounts publiſhed by any private Perſons, and infinitely more ſo ſo before any ſuch which are publiſhed by anonymous Authors, who, for the moſt Part, write for mere private Intereſt, and oftimes to miſguide the Unwary!

By this Report alſo, the different Conſtitutions and Intereſts of our *American* Colonies are clearly explained by undoubted Authority; although we cannot but hope and wiſh, That the Time will come when *all* our *American* Colonies may be fixed on one uniform *Regal* and *Legal* Plan, how unſurmountable ſoever the Difficulties of ſuch a Plan may ſeem to very many, who perhaps have not duly conſidered what a *Britiſh* King united to a *Britiſh* Parliament can effect, for removing all the Obſtacles reſulting from the *Proprietary*, *Charter*, and *mixed* Conſtitutions of ſeveral of thoſe Colonies; more eſpecially as the Removal of ſome of thoſe Difficulties has been already effected in our own Times.

England being now the great Mart of *Europe* for *Diamonds*, &c. their Importation is made Duty-free.

" *England*," (and more particularly the City of *London*) " being now become a great Mart for " *Diamonds*, and other precious Stones and Jewels," (according to the Preamble to an Act of Parliament of the 6th Year of King *George* the Second, (Cap. vii.) *For the free Importation and Exportation of Diamonds, Pearls, Rubies, Emeralds, and all other Jewels and precious Stones*) " from " whence moſt foreign Countries are ſupplied, and great Numbers of rough Diamonds are ſent " from abroad to be cut and poliſhed here, which is a great Advantage to this Nation; and " there is great Reaſon to believe, if the Importation thereof was encouraged and made eaſy, " the ſaid Trade would increaſe.——It was therefore enacted, That thoſe Diamonds, &c. might " hereafter be *imported* (as before they might have been *exported*) free of all Duty, in any Ship or " Veſſel whatſoever; with this only *Proviſo*, That this Exemption ſhall not make void the Duty " granted to his Majeſty for the Uſe of the *Eaſt-India* Company, imported from Places within " their Limits."

Two more new Pariſhes erected in the Suburbs of *London*.

The Suburbs of *London* on every Side ſtill increaſing, two Acts of Parliament paſſed in this ſame 6th Year of King *George* the Second, for providing a Maintenance for the Miniſters of two *new* Pariſhes therein, *viz.* for that of *St. John* in *Southwark*, (Cap. xi.) and of *St. Luke* in *Old-Street*, in what is called the *Lordſhip*, Part of the Pariſh of *St. Gyles Cripplegate*, Cap. xxi. Both which being undoubted Proofs of our ſtill increaſing Commerce.

The Reſult of the warm Diſpute between the *Britiſh Sugar Colonies* and the *Britiſh Continent American Colonies*, was a Duty laid on all Rum, Sugar, and Moloſſes, brought into the Continent Colonies.

The warm Diſpute between the *Britiſh American Sugar Colonies*, and the *Britiſh Northern Continent American Colonies*, which had laſted from the Year 1731; concerning the Trade of the latter with the *French*, *Dutch*, and *Daniſh* Sugar Colonies, of whom they took off (in Exchange for their Proviſions, Horſes, Lumber, &c.) conſiderable Quantities of their Sugar, Rum, and Moloſſes; and of which, under the ſaid Year 1731, we have fully treated; was, in this Year 1733, finally terminated, by a prudent Temperament of an Act of Parliament of this ſaid 6th Year of King *George* the Second, (Cap. xiii.) *For the better ſecuring and encouraging the Trade of his Majeſty's Sugar Colonies in* America. The Preamble to which ſets forth, " That whereas the Welfare and Proſperity of your Majeſty's Sugar Colonies in *America* are of the greateſt Conſequence " and Importance to the *Trade*, *Navigation*, and Strength of this Kingdom. And whereas the " Planters of the ſaid *Sugar-Colonies* have of late Years fallen under ſuch great Diſcouragements, " that they are unable to improve or carry on the *Sugar Trade* upon an equal Footing with the " *foreign* Sugar Colonies, without ſome Advantage and Relief be given to them from *Great Britain*.——Be it therefore enacted, I. That the ſeveral after-mentioned Rates and Duties be " granted, *viz.* upon all *Rum* of the *foreign Sugar Colonies* which ſhall be imported into any of " the *Britiſh* Plantations in *America*, Nine Pence Sterling for every Gallon thereof—Six Pence " for every Gallon of *Moloſſes*—and Five Shillings on every Hundred Weight of *Sugars* and " *Paneles*—to be paid down in ready Money by the Importers, before their landing of the ſame.

" II. That no *Sugars*, *Paneles*, *Syrups*, or *Moloſſes*, nor any Rum or Spirits of *America*, except " of the Growth of his Majeſty's Sugar Colonies, ſhall be imported into *Ireland*, but ſuch only as " ſhall be laden and ſhipped in *Great Britain* in Ships navigated according to the Navigation " Laws; under Forfeiture of Ship and Cargo.—With ſundry Penalties on Perſons aiding in " any clandeſtine Importation;—on Perſons obſtructing Cuſtom-houſe Officers;—on Cuſtom-houſe Officers conniving;—on Ship-Maſters ſuffering ſuch clandeſtine Importation.——Moreover, on all Sugars and Paneles imported into *Great Britain*, on which the Duty has been paid, " if exported within one Year after there ſhall be repaid all the ſaid Duty;—and alſo Two Shillings *per* Hundred Weight on all refined Sugars exported from *Great Britain*, over and above " the former Allowances on Exportation. *Proviſo*, That nothing in this Act ſhall be conſtrued " to extend to reſtrain the Importation of Sugars of the Growth or Produce of the Dominions " of *Spain* or *Portugal*, from Places from whence ſuch Sugars might lawfully before have been " imported."

A Million paid off to the Proprietors of the Joint-Stock of *South-Sea* Annuities, at *Michaelmas* 1733.

By an Act of Parliament of this ſame 6th Year of King *George* the Second, (Cap. xxv.) one Million, out of the *Sinking-Fund*, was paid off the Joint-Stock of *South-Sea* Annuities; whereby 6 *l.* 7 *s.* 6 *d.* *per Cent.* was paid to each Proprietor, and wrote off from each reſpective Account from and after 29th of *September* 1733: The total Joint-Stock of *South-Sea* Annuities being 15,651,099 *l.* 17 *s.* 5 *d.*

The old *Engliſh* Gold Coins uſually ſtiled *Broad Pieces*, called in and ſuppreſſed.

King *George* the Second of *Great Britain* having, by Proclamation, in the ſame Year, prohibited the Paſſing or Circulation of the old and much worn-out *Gold Coins* of the Realm, of *twenty-five* Shillings, and *twenty-three* Shillings, commonly called *Broad-Pieces*, and the Halves and Quarters thereof; he hereby alſo, for the Eaſe of his People, directed his Receivers of Taxes and alſo the Officers of his Mint to receive them at 4 *l.* 1 *s.* *per* Ounce *Troy*, during one whole Year to come: And that ſuch of them as ſhould be ſo brought to the Mint ſhould be coined into

A. D. 1732

the modern current Gold Coins of the Kingdom. And it being apprehended, that the Advantage of ſo good an Allowance at the Mint, and by the Receivers of his Revenues, as 4 *l.* 1 *s.* *per* Ounce, might be a Temptation for evil-minded Perſons to counterfeit the ſaid old Gold Coins. A Statute of this ſame 6th of that King, (Cap. xxvi.) *To prevent the coining or counterfeiting any of the Gold Coins, commonly called Broad-Pieces,* made it *High-Treaſon* ſo to do, or knowingly to utter ſuch forged or counterfeit old Coins: And 40 *l.* Reward was allowed to ſuch as ſhould diſcover the Counterfeiters thereof.

The ill State of the *Royal African* Company of *England.*

At this Time the *Royal African* Company of *England* was in a very bad Condition. For although the Parliament had, every Year ſince 1730, granted them 10,000 *l.* for the ſupporting of their Forts and Factories on the *African* Coaſt, yet conſtantly continuing to be Loſers by their Trade for *Negroes* to *America*, as they had been for many Years paſt, they at length reſolved to confine themſelves to the purchaſing of Slaves on that Coaſt, and ſelling them again to private Traders to *America*; to all whom the Trade to *Africa* had been laid open by Parliament, on granting the ſaid annual 10,000 *l.*; and to employ their Servants in carrying on a Trade far up into the inland Countries of *Africa*, for Gold, Elephants-teeth, Bees-wax, Drugs, Dying Woods, *&c.* Yet even that more contracted Trade would not anſwer, ſo as to make any Dividend on ſo ſmall a Capital Stock as about 200,000 *l.* So far from it, that they were not able to get clear of their Debts and other Incumbrances, even although they had greatly reduced the Salaries and Allowances to their Officers and Servants both at Home and Abroad, and had practiſed ſundry other Means of Frugality. But it ſeems, that their ſaid Servants in *Africa* had ſhamefully impoſed on their Court of Aſſiſtants, who at this Time laid all theſe Matters before their General Court of Proprietors; and that, as they had then *nine* Ships of their own, they propoſed, for their increaſing their Aſſortments of Goods at their ſeveral Factories, and for driving on a large inland Trade with the vaſt Countries behind their Forts and Factories, to create Bonds under the Common Seal, to the Value of 20,000 *l.* bearing 4 *per Cent.* Intereſt; which their General Court agreed to. Yet, notwithſtanding this, and that their then Court of Aſſiſtants were as yet Gentlemen of Character and Credit, their Affairs grew continually retrograde, the private Traders having always the Advantage of them; as indeed will ever be the Caſe in all Branches of Commerce wherein Trade is freely laid open to *all!*

A brief View of the *South-Sea* Company's Trade.

A Propoſal being this Year made by the Court of *Spain*, to allow the *South-Sea* Company 2 *per Cent.* on the Returns of the Flota and Galeons, as an Equivalent for their annual Ship, during the Remainder of the Company's Term; that Matter was debated both in their General Courts and without Doors, but the Conſideration thereof was poſtponed. Yet we ſhall here briefly State what was then ſaid in Favour of that Propoſal, *viz.*

1. It was admitted by all Sides, That the *Aſſiento Contract* for the ſupplying *Spaniſh America* with Negroes, was not only a greatly loſing Trade to this Company, but was well known to have been ſo to all former *Aſſientiſts.*

2. The ſaid annual Ship was therefore granted by *Spain* in Compenſation for that Loſs: Which, however, (excepting the very laſt Voyage, which, in the Year 1731, returned from *Porto Bello*) had likewiſe proved a loſing Trade!

The bad Succeſs of this Trade has been uſually attributed to two principal Cauſes, *viz.* 1. To the frequent Repriſals or Seizures made by *Spain* on the Company's Effects in *America*; which was likely ever to be the Caſe, whilſt the Company had Factors and conſiderable Effects in the *Spaniſh Weſt-Indies*, being an Opportunity afforded to *Spain* to inſult *us*, even on very inſignificant Occaſions. And, 2dly, To the Miſmanagement of the Company's Factors and Agents in *America*, who got large Eſtates in a very few Years, (and ſome of them even in little more than one Year) whilſt the Company continued to be ſuch great Loſers. 3dly, There were moreover frequent Occaſions taken by the Court of *Spain* to obſtruct the going out, and alſo the Return of the ſaid annual Ship in due Seaſon, on Account of her Menſuration at Home, or on ſome other frivolous Pretext in *America*; in order thereby to give their Flotas and Flotillas the Advantage.

It was therefore argued, by ſuch as were for the Company's quitting the Trade intirely, and for accepting of an Equivalent, after the following Manner, *viz.* 1ſt, That the not ſending ſuch a Ship directly to the *Spaniſh Weſt-Indies* will not in the leaſt diminiſh the Conſumption of *Britiſh* Commodities in that Part of the World, as the ſame Sorts, and (as they alleged) greater Quantities of *Engliſh* Goods will be ſent thither, (as before this *Aſſiento* Trade was granted) by the Way of *Cadiz*, and from thence by their Flotas and Galeons to the *Weſt-Indies*, or elſe ſmuggled to the *Spaniſh Weſt-Indies* by the Way of *Jamaica* and the *Leeward* Iſlands.

2dly, The Returns on which the propoſed 2 *per Cent.* to the Company was to ariſe, by the *Flota* and *Galeons*, and on the *Spaniſh Regiſter-Ships*, returning from thoſe Parts whither the Company has a Right to ſend their annual Ship, were computed to amount to at leaſt 15 Millions of *Pieces of Eight*; and 2 *per Cent.* thereon would be 300,000 Dollors or Pieces of Eight, or about 70,000 *l.* Sterling.

On the other Side of the Queſtion, it was admitted, That the Company's Adventure by their annual Ship amounted to about 200,000 *l.* Sterling: Upon which there might be an Advance of 75 *l.* *per Cent.* or in all 350,000 *l.*

	Coſt of their 200,000 *l.* annual Adventure, - - - - - - - - - - - - -	£ 350,000
£ 25,000	Ships Stores, Seamens' Wages, &c.	
10,000	Maintenance of Servants, and Preſents abroad.	
20,000	Commiſſion and Privilege to Supercargoes, &c.	
16,000	Two Years Intereſt on 200,000 *l.* diſburſed for the Cargo.	
5,000	Extraordinary Charges of Management at Home on this Account.	
£ 276,000	Total Coſt to be deducted, - - - - - - - - -	£ 276,000
	Profit by the annual Ship,	£ 74,000

N. B. This Calculation is made excluſive of Inſurance, and of the Riſque of bad Debts; and alſo on the Suppoſition of an uninterrupted Enjoyment of the Trade, without any Seiſures or Detentions of the Ships. Nothing, however, was determined concerning this Trade, which remained in Suſpence until (as will be ſeen) it was intirely given up by Treaty.

A ſingular Humour in a General Court of the *Britiſh Eaſt-India* Company, relating to Dividends, contrary to the Opinion of their Directors.

Although the preceding *Michaelmas* groſs Sale of the *Britiſh Eaſt-India* Company's Merchandize (including 70,000*l.* brought Home, in Gold, for the general Account) amounted to above 1,300,000*l.* yet that Company having ſo lately advanced 200,000*l.* to the Public, for the prolonging of their Privileges, and at the ſame Time ſuffered an Abatement of 1 *per Cent.* from the Intereſt of their whole Capital of 3,200,000 *l. viz.* from 5 to 4 *per Cent.* their Court of Directors, on mature Conſideration, did, this Year, propoſe to reduce their Dividend from 8 to 6 *per Cent.* Nevertheleſs, ſuch, at this Time, was the then unaccountable Humour of the Majority of a general Court, that although their Directors re-acquainted them, that they perſiſted in their former Opinion, that not above 3 *per Cent.* could be prudently divided for the then current half Year, the Ballot determined it, by above two to one, for 3½ *per Cent.* even although they were then likewiſe told, that the Secrecy proper to be obſerved by great trading Societies can very ſeldom, if ever, admit of particular Calculations to be laid before ſuch popular Aſſemblies as General Courts; and although they well knew that their Directors were at leaſt as much intereſted as moſt other Proprietors in the keeping up the Dividends on their Stock.

A Corporation for *Engliſh* Proteſtant Schools in *Ireland.*

It is by no means foreign to our Subject to obſerve, that in this ſame Year 1733, a new and moſt hopeful Corporation was erected, *for promoting* Engliſh *Proteſtant working Schools in* Ireland. The Author of this Work having at this Time been ſomewhat uſeful in correſponding with Dr. *Maule*, then Biſhop of *Dromore*, for promoting the Charter thereof, received of that Biſhop the following well-vouched Account of the Number of People, both *Proteſtants* and *Papiſts*, in all *Ireland*, viz. *That, by the Biſhop's Books and other authentic Vouchers, there were at leaſt two Millions of People in all* Ireland; of which there are very near 600,000 Proteſtants, and ſomewhat above 1,400,000 Papiſts, or near 2⅓ Papiſts to one Proteſtant. So far goes the good Biſhop's Account. About the ſame Time, there came out a printed Liſt of the Total of both Religions in every County in *Ireland*, but, for Brevity's Sake, we ſhall content ourſelves with the four great Diviſions, called Provinces, of *Ireland*, viz.

I. In *Ulſter*,	*Proteſtant* Families,	62,620	- - - - - *Popiſh* Families	38,459
— *Leinſter*,	- - - - - - -	25,238	- - - - - - - - - - - - -	92,424
— *Munſter*,	- - - - - - -	13,337	- - - - - - - - - - - - -	106,407
— *Connaught*,	- - - - - - -	4,299	- - - - - - - - - - - - -	44,133
Total,	*Proteſtant* Families, - -	105,494	- - - - - *Popiſh* Families	281,423

which, at five to each Family in the Country, and ten for *Dublin*, and ſeven for *Cork* City, makes in all 2,015,229 Souls, very nearly correſponding with the ſaid Biſhop *Maule*'s Account.

The printed Account makes the Proteſtant Families in *Dublin* to be - - - -	8,823
———————— Popiſh ones to be - - - - - - - - - - - -	4,119
	12,942
Which, at 10 to each Family, makes the People of *Dublin* amount to - - -	129,420

II. Proteſtant Families in the City of *Cork*, - - - - - - - - - - - - - - -	2,569
Popiſh Families, -	5,398
Total,	7,967

Which, at ſeven to each Family, makes 55,769 Souls in *Cork* City.

So noble a Part of the *Britiſh* Empire, as this Iſland, is well worth the cheriſhing, as far as can be done without evident Prejudice to *Great-Britain.* King *William* the Third, on his firſt landing on it, turning to old Mareſchal *Schomberg*, truly ſaid, *This Iſland was well worth fighting for.*

A new Inſurance Company erected in *Denmark.*

The King of *Denmark*'s Zeal for the Proſperity of his Subjects Commerce, and more eſpecially for that of his *Eaſt-India* Company, prompted him this Year to erect an *Inſurance Company* at *Copenhagen*, in order to ſave for the future their ſending to *Amſterdam* for Inſurances on their Ships and

A. D. 1733

and Merchandize; the King himſelf firſt ſubſcribing a conſiderable Sum into this new Company; which was followed by the Subſcriptions of the Courtiers, Merchants, and others.

The Proprietors of the *South-Sea* Company's Capital Stock becoming uneaſy, on Account of their late Loſſes by their *Aſſiento* and *Greenland* Trades; their General Court petitioned the Parliament, to be enabled to divide their preſent Capital Stock of 14,651,103 *l.* 8 *s.* 1 *d.* into three fourth Parts *new South-Sea* Annuity Stock, and only the remaining fourth Part to be the *ſole* Capital or trading Corporation-Stock. Their Fear of embarking into any new and hazardous Schemes of Commerce, *&c.* being the Ground hereof (ſo ſmall a Capital being leſs able to bear any ſuch Hazards) it was therefore, in this 6th Year of King *George* the Second, enacted, (Cap. xxviii.) "That the ſaid Capital Stock be divided, from and after *Midſummer* 1733, into three-fourths Annuity Stock, at 4 *per Cent.* to be called the *new joint Stock of* South-Sea *Annuities*, amounting," (by the Computation of this Act) "to 10,988,327 *l.* 11 *s.* 0¼ *d.* and the Remainder," (being 3,662,784 *l.* 8 *s.* 6 *d.*) to be the *ſole* Capital or trading Stock of the Company, in its corporate Capacity;" [which laſt-named Capital is ſomewhat more than an exact fourth Part of the above undivided Capital Stock, becauſe, in writing off three fourth Parts from each Proprietor's Account, the fractional Part, or the odd Penny, was left with the ſaid remaining fourth Part or Capital Stock; wherefore the exact Total of the new joint Stock was really but the Sum of 10,988,318 *l.* 19 *s.* 7 *d.*] "the ſaid new joint Stock of *South-Sea* Annuities to be quite exempted from all Concern with the Company's Debts, Bonds, Trade, *&c.* and to be an intire unincumbered Annuity-ſtock, redeemable by Parliament, as by former Statutes; the Annuity to be payable at *Chriſtmas* and *Midſummer* yearly.

The *South-Sea* Capital Stock divided into ¾ Annuity Stock, and ¼ remaining trading Capital Stock.

"Whereas the *Maſter, Wardens, and Aſſiſtants of the Corporation of the Trinity-houſe of* Deptford-Strond, in the County of *Kent*, have, by Grants from the Crown, the Laſtage and Ballaſtage and the ſole Right of ſupplying all Ships and Veſſels with Ballaſt, that ſail, paſs, and repaſs, in the River of *Thames*, between *London-bridge* and the main Sea, at the Rates and Prices accuſtomed; and are alſo intitled to, and have a Right to dig, raiſe, and take up the Gravel, Sand, and Soil of the ſaid River *Thames*, for the ballaſting ſuch Ships and Veſſels as aforeſaid: And whereas the ſaid Maſter, Wardens, and Aſſiſtants, have for ſeveral Years laſt paſt conſtantly employed ſixty Ballaſt Lighters and 120 Men, to dig and raiſe Ballaſt from the Shelves and Sand-banks of the ſaid River, and to carry and convey ſuch Ballaſt to Ships and Veſſels, having Occaſion for the ſame; and thereby the Channel of the ſaid River hath been conſiderably deepened, and ſeveral Obſtructions to the Navigation therein removed." [So ſets forth the Preamble to an Act of the *Britiſh* Parliament, in this 6th Year of King *George* the Second, Cap. xxix. *For the better Regulation of Laſtage and Ballaſtage in the River* Thames.] Wherefore this Act ſettles the Prices to be hereafter paid to that Corporation for *Ballaſt*, and to their *Ballaſtmen*; alſo the Burden of *Ballaſt-lighters*, &c. in ſundry reſpects too tedious and needleſs to be herein ſpecified; the above Preamble being ſufficient to explain to the Reader the Nature, *&c.* of this Part of the Buſineſs of the Ballaſt-office of the *Trinity-houſe* Corporation.

A View of the *Trinity-houſe Corporation*'s Powers, *&c.* relating to Ballaſtage in the River *Thames.*

From our *Britiſh American* Colony of *Carolina*, we were, in this ſame Year 1733, advertiſed, that the *Rice*, exported thence to *Spain* and *Portugal*, was become ſo cheap in thoſe two Countries as to have put almoſt an intire Stop to the Importation of that Commodity from *Venice* and other Parts of *Italy*; ſo far as to give ground to hope, that *Carolina* may ſoon engroſs all the Trade of *Europe* for that fine Grain. That, beſide *Rice*, there was exported from *Charles-Town* in *South-Carolina*, only within three Months of this ſame Year, 6,073 Barrels of *Pitch*, 1,985 Barrels of *Tar*, and 424 Barrels of *Turpentine*. And in this intire Year, 36,584 Barrels of *Rice*, 2,802 Barrels of *Pitch*, 848 Ditto of *Turpentine*, 60 Tons of *Lignum Vitæ*, 20 Tons of *Braſiletto* Wood, 27 Tons of *Saſſafras*, 8 Cheſts of Skins; beſide *Lumber*, *Pork*, *Beef*, *Peaſe*, and *Indian* Corn. This Colony continually increaſing by the Encouragement they give to new Comers, both *Britiſh* and Foreigners.

The Rice of *Carolina* very like intirely to beat out from *Italy* the importation of that Grain into *Spain* and *Portugal.* So thriving is that *Britiſh* Colony.

It was at this Time computed, that within the Compaſs of one Year paſt, no leſs than 800,000 Quarters of *Corn* had been exported from *Great-Britain* to *France*, *Portugal*, *Spain*, and *Italy*; for which was paid by thoſe Nations (including the Freight of our own Ships) at leaſt *one Million Sterling*: Being all clear Profit to the Kingdom! How much therefore is the landed Intereſt concerned in this particular reſpect (as well as in every other regard) for the Advancement of *Britain*'s foreign Commerce?

The immenſe Quantity of Corn exported from *Great-Britain.*

Immediately before the *South-Sea* Company's General Court had finally determined to lay aſide their *Greenland* Whale-fiſhery, their Directors had applied to the Government, for obtaining a Bounty, to be granted by Parliament, on the ſaid Fiſhery; and although it could not then be intirely brought about, yet, in the following Year 1733, a Bounty was granted by an Act of Parliament, in the ſixth Year of King *George* the Second, Cap. xxxiii. (*For the farther Encouragement of the Whale Fiſhery, carried on by his Majeſty's* Britiſh *Subjects*) "of twenty Shillings *per Ton* on all Ships fitted out in *Great-Britain*, of 200 Tons and upwards, for the *Whale-fiſhery*, and navigated according to Law." Of which new Bounty two Ships ſent out this Year by private Adventurers, enjoyed the Benefit; although nevertheleſs not very much to the Emolument of thoſe Adventurers.

A Bounty granted by Parliament to *Britiſh* Ships going on the Whale-fiſhing.

Sundry Reaſons have been aſſigned for *Britiſh* Subjects not hitherto ſucceeding in this Fiſhery, and for the greater Succeſs of the *Dutch* therein, *viz.*

I. In general, the greater Frugality of the *Hollanders*, whereby (notwithſtanding this our new Bounty) they are enabled to underſell us in their Oil and Whale-bone.

An Inquiry into the Reaſons why the *Dutch* can carry on the *Greenland* Fiſhery to greater Advantage than *Britiſh* Subjects can.

II. From the Manner in which the *Dutch* are ſaid to carry on this and much of their other Fiſheries. For the *Ship-builder*, the *Cooper*, the *Sail-maker*, the *Rope-maker*, the *Baker*, *Brewer*, *Diſtiller*, and other Tradeſmen, employed in fitting out their ſaid Ships, frequently or moſtly go each a Share in theſe Voyages: So that, ſhould it prove a fortunate fiſhing Seaſon, they are ſure to be doubly Gainers.——And even if it ſhould prove a bad Fiſhery, they probably loſe but little more than they had gained by their ſupplying the Out-ſet of ſuch Year in their reſpective Callings; whereby they are the better enabled to go on in that Trade than mere Merchants can do without theſe Advantages. *De Witt*, in his *Intereſt of* Holland, Chap. xvi. ſays, " It is " worthy of Obſervation, that the *Dutch Greenland* Company made formerly little Profit by it, " becauſe of the great Charge of ſetting out their Ships:——Whereas *now*, that every one " equips their Ships at the cheapeſt Rate, follow their Fiſhery diligently, and manage all care- " fully, the *Train-oil* and *Whale-fins* are employed for ſo many Uſes in ſeveral Countries, that " they can ſell them with ſuch Conveniency, that there are now fifteen Ships for one that formerly " ſailed from *Holland* on that Fiſhery."

III. By the Re-exportation of a great Part of the Produce of ſuch Fiſhery, they are farther enabled to make up the Loſs of any bad Year's Fiſhery:——Whereas *we* have never as yet carried on a *Whale-fiſhery* conſiderable enough to enable *us* to export any Quantity of *Oil* and *Whale-fins*, nor indeed enough to ſupply ourſelves at Home. And we may add,

IV. The ancient ſtanding Reaſon of the greater Lowneſs of the Intereſt of Money in *Holland*, till very lately.

The Total of the Produce of the *Dutch* Whale-fiſhery in 46 Years, and its vaſt Benefits both to the State and to Individuals.

There lies now before the Author, an Account of the *Hollanders' Whale-fiſhing* for 46 Years, ending *Anno* 1721, *viz.* In that Space they had therein employed 5,886 Ships, and caught 32,907 Whales; each of which Whales, one with another, being uſually valued at 500*l.* makes the Value of the whole amount to above ſixteen Millions *Sterling*, gained out of the Sea, moſtly by the Labour of the People; the Wear and Tear of the Shipping, the Caſk and the Proviſions excepted; which laſt three Articles are alſo a vaſt Benefit to the Public, by the Exciſe, &c. paid thereon, as well as to numberleſs Individuals employed therein.

The *South-Sea Company*'s Ship the *Royal Caroline* arrives from *Vera Cruz.*

At the very Cloſe of this ſame Year 1733, the *South-Sea Company*'s great annual Ship, the *Royal Caroline*, arrived from *Vera Cruz*, after being long detained there, being the laſt annual Ship which that Company is ever like to ſee from the *Spaniſh Weſt-Indies*; her Cargo conſiſted of Silver, in Dollars or Pieces of Eight, Cochineale and Indico: Yet becauſe of the violent Detention, this was ſaid to be a loſing Voyage for the Company.

Another Computation of the Number of People in the City of *Dublin* at this Time.

By the laſt Quarter's Bill of Mortality of this Year, for the City of *Dublin*, it appears that 591 died in that Quarter, being, at that Rate, 2,364 for the whole Year, which laſt Number being multiplied by 30, [as it is generally computed that one out of thirty dies yearly in great and populous Cities] gives the whole Number of People of that City, being 70,920 Souls: But, if multiplied by 33, [according to others] then it will give 78,012 for the Number of Inhabitants of that City. This Subject is very curious, and, in ſundry reſpects, of good Uſe in Politico-commercial Speculations; but when Cities become large and populous, the Number of their Inhabitants is almoſt always exaggerated. This Method, however, of computing muſt neceſſarily be the moſt certain of any, provided a *Medium* can be obtained of a determined Number of Years, at certain Diſtances from each other. We muſt, however, conclude, that, by all other Accounts, there muſt be ſome Miſtake in reckoning the Bill of Mortality of that City, and that the Account of that City and People, under the *new Society in* Dublin *for promoting* Engliſh *Proteſtant Schools in* Ireland, approaches nearer to the Truth, under this ſame Year.

1734

The *Britiſh* Board of Trade's Repreſentation to the Houſe of Peers, of the State of our *Sugar* Colonies; with Notes thereon.

Purſuant to an Order of the *Britiſh* Houſe of Peers, in the Year 1734, we have the Repreſentation of the *Lords Commiſſioners of Trade and Plantations*, exhibiting an exact and curious State of the *Trade*, *People*, and *Strength* of our Iſland Plantations in the *Weſt-Indies*, viz.

I. " *Jamaica*, though having 19 Pariſhes, had but 7,644 white People on it; even al- " though its Militia conſiſted of 3,000 Men, Horſe and Foot, diſperſed all over the inhabited " Part of that Iſland. They had ſix Forts; and of late have had no fewer than eight indepen- " dent Companies of the King's Forces, each conſiſting of 100 Men."

☞ The Diminution of the *white* People of *Jamaica* was owing to the great Decay of their private or illicit Trade to the *Spaniſh Main*; that Trade having drawn thither many white People, who were wont to get rich in a few Years, and return therewith to their Mother Country, and the *Spaniſh* Money they got in *Jamaica* did at length center in *England.* From *Jamaica* our ſaid People *privately* carried all Sorts of our Manufactures, &c. to *New-Spain*, which, it is well known, can only be legally carried thither by the *Flota* and *Flotilla* from *Old-Spain:* They alſo carried thither great Numbers of *Negroes.*

" Our Exports to *Jamaica*, at a *Medium* of four Years, from *Chriſtmas* 1728 to *Chriſtmas* 1732, " was to the Value of 147,675*l.* 2*s.* 3¾*d.* and our Imports were 539,499*l.* 18*s.* 3½*d.* Annual " Exceſs of our Imports from *Jamaica* is 391,824*l.* 15*s.* 11¾*d.*

II. " *Barbados* had 18,295 white People; its Militia conſiſted of one Troop and two Regi- " ments of Horſe and of ſeven Regiments of Foot, in all 4,812 Men. In which Iſle are no " fewer than 21 Forts and 26 Batteries, mounted with 463 Cannon."

All

A. D. 1734

The intire Produce in *Sugar* of all our *West-India* Iſlands; with Remarks.

All our Sugar Iſles together are thought annually to produce 85,000 Hogſheads of *Sugar*, each Hogſhead containing twelve hundred Weight, or in all, 1,200,000 *Cwt.* Of which *Great-Britain* was thought to conſume annually 70,000 Hogſheads, or 94,080,000 Pounds of Sugar: [Which for ten Millions of People, if ſo many there be, in *Britain*, comes to 9¼ *lb.* of *Sugar* to each Perſon, (or if but 8 Millions of People, then about 11¾ *lb.* of *Sugar* to each Perſon) and as there are undoubtedly about two Millions and upwards of People in *Ireland*, we may omit them in this Computation, as there may probably be near that Number in all the *Britiſh* Dominions who uſe little or no *Sugar* at all.]

Annual Exports from *Britain* to the *Sugar Iſles.*

It is computed, that 300 Sail of Ships go annually from *Great-Britain* to the *Sugar Iſlands*, (beſide thoſe which go thither from our Continent Colonies) and that about 4,500 Seamen are employed in navigating them: And that there is annually exported thither to the Value of 240,000 *l.* in *Britiſh* Manufactures.

Strength of the *Britiſh Leeward Iſlands.*

III. "In all the *Britiſh Leeward* Iſlands, *viz. St. Chriſtophers, Antigua, Nevis,* and *Montſerrat,* "(with their Dependencies, *Barbuda, Anguilla, Spaniſh-Town, Tortola,* and the reſt of the *Virgin* "*Iſles)* there are 10,262 *white People*; and their Militia conſiſts of 3,284 Men." But, by an Account of thoſe *Leeward* Iſlands, *Anno* 1736, their Strength was as follows, *viz.*

In *Antigua*, - - - -	1,500	Men; two Forts and ſeven Batteries.
— *St. Chriſtophers*, - -	1,340	Men; three Forts and ſix Batteries.
— *Montſerrat*, - - -	360	Men; one Fort and one Battery.
— *Nevis*, - - - - -	300	Men; one Fort and one Battery.
In all,	3,500	Men;
And in *Anguilla*, - - -	80	Men;
——— *Spaniſh-Town*, - -	72	Men;
——— *Tortola*, - - -	120	Men;
	3,772	white Men in all the *Leeward Iſlands.*

Strength of the *Bahamas.*

IV. "The Iſlands called the *Bahamas* are the next, in thoſe Seas, of Importance to *Great-* "*Britain:* Where *Providence* is the only Iſland as yet of any Conſideration to us, or that is "peopled in any Degree. And here they have 500 white People, out of which they have formed "ſix Companies of Militia, beſide one independant Company in his Majeſty's Pay. On this "Iſland they have two Forts, ſince better re-built.

Strength of the *Bermudas.*

V. "In the *Bermudas* there were a few Years ſince 5000 white People, of which there are "1000 white Men (beſide Officers) for their *Militia.* They have one Fort and ſix Batteries."

Newfoundland's conſiderable Importance to the *Britiſh* Empire.

Nothing is ſaid of *Newfoundland*, in the Report of that Board; which indeed is properly no Colony, it having ſcarcely any Soil capable of Cultivation: And the Forts and People there are chiefly, if not ſolely, for the Protection and Accommodation of the Ships of our important Codfiſhery on the adjoining Shoals, called the *Banks of Newfoundland*, and alſo in its Bays and Harbours. Thoſe Garriſons are alſo requiſite for preventing any other *European* Nation from getting Poſſeſſion of that Iſland, which Poſſeſſion would render our Fiſhery there extremely precarious, on a Rupture with any ſuch Nation, as it would alſo our Communication with our Northern Continent Colonies. *Newfoundland*, therefore, on theſe Accounts, is of very great Importance to us.

Dowries and Portions Royal.

In the former Part of this Year, his Majeſty of *Great-Britain*'s eldeſt Daughter *Anne* (ſtiled the Princeſs Royal) was married to *William* Prince of *Orange*, her Portion being 80,000 *l. Sterling.*

N. B. His *Britannic* Majeſty's other two (ſince married) Daughters, *viz.* one to the preſent King of *Denmark*, and the other to the preſent Landgrave of *Heſſe Caſſel*, had each 40,000 *l.* for their Portions.

A Committee of a General Court enters on Conſiderations on the Profits of the *South-Sea* Company's Trade to the *Spaniſh West-Indies.*

A *Committee of Inſpection* into the State of the *South-Sea Company*'s Commerce to the *Spaniſh West-Indies*, having been at this Time appointed by their General Court out of the Stockholders, it appeared, by the Accounts which that Committee publiſhed, that the intire Balance of that Trade from the Beginning (or of their ten Years *American* or *Aſſiento* Trade) amounted to no more than 32,260 *l.* 18 *s.* Profit to the Company. This was, by the Proprietors of the Stock, thought (and indeed was) a very inconſiderable Profit, being but 3,226 *l.* for each Year of that Trade. This it was which made the Stockholders very earneſt to accept of the Equivalent formerly propoſed by the Court of *Spain:* But thoſe Proprietors or Stockholders conſidered only their own private Advantage by that ſuppoſed Equivalent. For as the King and his Miniſters muſt have been conſulted, before ſuch Equivalent could be permitted to be accepted by the Company, there was a more important and extenſive Conſideration to be duly weighed, *viz.* Whether by the illicit and very profitable Trade carried on by that Company's Supercargoes, Factors, Captains, and other Servants, employed by them in the *Spaniſh West-Indies*, and alſo under their Wings, from *Jamaica, &c.* the Nation was not a greater Gainer, upon the whole, than they could be by the propoſed Equivalent, and the carrying back the Trade to the Channel of *Cadiz*, where, without Doubt, our Merchants had alſo a great Intereſt in that Trade. We muſt, however, now again leave this Diſpute for future Conſideration, in its proper Place.

Many

A *Britiſh* Statute againſt *Stock-jobbing.*

Many great Inconveniencies to Commerce, and frequent Frauds, having been long ſeen to be practiſed, by *Stock-jobbing*, in the City of *London*; an Act of Parliament paſſed in this 7th Year of King *George* the Second, Cap. viii. *To prevent the infamous Practice of Stock-jobbing.* For the Prevention of Bargains for *Stocks* bought or ſold, for a future Time, by Perſons on one Hand, not poſſeſſed of ſuch Stock; and, on the other, by many not being in Circumſtances or Ability to pay for ſuch *Stock*; for *Puts* alſo and *Refuſals* of *Stocks*, &c. [Terms which we have already explained, under the Year 1695] whereby very many unwary Perſons and their innocent Families have been undone, were hereby prohibited. It was therefore enacted, "That all Contracts and Agreements whatſoever, which ſhall be made or entered into, upon which any Premium ſhall be given or paid for Liberty to *put* upon, or to *deliver*, *receive*, *accept*, or *refuſe* any public or joint Stock, or other public Securities whatſoever, or any Part or Share therein; and alſo all Wagers, and Contracts in the Nature of Wagers or of *Puts* and *Refuſals*, relating to the preſent or future Price of any ſuch Stocks, *ſhall be null and void to all Intents and Purpoſes whatſoever.* And all Premiums given or received upon ſuch Bargains, ſhall be reſtored and repaid to the Perſons who ſhall have ſo paid them, and may be recovered by an Action, commenced within ſix Months,—with double Coſts; the firſt Receivers of ſuch Premium to be obliged to anſwer upon Oath.——500*l.* Penalty is hereby laid on all Perſons making ſuch *Time-Bargains* or *Contracts*, *Puts* and *Refuſals*; and all and every Broker or Brokers, Agents and Scriveners, tranſacting or writing any ſuch Contract, ſhall likewiſe forfeit the ſaid Sum of 500*l.* Moiety to the King, Moiety to the Suer for the ſame. And for preventing the evil Practice of compounding or making up *Differences* for Bargains on Stocks ſo ſold:——No Money ſhall be voluntarily given or received on that Account, or for not performing of any ſuch Contract: But all and every ſuch Contract ſhall be ſpecifically performed.—And the Stock or Security thereby agreed to be aſſigned and transferred, ſhall be actually *ſo done*, and the whole Money ſhall be paid for the ſame, under the Forfeiture of 100*l.* for every ſuch compounding, &c. as aforeſaid.——Stock ſold, and not paid for at the Time prefixed, may be lawfully ſold again to any other Perſons, and the Buyer ſhall make good any Damage ſuſtained.——Stock bought, and not transferred at the due Time, by the Seller, the Buyer may purchaſe other Stock and recover his Damage.——And whereas it is frequently and miſchievouſly practiſed, for Perſons to ſell Stocks of which they are not poſſeſſed,—it was hereby enacted, That, for all Contracts and Agreements hereafter to be made either for the ſelling or buying of ſuch Stocks, whereof the Perſon contracting ſhall not be poſſeſſed at the Time of ſuch Bargain, there ſhall be 500*l.* Penalty; as alſo 100*l.* Penalty on the Broker or Agent for procuring of ſuch Bargain, who ſhall hereafter keep a Book or Regiſter to be called the Broker's Book, wherein all ſuch Bargains ſhall be regiſtered; and by his neglecting ſo to do, he ſhall incur the Penalty of 50*l.*—Nothing herein, however, ſhall affect Contracts for any Stocks made with the Privity of the Accountant-General of the Court of *Chancery.*——Nor to prevent any Perſon from lending Money on any public joint Stock or other public Securities, on the re-delivering thereof, on Re-payment of the Money lent." Notwithſtanding which ſtrict Law, we have Reaſon to believe, that, even to our own Time, there are many ſuch illegal Bargains ſtill carried on, to the Undoing of many.

Forging and counterfeiting Acceptances of Bills of Exchange, &c. in *Great-Britain*, made Felony.

There having been a *Britiſh* Statute made in the ſecond Year of King *George* the Second (Cap. xxii.) to make it Felony *to ſteal Bonds, Notes, or other Securities for Payment of Money*, "it was now, in this 7th Year of that King, Cap. xxii. farther enacted, *That Perſons convicted of forging, altering, or counterfeiting the* Acceptance *of any Bill of Exchange*, or the Number or principal Sum of any accountable Receipt for any Note, Bill, or other Security for Payment of Money or Delivery of Goods, ſhall ſuffer Death as a Felon."

The bad State of the *South-Sea* Company's *Aſſiento* Affairs made her General Court agree to addreſs the King for Leave to diſpoſe of the ſame.

On the 28th of *March* 1734, a General Court of the *South-Sea* Company, upon the repeated Repreſentation of Sir *Thomas Geraldino*, the King of *Spain*'s Agent at *London*, for the Affairs of the *Aſſiento* Trade of that Company, concerning the bad Management of their Factors, *unanimouſly agreed to impower their Court of Directors to preſent an humble Addreſs to his Majeſty, deſiring his Royal Conſent to diſpoſe of the Trade and Tonnage of the Company's annual Ship.*

Coinage of Gold and Silver in *England* for ſeven Years paſt: With Remarks.

In *Boyer's Political State of Great-Britain*, for the Month of *September* of this Year, we find the following View of all the Coinage of both *Gold* and *Silver* in the Tower of *London*, ſince the Acceſſion of his Majeſty King *George* the Second to the Throne, *viz.*

In Gold, 43,940 *lb. Wt.* which at 44*l.* 10*s.* *per lb.* makes in Tale 1,955,330*l.* And in Silver only 8,742 *lb. Wt.* which at 3*l.* 2*s.* *per lb. Wt.* makes in Tale 27,100*l.* 4*s.* "A very ſmall Sum," (ſays our Author) "in Proportion to that coined in Gold; and ſeems to be an evident Proof that the current Value of the two Metals is not juſtly proportioned in this Kingdom; nor is indeed in any other Part of *Europe*; as appears by the great Profit that is to be got by carrying Silver to the *Eaſt-Indies*, and ſelling it for Gold." With this Author's Leave, what he remarks, concerning the carrying Silver to *Eaſt-India*, would happen although the Proportion between Gold and Silver, in all Parts of *Europe*, were ever ſo juſtly aſcertained; Silver in *India* being a mere Commodity or Merchandize, and highly prized there merely as ſuch.

Nova Scotia much neglected by the *Britiſh* Miniſtry.

Great Complaints came over from *Nova Scotia* at this Time; and particularly from the *Britiſh* Settlement at *Canſo*, a Place of great Conſequence to our fiſhing Trade in thoſe Parts; That although the late King had ſent thither four Companies of Soldiers, yet there had been no Money laid out in fortifying of that Place:—That they were particularly apprehenſive of the *French* Encroachments in their Neighbourhood, who always are eſpecially careful of their own Fortifications;—and that by our ſhameful Negligence of *Nova-Scotia*, our *Fiſhery* there was almoſt dwindled to

A. D. 1734

to nothing. Notwithſtanding which, our Miniſters ſeemed quite to diſregard, or rather to be quite ignorant of the vaſt Importance of that Province.

The vaſt Cargoes of 22 *Eaſt-India* Ships returned to *Holland*.

The *Dutch Eaſt-India* Company had, in this Year 1734, 22 Ships from *Eaſt-India*, whoſe Cargoes were ſo vaſt as well to merit ſo ſmall a Place in this Commercial Hiſtory, *viz.* Spiceries, 6,311,027 lb. Wt.—Sugar, 2,406,428 lb.—Saltpetre, 1,807,210 lb.—Coffee, 3,997,759 lb.—Dying and other Drugs, 91,949 Cheſts, 1,549,463 lb.—Tea, 515,970 Cheſts, and 369,577 lb.—Silk Raw, 62,015 lb.—Silk Stuffs, 21,205 Pieces—Callicoes, 209,748 Pieces—Indico, 14,483 lb.—Tin, 354,000 lb.—Copper, 462,500 lb.—Candied Ginger, 50,486 lb.—*China* Ware, 525,223 Pieces—Yarn, 92,441 lb.—Candied Nutmegs, 8,000 Pſſ.—Cubebs, 10,000 lb.—Curcuma of *Java*, 16,250 lb.—Mother of Pearl, 800 lb.—Pearls, 10 lb.—Cowries, 255,357 lb.—Rough Diamonds, 2 Pſſ.—Rings, 3 Pſſ.—Canes, 1,500 Pſſ.—and Wool, 277 lb. Such Alterations may happen to this Commerce, in future Times, as may poſſibly make this Account hereafter ſeem incredible.

The *Dutch* lay open their Trade to Part of the *Guinea* Coaſt.

The Trade to the Coaſt of *Guinea* has ſeldom or never been carried on by excluſive Companies, in any Part of *Europe*, to national Advantage: Private Traders, under proper Regulations, ſeeming moſt proper for preſerving and extending that, as well as moſt other Branches of foreign Commerce. Of this the States General of the United *Netherlands* were ſo ſenſible, that they, in this Year 1734, laid their Trade, to a Diſtrict of 60 Leagues of the Weſt Coaſt of *Africa*, open to all their Subjects, which had till now been confined to their *Weſt-India* Company; and was ſo to remain for twenty Years to come, though under certain Regulations, mentioned in their ſaid Placart.

Amſterdam's Shipping and Trade partly conſidered.

The Number of Ships arriving, during the Year 1734, at *Amſterdam*, was 1721, *viz.* From *Archangel*, 33—From *Peterſburgh*, 22—From *Riga*, 70—From *Narva*, 187—From *Wiburg*, 20—From *Koningsberg*, 36—From *Dantzick*, 62—From *Stockholm*, 26—From *Norway*, 163—From *Greenland*, 77—From *Davis's Streights*, 69—From *London*, 51—From *Sunderland*, 62—From *Bourdeaux*, 88—From *Rouen*, 33—From *Bayonne*, 18—From *Nantes*, 22—From *Rochelle*, 12—From *Cadiz*, 53—From *Bilboa*, 20—From *Leghorn*, 45—From *Liſbon*, 32—From *Surinam*, 29; and from *Eaſt-India*, 14. Here is a Miſtake of almoſt four hundred Ships too few, in ſpecifying the Particulars, in *Boyer*'s *Political State* for the Month of *February* 1735, probably to be ſupplied by their own Coaſters. Imperfect as this Liſt is, from it, however, we may learn the immenſe Commerce of *Amſterdam* with the *Northern* Crowns; and yet moſt of it is driven by means of the Fiſh caught on the *Britiſh* Coaſts. Hereafter, ſuch an Account as this may be uſeful for comparing the annual Increaſe or Decreaſe of the general Commerce of the Seven United Provinces, and principally that of the famous City of *Amſterdam*.

And Remarks thereon.

Number of Ships which had arrived at *Cadiz*, during the Year 1734;

The Number of Ships that entered the Port of *Cadiz*, *Anno* 1734, in all the ſaid Year 1734, were, *viz.* 596 *Engliſh*---228 *French*---147 *Hollanders*---13 *Swediſh*---14 *Daniſh*---2 *Portugueſe*,---2 *Genoeſe*---1 *Lubecker*---and 1 *Hamburgher*. In all, 1,004 Ships.

In the ſame Year 1734, there arrived at *Cadiz* the Treaſure and Effects of the *Flota*, *viz.* 11,011,749 Dollars or Pieces of Eight, in Specie, for the Commerce, and 1,464,582 for the King: In all, 12,476,331, or about 3½ Millions, *Sterling*; beſide almoſt five Millions of Dollars by the *Aſſogues* Ships: And beſide the vaſt Quantities of Cochineal, Indico, Sugar, Chocolate, Tobacco, Snuff, Hides, Cacao, Copper, Drugs, and dying Stuffs. The preceding Obſervation, relating to the Trade of *Amſterdam* in this ſame Year, may hereafter be of equal Uſe in the Caſe of the annual Shipping and Trade of *Cadiz* and *Spaniſh America*.

with Remarks.

Regiſter of Mortgages, &c. in the *North-Riding* of *Yorkſhire* legally enacted.

1735 " The Lands in the *North-Riding* of the County of *York* being generally *freehold*, whereby " they could be ſo ſecretly transferred from one Perſon to another, and alſo eaſily and ſecretly en-" cumbered, that ſuch Perſons as were ill-diſpoſed had it in their Power to commit Frauds, and " frequently did ſo; by means whereof, ſeveral Perſons who, through many Years Induſtry, " have been enabled to purchaſe Lands, or to lend Money thereon, have been undone, by prior " and ſecret Conveyances and fraudulent Incumbrances:" [So ſays the Preamble to an Act *for the public Regiſtering of all Deeds, Conveyances, Wills,* &c. *that ſhall be made of or that may affect any Honours, Manors, Lands, Tenements, or Hereditaments, within the* North-Riding *of the Country of* York.] " It was therefore enacted" (in the 8th of King *George* the Second, Cap. vi.) [*at the humble Requeſt of the Juſtices of the Peace, Gentlemen, and Freeholders of the ſaid* North-Riding] " That a Memorial of all Deeds and Conveyances be exhibited by *Michaelmas* 1756, " and alſo of all Wills, Devices, Judgments, Statutes, and Recognizances," [other than ſuch entered into in the Name of his Majeſty and his Succeſſors] " of or whereby any Honours, " Lands, &c. may be any Way affected in Law and Equity, ſhall be regiſtered (or a Memorial " thereof) in ſuch Manner as herein-after directed," [*i. e.* as was by Law directed (*Anno* 1704) for the *Weſt-Riding*; *Anno* 1708, for the *Eaſt-Riding* of this County; and *Anno* 1709, for the County of *Middleſex*] " otherwiſe they ſhall be adjudged fraudulent." How much is it to be wiſhed, That every Part of *England* and *Wales* were put upon the like Regulation! And how eaſily might it be effected would Gentlemen heartily ſet about it!

The *French Eaſt-India* Company's great Increaſe at this Time.

The *French* had of late ſo greatly improved their *Eaſt-India* Commerce, as to have had in the preceding Year *fourteen* Ships out upon that Voyage, whereof *twelve* arrived in *Auguſt* 1734; whereby their *Eaſt-India* Company was enabled afterward, at their *Port l'Orient*, in *Bretagne*, to put up to Sale the following *Eaſt-India* Merchandize, *viz.* " Coffee, Tea, Drugs, &c. by the Pound " Weight to the Amount of 5,334,712 lb.-----Callicoes, Stuffs, &c. 387,820 Pieces-----4,284 " Packets of Canes—500 ditto of Malack—71 Handkerchiefs of *Caſembazard*, for Samples—

" 39 painted Handkerchiefs, for Samples—5,000 Fans—2,124 Sheets of Paper painted—28,000 " Counters and Fiſhes, [for Card-playing] Mother of Pearl—1,992 Cabarets of Varniſh—55 " Cheſts of *China-ware*—and 189 Rolls ditto."

In which Catalogue it may be ſeen, That the ſaid Company were but *new* and *raw* in ſome Part of their ſaid *Eaſt-India* Commerce, notwithſtanding the very large Quantity of Goods now imported.

An immenſely rich Fleet from *Braſil.*

We ſhould here alſo remark, That in the preceding Year 1734 an immenſely rich Fleet arrived at *Liſbon* from *Bahia*, in *Braſil*, and another from *Rio de Janeiro*, which brought Home, for the King and the Merchants, in Treaſure, 15½ Millions of Cruſados in Gold—220 Arobs of Gold Duſt and Ingots—437 Arobs in Bars of Gold—48 Arobs of wrought Gold—8,871 Marks of Silver—42,803 Pieces of Eight—3 Millions, 36 Octaves and 5 Quintals of Diamonds.—Beſide 11,000 Rolls of Tobacco—113,000 Hides—1,000 Cheſts of Sugar, and many other Particulars.

The King of *Portugal*'s Regulation of the Importation of *Diamonds* from *Braſil.*

And whereas great Quantities of Diamonds have of late been brought over from the lately diſcovered Diamond Mines in *Braſil*, the King of *Portugal*, for preventing their ſinking in Value by reaſon of their ſaid Quantity imported, publiſhed an Edict in the Beginning of this Year 1735, whereby he reſerved to himſelf all Diamonds found in thoſe Mines of above *twenty* Carrats, on certain Conditions!

The City of *Vienna*'s Bill of Mortality.

By the Bill of Births and Mortality of the Imperial capital City of *Vienna*, for the preceding Year 1734, were chriſtened 5,620, and buried 5,380: Which laſt Number multiplied by 30 gives 161,400 Souls in that City; and, if by 33, then it will give 177,540 Souls therein.

A new commercial Treaty between *Great Britain* and *Ruſſia.*

In this Year 1735, there was publiſhed an Abſtract of a new *Treaty of Navigation and Commerce* between *Great-Britain* and *Ruſſia*, viz.

" I. Where Navigation and Commerce are permitted to any other Nation, they ſhall be per- " fectly free in *Europe* to the Eſtates of both the contracting Parties, who may ſend all Sorts of " Merchandize, the Importation whereof is not prohibited; and may there likewiſe buy all Sorts " of Merchandize, and export them out of the ſaid Eſtates.

" II. The Subjects of *Ruſſia* ſhall pay the ſame Duties of Exportation as the *Engliſh*, particu- " larly on the Effects exported from *Ruſſia*. And the *Ruſſian* Merchants ſhall enjoy the ſame Li- " berties and Privileges of Commerce in *Great Britain* as do the *Britiſh* Merchants of the *Ruſſia* " Company.

" III. In Caſe *Britiſh* Subjects ſhall make Contracts with the Chancery, or the College of Com- " merce of *Ruſſia*, for the Delivery of Merchandize, the ſaid Merchandize ſhall be received in " the Time ſpecified, upon a Declaration they ſhall make of their being ready.

" IV. The Subjects of *Great Britain* may carry to *Ruſſia* all Sorts of Merchandize, and may " tranſport them thence by Land into *Perſia*, on paying a Duty of 3 *per Cent.* and may likewiſe " bring back from *Perſia*, through *Ruſſia*, all Sorts of Merchandize, on again paying the ſaid " Duty, without being obliged to open their *Bales:* But, if the Officers of the Cuſtoms have " Reaſon to ſuſpect, that the juſt Value thereof hath not been declared, they may ſtop the Goods " for their Inſpection, and in the meantime be paid according to the Value declared.

" V. The Subjects of both Nations may load their Ships with any Kind of Merchandize, pay- " ing the ſame Cuſtom as other Nations do: And, in Caſe of Fraud in paying the ſaid Duties, " their Goods ſhall be forfeited; but without any other Puniſhment.

" VI. If any more warlike Stores ſhall be found on board any *Britiſh* Ship than ſhall be neceſ- " ſary for the Uſe of the ſaid Ship or Paſſengers; it ſhall be lawful to ſeize the ſame: But nei- " ther Ship nor Effects ſhall be liable to be detained.

" VII. In Caſe of Shipwreck, all Manner of Aſſiſtance ſhall be given; without offering the " leaſt Violence to the Ship's Company or Effects.

" VIII. The Subjects on both Sides may build Houſes, and diſpoſe of them, without being " liable to furniſh Quarters for Soldiers. And Paſſports ſhall be granted to thoſe who ſhall " think fit to retire, within two Months after they notify their Intention of going away.

" IX. The *Britiſh* Merchants in *Ruſſia* ſhall not be obliged to ſhow their Books to any one " whatſoever, except it be to prove ſomething in diſpute. And, for the greater Eaſe and En- " couragement of the *Britiſh* Commerce, it is agreed, That, for the future, the *Engliſh* Manu- " factures ſhall pay no greater Duty on Importation than is ſpecified.

" This Treaty is to be in Force for fifteen Years, from the Date hereof, the 2d of *De-* " *cember* 1734."

The Earl of *Derwentwater*'s forfeited Eſtate applied for the Support of *Greenwich Hoſpital.*

In this ſame Year 1735, by a Statute of the 8th of King *George* the Second, (Cap. xxix.) *The net Rents and Profits of the Eſtates forfeited by the Attainder of* James *late Earl of* Derwentwater *and of* Charles Radcliffe, were made applicable for the compleating of the Building of *Greenwich-Hoſpital*, in the firſt Place; [in which Hoſpital it was now hereby enacted, That all Seamen in

A. D. 1735 the Merchants Service who ſhall happen to be maimed (not only, as in a former Act, in fighting againſt *Pirates*, but alſo) in fighting againſt any Enemy whatſoever of his Majeſty, his Heirs, and Succeſſors, ſhall be admitted into, and provided for, in the ſaid Hoſpital, in like Manner as any Seamen maimed, wounded, or diſabled in the King's actual Service.] And, in the next Place, the whole net Rents of thoſe forfeited Eſtates *ſhall be for ever applicable for the Support of the ſaid Royal-Hoſpital, for the better Maintenance of the Seamen therein, worn out and become decrepit in the Service of their Country!* Yet the ſaid Eſtates ſhall ſtill remain veſted in the Crown, ſubject to certain Incumbrances therein mentioned. This is truly a noble Application of thoſe Eſtates, very much to the Nation's Honour, and to the Encouragement and Comfort of our poor worn-out Mariners. Which good Law was farther explained and amended, by a Statute of the 11th of the ſaid King, (Cap. xxx.)

The vaſt Exportation of ſalted Proviſions this Year from *Cork*, in *Ireland*; with Remarks.

We have the following curious Piece of Intelligence from the anonymous Author of an ingenious Pamphlet publiſhed in *Ireland*, intitled the *Queriſt*. He affirms for certain, "That the "ſingle Port of *Cork* did, in the Year 1735, export 107,161 Barrels of Beef—7,379 Barrels "of Pork—13,461 Caſks and 85,727 Firkins of Butter! A prodigious Quantity of Provi-"ſions truly! Whilſt Half the People of *Ireland* are ſtarving for Want of Manufactures and "Tillage; *Paſturage employing ſo much fewer People than any other national Employment*." This is a pregnant Inſtance of the great Trade of the City of *Cork*, which has long been famous for that particular Branch of Commerce. Since this Author wrote, the *Linen* and *Cambrick* Manufactures of *Ireland* are very much increaſed, not only in the Province of *Ulſter*, where the Linen Manufacture firſt began, but are faſt ſpreading over a great Part of the other three Provinces.

Bills of Mortality, &c. of the City of *Paris*.

From *Paris* we received the following Account of the *Chriſtenings*, *Marriages*, and *Burials*, [uſually ſtiled the *Bills of Mortality*] of that great City, for the Years 1733 and 1734, *viz.*

	Chriſtened.	Married.	Buried.
Anno 1733	17,825	4,132	17,406
Anno 1734	19,835	4,130	15,122
			32,528
Medium of the ſaid two Years is			16,264

Number of Souls in *Paris*.

Now, if we multiply the laſt Number by 30, it gives 487,920 for the Number of Souls in that City and Suburbs; and if by 33, [the loweſt Number yet allowed to have died in the moſt healthy Country Places being 1 in 33] then the Number of Souls in *Paris* will be 536,712.

The preſent *Daniſh* Miſſion, Colonies, and Commerce to old *Greenland*.

1736 In the year 1736, upon Mr. *Egede*'s Return from his Miſſion in *Greenland*, he obtained a Miſſion College to be eſtabliſhed at *Copenhagen*, (according to Dr. *Buſching*'s new Geography) for ſending Miſſionaries thither for converting the Natives. And the Trade from *Denmark* to *Greenland*, according to him, is at preſent carried on by a Company at *Copenhagen*, who ſend thither three or four Ships annually. Dr. *Buſching*'s Geography, publiſhed in *Engliſh*, *Anno* 1762, likewiſe acquaints us of three or four Chriſtian Miſſions then ſettled there, and of four *Daniſh* Colonies now exiſting there; and alſo of a *Moravian* Colony and Congregation now grown ſo conſiderable (*viz. Anno* 1761.) as to equal all the four *Daniſh* ones!

The City of *Venice* made a *Free port*.

The Court of *Rome* having (as already related) made the Port of *Ancona*, on the *Adriatic* Shore of the Eccleſiaſtical State, a *Free-port*, the Republic of *Venice*, in their own Defence, or by Way of Precaution, and, after much Deliberation, at length agreed to make the Port of their capital City of *Venice* likewiſe a *Free-port*; to the great Joy of their Merchants. By which new Regulation, no Cargo of Merchandize imported for the future was to pay any more than *one Ducat at Entrance, and half a Ducat upon Exportation.* Whereby the Merchants were thenceforth to be exempted from all that ſlaviſh Attendance and Dependance upon Commiſſioners and Cuſtom-houſe Officers, and the Charges neceſſarily attending the ſame, which ſo much embarraſſed the Commerce of this State, and of the Merchants of other Nations trading thither.

The firſt Law for erecting the fine new Bridge croſs the *Thames* at *Weſtminſter*, and the conſequent Ornaments of that City, enacted.

In this 9th Year of King *George* the Second the firſt Act of Parliament (Cap. xxix.) paſſed, *For building a Bridge croſs the River* Thames, *from the* New-Palace-Yard, *or the* Wool-Staple, *in the City of* Weſtminſter, *to the oppoſite Shore, in the County of* Surrey. This noble Structure, (hitherto the moſt beautiful and uniform Stone-Bridge in all *Europe*, its vaſt Magnitude conſidered) by the Parliament's Bounty in granting ſeveral Lotteries, and at different Times ſeveral Sums of Money for it, was at length compleated; much to the Honour of the Nation, the Conveniency of Inland Commerce, and the Accommodation of all Ranks of People. The ſeveral Statutes made concerning it did likewiſe provide for the removing of many old and decayed Houſes, and the erecting of the three noble and ſpacious new Streets named *Bridge-Street*, *Parliament-Street*, and *George-Street*, beſide the adorning of both the *Palace-Yards*, &c. greatly to the Ornament of the City of *Weſtminſter*, which, inſtead of its former dirty and narrow Streets, now lifts up its Head with Grandeur and Majeſty on every Side!

Hamburgh's final Agreement with the Court of *Denmark*.

The long Diſpute between the King of *Denmark* and the free Imperial City and Republic of *Hamburgh* was, in this Year 1736, at length adjuſted, (as uſual, always to the Diſadvantage of the *weakeſt*) on the Terms following, *viz.* "Iſt, That the *Hamburghers* ſhall pay his *Daniſh* Ma-"jeſty, *once for all*, half a Million of *Daniſh* Crowns." [How often has ſuch *once-for-alls* happened?] "IIdly, That they ſhall in a Year's Time aboliſh their *Bank Current*; whereupon the "Money of *Denmark* ſhall be on the ſame Footing with that of *Hamburgh*. IIIdly, That the "Merchants and Artificers dwelling in the Quarter or Ward of *Schawmberg* at *Hamburgh*, and

“ who are ſubjects of his *Daniſh* Majeſty, ſhall not be ſubject to the Juriſdiction of the City of *Hamburgh*, and ſhall not pay the ſame Poll-Taxes, as the other Inhabitants of that City do, (neither ſhall *Daniſh* Military Officers of Rank, living at *Hamburgh*, be ſubject to its Juridiction, nor the Office of the Royal Poſts eſtabliſhed there. IVthly, That the Commerce of *Hamburgh* with the *Daniſh* Dominions ſhall be reſtored, and put upon its former Footing: The King of *Denmark*, at the ſame Time, cauſing all the Ships and Effects of the *Hamburghers* which he had ſeized to be releaſed. Vthly, Bankrupts of *Hamburgh* taking Refuge at *Altena*, or other Parts of *Denmark*, Juſtice ſhall be done to the Sufferers. VIthly, The *Hamburghers* Rights, concerning Veſſels that may chance to be wrecked on the *Daniſh* Coaſts, ſhall receive no Prejudice.”

York City's preſent Condition and Magnitude.

Although we cannot poſſibly undertake to exhibit an exact and circumſtantial State of the modern Condition of every City and Town even of the *Britiſh Empire* itſelf, and much leſs of thoſe of foreign States; ſince ſuch an Undertaking would be equally endleſs and impracticable: Yet we ſhall ſuccinctly animadvert thereon. Mr. *Drake*, in his Hiſtory and Antiquities of the City of *York*, publiſhed in this Year 1736, has ſupplied us with ſome Materials of that Kind, *viz.*

“ Iſt, There are in the City of *York*, 42 Gentlemen's Coaches, 22 Hackney Coaches, and the like Number of Hackney Chairs in full Exerciſe.

“ IIdly, A Medium of ſeven Years Births and Burials in that City, *viz.* from 1728 to 1735, is 398 Births and 495 Burials *per Annum.*” And, as *York* is deemed a healthful Place, we ſhall ſuppoſe, that only 1 in 33 of its Inhabitants die annually; ſo that 495 being multiplied by 33 gives the higheſt Number of Souls in the City and Suburbs of *York*, viz. 16,335.

A Compariſon between the Circumference of *York* and that of *London* within its ancient Walls, and between the Populouſneſs of thoſe two Cities.

“ IIIdly, *York* within its Gates is two Miles and almoſt three Quarters in Circuit, as ſurveyed *Anno* 1664.” And, in his Notes, he adds, “ That the City of *London* is very little bigger within its Walls, being but barely three Miles in Circumference; yet the latter probably contains ſix Times as many Inhabitants as *York* does, owing to the many more void Spaces in *York* than in *London*.”

Portugal's great Production of *Sugar* in *Braſil*.

It was in this Year 1736 computed, That the *Portugueſe* in *Braſil* produced 67,600 Cheſts of *Sugar*, each of 12 Hundred Weight; in all 811,200 Hundred Weight of that Commodity. The *Portugueſe* ſtill ſupply *Spain*, ſundry Parts of the *Mediterranean* Coaſt, *Holland*, and *Hamburgh*, with a conſiderable Quantity of *Sugar*, as they formerly did *England* and *France*, till they laid 10 *per Cent.* additional Impoſt on their *Sugars*, and until the two laſt-named Nations had well cultivated their own *Sugar Colonies*.

Holland's Increaſe of *Sugar* from *Surinam*, &c.

The *Hollanders* are ſaid uſually to produce between 30,000 and 40,000 Hogſheads of *Sugar* annually at the Colony of *Surinam*; and they are of late improving their Plantations of *Barbecies* and *Iſequebe*, adjoining to *Surinam*, on the Continent of *South-America*. The *Dutch* alſo frequently import *Sugars* from *Eaſt-India*, and ſome alſo from their own Iſles of *Euſtatia* and *Curaçoa*.

One Million paid off on the new *South-Sea* Annuity Stock, being 9 *l.* 2 *s.* *per Cent.*

In this ſame Year, by a Statute of the 9th of King *George* the Second, (Cap. xxxiv.) *For enabling his Majeſty to borrow any Sum of Money not exceeding* 600,000 *l. to be charged on the Sinking-Fund*, &c.——*One Million* was paid off on the *new Joint-Stock of* South-Sea *Annuities*, from and after *Chriſtmas* 1736; which amounted to 9 *l.* 2 *s. per Cent.* written off from each Proprietor's Account excluſive of Fractions.

A new *Mortmain Britiſh* Statute againſt Alienations to charitable Uſes.

In the ſame Seſſion of Parliament an Act paſſed, (Cap. xxxvi.) *To reſtrain the Diſpoſition of Lands, whereby the ſame become unalienable.* The Preamble to this *new Mortmain* Law ſets forth, That “ whereas Gifts or Alienations of Lands, Tenements, or Hereditaments, in *Mortmain*, are prohibited or reſtrained by *Magna Charta*, and by divers other wholſome Laws, as prejudicial to and againſt the common Utility; neverthelеſs, this *public Miſchief* has of late greatly increaſed, by many large and improvident Alienations or Diſpoſitions made by languiſhing or dying Perſons, or by other Perſons, to Uſes called *Charitable Uſes*; to take place after their Deaths, to the Diſheriſon of their lawful Heirs: For Remedy whereof, be it enacted,—That no *Manors*, *Lands*, *Tenements*, *Rents*, *Advowſons*, or *other Hereditaments*, *corporeal* or *incorporeal* whatſoever, nor any Sum or Sums of Money, *Goods*, *Chattels*, *Stocks in the Public Funds*, *Securities for Money*, or any other perſonal Eſtate whatſoever, to be laid out or diſpoſed of in the Purchaſe of any Lands, Tenements, or Hereditaments, ſhall be *given*, *granted*, *aliened*, *limited*, *releaſed*, *transferred*, *aſſigned*, or *appointed*, or any-way *conveyed* or *ſettled* to or upon any Perſon or Perſons, Bodies Politic or Corporate, or otherwiſe, for any Eſtate or Intereſt whatſoever, or any Ways charged or incumbered by any Perſon or Perſons whatſoever, in Truſt, or for the Benefit of any charitable Uſes whatſoever; *unleſs* ſuch Gift, Conveyance, Appointment or Settlement of any ſuch Lands, Tenements, perſonal Eſtate, Money, &c.—*(Other than Stocks in the Public Funds)* be, and be made by Deed, indented, ſealed and delivered, in the Preſence of two or more creditable Witneſſes, twelve Calendar Months at leaſt before the Death of ſuch Donor or Grantor, (including the Days of the Execution and Death) and be enrolled in his Majeſty's High Court of Chancery, within ſix Calendar Months next after the Execution thereof, and unleſs ſuch Stocks be transferred in the public Books uſually kept for the Transfer of Stocks, ſix Calendar Months at leaſt before the Death of ſuch Donor or Grantor—— and unleſs the ſame be made to take Effect in Poſſeſſion for the Charitable Uſe intended immediately from the making thereof, and be without any Power of Revocation, Reſervation, Truſt, Condition, Limitation, Clauſe, or Agreement, whatſoever, for the Benefit of the Donor

“ or

" or Grantor, or of any claiming under him.——*Provided*, That the ſaid Limitations ſhall extend " to Purchaſes or Transfers made hereafter for valuable Conſiderations.——And all ſuch Gifts, " Grants, Conveyances, *&c.* made after *Midſummer* 1736, otherwiſe than herein directed, ſhall " be abſolutely void.——Provided, That nothing in this Act ſhall be conſtrued to extend to " make void Diſpoſitions of Lands, Tenements, or Hereditaments, or of Perſonal Eſtate, to be " laid out in the Purchaſe of ſuch Lands, *&c.* which ſhall be made in any other Form than by " this Act directed, to or in Truſt for either of the two *Engliſh* Univerſities and their reſpective " Colleges or Houſes of Learning, or for the Colleges of *Eton*, *Wincheſter*, or *Weſtminſter*, for the " better Support and Maintenance of the Scholars only upon the Foundation of the laſt-named " three Colleges.——Provided nevertheleſs, That no ſuch College or Houſe of Learning, which " doth or ſhall hold ſo many Advowſons of Eccleſiaſtical Benefits as are or ſhall be equal in " Number to half the Number of their Fellows, (or, where there are no Fellows, to half the " Number of their Students upon the Foundation) ſhall, from *Midſummer* 1736, be capable of " *purchaſing*, *taking*, or otherwiſe *holding*, any other Advowſons by any Means whatever; ſuch " Advowſons as are annexed to the Headſhips of Colleges not being computed in the Number " hereby limited."

Several Societies petitioned to be excepted out of this Bill, particularly *The Corporation for the Sons of the Clergy*—that for *Queen Anne's Bounty*—the *Grey-coat Hoſpital*, in *Weſtminſter*—and the Truſtees for the *Charity-Schools* of *London*, *Weſtminſter*, and *Southwark*. But they were rejected.

" Laſtly, This Act ſhall not extend to *Scotland*."

The great Succeſs of this Year's *Whale* Fiſhing.

Notwithſtanding the very ill Succeſs of the late *Whale Fiſhery* of the *South-Sea* Company, for eight Years together; yet, in this Year 1736, one Ship of private Adventurers brought Home to *London* no fewer than ſeven Whales; and 130 *Dutch* Ships were ſaid to have caught this ſame Year 600 Whales. So precarious is Whale-fiſhing in the frozen and terrible Seas of *Spitſbergen*, &c.

The *French* in *Miſſiſſippi* begin to encroach on our *American* Colonies, as foreſeen.

Advices were, in this ſame Year 1736, received from *Carolina*, That the *French* of *Miſſiſſippi* Colony began already to ſhew the natural Diſpoſition of that Nation to Encroachments; by making War, jointly with their own *Indians*, on a Nation of *Indians* (called *Chickaſaws*) dependent on *Carolina*. Their Plan undoubtedly being now ſeen to be, to hem in all our Settlements on the Eaſt Coaſts of *North America* by Forts, all along up the River *Miſſiſſippi* as far as *Canada*, and thereby to exclude the *Engliſh* from any Commerce with the almoſt numberleſs Nations of *Indians* Weſt of our Colonies; of which Plan Dr. *D'Avenant* (as we have noted in our Introduction) gave public Warning ſo early as the Year 1698. Yet, *even now*, the Scales did not fall from our Eyes. It ſeems the *French* had got together 2,500 White Men on *Mobile* River, on which they built a Fort with an Intent to invade *Carolina*; but the Advice of Peace between the *French* and *us*, obliged them to diſſemble that Deſign, and our *Chickaſaws* proved too hard in the End for their *Indian* Allies.

The *South-Sea* Company's Proceedings in a General Court, relating to her *Aſſiento* Trade.

For two Years paſt, the General Courts of the *South-Sea* Company had fruitleſs Debates concerning an *Equivalent* propoſed by *Geraldino*, the *Spaniſh* Court's Agent with that Company, in lieu of their *annual Ship*, which ſeemed rather calculated to amuſe the Company, and to delay the *Spaniſh* Court's *Cedula*, or Permiſſion, for ſending out of their ſaid *annual Ship*, than from any ſerious Intent to give the Company due Satisfaction. On the 11th of *Auguſt*, in this Year 1736, that Company's General Court took that Matter again into Conſideration, after much had been printed in News-papers by Way of Letters, for and againſt the ſaid *Equivalent*, and alſo for the Company's farming their Introduction of Negroes into particular Parts of the *Spaniſh Weſt-Indies*, *viz.* to *Vera Cruz*, *Campeachy*, *Guatimala*, &c. and the ſeveral Demands made by *Geraldino* before a *Cedula* could be granted: But it being obſerved in this General Court, That their Court of Directors were better acquainted with the ſecret Springs of thoſe Points, it was finally *Reſolved*, " That the ſeveral Matters relating to the diſpatching of an *annual Ship*,—to the Payment demanded by the King of *Spain* of the Quarter Part of the Gains by the *annual Ship Royal Caroline*;—and concerning the ſettling the Value of the Dollars payable for the *Negro* Duties,—be " referred to the Court of Directors, to do therein as they ſhall think may be moſt for the Intereſt of the Company."

Corn of all Kinds, its Quantity exported from *England* in one Year.

In this Year an Account was laid before the *Britiſh* Houſe of Commons of the ſeveral Sorts and Quantities of *Corn* which had been exported from *England*, between *Chriſtmas* 1734 and *Chriſtmas* 1735, with the Total of the Bounty paid thereon, *viz.*

Barley. Quarters.	Malt. Quarters.	Oat-meal. Quarters.	Rye. Quarters.	Wheat. Quarters.
57,520	219,781	1,920	1,329	153,343
Bounty. £. 7,190	£. 26,434	£. 240	£. 232	£. 38,335

Total Number of Quarters of the ſeveral Kinds of *Corn* was 433,893 Quarters.
Total Bounty paid 72,433 *l.*

A. D. 1736

Cargo of a *Portugueſe* Fleet from *Braſil.*

A Fleet of 27 Sail arrived at *Liſbon* from *Pernambuco*, in *Braſil*, in this ſame Year 1736, the Cargo whereof was,

In Money { 1,300,000 Cruſados for the Merchants.
200,000 ———for the King.
4 Octaves of *Diamonds.*
6,294 Cheſts of *Sugar*, and 700 ſmall Cheſts ditto.
8,600 Rolls of *Tobacco.*
84,000 half Hides, and 13,000 whole Hides, in the Hair.
11,000 Hundred Weight of *Braſil-wood.*
450 Hundred Weight of *Violetta-wood.*

1737

A ſuccinct View of the late vaſt Improvements of *France*'s Commerce; and of her Encroachments on the *Britiſh American* Colonies, &c. with Remarks.

The *French* at this Time were juſtly animadverted on by many, for their eagerly puſhing into an univerſal Commerce, as the ſurer though ſlower Way of coming at their old darling Scheme of univerſal Dominion, *viz.*

Iſt, In *Africa*, they had monopolized the *Gum* Trade at and near the River *Senegal*; they had alſo encroached on the *Engliſh* Settlement at the River *Gambia*, and had largely increaſed their Slave-Trade on that Coaſt, for the Encouragement of their *Weſt-India Sugar Iſlands:* Where,

IIdly, They had, at this Time, gained ſo much Ground on *ours* as to be the great Exporters of *Sugar*, and alſo of *Indico*, *Cotton*, and *Ginger*, to many Parts of *Europe*. They had alſo gained a conſiderable Settlement on the Coaſt of *Guiana*, near *Surinam*, in *South-America*, encroaching both on the *Dutch* and *Spaniards* there.——On the North Continent of *America*, they now aſſiduouſly purſued old *Louis*'s Plan of forming a Chain of Forts and Settlements from the Mouth of the great River *Miſſiſippi* up to their Province of *Canada*, thereby to cut off *our* Continent Settlements from any Commerce with the vaſt *Indian* Countries weſtward, and in time to get Poſſeſſion of them all. For that End they had ſtrongly fortified the Iſle of *Cape Breton*, at or near the Entrance of the great River of *St. Lawrence*, ſerving as well to command that Entrance as to protect a very great *Cod* Fiſhery, which they have of late ſo vaſtly increaſed in the neighbouring Seas.

III. From *Quebec*, their Capital of *Canada*, they had opened and fortified a Communication with the Lakes lying behind, and properly as much belonging to our Province of *New-York* as any other Part of that Province can be ſaid to be; and had alſo taken Poſſeſſion of the fertile Lands round thoſe Lakes, much of which they had already cleared and in part cultivated; where they had plentiful Crops of Wheat, and had alſo found Lead Mines, which farther enabled them to improve their Trade with the neighbouring *Indians*. And (by already endeavouring to remove ſuch *Indian* Nations from the Neighbourhood of the *Miſſiſippi* River as might endanger its Navigation) deſigning to carry their Wheat, &c. down that vaſt Stream to *New-Orleans*, their *Miſſiſippi* Capital, from thence to ſupply their Sugar Colonies therewith, poſſibly cheaper than our Northern Plantations can at preſent do.——They had alſo planted *Tobacco* in that Country, and had begun to ſaw Timber for Lumber, with a like View to a Trade from thence with their Sugar Iſlands. *Weſtward* they were ſaid to have already extended their Communication as far as the *Spaniſh* Province of *New-Mexico*; caſting, no doubt, a longing Eye on the rich Silver Mines there.——*Eaſtward* from the *Miſſiſippi* River, they had by this Time ſettled ſo far up the *Albanus* River as thereon to have Forts within twenty Days March of *Charles-Town*, our Capital of *South-Carolina*. Of all which vaſt Improvements and Encroachments on the Territories of other Nations, and more eſpecially of our *own*, authentic Accounts were laid before our Government and our Board of Trade; yet no effectual Regard was ſhewn thereto: Neither did the Court of *Spain* ſeem more to regard their Encroachments in the *Miſſiſippi* Country, and on their Province of *Florida*, nor even their more dangerous one toward *New-Mexico*. In the *Eaſt-India* Commerce alſo, *France* (as we have before partly ſhewn) had by this Time greatly increaſed, even beyond Belief, without being duly regarded by ſuch who might in the Beginning have ruined it and moſt of the above Encroachments, had vigorous Meaſures been in due Time taken.

All which Particulars we have here judged fit to be laid together before our Readers at one ſummary View, for ſerving the better to illuſtrate and explain what may hereafter fall in our Way in reſpect to *France*'s all-graſping Deſigns for univerſal Commerce as well as Dominion. In treating of which, and ſundry other Points, it will be impoſſible to avoid Obſcurity, without being neceſſitated to a brief Repetition of ſome Things previouſly handled in other Parts of our Work. And although, by our late amazing Succeſs againſt the *French* Colonies in *America*, Matters are ſince greatly changed, yet the Steps taken by that Nation are well worth tracing, as *Memento's* for Futurity!

A Propoſal for ſupplying *Great Britain* intirely with *Iron* from her *American* Colonies.

There was at this Time much ſaid in Pamphlets and News-papers in Favour of the Importation of *Iron* and *Hemp* from the *Britiſh* Continent *American* Colonies, as being two Articles of the laſt Importance for our *Navy-Royal* and our *mercantile Shipping*, as well as for numberleſs other Services; and Petitions were preſented to Parliament for this End by the Merchants.

The State of the *Iron* Manufacture of *England.*

Iſt, It was computed, That *England* imported annually about 20,000 Tons of *foreign Iron*, whereof 15,000 Tons were from *Sweden*, which coſt about 150,000 *l.* moſtly paid by *us* in Money, as are moſt of the other 5,000 Tons brought from *Ruſſia*; and that our Exports of *wrought Iron* are from 3,000 to 3,500 Tons, *per Annum.*

IIdly, That the *Iron* of the *Britiſh* Colonies is as good as any *foreign Iron* whatever; and, with proper Encouragement, might be imported in Quantities ſufficient to ſupply all the ſaid *Iron* we get

A.D. 1737

get from thoſe two Nations, on whom we are at preſent dependent for that Commodity, without their taking ſufficient of our Product and Manufactures in return; whereas our own Colonies would be intirely paid by our *Woollen* and other Manufactures, the Demand for which would thereby be much increaſed from thence; and thereby about 180,000*l. per Annum* would be clearly ſaved to the Nation in the Balance of our Trade!——It was moreover computed, That *England* makes annually, at Home, about 18,000 Tons of *Bar-Iron*; the Quantity of which, it was ſaid, we could not increaſe, by Reaſon of our Woods being ſo far exhauſted as to have greatly enhanced the Price of Cord-wood uſed in the refining of *Iron-Stone:* And, were we to import more *Pig-Iron* from *America* and make leſs of it at Home, we ſhould be able, with the ſame Quantity of *Wood* we now conſume, to make much more *Bar-Iron* at Home.

IIIdly, That nothing is more likely to prevent our *American* Colonies from falling into ſuch Manufactures as muſt interfere with our own *Iron*, &c. Manufactures, than the giving them Encouragements for raiſing and ſending to us ſuch rough Materials as *Pig*, *Sow*, and *Bar-Iron*, *Hemp*, &c. as it is well known of what great Advantage to this Kingdom the Bounties on the Importation of *Pitch* and *Tar* from thence have been, ſince the Year 1703.

IVthly, That, for this End, a Duty ſhould be laid in our ſaid Colonies on all *Iron* imported there from *Europe*; and that, had the like been done in regard to the prohibiting of the Importation of *Hemp* from *Europe* into our ſaid Colonies, the *Bounty* now ſubſiſting on *American Hemp* would have by this Time proved more effectual for ſupplying us from thence with all the *Hemp* we want.

On the other Hand, the great and natural Oppoſers to the Merchants Petitions were the Proprietors of the *Engliſh Iron-works*, and thoſe of the *Woodlands* of *England*; but where particular Intereſt *alone* is ſo ſtrongly concerned againſt ſo viſible a National Benefit, that Oppoſition ſeemed then not to be much regarded by impartial Men, at leaſt without Doors. In fine, the Promoters of this Scheme, for encouraging the Importation of *Iron* from our *American* Colonies, propoſed, That an additional Duty ſhould be laid on all *foreign Bar-Iron* imported, excepting only ſuch as ſhall be imported from our *American* Colonies:—And to repeal the preſent foreign Duty on all *Bar-Iron* which may be hereafter imported from our ſaid Plantations. Yet ſo many jarring Intereſts prevented the Legiſlature from doing any Thing at this Time therein!

" In *November* of this Year 1737, the *Jamaica* Merchants petitioned King *George* the Second " to be protected againſt the great and violent Interruptions and Seizures committed by *Spaniſh* " Ships in the *American* Seas, under the plauſible Pretences of guarding their own Coaſts, by " not only ſtopping and ſearching, but alſo, for many Years paſt, forcibly and arbitrarily ſeizing " their Ships on the High Seas, inhumanly treating the *Britiſh* Commanders and Sailors, and " condemning our Ships and Cargoes as lawful Prizes, in manifeſt Violation of ſolemn Treaties " between *Great Britain* and *Spain:*—Whereby the preſent Trade to his Majeſty's Plantations in " *America* is rendered extremely precarious:—Humbly praying therefore, ſpeedy and ample Sa" tisfaction to his Subjects for thoſe Loſſes:—And that no *Britiſh* Veſſel be detained or ſearched " on the *High Seas* by any Nation, under any Pretence whatſoever:—And that the Trade to " *America* may be rendered ſafe for the future." Which Petition his Majeſty received very graciouſly, and promiſed Redreſs upon their making good their Allegations to the Privy-Council, which they afterward plainly did. And here we muſt obſerve, That whereas by the Treaty of 1670, ſubſiſting between *us* and *Spain*, our Ships are not to reſort nor trade to the Coaſts of *New-Spain* and its adjoining *Spaniſh* Provinces, (unleſs driven thither by Diſtreſs of Weather) their ſailing near to thoſe Shores renders them liable to be ſuſpected of carrying on a contraband Trade with thoſe *American* Provinces of *Spain*, [the Trade to which is abſolutely and moſt ſtrictly confined to *Spaniards* ſolely.] And there is ſcarcely any Doubt to be made, That our Sloops, *&c.* from *Jamaica* and ſome other *Britiſh* Colonies, did ſometimes run the Hazard, for the Sake of Gain, and therefore ought to ſubmit to the Conſequences. So, on the other Hand, it is notorious, That the *Spaniſh Guarda-Coſtas* [*i. e.* Guard-Ships] did frequently exceed their Powers or Commiſſions, by ſearching, plundering, and often ſeizing on our *Britiſh* Ships ſailing on the *American Seas*, even tho' not ſo near their Shores as to give juſt Ground of Suſpicion of any clandeſtine Trade, and though not laden with the Produce of the *Spaniſh American* Provinces; but only, perhaps, having (by mere Chance) a very few *Spaniſh Pieces of Eight* found in the Ship, or perhaps a ſmall Parcel of *Logwood*, or other *Spaniſh American* Merchandize found in ſuch Ship; the firſt being the only Coin in our Iſland of *Jamaica*, and the two laſt the Produce of that Iſland. In ſhort, theſe mutual Complaints did, a few Years after, bring on the War between *Great Britain* and *Spain:* And although the Peace of *Aix la Chapelle*, *Anno* 1748, ſeemed to terminate that Affair, yet it was but barely to *ſeem* to do it; and a new and more diſtinct or explicit Treaty *ſeems* ſtill to be wanting (if intended by either Party) for that Point, and alſo for the *Logwood* Trade of our *Britiſh* Subjects in the Bay of *Campeachy*. To theſe Complaints of our Merchants, an Anſwer was indeed given, in *June* 1738, by the Court of *Spain*, wherein moſt of the Grievances and Violences were *promiſed* to be redreſſed; and the reſt were referred to the Enquiry of the *Spaniſh* Governors in *America*; who were themſelves incompetent Judges thereof, as being Parties to many of thoſe Violences, and many of them privately Partners in thoſe *Guarda-Coſtas*. And thus it remained till repeated Injuries obliged his *Britannic* Majeſty to declare War againſt *Spain*, after having in vain tried by an amicable *Convention*, *Anno* 1739, (as will be ſeen) to preſerve Peace.

The *Engliſh* Complaints againſt the Violences of the *Spaniſh* Guard-Ships on the *American* Coaſts, *&c.* not like to be ſoon liquidated.

Chriſtened in *London*, *Anno* 1737, 16,760 Souls—Buried 27,823. Increaſed in the Burials this Year 242.

London's Mortality Bill.

A Million paid off the *Bank of England*'s Capital.

By a *Britiſh* Statute of the 11th Year of King *George* the Second (Cap. xxvii.) One Million of the Capital Stock of the *Bank of England* was paid off, being a Moiety and farther Part of the Two Millions Capital created by an Act of the 3d Year of King *George* the Firſt. So that the Capital Stock of the *Bank of England* was hereby reduced to 3,875,027 *l.* 17 *s.* 10 *d.* (500,000 *l.* other Part of the ſaid Two Millions having been paid off by an Act of the 1ſt Year of King *George* the Second, *For granting an Aid to his Majeſty by Sale of Annuities to the Bank*, &c.)

The Province of *Virginia*'s eſtabliſhed annual Revenue.

Sir *William Keith*, in his Hiſtory of *Virginia*, (p. 174.) publiſhed in this Year 1738, gives the following Account of the Revenue of that Colony, as it then ſtood, and is eſtabliſhed by Acts of their Aſſemblies, *viz.*

	£.
“ Iſt, The annual Receipt of *Quit-Rents*, at two Shillings *Sterling per* 100 Acres, being “ the Revenue of the Crown, paid into the Receipt of the King's private Exchèquer, “ is an *increaſing Fund*, amounting at preſent to about - - - - - - - - - - ---	3,500
“ IIdly, The two Shillings *Sterling per* Hogſhead on *Tobacco* exported, at a Medium “ of 32,000 Hogſheads, *per Annum* is - - - - - - - - - - - - - - - - - ---	3,200
“ Out of which [alſo increaſing] Tax is paid the Governor's Salary of 2000 *l. per Ann.*	
“ IIIdly, One Shilling *Sterling per* Ton on 10,000 Tons of Shipping yearly, is - ---	500
“ IVthly, The eſtabliſhed Fees for Marriage-Licences, Probates of Wills, and entering and clearing of Ships; together with other legal Perquiſites belonging to the Go- “ vernor reſiding there, is, *per Annum* - - - - - - - - - - - - - - - - - ---	600
	7,800

☞ It is more than probable, That, ſince that Time, every one of the ſaid four Articles are conſiderably increaſed.

Linen imported from *Scotland*; with Reflexions.

There was imported into the Port of *London*, on the 23d of *October* 1738, 151,219 Yards of Linen, manufactured in *Scotland*, and alſo 3,000 Spindles of their Linen-Yarn. Such large Entries of the Linen Manufacture, both from *Scotland* and *Ireland*, of late, every Year increaſing, merit the higheſt Encouragement; as they do not only uſefully employ our own People, and better enable them to pay Taxes, Exciſe, &c. and to conſume more of the Product of the Country, but (which is of very great Importance in the general Balance of our Commerce) as their ſaid Linen Manufactures ſhall gradually increaſe, the Importation of foreign Linen muſt neceſſarily decreaſe in a ſimilar Proportion.

London's Mortality Bill.

The *London* Bill of Mortality for the Year 1738, *viz.* Chriſtened 16,060——Buried 25,825. Decreaſed in the Burials this Year 1,998.

Obſervations thereon.

☞ It is not ſo eaſy as ſome have pretended, to account for this and many of the preceding Years large Mortality Bills of *London*, compared with much later Years, whilſt no extraordinary Sickneſs happened, and whilſt at the ſame Time great Additions were conſtantly making to the Buildings in its Suburbs. The beſt Reaſons uſually given for the late Decreaſe of its Mortality Bills are, 1ſt, The many Hoſpitals ſince erected for *ſick* Perſons, whereby and by the Small-pox, &c. Hoſpitals, many Lives are, probably, preſerved which formerly were loſt. 2dly, Many private Dwelling-houſes, in many Parts within the City of *London*, are, from the very viſible Increaſe of our Commerce, pulled down and turned into mere Warehouſes for Merchandize, whereby the Number of Houſeholders are ſenſibly decreaſed within the Lord-Mayor's Juriſdiction: But this we doubt will ſcarcely be admitted as any good Reaſon for the general Decreaſe of the Burials, unleſs it appeared, that thoſe Houſeholders had removed from within the Limits of the general Bills of Mortality. 3dly, The late Wars in *Germany* and *America* have undoubtedly carried away ſome Thouſands of our lower People, Vagrants, &c. Laſtly, it is much to be ſuſpected (as elſewhere noted) that the Company of *Pariſh-Clerks* of *London* either have not ſufficient Powers by Law, or elſe do not exert thoſe Powers, for enabling them to be more exact in their ſaid Weekly Bills.

The preliminary Treaty of the 14th of *January* 1739, between *Great Britain* and *Spain*.

Under this Year we have ſeen briefly related the barbarous and illegal Captures of our *Britiſh* Merchant-Ships on the High Seas of *America*, by the *Spaniſh Guarda la Coſtas*, or Veſſels pretending to be ſuch. Thoſe Grievances were loudly complained of by our Merchants, and the Houſe of Commons, in the Year 1738, did thereupon addreſs the King for obtaining due Satisfaction of the Court of *Spain*. Moreover, the *Britiſh* Houſe of Peers, in the ſame Year, came to the following Reſolution, *viz.* “ That the *Spaniards* ſearching of our Ships on the open Seas, under “ Pretence of their carrying contraband or prohibited Goods, is a Violation of the Treaties ſub- “ ſiſting between the two Crowns.” Hereupon, the ſtrongeſt Remonſtrances being made to the *Spaniſh* Court, the King acquainted his Parliament, That he had concluded a preliminary Convention with *Spain*, ſtipulating in Subſtance;

“ Iſt, That immediately after the ſigning thereof, two Plenipotentiaries on each Side ſhould “ meet at *Madrid*, finally to regulate the reſpective Pretenſions of the two Crowns.

“ IIdly, Until the Limits of *Florida* and *Carolina* can be adjuſted, Things ſhall remain there in their preſent Situation.

“ IIIdly, His *Catholic* Majeſty ſhall cauſe to be paid to his *Britannic* Majeſty 95,000 *l. Sterling*, “ as a Balance admitted to be due to the Crown and Subjects of *Great Britain*, after Deduction “ made of the Demands of the Crown and Subjects of *Spain*; to the End that the above-men-

“ tioned

“ tioned Sum, together with the Amount of what has been acknowleged on the Part of *Great Britain* to be due to *Spain* on her Demands, may be employed by his *Britannic* Majeſty for the Satisfaction and Payment of the Demands of his Subjects upon the Crown of *Spain*.——But this reciprocal Diſcharge ſhall not relate nor extend to the Differences ſubſiſting between the Crown of *Spain* and the *South-Sea* Company, nor to any particular or private Contracts between either of the two Crowns, or their Miniſters, with the Subjects of the other, or between the Subjects of the one Crown with thoſe of the other.

“ IVthly, If it ſhall happen that, in Conſequence of Orders diſpatched by the Court of *Spain*, any Part of the Value of certain Ships taken from the *Engliſh* and included in the foreſaid 95,000 *l.* be already paid, the ſame ſhall be deducted thereout.

“ Iſt *Separate Article.* The ſaid 95,000 *l.* ſhall be cauſed to be paid by his *Catholic* Majeſty at *London*, within *four Months* after the Ratification of this *Convention*.

“ IId *Separate Article.* The IIId above-named Article ſhall not extend to Ships taken ſince the 10th of *December* 1737: In which Caſes Juſtice ſhall be done according to the Treaties, as if this *Convention* had not been made. It being however underſtood, That this relates only to the Indemnification and Satisfaction to be made for the Effects ſeized or Prizes taken: But that the Deciſion of the Caſes which may happen, in order to remove all Pretext for Diſpute, is to be referred to the Plenipotentiaries to be determined according to the Treaties.”

This is the Subſtance of a *Convention*, which made ſo much Noiſe and gave ſo much Diſguſt in *England*. What gave the greateſt Diſguſt of all was, the King of *Spain*'s following Declaration and Proteſt, which he inſiſted on as a preliminary Condition of his ratifying the above *Convention*, *viz.* “ That he reſerves to himſelf, in its full Force, the Right of being able *to ſuſpend the* Aſſiento *for* Negroes, *and of diſpatching the neceſſary Orders for the Execution thereof*, in caſe the *South-Sea* Company doth not ſubject herſelf to pay, within a ſhort Term, the Sum of 68,000 *l.* *Sterling*, which ſhe has confeſſed to be owing on the Duty for *Negroes*, according to the Regulation of 52 Pence *per* Dollar, and on the Profits of the Ship *Royal-Caroline*: And farther declares, That under the Validity and Force of this Proteſt the ſigning of the ſaid *Convention* may be proceeded on, and in no other Manner.”

The Injuſtice of which previous Demand on the Company was ſo apparent, that, ſoon after, the ſaid Company's General Court, on the 1ſt of *March*, reſolved not to pay the ſame, without the King of *Spain*'s coming to a juſt Account with them for all the Seizures and Captures of their Ships and Merchandize which he had by former Agreements engaged to refund to them, *viz.*

The *South-Sea* Company's great and juſt Claims on the Court of *Spain* fruſtrated.

“ I. On our Rupture with *Spain*, *Anno* 1718, the King of *Spain* ſeized on all the Company's Effects in every Part of his Dominions, amounting to about *one Million* of Dollars, or nearly, in *Sterling* Money, to 225,000 *l.* whilſt the Company's Factories were kept up at *La Vera Cruz*, *Panama*, *Porto Bello*, *Carthagena*, and *Buenos Ayres*; and two Agents at *Madrid*; all which was a very great Expence. (Which Sum the King of *Spain* engaged to make good to the Company by the Treaty of the Year 1721.)

“ II. The King of *Spain* having, *Anno* 1727, beſieged *Gibraltar*, he again ſeized on every Thing belonging to the *South-Sea* Company, amounting to about *half a Million* of Dollars, or about 122,000 *l.*”

Yet, in the Treaty of that ſame Year, he promiſed not only to reſtore this laſt-named Seizure, but alſo the preceding one of the Year 1718; although all that was ever received was but a mere Trifle, compared to their whole Loſs. Now, thoſe Confiſcations were the more unjuſt, as being expreſsly contrary to the ſaid *Aſſiento Contract*; wherein it is ſtipulated, That whatever Differences may ariſe between the two Crowns, the Company ſhall be always allowed *eighteen* Months for the Removal of their Effects.——The Company has alſo farther Demands on the King of *Spain*: For Inſtance, Iſt, Their juſt Claim on him, For One-fourth Part of all *their* Loſſes ſuſtained in Trade; as by the *Aſſiento Contract* he was to be a Quarter Part Sharer in their ſaid Trade.

IIdly, The King of *Spain* ought to make good the Loſs the *South-Sea* Company has ſuſtained by his frequent Refuſal of their *annual Ship*, as well as by the Number of ſuch *annual Ships* ſhort of what they ſhould have been allowed by the ſaid *Aſſiento Contract*.

IIIdly, The Company has yet farther Demands to make, whenever a Treaty ſhall be ſet on Foot: But, in the mean time, theſe Conſiderations are more than ſufficient to juſtify their Proceedings, and to demonſtrate that the Court of *Spain* was never diſpoſed *in earneſt* to do Juſtice to our injured People. For the King of *Spain* did not only ſuffer the *four Months* to elapſe, within which Time he was to pay the before-named 95,000 *l.* on the Pretext of the *South-Sea* Company's Failure of paying his Demand of the 68,000 *l.* but, inſtead of fulfilling the foreſaid *Convention*, he ordered Seizures to be made of the Ships and Goods of his Majeſty's Subjects wherever they could be found in his Dominions or elſewhere; and alſo ordered all the *Britiſh* Subjects in his Dominions to depart in a ſhorter Time than allowed by Treaties. Whereupon *Geraldino*, his Envoy Extraordinary, and *Terry*, his Agent, at *London*, for the *Aſſiento Contract*, were obliged to leave the Kingdom. And his *Britannic* Majeſty, on the 23d of *October*

War declared by *Britain* againſt *Spain.*

1739, declared War againſt *Spain*; for the maintaining the Honour of his Crown and Kingdom, and for the obtaining Redreſs of his much injured Merchants and Traders, who from all Parts of the Kingdom made earneſt Petitions for Relief! It was indeed high Time for our Government to take this Step, (though with more than ſeeming Reluctance) for the Violences and Inſolence of the *Spaniards* in *America* were become abſolutely intolerable! Principally owing to our own ſhamefully puſilanimous temporizing at any Rate, rather than reſolutely doing ourſelves Juſtice by Force of Arms; they more than ever perſiſting in the ſearching and ſeizing of *Britiſh Ships*, and putting their Commanders into Irons and Priſons, their detaining of the *South-Sea* Company's Ships, and locking up of that Company's Warehouſes at *Porto Bello*, *Carthagena*, *Havanna*, &c.

A *Britiſh* Statute concerning *Wool* and *Woollen* Yarn imported from *Ireland* to *England*; and for preventing their Exportation to foreign Parts.

By a *Britiſh* Statute of this 12th Year of King *George* the Second, (Cap. xxi.) it was enacted, "That whereas the taking off the Duties upon *Woollen* or *Bay* Yarn imported from *Ireland* may be a Means to prevent the Exportation of *Wool* and of *Woollen* Manufactures from *Ireland* to foreign Parts, and may alſo be of Uſe to the Manufacturers of *Great Britain*, That, from the 1ſt of *May* 1740, the ſame ſhall be no longer payable; excepting only the Duties upon *Worſted Yarn* of two or more Threads *twiſted* or *thrown*, or on *Cruel*, imported from *Ireland*. And whereas, notwithſtanding the ſeveral Laws for preventing the Exportation of *Wool* unmanufactured from *Britain* and *Ireland* to foreign Parts, ſuch Exportation is notoriouſly continued.— For farther Prevention thereof,—it was farther enacted,—That all *Wool*, *Woollen* or *Bay Yarn*, *Woolfels*, *Shortlings*, *Mortlings*, *Woolflocks*, *Worſted Yarn*, *Cloth*, *Serge*, *Bays*, *Kerſies*, *Says*, *Friſes*, *Druggets*, *Cloth-Serges*, *Shalloons*, *Stuffs*, and other *Draperies*, or mixed with *Wool* or *Woolflocks*; which ſhall from Time to Time be exported from *Ireland* into the Ports of this Kingdom hereafter-mentioned, ſhall be ſhipped off and entered at the Ports of *Dublin*, *Waterford*, *Youghal*, *Kingſale*, *Cork*, *Drogheda*, *New-Roſs*, *Newry*, *Wexford*, *Wicklow*, *Sligo*, *Limerick*, *Galway*, and *Dundalk*;—and from no other Part of *Ireland* whatever. Nor to any other Ports of *Britain* but to *Biddiford*, *Barnſtaple*, *Minehead*, *Bridgewater*, *Briſtol*, *Milford-haven*, *Cheſter*, and *Liverpoole*——And in Veſſels only of the Built of *Great Britain* or *Ireland*, and duly regiſtered upon Oath"——With ſundry other Clauſes for preventing of Frauds herein, needleſs here to be particularized.

The immenſe Benefit at this Time of the *Britiſh Woollen Manufacture.*

Upon this Subject, the Author of *Conſiderations* now laid before the *Britiſh* Parliament, relating to the Running of Wool, thinks it highly probable, "That more than 1,500,000 People are employed in our *Britiſh Woollen Manufacture:* And if theſe earn one with another Six-pence *per* Day for 313 working Days in the Year, it will amount to 11,737,500*l.*" Which is rightly computed, and demonſtrates the immenſe Benefit of this Manufacture!

A *Britiſh* Statute for Leave to carry Sugars directly from the *Sugar Iſles* to any Parts South of *Cape Finiſterre*, without firſt landing them in *Great Britain.*

The *French* having gradually gained the Aſcendant over *us* in the ſupplying of the *European* Market with their *Sugars*, by being permitted to carry them directly from their own *Sugar Iſlands* to foreign Parts, without being firſt landed in *France*, it was therefore enacted by a *Britiſh* Statute of this 12th Year of King *George* the Second, (Cap. xxx.) *To grant Liberty to carry Sugars of the Growth, Produce, or Manufacture of any* Britiſh *Sugar Colonies in* America, *from the ſaid Colonies directly to foreign Parts Southward of* Cape Finiſterre, *in Ships built in* Great Britain, *and navigated according to Law.* The major Part of the Proprietors of which Ships ſhall, upon Oath, be reſiding in *Great Britain*, and the Reſidue in the *Britiſh Sugar Iſlands*, and not elſewhere, and cleared out from *Great Britain* or the ſaid *Britiſh Sugar Iſles*; on certain Conditions therein ſpecified. The *French* had the Start of us in this prudent Regulation by at leaſt twelve Years, as by their Edicts *Annis* 1726 and 1727.

The Number and Tonnage of the Shipping of the Port of *Liverpoole.*

In conſequence of a *Britiſh* Statute, for laying a Duty on the Tonnage of all Ships belonging or trading to or from the Port of *Liverpoole*, for the making of a Dock, Piers, &c. for that Port, we have ſeen a printed Liſt of all the *Ships* belonging to that famous maritime Port and Town, taken on the firſt of *May* 1739: Whereby it appeared, That their Number from 30 Tons and upwards was 211 Ships and Veſſels, amongſt which that Year there were 1 of 400 Tons—1 of 350—1 of 300—1 of 250—2 of 340—2 of 200—2 of 190—4 of 180—7 of 160—15 of 150—10 of 140—5 of 130—13 of 120—6 of 110—and 16 of 100 Tons each: The reſt from 90 to 30 Tons downward. And although the printing of the Number of their Ships be ſince laid aſide, we are well aſſured that the Number of Shipping of that Port is ſince very conſiderably increaſed.

Amſterdam's Number of Ships entering there inwards in one Year: And *London*'s thought to be twice as many.

On this Subject we may remark, That during the Year 1738 there arrived or were entered inwards at the Port of *Amſterdam* 1,813 Ships of all Sorts; where *Deſcartes*, (ſays the Happy future State of *England*, already quoted in this Work) p. 167, in one of his Epiſtles, remarks, That all People are Traders. [*Ubi nemo non Mercaturam exercet.*] ——*Boyer's Political State*, for the Month of *January* 1739, *(N. S.)* from whom that Number of Ships is taken, remarks, "That the *Amſterdamers* conjecture, that *London* has double their Number of Ships frequenting their Port!"

At *Rotterdam* the Shipping entered inwards in one Year.

In the ſame Year *Rotterdam* had about 500 Ships entered inwards.

London's Mortality Bill.

At *London*, in this Year 1739, Chriſtened 16,181.——Buried 25,432. Decreaſed in the Burials in this Year 393.

Exports from *Carolina* in one Year.

Exported in the Year 1739 from *South-Carolina*, viz. 71,484 Barrels of Rice—8,095 Barrels of Pitch—33 Ditto of Turpentine—2,734 Ditto of Tar—559 Hogſheads of Deer Skins—and 1,196 looſe Skins unpacked—*Indian* Corn and Peaſe 20,165 Buſhels—Pine and *Cypreſs* Timber and Planks 209,190 Feet—*Cedar* Boards 3,200 Feet—Shingles 42,600 Pieces—Caſk-ſtaves 56,821—Tanned

A. D.

Leather 1,535 Hides—Roſin 45 Barrels—*Saſſafras* 4½ Tons—Beef and Pork 539 Barrels—Potatoes 790 Buſhels. *Cleared outward* 238 Ships and Veſſels.

1740 In this Year was firſt erected in *Sweden, a Board for the encouraging of Trade and Manufactures*; which has proved very advantageous to that Nation.

Sweden firſt erects a Board for *Trade and Manufactures.*

For the better Supply of Seamen to ſerve in *Britiſh* Ships of War, and alſo on board of Merchant Ships and Privateers, and for the better carrying on the preſent War againſt *Spain*, or any future War, an Act of the *Britiſh* Parliament paſſed in the 13th Year of King *George* II. (Cap. iii.) [*For the better Supply of Mariners and Seamen to ſerve in his Majeſty's Ships of War, and on board Merchant Ships*, &c.] “ Whereby, during the preſent War, Merchants Ships may be navigated “ by any Number of foreign Seamen, not exceeding Three-fourths of the Ship's Company—— “ And for the better Encouragement of foreign Seamen to ſerve on board *Britiſh* Ships, either “ of War, Merchant Ships, or Privateers, during this War, ſuch foreign Seamen ſo ſerving for “ *two* Years, ſhall afterward be deemed in all Reſpects *natural-born Subjects*.——Provided, *They* “ *ſhall not thereby be enabled to be of the Privy-Council, or to be a Member of either Houſe of Parlia-* “ *ment, or to take any Office of Truſt, Civil or Military, or to have any Grant of Lands*, &c. *from* “ *the Crown to himſelf, or to any other Perſon in Truſt for him*.——And the King, his Heirs, and “ Succeſſors, are hereby impowered in any future War, by Proclamation, *during ſuch War, and* “ *no longer*, to permit the like Number of foreign Seamen to ſerve in Merchant Ships or Priva- “ teers, as well as in Ships of War.” This prudent Law was followed by another very wiſe one, in ſundry Reſpects reſembling it, *viz.*

A prudent Law for permitting foreign Seamen during this or any future War to ſerve on board *Britiſh* Ships.

A Statute of the ſaid 13th Year of King *George* II. Cap. vii. [*For naturalizing ſuch foreign Proteſtants, and others therein mentioned, as are ſettled, or ſhall ſettle, in any of his Majeſty's Colonies in* America] the Preamble whereof ſets forth, That “ whereas the Increaſe of People is a “ Means of advancing the Wealth and Strength of any Nation or Country: And whereas many “ Foreigners and Strangers, from the Lenity of our Government, the Purity of our Religion, “ the Benefit of our Laws, the Advantages of our Trade, and the Security of our Property, “ might be induced to come and ſettle in ſome of his Majeſty's Colonies in *America*, if they were “ made Partakers of the Advantages and Privileges which the *natural-born Subjects* of this Realm “ do enjoy.”——It was now therefore enacted, “ That, from the 1ſt Day of *June* 1740, all Per- “ ſons born out of the Liegance of his Majeſty, who ſhall have reſided, or ſhall hereafter reſide, “ for the Space of *ſeven* Years or more, in any of his Colonies in *America*, and ſhall not have “ been abſent from thence above two Months at any one Time;—and ſhall take the uſual *Oaths* “ *of Fidelity*, or, if *Quakers*, ſhall ſubſcribe the *Declaration of Fidelity*, (or if *Jews*, with the Omiſ- “ ſion of ſome Chriſtian Expreſſions)——and ſhall alſo ſubſcribe the Profeſſion of their *Chriſtian* “ *Belief*, (*Jews* excepted) as directed by a Statute of the 1ſt of *William* and *Mary*, [intitled, *An* “ *Act for exempting their Majeſty's Proteſtant Subjects from the Penalties of certain Laws*] before any “ Judge of the Colony they ſhall reſide in,——and ſhall have received the *Sacrament of the Lord's-* “ *Supper in ſome Proteſtant or reformed Congregation* in *Great Britain*, or in the ſaid Colonies, (*Quakers* “ and *Jews* excepted) within 3 Months of his or her ſo qualifying, and producing a Certificate here- “ of, ſigned by the Miniſter of the ſaid Congregation, atteſted by two Witneſſes: A Certificate “ of all which, under the reſpective Colony's Seal, ſhall be a ſufficient Proof of his or her being “ thereby become *a natural-born Subject of* Great Britain, *to all Intents and Purpoſes whatſoever*. “ And the Secretary of each Colony ſhall annually tranſmit to the Board of Trade and Planta- “ tions, Liſts of the ſaid Perſons ſo *naturalized*, to be regiſtered in their Office. *Proviſo*,” (as in the before-named Act of Parliament) “ That ſuch Perſons ſhall not thereby be enabled to be a “ Privy-Counſellor, *&c.* as in other Naturalization Statutes.” The more immediate Object of this Statute was in Favour of ſome Thouſands of Proteſtants perſecuted and oppreſſed in *Germany* and elſewhere, and alſo in Favour of Proteſtants from *Switzerland*, &c. all of whom were before and about this Time ſettled in the different Provinces of the *Britiſh* Continent Colonies of *America*, chiefly on the back Parts thereof Weſtward.

Another wiſe Law, for naturalizing foreign Proteſtants ſettled in the *Britiſh American* Plantations.

By a Statute of the ſaid 13th of King *George* II. (Cap. xvii.) [*For the Increaſe of Mariners and Seamen to navigate Merchant Ships, and other trading Ships and Veſſels*] it was enacted, “ 1ſt, That “ all Seamen of the Age of fifty-five Years or upwards, and all ſuch as have not attained the “ full Age of eighteen Years, and alſo all Foreigners ſerving in any *Britiſh* Merchant Ships or “ Privateers, ſhall be exempted from being impreſſed into his Majeſty's Service. 2dly, Perſons “ of any Age, uſing the Sea, ſhall alſo be exempted from being impreſſed for the firſt two Years “ of his being at Sea; as ſhall likewiſe all Sea-Apprentices for the firſt *three* Years of their ſaid “ Apprenticeſhip.”

A *Britiſh* Statute aſcertaining who ſhall be exempted from being impreſſed in the King's Service at Sea.

It was in or about this Year 1740, or perhaps ſomewhat earlier, that the manufacturing of *Tin-Plates*, or more properly of thin Plates of Iron *tinned* over, [which Foreigners term *White-Iron*] was brought to ſuch Perfection in *England*, (after having been long loſt or neglected) ſo that now very little of it was imported from foreign Parts: Our *own* being now made of a finer Gloſs or Coat than that made beyond Sea, the latter being hammered, and ours being drawn under a Rolling-Mill. This Improvement is a conſiderable Benefit to the Nation in the *general annual Balance of Trade*; there being a very great Quantity of this Manufacture conſumed in *Britain*, *Ireland*, and the *Plantations*, for many neceſſary and various Uſes. And although the Duty on foreign *Tinned-Plates* is hereby ſunk, yet the Employment given to our own Manufacturers thereof, and the Money kept at Home which was formerly paid for this Commodity from *Hamburgh*, greatly over-balances the Loſs of the Cuſtoms thereon. It was indeed long juſtly wondered at, That *England*, which had the beſt *Tin* in *Europe*, and in greateſt Quantity, and had Iron enough for the Purpoſe, ſhould have ſo long continued to pay ſuch great Sums to foreign Nations for what

Tinned Plates, or thin Plates of Iron tinned, now brought to Perfection in *England.*

we might long ſince have made of our own. The making of *Tinned-Plates* was one of the Projects named *Bubbles* of the Year 1720, (as elſewhere ſhewn.) And although nothing might then be ſeriouſly intended by it, but to pick the Pockets of the Credulous; yet ſome Perſons of Judgment ſoon after ſeriouſly attempted it with Succeſs.

The *Britiſh Whale Fiſhery* farther encouraged by Parliament.

By a *Britiſh* Statute of this 13th Year of the King (Cap. xxviii.) [*For continuing the ſeveral Laws therein mentioned, relating to the Premiums upon the Importation of Maſts, Yards, Bowſprits, Tar, Pitch, Turpentine, Sail-Cloth*, &c.] amongſt other Matters, " the Bounty of *twenty Shillings* " *per* Ton on Ships employed in the *Whale* Fiſhery was not only farther continued to the 25th of " *December* 1750, but alſo an additional Bounty of *ten Shillings per* Ton was granted on the ſaid " *Whale-Fiſhing Ships* to continue during our then War with *Spain* only: During which Time " alſo it was hereby enacted, That no Harponeer, Line-manager, Boat-ſteerer, or Seaman, in " that Fiſhery ſhould be impreſſed from the ſaid Service." Which Statute ſhews the Senſe the then Legiſlature had of the Benefits accruing to the Public by the *Whale* Fiſhery.

Regular *Poſts* for Letters attempted to be eſtabliſhed in *Turkey*.

The current Advices this Year from *Conſtantinople* brought, That the *Turks* had juſt begun to eſtabliſh regular *Poſts* for the Carriage of Letters throughout their Dominions, after the Manner of *Chriſtendom*; which they hoped would be very advantageous to their Commerce, and likewiſe to the *Sultan*'s Revenue, greatly impaired by their late Wars with the Emperor and with *Ruſſia*.

Great Britain's Trade to *Virginia* and *Maryland*, for Tobacco, employed at this Time 200 Sail of Ships.

In this ſame Year 1740, it appeared, by the Information of Perſons of Worth, concerned in the two *Britiſh* Tobacco Colonies of *Virginia* and *Maryland*, That about 200 *Britiſh* Ships were annually and conſtantly employed in that Trade, *viz.* about 80 or 90 Sail for *Virginia*, and about 110 to 120 for *Maryland*: That the Ships trading thither from the Out-ports of *Great Britain* were generally of a leſſer Burden than were thoſe from the Port of *London*: And that of about 30,000 Hogſheads of *Tobacco*, annually imported from thoſe two Colonies into *Great Britain*, 18,000 were brought Home in the *London* Ships. Alſo that this Computation was excluſive of the Veſſels employed by the ſaid two Colonies in their Trade with our other *Britiſh* Continent and Iſland Colonies of *America*.

A View of the mercantile Shipping and maritime Strength of *France*.

The anonymous Author of a Pamphlet, intitled, *The preſent State of the Revenues and Forces of* France *and* Spain, *compared with thoſe of* Great Britain, (Octavo, 1740) aſſerts, " That in *France* " there were not then more than 600 Sail of Merchant Ships at the moſt, of all Sizes. And " that, reckoning 25 Sailors to each, one with another, all the Seamen of *France* did not exceed " 30,000, including the 11,000 Seamen claſſed by the King, who have Leave to ſerve on board the " Merchant Ships, till wanted for the King's Service. And, that in Caſe of a naval War with *Britain*, *France* will be obliged to augment her Marine to what it was in their former War with *England*, *viz.* to 120 Ships of War and 40 Gallies." What this plauſible and ſpirited Writer computes, might then poſſibly be true; but we have ſince had recent Experience, that both their Merchant Ships and Sailors were conſiderably more in Number than he then computed them to be.

Gibraltar has a Patent for a Civil Government to be eſtabliſhed at it, though it has not as yet taken Effect.

In the ſame Year his *Britannic* Majeſty, by Letters-Patent, erected Civil and Criminal Courts of Juſtice at his Town and Port of *Gibraltar*. How far this Regulation has been put in Practice ſince this Time, or, if at all, how far it may, in Time, influence greater Numbers of *Britiſh* Subjects to ſettle there, we ſhall not venture preciſely to gueſs: But, if that ſhould come to be the Caſe, the Rents of Houſes would gradually Increaſe, and therewith Fines upon Entry,—Acknowlegements for landing of Goods, (as at *Leghorn* and other Free-ports)—Anchorage in the Bay,—Leaſes of Ground,—ſome moderate Taxes on Liquors and Proviſions conſumed there,—and ſuch other Benefits which might naturally be expected from a Civil Government's being there actually eſtabliſhed under the mild Laws and Privileges of a *Britiſh* Conſtitution; which might poſſibly, altogether, occaſion ſuch a Revenue to accrue to the Crown and Nation there, as might in Time eaſe the Public of more than 60,000 *l. per Annum*, which that moſt uſeful and important Fort and Port coſts the *Britiſh* Nation. Why our Expectations in theſe Reſpects have not been fully anſwered hitherto, lies properly before a higher Tribunal than we ſhall name, whoſe Intereſt is ſo nearly concerned therein, and whoſe Power as well as Inclinations, when proper Informations ſhall be laid before them, can undoubtedly rectify whatever ſhall be found to have hitherto been amiſs.

The *Toll* payable at *Staden* by all Ships ſailing up the *Elbe* is by King *George* II. of *Great Britain* intirely remitted to all *Britiſh* and *Iriſh* Ships.

In this ſame Year his Majeſty King *George* II. of *Great Britain*, and Sovereign of the Town of *Staden*, in the Dutchy of *Bremen*, was graciouſly pleaſed intirely to remit to all *Britiſh* and *Iriſh* Ships the *ancient Toll* payable at *Staden* by the Ships of all Nations in ſailing up the River *Elbe*. For which Bounty (as in Duty bound) his ſaid Majeſty received an humble Addreſs of Thanks from *the* Britiſh *Company of Merchants-Adventurers trading to* Hamburgh.

The Value of 100 *l. Sterling* in the nominal Paper-Currency of the *Britiſh* Continent Colonies of *America*.

The King of *Great Britain* having been addreſſed in the preceding Year by his Parliament, for regulating the Currency of the Paper-Money of his *American* Continent Colonies, we ſhall here exhibit the then preſent Value thereof as follows, *viz.*

New-England, [*i. e.* principally the *Maſſachuſet's Bay*] *Connecticut*, *Rhode-Iſland*, and *New-Hampſhire* - - - - - - - - - - - -	525 *l.* Currency *.	For 100 *l. Sterling* Money.
New-York - - - - - - - - - - - -	160	
The *Jerſeys* - - - - - - - - - - - -	160	
Penſylvania - - - - - - - - - - - -	170	
Maryland - - - - - - - - - - - -	200	
North-Carolina - - - - - - - - - - -	1,400	
South-Carolina - - - - - - - - - - -	800	

A. D. 1740

Paper Currency in our *American* Colonies explained.

⁂ In a Letter [on this Occaſion] from a Merchant at *Boſton* (in *New-England*) to a Friend in *England*, concerning the different Values of *Paper Currency* in the *Britiſh* Plantations, we have an Explanation hereof, *viz.* “ Upon the Continuance of a favourable Turn in the Trading Circum-
“ ſtances of the Province [of *New-England*] the Government might ſtop at any Rate which Sil-
“ ver ſhould fall to, and make that Rate the fixed Silver Pound, and make it a lawful Tender;
“ and the common Conſent or Acceptance of the People would complete the Scheme of *Silver*
“ Money. And thus the *Sterling Pound* is fixed [in *England*] to 3 Ounces 17 Penny-Weight
“ and 10 Grains of Silver of a certain Fineneſs, or Silver at 5 *s.* 2 *d. per* Ounce. But, if that
“ Kingdom were under *our* unhappy Circumſtances, *as not having a Sufficiency in Value of Silver*
“ *and all other Exports, to diſcharge the whole Demand in return for their*” [i. e. Great Britain's]
“ *Imports; it would then be next to a Miracle if Silver did not riſe to above* 5 s. 2 d. per *Ounce in the*
“ *Markets, in Proportion to the Balance of Debt againſt them:* And *their Trading Circumſtances con-*
“ *tinuing to decline,* (as *ours* have) *their Silver would be brought to* 27 *Shillings* per *Ounce (as ours is)*
“ *and the current Money of* Great Britain *be at the Rate of* 27 *Shillings* per *Ounce, whatever the law-*
“ *ful Money might be.* This is evident from the Succeſs of Queen *Anne*'s Proclamation, in the 3d
“ Year of her Reign, and the Act of Parliament ſubſequent upon it, deſigned to fix the Plantation
“ Pound to 2 Ounces 16 Penny Weights 16 Grains of Silver, of the Fineneſs of common *Pieces of*
“ *Eight* at 6 *s.* 10½ *d. per* Ounce. Which moſt certainly was well intended, but for the aforeſaid
“ Reaſons could not take Effect: And there is but one Plantation that I know of, *viz. Barbadoes,*
“ where common Silver is received by Weight, agreeable thereto: *Virginia* not ſo high, and all
“ the others got beyond that Standard, in very different Degrees.”

The vaſt Increaſe of the *French* Commerce to *Eaſt India*.

In the Month of *Auguſt* 1740, the Sale of the *French Eaſt-India* Company's Merchandize at *Port-l'Orient* amounted to *twenty-two Millions of Livres*, or about *one Million Sterling*; which ſufficiently demonſtrates the vaſt Increaſe of that Company's Commerce to *Eaſt-India*, in the Space of a few Years paſt.

Ships arrived at *Amſterdam*, *Anno* 1740.

☞ Ships entered *inward* at *Amſterdam* during the Year 1740, 1,645; which is 168 Ships fewer than in the Year 1738.

Burials at *Amſterdam*, *Anno* 1740.

At that City, in the ſaid Year 1740, there died 10,056 Perſons; being above 2,500 more than in the preceding Year.

Paris Chriſtenings and Burials. *Annis* 1739 and 1740.

					Average of Burials:

	In both Years - - - -			47,273	23,636½ in one Year.

Lord *Anſon*'s Expedition againſt *Spain*, into the *South-Seas*, and round the Globe, in near four Years Space.

Being ſtill at War with *Spain*, his Majeſty of *Great Britain* had ſent out, in this ſame Year 1740, an experienced Commander, Commodore *George Anſon*, Eſquire, [ſince a Peer of the Realm, and worthily placed at the Head of the Admiralty-Board] with one Ship of 60 Guns, two of 50 Guns each, one of 40, and one of 20 Guns, a Sloop and two Victualers, into the *South-Seas* of *America*, for the diſtreſſing of *Spain* as much as poſſible. It is true, this Expedition was rather a Matter of War than of commercial Hiſtory; yet, as it has ſome Relation to Commerce, and as it likewiſe ſhews *Spain*'s Feebleneſs in the *South-Sea* when at War with us, it ſeems needful, though very briefly, to relate its Succeſs. He failed from *Portſmouth* in *September* 1740, and in *May* 1741 he got round *Terra del Fuego* into the *South-Sea*, (after much Peril and Loſs by Storms.) In *September* 1741, he took a rich *Spaniſh* Prize; and, coaſting along *Chili*, in *November* the ſame Year, he took another *Spaniſh* Prize, laden with *Cloth* and *Iron*. Sailing to the Coaſt of *Peru*, he took, plundered, and burnt the Town of *Payta*, in the ſame Month and Year. Thence he ſailed to the Coaſt of *Mexico*, and oppoſite to the Harbour of *Acapulco*, he learnt that the *Manilla* Ship was not to ſail during that Seaſon; wherefore, in *May* 1742, he ſteered Weſtward for the Coaſt of *China*, where he arrived in *November* 1742, and he remained in the Road of *Macao* until *April* 1743, when he ſailed for the *Philippine Iſles*; where, in *June* 1743, he fought and maſtered an immenſely rich *Acapulco Ship*, bound for *Manilla*, with the Treaſure of which he ſailed Homeward, reaching the *Cape of Good Hope* in *March* 1744; and, on the 14th of *June* the ſame Year, he anchored at *Spithead* with only the *Centurion*, the above-mentioned 60 Gun Ship, all the reſt being loſt, or left as unable to proceed. This is the laſt *Britiſh* Circum-navigation of the terraqueous Globe, much to the Glory of the Nation, and to the greatly-merited Emolument of the noble Commander of it. We have in our general Index placed this Circum-navigation as the *ſixth* and *laſt* of that Sort; yet we are not unacquainted, that there were others beſides thoſe ſix made before, and ſome poſſibly ſince my Lord *Anſon*'s Voyage; but thoſe ſix being the moſt authentic, may ſuffice for our general Purpoſe.

South Carolina's great Increaſe of its Exports.

In this ſame Year 1740, the Province of *South-Carolina* exported 91,110 Barrels of *Rice*, 10,263 Barrels of *Pitch*, 2,374 Barrels of *Tar*, 562 Barrels of *Turpentine*, 432 Hogſheads of *Deer Skins*, beſide Cheſts and looſe ones, &c.

1741

An authentic Account of the Number of *Houſes* in the City of *London*, comprehended within the Bars; with Remarks hiſtorical and critical.

In the Year 1741, the late induſtrious and ingenious Mr. *John Smart*, of the Town Clerk's Office in *London*, publiſhed an accurate Account of the Number of *Houſes* in every Precinct of the twenty-five Wards within the Bars, or Limits of the Lord Mayor of *London*'s Juriſdiction, [the twenty-ſixth Ward, named *Bridge Ward without*, not having any Houſes reckoned therein] dedicated to and for the Uſe of the Deputies and Common Council-men of thoſe Wards, whereby he makes the whole Number of Houſes therein to amount but to 21,649. And, although in his ſaid Dedication to the *Common Council*, he deſires them to correct the Errors in his ſaid Ac-

count,

count, [which (ſays he, like a modeſt Man) I fear are many;] yet, as he was known to be an accurate Perſon, and that no one has animadverted on nor contradicted the ſaid Account, we may take it for granted, that it is a true one. How inaccurate then muſt the Writers of the former Part of the preceding Century have been, by magnifying the Number of Souls within the ſaid Juriſdiction beyond all poſſible Probability? More eſpecially when it is conſidered, that after the great Conflagration, *Anno* 1666, very many void Spaces were built up, as well as the Ground of ſpacious Houſes and Gardens of moſt of our Nobility, Gentry, *&c.* who formerly reſided within thoſe Limits, which have ſince been built up into narrow Streets, Allies, and Courts; whereby the Number of Houſes muſt, upon the whole, have been conſiderably increaſed ſince that fatal Period; even although, for the greater Ornament, we admit that ſeveral Streets ſince then have been made wider and more uniform than they were before the ſaid Year 1666. Of the Number of Perſons ſuppoſed to be contained in every Houſe, one with another, in the ſaid modern City of *London*, enough will be found in our Preface. The late great Increaſe indeed of Merchants and wholeſale Dealers in our own Time in that City, has obliged them to pull down Numbers of Houſes in different Parts of it, for erecting in their Room large Warehouſes with Cellars, which farther leſſens the Number of Houſes in that City.

The immenſe Increaſe of *Ireland*'s *Linen* Manufacture,

The immenſe Increaſe of the *Linen* Manufacture of the Kingdom of *Ireland*, at this Time, is almoſt aſtoniſhing, were there not ſo many undoubted living Teſtimonies of it; enough indeed to alarm all the foreign *Linen* Countries, and to give ſolid Pleaſure to all truly intelligent *Britons*; as whatever adds to the Wealth and Strength of the Kingdom of *Ireland* is a real Acceſſion of ſo much of both to the *Britiſh Empire!* In a Letter from *Ireland*, in this ſame Year 1741, we were told, That at the Acceſſion of King *William* the Third, *Anno* 1689, *Ireland* did not export to the Value of 6,000 *l.* in Linen; whereas (ſays the ſaid Letter-Writer) they now exported annually *an hundred Times* as much in Value, or 600,000 *l.*

foreſeen and foretold long before, by Sir *Wm. Temple.*

This great Improvement long before was foreſeen partly and foretold by Sir *William Temple*, in his *Miſcellanies*, (2d Edition, 1681.) "No Women" (ſays that great Man) "are apter to ſpin "*Linen* Thread well than the *Iriſh*; who, labouring little in any Kind with their Hands, have "their Fingers more ſupple and ſoft than other Women of the poor Condition amongſt *us!* And "this may *certainly* be advanced and improved into a *great Manufacture of Linen*, ſo as to beat "down the Trade both of *France* and *Holland*, and draw much of the Money which goes from "*England* to thoſe Parts upon this Occaſion into the Hands of his Majeſty's *Subjects of* Ireland, "*without croſſing any Intereſt of Trade in* England! For, beſide what has been ſaid of *Flax* and "*Spinning*, the Soil and Climate are proper for Whitening, both by the frequent Brooks, and "alſo of Winds in that Country."

A *Britiſh* Statute for enabling the *Ruſſia* Company to import *Raw-Silk*, &c. from *Perſia* thro' *Ruſſia*.

By the *Engliſh Ruſſia* Company's Charter, of the 1ſt and 2d of *Philip* and *Mary*, which was confirmed by a Statute of the 8th Year of Queen *Elizabeth*, they have the ſole Privilege of not only trading (from *London*) to the Dominions of *Ruſſia*, but likewiſe to the Countries of *Armenia-Major* and *Minor*, *Media*, *Hyrcania*, and *Perſia*, on the *Caſpian Sea*. An Attempt was accordingly made by that Company for trading into *Perſia* by the great River *Volga* and the *Caſpian Sea*, in the Year 1558, as related under that Year: But that Project was ſoon dropped, as being in thoſe early Times thought too hazardous; and it has remained in Suſpence ever ſince, until this Year 1741, when an Act of Parliament was obtained by that Company, *For opening a Trade to and from* Perſia *through* Ruſſia. For which End a Clauſe was inſerted in this Act, (14th of King *George* II. Cap. xxxvi.) *For opening a Trade to and from* Perſia *through* Ruſſia; whereby the *Act of Navigation* of the 12th of King *Charles* II. was ſo far diſpenſed with, which enjoins, *That no Merchandize ſhall be imported to* England *or* Ireland *but from the Place of their Growth, Production, or Manufacture, or from thoſe Parts where the ſaid Goods and Commodities could only be had, or were uſually or actually wont to be firſt ſhipped for Tranſportation.* And as *Raw-Silk* and other *Perſian* Commodities had not been uſually wont to be brought to *England* through *Ruſſia*, it was hereby enacted, That the ſaid *Raw-Silk*, &c. might nevertheleſs be ſo imported through *Ruſſia*, in *Britiſh* Ships, legally navigated, ſuch *Raw-Silk*, &c. being purchaſed by *Barter* with Woollen or other *Britiſh* Manufactures or Product exported to *Ruſſia*, upon paying the like Cuſtoms as the *Levant* Company now pays for the ſame brought from the *Levant*. This new Scheme was for ſome Time ſucceſsfully practiſed, conſiderable Quantities of *Raw-Silk* and other *Perſian* Merchandize, having been imported in this Way, as appears by a ſupplemental Statute, of the 23d of the ſaid King, *For permitting Raw-Silk, of the Growth or Produce of* Perſia *purchaſed in* Ruſſia, *to be imported into this Kingdom from any Port or Place belonging to the Empire of* Ruſſia. By which laſt-named Statute it was enacted, "That, from *Chriſtmas* 1750, all Freemen of the *Ruſſia* Company (and they only) "may import into this Kingdom from *Ruſſia*, in *Britiſh*-built Ships, navigated according to Law, "*Raw-Silk* of the Growth of *Perſia*, purchaſed by Barter with Woollen or other Manufactures, "*&c.* from *Great Britain* to *Ruſſia*, although the ſame be not carried from thence into *Perſia*, or "with the Produce ariſing from the Sale of ſuch Commodities, and not otherwiſe, atteſted "upon Oath, under the ſame Cuſtoms and Regulations, *&c.* as the *Turkey* Company are ſubject "to for *Raw-Silk* from *Perſia*:" Until the Wars and Deſolations rendered that Trade quite impracticable; as it remains ſo to the preſent Time. And it was ſaid to be a profitable Branch of Buſineſs to the *Ruſſia* Merchants.

Projects of *Banks*, &c. in *Britiſh America*, reſtrained by Law.

Whereas, at this Time, certain Projects and Schemes were publiſhed in the *Britiſh* Continent Colonies of *America*, *For ſupplying a Want or pretended Want of a Medium in Trade*, by ſetting up a *Bank* on *Land-Security:* The Stock of which *Bank*, to be raiſed by public Subſcriptions for large Sums of Money, whereof ſmall Sums were from Time to Time to be paid in by the particular Subſcribers, and to be managed by *Directors*, *Treaſurers*, and other Officers; and Dividends were to be made, as therein mentioned: And the ſaid Company of Subſcribers were to promiſe to receive the Bills which they ſhould iſſue as ſo much lawful Money in all Payments, Trade, and Buſineſs; and, after the Expiration of twenty Years, to pay the Poſſeſſors the Value thereof in Manufactures. And as ſundry other Schemes, Societies, Partnerſhips, or Companies, have been propoſed, and may be ſet on Foot in *America*, contrary to the true Intent and Meaning of a Statute of the 6th of King *George* the Firſt, (Cap. xvii.) *For better ſecuring certain Powers and Privileges intended to be granted by his Majeſty's two Charters, for Aſſurance of Ships and Merchandize at Sea*, &c. *And for reſtraining ſeveral extravagant and unwarrantable Practices therein mentioned and deſcribed; and for preventing the like for the future.* Whereby, "the preſuming to act as a Corporate Body,—or to make Transfers or Aſſignments of Shares, without legal Authority,—or "the pretending to act under any Charter, formerly granted from the Crown, for any particular "or ſpecial Purpoſes therein expreſſed, by Perſons endeavouring to make Uſe of ſuch Charter "for any ſuch other Purpoſe not thereby intended, and all acting under any ſuch obſolete Charter herein deſcribed,—ſhould be deemed to be public Nuiſances, and to be triable accordingly—as *per* the Statute of the 16th Year of King *Richard* II.——And whereas Doubts have "ariſen, whether that Act does extend to his Majeſty's Dominions in *America*"—it was now enacted, (14th of King *George* II. *For reſtraining and preventing ſeveral unwarrantable Schemes and Undertakings in his Majeſty's Colonies and Plantations in* America) "That the ſaid Act of the 6th "of King *George* the Firſt, and every Part thereof, ſhall extend to *Britiſh America*, and the "Contraveners ſhall be liable to the like Fines, Puniſhments, *&c.*—to be tried in the King's "Courts in *America*." This was a prudently intended Law: For, as our ſaid Colonies grow greater and more populous, Projects and Schemes might get into their Heads, which would prove very detrimental to the Induſtry and Parſimony neceſſary to ſuch Colonies.

The Welfare and Proſperity of *Great Britain* depending much on the giving all due Encouragement to Mariners to enter voluntarily into the King's Ships; an Act of this ſame 14th of King *George* II. (Cap. xxxviii.) was made, *For the Encouragement and Increaſe of Seamen, and for the better and ſpeedier Manning his Majeſty's Fleet.* "Whereby a Bounty of 5 *l.* over and above his "Wages, was granted to every *able Seaman*, and 3 *l.* to every *ordinary Seaman*; and the Widows "of ſuch as ſhall be killed in the King's Service ſhall receive one Year's Pay, as a Bounty. And "this Act ſhall extend to *Ireland*.——And whereas Sailors (taking Advantage of the preſent "War with *Spain*) have inſiſted on very extravagant Wages,—it was hereby enacted, That, for "one Year to come,—no *Seaman* in the *Merchants Service* ſhall be paid more than 35 Shillings "*per* Month."

A Law made for the farther Encouragement and Regulation of Sailors to ſerve in the *Britiſh Royal Navy*, and alſo in the *Merchants Service*.

The remote Weſt and North-weſt Parts of the Coaſts of *Great Britain* and *Ireland*, and the Iſles thereunto belonging, not being thought as yet to be in all Reſpects accurately laid down in the Sea-Charts, a Statute paſſed in this 14th Year of King *George* II. (Cap. xxxix.) *For ſurveying the chief Ports and Headlands on the Coaſts of* Great Britain *and* Ireland, *and the Iſlands and Plantations thereto belonging, in order to the more exact Determination of the* Longitude and Latitude *thereof.* Which Act reciting the Statute of the 12th of Queen *Anne*, *For providing a public Reward for ſuch Perſons as ſhall diſcover the* Longitude *at Sea*, which directs the Commiſſioners of the Navy to ſet apart 2,000 *l.* for making Experiments towards finding out the ſaid *Longitude*; "The Commiſſioners for diſcovering the *Longitude* are hereby empowered to apply ſuch Part of the ſaid "2,000 *l.* as has not already been laid out in Experiments, for the making ſuch Survey, and "determining the Longitude and Latitude of the ſaid chief Ports and Headlands." It is even ſtill to be apprehended, that ſome Parts on the *Britiſh* Shores, and more eſpecially thoſe of the Weſtern and North-weſtern Iſles of *England*, and on the Weſt Side of *Ireland*, require a more accurate Survey; but more than the whole Sum herein named would be required to execute that neceſſary Point to effectual Purpoſe.

Great Britain's and *Ireland*'s chief Weſt Coaſts, and Ports and Headlands directed by Law to be ſurveyed.

Remarks thereon.

Married in the Year 1741, at *Amſterdam*, 2,666 Couple of Perſons; Buried, in this Year 1741, at *Amſterdam*, 9,864 Perſons.

Died this Year at *Amſterdam*.

Arrived this Year at *Amſterdam* 1,813 Ships; as by the *Dutch* News-papers, *viz.*

As *England*, *Scotland*, *Ireland*, and *Flanders* are not herein named, the reſt muſt have come from thence, as being near Neighbours, and may very well be ſuppoſed to have amounted to 554 Ships or Veſſels of all Kinds. It is needleſs here to remark, how vaſt a Commerce muſt be carried on by this mighty City, and conſequently what immenſe Riches its Inhabitants muſt be poſſeſſed of!

The North-weſt Paſſage to *China*, &c. again fruitleſsly attempted, by Authority.

After twenty Years Silence concerning the formerly ſo much talked of, and wiſhed for, and ſo often fruitleſsly attempted *North-weſt* Paſſage to *China*, *Japan*, and *India*; an ingenious and knowing Gentleman of *Ireland*, *Arthur Dobbes*, Eſquire, [ſince Governor of *North-Carolina*] earneſtly applied to the Admiralty-Board for a new Attempt to be made for finding that ſuppoſed Paſſage, at the Government's Expence; urging the great Probability of finding it, by ſundry very plauſible Arguments. The King and his Miniſters being unwilling to diſcourage a Propoſal, which, if ſucceſsful, muſt probably be attended with great Advantages to the Nation, gave Directions to the Admiralty-Board (where Sir *Charles Wager*, an experienced Navigator, at this Time preſided) to ſend out two of the King's Ships on that Diſcovery, under the Direction of Captain *Chriſtopher Middleton*, who had been twenty Years a Commander in the *Hudſon's-Bay* Company's Service.

His Inſtructions from the Board of Admiralty (on a Suppoſition of finding a Paſſage) were in Subſtance as follows:

“ In Places where you meet with Inhabitants, make Purchaſes with their Conſent, and take “ Poſſeſſion of convenient Situations in the Country, in the Name of his Majeſty of *Great Britain*: But where there are no Inhabitants, you muſt take Poſſeſſion, by ſetting up of proper “ Inſcriptions, as firſt Diſcoverers and Poſſeſſors. If, in your Paſſage, you meet with any Ships “ trading to the weſtern Countries, eaſtward of *Japan*, or any *Japaneze* Ships, and you apprehend “ any Danger from them, either from their Force or Number, you are to proceed no farther on “ the Diſcovery, but immediately to return; that Ships of ſufficient Force may be ſent out next “ Seaſon, to begin a Trade or make a Settlement, without any Apprehenſion of Diſturbance from “ any powerful Nations on that Side, leſt any Accident ſhould prevent your Return, and diſcourage any farther Attempts to be made for the future. If you ſhould arrive at *California*, “ without any Apprehenſion of Danger, and chuſe to winter in 42 Degrees, (where *Caxton* is “ ſaid to have found a civilized Nation, and a good Harbour) or elſe more ſoutherly; then endeavour to meet Captain *Anſon*, in the Month of *December*, before the Arrival of the *Manilla*” [or *Acapulco*] “ Ship at *Cape St. Lucas*, the ſouthern Cape of *California*; and leave a Copy of “ your *Journal* with him, leſt any Accident ſhould happen to you upon your Return, and ſo the “ Diſcovery be loſt, and that it might prevent Ships being ſent out to your Relief in Caſe of “ Shipwreck.

“ Given under our Hands, the 20th of *May* 1741.

“ *Charles Wager*,
“ *Thomas Frankland*,
“ *Glenorchy*.”

☞ Theſe Inſtructions are printed in Captain *Middleton*'s Defence of his own Conduct, publiſhed *Anno* 1743.

He ſailed, in 1741, on the Diſcovery, and wintered in the vaſt Bay of *Hudſon*, at one of the Company's Forts at *Churchill-River*; and in the Summer of 1742, he ſailed again as far North as 66½ Degrees, and ſearched into an Inlet or River, Weſtward, which he named *Wager-River*, &c. and being now fully confirmed, that no ſuch Paſſage was to be found, he returned Home, that ſame Year, with the King's Ships.

This produced a great Deal of Altercation, in Print, between him and Mr. *Dobbes*, who was ſo eagerly bent on that Diſcovery: Captain *Middleton* inſiſting on the above Inlet's being merely a River above-named: Mr. *Dobbes* inſiſted, it was the Paſſage wiſhed for: [though he was never in thoſe Seas] Here the Captain had greatly the Advantage of him. Mr. *Dobbes* accuſed the latter of favouring the *Hudſon's-Bay* Company, who, as he alleged, had no Sort of Inclination to forward this Diſcovery, as believing it would be the Means of laying their Trade open, as they certainly have no legal excluſive Right by Act of Parliament, but merely by King *Charles* the Second's Charter.——He alſo alleged, that this Company ſell their Goods to the Savages in that Bay at 2000 *per Cent.* Profit: He is therefore for diſſolving the Company, and for laying the Trade open to all the King's Subjects.——He accuſes him (whom, however, he admits to be a capable Perſon) as well as the Company, of knowing and concealing the Paſſage.——That there are many Marks of ſuch a Paſſage; as, particularly, the Saltneſs of the Water, the Strength of Tides and Currents up *Wager-Streight*, [alias *River*] and the finding black Whales therein, and in the Opening called the *Welcome*, near it.——Yet Captain *Middleton* endeavours to account for this, by ſuppoſing ſome under-ground Paſſage for the Sea out of *Baffin's-Bay*, or *Davis's Streights*, &c. And here we muſt leave this dark Subject for the preſent.

The *Bank of England*'s Capital increaſed, and their Term excluſive, prolonged to the 1ſt of *Auguſt* 1765.

The old or original Capital of the *Bank of England*, of 1,600,000*l.* being at an Intereſt of 6 *per Cent.* till the 1ſt of *Auguſt* 1743, when alſo that Company's excluſive Privileges expire; and the natural Intereſt of Money being at this Time very low; the Government, availing itſelf thereof, made this Year a Contract with the *Bank*, and had it confirmed by an Act of Parliament, (of this 15th Year of King *George* the Second, Cap. xiii.) [*For eſtabliſhing an Agreement with the Governor and Company of the Bank of England, for advancing the Sum of* 1,600,000*l. towards the Supply for the Service of the Year* 1742] “ That the *Bank* ſhould advance the ſaid 1,600,000*l.* “ more, without any additional Intereſt whatever; *i. e.* by agreeing that both Sums, amounting “ to 3,200,000*l.* ſhould bear an Intereſt of only 3 *per Cent.* In conſideration of which Service “ to the Public, the *Bank*, by this Statute, had their Privileges of *excluſive Banking*, (of any “ Partnerſhip beyond *ſix* Perſons) till one Year's Notice, and Repayment of Principal and Arrears, after the 1ſt of *Auguſt* 1764.”——By this Act “ Perſons forging, counterfeiting, or “ altering of any *Bank Note*, *Bill of Exchange*, *Divided Warrant*, or any *Bond* or *Obligation* under “ that Company's Seal, or any *Indorſement* thereon, or knowingly uttering the ſame, ſhall ſuffer “ Death, without Benefit of Clergy.——Moreover, the Company's Servants breaking their Truſt “ to the Company *ſhall ſuffer Death* as a *Felon*, without Benefit of Clergy.”—It was alſo enacted,

Counterfeiting *Bank Notes*, *Bills of Exchange*, *Dividend Warrants*, or *Bonds* under the *Bank*'s Seal, or any *Indorſe-*

“ That

A. D. 1742

"That when, at a Court of Directors of the *Bank*, neither the Governor nor Deputy-Governor "ſhall attend in two Hours after the Time appointed for Buſineſs, then any thirteen or more of "the Directors may chuſe a Chairman for the Time, for the Diſpatch of Buſineſs; which Court "ſhall be as valid as if either the Governor or Deputy-Governor had duly attended.—Hereby "the *Bank* was authorized to take in Subſcriptions for advancing the ſaid 1,600,000 *l.*

ment thereon, is made Felony.

In the Abſence of their Governors, how the Court is to proceed.

In this ſame Year 1742, the *Britiſh* Parliament taking into their Conſideration, That the *Linen* Manufactures of *Great Britain* and *Ireland* were of late Years greatly improved; whereby the Prices as well of foreign as of home Fabric were conſiderably reduced, did, for extending of thoſe Advantages as much as is poſſible, by an Act of Parliament of the 15th and 16th of King *George* II. (Cap. xxix.) [*For granting to his Majeſty an additional Duty on foreign Cambricks imported into* Great Britain; *and for allowing thereout a Bounty upon certain Species of* Britiſh *and* Iriſh *Linen exported*] "lay an additional Duty on foreign Cambricks imported of 1 *s.* 5 *d.* for every "half Piece, and 2 *s.* 10 *d.* for every whole Piece. Out of which additional Duty there ſhall be "allowed a Bounty of *one Penny* for every Yard of *Britiſh* and *Iriſh* Linen, worth from ſix Pence "to twelve Pence *per* Yard in Value; and one Halfpenny *per* Yard for Linen under the Value "of ſix Pence *per* Yard exported."

An additional Duty on foreign Cambricks imported into *Great Britain*; out of which a Bounty to be paid on *Britiſh* and *Iriſh* Linen exported.

It has, for very many Years paſt, been judged of the laſt Conſequence, that the Trade and Navigation to and from the *Britiſh American Plantations*, ſhould be intirely confined and ſecured ſolely to *Britiſh*, *Iriſh*, and *American* Subjects: For which End it was, by a Statute of the 7th and 8th of King *William* III. and the 5th of Queen *Anne*, and now confirmed by an Act of Parliament of the 15th and 16th of King *George* II. Cap. xxxi. [*For farther regulating the Plantation-Trade*, &c.] enacted, "That all Ships trading from *Britain* and *Ireland*, and alſo all the Ships of our "*American* Plantations, ſhould be regiſtered, as *Britiſh*, *Iriſh*, or *Plantation built*, or elſe Prize-"Ships made *free*: And a Certificate of ſuch Regiſter was to be always ready in the Maſter's "Hands: Many Frauds had nevertheleſs been diſcovered in this Reſpect, Certificates of ſuch "Regiſters having been frequently ſold to Foreigners, whoſe Ships, under Colour thereof, have "been admitted to trade to and from the *Britiſh* Plantations, contrary to thoſe former Laws. For "Prevention whereof, the laſt above-named Statute obliged the Maſter of every Ship arriving "in *America* to take an Oath of all the Qualifications neceſſary for aſcertaining of ſuch Ship to "be a qualified one for trading thither, and to be abſolutely and ſolely the Property of his Ma-"jeſty's *Britiſh*, *Iriſh*, or *American* Subjects."

Foreign-built Ships farther prevented from trading or ſailing to the *Britiſh American* Plantations.

In this Year 1742, ſome *Ruſſian* Adventurers from *Tartary*, for the Diſcovery of *America*, having now, as well as in ſome former Years, diſcovered the Coaſts of *America*, of which they actually had ſight, and particularly of *California*, had it ſeems ſailed 12½ Degrees North of that Country, where on Voyager had been before. From thoſe Diſcoveries of the *Ruſſians*, it may be concluded, [ſays Dr. *Buſching*, in the firſt Volume of his very valuable Geography of *Europe*, (p. 524.) *Engliſh* Tranſlation] That *Aſia* and *America*, about the 66th Degree of North Latitude, are ſeparated from each other only by a very narrow Channel.

America diſcovered from *Ruſſia*.

At the City of *Dublin*, in this Year 1742, there were Chriſtened - - ---- 1,357 Children.

Buried - - - - - - ---- 2,320 Perſons.

Which laſt Number multiplied by - - - - - - - - - - - 33

Gives the probable Number of Souls in *Dublin* to be - - - - - - 76,560

Dublin's Bill of Mortality.

Provided the numerous Papiſts of that City, and all the Proteſtant Diſſenters, do duly regiſter their Burials, which is at leaſt doubtful.

At *Amſterdam* there arrived in the Year 1742, 1,591 Ships.

Ships arrived *Anno* 1742, at *Amſterdam*.

1743 Although the Controverſy from the Preſs between Mr. *Dobbes* and Captain *Middleton*, concerning the Paſſage through *Hudſon's-Bay* weſtward to *China*, &c. and the Nature of the *Hudſon's-Bay* Company's Trade with the Savages of that Bay, be too prolix to be totally tranſcribed into this Work; yet there were ſundry Branches thereof thereby brought to Light, which are well worth recording in this Work.

More Anecdotes concerning the *Hudſon's Bay* Company and Trade.

The *Captain*, in his farther Vindication, printed *Anno* 1743, obſerves, "That, until a little "above twenty Years before, the Voyage to *Hudſon's-Bay* was ſeldom made without wintering "there." Which ſhews, that the Company has thereby made a conſiderable Improvement therein, and a conſiderable Saving muſt needs be made by not wintering at their Forts on ſo inhoſpitable a Shore.

A new Improvement in that Trade.

Mr. *Dobbes* has taken the Pains to give the Public the intire Sale of all that Company's Returns, *Anno* 1743, *viz.*

The *Hudſon's Bay*'s Returns and Sales in the Year 1743.

A critical and political Enquiry into the Juſtice and Expediency of laying the *Hudſon's Bay* Trade intirely open at preſent; and into the Feaſibility and Conſequences of a ſuppoſed Paſſage weſtward.

Upon this State of this little Company's Sales we may obſerve, That if their Capital Stock be but about 100,000 *l.* and that thereon they had not for many Years divided more than 10 *per Cent.* on that Capital annually, and if this Year's Sale be any Rule to determine for other Years, it will follow, That the Company's annual Expence for Shipping, Forts, Garriſons, Salaries, and Home Expence, may be about 20,000 *l.* So that although Mr. *Dobbes* has ſpared no Pains to be Maſter of this Subject, yet after all, conſidering the Riſques the Company conſtantly runs, their Gains are little to be envied. Captain *Middleton* tells us, That the Company has in all 120 Perſons, Officers, Soldiers, and Servants, in their four Forts in *Hudſon's-Bay*; which Forts are abſolutely requiſite for their People's preparing Cargoes during Winter, for the enſuing Summer, againſt the Arrival of their Ships, as well as to protect their People from the Attempts of the Savages and of wild Beaſts. So that, if the Company ſhould be diſſolved, as Mr. *Dobbes* propoſes, and the Trade laid open, thoſe Forts muſt be kept up by a Rate or Tax on the private Traders; and undoubtedly the Company muſt, in ſuch a Caſe, have a reaſonable Compenſation for them: And as the Company, through the Means of the ſaid Forts,—by their long Experience of the Trade, and by ſome Sort of Correſpondence with the Savages, has raiſed and carried on a very beneficial Commerce to the Nation for many Years; they might probably and perhaps reaſonably hope for a farther Compenſation on that Account likewiſe. All Things therefore being duly weighed, it may ſeem doubtful, whether it would be more eligible to diſſolve the Company, in Expectation (as Mr. *Dobbes* believes) of extending the Trade much farther when laid open, or to ſuffer this Branch of our Commerce to go on in its preſent Channel; unleſs the ſo much deſired Paſſage weſtward to the *Aſiatic* World could be found practicable; in which Caſe, indeed, there may be found good Reaſons for the taking thoſe Forts into national Management, and for erecting others in or near that ſuppoſed Paſſage: Concerning which Paſſage not only Mr. *Dobbes*, but even Captain *Middleton*, and others alſo, later than him, have deſcribed ſundry very plauſible Symptoms of a Paſſage weſtward to, or Communication with, the Sea of *Japan*. Yet, on the other Hand, even ſuppoſing that Communication to be certain, it may happen to be impracticable for Shipping, either through its frozen Situation, (like *Weygatz* Streights) or from its being blocked up by Rocks and ſmall Iſlands; or, laſtly, it may be found too hazardous and impracticable to guard and keep the ſaid Paſſage intirely to *ourſelves* alone, for Reaſons obvious enough. Should our Nation be the Diſcoverers of ſuch a practicable Paſſage weſtward, it would, doubtleſs, open ſundry new and very unuſual Scenes and Opportunities commercial, and would give *us* great Advantages over other Nations, not only in ſhortening the Voyage to *Japan* and *China*, and even to *India*, properly ſo called, and to the adjacent Iſles; but likewiſe in opening a Commerce to *us* with the whole weſt Side of *North-America*, without Rivals, where Mines of the richer Metals are known to abound near and at *New-Mexica*, *California*, &c. More fine-ſpun Speculations of this kind would rather amuſe than inform, and therefore we ſhall leave them, and come again to more practicable Matter.

A Catalogue of *Britiſh* Merchandize uſually exported to *Hudſon's Bay*, and the Manner of their Valuation.

Mr. *Dobbes* has given us a Catalogue of *Britiſh Manufactures*, &c. which the *Hudſon's-Bay* Company exchanges with the Savages in that Bay: It ſeems that one *Beaver*'s *Skin* is in that Country the *Standard Medium* of the whole Trade. For Inſtance,

For every Pound Weight of Braſs Kettles	one *Beaver.*
For 1½ lb. of Gunpowder	one *Beaver.*
—— 5 lb. of Lead Shot	one Ditto.
—— 6 lb. of *Braſil* Tobacco	one Ditto.
—— 1 Yard of Bays	one Ditto.
—— 2 Combs	one Ditto.
—— 2 Yards of Gartering	one Ditto.
—— 1 Pair of Breeches	one Ditto.
—— 1 Piſtol	one Ditto.
—— 2 Hatchets	one Ditto, *&c.*

A.D. 1743

The other Skins and Goods of the Savages are, doubtleſs, valued alſo by this *Standard* of a *Beaver Skin*, although he has not ſhewn the Proportions thereof.

Other Goods uſually carried thither are, Glaſs-beads, Black-lead, Sugar, Thread, Vermillion, Brandy, Broad Cloth, Blankets, Duffles, Flannel, Awl-blades, Buttons, Fiſh-hooks, Fire-ſteels, Files, Guns, Flints, Yarn, Mittins, Handkerchiefs, Hats, Hawks-bells, Knives, Ice-Chizels, Looking-Glaſſes, Needles, Net-Lines, Rings for the Fingers, Runlets, Sword-blades, Spoons, Shirts, Shoes, Stockings, Saſhes, Worſted, Thimbles, Tobacco-boxes, Tongs, Trunks, Twine, *&c.* Which ſhews, in ſome Meaſure, that Mr. *Dobbes*'s Opinion may be right, That the enlarging of this Trade, by extending it farther into the vaſt in-land Countries (ſouthward and ſouth-eaſt from the *Bay)* might prove a national Advantage. Yet, whether thoſe Countries be ſo fertile and ſo well inhabited as he alleges, is at leaſt doubtful, until we can gain more certain Intelligence thereof.

		£.	s.	d.
There was exported by the *Hudſon's-Bay* Company, in Value, *Anno* 1737	----	4,124	18	2
—— —— *Anno* 1738	----	3,879	17	11

Thus this Diſpute between Mr. *Dobbes* and Captain *Middleton* has brought to light more Particulars for illuſtrating this Trade, than either the Company would, probably, have readily done, or the Public could have otherwiſe expected.

An Account of the *Peltry* imported from *Canada* into *France*, *Anno* 1743.

Mr. *Dobbes* has moreover given us alſo a Catalogue of the *Peltry* imported from *Canada* or *New-France*, into the Port of *Rochel*, for the Year 1743, *viz.*

127,080	Beaver Skins.
16,512	Bears ditto.
110,000	Raccoons.
30,325	Martens.
12,428	Otters and Fiſhers.
1,700	Minks.
1,220	Fine Cats.
1,267	Wolves.
92	Woolverines.
10,280	Grey Foxes and Cats.
451	Red Foxes.

311,355 Skins. In all, worth about 120,000*l. Sterling*, according to the before-named Valuation of the *Hudſon's-Bay* Peltry. But whether our being now in Poſſeſſion of *Canada* may not lower the Value of thoſe Furs and Peltry, we muſt leave to farther Experience.

Farther Accounts by Mr. *Dobbes* of Improvements to be made in the Countries weſt and ſouth of *Hudſon's Bay*; and of the Probability of a *North-weſt Paſſage.*

Both Mr. *Dobbes* and Captain *Middleton* admit, that there is a good Copper-Mine on the weſt Side of *Hudſon's-Bay*, not far from the Coaſt, which might, probably, be brought to good Account, were a Fort built near it. It is on that Weſt Side where the Company's chief Forts and Trade are leſs in Danger of being annoyed by the *French* Forts, (North of *Canada*, and which were much too near *ours* on the ſouth Side of *Hudſon's-Bay)* ſuch as our beſt and ſtrongeſt Fort, named the *Prince of Wales's Fort*; from whence, *Anno* 1742, the Company got 20,000 Beavers Skins;—that on *Churchill* River;—another, named *York Fort*, on *Nelſon*'s River, (anciently called on our Maps, *Port-Nelſon*;)—another on *New-Severn* River;—one on *Albany* River;—and one one *Mooſe* River, at the very *Southern* Bottom of the Bay; where they keep themſelves cloſe both *Summer* and *Winter* for the moſt Part, having no Country Plantations, and with only a *Kitchen-Garden*, under the Walls of their Forts, wherein they raiſe a few Herbs and Greens. Whereas (ſays Mr. *Dobbes)* would the Company ſettle and build Forts higher up from the Sea, on the Weſt and South Sides of the Bay, where the Froſts and Cold are not near ſo intenſe, and where they will find a rich Country, well wooded, with all Manner of Plants, Herbs, *&c.* with Plenty of Graſs, Rivers and Lakes; or rather, were the Trade laid open, and thoſe fine in-land Countries upon *Rupert*'s, *Mooſe*, *Albany*, and *Nelſon* Rivers, ſettled by our People, *we* might regain the whole Trade from the *French*, and ſupply the Natives with *Woollen* and *Iron* Wares, *&c.* which (he ſays) the Company do not do; but, inſtead thereof, by their exorbitant Rates, do enable the *French* from *Canada* to underſell them.—He adds, (with reſpect to this Company) That eight or nine private Merchants do ingroſs nine-tenth Parts of the Company's Capital Stock, whereby they are *perpetual Directors.*——Mr. *Dobbes*, for the greater Corroboration of his Opinion of the Probability of a Paſſage out of *Hudſon's-Bay* into the *South-Seas*, gives us an Abſtract of *De Fonté*, the Vice-Admiral of *Peru*'s, Voyage from *Lima* Northward, on the Weſt Side of *North-America*, as far as the *Tartarian* Seas in 77 Degrees of North Latitude, in the Year 1640, by Order of the King of *Spain*, who had Advice of freſh Attempts, *Anno* 1639, for a *North-weſt Paſſage* by certain Navigators from *New-England*; and that the ſaid *Spaniſh* Admiral had found in thoſe Seas a Ship from *Boſton* in *New-England*, commanded by one Captain *Shaply*, who was told by that Admiral, That his Inſtructions were to make Prize of any People ſeeking a North-weſt Paſſage into the *South-Sea*; but that, nevertheleſs, he would look upon them as Merchants trading with the Natives for *Beavers*, &c. and ſo diſmiſſed him generouſly.——Which Account Mr. *Dobbes thinks has all the Appearance of being authentic*, although it is plain, there are ſundry very improbable Circumſtances therein; particularly that Admiral's aſſerting, at the Concluſion of his Journal, That he found there was no Paſſage into that Sea by what is called the *North-weſt Paſſage*, after he had related his finding the *New-England* Ship in the ſaid *Tartarian* Sea; which Circumſtance, however, Mr. *Dobbes* has laboured to clear up. He thinks, that *Boſton* Ship might have paſſed into the *Tartarian* Sea through ſome of the Openings near *Whale-Cove*, in trading for Furs, and might have been afterward loſt, or elſe ſurprized by the *Eſquimeaux* Savages,

Savages, upon her Return Home; ſeeing no Account of this Voyage was ever tranſmitted from *Boſton*: And that upon Sir *Charles Wager*'s making Inquiry, whether any of the Name of *Shaply* had lived at that Time in *Boſton*, it did appear from certain Writings, that ſome of that Name had then lived at *Boſton*; which (ſays Mr. *Dobbes*) adds to the Weight of *De Fonté*'s Account, and confirms its being an authentic Journal!

The annual Revenue of *France*, on a Medium of ſix Years; and the Number of her Land and Sea Forces in this Year 1743.

The following Extracts from a well-written Octavo Pamphlet, intitled, *An Account of the Numbers of Men able to bear Arms in* France, *taken by the* French *King's Order*, Anno 1743; *alſo of his Revenues and Expence*, Annis 1741, 1742, *and* 1743; Printed at *London* in the Year 1744, about a Month before *our* declaring War againſt *France*; may be hereafter uſeful in ſeveral Reſpects, *viz.*

1. In the laſt Years of King *Louis* XIII. [*Anno* 1642.] Cardinal *Richlieu* raiſed in *Revenue* the Sum of 124,429,000 Livres. But the preſent Crown of 6 Livres conſiſted then of only 3 Livres.

	Livres.
2. The Comptroler-General *Deſmaret*'s Memoirs of the Finances of *France*, at the Death of *Louis* XIV. at the Medium of ſeven preceding Years, was, *per Annum* - - - - - - - - - - -	219,028,000.
3. *Anno* 1734, there was raiſed - - - - - - - - - - - -	254,968,000.
4. *Anno* 1740, there was raiſed - - - - - - - - - - - -	204,881,000.
5. *Anno* 1741, there was raiſed - - - - - - - - - - - [*France*'s Expences exceeding this Sum by 20 Millions.]	243,503,000.
6. *Anno* 1742, there was raiſed [partly to diſcharge the ſaid 20 Millions and other Debts.] - - - - - - - - - - - - - -	305,924,000.
7. *Anno* 1743, there was raiſed - - - - - - - - - - - -	232,000,000.
	1,460,304,000

Medium of ſix Years is 243,384,000 Livres, [or near *eleven* Millions Sterling.]

[☞ The judicious Reader wants not to be told, That the *Revenue* of arbitrary Governments is but another Word for all that they thought fit to raiſe in ſuch reſpective Times on their People!]

1. Land-Forces of *France*, in *May* 1743, *viz.*

Regular Troops, Horſe and Dragoons - - - - - -	37,164.
Foot - - - - - - - - - - - - - -	182,600.
Total regular Forces - - - - - - - - - - -	219,764.
Militia - - - - - - - - - -	75,000.
Invalids - - - - - - - - - -	9,296.
Total Land-Forces - - - - - - - - - - - -	304,060.

2. And *France*'s Seamen of all Sorts, *viz.*
Mariners, Bombardiers, and Marines, were, in this ſame Year 1743, 42,440 Men.

Another new Pariſh erected on the North-eaſtern Suburbs of *London*.

The Suburbs of *London* ſtill increaſing on every Side, and particularly on the Side of the Hamlet of *Bethnal Green*, which at this Time was increaſed to about 1,800 Houſes, and computed to have more than 15,000 Inhabitants, which is above eight Perſons to each Houſe, [by Reaſon they are moſtly Manufacturers, and the meaner Sort of working People, many Lodgers or Inmates often crowding into one Houſe;] an Act of Parliament was paſſed in this 16th Year of King *George* II. (Cap. xxviii.) *To make that Hamlet a ſeparate and diſtinct Pariſh from that of St.* Dunſtan's, Stepney; *and for erecting a Pariſh-Church therein.* Since known by the Name of *St. Matthew*, *Bethnal Green.*

Mortality Bill for *Dublin*.

Buried, during the Year 1743, at *Dublin*,	2,193 Perſons.	Multiplied by 30 is - -	65,790
Chriſtened, ——— ——— —————	1,517	by 33 is more	6,579
By this Rule, the Perſons in *Dublin* were - - - - - - - -			72,369

We are obliged to wiſh, we could depend on thoſe Mortality Bills.

The *Engliſh Eaſt-India* Company's excluſive Trade prolonged to 1780, and three Years longer, on their lending one Million to the Public, at 3 *per Cent.* Intereſt.

The *Engliſh Eaſt-India* Company being inclinable to have an Enlargement for fourteen Years longer of their preſent excluſive Trade and Privileges, they, in Conſideration thereof, agreed to advance one Million of Money for the public Exigency, for the Year 1744, at 3 *per Cent.* Intereſt. Which was accordingly confirmed by an Act of Parliament of the 17th of King *George* II. (Cap. xvii.) *For granting to his Majeſty the Surplus or Remainder of the Monies ariſen or to ariſe by the Duties on Spirituous Liquors, granted*, &c. to commence from *Michaelmas* 1744. The ſaid Company being for this End, hereby enabled to borrow Money on their Common-Seal, by creating a Million of new Bonds, at 3 *per Cent.* Intereſt. So that the intire Debt thenceforth due by the Public to this Company was 4,200,000 *l.* hereby declared to be redeemable, upon one Year's Notice after *Lady-day* 1745, by Payments of not leſs than 500,000 *l.* at any one Time. Yet, notwithſtanding ſuch Redemption, this Company ſhall continue to enjoy their *excluſive* Commerce to *Eaſt-India*, not only for the Term granted by former Laws, but, in conſideration of this Loan to the Public, they ſhall have an Addition of fourteen Years to their preſent excluſive Term, which will therefore hereby extend to three Years Notice to be given by Parliament after *Lady-day* 1780: And at the Expiration of the ſaid three Years, and Re-payment of the above 4,200,000 *l.* and

A. D. 1744

and all Arrears of Intereſt, then their Title to an excluſive Trade ſhall ceaſe and determine.—— Yet, after the ſaid Determination, the Company ſhall continue to have a common Right with other Subjects in and to the Trade to *India*.

Thus the preſent Condition of the *Eaſt-India* Company is as follows, *viz.*
Due to them in their Corporate Capacity 3,200,000 *l.* at 4 *per Cent.* being 128,000 *per Annum.*
And 1,000,000 *l.* at 3 *per Cent.* being 30,000 *l.* *per Annum.*

Rattan Weſt-India Iſle planted and fortified by *Great Britain*, though afterward given up by the general Peace.

In our War with *Spain* we happened (about two Years and an half before this Time) to ſeize on and maſter the Iſle of *Rattan*, in the *Weſt-Indian* Seas, near the Bay of *Honduras*, belonging to that Kingdom; and, in this Year 1744, the *Britiſh* Parliament made an Eſtimate and Proviſion for the Expence of a Garriſon, Fortifications, Stores, &c. for it: It being then thought extremely well ſituated for a Trade between *Jamaica* and the *Spaniſh Main*. Yet, ſoon after, on a general Peace, it was again relinquiſhed to *Spain*.

In certain Extracts from a *French* Treatiſe, *Of Maritime Affairs, or a Compariſon between the Commerce and Naval Power of* England *and* France, *with a View to ſome Paradoxes*, by Monſieur *Deſlandes*; addreſſed to the Earl of *Winchelſea*, by Mr. *Horſley*; we have the following Memoirs.

A Compariſon between the Revenues of *France* and *England*, (according to Mr. *Horſley*.)

"The annual Revenues of *France*, ordinary and extraordinary, by the Account of their own *Fi-* "*nanciers*, (including *Lorrain*) do not amount to clear *ſix* Millions *Sterling*; which is not equal "to the natural Revenue of *England* alone. They have out of this,

	£.
"1. To pay the Intereſt of *ſeventy-five* Millions *Sterling*, remaining Debt," [*one hundred* Millions more being cancelled by *Louis* XIV. and the Duke of *Orleans*, Regent] "which, at 6 *per Cent.* is	4,500,000
"2. The King's Houſhold, and Penſions to the Princes of the Blood, &c.	1,000,000
"3. To the Pay of 200,000 Land-Forces, at 1 *s.* *per* Day, including Officers, &c.	3,650,000
"4. Garriſons, Stores, &c.	1,500,000
"5. For the regiſtered Militia	500,000
"6. To 40,000 Seamen, &c.	1,500,000
"7. Intendants, Port-Charges, Building and Repairs of Ships, &c.	200,000
"8. Ambaſſadors, Subſidies to foreign Princes, Spies, &c.	2,000,000
"Total annual Expence	14,850,000
"*France*'s clear Revenue," [according to this Author]	6,000,000
"Annual Debt created by *France*	8,850,000

On the other Hand, the before-named Author preſents us with the annual Expences of *Great Britain*, *viz.*

	£.
"1. The Intereſt of our" [then] "public Debts	2,000,000
"2. 40,000 Seamen, including Stores, &c.	2,080,000
"3. 40,000 Land-Forces, and Contingencies	1,200,000
"4. Ordinary of the Navy	120,000
"5. Guards and Garriſons	500,000
"6. Subſidies and Extra-Charges	600,000
"7. Civil-Liſt	800,000
"Total annual Expence of *Great Britain*	7,300,000

Britiſh Turkey Company's Trade, an unſucceſsful Attempt to lay it open:

With that Company's Reaſons againſt the laying it open.

The *French* having (as formerly noted) conſiderably gained upon *England* in their Trade to the Ports in the *Levant* Seas, not merely by the greater Nearneſs of the Voyage thither from *Marſeilles* than from the Port of *London*, but likewiſe by their judiciouſly ſtudying the manufacturing of ſuch Kinds of ſlight though fine-looking Woollen Cloths as may beſt ſuit their Climate; which they can afford to ſell at a cheaper Rate than that of our more ſubſtantial and really finer Drapery; beſide their ſupplying the *Turks* alſo cheaper than we can with great Quantities of Sugar, Indico, &c. It was at this Time much canvaſſed without Doors, in Converſation, Pamphlets, and News-Papers, whether the ſhorteſt Way for *England*'s regaining the Aſcendant in that very important Branch of Commerce, would not be to lay the *Turkey* Trade intirely open to *all Britiſh* Subjects. This went ſo far with many, that a Bill was brought into Parliament, *For enlarging and regulating the Trade to the* Levant *Seas*; hoping, that by the Number of Traders, in an open Trade, they ſhould be able to underſell the *French*, and recover the Ground which they had gradually loſt. But our *Turkey* or *Levant* Company being heard at the Bar of the Houſe, gave thereby, and by their printed Caſe, ſuch convincing Reaſons againſt the Bill, that it was at length dropped. The Company readily admitted that their Trade was much decayed; but they alleged in Subſtance the following genuine Grounds of and for that Declenſion, *viz.*

The genuine Cauſes of the Decay of *England's Turky* Trade enquired into.

"That during the moſt flouriſhing Periods of their Trade, it was principally carried on with "a coarſe Kind of Cloth, made intirely of *Engliſh* Wool, in which no other Nation could vie with "them. But the *French*, after the Treaty of the *Pyrenees*, enjoying a long Courſe of Proſperity, "turned their Views very much to foreign Commerce, and particularly to that of the *Levant*, "which the great *Colbert* puſhed forward at a vaſt public Expence; until, at length, the Cloth "Manufacture of *Languedoc*, *made of two-thirds* Spaniſh *Wool and one-third of the Wool of that* "*Province*, could be afforded at ſo low a Price in *Turkey* as the *Engliſh* could afford to ſell a "coarſer Cloth, made all of their own Wool, not worth above nine Pence *per* Pound Weight. That this Superiority of the Material, and alſo that of the finer Spinning, made a more ſhowey Cloth; which, though ſlighter, found its Vent in a warmer Climate.—That, moreover, the *French* make Cloths of all *Spaniſh* Wool, for the *Turkey* Markets, which they ſell cheaper than ours, although ours be more ſubſtantial. And although there are *Engliſh* Cloths made of a Mixture of *Engliſh* and *Spaniſh* Wool, yet the *French* Cloth of that Sort happens to be much cheaper. That the *French*, by this acquired Advantage of *Spaniſh Wool*, have got the better of the before-named natural one which we long enjoyed; and that our Clothiers are not able to make ſuch a Cloth to ſuit the *Turks*, ſo cheap as the *French* can and do afford theirs before-mentioned.—That, moreover, the *French* have increaſed their Trade to *Turkey* by carrying thither *Indico* and *Coffee* in great Quantities, which we have not, as alſo *Sugar*, which they ſell much cheaper than we can do!——The Wars of the great *Peter*, Czar of *Ruſſia*, againſt *Perſia*, having obſtructed the bringing of *Sherbaff Silk*, from the Province of *Ghilaun*, through *Turkey*, the *Engliſh* before that Period uſually bought at *Aleppo* and *Smyrna* at leaſt *one Thouſand Bales* one Year with another, worth about 100 *l.* each Bale; and chiefly in Barter againſt *our* Cloth; a great Part whereof the *Silk Merchants* carried back into *Perſia*, ſo that little or no *Silk* comes now that Way; and indeed it is now permitted to be brought through *Ruſſia*, as is alſo *Rhubarb* (once a good Article of Return, but now become a Monopoly in the Hands of that Court.) And that, although that Province has been reſtored to *Perſia*, yet the Wars that have ſince been in thoſe Provinces have ſo interrupted the Commerce, that it is now much diverted into the other before-named Channel through *Ruſſia*.——That there is a Decreaſe, of One-half at leaſt, in the Conſumption of ſundry Drugs, as well as in *Gauls*, *Goats-wool*, and *Mohair-Yarn*, occaſioned by the Change of Faſhions.——That the great Increaſe of *Italian* and *Spaniſh Raw-Silk* alſo leſſens the Vent for *Turkey Raw-Silk*; although thoſe *Silks* are bought with ready Money; whereas the *Turkey Raw-Silk* is taken in Return for the *Britiſh* Manufactures ſold there!——That the Company, confiding in the *Royal Charters* and *Privileges*, have conſtantly carried on a very conſiderable Commerce to *Turkey*, whither they annually export large Quantities of Woollen and other Manufactures, *&c.* and bring back great Quantities of *Raw-Silk*, *Mohair-Yarn*, &c. for the Uſe of our Home Manufactures: And are at a very great Expence in ſupporting the Charge of an Ambaſſador at *Conſtantinople*, and of Conſuls in other Parts of *Turkey*; as alſo in obtaining and renewing the needful Capitulations with the *Ottoman Port*, and alſo in making conſiderable Settlements at *Conſtantinople*, *Aleppo*, *Smyrna*, &c. And that they apprehend this Bill will deprive them of thoſe Privileges ſo dearly purchaſed; if it does not likewiſe occaſion the total Loſs of the Trade."

It ſeems the *Jews* were very active in promoting of this Bill, which afforded the Company and their Friends within Doors an Occaſion to explain to the Parliament and People how probable it was, that *they* would (by being admitted, as was by many intended, into this Trade when laid open) engroſs the intire *Levant* Trade, in Conjunction with their own People in *Turkey*, who are the Agents for the great Men there, and the general Brokers for Merchants; and who, by Combination amongſt themſelves, very much govern the Sale of Merchandize. For which, and other Reaſons before-named, it was judged fit to drop this Bill. This brief Account will let Gentlemen and others who were before ignorant of the Nature of this Trade, in a great Meaſure into at leaſt a general Idea of it; which indeed is as much as Perſons unacquainted with the Practice of that particular Branch of Commerce can reaſonably deſire to know.

A ſummary View of the Stock, Profits, and Funds of the *Bank of England.*

We ſhall cloſe this Year 1744, with a ſummary View of the then State of the *Stock* and *Funds* of the *Bank of England*, viz.

	£.
1. The original Capital doubled, and reduced to 3 *per Cent.* Intereſt, is - - -	3,200,000
2. For cancelling of Exchequer Bills (3*tio Geo. Primi.* (at 4 *per Cent.*) - - -	500,000
3. Purchaſed, *Anno* 1722, of the *South-Sea* Company (at 4 *per Cent.*) - - -	4,000,000
4. Annuities charged on the Surplus of the Funds of Lottery 1714 (at 4 *per Cent.*)	1,250,000
5. Annuities (at 4 *per Cent.*) charged on the Duty on Coals ſince *Lady-day* 1710 -	1,750,000
Total *Bank* Capital - - - - - - - - - - - - - - -	10,700,000

Beſide the ſeveral 3 *per Cent.* Lottery Annuities, transferrable at the *Bank*, *i. e.* of the Year 1731, being 800,000 *l.*—of the Year 1742, being alſo 800,000 *l.*—of the Year 1743, being 1,800,000 *l.*—and the like Sum of the Year 1744, or 1,800,000 *l.* All which four laſt-named Sums are quite ſeparate and diſtinct from what is known by the Name of the *Capital Stock* of the *Bank* aforeſaid, the ſaid four Sums being intitled to their reſpective Annuities alone, without any other Profit whatever; whereas the ſaid *Capital Stock* of 10,700,000 *l.* was intitled to all the Benefits of that Company's *Banking*, in the largeſt Senſe of that Word. We are here, however, to note, That although the ſaid principal Sum of 10,700,000 *l.* was actually due from the Public to the *Bank*, yet the transferrable Capital in the *Bank-Books*, as divided amongſt all their Proprietors, was really but 9,800,000 *l.* Bank-Stock; there being the Sum of 900,000 *l.* undivided Capital remaining in that Company's Corporate Capacity: By the Intereſt whereof, and their Profits by *Banking*, [*i. e.* by all the Advantages the *Bank* can make, either by circulating of the Government's *Exchequer-Bills*, and by other Dealings with the Public—by what they make by *diſcounting* of *Merchants Bills of Exchange*—by dealing in foreign Bullion—and, laſtly, by their employing of ſo much of the Caſh of their Circulating-Notes as is not judged abſolutely requiſite to remain in *Bank*, for anſwering all the Demands of thoſe Notes] that prudent and moſt uſeful Corporation was enabled to make at this Time an annual Dividend of 5½ *per Cent.* on their ſaid transferrable Capital of 9,800,000 *l.*

A. D. 1744

An Enquiry into the Profits of the *Bank of England*, both certain and caſual.

	£.
Now the annual Intereſt paid to them from the Public on 3,200,000 *l.* at 3 *per Cent.* is	96,000
And on 7,500,000 *l.* at 4 *per Cent.* is - - - - - - - - - - - - - - -	300,000
Total of the *Bank*'s Intereſt from the Public - - - - - - - - - -	396,000
But, as the *Bank of England* has for ſeveral Years paſt divided 5½ *per Cent.* yearly to the Proprietors of the ſaid 9,800,000 *l.* being - - - - - - - - - - - -	539,000
By deducting the ſaid yearly Intereſt received from the Public, being - - - -	396,000
There remains the annual Profits of the ſaid 900,000 *l.* their undivided Capital, and all their other various Profits by *Banking*, as aforeſaid, amounting together to - - *per Annum.*	143,000
Now, if the Intereſt paid by the Government for the 900,000 *l.* undivided Capital, at 4 *per Cent.* be deducted, being - - - - - - - - - - - - - - - - - -	36,000
☞ Then the clear annual Profits of the *Bank*, by their Money Concerns with the Public, and by all their other certainly known *Banking* Concerns will be - - - -	107,000
Deduct thereout (ſuppoſe) for Houſe-Expence of all Kinds, as Salaries, &c. - -	17,000
And there will remain then of the *known* annual Profit by *mere Banking* - - - -	90,000

Laſtly, Some might poſſibly be ſo much farther inquiſitive, as to form Conjectures, (for they can be no other) concerning the Proportion which the *Quantum* of ready Caſh always neceſſary to be reſerved in this or any other public or private Bank, for the Circulation of *all* their Caſh-Notes and Credit of Accounts in a Bank bears or ſhould bear to the total Amount of thoſe Caſh-Notes and Credit; and which is the ultimate Article in all Banking Buſineſs, and probably alſo the moſt conſiderable one, more eſpecially with reſpect to our *London* private Bankers, though at the ſame Time an extremely caſual and uncertain one: Nevertheleſs, as this laſt-named Point may be properly termed the *fair* and reaſonable Myſtery or Secret of all *Banking*, we can ſee no Benefit which can ariſe by any ſuch minute Enquiries, to the Generality of Men; neither do we apprehend them proper to be enquired into at all, without there ſhould ariſe any reaſonable Suſpicion for Fraud. For, as it has been a political Obſervation of long ſtanding, *That even the Reputation of great and powerful Monarchies and States often ſubſiſts more by common Fame or Opinion than by real Strength or Ability,* [*Magis Fama quam Vi:*] So it may more ſtrictly and properly be applicable to a *Bank* and *Bankers*; of which we had a moſt pregnant Inſtance a few Years ago, at the breaking up and dividing the Profits of an eminent Partnerſhip of a *private Bank* in the City of *London*, which for many Years had cleared or divided ſeveral Thouſand Pounds yearly for the Partnerſhip; when, upon valuing or appraiſing all the *real Stock* of that Partnerſhip before the higheſt Judge of *Great Britain*, it appeared even to that great Man's Amazement, That the whole did not amount to above three or four Hundred Pounds, intirely conſiſting of Shop Implements, and certain Houſhold Furniture, &c.

A critical Enquiry into the Poſſibility as well as Expediency of determining what Proportion of ready Caſh any Bank or Banker ſhould conſtantly keep, for the Circulation of all *Caſh-Notes*, and the anſwering of other Credits.

Perhaps this Obſervation may, in ſome Reſpects, be extended to moſt of the great Commercial as well as *Banking* Societies of the World; whoſe internal Condition, Circumſtances, and Profits, may not be by any Means proper to be too narrowly pried into, ſo long as they, to all Appearances, are proſperous and punctual in all their Affairs; although, like a private Merchant, their Circumſtances may not be alike proſperous at all Times.

1745 Our Author having read in one *John Ker* of *Kerſland*'s Memoirs, That the City of *Hamburgh* had no fewer than 5,000 Ships and Boats belonging to it; that looſe Way of deſcribing its Naval Commerce not giving him ſufficient Satisfaction, he applied, in the Year 1745, to a *Hamburgh* Broker or Agent, then reſiding at *London*, concerning the Truth thereof: Who freely acknowleged, "That "if all the Boats on the River *Elbe* belonging to *Hamburgh*, and the vaſt Number of Veſſels "which that opulent City conſtantly employed in carrying of Merchandize up and down that "large River to and from the Countries of *Mecklenburg*, *Pomerania*, *Saxony*, *Brandenburg*, *Bohemia*, *Sileſia*, &c. were to be taken into the Account, he knew not whether there might not be "ſo many of all Kinds: But that the Number of real Ships trading on the Ocean and belonging to *Hamburgh* were not above 300; whereof 150 conſiſted of from each 200 Tons to upwards of 500 Tons Burden; 27 of which Ships were then actually lying in the River *Thames*. "And that the remaining 150 were what is uſually called *ſmall Craft* or *Coaſters*, trading principally "to *Holland*. Beſide which," (added he) "they had *three* Ships of War, for the Protection of "their Commerce from the *Barbary* Rovers, which they keep conſtantly in their Pay, *viz.* *two* "of 40 to 50 Guns each, and the *third* a ſmaller Frigate." This Account (ſeemingly a probable one) gives an high Idea of the extenſive Commerce and numerous Shipping of that City.

The City of *Hamburgh*'s numerous Shipping and extended Commerce.

The Diſcovery of a *North-weſt Paſſage*, to the Seas of *Japan* and *China*, continuing to be much the Subject of Converſation at *London* and other Parts of *Great Britain*, an Act of Parliament paſſed in this 18th Year of King *George* II. (Cap. xvii.) [*For granting a public Reward to ſuch Perſon or Perſons (his Majeſty's Subject or Subjects) as ſhall diſcover a* North-weſt Paſſage *through* Hudſon's Streights *to the Weſtern and Southern Ocean of* America] whereby it was enacted, "That if "any Ship of his Majeſty's Subjects ſhall find out and ſail through any Paſſage by Sea between "*Hudſon's Bay*, and the Weſtern and Southern Ocean of *America*, the Owner, or his Aſſigns, "ſhall receive a Reward of 20,000 *l.* The Commiſſioners for determining this Diſcovery are "therein named, being the great Officers of State, and of the Treaſury, Admirals, &c. Provided however, That nothing in this Act ſhall any ways extend to the Prejudice of any Part "of

A Reward by a *Britiſh* Statute of 20,000 *l.* enacted for the Diſcoverers of a *North-weſt Paſſage*, through *Hudſon's Bay* to the Seas of *Japan* and *China*.

" of the Eſtate, Rights, or Privileges belonging to *the Governor and Company of Adventurers of* " England *trading into* Hudſon's Bay."

A *Britiſh* Statute for preventing the Exportation of foreign Linens, under the Denomination of *Britiſh* and *Iriſh* Linens:

To prevent the Frauds committed in counterfeiting the Stamps put on *Britiſh* and *Iriſh* Linen, in order for receiving the Bounty allowed on their Exportation, a Statute paſſed this ſame Year, " *For effectually preventing the Exportation of foreign Linens, under the Denomination of* Britiſh *or* " Iriſh *Linens*." [Cap. xxiv.] Whereby ſundry good Regulations were made for preventing the counterfeiting the ſaid Stamps, *&c.*

And another Statute granting a farther Bounty on *Britiſh* and *Iriſh* Linens exported.

And by the next following Statute, (Cap. xxv.) [*For allowing certain additional Bounties on the Exportation of* Britiſh *and* Iriſh *Linens*] it was enacted, " That whereas the Linen Manufactures " of *Britain* and *Ireland* are of late Years greatly improved and increaſed; whereby the Price of " Linens, as well of foreign as of home Fabric, hath been conſiderably reduced——a farther " Bounty on their Exportation was hereby enacted of one *Half-penny per* Yard on Linen of the " Value of 5 *d.* and not exceeding 12 *d. per* Yard; and of *three Half-pence per* Yard for Linen " from above 12 *d.* to 1 *s.* 6 *d. per* Yard;" with ſundry other Regulations for preventing of Frauds, *&c.* Which Statute, it is hoped, will in Time produce great and good Conſequences for the Increaſe of *our own* and the diſcouraging of *foreign* Linens, for which ſuch great Sums are and have ſo long been paid, for ſupplying of the *Britiſh*, *African*, and *American* Trades, and all our other Exportations of Linens; whereby *our own* People will be employed, and the Money kept at Home, ſo long paid to *Germany*, *Pruſſia*, and *Ruſſia* for the ſame!

The Manner of collecting the Duty on *Tea* imported into *Great Britain*, altered, *&c.*

As the Statute of the ſaid 18th Year of King *George* II. (Cap. xxvi.) *For repealing the preſent in-land Duty of* 4 s. per *Pound Weight upon all* Tea *ſold in* Great Britain, *and for granting to his Majeſty certain other in-land Duties in lieu thereof*, &c. relates only to the Alterations thereby made in the Manner of collecting the Duty on that Commodity thereafter; we ſhall take no farther Notice of it, than merely to remark, That hereby it is enacted and provided, " That if at any Time the " *Britiſh Eaſt-India* Company ſhall neglect to keep the *London* Market ſupplied with a ſufficient " Quantity of *Tea* at reaſonable Prices, to anſwer the Conſumption thereof in *Great Britain*, the " *Board of Treaſury* may grant Licences to any other Perſon or Perſons, Bodies Politic or Cor- " porate, to import *Teas* into *Great Britain*, from any Part of *Europe*,—ſubject to the like Duties, " Reſtrictions, and Limitations, *&c.* as herein before preſcribed, with reſpect to *Tea* to be im- " ported by the ſaid *Eaſt-India* Company from any Parts of *Europe*, &c."

Foreign Cambricks and *French* Lawns prohibited to be worn in or imported into *Great-Britain.*

It being evidently for the Advantage of *Great Britain*, and particularly for the farther promoting of her own Linen Manufactures and thoſe of *Ireland*, that the wearing of foreign *Cambricks* and *French Lawns* ſhould not be permitted; a Statute of this ſame 18th Year of King *George* II. (Cap. xxxvi.) [*For prohibiting the wearing and Importation of* Cambricks *and* French Lawns] enacted, " That it ſhall not be lawful for any Perſon in *Great Britain* to wear any *Cambrick* or *French* " *Lawn*, under the Penalty of 5 *l.* and the like Penalty on the Sellers thereof, *&c.*" If this Law was ſeriouſly intended to be executed, as its Title and Preamble ſeem to import, there is Reaſon to apprehend it has not fully anſwered the Intention thereof: Neither, perhaps, has a ſubſequent ſhort Act, of the 21ſt Year of this Reign, (Cap. xxvi.) *For explaining, amending, and enforcing the ſame*; by farther extending the Penalties to the *Venders*, and alſo to the *Milliners making up ſuch Cambricks.*

Cape-Breton and *Louiſbourg* maſtered by the *New England* Forces, and the *Britiſh* Navy-Royal.

Great-Britain being at War with *France*, her Province of *New-England* alone (aſſiſted by the King's Ships of War) were, in this ſame Year 1745, able to raiſe a ſufficient Land-force to beſiege and take the Town, Forts, and Port of *Louiſbourg*, and the reſt of the Iſle of *Cape-Breton*, formerly ſhamefully yielded to *France* by the Treaty of *Utrecht*. Thoſe Forces conſiſted of 4,070 Men, (excluſive of Commiſſion-officers) *viz.*

By the *Maſſachuſet's-Bay*, - - - - - - - - - - - - - - - - - -	3,250 Men,
By *New-Hampſhire*, -	304
By *Connecticut*, -	516
	4,070

beſide the armed Sloops and Sailors, belonging to thoſe three Colonies, and to that of *Rhode-Iſland.* " The Importance of *Cape-Breton* is now well underſtood," [ſays Sir *William Pepperell*, Commander of thoſe Forces, in his Journal of its Siege] " or rather of the Iſlands of *Madam* and *Cape-Breton*, " (which are ſo contiguous, that they are by moſt People ſuppoſed to be but one Iſland, by the " Name of *Cape-Breton)* It extends from the Gut of *Canſo* or *Canceſſo*, (the Eaſtern Boundary of " *Nova-Scotia)* Eaſt-North-Eaſt about 34 Leagues, and is what helps to form the Gulph of " *St. Laurence*;——which Gulph is full of commodious Bays, Havens, Iſlands, Rivers, and, at " all Seaſons of the Year, has great Plenty of *Cod-fiſh*; and, at particular Seaſons of the Year, has " Herrings, Mackerell, *&c.* for Bait: But the Ice in Winter renders its Navigation unſafe, if " not altogether impracticable, at leaſt to make Voyages of *Fiſh*; though in the Summer Seaſon " there have been yearly Fiſheries carried on at *Gaſpay*, at the Entrance of *Canada-River*, and " in the little Harbours from thence to *Bayverte*, at the Iſlands of *St. John* and *Magdalene*,——at " and through the Gut of *Canſo*;——and thence along the Shore," [to many other Places therein named]—" and from *Gaſpay* round the North Side of the Gulph at the ſeveral convenient " Ports on the Main, quite to the Streights of *Belle-Iſle.*——And, by an Allowance to the *French* " in the Treaty of *Utrecht*, (which they have made the moſt of) in all the Harbours at the " Northward of *Newfoundland*, that were unemployed by the *Engliſh*. And although, comparatively ſpeaking, there was but a ſmall Number of their Ships that fiſhed at *Cape-Breton* itſelf, " yet

A. D. 1745

“ yet the Situation of that Iſle is ſuch, that they could all of them at Pleaſure repair thither on
“ any Emergency or Danger; eſpecially thoſe that fiſhed in the Gulph, on the Main, or thoſe at
“ the Northweſt of *Newfoundland*, who were all within one or two Days Sail at moſt; and alſo
“ thoſe Ships that laded with *Mud-fiſh* on the Banks. So that this Iſland of *Cape-Breton* was the
“ *Key and Protection of their whole Fiſhery*; and for that End it was fortified and garriſoned, and
“ valued by *France* equal to any other of its Colonies; *although the Harbour of* Louiſbourg *is not*
“ *an extraordinary good one, and that the Iſland produces nothing either for Food or Rayment*;” [this is
in part contradicted by-and-by] “ ſo that the Situation and Conveniency of this Place (being, as it
“ were, *the Center of the whole Fiſhery, and a Cover and Command to the whole Gulph*) *was the greateſt*
“ *Inducement to* France *to fortify it.* What other Uſes it might ſerve for, as a Port, to the *Eaſt*
“ and *Weſt-India Ships*, and to thoſe bound to *Canada*, on Occaſion to reſort to for Wood and
“ Water,—to clean or to repair, *&c.* not being ſo much in their View as the ſecuring and upholding
“ the Fiſhery.——Their Conviction of the growing Profits of the Fiſhery there, and the
“ Hopes of, one Time or other, *monopolizing* it, made them take ſuch indefatigable and indirect
“ Means, the laſt War,” [*i. e.* of Queen *Anne*] “ to procure a Neutrality, ſo far as related to
“ the Fiſhery, which they obtained by Dint of Money; and on the Peace, in order to ſecure it
“ to them for the future, ſtuck at no Terms to obtain this Iſland, which they had no ſooner
“ effected but they immediately ſettled it with a new Colony of Fiſhermen only.——And a
“ Fiſhery flouriſhed here ſo faſt, that *they could and did afford to underſell us at foreign Markets.*
“ And for the Protection of the Trade ſo to do, they had annual Ships of War ſent them from
“ *France* to viſit and ſupply them, with Orders to protect and defend not only their Sea-coaſts,
“ but their Veſſels on the Banks of *Newfoundland*, *&c.* and alſo to make and keep their Pretenſions
“ good to the ſeveral Banks, either within or without their Line; and to make themſelves a
“ Privilege, as it were, of fiſhing almoſt where they pleaſed, by Force of *Cuſtom:* In which they
“ gradually increaſed, ſo that, in the Year 1732, two of their Men of War were ordered on that
“ Station, to cruiſe on the *Banks*,—to examine into the State of the Fiſhery,—and to give them
“ any neceſſary Aſſiſtance and Protection;—and to go from thence to *Canada*, and ſo back to the
“ Fiſhery again, and thence to convey thoſe Ships that had made their Voyages, and were ready
“ to depart for *Europe*. The Marquis *de la Maiſon Forte*,” (continues Sir *William Pepperell*) in his
“ Journal, thus remarks, *Louiſbourg is a good Port and a ſafe Harbour.*——More than 100 Veſſels
“ from *France* arrive there every Year to fiſh, and make Fiſh” [*i. e.* to cure them] “ of the *Cod*
“ which they catch in ſmall Craft of the Country, and are after put into larger Veſſels where
“ they ſalt them and dry them, from the Beginning of *June* till *October*, when they all get ready
“ to depart each for his aſſigned Port. This Iſland produces ſome Grain; but though there are
“ more than four thouſand Inhabitants, they find their Account much better in *fiſhing* than in
“ *Huſbandry*, and conſequently the Land lies waſte; they procuring all Neceſſaries in Exchange
“ for their Fiſh.”

The great Importance of *Cape-Breton* to the *French*.

Our Author proceeds to illuſtrate the Magnitude and Profits of the Fiſhery of the *French* in thoſe Seas, *viz.*

The Magnitude of the Fiſhery at *Cape-Breton* and its Neighbourhood.

“ I. From the Gut of *Canſo* down along the Shore to *Louiſbourg*, and from “ thence to the North-eaſt Part of *Cape-Breton*, there were annually employed “ at leaſt 500 Shallops, each of which required at Sea and on Shore at leaſt “ five Men; in all	2,500 Men
“ II. Sixty Brigantines, Schooners, and Sloops, with each 15 Men, - - -	900 Men
Total Men employed,	3,400 Men
“ III. Each of the ſaid 500 Shallops catch 300 Quintals of Fiſh, in the “ Summer Seaſon; in all	150,000 Quintals
“ IV. And each of the *Brigantines*, *Schooners*, and *Sloops*, catch 600 Quintals	36,000
“ Total Fiſh annually made at *Cape-Breton*, - - - - - - - - - - -	186,000 Quintals
“ V. Now to carry this *Fiſh* to *Europe*, there muſt be employed ninety-three Ships, of the Burden of two thouſand Quintals each, and each Ship “ has twenty Sailors; in all	1,860 Men
“ Total Men employed in the Fiſhery of *Cape-Breton*, - - - - - - - -	5,260

“ VI. At *Gaſpay*, *Quadre*, and other Harbours, mentioned in the following Eſtimate, there are
“ ſix Ships yearly; which as they come out from *France*, manned to catch their own Cargoes in
“ Shallops, (which they haul up, and leave in the Country every Winter, till they return in the
“ next Spring) theſe may, one with another, be allowed ſixty Hands. And it has always been
“ allowed, from *St. Maloes* and *Granville*, that they have at leaſt three hundred Sail of thoſe Ships
“ in this Fiſhery, that fiſh at *Petit-nord*, *Fichance*, *Belle-Iſle*, and the Gulph; which (all being
“ computed as above, and allowing thoſe Ships that ſo come out to make their own Voyages, to
“ carry each three thouſand Quintals) will be as follows, *viz.*

	Ships	*Men*	*Quintals*
At *Cape-Breton*, - - - - - - -	93	5,260	186,000
— *Gaſpay*, - - - - - - - - -	6	360	18,000
— *Quadre*, - - - - - - - - -	6	360	18,000
— *Porte en Baſque*, - - - - - - -	6	360	18,000
— *Les Foils Iſles*, - - - - - - -	3	180	9,000
— *St. Maloes, &c.* - - - - - -	300	1,8000	900,000
Total,	414	24,520	1,149,000

“ There go alſo Ships from *St. Jean de Luz*, *Bayonne*, *Nantes*, and *Havre de Grace*; and beſide all theſe, there have been conſtantly from the Rivers *Sindie*, *Olune*, *Poiteux*, *Havre*, &c. 150 Ships at leaſt, (the *French* ſay 200 Sail) employed in the *Mud-fiſhery*, (or *Mort-Veſt*, as they call it) from 16 to 24 Men each; which carry Home from 22,000 to 30,000 Fiſh each. So, on the moſt moderate Computation, 150 Sail of Ships with 20 Men each, is 3000 Men; and by Tale, 3,900,000 Fiſhes in all.

The Value of that Fiſhery in *Sterling* Money.

“ In regard to the Value of this Branch of Trade, it is neceſſary to obſerve, that it alſo produces a large Quantity of *Train-oil*, viz. a Hogſhead of 60 Gallons of Oil out of every hundred Quintals of Fiſh, and this, out of the whole Quantity before-named, will produce 11,490 Hogſheads of Oil. And, allowing that 4000 Fiſh in Number are equal to 100 Quintals when cured, then the 3,900,000 *Mud-fiſh*, by the ſame Rule, will yield 975 Hogſheads of Oil; which makes in all 12,465 Hogſheads of Oil.

	l.	*s.*	*d.*
“ Now let the 1,149,000 Quintals of Fiſh be valued only at ten Shillings *Sterling per* Quintal, (the prime Coſt uſually at *Newfoundland)* and then it is worth	574,500	00	00
“ And to this allow 3 *s. Sterling per* Quintal, for Freight, in *Engliſh* Bottoms, to Market	172,350	00	00
“ And then the Fiſh alone is worth - - - - - - - - - - - -	746,850	00	00
“ And let the 12,465 Hogſheads (or 3,116$\frac{1}{4}$ Tons) of Oil be valued at 18 *l. Sterling per* Ton,	56,092	10	00
“ As to the Mud-fiſh, they are generally ſold in *France*, at 1000 Livres for 1000 Fiſh; and then at eleven Pence *Sterling per* Livre, their Value is	178,750	00	00
“ And thus it appears, that one Year's Fiſhery of the *French*, is worth - -	981,692	10	00

“ Which great Branch of Trade, in a Manner, depends intirely on their Poſſeſſion of the Iſland of *Cape-Breton*, as it is impoſſible to carry it on without ſome convenient Harbour of Strength, &c.

“ In Addition to this, in regard to the *woollen Manufacture:* Every Man employed in this Fiſhery conſuming in his Back and Bed-cloaths, the Value of 30 *s. Sterling* therein yearly, is 41,250 *l. Sterling*. Add alſo hereto, the *Canvas*, *Cordage*, *Hooks*, *Lines*, *Twine*, *Nets*, *Lead*, *Nails*, *Spikes*, *Edge-tools*, *Graplins*, *Anchors*, &c. which 564 Ships and Shallops muſt expend at Sea and on Shore; and allow all theſe to be *Britiſh*, and that *Britain* could keep it all to herſelf, and the Value will be found of greater Conſequence than any other Trade dependent on our Plantations, *not even excepting the Tobacco Trade*. *Firſt*, in regard to the raiſing of Seamen for the Royal Navy. *Secondly*, In the Conſumption of *Britiſh* Manufactures and Product: And, *Thirdly*, and above all, in a certain annual Remittance of the Balance of this Trade from *Spain*, *Portugal*, *Italy*, and other Parts.”------[To all theſe Advantages our Author has forgot to add two very conſiderable ones, *viz.* 1ſt, The great Number of Perſons employed in building, and of Trades in fitting out of thoſe Veſſels: And, 2dly, the additional Benefit to our landed Intereſt, by the victualling of them]———“ So that, all Things duly conſidered, this Acquiſition of *Cape-Breton* is, of itſelf and alone, *a ſufficient Compenſation for the War*.———Moreover, by this Conqueſt, *France* has not any one Sea-port for the Relief of their trading Ships, either from the *Eaſt* or from the *Weſt-Indies*, open to them any-where in *North-America* to the Northward of the River *Miſſiſſippi:* For *Canada* is not to be looked upon as an open Port to the Sea, it being impracticable to go thither for Shelter, as being 60 or 70 Leagues within Land, through the Gulph, to the Mouth of the River; and then a great Way farther up the River.——And even as to *Canada* itſelf, the River is *now* ſo much under our Command, as well as the Gulph, that *all Trade* and even *Communication there*, may be very eaſily ſtopped by our Ships from *Cape-Breton:* Inſomuch that, without Force of Arms, in a very few Years that Colony would fall, and the whole Trade of *Furs* carried on with the *Indians* there, come into *Engliſh* Hands. And a happier Conſequence ſtill is, that hereby the *French* in *Canada* may not only be kept from ſupplying the *Indians*, but alſo from encouraging them to annoy our Frontiers; ſo that thoſe *Indians* muſt become dependent on *Us*.——By this Acquiſition, likewiſe, we have ſecured to the Nation the Garriſon of *Annapolis-Royal*, and the Colony of *Nova-Scotia*, which Country being a very rich and fertile Soil, and its Coaſts and Rivers abounding with Fiſh, and ſettled with *French Catholics*, that Nation has much regretted the Loſs of, and wanted to recover.——Our holding of *Cape-Breton* will alſo keep thoſe *French* Inhabitants of *Nova-Scotia* in ſtrict Allegiance to his Majeſty, or elſe oblige them to quit their Poſſeſſions, which are all Farms brought to Perfection, and fit for any Service immediately. Had we not taken *Cape-Breton* this Year, and the *French* had taken *Annapolis*, the Conſequence then would have been, that all the Inhabitants of *Nova-Scotia* would have declared for *France* immediately; and the Colony would have been at once the *French* King's: Whereby all the *Cape Sable* and *St. John's Indians*, who aſſiſted *France* laſt Year, at the Siege of *Annapolis*, together with thoſe of *Canada*, would have been let looſe upon our Frontiers.”

Remarks on this Narrative concerning *Cape-Breton*.

This Account of the vaſt Value of *Cape-Breton*, written by one living altogether in its Neighbourhood, and who was knighted for the ſucceſsful Part he acted in the reducing of it to his *Britannic* Majeſty's Obedience, is, in the main, juſtly to be depended on; as not being like the vague and romantic Reports of unſkilful Writers, but as being the faithful Narration of one who was every way qualified for, and equal to the Taſk: He died in the Year 1759, much about the Time that it was again taken from *France*. And as this Narrative is ſo copious, and at the ſame Time

A. D. 1745 Time ſo authentic, when we come to treat of its being ſo re-taken, *Anno* 1759, we need only then to refer our Readers to this Survey of its Benefits to us; or, at leaſt, of the immenſe Damage which our Poſſeſſion of that Place and the Demolition of *Louiſbourg*, will undoubtedly bring to the Fiſhery of the Port Towns of *France*, and to their almoſt general Commerce, Navigation, and Manufactures.

Fort St. George, in *Eaſt-India*, maſtered by *France*; and finally exchanged for *Cape-Breton*.

1746 To balance the before-named great Loſs of the *French* in our maſtering of *Cape-Breton*, they, in the following Year 1746, took from our *Engliſh Eaſt-India* Company their moſt important Fort and Town of *Fort St. George*, on the *Coromandel* Coaſt, with the annexed Black Town of *Madras*; being the Capital of all our ſaid Company's Places in *Eaſt-India*; wherein they found no inconſiderable Quantity of Wealth, Merchandize, and Treaſure: They alſo maſtered one of that Company's Capital Ships. This Diſaſter obliged *Us*, in the Treaty of Peace, *Anno* 1748, to reſtore *Cape-Breton* to *France*, as the latter did *Fort St. George* to our ſaid Company.

A *Britiſh Linen* Company erected, and its main End.

On the 5th of *July* 1746, his *Britannic* Majeſty's Charter paſſed, for erecting the *Britiſh Linen Company*. Whereby a Number of *Peers*, and eminent Gentlemen and Merchants, were incorporated, “ with a Capital Stock, not at firſt to exceed 100,000*l. Sterling*; but may be farther in-“ creaſed, from Time to Time, as their Affairs ſhall require, to any limited Sum, by his Ma-“ jeſty's Sign-Manual. Their ordinary Affairs to be conducted by a Governor, Deputy-gover-“ nor, and five Directors. Their firſt Governor was his Grace *Archibald*, Duke of *Argyle*:” (the great Promoter of this Charter) “ The Company's principal Reſidence to be at *Edinburgh*.” One of the main Intentions of this Company being to ſupply the *Britiſh* Merchants trading to *Africa* and to the *American Plantations*, with the like Kinds of Linen-cloth as they hitherto were obliged to purchaſe from foreign Nations. Whereby it is to be hoped that much Money will be ſaved to the Nation, which till now has been carried abroad for thoſe Goods. A moſt worthy and truly public-ſpirited Deſign, which there is good Ground to hope, will, in due Time, fully anſwer Expectation. The two before-quoted Acts of Parliament of the preceding Year 1745, the 18th of King *George* the Second, (Cap. xxiv, and xxv.) were principally calculated to further this moſt laudable Purpoſe.

The Capital of the *Bank* of *England* increaſed.

By a *Britiſh* Statute of this 19th Year of King *George* the Second, (Cap. vi.) *For eſtabliſhing an Agreement with the Bank of* England, *&c.*——“ The ſaid Bank agreed to deliver up to the Trea-“ ſury, 986,800*l.* in Exchequer-bills; in Lieu of which they were to have an Annuity of 4 *per* “ *Cent.* for that Sum, out of the Fund for licenſing of Spirituous Liquors. And the Bank were “ hereby impowered to add the ſaid 986,800*l.* to their Capital Stock, taking in Subſcriptions “ for that End.”

So that at *Michaelmas* 1746, the whole Debt due to the *Bank* from the Public, was	£ 11,686,800
But the *Bank* now hold thereof, in their corporate Capacity, the undivided Sum of	906,800
And the laſt Sum being deducted, there remained of transferable Capital, divided amongſt all the Proprietors, only	10,780,000

An uſeful Statute for the better Preſervation of the Havens and navigable Rivers of *England*.

It being too common for Commanders and Mariners of *Britiſh* Ships, lying in Havens, Rivers, Ports, &c. to throw out their Ballaſt on the Shore or Side, below the uſual full Sea-mark, to the great Detriment and filling up of thoſe Havens, Ports, Rivers, &c. a Law was paſſed in this 19th Year of King *George* the Second, (Cap. xxii.) prohibiting the throwing out thereof, or of any Filth, Rubbiſh, Gravel, &c. but only on the Land or Ground where the Tide never flows; under the Penalty of at leaſt fifty Shillings, and not exceeding five Pounds for every Offence. And Ships or Veſſels ſunk or ſtranded in any ſuch Port, Haven, or River, ſhall be forthwith weighed up and removed, by Order of the Magiſtrates. This Act [*For the better Preſervation of Havens, Roads, Channels and navigable Rivers*] extended only to that Part of *Great-Britain* called *England*.

A new Law for encouraging the Manufactures of *Britiſh* Sail-cloth.

The Manufacture of Sail-cloth for Shipping had been long improving in *Great-Britain*, and had been encouraged by ſundry Acts of Parliament; particularly by that of the 9th Year of King *George* the Second, and another of the 13th of his ſaid Majeſty; whereby all foreign-made Canvas or Sail-cloth imported, uſually entered by the Name of *Holland's Duck* or *Vitry Canvas*, fit for Ships Sails, and for which Duties are payable, ſhould be ſtamped, as ſuch, on its Importation, to prevent its paſſing for *Britiſh*-made Sail-cloth; and if found unſtamped to be forfeited; and the Importer of it to forfeit 50*l.* all which was now confirmed by an Act of the 19th of the ſaid King. (Cap. xxvii.) And that every Ship or Veſſel which ſhall be built in *Great-Britain*, and in his Majeſty's Plantations in *America*, ſhall, upon her firſt ſetting out, or being firſt navigated, have or be furniſhed with one full and complete Set of new Sails, made of Sail-cloth manufactured in *Great-Britain*, under the Penalty of 50*l.* on the Maſter of the Ship or Veſſel. And every Sail-maker in *Britain* or the Plantations ſhall, on every new Sail, affix or impreſs, in Letters and Words at length, a Stamp of eight Inches Diameter, whereon his Name and Place of Abode ſhall plainly appear, under the Penalty of 10*l.* All which particular Clauſes were hereby to continue in Force for ſeven Years longer.

Aſſurances or Inſurances on *Britiſh* Ships and Merchandize regulated, and alſo *Bottomree* Bonds.

“ It being found by Experience, that the Cuſtom in *England* of making *Aſſurances, Intereſt or* “ *no Intereſt*, or without farther Proof of Intereſt than the Policy, hath been productive of many “ pernicious Practices; whereby great Numbers of Ships with their Cargoes have either been “ fraudulently loſt and deſtroyed, or taken by the Enemy in Time of War: And that ſuch Aſſu-“ rances have encouraged the Exportation of Wool, and the carrying on of many other prohibit-“ ed and clandeſtine Trades, &c.” So ſays the Preamble to a Statute of this 19th Year of King *George* the Second, (Cap. xxxvii.)—It was therefore now enacted, “ That no Aſſurance ſhall be “made on any Ship belonging to his Majeſty or any of his Subjects, or on any Goods laden on board any ſuch Ship, *Intereſt or no Intereſt*, nor without farther Proof of Intereſt than the Policy, nor by any Way of Gaming or Wagering, or without Benefit of *Salvage* to the Aſſurer. *And that every ſuch Aſſurance ſhall be null and void.* Yet, Iſt, Aſſurance on private Ships of War may be made for the Owners thereof, *Intereſt or no Intereſt.* IIdly, Any Goods, Merchandize, or Effects, from any Ports or Places in *Europe*, or *America*, in the Poſſeſſion of the Crowns of *Spain* or *Portugal* may be aſſured in ſuch Manner as if this Act had not been made. IIIdly, It ſhall not be lawful to make Re-aſſurance, unleſs the Inſurer ſhall be inſolvent, become a Bankrupt, or ſhall die; in either of which Caſes, Re-aſſurance may be made. IVthly, All Sums to be lent on *Bottom-ree*, or at *Reſpondentia*, upon any *Britiſh* Ship bound to *Eaſt-India*, ſhall be lent only on the Ship, or on the Merchandize laden on Board of ſuch Ship, and ſhall be ſo expreſſed in the Bond: And Benefit of *Salvage* ſhall be allowed to the Lender, who alone ſhall have a Right to make Aſſurance on the Money ſo lent.—And none ſhall recover more than the Value of his Intereſt on the Ship or on its Merchandize, excluſive of the Money ſo borrowed. And if it appears, that the Value of his Share in the Ship or Merchandize does not amount to the full Sum ſo borrowed, ſuch Borrower ſhall be reſponſible to the Lender for ſo much of the Money borrowed as he hath not laid out on the Ship or Merchandize, with lawful Intereſt, together with the Aſſurance and Charges, in the Proportion the Money not laid out ſhall bear to the whole Money lent, notwithſtanding the Ship and Merchandize may be totally loſt. Vthly, In all Actions the Plaintiff ſhall declare, within fifteen Days, what Sums he has aſſured. VIthly, Perſons ſued on Policies of Aſſurance are to bring the Money into Court; and the Plaintiff not accepting it with Coſts to be taxed, in full Diſcharge; and ſhall afterward proceed to Trial in ſuch Action, and the Jury ſhall not aſſeſs greater Damages to pay Coſts than the Money ſo brought into Court: Such Plaintiff, in every ſuch Caſe, ſhall pay to ſuch Defendant, in every ſuch Action, Coſts to be taxed.”

A Subſcription made, and two Ships ſent out, for Diſcovery of the *North-weſt* Paſſage to *Japan, China*, &c. but unſucceſsful.

In conſequence of an Act of Parliament, of the preceding Year 1745, for granting a Reward of 20,000 *l.* to the Diſcoverers of a *North-weſt* Paſſage through *Hudſon's-Bay* to the Seas of *Japan* and *China*, as already related, a Subſcription for 10,000 *l.* was *now* ſet on Foot, divided into 100 Shares of 100 *l.* each, for fitting out two Ships in this Year 1746, in ſearch of that Paſſage. Thoſe Ships wintered at *Port-Nelſon* in *Hudſon's-Bay*, and in the Year following, *Anno* 1747, they made ſeveral Attempts for a Paſſage *Weſtward*, but were obliged to return Home the ſame Year, quite diſheartened and unſucceſsful; as has alſo been another Attempt ſince made from *Philadelphia.* Yet as this ſuppoſed Paſſage was brought under the Conſideration of Parliament, in the Year 1749, we ſhall ſuſpend any farther Obſervations thereon till we come to that Year.

An erroneous Account from *Ireland* of the Magnitude of *Dublin* and *Rome.*

“By an exact Survey very lately pretended to have been made of the City and Suburbs of *Dublin*, the Capital City of *Ireland*, its Circumference meaſured 7¾ *Iriſh* Miles, which are equal to nine Miles and three Quarters of *Engliſh* Statute Meaſure: An *Iriſh* Mile containing 2,240 Yards, and an *Engliſh* one but 1,760 Yards. Whereby” (ſaid the public News-papers, in this Year 1747, from *Ireland*) “it appears, that *Dublin* is the ſixth (in Rank) of the largeſt Cities in *Europe*, for Magnitude and Number of Inhabitants; the five greater Cities being *London*, *Paris*, *Conſtantinople*, *Rome*, and *Moſcow*.” This was quite an inaccurate Account, for *Rome* is far from coming into the Rank into which the Writer of that Account places it: And (leſt any one may thereby be miſled) we ſhall here juſt remark, that it is certain, that neither *Rome* nor *Dublin* ought to ſtand ſo forward amongſt the great Cities of *Europe.* For undoubtedly *Milan*, *Naples*, *Nurenberg*, *Peterſburgh*, *Amſterdam*, &c. ſtand higher than either of thoſe two Cities, as we hope to ſhew in our Appendix.

A ſuccinct Survey of the *European* Forts, Settlements, and Factories, in the Way toward, and at the *Eaſt-Indies.*

The following ſuccinct Survey is taken from Voyages, and other modern Accounts, publiſhed about this Time, being a Catalogue of all the Forts, Settlements, and Factories, of the ſeveral *European* Nations trading to, and in the Way to *Eaſt-India*, from the Iſle of *St. Helena* quite to *Japan*; and which may give Readers a good general Idea of *Europe*'s Correſpondence with *Eaſt-India, viz.*

Viz. I. Thoſe of the *Engliſh Eaſt-India* Company. *St. Helena.*

Poſſeſſed by *Great-Britain*,

1. The Iſle of *St. Helena*, ſituated in the 16th Degree of South Latitude, about 1,200 Miles Weſt of the *African* Coaſt, and 1,800 Miles Eaſt of *South-America*, being almoſt an intire Rock, with a thin Covering of vegetable Earth, about twenty Miles in Circumference, with only one Paſſage up to it, well fortified. It contains about two hundred Families, who have ſufficient Produce to ſupply our *Eaſt-India* Ships, in their Way from *India*, (and thoſe of other Nations we are in Peace with) with freſh Proviſions, Fruits, and Vegetables: But it is difficult for Ships going to *India* to find it, becauſe of the Winds.

Baſſora.

2. *Balſcra* (or *Baſſora*) at the upper End of the *Perſian Gulph*, at the Confluence of the *Tigris* and *Euphrates* Rivers. Here is a *Britiſh* and alſo a *Dutch* Factory. Hither come many Ships from ſeveral Nations of *Europe* and *Aſia*, it being a Place of great Commerce. This Place is alſo commodious to the *Engliſh* and *Dutch*, for conveying their Letters Home over Land, by Way of *Aleppo*.

In *Perſia*; *Gomroon* and *Iſpahan.*

3. *Gomroon*, in the ſaid *Perſian Gulph*, has both an *Engliſh* and *Dutch* Factory, and ſubordinate inland ones, at *Iſpahan:* There being a conſiderable Trade carried on betwixt this Place and *India*.

☞ As to *Mocha*, in *Arabia*, near the Mouth of the *Red Sea*, the *Engliſh* and *Dutch* Companies reſort to it for its Coffee, hitherto the beſt in the World; but they have no ſettled Factories there.

A. D. 1747

In *Cambaya*; *Surat*, &c.

4. In *Cambaya*, (a Province of *Proper India*) the *Engliſh* Company have a Preſident and Council at *Surat*, who have (or lately had) the ſupreme Direction of the Commerce on all the Weſt Coaſt of *Malabar*. Its ſubordinate Factories are at *Agra*, *Amadabat*, *Lahor*, &c. but not always confined to ſuch Places. At *Anjengo* the Company built a Fort, *Anno* 1695.

Malabar Coaſt.

5. On the ſaid Coaſt of *Malabar*, the Town and Port of *Bombay*, with its Iſle, is a Sovereignty of our Company's; of which enough has been ſaid elſewhere. And on the ſame Coaſt there are Factories, at *Carwar*, [*Carwar* is famous for the beſt *Pepper* in *India*, for which Reaſon our Company has a Fort there, as well as a Factory; but *Pepper* grows in general all over *India*, and therefore cannot be monopolized] *Calecut*, *Telichery*, *Dabul*, &c.

Coromandel Coaſt.

6. On the *Coromandel* Coaſt, *Britain* has *Fort St. George*, having only an open Road, and the adjoining Black Town of *Madras*. It is but a Week's Journey from the *Diamond* Mines of *Golconda*, held of the *Mogul*. Under the Governor and Council of this Place all the Factories Eaſtward, or beyond the *Malabar* Coaſt, are ſubordinate, as,

Fort St. David, and the leſſer ones of *Vizagapatan*, *Ganjam*, &c. on that Coaſt.

Bengal.

7. In the Kingdom and Bay of *Bengal*, the *Engliſh* Company has *Fort William* at *Calcutta*, *Ballalore*, *Cazembazar*, *Dacca*, *Patana*, and ſome other ſubordinate Factories; though their later ſucceſsful Conflicts with the *French*, in thoſe Parts, have ſince made conſiderable Alterations in this Part of *India*.

Sumatra Iſle.

8. In the great Iſland of *Sumatra*, our Company have a Fort and Factory at *Bencouli* (or *Bencoolen*) alſo *Fort Marlborough*, near it; and ſome other ſubordinate Factories.

9. In *Borneo* Iſland the *Engliſh* have a Factory at *Benjar*.

IIdly. By *Holland*. Thoſe of the *Dutch* *Eaſt-India* Company.

Cape of Good Hope Colony.

By the *Dutch Eaſt-India* Company are held the following, *viz.*

1. The extenſive and conſtantly-improving Colony of the moſt famous Southern Point of *Africa*, called the *Cape of Good Hope*, in full Sovereignty, with all its Forts: Where the Ships of all Nations in Amity with the States-General of the *United Netherlands* have Liberty to ſtop and refreſh: Under it is the Iſle of *Mauricius*, Eaſtward of *Madagaſcar*.

Ceylon Iſle.

2. A Factory at *Baſſora*, before-mentioned.

3. A Factory at *Surat*, under which are many ſubordinate ones.

4. On the Weſt Coaſt of *Malabar*, the *Dutch* Company have *Rajapore*, *Barcelor*, *Cananor*, *Panane*, *Cranganor*, *Cochin*, [taken from the *Portugueſe*, in the Year 1662, after being poſſeſſed by them 150 Years, and ſo fortified as to be deemed impregnable: It is their principal Settlement on this Coaſt] *Porcha*, *Carnapole*, *Coulan*, *Tegnapatan*, *Calecutt*, &c. all taken from *Portugal*.

5. The intire Coaſt, Ports, and Forts of the Iſland of *Ceylon*, in full and abſolute Propriety, and the abſolute Engroſſment of the beſt *Cinnamon* in the World.

6. In *Manaar Iſle*, they have *Teutecorin* and *Manapaar*.

7. On the Coaſt of *Coromandel*, they have *Negapatan*, *Porto-Novo*, *Sadraſpatan*, *Cabelon*, *Palicat*, famous for Cotton Cloths, [their chief Fort and Factory of that Coaſt, and of *Pegu*: It was retaken by the *Dutch* Company, *Anno* 1719, from the *Portugueſe*, who had held it ever ſince the Year 1613, when they drove out the *Dutch* with great Slaughter] *Caletour*, *Maſulipatan*, *Binlipatan*, &c.

8. In *Bengal*; *Hugueiy*, [the chief Factory] *Balaſore*, *Cazembazar*, *Malda*, *Barnagal*, *Chinchara*, *Patana*, *Dacca*, &c.

Malacca.

9. In *Malacca* Peninſula; the ſtrong Fort and Territory of that Name.

10. In the Iſland of *Sumatra*, the *Dutch* Company have Factories at *Acheen*, *Padang*, *Palimbam*, *Priaman*, *Bancalis*, *Siaque*, &c.

Java Iſle.

11. In *Java* Iſland, they have the great and ſtrong City of *Batavia*, the Capital and dernier Reſort of all their *Eaſt-India* Forts, Settlements, and Factories; with a far-extended Territory adjoining: Alſo in the ſaid Iſland they have Factories at *Bantam*, *Cheraban*, *Tagal*, *Japara*, *Rombang*, *Sorobay*, &c.

Siam.

12. In the Kingdom of *Siam*, Factories at *Siam*, its Capital, and at *Ligore*.

Aracan.

13. And at *Aracan*, in the Kingdom of that Name.

Celebes, *Solor*, *Borneo*, &c.

14. In the Iſle of *Celebes*, they have *Macaſſar*, its Capital.

15. In the Iſles of *Borneo*, *Solor*, *Buro*, *Poleroon*, *Noro*, *Ceram*, *Ambay*, &c. the *Dutch* Company have Forts or Factories; and in the *Spice Iſlands* of *Amboyna*, *Ternate*, *Banda*, *Timor*, &c. they are

abſolute Sovereigns, poſſeſſing *ſolely* and *excluſively* all the Spices of *Cloves*, *Nutmegs*, and *Mace*, no where elſe to be found upon Earth, that is as yet certainly known.

16. In *Perſia*, *Gomroon*, and under it *Iſpahan* and *Balſora*.

IIIdly, By *France*. The Forts and Factories of the *French Eaſt-India* Company in and near *India*.

Poſſeſſed by *France*, viz.

Thoſe of the *French Eaſt-India* Company in *India*, were, *viz.*

1. A Factory at *Surat*.

2. On the Coaſt of *Coromandel*, the ſtrong Fort and very populous Town of *Pondichery*, with ſome ſubordinate ones. Piece-goods, Diamonds, and Rice, being the ſtaple Merchandize not only here, but on all this Coaſt. It has, however, no Harbour, being only an open Road like *Fort St. George*, where they lade and unlade their Merchandize by Boats. But this Fort and City of *Pondichery* was taken by our *Eaſt-India* Company's Forces, jointly with ſome of our King's Troops, in the Year 1761.

3. In *Bengal*, they have *Balaſore* and *Charnagar*, &c.

Bourbon Iſle.

4. The *French* Iſle of *Bourbon* [formerly called *Maſcareen* Iſle] to the Eaſtward of the great Iſland of *Madagaſcar*, ſerves principally for a refreſhing Place for their *Eaſt-India* Ships: They have alſo, more lately, raiſed Quantities of *Coffee* therein, and made ſundry other good Improvements,

IVthly, By *Portugal*. The remaining Forts and Factories of *Portugal* in *Eaſt-India*, and near it.

Portugal (as already noted) was once Lords-Paramount of all the Trade of *Europe* to *Eaſt-India*, from whom the *Dutch* gradually plucked off the beſt Feathers of their Wings. What they have ſtill left is but inconſiderable, compared with what they have loſt, or with thoſe of *England* and *Holland*, although they ſtill retain a great Sound.

South-Eaſt Coaſt of *Africa*. *Portugueſe.*

1. On the North-eaſt Coaſt of *Africa* beyond the *Cape of Good Hope*, they have *Quiloa*, *Mombaza*, *Melinda*, *Mozambique*, *Magadoxa*, &c. Ports very uſeful in their Voyages to and from *India*, originally ſettled by them for that End: They alſo get conſiderable Quantities of Gold and Drugs from thence.

2. In *Cambaya*, they ſtill retain the ſtrong Forts of *Diu* and *Daman*, (often in vain beſieged by great Armies of the *Moguls*.)

3. On the *Malabar* Coaſt, *Baſſaim*, near the Iſle of *Salſet*, *Choul* and *Bandara*: *Goa*, on the ſame Coaſt, is the Capital of all their *Eaſt-India* Settlements; now inconſiderable for its Commerce, and much decayed from its ancient Splendor. Alſo the Iſles of *Elephant*, *Carranjaa*, *Anjediva*: Alſo *Annanor*, *Cavarda*, *Mangalor*, and *Moors Fort*.

4. On the *Coromandel* Coaſt, they have *St. Thomas*, (or *Meliapour*.)

Macao Iſle, at *China*.

5. And laſtly, they have ſtill *Macao* Iſle, near the Mouth of *Canton* River in *China*, but tributary to, and abſolutely at the Mercy of the *Chineſe*.

Vthly, By *Denmark*. *Daniſh* Settlements in *Eaſt-India*.

The *Danes* have long poſſeſſed the Port and Fort of *Tranquebar*, on the *Coromandel* Coaſt, and the ſubordinate one of *Daneſburg*.

VIthly, *Sweden*. *None*.

The *Swedes* have as yet no eſtabliſhed Factories in *India*, although they generally ſend one or two Ships yearly thither. Neither have they at preſent any Settlements any where out of their own Kingdom, but in *Germany*.

VIIthly, By *Spain*. *Spain*'s Settlements in *Eaſt-India*, or near it. *Philippine Iſles*.

Spain poſſeſſes the beſt Forts of the *Philippine Iſles*, as *Manilla*, the Capital Town and Port of the large Iſle of that Name, otherwiſe called *Lucon*. To which Port of *Manilla*, the *Spaniards* from *Acapulco*, in *Mexico*, generally ſend two great Ships yearly. But *Spain* can carry on no Trade at all directly from *Europe* to *Eaſt-India*; being bound by Treaty with *Portugal*, not to ſail thither by the *Cape of Good Hope*, as well as by the general Treaty of *Weſtphalia*, *Anno* 1648.

Dutch, the only *Europeans* trading at *Japan*.

N. B. The *Dutch Eaſt-India Company* are the only *Europeans* who have any Trade to the Empire of *Japan*, from their great Emporium of *Batavia*; but are not permitted to have any Fort or Factory at *Japan*.

No *European* Factories permitted in *China*.

Neither are any of the *European* Nations, who trade to *China*, permitted to have Factories there. The *Engliſh* Company had formerly Settlements on the Coaſts of *Cochin-China* and *Tonquin*, but now they only trade thither occaſionally. It is not the Deſign of our Work to be particular with reſpect to all the Squabbles which the ſeveral *European* Nations have had with each other in *India*, or with the ſeveral Nations of the *Eaſt*, (that being largely done by Voyagers long ſince) but purely to point out the general Extent of their Commerce in that remote Part of the World.

I. All Clanſhips, Vaſſalage, and heretable Juriſdictions in *Scotland*, legally abrogated, and thereby the Liberties of the Subjects there placed on the ſame Footing as in *England*.

After a mad Rebellion, raiſed in the Summer of the Year 1745, by a Number of deſperate and ſtupid Tools of our hereditary Foes the *French*, and carried on till the Spring of the following Year 1746; the Legiſlature at length wiſely determined to enact what ſhould undoubtedly have been made an eſſential Preliminary of the conſolidating *Union* of the two Kingdoms of *England* and *Scotand*, (concluded forty Years before) whereby, and not till now, the true and ſolid Liberties of the People of *Scotland* were eſtabliſhed, not only in thoſe Parts of that Country called the *Highlands*, (the Source of all the Rebellions againſt the beſt Conſtitution upon Earth) where *Clanſhip*,

A. D. 1747

ſhip, or an abject Submiſſion of the Bulk of the People to the ſovereign Will of their Chieftains, had ever prevailed even from the earlieſt Times, but even (though in a leſſer Degree) in ſundry Parts of the *Low Country* of *Scotland*: That is to ſay, it was now legally determined to put all the People of *Scotland* upon the ſame equitable and rational Footing of Liberty and Property, with their Fellow-Subjects of *England*, by an Act of Parliament of this 20th Year of King *George* II. (Cap. xliii.) [*For taking away and aboliſhing the heretable Juriſdictions in that Part of* Great Britain *called* Scotland, *and for making Satisfaction to the Proprietors thereof: And for reſtoring ſuch Juriſdictions to the Crown: And for making more effectual Proviſion for the Adminiſtration of Juſtice throughout that Part of the united Kingdom, by the King's Courts and Judges there*, &c.] The Preamble whereof ſets forth, "That for remedying the Inconveniencies that have ariſen and may ariſe from "the Multiplicity and Extent of heretable Juriſdictions in that Part of *Great Britain* called *Scotland*; for making Satisfaction to the Proprietors thereof; for reſtoring to the Crown the Powers "of Juriſdiction originally and properly belonging thereto, according to the Conſtitution; and "for extending the Influence, Benefit, and Protection of the King's Laws and Courts of Juſtice "to *all* his Majeſty's Subjects in *Scotland*; and for rendering the Union more complete;—it was "enacted, Iſt, That all *heretable Juriſdiction of Juſticiary*, and all *Regalities* and *heretable Baillieries*, "and all *heretable Conſtabularies*, (other than the Office of *High Conſtable of Scotland*) and all "*Stewartries*, being Parts only of Shires or Counties; and all *Sheriffſhips* and *Deputy-Sheriffſhips* "of Diſtricts, being Parts only of Shires or Counties in *Scotland*; poſſeſſed or claimed by any "Subject——and all Juriſdictions, Powers, Authorities, and Privileges thereunto appurtenant, "annexed, or dependant thereupon, ſhall be hereby, from *Lady-day* 1748, abrogated, taken "away, and totally diſſolved and extinguiſhed.

"Provided, That all Lands annexed to the ſaid *heretable Baillieries*, *Stewartries*, and *Conſtabularies*,—and the Rents and Duties, conſiſting in Money, Victual, Cattle, or other Goods,—ſhall "remain and belong to them, and their Heirs and Succeſſors, and continue to be enjoyed by, "and paid to them, notwithſtanding the Extinction of the ſaid Offices.

"IIdly, That all the before-named Juriſdictions, Powers, *&c.* belonging to ſuch Offices, ſhall "thenceforth be veſted in and exerciſed by the *Court of Seſſion* and *Court of Juſticiary* at *Edinburgh*, the Judges in the ſeveral Circuits, and the Courts of the ſeveral Sheriffs and Stewarts "of Shires or Counties in *Scotland* reſpectively;—and that the ſeveral Towns, Villages, Diſtricts, "and Bounds, which were ſubject to ſuch heretable Offices and Juriſdictions hereby diſſolved, "and the Inhabitants thereof, ſhall thenceforth be ſolely ſubject to the Juriſdiction and Authority "of the before-named Courts, and to ſuch other of the King's Courts reſpectively, as the ſaid Inhabitants would have been ſubject, in caſe ſuch hereditary Juriſdictions and Offices had never "exiſted.

"IIIdly, That, from thenceforth, all ſuch heretable Juriſdictions, in *Scotland*, not hereby before "extinguiſhed, granted to or poſſeſſed by any Subject, either heretably, or for Life, ſhall be "hereby reſumed and annexed to the Crown; and that the *Sheriffs* and *Stewarts* ſhall from "thenceforth be nominated and appointed by his Majeſty, his Heirs and Succeſſors.

"*Provided*,—That no *Sheriffſhip* or *Stewartry* in *Scotland* ſhall at any Time hereafter be granted "to any Perſon whatſoever, either heretably or for Life, *or for any certain Term exceeding one Year*: "And, *That no Juſticiary, Regality, Conſtabulary, or Bailliery, nor any Judicature, Authority*, &c. *of* "*the like Nature ſhall, at any Time hereafter be erected or granted in* Scotland.

"IVthly, Reaſonable pecuniary Compenſation ſhall be allowed to the Poſſeſſors of all ſuch heretable Juriſdictions hereby abrogated, and to every Clerk thereof: And Claims thereof ſhall "be duly entered and examined for this End, and be laid before the Parliament.

"*Provided* alſo, That no Baron, or Heretor, or Proprietor of Lands in *Scotland* ſhall henceforth, in criminal Caſes, exerciſe any Juriſdiction whatſoever, other than Aſſaults and ſmaller "Crimes, for which the Puniſhment ſhall only be a Fine not exceeding *twenty Shillings Sterling*; "or by ſetting in the *Stocks* for at moſt three Hours in the Day-time,—or elſe by Impriſonment "not exceeding one Month.——And, in *Civil Cauſes*, ſuch Baron or his Baillie ſhall hold no "Plea, nor judge in any Cauſe exceeding *forty Shillings Sterling*; other than for recovering from "the Vaſſals or Tenants of his Lands and Heritages their Rents, or the Dues of their Mills.—— "Priſons ſhall have Windows or Grates, open to Inſpection from without, ſo as the Priſoner may "be viſited and converſed with; and none to be impriſoned but by Warrant, expreſſing the Cauſe "of Impriſonment.

"*Provided*, however, that the Juriſdiction of *Fairs* and *Markets*, of *Coal-works*, *Salt-works*, and "*Mines*, be, as formerly, reſerved to their Heretors; but without a Power of inferring the Loſs "of Life or Demembration.————*Provided* alſo, that nothing in this Act ſhall extend to prejudice the Juriſdiction veſted by Law in any Royal Borough in *Scotland*, or, in cumulative Caſes, "to Burghs of Regality and Barony."————The reſt of this long Act relates to *Poyndings* (or "Seizures); to the Regulations and Qualifications of Sheriffs, and their Deputies, Circuit-courts and Appeals therefrom, in certain Civil Cauſes, and to Fines, *&c.*

This excellent Statute may, not unfitly, be termed a new *Magna Charta* to the free People of *Scotland*; who, from this Time, (though perhaps not merely or ſolely in direct Conſequence thereof, but alſo from other concurring Cauſes) have undoubtedly moſt viſibly increaſed in Commerce, Manufactures, Wealth, and general Induſtry; to a Degree ſaid to be almoſt amazing to ſuch as, after ſome Years Abſence, have lately viſited that Part of the united Kingdom. So great is the Influence of Liberty in favour of Induſtry and Commerce.

Scotland's great Increaſe of Commerce, Manufactures, Wealth, and Induſtry, ſince the paſſing of the above Law.

II. *Ward-holdings* in *Scotland* converted by Law into *Blanch* and *Feu-holdings.*

N. B. “It having been found by Experience, that the Tenure of Lands in *Scotland*, by *Ward-holding*, and the Conſequences of the ſame, being the Caſualties of *Ward-marriage* and Recognition, had been much more burdenſome and prejudicial to the Vaſſals by that Tenure, than beneficial to the Superiors:” It was aboliſhed by the 50th Statute of the ſame Seſſion, [*For taking away the Tenure of Ward-holding in* Scotland, *&c.*] enacted, “That the ſame be converted into *Blanch-holding* and *Feu-holdings*, &c. to be farther regulated, with reſpect to the Recompence, by the *Court of Seſſion in* Scotland, *&c.*” This Act ſeems to have been all that was wanting for compleating the Freedom of Vaſſals in *Scotland*.

A Law for naturalizing of the Proteſtant *Moravians* ſettled in the *Britiſh Plantations* in *America.*

There was another Law of this ſame Year and Seſſion of Parliament, extremely well-judged for the Advancement of the Proſperity of the *Britiſh American Plantations*, viz. An Act (Cap. xliv.) *To extend the Proviſions of an Act made in the 13th Year of his preſent Majeſty's Reign*, intituled, “(An Act for naturalizing ſuch *foreign Proteſtants*, and others therein mentioned, as are ſettled or ſhall ſettle in any of his Majeſty's Colonies in *America*,”) *to other foreign Proteſtants who conſcientiouſly ſcruple the taking of an Oath.* This Law was expreſsly intended, “in favour of *the Congregation of* Moravian *Brethren and other foreign Proteſtants, (not Quakers) who conſcientiouſly ſcruple the taking of an Oath*, and are ſettled in his Majeſty's Colonies in *America*; and whereas they and many others of the like Perſuaſion are deſirous to tranſport themſelves thither, if the Benefit of that Act were extended to them,—it was now enacted, that foreign Proteſtants, before deſcribed, born out of the Ligeance of his Majeſty, who have inhabited, or who ſhall inhabit and reſide for the Space of ſeven Years or more, in any of his Majeſty's ſaid Colonies, without being abſent from the ſame longer than two Months at any one Time; and ſhall ſubſcribe the Declaration of Fidelity, and affirm the Effect of the Abjuration-oath,—and alſo the Profeſſion of their Chriſtian Belief, (as ſubſcribed by the 1ſt of King *William* and Queen *Mary*) ſhall be adjudged and taken to be his Majeſty's natural-born Subjects to all Intents and Purpoſes.——Provided ſuch Perſons, ſo to be thus naturalized, ſhall, within three Months next before his taking ſuch Affirmation and making ſuch Declaration, have received the Sacrament of the Lord's Supper in ſome Proteſtant or reformed Congregation in ſome of thoſe Colonies, and ſhall produce a Certificate thereof: When they ſhall enjoy all the Privileges of this Act and of that of the before-named 13th Year of the King, but ſhall however be ſubject to all the Reſtrictions of that Act relating to foreign Proteſtants thus naturalized: Provided alſo, that nothing in that Act, nor in the preſent one, ſhall be conſtrued to extend to naturalize any who, by Virtue of an Act of the 4th Year of his preſent Majeſty's Reign, intituled, [*An Act to explain a Clauſe in an Act of the 7th of Queen* Anne, (Cap. iv.) *for naturalizing foreign Proteſtants, which relates to the Children of natural-born Subjects of the Crown of* England, *or of* Great-Britain] are declared and enacted not to be intitled to the Benefit of the ſaid Act of the 7th of Queen *Anne*.”

Liverpool's vaſt and rapid Increaſe in Buildings and Inhabitants, by the vaſt Increaſe of its Commerce.

The Buildings and Inhabitants of the Town of *Liverpool* in *Lancaſhire*, being of late Years ſo greatly increaſed by its vaſtly-extended foreign Commerce, that, although until the 10th and 11th Years of King *William* the Third, it was not ſo much as made a diſtinct or ſeparate Pariſh from that of *Walton*, whereof it was a Part; and that thereby a new Church was erected therein. And that, it ſtill greatly increaſing, it had another Pariſh Church erected therein, by an Act of the 1ſt Year of King *George* the Firſt, *Anno* 1715. “And whereas by a Statute of this 21ſt Year of King *George* II. Cap. xxiv. it appeared, that its Buildings and Inhabitants were farther ſo greatly increaſed, that the ſaid Churches were not ſufficient to contain one Third Part of its Inhabitants profeſſing the Doctrine of the Church of *England*; another Church was hereby authoriſed to be erected in the ſaid Town.” By this laſt-named Statute, ſundry Regulations were enacted for cleanſing, paving, and enlightening the Streets of *Liverpool*, and for a good nightly Watch therein. Such have been, and ever will be, the Conſequences of an increaſing Commerce, *viz. Neatneſs*, *Beauty*, and *Safety*.

South Carolina ſtrikes into a *new* and ſucceſsful Production of *Indico.*

The Planters in the *Engliſh Sugar Colonies*, in the Infancy of thoſe Plantations, had cultivated conſiderable Quantities of *Indico*, as being always a great merchantable Commodity, whereby their Mother-country was then well ſupplied therewith. Some Authors have related, that in the Iſland of *Jamaica*, *Indico* was produced in ſuch Abundance, eſpecially in the Pariſh of *Vere*, that 300 Coaches have been ſeen at that Pariſh-church on *Sundays*. But a Tax of 3*s.* 6*d.* *per lb. Wt.* being by the Legiſlature laid on *Indico*, the Planters of *Jamaica* dropped the Cultivation thereof intirely; and altho' the Parliament afterward repealed that Duty, yet a Manufacture once loſt is not eaſily regained, more eſpecially in a Country ſo expenſive as *Jamaica* is. Yet what that People were not able or willing to effect, has at length been brought to bear by the induſtrious Planters of *Carolina*, greatly to their Honour, and, we hope, to their future great Benefit. In ſucceeding Times, the other *Weſt-India* Iſles found, that the planting of the *Sugar-cane* was beyond all other Things the moſt gainful, and therefore they, moreover, alſo gradually dropped the Cultivation of *Indico*. Nevertheleſs, the *French* Iſlands, in the Neighbourhood of *ours*, inſtead of following that Example, went on with annually increaſing their Quantity of *Indico*; inſomuch that (excepting what comes from *Eaſt-India*, and ſome which *Spain* imports from her *American* Colonies) *France*, till about this Time, ſupplied the greateſt Part of *Europe* with it from their *Weſt-India* Iſlands;—and *Britain* and *Ireland* alone have been, by common Eſtimation, reckoned to have paid to *France* about 200,000*l.* annually for *Indico*. This would probably have been the Caſe ſtill, had not the People of both *North* and *South-Carolina* made this Year a ſucceſsful Attempt to propagate the Growth of *Indico* in that Province. Thoſe two Colonies had by this Time carried the Production of *Rice* to ſuch a Height, that, even in Time of Peace, its Quantity had over-ſtocked thoſe Parts of *Europe* to which they were wont to ſend it, ſo that they got but little by it; the Caſe was ſtill worſe when the War with *France* broke out, *Anno* 1743, by reaſon of the high Freight and Inſurances. This put the Planters of that fine Country upon trying to employ their Negroes on

A. D. 1747 ſundry new Manufactures of Linen, Woollen, &c. which they were before accuſtomed to take from *Great-Britain*; of which their ſaid Mother-country would ſoon have become jealous, and which, moreover, did not much turn out to their own particular Advantage. Upon this Occaſion, it was very fortunate for thoſe Colonies, that the true *Indico* Plant happened to be diſcovered to grow ſpontaneouſly almoſt every-where there. Whereupon, Eſſays began to be made a Year or two preceding this Year 1747, and the *Indico* anſwered Expectation ſo far, that in this ſame Year about 200,000 *lb. Weight* of it was ſhipped for *England*, and ſold very well, though not at firſt quite ſo well cured as the *French Indico*. This Succeſs produced a Petition to Parliament from the *Carolina* Merchants, in *April* 1748, for a ſmall *Bounty* on the Importation of *Indico* from *Carolina*, whereby the Planters might be encouraged to proceed ſo far, as not only to ſupply *Great-Britain* and *Ireland*, but likewiſe foreign Markets with ſo univerſal a Commodity. Whilſt, at the ſame Time, Petitions were encouraged from Merchants, Clothiers, and Dyers, from all Parts of *England*, in favour of this new Production, ſince brought to Perfection; and that as *Indico* is a Commodity without which a good blue Colour cannot be dyed, a Bounty might be allowed on its Importation in ſomewhat near the Terms of the *Carolina* Merchants Petition.—Whereupon, *Anno* 1748, an Act paſſed (the 21ſt of *George* the Second, Cap. xxx.) for allowing 6*d. per lb. Wt.* on all *Indico* raiſed in any of the *Britiſh American Colonies*, and imported into *Great-Britain* directly from the Place of its Growth; which has ſince then had a very good and ſucceſsful Effect.

European Ships at *China*, in this Year 1747.

The following Number of Ships from *Europe* were all that were at *China*, in this Year 1747, *viz.* eight from *England*; ſix *Dutch*; four *Swediſh*; and two *Daniſh*: In all twenty Ships. The *French* being at War with *Great-Britain*, did not ſend thither any Ships in this Year.

A *general Naturalization of foreign Proteſtants* twice in vain attempted to be re-enacted in *Great-Britain*.

1748 We have ſeen the Statute repealed of the 7th Year of Queen *Anne*, (Cap. v.) *For a general Naturalization of foreign Proteſtants*, by an Act of the 10th of that Queen, (Cap. v.) [*The Preambles to both which Statutes* (as we have ſhewn) *are as contrary to each other as Light is to Darkneſs.*] In the Beginning of 1748, an Attempt was made in Parliament, and a Bill brought into the Houſe of Commons, for the Revival of the firſt-named Statute, in behalf of a *general Naturalization*. But it was thrown out by a great Majority. The Subſtance of the Reaſons for rejecting it, was, *That we had poor Proteſtants of our own, even more than we could well provide for*; *and as a moderate Expence would enable any foreign Proteſtants who ſhall have brought any Subſtance with them ſufficient to obtain an Act of Parliament for that End*; ſuch only *were worth* our *while to be received and ſettled with us*. This was again brought into Parliament, in *April* 1751, but was then alſo rejected. On the other hand, let us, on this Occaſion, ſee what a very able Nobleman has ſaid on that Subject, (*viz.* my Lord *Moleſworth*, in the Preface to his *Engliſh* Tranſlation of *Hottoman*'s *Franco-Gallia*, *Anno* 1721, (p. 23--4, ſecond Edition) *viz.*

> “ What ſhould hinder *us* from an Act of *general Naturalization?*—Eſpecially, when we conſider, that no private Acts of that Kind are refuſed. But the Expence is ſo great, that few attempt to procure them, and the Benefit which the Public receives thereby is therefore ſo inconſiderable? ——Experience has ſhewn us the Folly and Falſity of thoſe plauſible Inſinuations, that ſuch a Naturalization *would take the Bread out of* Engliſhmens' *Mouths*. We are convinced, that the greater Number of Workmen of one Trade there is in any Town, the more does that Town thrive; and the greater will be the Demand for the Manufacture, the Vent to foreign Parts, and the quicker Circulation of the Coin. The Conſumption of the Produce both of Land and Induſtry increaſes viſibly in Towns full of People; nay, the more ſhall every induſtrious Perſon thrive in ſuch a Place; though indeed *Drones* and Idlers will not find their Account, who would fain ſupport their ſuperfluous Expences at their Neighbours Coſt, who make one or two Days Labour provide for four Days Extravagance. And this is the common Calamity of moſt of our *Corporation-Towns*, whoſe Inhabitants do all they can to diſcourage Plenty, Induſtry, and Population; and will not admit of Strangers but upon too hard Terms, through the falſe Notion that they themſelves, their Children, and Apprentices, have the only Right to ſquander their Town's Revenue, and to get, at their own Rates, all that is to be gotten within their Precincts.—And therefore ſuch Towns are, at beſt, at a Stand, very few in a thriving Condition, and theſe are where their By-Laws are leaſt reſtrictive: But moſt throughout *England* fall to viſible Decay, *whilſt new Villages, not incorporated*, or Towns more liberal of their Privileges, grow up in their Stead, till in Proceſs of Time, the firſt Sort will become almoſt as deſolate as *Old-Sarum* in *Wiltſhire*, and will as well deſerve to loſe their Right of ſending Repreſentatives to Parliament. For, certainly, a *Waſte* or a *Deſart* has no Right to be repreſented, nor by our original Conſtitution was ever intended ſo to be.”

His Lordſhip had immediately before ſaid, “ That it is a Truth which few will make a Doubt of, *That we are not one third Part peopled, though better ſo, in Proportion, than any other Part of* Europe, Holland *excepted*; *and that our Stock of Men decreaſes daily, through our Wars, Plantations, and Sea-voyages.*”

☞ Had his Lordſhip lived to ſee the Years 1759, 1760, 1761, and 1762, and the very great Difficulty there then was of manning our Fleets and Armies, he would probably have been much farther confirmed in the Expediency of a *general Naturalization*.

Proportion paid by the ſeveral Towns of the Province of *Holland* to their old *Exciſe*, tending to ſhew their proportional Wealth.

In this Year 1748, the Populace in *Holland* having compelled their Rulers to aboliſh the old *Exciſe-duty*, amounting to *Ten Millions of Gilders* for that ſingle Province; we thereby have learned, in ſome Degree at leaſt, the Proportion of the Wealth which the ſeveral other Places of that moſt populous Province, bears to its mighty Metropolis, *viz.*

	Guilders.
Amſterdam paid annually	3,802,720
Rotterdam (about one-fourth Part of *Amſterdam*)	997,950
Harlem (above one-fifth)	801,200
Leyden (above one-fifth)	783,130
Dort (almoſt one-ſeventh)	511,960
Gouda (almoſt one-eighth)	459,500
Alkmaer	267,100
Briel	232,290
Delft, *Schiedam*, and the *Hague*	1,492,860
Hoorn	153,240
Gornichem	141,760
Enchuyen	105,060
Monickendam	68,420
Purmerend	61,260
Medenblick	45,460
The *Iſlands* [on the Coaſt of *Holland*]	42,740
Edem	33,350
Total is *ten Millions*	10,000,000

State of the Trade of the *Britiſh Sugar Colonies*, compared with thoſe of *France*.

Whilſt the new Subſidy of 5 *per Cent.* on imported Commodities was in Debate, both within and without Doors at *London*, in the Year 1748, the *Sugar* Planters and *Weſt-India* Merchants, greatly alarmed thereat, publiſhed ſundry Eſſays tending to ſhew the Ruin, or at leaſt the great Detriment, which that Duty (which however took place) would bring on the Sugar Colonies. From thoſe Eſſays, as well as from the Cuſtom-houſe Accounts then laid before the Parliament, we may gather the true State of the *Britiſh Sugar Trade* compared with that of *France*, taking the Year 1742 for the Rule; probably becauſe we were in that Year at Peace with *France*, though at War with *Spain*, viz.

Iſt, *Sugars* produced at the *French Weſt-India* Iſlands *Anno* 1742, *viz.*

	C. Wt.
On *Martinica*, *Guadaloupe*, and the other leſſer Iſles	622,500
On *Hiſpaniola*	848,000
Total Hundred Weight	1,470,500

Being about the Quantity of 122,500 Hogſheads of 12 Hundred Weight each.

IIdly, *Sugars* produced at the *Britiſh Weſt-India* Iſles, *viz. Anno* 1742.

	Hogſheads.	
Imported into *Great Britain*	60,950	
Shipped from our Iſlands to the Northern Colonies and to foreign Markets	5,000	
Total Hogſheads	65,950	— or — 791,400 C.Wt.
Of which 60,950 Hogſheads there are exported from *Great Britain* to *Ireland*, and to all foreign Markets, Hogſheads	5,236	
Conſumed in *Great Britain*	55,714	
Hogſheads (at about 25 *l. per* Hogſhead)	60,950	— or about 731,400 C.Wt.
Total produced in that Year more by the *French* than by the *Engliſh*		— 679,100 C.Wt.

France raiſes in her *Weſt-India* Iſles almoſt double the Quantity of *Sugar* produced in the *Britiſh Sugar* Colonies.

This ſadly ſhewed the almoſt incredible Improvements which *France* had made in her *Sugar Iſlands* in about *forty* Years, whereby they were at this Time enabled to underſell *us* in moſt Places of *Europe*! Though we truſt the Time is ſince at length come, or at hand, That we ſhall regain our former great Exportation to foreign Parts of *Sugars* and other *Weſt-India* Commodities!

IIIdly, Thoſe Eſſays however do admit, That in Times of profound Peace, both with *France* and *Spain*, our *Sugar* Iſles may produce 75,000 Hogſheads of *Sugar* annually, 12 Hundred Weight each Hogſhead. Of which 70,000 Hogſheads may be annually imported into *Great Britain*; which, at 15 *l. per* Hogſhead, comes to

	£.
imported into *Great Britain*; which, at 15 *l. per* Hogſhead, comes to	1,050,000
And 5,000 Hogſheads ſent directly from thoſe Iſlands to *North-America* and to foreign Markets, at 10 *l.* each; with 50,000 Hogſheads of Rum and Moloſſes, at 6 *l.* on an Average, *per* Hogſhead	350,000
Total Value, in Sterling Money	1,400,000

In ſome Years *America* produces more *Sugar* than *Europe* can well conſume.

☞ The Tendency of thoſe Reaſonings was to demonſtrate that the then high Price of our *Sugars* was not owing to our Planters extravagant Profits; but merely to the ſmall Quantities produced in ſome Years. They alſo admitted, That, ſince *France* has ſo vaſtly improved her ſaid Colonies, there is more *Sugar* made in all *America* [including the *Spaniſh*, *Portugueſe*, *Dutch*, and

A. D. 1748

Daniſh Colonies] in ſome favourable Years than all *Europe* can conſume: Which was particularly the Reaſon of the low Price of Sugars between the Years 1728 and 1735. Now, ſay theſe Eſſays, if the Value of the *Coffee*, *Pimento*, *Logwood*, and *Mahogony*, from *Jamaica*, and of the *Ginger*, *Cotton*, and *Drugs*, from that and other *Britiſh Sugar Iſles* be added to the foregoing Account, the Importations from thoſe Iſlands may, probably, amount to 1,500,000 *l.* yearly.

Alſo of the *Britiſh Tobacco* Colonies.

There were alſo (whilſt the Bill for that Duty was depending in Parliament) ſundry Accounts publiſhed by the *Tobacco* Merchants for preventing that Commodity's being included therein. And it appeared upon a Medium of three Years, (in the Cuſtom-houſe Books) *viz.* 1744, 1745, and 1746, That there was imported into *England alone* [omitting the odd hundred Thouſands] *forty Millions* of Pounds Weight of *Tobacco* from our *American* Plantations. And by the like Medium there was exported *thirty-three Millions*: So that *England* annually conſumed *ſeven Millions* of Pounds Weight of *Tobacco*.

Tobacco its yearly Importation from thence into *Great Britain*; and its annual Value and Re-exportation, and Duty, variouſly given.

	l.	*s.*	*d.*
And if *England alone* were to pay the Duty of *four Pence three Farthings per* Pound on the ſaid *forty Millions* of Pounds, it would amount in Sterling Money to -	791,666	13	4
But as *thirty-three Millions* of Pounds are annually exported, and the whole Duty thereof drawn-back, the Duty is to be deducted - - - - - - - -	653,125	—	—
So the net Duty of the *ſeven Millions* conſumed in *England* is - - - - -	138,541	13	4
Now, valuing the *thirty-three Millions* of Pounds of *Tobacco* at *ſix Pence per* Pound Weight, that will be - - - - - - - - - - - - - - - - -	825,000	—	—
And if *Scotland* may be allowed to export annually *ſeven Millions* of Pounds, that, at *ſix Pence per* Pound, likewiſe comes to - - - - - - - - - -	175,000	—	—
There will then be annually exported from *Great Britain forty Millions* of Pounds, which, at *ſix Pence per* Pound comes to - - - - - - - - - -	1,000,000	—	—

Which ſaid Million Sterling may be deemed to be all clear Gain to the Nation, over and above this Trade's giving Employment to about 25,000 Tons of *Britiſh* Shipping. Some of the printed Accounts publiſhed on this particular Occaſion, for influencing the Legiſlature in favour of our *Tobacco* Colonies, [and which therefore are to be read with ſome Caution, like all others publiſhed for ſuch particular Ends] make our annual Importation of Tobacco into *Great Britain* to be one Year with another about 80,000 Hogſheads, weighing 900 Pound Weight each, or 72 Millions of Pounds. And they generally ſuppoſed one-fourth Part thereof, or 18 Millions, to be conſumed at home; and that the remaining 54 Millions were annually re-exported for foreign Conſumption.

Others made our total annual Importation of *Tobacco* but 62,000 Hogſheads, or 55,800,000 Pounds; and that *England* alone conſumes 12,000 Hogſheads thereof; which, if all paid the Duty of 4¾*d. per lib.* would yield 213,750 *l.* to the Crown. But, as conſiderable Quantities are ſmuggled inwards for Home-Conſumption, the whole Duty may not be above 150,000 *l.* and according to others of thoſe Papers but 130,000 *l.* Whereas (ſay they) if the whole for Home-Comſumption paid the Duty, it would yield much more: Which ſhews the great Loſs to the Revenue, only in this one ſingle Article by *Smuggling!*

A new Scheme laid before the *Britiſh* Parliament, for ſettling the *African* or *Guinea* Trade.

In *April* of the ſaid Year 1748, Application was made to Parliament by the then expiring *Royal African* Company, and their few Friends within Doors, for committing the Management of their Forts and Factories, (for the Preſervation whereof the Commons did not ſeem inclined to truſt that Company any more with Money) to a new Company, with a ſuitable Joint-Stock: Which Company they propoſed ſhould have "the licenſing and regulating the whole Buſineſs of *Pawn-brokers*, for preventing their buying or lending Money on ſtolen Goods, and for reducing their "exorbitant Rates of 50, 40, and 30 *per Cent. per Annum*, for Intereſt or *Premium*, to 20 *per Cent.* "at fartheſt." Which Scheme was to lay the Foundation of their propoſed Joint-Stock.

At the ſame time the Creditors of the *Royal African* Company petitioned the Houſe of Commons, for having their Claim paid out of the ſuppoſed Value of that Company's Forts on that Coaſt, now valued at 150,000 *l.* and propoſed to be paid by the new Company to the old one. Which plauſible Project had two different Views, *viz.* hereby the *old* Company would be enabled to pay all their Debts, the greateſt Part whereof was due to themſelves, [*i. e.* to the *Directors* and and their Friends] and would over and above have, probably, a Dividend to make on their then merely nominal Capital, on its Diſſolution.

IIdly, That the propoſed new Company ſhould ſpring up out of the Ruins of the ſaid *old* one and their Creditors, with a few others of their Friends; and would, doubtleſs, have made a good Intereſt on the Money they ſhould advance for the before-named Purpoſes out of the ſaid Scheme for regulating of Pawn-Brokers. For ſupporting of this plauſible Scheme, the *old* Company and their Creditors inſiſted, "That 150,000 *l.* was a very moderate Valuation of their Forts on the "*African* Shores; not only conſidering their very great Uſefulneſs againſt the Treachery and In-"ſults of the Natives, but likewiſe for Defence againſt the too frequent Encroachments of other "*European* Competitors with large Joint-Stocks!——That ſo far is the Objection ſo often made "from being juſt, *viz. That if all our Forts in* Africa *were to be demoliſhed, excepting* Cape-Coaſt-"Caſtle, *and alſo* James-Fort *in the River* Gambia, *thoſe two Forts, together with two or three Ships* "*of War always cruiſing thereabout, would be ſufficient to protect the Trade of the whole Coaſt*; that

"there

“ there is actually Need of more Forts than we now have, particularly at *Anamaboe* and *Sierra* “ *Leoné*, and alſo higher up on the River *Gambia*, where the *French* are ſtriving to ſupplant us. “ That it is admitted, That Ships of War, jointly with all the Forts, are needful; but, with- “ out our Forts, that would by no Means anſwer our Purpoſe on ſo uncivilized a Coaſt; where, “ for that Reaſon, a Joint-Stock Company is much better calculated for protecting the Commerce “ than any Number of private Perſons can be. Alſo, that thoſe Forts are very greatly uſeful for “ our *Negro-Trade*; without which our *American* Plantations could not be ſupported; more eſpe- “ cially as the beſt *Negroes* are purchaſed at and about thoſe Coaſts where the Company's Forts “ and Settlements are: From which Coaſts alſo we import *Gold*, *Ivory*, *Bees-wax*, *Beaver*, and “ many other valuable Commodities, in Exchange for *Britiſh* Manufactures and our own *Eaſt-* “ *India* Merchandize.——Laſtly, Without ſuch Forts and Settlements, it would be not only ex- “ tremely difficult to protect, and, in Caſes of Diſtreſs, to relieve our Ships trading on that “ Coaſt, but alſo to ſecure the in-land Trade thereof.” Notwithſtanding all which at leaſt ſpecious Propoſals, the *African* Company's Papers remained on the Table to the End of that Seſſion of Parliament: So difficult did our Legiſlators find it at this Time effectually to ſettle that Trade!

The general Peace at *Aix la Chapelle*.

All Parties being weary of War, a Peace was, in this ſame Year 1748, concluded at *Aix la Chapelle*. Whereby all that had been conquered by *France* in the *Auſtrian* and *Dutch Netherlands* was reſtored to their reſpective Sovereigns. Moreover, between *Great Britain* and *France*, it was ſtipulated, mutually to reſtore whatever Forts or Territories had during this War been taken on either Side: Whereby *Fort St. George* in *India* was reſtored to our *Eaſt-India* Company; as, on the other Hand, the Iſland of *Cape Breton*, and its Town and Fortreſs of *Louiſburg*, were reſtored to *France*.

Arguments for and againſt the Continuance of the *South-Sea* Company's *Aſſiento* Trade to *Spaniſh America*.

With reſpect to *Spain*, ſhe indeed acceded to the general Peace; but without any particular Stipulations in Point of Commerce between *Great Britain* and her. What related to the *South-Sea* Company's Commerce, on one Hand, and the Depredations of the *Spaniſh Guarda Coſtas*, on the other, being referred to the diſagreeable and tedious Way of negociating (by Sir *Benj. Keene*) at *Madrid*. In the mean Time, it was plain, That the Court of *Spain* never intended to permit another *annual South-Sea* Ship to trade to their *Weſt-Indies*, there being but about four Years to run of the Term of that *Contract*, [*viz.* forty Years from 1713 to 1753] the ſeveral Interruptions of the Trade being deducted or allowed for. And whilſt this Suſpenſion continued, many Things paſſed in Converſation, and ſundry Eſſays were publiſhed for and againſt that Manner of Trading. In favour of it, it was ſaid, That the great *annual Ship* uſually conveyed about 250,000 *l.* Value in Manufactures from hence to the *Spaniſh Weſt-Indies*, for the Company's Account; and that in each of thoſe great Ships there went about 50,000 *l.* more in *private Trade:* Upon which Trade, it was alleged, a Profit of near *Cent. per Cent.* was made. That therefore the Gain to the Nation was greater this Way than in or by the old Channel of our Trade by the Way of *Cadiz*, even though the *Jamaica* Smuggling Trade were included therein: And that, although the *South-Sea* Company might not be ſo great Gainers, yet their Factors, Agents, *&c.* brought Home great Fortunes, frequently in a very ſhort Space of Time; and our ſaid *annual Ship*'s Cargoes kept out the ſupplying of the *Spaniſh Weſt-Indies* by the *French*, *Dutch*, &c. to our Nation's great Emolument.

The *Spaniſh Aſſiento Contract* determined to be given up.

On the other Hand, it was aſſerted, and very generally believed, That the *South-Sea annual Ship* had occaſioned a vaſt Decreaſe of our annual Exports to *Spain*, (ſome ſaid even ſo much as to one Half of former Exports) whilſt at the ſame Time our Imports from *Spain* have been gradually increaſing. That the Superiority of our Arms forced the *Aſſiento Contract* on *Spain*, againſt their Inclinations, and on that Score the *Spaniſh* Court and Traders have diſcouraged our Manufactures formerly ſent to *Cadiz*, and encouraged thoſe of *France*, *Flanders*, and *Holland*.——That of the Cargoes of our ſaid *annual Ship* itſelf, a great Deal conſiſted of the Merchandize of foreign Nations, and particularly of thoſe of *France* and *Holland*, for Aſſortments for the *Spaniſh* Markets in *America*.——That the *Aſſiento Contract* had enhanced the Price of *Negroes* for our own Colonies.——That our ſupplying the *Spaniſh Weſt-Indies* ſo regularly with *Negroes* had encouraged them to raiſe greater Quantities of Sugar and Tobacco, to the Detriment of our own!——That the *Spaniſh* Court having always Effects of the *South-Sea* Company's in their *American* Ports, had it conſtantly in their Power to make *Seizures* of thoſe Effects on various and often unjuſt Pretences. Thus, in the Year 1718, the Company's Loſs hereby was computed at about 225,000 *l. Sterling*; and, in 1727, to about Half as much more; beſides the Seizure by the War now concluded, and not yet juſtly computed; and the many other Violences of the *Spaniſh American* Governors and Agents.———Finally, as the Company had undoubtedly, upon the whole, been Loſers by their Trade, and as they had only four Years more of their *Aſſiento Term* remaining, which *Spain* was determined not to renew, at leaſt on any promiſing Terms; for theſe and ſuch-like Reaſons, it was concluded by the *Britiſh* Court, to inſtruct her Miniſter at *Madrid*, to obtain the beſt Equivalent that could be procured for the remaining ſhort Term of the Company's *Aſſiento Contract:* The Reſult of which ſhall be ſhewn in its Place.

The *Orphans Fund* of *London* farther continued and ſtrengthened.

By a Statute of the beforenamed 21ſt Year of King *George* II. the *Fund* of the *Orphans* of the City of *London* was farther prolonged and ſecured; by continuing the 6 *d. per* Chaldron or Ton on Coals and Culm, which was to expire at *Michaelmas* 1750, by the 5th and 6th of *William* and *Mary*) for thirty-five Years longer, for the following Purpoſes, *viz.* 1ſt, for raiſing 3,000 *l.* yearly to the *Mercers Company*, for Payment of their Annuities and Debts; and, 2dly, the Reſidue thereof for making Part of the *Orphans Fund*; for the Benefit of which alſo all the City Manors, Lands, *&c.* ſhall ſtand charged with the yearly Sum of 2,000 *l.* over and above the 8,000 *l.* applied by former Laws.—“ And as the Fund for raiſing the 4 *per Cent.* Intereſt on the “ *Orphans* Capital Stock has produced a very large Surplus, including 21,735 *l.* 17 *s.* 9 *d.* due at “ *Midſummer* 1748, to make good the yearly Sum of 2,000 *l.* which by a former Act ought to “ have

A. D. 1748 "have been raiſed on the perſonal Eſtates of the Citizens, this Surplus ſhall be applied to pay off "the principal Sum of the *Orphans* Debt. No Orphan, under Age, ſhall be paid off, ſo long "as there ſhall be others *not Orphans*, or not under Age, to be paid off. The Chamberlain of "*London* ſhall yearly, at *Michaelmas*, lay before both Houſes of Parliament an Account of the "Surplus ariſen on the ſaid Fund, what has been paid off the Principal, and what ſhall remain "thereof unpaid off."

☞ By a Scheme, publiſhed *Anno* 1755, for building a new Bridge croſs the *Thames* from *Blackfriars*, the above-named Surplus, on an Average of five Years to *Midſummer* 1755, amounted to 4,444 *l. per Annum*; upon which the Propoſer was for raiſing Annuities for Lives, which with 20,000 *l.* more to be raiſed by voluntary Subſcription (he ſays) would raiſe a Sum ſufficient to build ſuch a Bridge. He alſo ſays, that the whole *Orphans Debt* amounted, at *Midſummer* 1755, to 687,234 *l.* 6 *s.* 10 *d.*

An additional Bounty of 20 *s. per* Ton granted to all *Britiſh Whale fiſhing* Ships:

1749 We have ſeen, that ſeveral Statutes have been made at different Times for the Encouragement of the Subjects of *Great Britain* to carry on and improve the *Whale Fiſhery*: And as the Enlargement thereof would be of very great Advantage to our Trade and Navigation, an Act of Parliament of the 22d Year of King *George* II. (Cap. xlv.) paſſed, "*For the farther Encouragement* "*and Enlargement thereof, and for continuing ſuch Laws as are therein mentioned relating thereto; and* "*for the Naturalization of ſuch foreign Proteſtants as ſhall ſerve, for the Time therein mentioned, on* "*board ſuch Ships as ſhall be fitted out for the ſaid Fiſhery.* Whereby the ſeveral Acts of Parliament "in Favour of that Fiſhery were now farther continued: And over and above the Allowance of "*twenty Shillings per* Ton enacted by the 6th and continued by the 13th of King *George* II. a far-"ther Bounty or Allowance was hereby granted of *twenty Shillings* more *per* Ton. Moreover," [for the Encouragement of the *Britiſh* Colonies in *America* in this Fiſhery, and for the promoting of their building of large Ships there] "it was hereby farther enacted, That every Ship built or "fitted out in any of thoſe Colonies of 200 Tons and upwards, and not being more than two "Years old from the firſt building thereof, ſetting out from any Port of the *Britiſh American* "Dominions on the *Whale Fiſhery*, manned and navigated according to the Navigation-Acts, and "properly fitted and furniſhed for that Fiſhery, ſhall likewiſe be intitled to the ſaid joint Bounty "of *forty Shillings per* Ton, on their Arrival from the ſaid *Whale Fiſhery* in ſome Port of *Great* "*Britain*, on certain farther Conditions therein ſtipulated.——Foreign Proteſtants who ſhall "ſerve three Years on board *Britiſh Whale-Fiſhery* Ships, and ſhall take the uſual Qualification-"Oaths, ſhall be deemed natural-born Subjects of *Great Britain* to all Intents and Purpoſes, (as "far as other foreign Proteſtants can ſo be) provided they ſhall have received the Sacrament of "the Lord's Supper in ſome *Britiſh* Proteſtant or reformed Congregation, within three Months "before his taking the ſaid State-Oaths, and ſhall produce a Certificate thereof ſigned by the "Miniſter and two other Witneſſes. Yet ſuch naturalized Foreigner ſhall loſe his Naturalization, "upon his being more than *twelve* Months out of *Great Britain* or *Ireland*, or his Majeſty's Plan-"tations in *America*."

And the ſaid Bounty is extended to Ships of the *Britiſh American* Colonies.

Foreign Proteſtants ſerving three Years in this Fiſhery ſhall be deemed naturalized, on certain Conditions.

A Compariſon between the Benefit to *Great Britain* of the Trade directly to *Cadiz*, and thence to *Spaniſh America*, and the *South-Sea* Company's *Aſſiento Contract*.

Whilſt Sir *Benj. Keen*, the *Britiſh* Miniſter, was treating with the Court of *Madrid* of all the commercial Differences between the two Nations, our *London* Merchants who traded to *Cadiz* handed about a manuſcript Paper, tending to prove, that the Trade by the *South-Sea* Company's annual Ship directly to the *Spaniſh Weſt-Indies* was not ſo beneficial to the *Britiſh* Nation in general, as was the former Method of our ſending Goods directly to *Cadiz*, and thence with the Regiſter-Ships to the *Spaniſh Weſt-Indies*.

	Dollars.
"Iſt, That Paper ſuppoſes the whole Out-ſet (Ship and all) of a Ship of 600 Tons, "with her Cargo, from *Cadiz* to *La Vera Cruz*, to amount to	346,903
"IIdly, And the net Returns from *La Vera Cruz*, (deducting *Commiſſion*, *Indulto's*, "&c.) to be	717,134¼
"Deduct the Out-ſet	346,903
"And there remains the Profit	370,231¼

"Being near 107 *per Cent.* Profit. But, if Inſurances be deducted for thoſe who would not run "the Riſque of the Sea, and which in Time of Peace would not exceed 12 *per Cent.* then the "remaining Profit would be 95 *per Cent.* But the chief Advantage in this Affair is ſuppoſed to "ariſe from having both the Ship and the King's Licence one's own. For," (ſays this Author) "beſide the conſiderable Freights which ſuch Ships make, there are very great Profits "made by the privileged Goods embarked thereon.

"IIIdly, Next, we have the particular Aſſortments of ſuch a Cargo, with the ſeveral Countries they are had from, *viz.*

	Dollars.
"1. Purchaſed chiefly at *Cadiz* (though not all *Spaniſh* Merchandize) Iron, wrought "and unwrought, Steel, Wax, (which muſt be whitened at *Cadiz*) *Genoa* Paper, *Brabant* Linen, *Dutch* Knives, Wines, Brandy, and ſundry ordinary Stowage-Goods, "amounting in all to	46,300.
"2. *Britiſh Manufactures*, viz. Long-Ells of various Colours, Says, Shalloons, Hair "and Worſted Camblets, Bays, *Spaniſh* Cloths, Worſted Stockings, Hats, and Hard-"ware; in all	115,500.
"3. From *Flanders*; 'Stamins, coarſe Says, *Buratos*, *Lamparillas*, *Brabant* Linen, "bleached, and *Tournay* ditto, unbleached	15,800.
Carry forward	177,600.

Brought forwards - - *Dollars*	177,600.
" 4. From *France*; *Britannias*, (broad and narrow) *Rouen* Linen, bleached, Dowlas, *Morlaix* Linen, Cambricks and Lawns; amounting to - - - - - - - -	49,350.
" 5. From *Germany*; *Sileſia* and *Hamburgh* Linens, Lawns, and ſundry other Sorts " of Linen, Thread, Calimancoes, &c. - - - - - - - - - - - - - - -	22,200.
" 6. From *Spain*, viz. *Genoa* Womens Stockings, *Spaniſh* double Taffaty of various " Colours, and *Spaniſh* Velvets - - - - - - - - - - - - - - - - - -	21,000.
" Total Amount of the Cargo, in *Dollars* - -	270,150.

" ☞ In this Aſſortment of Goods for the *Spaniſh Weſt-Indies*, the *Britiſh Manufactures* make up " One-third of the whole, which muſt go by the Way of *Cadiz*, in caſe the *Aſſiento* of the *South-Sea* Company be laid aſide; and by its being ſo laid aſide, the Value of all *Engliſh* Goods ſent " from *Cadiz* to the *Spaniſh Weſt-Indies*, will be increaſed to at leaſt three Millions of Dollars" [or above 675,000 *l.* Sterling] " yearly: And ſuppoſing, in Time of Peace, nine Millions Value in " Goods to be annually ſent from *Cadiz* to the *Spaniſh Weſt-Indies*, excluſive of *Britiſh* Manufactures," [few of which (according to this Author) were ſent that Way whilſt the *Aſſiento* was in Exerciſe] " and thereto be added the ſaid three Millions in Value of *Britiſh* Manufactures, then " the Diſpatches yearly from *Cadiz* to the *Spaniſh Weſt-Indies* will be twelve Millions of Dollars.— " Now," (continues this Author) " allowing that the *Britiſh* Merchants ſhould (as eaſily they " may) be *One-third* concerned in the ſaid Trade, which on a moderate Computation renders at " leaſt 50 *per Cent.* Profit, or *two Millions* of Dollars more gained to our Nation.——This he " thinks" (juſt enough from his own Premiſes, which however ſeem conſiderably exaggerated) " will be found to exceed any Advantage that has or ever can proceed from the *Aſſiento*, by " which it is notorious that the *South-Sea* Company have loſt very conſiderably:——He therefore " concludes, *that the Commercial Intereſt of* Great Britain *will be much benefited by the Extinction of the Aſſiento!* And, with reſpect to our political Intereſt, whilſt the ſaid *Aſſiento* ſubſiſts, it will " prove a continual Bone of Contention between two Nations whoſe mutual Intereſts are, more " than any other two Nations in *Europe*, to be cloſely united."

Nova-Scotia is at length effectually planted by *Britain*; and its Advantages diſplayed.

The Government of *Great Britain* began now ſeriouſly to conſider the great Importance of the Country and Ports of *Nova-Scotia*, which Captain *Thomas Coram* had, ſo long before as the Year 1735, (in his blunt but judicious Memorial and Petition to the Privy-Council) ſo well repreſented to be in a moſt naked and unſettled Condition; whereby the *French* had full Leiſure to make the moſt ſhameful and barefaced Encroachments on our ſaid undoubted Province! It was now at length begun *to be conſidered as the very Key of North-America!* Upon the concluding of the Peace of *Aix la Chapelle* therefore they ſent out a large Colony to a Place having a fine Harbour, where they ſettled and built a Town, which they named *Halifax*, from the Title of the noble Lord who then and ſince preſided ſo worthily at the *Board of Trade and Plantations.* The Excellence of this Province was *now* at length viewed in *three* different and advantageous Lights, *viz.* 1ſt, For its happy Situation, as capable of always annoying and intercepting our Enemies, and as a Barrier for *New-England.* 2dly, For the great Fiſhery of its adjacent Seas. And, 3dly, For its infinite Quantities of Timber for the Uſe of the Royal-Navy, beſides ſundry new Productions which may probably be hereafter raiſed therein.

A freſh parliamentary Enquiry into the *Hudſon's-Bay Trade* and *North-weſt Paſſage.*

Upon an Allegation in certain Pamphlets, &c. touching a *North-weſt Paſſage* to the Sea of *Japan*, that the *Hudſon's-Bay* Company had not hitherto encouraged any Attempts for finding ſuch a Paſſage, and that a more extenſive and beneficial Trade might be carried on to the Countries about *Hudſon's-Bay* if the Trade were laid quite open; the Houſe of Commons appointed a Committee to enquire into thoſe Allegations, whilſt Petitions from *Briſtol*, *Liverpoole*, &c. were ſent up, for laying that Trade open. Nevertheleſs, upon that Committee's full Enquiry and Examination of Witneſſes who had lived at *Hudſon's-Bay*, their Report gave very little Ground to hope for any great Increaſe of Commerce there, the Country being very inhoſpitable on the Sea-Coaſts; yet it appeared, that the in-land Countries to the South and Weſt of that Bay abound with fine Woods, Wild-fowl, wild Beaſts, River-fiſh, &c. and that Corn and Pulſe would grow thereon, were Plantations made. That however, conſidering the Company's Capital, &c. it did not appear, that they had not, in the main, done as well as could be expacted for promoting the Commerce there: That moreover it ſeemed very doubtful, whether, if the Trade were laid quite open, it might not be gradually loſt from *us* to the *French* of *Canada.* Neither did the Committee's Report give any great Hope of a ſafe Paſſage likely to be diſcovered in any practicable Latitude. One Mr. *Robſon* indeed, who had been Surveyor to the Company, and who ſeemed now a diſguſted Evidence againſt them, tells us, " That the Company's four ſmall Factories contained only 130 Servants, and two ſmall Houſes with only eight Men in each.—— " That their annual Exports were about 4,000 *l.* in Value; having, in Time of Peace, three " Ships each of 150 to 200 Tons Burden, with two or three ſmall Sloops ſtationed in the Bay.— " That there are inconteſtable Evidences of rich Copper and Lead Mines, yet the Company gives " no Encouragement for working them, nor for their Servants going into the in-land Countries. " ——That the Probability of a *Paſſage* is farther ſtrengthened from the late Diſcovery of Bays, " Inlets, and broken Lands, the weſtern Ends of which are not yet diſcovered, there having been " no Rivers as yet obſerved on the North-weſt Coaſt.——That the true Reaſon of the Company's " not acting for the general Benefit of the Nation is, becauſe they have had no legal" [*i. e.* parliamentary] " Right to their *excluſive* Trade ſince the Year 1698, at which Time the Act of Parliament expired, which confirmed their Charter for ſeven Years. If therefore," (ſays Mr. *Robſon*) " at this Period, the leaſt Evidence had been ſuffered to tranſpire, that the Climate is very " habitable, the Soil rich and fruitful, fit for both Corn and Cattle, rich in Mines, and the " Fiſheries capable of great Improvement; that, moreover, the Trade may even be extended

" by means of a naval Paſſage, or at leaſt by a ſhort Land-paſſage, to the Weſtern Ocean, had " proper Experiments been made thereof at that Time; and that the Legiſlature would have " taken the Right into its own Hands, and would have ſettled the Country, and laid the Trade " open for the Benefit of *Britain.*—That the Company therefore have contented themſelves with " dividing amongſt only about 100 Perſons a large Profit upon a ſmall Capital. And have not " only endeavoured to keep the true State of the Trade and Country an impenetrable Secret, but " have alſo induſtriouſly propagated the worſt Impreſſions of them. He therefore propoſed, Iſt, " That for preventing thoſe vaſt Territories from falling into the Hands of the *French*, from *Canada*, the Legiſlature would purchaſe the Company's Right to ſuch Lands as they have a legal " Title to,—and to lay the Trade open. IIdly, To ſettle the Rivers and adjoining Coaſts with " *European* Proteſtants. IIIdly, and Laſtly, To civilize the Natives."

We have handled this Subject ſo often and ſo fully, as to have quite exhauſted it; and we ſhall therefore leave it to the Judgment of the Public, after obſerving, that the Company's Opponents have, at different Times, advanced ſundry Things in favour of the Probability of a *Paſſage*, and alſo in behalf of the Goodneſs of the Lands and Climate, which ſeem too much exaggerated; and in this uncertain State the Subject may poſſibly remain to the End of Time.

National Debts at 4 *per Cent.* Intereſt reduced, 1ſt, to 3½, and next to 3 *per Cent.* Intereſt.

In this 23d Year of King *George* the Second, *Anno* 1749, a very great Addition of near 600,000*l. per Annum*, was begun to be gradually made to the *Sinking Fund*, by an Act of Parliament, *for reducing the ſeveral Annuities then bearing* 4 *per Cent. to the ſeveral Rates of Intereſt therein mentioned*, viz.

	l.	*s.*	*d.*
1. The principal Sum payable at the Exchequer, of - - - - - - -	312,000	—	—
2. Capital *Bank* Stock, - - - - - - - - - - - - - - - - -	8,486,800	—	—
3. Certain Annuities transferable at the Bank, - - - - - - - -	18,402,472	—	10
4. Capital Stock of the *Eaſt-India* Company, - - - - - - - - -	3,200,000	—	—
5. Capital *South-Sea Stock*, and old and new *South-Sea* Annuity Stock,	27,302,203	5	6½
Total,	57,703,475	6	4½

And it being the united Opinion of the King and Parliament, that nothing can ſo effectually contribute to make Trade flouriſh, as the leſſening the public Debts and Incumbrances, conſiſtent with Juſtice and public Faith; it was therefore hereby enacted, " That all the Proprietors of the " ſaid public Debts, incurred before *Michaelmas* 1749, who ſhall, on or before the 28th of *February* 1749-50, ſubſcribe their Names, or ſignify their Conſent to accept of an Intereſt of " 3 *per Cent. per Annum*, to commence from the 25th of *December* 1757, ſhall, in lieu of their " preſent Intereſt, receive 4 *per Cent. per Annum*, until the 25th of *December* 1750, and from " thence 3*l.* 10*s. per Cent.* until the 25th of *December* 1757; and no Part of the ſame (except " what is due to the *Eaſt-India* Company) ſhall be liable to be redeemed until the ſaid 25th of " *December* 1757."

Firſt Subſcription.

☞ This is what was called the *Firſt Subſcription*, becauſe, as we ſhall ſee, *all* the Proprietors of the above-named Debts did not come into this propoſed Subſcription within the Time limited by this Act, although the major Part of them did.

Second Subſcription.

And although the *Second Subſcription* to that Reduction was not enacted till the *Spring* of the Year 1750, yet, for Connection's ſake, we ſhall here give the Subſtance of an Act of this ſame Seſſion, *For giving further Time to ſuch of the Proprietors of the before named Annuities to ſubſcribe the ſame upon the Terms therein mentioned, and for redeeming* [*i. e.* paying off the principal Sums of] *ſuch of the ſaid Annuities as ſhall not be ſo ſubſcribed: And for impowering the* Eaſt-India *Company to raiſe certain Sums by transferable Annuities.*

The Terms of this ſecond Subſcription worſe than thoſe of the firſt Subſcription.

It recites, " That great Part of thoſe before-named Annuities had been ſubſcribed on the Terms " of the firſt-named Statute; it was therefore hereby enacted, that ſuch Proprietors as have not ſo " ſubſcribed, and who ſhall, on or before the 30th of *May* 1750, accept of an Intereſt of 3 *per* " *Cent.* to commence from the 25th of *December* 1755, (in the mean Time to have the ſame " Terms, in other reſpects, as the former Subſcribers have) ſhall not be redeemable till the ſaid " 25th of *December* 1755, may ſubſcribe on or before the ſaid 30th of *May* 1750: And ſuch as " ſhall not ſubſcribe on or before that Day, ſhall be redeemed and paid off." Thus the ſaid ſecond Subſcribers had a Reduction of their Intereſt from 3½ to 3 *per Cent*, two Years ſooner than thoſe of the firſt Subſcription: And ſuch as remained determined not to ſubſcribe at all, who however were not very many, were paid off their principal Sums out of the *Sinking Fund.* Laſtly, the *Eaſt-India* Company were impowered, by Conſent of the Commiſſioners of the Treaſury, (if they ſubſcribed their 3,200,000*l.* Stock and their one Million Annuities, by the 30th of *May* 1750) to borrow any Sums not exceeding 4,200,000*l.* by Sale of Annuities, *viz.* 3,200,000*l.* after the ſeveral Rates of Intereſt, in the Terms of this ſecond Subſcription, and one Million more at the Rate of 3 *per Cent. per Annum:* With which the *Eaſt-India* Company accordingly complied.

The Duty on *Raw-Silk* from *China* reduced to the ſame Duty as on *Raw-Silk* from *Italy.*

For promoting of the Silk Manufacture of *Great-Britain*, an Act of Parliament of the ſaid 23d of King *George* the Second, paſſed, " whereby the Duties till now payable on *Raw-Silk* imported " from *China*, by the *Eaſt-India* Company, were now reduced to the ſame Duty payable on *Raw-* " *Silk* from *Italy.*"

A. D. 1749

Raw-Silk encouraged to be raiſed in the *Britiſh American* Plantations.

In the ſaid 23d of King *George* the Second, *For the encouraging of the Growth and Culture of Raw-Silk in his Majeſty's Colonies or Plantations in* America. It was enacted, "That as it will "greatly tend to the Increaſe and Improvement of the Silk Manufactures of this Kingdom to en"courage the Growth of *Raw-Silk* in his Majeſty's Dominions in *America*, properly certified to be "really *Raw-Silk* of the ſaid Growth and Culture, the ſame may be imported Duty-free into the "Port of *London*, in Ships navigated and manned as by the Navigation-Acts." And as its Culture has ſince viſibly, though very gradually, increaſed there, and more particularly in *Carolina* and *Georgia*, it ſeems now probable, that in a reaſonable Space of Time thoſe two Provinces may hereafter have the new Honour of being denominated *Silk-Colonies*, provided they will ſteadily proceed in the ſaid Culture.

The City and Port of *Koningsberg*'s Increaſe of Shipping and Commerce, during the Year 1749.

From *Koningsberg*, the Capital of what was formerly named *Ducal Pruſſia*, (but now the Capital of the Kingdom of *Pruſſia*) by the common News of the 4th of *January* 1749-50, we learned, that the Commerce of that Port had been more conſiderable during the Year 1749, than in any of the preceding ones, *viz.* that 671 Ships had arrived there during the Year 1749, from the *North*, *England*, and *Holland*, with all Kinds of Merchandize, and a great Quantity of Wines, Brandies, *&c.* from *France*, *Spain*, the *Rhine*, and the *Moſelle:* On the other hand, 682 Ships had, within the ſaid Year, ſailed from thence, laden with *Corn*, *Hemp*, *Hides*, *Boards*, *Maſts*, &c."

Tonnage of the *Britiſh* Navy-Royal in three different Periods.

The eminent Author of a Pamphlet, (in p. 34.) under the Title of *Farther Conſiderations upon a Reduction of the Land-Tax*, [ſaid to be written by *R. N.* Eſq;] gives the Public a remarkable Account of the gradual Increaſe of the Tonnage of *Great-Britain*'s Navy-Royal, in three different Periods, *viz.*

In the Year 1715, it was - - - - - - - - - - - -	167,596 Tons
In the Year 1727, it was - - - - - - - - - - - -	170,862
And in 1749, it was increaſed to - - - - - - - -	228,215

The magnificent new Piers and Harbour at *Ramſgate*, firſt legally ſet on foot, for the Benefit and Safety of *Britain*'s mercantile Shipping.

An Act of Parliament (of this ſame Year) *For enlarging and maintaining the Harbour of* Ramſgate, *&c.* gave great Hopes to many People, that thereby our mercantile Shipping would find a much ſafer Retreat, in caſe of Storms, *&c.* than any we have hitherto enjoyed on the Coaſts of *Kent* and *Suſſex*. Its Preamble ſets forth, "That frequent Loſſes of the Lives and Properties of "his Majeſty's Subjects happen in the *Downs*, for want of a Harbour between the *North* and "*South Forelands*; the greateſt Part of the Ships employed in the Trade of this Nation being un"der a Neceſſity, at going out upon, as well as in returning from their Voyages, to paſs through "the *Downs*, and frequently by contrary Winds being detained there a long Time, during "which they (eſpecially the outward-bound Ships) are expoſed to violent Storms and dangerous "Gales of Wind, without having any ſufficient Harbour to lie in or retreat into, or from whence "they can receive any Aſſiſtance. And as a Harbour may be made at the Town of *Ramſgate*, "convenient for the Reception of Ships of and under 300 Tons Burden, and from whence "larger Ships in Diſtreſs in the *Downs* may be ſupplied with Pilots, Anchors, Cables, and other "Aſſiſtance and Neceſſaries: And by the ſmaller Ships taking Shelter in this Harbour, the "larger Ships may take the Anchorage which at preſent is occupied by the ſmaller, and by that "means their Anchors will be fixed in more holding Ground, and the Ships not be ſo expoſed to "the Ocean."——A great Number therefore of honourable and eminent Perſons are hereby appointed Truſtees for enlarging, *&c.* the ſaid Harbour of *Ramſgate*, and a Duty of Six-pence *per* Ton on all mercantile Shipping was hereby laid, for this End, and two very fine Piers have been run out a good way into the Sea, at the immenſe Expence of near 50,000*l.* *Sterling*; which, however, in the Opinion of many ſuppoſed to be competent Judges, has not hitherto anſwered Expectation; yet as the vaſt Scheme of this new Harbour is not as yet compleated, it ſeems but reaſonable for us to ſuſpend, till then, our abſolute Determination hereof.

Doctor *Buſching*, in his new Geography of *Ruſſia*, gives us the Amount of the Value (in the Year 1749) of the intire *Exports* of *Peterſburgh* with all the World, being 3,184,322 *Rubels*; and their Imports to be 2,942,242; whereby *Ruſſia*, or rather *Peterſburgh*, had a Balance in its Favour of 242,080 only: But with reſpect to *Great-Britain* alone, it ſtood thus, *viz.*

Exports thither from *Peterſburg*, - - - - - - - -	2,245,573 Rubels
Imports from *Great-Britain*, - - - - - - - - - -	1,012,209
Balance againſt *Great-Britain*, and in favour of *Ruſſia*, was	1,233,264

or, at 4*s.* 2*d.* *Sterling*, *per* Rubel, 256,950*l.* 16*s.* 8*d.* *Sterling*.

☞ Hereby (if that Author was rightly informed) it appears, Iſt, That *Ruſſia*'s Commerce with *Britain*, was not only more gainful to the former than all the reſt of *Europe*; but, IIdly, That *Ruſſia* was this Year a Loſer by all the reſt of *Europe*, of no leſs than 991,284 *Rubels*, being the Difference between what they gained from *Britain* alone, and the ſaid 242,080, gained from all *Europe*, *Britain* included. IIIdly, We hereby learn, how much it is *Ruſſia*'s Intereſt to cultivate the Friendſhip of *Great-Britain*; and we may add, how much it is the Intereſt of the latter to leſſen the ſaid Balance as ſoon as poſſible, as well as that with the other *Northern* Countries; of which we wiſh we had an equally diſtinct and adequate Account.

1750

The Riſe of the Corporation of the *Free Britiſh Fiſhery*.

At the Opening of the Seſſion of the *Britiſh* Parliament at the Cloſe of the Year 1749, the King, in his Speech, having recommended to their Conſideration the Improvement of the *Fiſhery*; the Houſe of Commons thereupon appointed a Committee, to inquire into the State, and to con-

A. D. 1750

ſider of Means for improving the *White-Herring*, *Cod*, &c. *Fiſhery*. And a Meeting being held in the City, of many eminent Gentlemen and Merchants, in the Beginning of the Year 1750, (*New Stile*) it was propoſed to form a *Joint-ſtock* of 500,000 *l.* provided the Legiſlature would grant an Encouragement of 4 *per Cent. per Annum* on that Capital, when employed in the following Manner, *viz.*

“ I. Upon the Payment of 300,000 *l.* thereof into the *Bank of England*, the Intereſt thereon ſhould commence, but ſhould not be payable until 100,000 *l.* thereof ſhould be actually employed in the ſaid Fiſhery.

“ II. That upon the Payment of the remaining 200,000 *l.* into the *Bank*, the Intereſt thereon ſhould commence in like Manner; but ſhould not be payable until another 100,000 *l.* ſhould be farther employed in the Fiſhery.” On this Occaſion, ſundry Pamphlets and News-papers attempted to demonſtrate the Feaſibility of *Great-Britain*'s gaining from the *Dutch* the Bulk of the *White-Herring Fiſhery*. Hereupon an Act of Parliament paſſed in the ſame Seſſion, *For the Encouragement of the White-Herring Fiſhery*; the Preamble whereof ſets forth, “ That the carrying on and Improvement thereof are of great Importance to theſe Kingdoms, tending to great Advantage to our Trade and Navigation, and for employing and providing for great Numbers of induſtrious Poor; provided the ſame could be carried on with a ſufficient Stock, under proper Regulations; and that reaſonable Encouragement be given to ſuch Perſons as are willing to carry on the ſaid Fiſheries. For the Encouragement therefore of ſuch Perſons, and for the better Regulation of the ſaid Trade, and for preventing Frauds and Impoſitions in the Management thereof, it was enacted, That the King, by Letters-Patents, may incorporate a Number of Gentlemen, herein named, and all others who ſhall be intitled to any Share in the Capital Sum of 500,000 *l.*——to be one Body-politic and Corporate, by the Name of *The Society of the Free Britiſh Fiſhery*; for the Term of 21 Years; during which Time they are every three Years to elect a Governor, Preſident, Vice-Preſident, Council, and other Officers,—who may make By-laws for the Management of the Trade,—may direct what Seals or Marks ſhall be put on the Barrels or Caſks of their Fiſh, for the counterfeiting whereof, a Penalty of 500 *l.* ſhall be incurred for each Offence.—This Corporation may make Calls on their Members; the firſt and ſecond Payments to be each 10 *per Cent.* of their Subſcriptions; and the ſubſequent Payments to be by the Direction of a general Court of the Society.—In failure of anſwering of ſuch Calls, the Society may diſpoſe (after thirty Days previous Notice in the *London Gazette*) of ſo much of the Stock of ſuch Defaulter as ſhall produce the Sum ſo called in. *Three per Cent. per Annum*, upon every 100 *l.* actually employed in the ſaid Fiſhery, ſhall be paid to the Proprietors of the ſaid Stock for fourteen Years to come, by the Receiver-general of the Cuſtoms, half-yearly.——The Society ſhall employ 100,000 *l.* at leaſt, within eighteen Months after the Date of ſuch Subſcription; and Accounts of the Monies which ſhall be ſo employed, ſhall be annually laid before the Parliament. And if *Loſs* ſhall ariſe by any Year's Adventure, and there ſhould be *Gain* by ſucceeding Years, the Gain ſhall be employed to make good the Veſſels and fiſhing Stock to the full Value of the ſaid original Sum of 100,000 *l.* before any Dividend ſhall be made.——A Bounty of thirty Shillings *per* Ton ſhall be annually paid out of the Cuſtoms, for fourteen Years to come, to the Owners of all decked Veſſels from twenty to eighty Tons Burden, which ſhall be built after the Commencement of this Act, for the Uſe of, and fitted out and employed in the ſaid Fiſheries, whether by this Society, or any other Perſons:——Such Veſſel to be a *decked Buſs* or Veſſel, built in *Great-Britain*, and ſhall proceed thereon from ſome Port of *Great-Britain*, manned and navigated as the Law directs;—and with a ſufficient Quantity of fiſhing Nets and Stores:——Certificates to be produced before the Collector and Comptroller of the reſpective *Britiſh* Ports, that it is their firm Purpoſe to proceed therein, either to *Braſſa-Sound* in *Shetland*, and be at the Rendezvous of the Fiſhery there, on or before the 11th of *June*, and ſhall not ſhoot or wet their Nets before the 13th of the ſame Month, and ſhall continue fiſhing amongſt the Shoals of Herring, as they move Southward, to the 1ſt of *October*; or they ſhall proceed to *Campbell-Town* in *Argyleſhire*, and be at the Rendezvous of the Fiſheries there, on or before the 1ſt of *September*, and continue fiſhing to the 31ſt of *December*, unleſs they ſhall ſooner have compleated their Lading of Fiſh;—ſhall keep a Journal of their Proceedings,—of the Quantity of Fiſh they ſhall diſpatch away to foreign Markets in their Tenders before they come into Port,—and of the particular Quantity they ſhall bring into Port with them;—to carry out twelve *Wincheſter* Buſhels of Salt for every Laſt of Fiſh ſhe is capable of holding, to be barrelled up in new Barrels;—ſhall have two Fleets of tanned Nets for every Veſſel of 70 Tons.—Every Veſſel of 20 Tons ſhall have ſix Men, and for Veſſels of greater Burden one Man more for every five Tons.——This Act ſhall not exclude any of the King's Subjects, though not of this Society, from fiſhing for White Herrings, Cod, &c. in the ſame Manner they might have done before this Act.———Any Number of Perſons who ſhall ſubſcribe 10,000 *l.* or more into the Society, and ſhall carry on the Fiſhery under their own Management, and on their own Account of Profit and Loſs, conformably to the Directions of this Act, (except their being obliged to uſe the Marks of the Society) and from the Port named by them; if they do ſubſcribe under the Name of the *fiſhing Chamber* of ſuch City, Town, or Port reſpectively, and ſhall ſend their Account of Monies expended in the ſaid Fiſheries, atteſted by three of the Committee appointed for managing the Matters of the ſaid Chamber, and be alſo ſigned by their Accountant, making Oath of its being a true Account, which Account to be tranſmitted to the Society in *London*, whoſe Accountant ſhall enter the ſame as a Sum expended in the ſaid Fiſheries by the Society, in the Account which he ſhall deliver in to the Commiſſioners of the Cuſtoms, as aforeſaid; the ſaid Chamber ſhall receive 3 *per Cent.* as the Society do for other Monies employed by them, after deducting the neceſſary Charges ariſing from the Receipt of the ſame.—Such Chambers as ſhall fiſh on their own Account ſhall not have any Profit or Loſs, ariſing from the Trade of the Society.”

Purſuant to this Statute, his Majeſty's Charter of Incorporation was granted, being dated on the 11th of *October* 1750. And,

Although the Succeſs of this moſt public-ſpirited Undertaking has not hitherto fully anſwered the Expectation of the worthy Promoters of it, (in favour of whoſe generous Zeal too much can hardly be ſaid) yet it is to be hoped, and greatly to be wiſhed, that by farther Trials they may at length ſucceed. It is indeed extremely difficult to beat another Nation out of a Trade they have ſo long proſpered in, even with the above great Encouragement from the Public, and more eſpecially ſo frugal a People as the *Dutch*, who can content themſelves with ſmaller Gains than other Nations, and carry on the Fiſhery every one on his own private Bottom. We ſhall therefore ſuſpend any farther Remarks, and only join in the univerſal Wiſh of all true *Britons* for its Succeſs. Laſtly, by a Statute of the 30th of the ſaid King, (*Anno* 1757) inſtead of thirty Shillings *per Ton*, the ſame is increaſed to fifty Shillings *per Ton*, Bounty on all the Ships built and employed by this *Fiſhery Company*, with certain Regulations relating to their Nets, *&c.*

The definitive Treaty of *Madrid* gives up the *South-Sea* Company's Trade to *Spaniſh America.*

The many Difficulties ſtarted by the Court of *Spain* againſt the carrying on of the *South-Sea* Company's *Aſſiento* Trade; the Oppreſſions of the *Spaniſh* Officers and Governors in the *Weſt-Indies*; the Frauds too obviouſly committed, on the other hand, by that Company's Agents in thoſe Parts, in ſpite of all the Company's Regulations and Reſtrictions; and the Complaints of the *Britiſh* Merchants trading to *Cadiz*; ſeemed now all to concur, at both Courts, for putting a final Period to a Trade which, without any ſubſtantial Benefit to *Great-Britain*, had given inſuperable Umbrage to the Court of *Madrid:* So that both Courts were the more eaſily brought into the Treaty of *Madrid*, concluded on the 5th of *October* [*N. S.*] 1750, *viz.* "The Ambaſſadors of both Kings, at the Treaty of *Aix-la-Chapelle*, *Anno* 1748, having then agreed to regulate, at a proper Time and Place, the Equivalent which *Spain* ſhould give in conſideration of the Non-enjoyment of the remaining Years of the ſaid *Aſſiento* of Negroes, and of the annual Ship granted to *Great-Britain*; their ſaid *Britannic* and *Catholic* Majeſties have now agreed on the following Articles, *viz.*

"I. His *Britannic* Majeſty yields to his *Catholic* Majeſty his Right to the Enjoyment of the *Aſſiento* of Negroes, and of the annual Ship, during the four Years ſtipulated by the ſaid Treaty of *Aix-la-Chapelle.*

"II. His *Britannic* Majeſty, in conſideration of a Compenſation of 100,000 *l. Sterling*, which his Catholic Majeſty promiſes to pay, either at *Madrid* or *London*, to the ſaid Company, within three Months at lateſt, yields to his Catholic Majeſty all that may be due to that Company for Balance of Accounts, or ariſing in any Manner whatſoever from the ſaid *Aſſiento:* So that the ſaid Compenſation ſhall be eſteemed as *a full and intire Satisfaction* on the Part of his Catholic Majeſty, and ſhall extinguiſh, from this preſent Time, for the future and forever, all Right, Pretenſion, or Demand, which might be formed in conſequence of the ſaid *Aſſiento*, or annual Ship, directly or indirectly, on the Part of his *Britannic* Majeſty, or on that of the ſaid Company.

"III. The Catholic King yields to his *Britannic* Majeſty all his Pretenſions or Demands in conſequence of the ſaid *Aſſiento* and annual Ship, as well with regard to the Articles already liquidated, as to thoſe which may be either eaſy or difficult to liquidate, ſo that no Mention can *ever be made of them hereafter on either Side.*

"IV. His Catholic Majeſty conſents, that the *Britiſh* Subjects ſhall not be bound to pay higher or other Duties, or upon other Evaluations for Goods which they ſhall carry into or out of the different Ports of his Catholic Majeſty, than thoſe paid on the ſame Goods in the Time of King *Charles* the Second of *Spain*, ſettled by the Cedulas and Ordonnances of that King or his Predeceſſors. And although the Favour or Allowance, called *Pie del Fardo*, be not founded upon any Royal Ordonnance, nevertheleſs, his Catholic Majeſty declares, that it ſhall be obſerved *now*, and *for the future*, as an inviolable Law: And all the above-mentioned Duties ſhall be exacted and levied, now and for the future, with the ſame Advantages and Favours to the ſaid Subjects.

"V. His Catholic Majeſty allows the ſaid Subjects" [*i. e. Britiſh* Subjects] "to take and gather *Salt* in the Iſland of *Tortudos*," [in the *Weſt-Indies*] "without any Hindrance whatſoever; as they did in the Time of the ſaid King *Charles* the Second.

"VI. He alſo conſents that the ſaid Subjects ſhall not pay any-where higher or other Duties than thoſe which his Catholic Majeſty's Subjects pay in the ſame Place.

"VII. His Catholic Majeſty grants, that the ſaid Subjects ſhall enjoy all the Rights, Privileges, Franchiſes, Exemptions, and Immunities whatſoever, which they enjoyed before the laſt War, by virtue of Cedulas or Royal Ordonnances, and by the Articles of the Treaty of Peace and Commerce made at *Madrid* in the Year 1667;—and they ſhall be treated in *Spain* in the ſame Manner as the moſt favoured Nation; and conſequently, no Nation ſhall pay leſs Duties upon *Wool* and other Merchandizes, which they ſhall bring into or carry out of *Spain*, by Land," [This Clauſe more eſpecially reſpects the *French* Nation] "than the ſaid Subjects ſhall pay upon the ſame Merchandizes, which they ſhall bring in or carry out by Sea. And all the Rights, Privileges, Franchiſes, Exemptions, and Immunities, which ſhall be granted or permitted to any Nation whatever, ſhall alſo be granted and permitted to the ſaid Subjects: And his *Britannic*

" *tannic* Majeſty conſents, that the ſame be granted and permitted to the Subjects of *Spain* in his " *Britannic* Majeſty's Kingdoms.

" VIII. His Catholic Majeſty promiſes to uſe all poſſible Endeavours, on his Part, to aboliſh " all Innovations for the future, which may have been introduced into Commerce. And his " *Britannic* Majeſty likewiſe promiſes to uſe all poſſible Endeavours to aboliſh all Innovations, and " to forbear them for the future.

" IX. Their *Britannic* and Catholic Majeſties confirm, by the preſent Treaty, the laſt Treaty " of *Aix-la-Chapelle*, and all the other Treaties therein confirmed, in all their Articles and " Clauſes; excepting thoſe which have been derogated from by the preſent Treaty: As likewiſe " the Treaty of Commerce concluded at *Utrecht*, *Anno* 1713; thoſe Articles excepted which are " contrary to the preſent Treaty, which ſhall be aboliſhed and of no Force; and, namely, the " three Articles of the ſaid Treaty, commonly called *Explanatory*.

" X. All the reciprocal Differences, Rights, Demands, and Pretenſions, which may have ſub" ſiſted between the two Crowns of *Great-Britain* and *Spain*, in which no other Nation whatever " has any Part, Intereſt, or Right of Intervention, being thus accommodated and extinguiſhed " by this particular Treaty; the two ſaid moſt Serene Kings engage themſelves mutually to the " punctual Execution of this Treaty of reciprocal Compenſation."

A final Period put to the *South-Sea* Company's Trade.

☞ This is truly a moſt definitive Treaty, in the ſtricteſt Senſe, as it relates purely to Differences between *Great-Britain* and *Spain*, without any Relation to, or Connection with any other Nation: And accordingly it has hitherto, till very lately, been well obſerved on both Sides: And hereby a Period was abſolutely put to all foreign Commerce whatever of the *South-Sea* Company.

The *British* Statute touching the Iron Manufactures of *America*.

In this ſame Year 1750, (the 23d of King *George* the Second) a *Britiſh* Act of Parliament paſſed, *To encourage the Importation of Pig and Bar Iron from his Majeſty's Colonies in* America, *and to prevent the Erection of any Mill or other Engine for ſlitting or rolling of Iron; or any plating Forge to work with a Tilt Hammer; or any Furnace for making of* Steel, *in any of the ſaid Colonies.* The Title of this Statute [which alone is ſufficient in and for our general Deſign] plainly ſhews, how jealous our Legiſlature was, and is, from preventing our greatly-increaſing Northern-Colony People from going far into Manufactures interfering with thoſe of their Mother Country. Nevertheleſs, as our Continent Colonies are increaſing faſt in People, ſurely ſome Latitude muſt and will be hereafter allowed in that Reſpect; as the proportionable Increaſe of our People there, will undoubtedly occaſion a like or greater Increaſe of our general Commerce thither.

By a Statute of the 30th of King *George* the Second, this Act of the 23d of this King, for importing of *Bar Iron* from *America* into the Port of *London*, was extended to all the Ports of *Great-Britain*: And ſome Clauſes, in the firſt-named Act, of leſs Importance, are hereby repealed.

A new *General* or *Regulated African Company* erected by Law.

In this ſame 23d Year of King *George* the Second, an Act of Parliament paſſed, *For extending and improving the Trade to* Africa. Its Preamble juſtly remarks, " That the Trade to and from " *Africa* being very advantageous to *Great-Britain*, and neceſſary for the ſupplying her Plan" tations and Colonies with a ſufficient Number of Negroes, at reaſonable Rates, ought, for " that Reaſon, to be free and open to *all* his Majeſty's Subjects: It was therefore enacted, " That it ſhall be lawful for all the King's Subjects to trade to and from any Place in *Africa*, be" tween the Port of *Sally*, in *South-Barbary*, and the *Cape of Good Hope*, without any Reſtraint " whatſoever, except as herein after expreſſed, *viz.*

" I. All his Majeſty's Subjects, who ſhall trade to and from *Africa*, between *Cape-Blanco* and " the *Cape of Good Hope*, ſhall for ever hereafter be deemed a Body-corporate and Politic, by the " Name of *The Company of Merchants trading to* Africa, with perpetual Succeſſion and a Common " Seal, and may ſue and be ſued, *&c.* as other Corporations.

" II. All the *Britiſh* Forts, Settlements, and Factories, on the Coaſt of *Africa*, from *Cape-* " *Blanco* to the *Cape of Good Hope*, and all Coaſts, Iſlands, Rivers, Regions, *&c.* within the ſaid " Limits, which are now claimed or poſſeſſed by the *Royal* African *Company of* England, or which " may hereafter be in the Poſſeſſion of the Company hereby eſtabliſhed, ſhall, from the paſ" ſing of an Act for diveſting the *African Company* of their Charter, Forts, and all their other " Property on the Coaſt of *Africa*, be abſolutely veſted in the *new* Company eſtabliſhed by this " Act and their Succeſſors, to the Intent that the ſaid Forts, *&c.* ſhall be employed only for the " Protection, Encouragement, and Defence of the ſaid Trade.

" III. Yet this new Company ſhall not trade to or from *Africa* in their corporate Capacity, " neither ſhall they have any joint or transferrable Stock, nor ſhall they borrow Money on their " Common Seal.

" IV. The Direction of the Affairs of this new Company ſhall be by a Committee of *nine* " *Perſons*, to be choſen annually; to meet as often as ſhall be neceſſary, in ſome Place within the " City of *London*, the Majority of whom being aſſembled, ſhall have full Power to make Orders " for the governing and improving the Forts, Factories, *&c.*——So as no Orders nor Regulations " of theirs ſhall lay any Reſtraint whatſoever on the *Trade* or *Traders*, contrary to the Intent of " this Act.

A. D. 1750

“ V. Such as intend to trade to *Africa*, and who ſhall, on or before the 30th of *June* 1750, pay forty Shillings each to the Chamberlain of *London* for their Freedom of this Company, are impowered to meet at *Guildhall*, and chooſe three Perſons,—and, at *Briſtol*, ſhall have paid forty Shillings into the Hands of the Clerk of the Merchants Hall of that City, to chooſe three Perſons,—and the like at *Liverpool* for chooſing of three Perſons:—And the nine Perſons, ſo choſen, ſhall be the firſt annual Committee.

“ VI. In all future Elections, the Committee ſhall be nominated on the 3d of *July* yearly, in Manner following, *viz.* Three ſhall be nominated by the Freemen of the ſaid Company admitted in *London*, and three by each of the other two Places, *viz. Briſtol* and *Liverpool.* And the Freemen of this Company, in each of the ſaid three Places, may chooſe other Committee-men in the place of ſuch as ſhall die or be removed, or who ſhall refuſe to act.——And if they, or any of the three Places, neglect to chooſe ſuch, then the Remainder (though leſs in Number than nine) may act as the Committee, until next Year's Election.———In caſe of an Equality of Voices at any Election, the Lord-mayor of *London*, and the Mayors of *Briſtol* and *Liverpool*, reſpectively, ſhall determine which of ſuch Perſons ſhall be the Committee-man.——— From and after the 30th of *June* 1750, any other of his Majeſty's Subjects, who ſhall trade to or from *Africa*, ſhall be admitted Freemen of the ſaid Company, at *London*, *Briſtol*, or *Liverpool*, upon Payment of forty Shillings, as aforeſaid; but ſhall not vote at the Election of Committee-men until one Year after their Admiſſion.——The ſaid Freedom-money of forty Shillings ſhall be accounted for to the annual Committee.——No Perſon ſhall be a Committee-man above three Years ſucceſſively.———The Committee may inveſt the ſaid Money in their Hands, in the Purchaſe of Goods and Stores for *Africa*, there to be applied for the *ſole Uſe*, Preſervation, *&c.* of their Forts and Settlements, and for the Wages, Salaries, *&c.* of their Officers, *&c.* employed there; but the Committee ſhall not export from *Africa* any Negroes or other Goods in Return; nor ſhall, in any other Manner, carry on a Trade to or from *Africa:* And an Account of the Committee's Receipts and Payments ſhall be kept, and lie open at their Office in *London*, to be peruſed *gratis* by any Member of the Company. *The Commiſſioners for Trade and Plantations* may remove any of the Committee-men, or the Officers and Servants of this Company, upon Miſbehaviour.——And the Committee ſhall annually render an Account of their Tranſactions to the ſaid *Board of Trade and Plantations*, or oftener, if required. ——The Committee, out of the Monies they ſhall receive, may deduct annually 800 *l.* for defraying, in the firſt Place, the Salaries of their Clerks, *&c.* at the ſaid three Places, and all other Charges of Management; and the Reſidue of that Sum ſhall be divided amongſt themſelves, as a Compenſation for their Trouble.———The Committee's Accounts ſhall be annually examined upon Oath by the *Curſitor-Baron* of the *Exchequer*, and they ſhall lay a Copy of ſuch Accounts, *&c.* before the Parliament in every Seſſion, as alſo before the General Meetings of their own Members, held in *London*, *Briſtol*, and *Liverpool.*

“ VII. The Forts, Warehouſes, *&c.* of this Company ſhall, at all Times, be free to all his Majeſty's Subjects, to be uſed as Warehouſes for depoſiting of *Gunpowder*, *Gold*, *Elephants Teeth*, *Wax*, *Gums*, and *Drugs*; and no other Goods: And ſhall alſo be free and open, in caſe of Neceſſity or Danger, to all his Majeſty's Subjects, for the Safety of their Perſons and Effects.———Three Maſters of the Court of *Chancery* (whereof the Accountant-General of that Court to be one) ſhall be Commiſſioners for examining and allowing the Claims of the Creditors of the *Royal* African *Company*; after which that Company ſhall be diveſted of their Charter, and be diſſolved.”

Thus this very conſiderable Branch of the *Britiſh* Commerce again aſſumed a new Appearance, after having paſſed (as we have ſhewn) through ſeveral other different Conſtitutions, and various Conditions. What has by this Act been eſtabliſhed, remains ſtill in being, and with general Approbation; though there are not wanting ſome, who ſtill think, that ſo important a Trade ought to be under a ſtricter Government, and even in a Joint-ſtock Corporation, as in former Times: Of which Opinion, Time and the Experience of the Traders to that extended Coaſt will determine the Validity.

The Conſtitution and Number of People in the four Provinces of *New-England.*

1751

In this Year 1751, Doctor *William Douglas*, of *Boſton* in *New-England*, publiſhed there, his *Summary Hiſtorical and Political of the firſt Planting*, &c. *of the* Britiſh *Continent Colonies of* America: In which he gives a very juſt though conciſe View of the intire Country, uſually known by the general Name of *New-England*, as at preſent divided into four diſtinct or ſeparate Governments, *viz.* 1ſt, The firſt and principal one, known by the Name of the Province of the *Maſſachuſets-Bay*, (of which *Boſton* is the Capital City) contains 200,000 white Inhabitants: The Government of which Province is in the Crown, but the Property is in the Repreſentatives of the People. The Second Province is *Connecticut*, containing 100,000 white People. Thirdly, *Rhode-Iſland*, containing 30,000 white People; in both which laſt-named Provinces, both the Government and Property are in the Repreſentatives of the People. Fourthly, *New-Hampſhire*, in which both Government and Property are in the Crown; it contains 24,000 white Inhabitants. The total white People in all *New-England* is, or then was, 354,000. Doctor *Douglas* had lived many Years in that Country, and is allowed, by all we have converſed with from thence, to have given a true Account of the Number of People of *New-England* at that Period.

Greenland [commonly called *Old-Greenland*] re planted by *Denmark.*

We have, in its Place, ſhewn, that the *Danes* had anciently a Colony in the Country, by them properly called *Groneland*, i. e. *Greenland*, (and by others *Old Greenland*) lying North-weſt of *Norway*, being a largely-extended Country, ſituated North of *Davis*'s *Streights*, in a very inhoſpitable Climate, and, for aught we yet know, may be properly a Part of *North-America.* The ſaid lamentable Country, however, we find, by an Edict of *Frederic* V. King of *Denmark*,

A. D. 1751

dated at *Copenhagen*, the 26th *March*, 1751, is again re-planted by *Denmark:* The ſaid Edict “ expreſsly prohibiting all Perſons, as well Natives as Foreigners, from reſorting to the Colonies “ eſtabliſhed by us” (ſays that King) “ in our Country of *Greenland*, which we have granted to “ a general and privileged Company *excluſively*; we being hereditary Lord of that Country; “ upon Pain of Seizure and Confiſcation againſt all ſuch as ſhall trade thither in Prejudice of the “ ſaid Company's Right.——The Limits ſhall extend fifteen Miles on both Sides of each Colony, “ including therein all the Places lying between the *Weſtern Iſles* and the Bay called in the Maps “ *Blackbird's Bay*.” This Settlement is chiefly intended for the Whale and Seal Fiſhery, and for Poltry. Of its Progreſs we may poſſibly learn more hereafter.

The *South-Sea* Company having propoſed to the Government, to accept of an Intereſt of 4 *per Cent.* on their Capital Stock of 3,662,784 *l.* 8 *s.* 6 *d.* until *Chriſtmas* 1757, and then to ſtand reduced to 3 *l. per Cent. per Annum*; provided, that the Manner of the Receipt from the *Exchequer*, and the Charges of Management upon the preſent *old* and *new South-Sea* Annuities, and on their ſaid Capital Stock, be continued as they now are: An Act of Parliament, in conſequence thereof, paſſed in the 24th Year of King *George* the Second, *For reducing the ſame accordingly, upon thoſe Terms; and for preventing of Frauds committed by the Officers and Servants of the ſaid Company*, viz.

The *South-Sea* Capital Stock to be reduced to 3 *per Cent.* at *Chriſtmas* 1757; on certain Conditions.

“ I. After *Chriſtmas* 1757, their ſaid Capital Stock ſhall be reduced to 3 *per Cent.* until Re- “ demption thereof; *in full Diſcharge of all Demands of the Company on the King of* Spain, *on Account* “ *of the* Aſſiento *or* annual Ship, or on any Account whatſoever, over and above the Sum of “ 100,000 *l.* paid purſuant to Treaty.

All the *South-Sea* Company's future Claims abſolutely annihilated, in Reſpect of the *Aſſiento* Contract.

“ II. The Company ſhall continue to receive from the *Exchequer*, out of the Funds appropri- “ ated for that Purpoſe, what Monies ſhall from Time to Time become due for the Intereſt “ thereof, and Charges of Management, upon ſuch Part of the old and new *South-Sea* Annuities “ as are not redeemed, and on their Capital Stock: And all the Rights and Exemptions with “ regard to the Redemption of their ſaid Capitals, ſhall be confirmed in the ſame Manner as they “ now ſtand, and enjoy the ſame.

“ III. If any Officer or Servant of the ſaid Company, intruſted with any Note, Bill, Dividend- “ Warrant, Bond, Deed, or Security, Money, or other Effects, belonging to the Company, or “ to other Perſons, depoſited with the ſaid Company, or with him as an Officer or Servant of “ the Company, ſhall ſecrete, embezle, or run away with the ſame, and be convicted thereof, “ in due Form of Law; he ſhall be deemed guilty of Felony, and ſuffer Death as a Felon, “ without Benefit of Clergy.”

Thus, for a national Benefit, *viz.* for Prevention of future Diſputes between *Great Britain* and *Spain*, this Company was forced to be hereby legally debarred from all future Claims on the Court of *Spain*, (though certainly very conſiderable and equitable ones) purſuant to the before-named Treaty of *Madrid*, whereby our King agreed to accept of the ſaid 100,000 *l.* for the Company, in full Compenſation for all their conſiderable Loſſes. ☞ So that between their very great Loſſes ſuſtained by their ill-fated *Aſſiento Contract*, and by the moſt national Undertaking of their *Whale Fiſhery*, that Company may truly and impartially be ſaid to merit not only or barely the Compaſſion, but even the particular Regard of the Public!

By Dr. *Buſching*'s new Geography of *Ruſſia* it appears, That the Trade of *Peterſburgh* was conſiderably increaſed: For, in the Year 1744, the Number of Ships arriving in that Port from *England*, *Holland*, *France*, *Norway*, *Denmark*, *Lubeck*, *Hamburgh*, *Stetin*, *Roſtock*, *Kiel*, *Pruſſia*, *Sweden*, *Dantzick*, &c. amounted to 264; but, in the Courſe of this Year 1751, they amounted to 290 Ships.

Peterſburgh's increaſing Commerce.

By a Statute of this ſame 24th Year of King *George* the Second, *For enabling his Majeſty to raiſe the ſeveral Sums of Money therein mentioned, by Exchequer-Bills*, &c. the Treaſury was impowered to iſſue 2,276,893 *l.* 11 *s.* 7 *d.* being the total principal Sum remaining payable upon the unſubſcribed *old* and *new South-Sea* Annuities, (after deducting 48,129 *l.* 17 *s.* 4 *d.* by this Act directed to be ſubſcribed into the ſaid Annuities) towards redeeming the ſaid Annuities.——(Any Part of which Sum might be re-placed by ſuch as were Truſtees for certain Purpoſes, as far as ſuch Monies would go at the current Market Price, either in the ſaid Annuities, or in other Purchaſes, public or private.)——And whereas ſeveral Perſons, not being timely apprized of the Notice given for ſubſcribing in their ſeveral Annuities, being in the King's Colonies in *America*, and other foreign Parts, &c. the Sums which, on the 28th of *February* 1749, ſhould be intitled to the Benefit of thoſe Subſcriptions, amounting to 12,210 *l.* 2 *s.* 1 *d.* in *new South-Sea* Annuities, and 13,443 *l.* 14 *s.* 3 *d.* in *old South-Sea* Annuities; they ſhall be intitled to the Vote of the Houſe of Commons of 21ſt *March* 1749, as amply as if they had ſeverally accepted the ſaid Terms on or before the 30th of *May* 1750.

The unſubſcribed *old* and *new South-Sea* Annuities to be paid off, &c.

On *Wedneſday* the 22d of *May* 1751, the ever-famous Act of the *Britiſh* Legiſlature, of the 24th Year of King *George* the Second, received the Royal Aſſent, *For regulating the Commencement of the Year, and for correcting the* Calendar *now in Uſe.* [*i. e.* For aboliſhing the *Old-Stile*, and for eſtabliſhing the *New-Stile*, already in Uſe in moſt Parts of *Chriſtendom*.]

The *Stile* throughout *Great-Britain* altered from the *Old* to the *New-Stile*.

Its Preamble ſets forth, “ That the legal Supputation of the Year in *England*, which begins on “ the 25th of *March*, hath been attended with divers Inconveniencies,” [ſtrange that this was not rectified long ago!] “ *as it differs from other Nations, and from the legal Method of Computa-* “ *tion in Scotland*, and the *common Uſage* throughout the whole Kingdom; and that thereby fre-

“ quent Miſtakes in the Dates of Deeds and other Writings are occaſioned, and Diſputes ariſe “ therefrom. And that the *Julian Calendar*, now in Uſe throughout the *Britiſh* Dominions, hath “ been diſcovered to be erroneous, by Means whereof the *Vernal Equinox*, which at the Time “ of the Council of *Nice*, in the Year 325, happened on or about the 21ſt of *March*, now hap- “ pens on the 9th or 10th of the ſame Month: And the ſaid Error ſtill increaſing, and, if not “ remedied, would, in Time, occaſion the ſeveral *Equinoxes* and *Solſtices* to fall at very different “ Times in the *civil* Year from what they formerly did, which might tend to miſlead Perſons “ ignorant of ſuch Alteration. And as a Method of correcting the Calendar, ſo as that the “ *Equinoxes* and *Solſtices* may for the future fall on the ſame nominal Days on which they hap- “ pened at the Time of the ſaid *General Council*, hath been received and eſtabliſhed, and is now “ generally practiſed by almoſt all other Nations of *Europe*: And, as it will be of general Con- “ venience to Merchants and other Perſons correſponding with other Nations and Countries, “ and will tend to prevent Miſtakes and Diſputes concerning the Dates of Letters and Accounts, “ if the like Correction be received and eſtabliſhed in his Majeſty's Dominions.”

[That is to ſay, in other Words, That the mean tropical *Solar* Year, or that mean Space of Time wherein the *Sun* or *Earth*, departing from any Point of the *Ecliptic*, returns to the ſame Point again, conſiſts, according to the learned Dr. *Halley*'s Tables, of 365 Days, 5 Hours, 48 Minutes, and 55 Seconds: Which being leſs, by 11 Minutes and 5 Seconds, than the mean *Julian* Year, (or *Old-Stile*) conſiſting of 365 Days and 6 Hours, made an Error in our *Old-Stile*, hitherto followed by *Great Britain*, of 11 Minutes and 5 Seconds in each *Julian* Year, being 44 Minutes and 20 Seconds in every 4 Years; and 3 Days, 1 Hour, 53 Minutes, and 20 Seconds, in every 400 *Julian* Years, or Years of our ſaid *Old-Stile*; *and made* 11 *Days Difference between* us *and the greateſt Part of* Europe (eſpecially all of the *Roman Catholic Perſuaſion*, and moſt of the *Proteſtant* States alſo.) The *Julian* Year or *Old-Stile* continued to be uſed all over *Europe* until *Pope Gregory the Thirteenth*, by the Help of the beſt Aſtronomers, in the Year 1582, diſcovered the Inconveniencies of the *Julian* Computation, whereby it appeared, that in 129 Years and $337\frac{1}{2}$ Days, it made an Error of *one whole Day*: And, in 400 *Julian* Years, an Error of three Days, one Hour, 53 Minutes, and 20 Seconds, as above: And that ſince the above-named Council of *Nice*, *Anno* 325, the ſaid *Old-Stile* had made an Error of upwards of 9 Days, which in the Year 1701 was computed to be 11 Days, *i. e.* ſo much was our Error at the Commencement of the XVIIIth Century. Whereby our ſaid *Old-Stile* made the *Vernal Equinox* happen 11 Days ſooner than by the ſaid *New-Stile* it really does: So that our 10th of *March* ought to be reckoned (as it will now be) the 21ſt of that Month. Pope *Gregory*'s main Intention in that Alteration was for regulating the true Time of celebrating the Feaſt of *Eaſter*; but *our* grand Concern, in a *mercantile* Senſe, was to reduce our Stile to that of almoſt all the reſt of *Europe*; the Difference of 11 Days frequently occaſioning Errors and Miſtakes in Buſineſs. Moreover, nothing certainly could be more inconvenient, (not to ſay abſurd) than to begin our legal Year on the 25th of *March*, whereby a whole Year was frequently miſtaken in our chronological Hiſtories through Inadvertency: The Year therefore was now to commence on the 1ſt of *January*, with all the reſt of *Chriſtendom*, and eſpecially with *Scotland*; though that Country, in other Reſpects, had, like *England*, till now kept to the *Old-Stile*.]

The Year hereafter to begin on the 1ſt of *January*, to commence *Anno* 1752.

Eleven Days ſunk in *September* 1752.

Acts, Writings, to bear Date according to the new Supputation; and alſo the fixed Terms, and ſundry Courts, &c.

It was therefore enacted, “ That, throughout all his Majeſty's Dominions in *Europe*, *Aſia*, “ *Africa*, and *America*, the ſaid *old* Supputation ſhall not be uſed after the laſt Day of *December* “ 1751, and that the firſt of *January* following ſhall be accounted the firſt Day of the Year 1752, “ and ſo on, in every Year after:——And after the ſaid firſt of *January* 1752, the Days of the “ Months ſhall go on and be reckoned in the ſame Order, and the Feaſt of *Eaſter*, and other “ moveable Feaſts depending thereon, ſhall be aſcertained according to the ſame Method they “ now are, until the 2d of *September* in 1752, incluſive, and the next Day ſhall be accounted “ the 14th of *September*, omitting, for that Time only, the *eleven* intermediate nominal Days; “ and the following Days ſhall be numbered forward in numerical Order from the ſaid 14th of “ *September*, as now uſed in the preſent Calendar: And all Acts and Writings which ſhall be “ made or executed upon or after the ſaid firſt of *January* 1752, ſhall bear Date according to the “ new Method of Supputation; and the two fixed Terms of *St. Hilary* and *St. Michael* in *England*, “ and the Courts of Great Seſſions in the Counties Palatine and in *Wales*, and the Courts of “ General Quarter Seſſions, and General Seſſions of the Peace, and all other Courts and Meet- “ ings and Aſſemblies of any Bodies Politic or Corporate, for the Election of Officers or Mem- “ bers, or for Officers entering upon the Execution of their reſpective Offices, or for any other “ Purpoſe, which by Law or Uſage, &c. are to be held on any fixed Day of any Month, or on “ any Day depending on the Beginning, or any certain Day of any Month, (except Courts uſually “ holden with Fairs or Marts) ſhall, after the ſaid 2d of *September*, be held on the ſame *nominal* “ Days and Times whereon they are *now* to be holden, but computed according to the *new* Method “ of numbering, that is, *eleven* Days ſooner than the reſpective Days whereon the ſame are now “ kept.

How Leap-years are to be reckoned hereafter.

“ The Years 1800, 1900, 2100, 2200, 2300, or any other hundredth Years, except every “ fourth hundredth, whereof the Year 2000 ſhall be the firſt, ſhall be deemed common Years, “ conſiſting of 365 Days; and the Years 2000, 2400, 2800, and every other fourth hundredth “ Years from the Year 2000, incluſive, and all other Years which by the preſent Supputation “ are eſteemed to be *Biſſextile*, or Leap-years, ſhall for the future be eſteemed to be *Biſſextile*, “ or Leap-years, conſiſting of 366 Days, as is now uſed with reſpect to every fourth Year.

A new Calendar to be uſed for *Eaſter* and other moveable

“ The Feaſt of *Eaſter*, and the moveable Feaſts thereon depending, ſhall be no longer obſerved “ according to the Method of Supputation now uſed, or the Table prefixed to the Book of *Com-* “ *mon Prayer*; and the ſaid Table, and alſo the Column of Golden Numbers, as they are now

“ prefixed

A. D. 1751

Feaſts, and fixed Feaſts and Faſts, &c.

“ prefixed to the reſpective Days of the Month in the Calendar, ſhall be left out in all future Editions of the ſaid Book; and the new Calendar, Tables, and Rules, annexed to the Act, are to be prefixed in the Stead thereof: And, from and after the ſaid ſecond of *September*, the fixed Feaſts, Holy-days, and Faſts, of the Church of *England*, and alſo the ſeveral ſolemn Days of Thankſgiving and of Faſting and Humiliation, enjoined to be obſerved by Parliament, ſhall be obſerved on the reſpective nominal Days marked for the Celebration of the ſame in the new Calendar; that is to ſay, on the reſpective nominal Days, and the Feaſt of *Eaſter*, and other moveable Feaſts thereon depending, ſhall be celebrated according to the ſaid annexed Calendar; and the two moveable Terms of *Eaſter* and *Trinity*, and all Courts, Meetings, and Aſſemblies, of any Bodies Politic or Corporate, and all Markets, Fairs, and Marts, and Courts thereunto belonging, which, by any Law, Statute, Charter, or Uſage, are to be held and kept at any moveable Time depending upon *Eaſter*, or other moveable Feaſt, ſhall, after the ſaid ſecond of *September*, be held and kept on the ſame Days and Times whereon the ſame ſhall happen, according to the Falling of *Eaſter* by the new Calendar.

The Law-courts in *Scotland*, and other Meetings in *England*, for ſundry Purpoſes, how to be held.

“ The Meetings of the Court of Seſſion, and Terms fixed for the Court of Exchequer in *Scotland*; the *April* Meeting of the Conſervators of the *great Level of the Fens*, and the holding and keeping of Markets, Fairs, and Marts, for the Sale of Goods or Cattle, or for hiring of Servants, or for other Purpoſes, which are fixed to certain nominal Days of the Month, or depending on the Beginning, or any certain Day of any Month, and all Courts kept with ſuch Fairs or Marts; ſhall, after the ſaid ſecond of *September*, be kept upon the ſame natural Days upon which the ſame would have been held if this Act had not been made; *i. e.* eleven Days later than the ſame would happen according to the nominal Days of the new Supputation of Time, by which the Commencement of each Month, and the nominal Days thereof, are brought forward eleven Days.

Alſo for the Times of opening or ſhutting of Grounds, Common of Paſture, &c.

“ But this Act ſhall not accelerate or anticipate the Days or Times for the Opening, incloſing, or ſhutting up of Grounds, Common of Paſture, or the Days and Times on which a temporary and diſtinct Property and Right in any ſuch Lands or Grounds is to commence: But they ſhall be reſpectively opened, and incloſed, or ſhut up, and ſhall commence on the ſame natural Days and Times, after the ſaid ſecond of *September*, as before the making of this Act; that is, eleven Days later than the ſame would happen according to the *new* Supputation of Time.

Nor ſhall accelerate the Payment of Rents, Annuities, &c. nor the Times of Apprenticeſhips, Contracts, &c.

“ Neither ſhall this Act accelerate or anticipate the Times of Payment of Rents, Annuities, or other Monies, which ſhall become payable in conſequence of any Cuſtom, Uſage, Leaſe, Deed, Writing, or other Contract or Agreement, now ſubſiſting, or which ſhall be entered into before the ſaid 14th of *September*, or which ſhall become payable by virtue of any Act of Parliament. Nor to accelerate the Payment, or increaſe the Intereſt of any Money which ſhall become payable as aforeſaid, or the Time of the Delivery of any Goods or other Things whatſoever, or the Commencement, or Determination of any Leaſes or Demiſes of Lands, &c. or other Contracts or Agreements, Annuity, or Rent, or of any Grant for a Term of Years, &c. or the Time of attaining the Age of 21 Years, or any other Age requiſite by Law, Uſage, or Writing, for the doing any Act, or for any other Purpoſe, by any Perſons now born, or who ſhall be born before the ſaid 14th of *September*; or the Time of the Determination of any Apprenticeſhip or other Service by Indenture, or by Articles under Seal, or by reaſon of any ſimple Contract or Hiring: But all theſe ſhall commence, ceaſe, and determine, at and upon the ſame natural Days and Times on which they would have happened if this Act had not been made.”

By a ſubſequent Law, of the 25th of *George* the Second, *To amend this Act*, it was enacted, “ 1ſt, That from the ſecond of *September* 1752, the reſpective Times for opening, uſing, or incloſing of Grounds for common Paſture, and the paying of Rents, &c. ſhall, if ſuch Times are depending on any of the moveable Feaſts, take Place according to the *new* Calendar. 2dly, The annual Admiſſion and ſwearing of the Lord-mayor of *London*, at *Guildhall*, hereafter ſhall be on the 8th of *November*, and the Solemnity of ſwearing him at the Court of *Exchequer*, at *Weſtminſter*, on the 9th of the ſaid Month of *November*, yearly.”

A chronological Inaccuracy in the Dates of *Britiſh* Acts of Parliament, wants to be rectified.

It were farther to be wiſhed, that, when the Legiſlature were upon a Subject ſo uſeful to Commerce and Chronology, they had turned their Thoughts to the preſent Method of dating Acts of Parliament from the Years of the reigning King, without mentioning the Year of our Lord *Chriſt*, as in the Laws of many other Nations: Whereby much Uncertainty and frequent Miſtakes happen, in computing a Number of Years between a certain Year of one King's Reign to a certain Year of another King's Reign, or to the preſent Time: This is frequently complained of, tho' not yet remedied. Yet this may eaſily be remedied in future, by ſuper-adding the Year of our Lord *Chriſt* to the Year of the reigning King.

Ireland's preſent flouriſhing Condition.

The flouriſhing and much-improved Condition of the Kingdom of *Ireland*, in this Year 1751, is ſo fully expreſſed in the Right Honourable the Earl of *Orrery*'s Letters, (concerning the Life and Writings of Dean *Swift*) publiſhed in this Year, that we ſhall tranſcribe it, (from Letter xvi, P. 127.) “ The preſent State of *Ireland* is, in general, as flouriſhing as poſſible. *Agriculture* is cultivated.——*Arts* and *Sciences* are encouraged: And in the Space of eighteen Years, no Kingdom can be more improved. *Ireland*, in relation to *England*, may be compared to a younger Siſter, lately come of Age, after having ſuffered all the Miſeries of an *injured Minor*; ſuch as, Law-ſuits, Encroachments upon her Property, Violation of her Rights, Deſtruction of her Tenants, and every Evil that can be named. At length, Time, and her own noble Spirit of Induſtry, have intirely relieved her; and, ſome little Heartburnings excepted, ſhe enjoys the quiet Poſſeſſion of a very ample Fortune, ſubject, by way of Acknowledgment, to certain

“ Quit-rents payable to the elder Branch of her Houſe: And let me add, by Experience, that, *take her all in all*, ſhe cannot have a greater Fortune than ſhe deſerves.”

The vaſt Improvement of *Scotland*'s Linen Manufacture.

The vaſt Improvement of *Scotland*'s Linen Manufacture, at this Time, is well worth recording; between the Year 1727, (when an Act of Parliament paſſed for that End, whereby 21 Truſtees were to be appointed, under the Great-Seal, for ſuperintending the ſame) and this Year 1751, when the following authentic Account of it appeared, *viz.*

	Yards of Linen.		Value.
1. In the firſt 5 Years from the paſſing of the ſaid Act, *viz.* from 1728 to 1732, both included, there were made and ſtamped, - - - - - - - - - - - - - - - -	17,441,161	—£	662,938
2d. 5 Years, from 1733 to 1737, - - - - - - - - - - - ---	23,734,136	—	897,254
3d. 5 Years, from 1738 to 1742, - - - - - - - - - - - ---	23,366,863	—	949,221
4th. 5 Years, from 1743 to 1747, - - - - - - - - - - - ---	28,227,086	—	1,155,281
And for 4 Years, from 1748 to 1751, - - - - - - - - - - ---	30,172,300	—	1,344,814

N. B. The *Britiſh Linen Company*, erected *Anno* 1746, has been greatly inſtrumental in the Advancement of that Manufacture in *Scotland*, by advancing ready Money to the poorer Manufacturers for their Goods; whereby they are enabled to carry on the ſame with much more Spirit. The above-named Board of Truſtees do likewiſe beſtow annual Premiums for the beſt Manufactures; whereby a Spirit of Induſtry increaſes, more than ever, all over *Scotland*. And, during the ſingle Year 1754 alone, there were ſtamped 8,914,369 Yards of Linen, worth 506,816 *l.* 8 *s.* *Sterling*.

1752

The *Royal African Company* of *England* is abſolutely diſſolved, and their Forts, *&c.* veſted in the new Company.

The *African* or *Guinea* Trade having been laid more open in a regulated Company, by a Statute of the 23d of King *George* the Second, before-recited; a Compenſation was become neceſſary to be made, by way of Satisfaction, to the old *Royal African Company*, for their Charter, Lands, Forts, Slaves, Stores, and other Effects, *&c.* An Act therefore paſſed, in the 25th Year of the ſaid King, “ *For the Application of a Sum of Money herein mentioned, for thoſe Purpoſes, and for veſting thoſe Lands, Forts,* &c. *in the ſaid new Company of Merchants trading to* Africa:” For which Ends, Commiſſioners had before been appointed, for examining the Claims of the ſaid late Royal Company, which they had already laid before the Parliament. It was now enacted; “ That the ſaid late *Royal African Company* ſhall, from and after the 10th of *April* 1752, be abſolutely diveſted of their ſaid Charter, *&c.* and of all their Lands, Forts, *&c.* beginning at the Port of *Sallee*, and extending thence, Southward, to the *Cape of Good Hope*, together with all their Cannon, Canoe-men, Slaves, Rights, and Evidences, *&c.* The ſaid new Company, with the Conſent of the *Board of Trade and Plantations*, are impowered to arm and train military Forces at their Forts, and to puniſh Offences, ſo as not to extend to Life or Limb; and to erect Courts of Judicature for mercantile and maritime Bargains, *&c.*

“ 11. The Sum of 112,142 *l.* 3 *s.* 3 *d.* ſhall be applied out of the Supplies of this Seſſion, for the Compenſation beforementioned to the ſaid old Company's Proprietors and their Creditors, *&c.*

The lately-forfeited Eſtates legally to be applied for civilizing and improving the *Highlands* and Iſles of *Scotland*.

For the better civilizing and improving the Highlands of *Scotland*, and preventing of Diſorders there for the future, an Act of Parliament of this ſame Seſſion paſſed, *For annexing certain forfeited Eſtates in* Scotland,” [by the Rebellions *Annis* 1745 and 1746] “ *to the Crown unalienably, and for making Satisfaction ta the lawful Creditors thereupon; and to eſtabliſh a Method of managing the ſame*, enacted, “ That all the Lands, Lordſhips, Baronies, *&c.* of *Simon*, late Lord *Lovat*, &c.—ſhall, from the 25th of *December* 1752, be annexed to the Crown unalienable for ever, ſaving the Rights and Claims thereon duly entered in the Court of Seſſion.——The clear Income of the ſaid Lands to be applied to the Purpoſes of civilizing the Inhabitants upon the ſaid Eſtates, and other Parts of the *Highlands* and Iſles of *Scotland*, the promoting amongſt them the *Proteſtant* Religion, good Government, Induſtry, and Manufactures, and the Principles of Loyalty and Duty to his Majeſty, *&c. and to no other Uſe or Purpoſe whatſoever.*——The King may appoint Commiſſioners and Truſtees for managing the ſaid Eſtates, and for applying the Produce for thoſe Ends and Purpoſes, without having any Penſion or Reward for the ſame.——They may grant Leaſes thereof for 21 or 41 Years, whereon the Leſſees ſhall covenant to lay out on the Premiſſes, in Buildings and other Improvements, in the firſt ſeven Years a Sum not leſs than five Years Rent,—reſerving, upon every Leaſe, not leſs than *three fourths* of the real annual Value of the Premiſſes.——All ſuch Leſſees ſhall take the uſual Oaths to the Government.——No Leaſe of Lands or Tenements, other than Mines or Fiſhings, ſhall be of greater annual Rent than 20 *l.* at the moſt.——The Commiſſioners, with the Approbation of the Treaſury, may appoint Factors on the ſaid Eſtates, to whom 5 *per Cent.* of the Rental ſhall be allowed;—the Commiſſioners are to appoint a Survey of the Eſtates to be made, with proper Plans of their Extent and Qualities, and what Improvements may be made thereon; and an Abſtract of their Proceeding is to be annually reported to the Treaſury, Copies whereof to be laid before the Parliament every Seſſion.——The King may divide large Pariſhes, (intirely his own) and grant proper Proviſions to the Miniſters of ſuch new Pariſhes, out of the preſent Maintenance for the Miniſter of the old Pariſh, and the Remainder out of the Rents of the ſaid Eſtates, ſo as the Stipend ſhall not exceed 50 *l.* *per Annum*, in Money or Value, to any one Miniſter.——The King may erect Schools on the ſaid Eſtates, or in other Parts of the *Highlands* or Iſlands of *Scotland*, for inſtructing young Perſons in reading and writing the *Engliſh* Language, and in the ſeveral Branches of Agriculture and Manufactures, and may erect Houſes for their Reception, and for carrying on ſuch Manufactures by them, and for accommodating their Maſters;—and may apply ſuch Parts of the Produce of the ſaid Eſtates as ſhall be neceſſary for erecting ſuch Schools, providing Salaries for the Teachers, for cloathing and maintain-

A. D. 1752. "ing ſuch young Perſons, and for ſupplying the Schools with Utenſils and Materials for Agriculture and Manufactures; and for the raiſing of Flax, &c. as his Majeſty ſhall direct.—— "And the King may impower the Commiſſioners to allot Portions of Land for the Uſe of ſuch "Schools, or to apply ſuch Part of the clear Rent of the Lands as he ſhall direct, in the Purchaſe of Portions of Land to be allotted for ſuch Schools.——His Majeſty may impower the "Commiſſioners to grant out in Property, Portions of Ground, not exceeding ten Acres to one "Perſon, to Perſons well-affected, who ſhall take the Oaths to the Government, and oblige "themſelves to erect Dwelling-houſes, &c. and Gardens thereupon: Such Grounds to be held "*feu* of his Majeſty, for Payment of a yearly *feu* Duty equal to ſuch a Proportion of the Rent as "ſhall correſpond to the Ground *feued* out, &c.——The King may, out of the Rents of the "Eſtates aforeſaid, erect Priſons on ſuch Parts of the foreſaid Lands, or other Parts of the *Highlands* as he ſhall think fit, and the ſame ſhall be deemed lawful Priſons,—and Allowance for the "Maintenance of indigent Priſoners, &c."

☞ Of this very good Law, Poſterity will reap the principal Benefit; Beginnings being already making in ſeveral Parts of the *Highlands* for Working-ſchools, to which the moſt laudable *Society in* Scotland *for propagating Chriſtian Knowledge in the* Highlands, &c. have lent a helping Hand, by erecting ſeveral Schools out of their own Income, for the Inſtruction of the Children: New Villages are alſo begun: Manufactures, as well as Agriculture, are ſet on foot, where none were known before: So that it is highly probable, that, in half a Century more, the moſt uncultivated Parts of that Country will wear a very different Aſpect.

"For ſeveral Years paſt," (ſays Doctor *Buſching*, in his *New Geography*) "between 4 and 5000 "Ships have ſailed annually through the *Sound*: But in 1752, above 6000 Ships (a Number unheard of before) paſſed through thoſe Streights. In general, that Toll is on an equal Footing "with reſpect to all Nations, excepting the *Hamburghers*, who muſt pay more than others: The "*Engliſh*, *Dutch*, *Swediſh*, and *French* Ships are not ſearched, when provided with proper Paſſes, "according to Treaties; and pay down only 1 *per Cent.* for ſuch Goods as are not ſpecified in the "Tarif. But all other Nations pay 1¼ *per Cent.* and muſt ſubmit to be ſearched. With regard "to the *Hanſe-Towns*, on the *Baltic*, there is a great Variety in the Toll they pay; for almoſt every "one of thoſe Towns is treated with in particular."

Toll in the *Sound* of *Denmark*.

In this ſame Year 1752, his *Sicilian* Majeſty (ſince King of *Spain*) eſtabliſhed, by Patent, a Company of Commerce at *Meſſina*; principally intended for the erecting of Manufactures of *Silk*, *Stuffs*, and *Camblets*; the ſaid Company, for ten Years to come, to be exempted from all Kinds of Duties: And, for the farther Encouragement thereof, his Majeſty has limited the Exportation of *Raw-Silk* to half the wonted Quantity. Thus almoſt every Corner of *Europe*, in our Age, ſtrives to gain ſome Part of the commercial Advantages, which they clearly obſerve to contribute ſo much to the Enrichment and Exaltation of ſome other Nations.

Sicily attempts the erecting of Silk and Worſted Manufactures at *Meſſina*, and *Spain* alſo is increaſing in both Silk and Woollen Manufactures.

We, the ſame Year, learned from *Spain*, that they are there ſtriving for the Increaſe of Commerce and Manufactures: That of late they have, in the Kingdom of *Valencia*, 2000 Looms for *Silk* and *Woollen*; 1000 in *Granada*; 500 in *Catalonia*; and that, throughout all *Spain*, they reckon in all 10,000 ſuch Looms, in Silk, Gold, and Silver Tiſſue, middling and coarſe Woollen Cloths, Bays, Serges, Camblets, &c. "And" (ſays Don *Geronymo de Uſtariz*, a judicious *Spaniſh* Author) "they are projecting no fewer than 60,000 new Looms, whereby, not only to ſupply themſelves "and their *Indies*, but to export to other *European* Nations; and to erect I know not how many "other new Manufactures: Of all which it will be right to ſuſpend our Belief till Experience "clears it up."

1753 By a ſupplemental Act of the *Britiſh* Parliament, of the 26th of *George* the Second, *To explain, amend, and render more effectual* an Act of the 23d Year of *George* the Second, intitled, *An Act for the Encouragement of the* Britiſh *White-Herring Fiſhery*; *and for regulating the ſaid Fiſhery according to the Calendar now in Uſe*, &c.

A ſupplemental Statute relating to the *Free Britiſh Fiſhery Company*.

I. It was *now* enacted, "That the Commencement and Duration of the Fiſheries, as directed "by the former Act, ſhall hereafter be conformable to the Calendar now in Uſe.

"II. The Society ſhall not be intitled to the Bounty of thirty Shillings *per* Ton, in reſpect of "ſuch Veſſels as ſhall return into Port at the End of the Fiſhery with a leſs Number of Hands "than is required (by the firſt Act) to have on board at the Rendezvous, unleſs it ſhall appear "that ſuch Number hath been reduced by Death, Sickneſs, or Deſertion, without any Fraud or "Colluſion, on the Part of the Society: And the ſaid Veſſels are allowed, between the Intervals "of the *Shetland* and *Yarmouth* Fiſheries, to put into any Port of *Great-Britain* or *Ireland*, for the "Purpoſe of changing their Nets, and preparing for the *Yarmouth* Fiſhery; of which Fiſhery the "Fleet of Nets may be of any Depth not under five Fathoms.

"III. That the Quantity of ſuch white Herrings as ſhall hereafter be ſent by the ſaid Society "or their Agents to foreign Markets, immediately from Sea, without being firſt brought into "Port, ſhall be aſcertained by the Oath of the Society's Superintendant of the Fiſhery.——And "whereas the Place appointed by the firſt Act for the *Rendezvous* of the Veſſels on the firſt of "*September* is, in many Caſes, found inconvenient, it was now enacted, that their Veſſels which "ſhall rendezvous at *Kirkwall*, in the *Orkney* Iſlands, on or before the twelfth of *September*; and "ſhall continue to be employed in fiſhing among the Shoals of *Herrings*, as they move, to the "11th of *January*, (unleſs their Loading ſhall be ſooner compleated) ſhall, in caſe all the other "Regulations and Conditions in the ſaid Act be complied with, be intitled to the Bounties "granted

“ granted therein, as if they had rendezvouſed at *Campbell-Town* at the Time required by that Act. Provided, That no fiſhing Veſſel employed in the White-Herring Fiſhery ſhall be obliged to carry to the latter Fiſhing more than one Fleet of Nets.”

All the Ports of *Ireland* opened for the Exportation of *Wool* and its Yarn to any Port of *Great-Britain*.

By an Act of the *Britiſh* Parliament of the ſaid 26th of King *George* the Second, *For permitting the Exportation of Wool, and Woollen or Bay-Yarn, from any Port of* Ireland *to any Port in* Great-Britain, it ſets forth in its Preamble, “ That the permitting of *Wool*, and *Woollen* or *Bay-Yarn*, to be exported only from certain Ports in *Ireland* to certain Ports in *England*, is not of ſo great and extenſive an Advantage to the Trade of this Kingdom as it would be, if all the Ports in *Great-Britain* and *Ireland* were opened for that Purpoſe.” It was therefore enacted, “ That, from the 5th of *June* 1753, any Wool, or Woollen or Bay-Yarn, Woolfels, Shortlings, Mortlings, Wool-flocks, and Worſted-Yarn, may be exported from any Port in *Ireland* to any Port in *Great-Britain*. Provided, That Exportations and Importations be under the ſame Reſtrictions and Regulations, and in the ſame Manner in all Reſpects as Wool or Woollen-Yarn are now by Law permitted to be exported from *Dublin*, and other therein-named Ports of *Ireland*, to the Port of *Biddeford* and other therein-named Ports of *England*, or any of them.”

The Number of *South-Sea Directors* reduced from *thirty* to *twenty-one*.

In the ſaid 26th Year, an Act of Parliament reduced the Number of Gentlemen conſtituting the Court of Directors of the *South-Sea* Company, from *three* Governors and *thirty* Directors to *three* Governors and *twenty-one* Directors, at the ſucceeding general Election: And that no more than *fifteen* of the ſaid *twenty-one* Directors, who, at the laſt preceding general Election, were elected Directors, ſhall be choſen again into that Office at the following Election. This prudent Frugality proceeded from the Conſideration of their *Aſſiento* Trade's being annihilated, as already before-noted.

The *Levant* or *Turkey* Company's Trade brought under new Regulations by Law.

The *French* having gained a great Superiority in the *Turkey* Trade, a Petition was preſented to Parliament, for laying open our *Turkey* Trade intirely.——On the other Side, the *Turkey* Company repreſented, That an intirely open Trade to *Turkey* would but farther decreaſe the *Britiſh* Trade thither.—That the more favourable Situation of the Port of *Marſeilles*, and other concurring Circumſtances not eaſily to be ſurmounted, had gradually given the *French* their preſent Superiority. The Parliament therefore paſſed an Act of this ſame 26th Year, *For enlarging and regulating the Trade into the* Levant *Seas*. The Subſtance of which ſets forth, the Patent of King *James* the Firſt, ſtill in Force at this Time, dated 14th *December* 1605, as we have recited in its proper Place, and alſo that of King *Charles* the Second. “ And whereas the Company's Trade into the *Levant* Seas has ſince much decreaſed; the taking of leſſer Fines for being made free of this Company; and the not reſtraining the Freedom thereof to *mere Merchants*, and to ſuch Perſons as, reſiding within twenty Miles of *London*, are free of the ſaid City; and the ſecuring to *all Perſons* free of the Company the Liberty of exporting all Sorts of Goods and Merchandize (not forbidden by Law) to any Place within the Limits of their Charter, from what Parts of *Great-Britain*, at what Times, in what Quantity, and on board what legal Ships they ſhall reſpectively think proper: And alſo of importing, in the like Manner, from any Place within the Limits of the ſaid Letters-Patent, *Raw-Silk* or any other lawful Merchandize purchaſed within the ſaid Limits; are the moſt probable Means of recovering and extending the ſaid Trade for the Benefit of the Nation. It was therefore enacted,

“ I. That, from and after the 24th of *June* 1754,” [inſtead of the former Reſtraints in the ſaid Charters, of paying 25 *l.* for all made free under twenty-ſix Years of Age, and 50 *l.* to be paid for all above that Age; and that none reſiding within twenty Miles of *London* ſhall be admitted to the Freedom of the Company, unleſs a *Freeman* of that City; alſo the confining this Freedom to *mere Merchants*: As alſo the other Reſtraints concerning the Times of Exportation and Importation, *&c.*] “ every Subject of *Great-Britain*, deſiring Admiſſion into the *Turkey* Company, ſhall be admitted within *thirty* Days after ſuch Requeſt, and ſhall enjoy all the Liberties, Privileges, *&c.* granted by the ſaid Letters-Patent, paying or rendering for ſuch Admiſſion, for the Uſe of the Company, 20 *l.* and no more.

“ II. From the ſaid 24th of *June* 1754, all Perſons, free of the Company, may, ſeparately or jointly, export any Goods or Merchandize (not prohibited by Law to be exported) from any Place in *Great-Britain*, to any Place within the Limits of the Charter, in *Britiſh* or *Plantation*-built Ships, (navigated according to Law) at any Time, and to any Perſons whomſoever being free of the ſaid Company, or to the Sons or Apprentices of Freemen, (ſuch Freemen, Sons, or Apprentices, being his Majeſty's *Chriſtian* Subjects) ſo long as they ſhall remain under and ſubmit to the Protection and Direction of the *Britiſh* Ambaſſador and Conſuls reſpectively, for the Time being: And may alſo import, in like Manner, *Raw-Silk*, or other Commodities purchaſed within the Limits of the ſaid Letters-Patent (not prohibited by Law to be imported) upon paying the King's Duties and Cuſtoms, and ſuch Impoſitions as ſhall be aſſeſſed upon all Merchandizes, *&c.* ſo exported or imported, or upon Ships laden therewith, for defraying the neceſſary Expences of the Company.

“ III. The Exportation of *Gold* and *Silver*, either in foreign Coin or Bullion, ſhall be ſubject to the By-laws of the Company.

“ IV. The Governor, or Deputy-Governor and Company, are impowered, at a General-Court, to make ſuch Rules, Ordinances, or By-laws, for the good Government of the Company, as the Majority of the Members preſent ſhall think neceſſary: But they ſhall not be valid, unleſs confirmed at a ſubſequent General-Court, to be held at leaſt one Month after the former. And if ſeven or more of the Freemen ſhall think themſelves aggrieved by any Rule, *&c.* made, or to be made, they may appeal againſt the ſame, to *the Commiſſioners for Trade and Plantations*,

A. D. 1753

“ who are required, with all convenient Speed, to hear ſuch Appeal, and to approve or diſapprove of ſuch Law, &c. in ſuch Manner as ſhall appear to them to be fit and reaſonable: But ſuch Rule, Ordinance, or By-law, ſhall be in Force till the Appeal ſhall be heard, and it be diſapproved thereby.

“ V. If any Appeal ſhall be brought againſt any future Rule, Ordinance, or By-law, to be made, it ſhall be brought within *twelve* Months after ſuch Rule, &c. ſhall be made and confirmed: And if any Appeal ſhall be brought againſt any Law, &c. of the Company now in Force, it ſhall be brought within *twelve* Months after the ſaid 24th of *June* 1754. And the Appellants ſhall, at the ſame Time, give Notice, in Writing, of ſuch Appeal, to the Governor, Deputy-Governor, or Secretary of the Company.”

Thus the Trade from *Great-Britain* to the *Levant* is hereby as much laid open as ſeems conſiſtent with the Nature of that Trade, all Things being duly and impartially conſidered.

Yet, after all, it is very difficult to recover a long-declining Trade; eſpecially conſidering the Shortneſs of the Voyage from *Marſeilles* to the *Levant*, and their needing but one Wind all the Way, as well as the Cheapneſs of Freight, and perhaps ſome other Advantages which the *French* may have gradually gained from *us* in this Trade. Time alone will decide, whether theſe new Regulations, or what other Means can or will be effectual for our regaining that Aſcendant *we* once had above all other *Chriſtian* Nations in the Trade to *Turkey*.

The *Linen* Manufacture in the *Highlands* of *Scotland*, is legally encouraged.

By a *Britiſh* Act of Parliament, *For encouraging and improving the Manufactory of Linen in the Highlands of* Scotland, it was enacted, “ That as the Manufacture of coarſe Linens hath been increaſed and improved in *Great-Britain* and *Ireland*,—and as ſome Progreſs has been made in the Manufacture of Linen in the Highlands of *Scotland*, under the Directions of the Commiſſioners and Truſtees for improving Fiſheries and Manufactures in *Scotland*; and as the Encouragement of the Manufacture of coarſe Linens in thoſe Parts of the Highlands, wherein the Manufacture of Linens either hath not been already eſtabliſhed, or not advanced to any conſiderable Degree of Perfection, will be a farther Means of improving and civilizing the Highlands, and the Succeſs of any Proviſion for that Purpoſe will tend to the general Good of the whole united Kingdom, and alſo of *Ireland*: It is now enacted,

“ I. That, from the Expiration of the Term for which Bounties, by the herein-recited Acts, are granted on the Exportation of *Britiſh* and *Iriſh* coarſe Linens, the annual Sum of 3,000 *l.* ſhall be paid for *nine Years* to the Caſhier of the Commiſſioners and Truſtees for improving of Fiſheries and Manufactures in *Scotland*;—and ſhall be applied by them for encouraging and improving the Manufacture of Linens *in the Highlands only*.

“ II. No Part of the ſaid Sum ſhall be applied for any other Uſe than for inſtructing and exciting the Inhabitants of that Part of *Scotland* to raiſe, prepare, and ſpin *Flax* and *Hemp*, to be uſed in the Manufacture of coarſe Linens, and to weave Yarn, there ſpun, into ſuch Linen; and for providing the Inhabitants with fit Materials and Utenſils for thoſe Purpoſes; and for diſtributing Rewards and Prizes to the Growers, Preparers, Spinners, Weavers, and other Manufacturers, in reſpect either to the Quantity or Excellence of the *Flax* or *Hemp* ſo raiſed and prepared, and of the Yarn ſo ſpun, wove, or otherwiſe manufactured; and for ſuch other-like Uſes as the Commiſſioners ſhall think proper, for promoting the true Intent of this Act. ——The ſaid annual Sum ſhall be paid in like Manner as the annual Sum of 2,000 *l.* and the Surpluſage of the Duty on *Malt* made in *Scotland*, by the 13th of *George* Iſt, *For encouraging and promoting Fiſheries and other Manufactories and Improvements* in that Part of *Great-Britain* called *Scotland*, or as by Letters-Patent under the Great Seal in *Scotland*, are directed to be paid.”

A View of the firſt Erection of the *Britiſh Muſeum*, or General Repoſitory for the incomparable *Sloanian*, *Harleian*, and *Cottonian* Collections, eſtabliſhed at *Montague-Houſe* in *London*.

In this ſame 26th Year of King *George* the Second of *Great-Britain*, an Act of Parliament paſſed, *For the Purchaſe of the* Muſeum *or Collection of Sir* Hans Sloan, *and of the* Harleian *Collection of Manuſcripts: And for providing one general Repoſitory for the better Reception and more convenient Uſe of the ſaid Collections; and of the famous* Cottonian Library, *and of the Additions made and to be made thereto.* Now, although this Statute has no immediate Connexion with Commercial Hiſtory, yet its Conſequences are like to prove ſo noble, ſo much to the Honour of the Nation, and ſo much tending to draw Foreigners from all the polite Parts of *Chriſtendom* to *London*, for the Viewing of ſo incomparable a Collection of rich, ſcarce, and matchleſs Curioſities, of both Nature and Art, that we could not paſs it over in Silence; more eſpecially as, in its more remote Conſequences, it is likely to prove hereafter very beneficial to Commerce.

The Preamble ſets forth, “ That Sir *Hans Sloan*, Baronet, deceaſed, having through the Courſe of many Years, with great Labour and Expence, gathered together whatever could be procured either in our own or foreign Countries that was rare and curious, by a Codicil, bearing Date 20th *July* 1749,—(after having expreſſed his Deſire, that his ſaid Collection, in all its Branches, might, if poſſible, be preſerved together whole and intire, in his Manor-houſe at *Chelſea*) did deviſe to certain Truſtees his ſaid *Muſeum*; conſiſting of all his Library, Drawings, Manuſcripts, Prints, Medals and Coins ancient and modern, Antiquities, Seals, Cameao's, Intaglio's, Precious Stones, Agates, Jaſpers, Veſſels of Agate and Jaſper, Chryſtals, Mathematical Inſtruments, Drawings, and Pictures; and all other Things in his ſaid Collection, more particularly deſcribed and numbered, with ſhort Hiſtories or Accounts of them, in Catalogues by him made, containing *thirty-eight* Volumes in Folio and *eight* in Quarto—To have and to hold to them, and their Succeſſors and Aſſigns forever, for ſuch Purpoſes, and with ſuch Powers, and

“ under

“ under ſuch Reſtrictions, as in the ſaid Codicil are expreſſed; willing and deſiring, That the ſaid Truſtees ſhould make their humble Application to his Majeſty, or to the Parliament, after his Deceaſe, to pay the Sum of 20,000 *l.* to his Executors, in Conſideration of his ſaid *Muſeum*; and alſo to obtain ſuch ſufficient Powers, for veſting in the ſaid Truſtees the ſaid *Muſeum* in all its Branches:—And alſo to obtain a ſufficient Fund or Proviſion for maintaining and taking Care of his ſaid Collection and Premiſes.——And as the ſaid *Muſeum* is of much greater intrinſic Value than the ſaid Sum of 20,000 *l.* and as all Arts and Sciences have a Connection with each other, and Diſcoveries in Natural Philoſophy and other Branches of Speculative Knowlege, (for the Advancement and Improvement whereof the ſaid Collection was intended) *do and may, in many Inſtances, give Help and Succeſs to uſeful Experiments and Inventions:* It is enacted,

1. Sir *Hans Sloan*'s *Muſeum.*

“ I. That 20,000 *l.* be paid to the Executors of Sir *Hans Sloan* for the ſaid *Muſeum.*

2. Sir *Robert Cotton*'s *Library.*

“ II. And whereas by an Act of the 12th and 13th of King *William* III. *For the better ſettling and preſerving the Library kept in the Houſe at* Weſtminſter, *called* Cotton-Houſe, *in the Name of the Family of the* Cottons, *for the Benefit of the Public*; reciting, That Sir *Robert Cotton*, late of *Conington*, in the County of *Huntington*, Baronet, did, at his own great Charge, and by the Aſſiſtance of the moſt learned Antiquaries of his Time, collect and purchaſe the moſt uſeful *Manuſcripts*, *Written-Books*, *Papers*, *Parchments*, *Records*, and other Memorials, in moſt Languages; of *great Uſe and Service for the Knowlege and Preſervation of our Conſtitution in Church and State:* And farther reciting, That the ſaid Library had been preſerved with the utmoſt Care by Sir *Thomas Cotton*, Son of the ſaid Sir *Robert*, and by Sir *John Cotton*, (then living) Grandſon of the ſaid Sir *Robert*; and had been very much augmented by them, and lodged in a very proper Place in the ſaid Sir *Robert*'s ancient Manſion-houſe at *Weſtminſter*, for public Uſe and Advantage.—— IIIdly, That the Truſtees thereby appointed ſhall have the ſaid *Cotton-houſe and Gardens*, &c. and alſo the ſaid Library veſted in them and their Succeſſors forever, for the Purpoſes therein mentioned, upon Truſt, to inſpect, conſult, and take Care of the ſaid Library;—and ſhall appoint a Perſon well read in Antiquities and Records to have the immediate Care thereof. IVthly, And an Act of the 5th of Queen *Anne*, *For the better ſecuring her Majeſty's Purchaſe of the ſaid* Cotton-houſe, recites, That the Queen might render ſo great a Treaſure of Books and Manuſcripts *uſeful to her own Subjects and to all learned Foreigners*, ſhe had purchaſed the ſaid *Cotton Houſe* and *Garden*, for 4,500 *l.* of Sir *John Cotton*; and that a convenient Room ſhould be built, wherein the ſaid Library ſhould be lodged, and ſhould be called by the Name of the *Cottonian-Library*; to be managed by the Truſtees therein mentioned, *for the Uſe of the Public forever:*——Which Library, however, (for Want of a proper Repoſitory) did, in the Year 1731, ſuffer by a Fire, which conſumed the Houſe wherein the ſame was then placed; and what remains of the ſaid Library ſtill continues in the ſame inconvenient Room to which (upon Occaſion of that Fire) it was removed.——And farther recites, That *Arthur Edwards*, Eſquire, being deſirous to preſerve for the Public Uſe the ſaid Library, did, by Will, dated in 1738, deviſe 7,000 *l.* (after the Death of Mrs. *Elizabeth Milles*) to erect, in a proper Situation, ſuch a Houſe as might be moſt likely to preſerve the ſaid Library from future Accidents.——But if, before that Bequeſt ſhould take Place, ſuch a Building ſhall be erected, then the ſaid Sum ſhall be employed in purchaſing ſuch Manuſcripts, Books of Antiquities, ancient Coins, Medals, and other Curioſities, as might be worthy to increaſe and enlarge the ſaid Library. He did alſo thereby give to the ſaid Truſtees all his Books, in Caſes, and alſo his Pictures; which have been placed, according to his Deſire, in the ſaid Library.

3. *Harleian Collection of Manuſcripts.*

“ V. And whereas the Right Honourable the Counteſs Dowager of *Oxford* and *Mortimer*, and the Moſt Noble the Dutcheſs of *Portland*, her only Daughter, have expreſſed their Approbation of a Propoſal for the Purchaſe of the valuable Collection of Manuſcripts collected by the late Earl of *Oxford*, and by his Father, in Conſideration of 10,000 *l.* on Condition that the ſame ſhall be kept together in a proper Repoſitory, as an Addition to the *Cottonian Library*, and to be called by the Name of the *Harleian Collection of Manuſcripts:* It is now enacted, That 10,000 *l.* ſhall be paid for them to the ſaid Counteſs's Truſtees.—The ſaid Collection of Manuſcripts to be placed and continued in the ſame Repoſitory in which the *Cottonian Library* is herein-after to be placed.———The Archbiſhop of *Canterbury*, the Lord Chancellor, (or Lord Keeper) the Lord Treaſurer, (or Firſt Commiſſioner of the Treaſury) the Lord Preſident of the Council, the Lord Privy-Seal, the Lord High-Admiral, (or Firſt Commiſſioner of the Admiralty) the Lord Steward and Lord Chamberlain of his Majeſty's Houſhold, the Biſhop of *London*, each of the Principal Secretaries of State, being a Peer or Lord of Parliament, the Speaker of the Houſe of Commons, each of the Principal Secretaries of State, *not* being a Peer or Lord of Parliament, the Chancellor of the Exchequer, the Lord Chief Juſtice of the King's-Bench, the Maſter of the Rolls, the Lord Chief Juſtice of the Common-Pleas, his Majeſty's Attorney-General and Solicitor-General, the Preſident of the *Royal Society*, the Preſident of the *Royal College of Phyſicians*; together with *Charles* Lord *Cadogan*, and *Hans Stanley*, Eſquire; with *Samuel Boroughs* and *Thomas Hart*, Eſquires, (two of the preſent Truſtees of the *Cottonian Library*;) together alſo with the Moſt Noble *William* Duke of *Portland*, and the Right Honourable *Edward* Earl of *Oxford* and *Mortimer*; ſhall be Truſtees for putting this Act into Execution: And they, or the major Part of them, in a General Meeting aſſembled, [whereof the Archbiſhop of *Canterbury*, the Lord Chancellor, (or Lord Keeper) and the Speaker of the Houſe of Commons, ſhall be *three*] ſhall nominate *fifteen* other Perſons to be Aſſociates to them, and who ſhall continue Truſtees for Life: And, on the Death of any ſuch Truſtee, the reſt ſhall, in like Manner, elect another in his Place, and ſo *toties quoties.*”

Next follow ſundry Clauſes, for the Succeſſion to Lord *Cadogan*, and to *Hans Stanley*, Eſquire, —or to *Samuel Borroughs* and *Thomas Hart*, Eſquires:—And to the Duke of *Portland* and Earl of *Oxford.*

A. D. 1753

Oxford. [As the major Part of all the Truſtees, and the Lord Archbiſhop of *Canterbury*, the Lord Chancellor, and the Speaker of the Houſe of Commons, cannot all be preſent at every General Meeting for the Election of Truſtees, this Clauſe was altered by an Act of the ſucceeding Seſſion, (*For making perpetual ſeveral Laws*, &c.) “ So as that any *two* of the firſt-named *three*, and a Majority of a General Meeting of the other Truſtees, whereof not leſs than *ſeven* to be preſent, ſhall be deemed valid and effectual.”]

“ VI. One *general Repoſitory* ſhall be provided in ſuch convenient Place within the Cities of *London* or *Weſtminſter*, or their Suburbs, as the Truſtees ſhall direct, for the Reception of *Sloan's Muſeum*, the *Cottonian Library*, (and the Additions to be made thereto by Virtue of the Will of the ſaid *Arthur Edwards*, Eſquire;) and alſo of the *Harleian Manuſcripts*; and of ſuch other Additions to the *Cottonian Library* as ſhall be made; and of ſuch other Collections and Libraries, as, with the Approbation of the Truſtees for this Act, ſhall be admitted into the ſaid *General Repoſitory*. And the *Muſeum* of Sir *Hans Sloan*, in all its Branches, ſhall therein be kept together and intire, with proper Marks of Diſtinction. Alſo the *Harleian Collection of Manuſcripts* ſhall be kept together in the *General Repoſitory*, as an Addition to the *Cottonian Library*.

“ VII. The *Truſtees* ſhall be one Body Politic and Corporate, and ſhall have Succeſſion *for ever*, by the Name of *The Truſtees of the Britiſh Muſeum*; with a Common-Seal; and may ſue and be ſued, make By-laws, *&c.* with Power to purchaſe and enjoy, for the Purpoſes of this Act, as well Goods and Chattles, as Lands, Tenements, and Hereditaments, not exceeding 500*l.* yearly:—They may at a General Meeting, from Time to Time, make Statutes and Rules for the Cuſtody, Preſervation, and Inſpection, of the before-named ſeveral Collections; —may appoint the Salaries of Officers, and may diſplace ſuch at Pleaſure.—And the Archbiſhop of *Canterbury*, Chancellor, and Speaker, or any two of them, ſhall recommend to his Majeſty two fit Perſons, for the King to name one of them to be *principal Librarian*. And the reſt of the Officers and Servants ſhall be appointed by thoſe three, or any two of them; who are hereby impowered, in Caſe of the Sickneſs or other neceſſary Abſence of thoſe Officers, to appoint Deputies to ſupply their Places.

“ VIII. Free Acceſs to the ſaid *General Repoſitory* ſhall be given by the Truſtees to all ſtudious and curious Perſons, at ſuch Times, in ſuch Manner, and under ſuch Regulations, for inſpecting and conſulting the ſame, as by the Truſtees, at a General Meeting, ſhall be limited for that Purpoſe.

“ IX. A Lottery for 300,000*l.* in Tickets of 3*l.* each, is hereby appointed for the Purpoſes aforeſaid; and twice 50,000 Tickets, at 3*l.* each, were to be iſſued for that End; the firſt 50,000 Tickets to determine the Fate of the ſecond 50,000 Tickets:” [But what is moſt memorable in this Lottery was, *That only* 200,000*l. was paid back to the Adventurers in Prizes, and the Blanks utterly ſunk*; ſo that 100,000*l.* remained to this *General Repoſitory*, out of which only the Expence of the Lottery was to be deducted! ſo diſadvantageous a Lottery never having before been countenanced by Authority.] “ Finally, the remaining Profits ariſing from that Lottery were to pay the before-named 20,000*l.* to Sir *Hans Sloan*'s Executors, and 10,000*l.* to the Counteſs of *Oxford*; alſo the Expence of purchaſing a *General Repoſitory* for receiving his *Muſeum* from Sir *Hans*'s Manor-houſe at *Chelſea*; alſo for receiving the Manuſcripts of the late Earl of *Oxford*; and for removing thereto the *Cottonian Library*; and alſo for Salaries to Officers and Servants; as alſo for the neceſſary Furniture of the ſaid *General Repoſitory*, and of ſuch Cabinets, Book-Caſes, and other Neceſſaries and Embelliſhments as the Condition of the ſeveral Collections ſhall require.”

We ſhall only farther add, That ſince the paſſing of this Act, the Truſtees have purchaſed and fitted up the elegant Palace of the late Duke of *Montagu*, for the Reception of all the ſaid three different Species of Collections. An Houſe worthy to be the *General Repoſitory* of the richeſt and nobleſt Collection in the Univerſe! A Collection ſo rich, ſo vaſt, and ſo amazing, as literally to require *Days* inſtead of *Hours*, for the mere Peruſal of it!

More Money and new Commiſſioners appointed by the *Britiſh* Legiſlature, for diſcovering the *Longitude* at Sea.

An Act of Parliament paſſed, of this ſame Seſſion and 26th of King *George* the Second, to render more effectual an Act of the 12th Year of Queen *Anne*, *For providing a public Reward for ſuch Perſon or Perſons as ſhall diſcover the* Longitude *at Sea.* With regard to the making Experiments of Propoſals to be made for diſcovering the ſaid *Longitude*; and to enlarge the Number of Commiſſioners for putting in Execution the ſaid Act. This Statute (after reciting the former Act) now enacts, “ That whereas a competent Number of the Commiſſioners for the *Longitude* have heard and received ſeveral Propoſals, at different Times, for that Diſcovery, and were ſo far ſatisfied of the Probabilities of ſuch Diſcoveries, that they thought it proper to make Experiments thereof, and certified the ſame to the Commiſſioners of the Navy, with the Name of Mr. *John Harriſon*, Author of the ſaid Propoſals, who thereupon received 1,250*l.* as Part of 2,000*l.* allotted by the former Act; which the Commiſſioners thought neceſſary for making the ſaid Experiments. And whereas a like competent Number of Commiſſioners for the *Longitude* did appoint Mr. *William Whiſton* to ſurvey and determine the *Longitude* and *Latitude* of the chief Ports and Headlands on the Coaſts of *Great-Britain* and *Ireland*, and the Iſlands and Plantations thereunto belonging, for which Purpoſe 500*l.* more (Part of the ſaid 2,000*l.*) was applied; ſo that the Commiſſioners have now only 250*l.* remaining of the ſaid 2,000*l.* And as, from the Experiments already made, there is great Reaſon to expect, That by continuing to encourage ingenious Perſons to make farther Improvements, ſuch Diſcoveries may at length be produced as will effectually anſwer the End, and thereby contribute very much to

“ the Advantage of the *Trade* and *Honour* of this Kingdom. It is therefore hereby enacted, That any *five* of the ſaid Commiſſioners ſhall have full Power to hear and receive Propoſals for diſcovering the ſaid *Longitude*; and where they ſhall be ſo far ſatisfied of the Probability of any ſuch Propoſal or Diſcovery, as to think it proper to make Experiment thereof, they ſhall certify the ſame, together with the Names of the Authors, to the Commiſſioners of the Navy, who ſhall thereupon make out Bills for ſuch Sums (not exceeding 2000 *l.* over and above the ſaid 250 *l.*) as the ſaid Commiſſioners for the *Longitude* ſhall think neceſſary for making ſuch Experiments.——The Governor of *Greenwich* Hoſpital, the Judge of the Admiralty Court, the Secretaries of the Treaſury, the Secretary of the Admiralty Board, and the Comptroller of the Navy, ſhall be joint Commiſſioners with thoſe appointed by the ſaid Act of the 12th of Queen *Anne*, for diſcovering the *Longitude*.”

The *Jews* are, by an Act of the *Britiſh* Parliament, naturalized; which Naturalization is repealed in the next following Seſſion.

Another Statute of this ſame Seſſion of Parliament paſſed, (though not without much Oppoſition) *To permit Perſons profeſſing the* Jewiſh *Religion to be naturalized by Parliament.* By an Act of the 7th of King *James* II. and another of the 13th of King *George* II. all ſuch as were to be naturalized were firſt to receive the Sacrament of the Lord's Supper, and to take the legal Oaths to the King; “ whereby (ſays the Preamble to this Statute) many Perſons of conſiderable Subſtance, profeſſing the *Jewiſh* Religion, are prevented from being ſo naturalized.”—It was now therefore enacted, “ That *Jews* may, upon Application, be naturalized by Parliament, without receiving the Sacrament, provided they, and all others hereafter to be naturalized, ſhall be abſolutely ſubject to the Diſabilities expreſſed in an Act of the 1ſt of King *George* I. (recited in its Place.) —And alſo who ſhall have previouſly inhabited for *three* Years in his Majeſty's Dominions, without being abſent above *three* Months at any one Time.——*Laſtly*, Hereafter, all *Jews* are hereby diſabled from purchaſing or inheriting any Advowſon, or Right of Patronage, or Preſentation, or other Right to any Benefice, Prebend, or other *eccleſiaſtical* Living or Promotion, School, Hoſpital, or Donative.” As no ill Uſe could well be made of this new Privilege to the *Jews*; and as it might gradually have drawn hither many Perſons of great Subſtance to ſettle with their Wealth among us, and might conſequently farther promote the national Commerce, very many could not then ſee that it ſhould reaſonably have given any juſt Offence to moderate and rational Chriſtians. Nevertheleſs, this Act was repealed in the following Seſſion of Parliament; for which Repeal the Grounds aſſigned were, “ That Occaſion had been taken, from the ſaid firſt-named Law, to raiſe *Diſcontents*, and to diſquiet the Minds of many of his Majeſty's Subjects:—Wherefore it was *now* repealed to all Intents and Purpoſes;” being the very firſt public Act of the ſaid Seſſion.

Summary View of the Trade of *South Carolina*.

The following Account of the Trade of his Majeſty's *American* Province of *South Carolina*, was tranſmitted in this ſame Year 1753, and is well worth recording, *viz.*

Eight Months Exportations from, and Importations to, *Charles-Town*, *viz.* from the 12th of *November* 1752, to the 12th of *July* 1753.

Exported,		
Rice, - - -	31,418	Barrels.
Pitch, - - -	13,814	
Tar, - - -	6,221	
Turpentine, - -	3,808	
Beef, - - -	263	
Pork, - - -	234	
Deer Skins, - -	303	Hogſheads.
Lumber, - -	591,412	Feet.
Shingles, - -	581,020	Pieces.
Caſk-Staves, - -	78,932	

Imported,

Rum, 921 Hogſheads, 30 Tierces, 93 Barrels.
Sugar, 113 Hogſheads, 5 Tierces, 160 Barrels, 65 Baſkets.
Indian Corn, 63,315 Buſhels.
Negroes, 511.
Flour, 3425 Barrels.
Salt, 9463 Buſhels.
Madeira Wine, 230 Hogſheads, 44 Barrels.

N. B. They export from *Carolina* Quantities of fine Oranges and Lemons, of various Kinds, to the more northern Plantations on the Continent; and this would be a great Branch of their Trade, if thoſe fine Fruits could keep croſs the Ocean to *Great Britain*; but it ſeems (after frequent Trials) they cannot generally effect it. There are ſundry Kinds of Drugs produced in, and exported from *Carolina*, though not mentioned or particularized in this ſummary Account; which, however, may be ſufficient to give a tolerable Idea of the increaſing Trade of that fine Province. This Account, however, differs ſo widely from a whole Year's Exportations in this ſame Year 1753, in our Introduction, as poſſibly may be difficult to be accounted for, till new Lights break forth. At preſent, we are inclined to think, that Account comprehends at leaſt more than one Year's Exportation of Rice, *Indian* Corn, *&c.*

Dublin City's vaſt Increaſe in forty-two Years; likewiſe *Liverpool*, *Sheffield*, *Mancheſter*, *Leeds*, and *Birmingham* in *England*.

A Paragraph from the *Dublin* News-papers, in *November* in this Year 1753, obſerves, “ That by a late accurate Survey and Computation, there have been found to have been no fewer than 4000 new Houſes erected [*i. e.* on new Foundations,] in that City and Suburbs, ſince the Year 1711, moſtly to the ſouth and weſt of the Town. In *England*,” (adds that News Writer) “ *Liverpool*, *Sheffield*, *Mancheſter*, *Leeds*, and *Birmingham*, have increaſed more in Proportion, in the ſaid forty-two Years.” He might have added *Briſtol*, alſo greatly increaſed, as alſo *Glaſgow*, and other Places. This Increaſe, however, of *Dublin*, is indeed very great; and if, as it is generally remarked, there are eight Perſons, one with another, in every Houſe in *Dublin*, then this Increaſe amounts to 32,000 Perſons in the ſaid forty-two Years Time.

Many Towns and Cities, the different Cauſes of their Increaſe.

The Increaſe of *Mancheſter*, *Sheffield*, *Birmingham*, *Froom*, *Leeds*, *Briſtol*, *Liverpool*, *Glaſgow*, *&c.* has proceeded principally from our general Increaſe in Manufactures and foreign Commerce;

Dublin

A. D 1753

Dublin partly by that, and alſo by the great Reſort to it, as being the Seat of Government, and by the Increaſe of Luxury in an enormous Degree. The other Places, by their Woollen, Linen, and Iron, *&c.* Manufactures; and from the vaſt Increaſe of the foreign Trade and Navigation of *Briſtol*, *Liverpool*, *Hull*, *Glaſgow*, *&c.*

Marſeilles and *Cadiz's* maritime Commerce.

In the Compaſs of this ſame Year 1753, there entered the Port of *Marſeilles* 1264 Ships.

And into the Port of *Cadiz* about 1100 Ships.

1754

A ſummary View of the Riſe and Conſtitution of that moſt excellent *Society of London, for the Encouragement of Arts, Manufactures and Commerce.*

The Year 1754 gave Birth to one of the nobleſt Deſigns for the Improvement of the general Commerce of *Great Britain* which could poſſibly have been deviſed; *viz.* the voluntary Society, *for the Encouragement of Arts, Manufactures, and Commerce*; its ſole Object being purely and moſt diſintereſtedly the Improvement of ingenious and commercial Arts, for the exciting both of Emulation and Induſtry, by honourable and pecuniary Rewards. It was firſt ſet on Foot by Means of the late Lord *Folkſtone*, Lord *Romney*, the late reverend and excellent Dr. *Stephen Hales*, and a few other private Gentlemen: And as there was already two Societies of a ſimilar Kind in *Scotland* and *Ireland*, this Society confined its Premiums ſolely to that Part of *Great Britain* called *England*, and to *our* own Colonies, Plantations and Settlements in *America*, *Africa* and *Aſia*. This noble Society immediately began to advertiſe Premiums for the Encouragement of young People of both Sexes in the Arts of Drawing and Deſigning; for the Encouragement alſo of our Planters in *America*, for raiſing all the rich and precious Productions of the Countries of *Spaniſh* and *Portugueſe America*, as well as of *Aſia* and *Africa*. Its Utility ſuddenly began to be ſo well perceived, that many Noblemen and eminent Gentlemen, Merchants, Traders, *&c.* became Members and Subſcribers to it, even to the Number of conſiderably above 1000 Perſons. Their preſent Conſtitution conſiſts of one Preſident, eight Vice-preſidents, a Secretary, and a Regiſter, annually elected.—Every Perſon deſiring to be a Member, muſt be propoſed by ſome Member at one Meeting, who muſt give in his Name, *&c.* ſigned by himſelf, and muſt be balloted for at a ſucceeding Meeting; and if two Thirds of the ſaid Meeting be for admitting him, he ſhall be deemed a perpetual Member, on Payment of twenty Guineas, or elſe a ſubſcribing Member, on Payment of any yearly Sum not leſs than two Guineas:—Yet all Noblemen, and alſo ſome Gentlemen, ſubſcribe five Guineas each, and others four, or three Guineas yearly. They have *now* no ſingle Treaſurer, all their Money being lodged at the Bank of *England*, to be drawn out as wanted.—All Queſtions are determined either by holding up of Hands, or by Ballot, if inſiſted on.—They generouſly invite all Mankind to propoſe Subjects for their Encouragement, and when approved of by a Committee, and confirmed by a general Meeting, the Matters propoſed, with their Premiums, are annually publiſhed in News-papers, *&c.* and all poſſible Impartiality in the Diſtribution of Premiums is carefully obviated, by concealing the Claimants Names, and appointing Committees for the ſtrict Examination of their Merits, and occaſionally conſulting the moſt ſkilful Artiſts.—Their Meetings are well attended, a laudable Zeal being by all exerted for the Improvement of the fine Arts, as well as of Manufactures and Commerce. From ſuch truly noble and diſintereſted Intentions, and ſuch an extenſive Plan for the Advancement of the Wealth, Power and Glory of their Country, what may not reaſonably be hoped for? May they increaſe more and more, both in the Number of their Members, and in their Revenue! in which all Lovers of their Country will ſurely cordially join their ardent Wiſhes.

A Computation of the whole Tonnage of *England*'s Shipping.

A certain mercantile Author, under the Year 1754, juſtly enough remarks the Uncertainty of exactly computing the Number of the trading Shipping of *England*: But when he conjectures

they may be about 2000 Ships in foreign Trade, amounting in Tonnage to about - - - - - - - - - - - - - - - -	170,000 Tons,
And about the like Number of coaſting Veſſels, which may contain in Tonnage about - - - - - - - - - - - - -	150,000
Total Tonnage, by his Account, - - - - - -	320,000

he is ſurely ſhort of the Mark in both Reſpects, more eſpecially in the *coaſting Tonnage*, conſidering the great Number of Coaliers Ships, large and ſmall.

When I was at *Briſtol* in the Year 1743, I took ſome Pains in enquiring at their Cuſtom-houſe concerning their foreign and coaſting Trades; and the general Anſwer was, that *Briſtol* had upwards of 400 Ships (greater and leſſer) employed in foreign Trade, including their Trade to *Ireland*; but the Number of Coaſters they could not aſcertain, but only ſaid, that they were undoubtedly very many. Since that Time, it is ſaid, that *Liverpool* has gained Ground, in ſome Trades, of *Briſtol*, and may probably have about or near 300 Ships in foreign Trade, beſide their Coaſters. Now, if the Number of Ships trading beyond Sea, from all the other Ports of *Great Britain*, or even of *England* alone, were exactly known, the whole may very probably amount to conſiderably (perhaps one Half) more than 2000 Ships trading beyond Sea; more eſpecially if the Account given of *London*'s Shipping (which *Maitland*, in his Survey of *London*, ſays was taken from the general Regiſter at the Cuſtom-houſe, for the Year 1732, and therefore an authentic one) be genuine. Moreover, as he thinks *London* poſſeſſes one fourth Part of the foreign Trade of the whole Nation, becauſe ſhe pays three twelfths of all the Cuſtoms; then, if, as by his ſaid Account of *London*'s Shipping, they amounted to 1417 Ships, navigated by 21,797 Seamen; and that in the Year 1728, there arrived in the Port of *London*, from all Parts beyond Sea, 1839 *Britiſh* Ships, 213 foreign Ships, and 6837 Coaſters, (which laſt muſt generally imply they were *Britiſh*) ſurely the firſt-named Computation muſt be far ſhort of the Tonnage (foreign and coaſting) of the whole Kingdom, which ſome conjecture to amount to at leaſt 500,000 Tons. The Number, however, of *London*'s Shipping, has very conſiderably increaſed ſince the Year 1732.

A. D. 1754

France's Encroachments on the *Britiſh* Continent *American* Colonies, broke out in this Year more openly.

The bold and long projected Scheme of *France*, for hemming in our *American* Continent Colonies between theirs and the Ocean, by their erecting a Chain of Forts all along the Weſt Side of our ſaid Colonies, even down to the Bay of *Mexico*, began, in this Year 1754, to ſhew itſelf more openly, though in a Time of profound Peace. Immediately after the laſt Peace of *Aix la Chapelle* they had inſtructed and directed their *Indians* and *Canadians* to diſtreſs and plunder our *Indian* Traders, in the Country about the great and far-extended River *Ohio*, though properly ſubject to the *Britiſh* Crown, as being a Conqueſt of the five *Iroquois* Nations, allowed by *France* in the Treaty of *Utrecht* to be under the *Britiſh* Dominion.

It was Reaſon enough, *for their Purpoſe*, that the getting Poſſeſſion of the River *Ohio* ſeemed to them abſolutely requiſite for their above-named great Purpoſe of connecting of *Canada* with *Louiſiana*, or the *Miſſiſippi* Country. For that End, they, in this ſame Year, ſeized on and deſtroyed our Fort in that Country, after defeating Colonel *Waſhington*; whereupon they erected another in its Stead, which they named *Fort Du Queſne*. This was ſuch an unparalleled Breach of Peace and Friendſhip, as moſt neceſſarily brought on a War between *Great Britain* and *France*, both in *Europe* and *America*, which the latter has ſince had great Reaſon to repent of.

The great Increaſe of the *French Eaſt-India* Trade.

We had in the ſame Year 1754, in the public News from *France*, an extraordinary Inſtance of the immenſe Increaſe of their *Eaſt India* Commerce, *viz.* from *Port L'Orient*, the Station of their *Eaſt India* Shipping, and of all their Warehouſes and Magazines, *viz.* That the Sale of the Cargoes of fifteen *French Eaſt India* Ships then amounted to about thirty-ſix Millions of Livres, or about *one Million and an Half* Sterling *Money*. And upon this Occaſion it was remarked, That, from the Year 1664, when this Company was firſt eſtabliſhed, to the Year 1725, the Courſe of Exchange between *France* and the other States of *Europe*, was always, or moſt generally, to the Diſadvantage of *France*, becauſe thoſe Countries ſupplied her with more Merchandize than they took off from her: But that, ever ſince the Year 1726, when the *French Eaſt India* Company, by their great Importations from *India*, began firſt to counterbalance the *Engliſh* and *Dutch* in that Trade, the Courſe of Exchange has been always or moſtly in Favour of *France*.

1755

The *Free* Britiſh *Herring Fiſhery* Company farther encouraged by Law;

By a *Britiſh* Act of Parliament, of the 28th Year of King *George* II. *For farther explaining, amending*, &c. an Act of the 23d Year of that King, *for the Encouragement of the* Britiſh *White-Herring Fiſhery*, it was enacted, "That the ſeveral Allowances of 3 *l. per Cent*, on all the principal Money employed by the *Corporation of the Free* Britiſh *Fiſhery*, and alſo the Bounty of thirty Shillings *per* Ton on their Shipping, be farther continued for three Years, from the Expiration of the former Term; with ſome other leſſer Privileges now enacted,—ſuch as Liberty to let to hire any of their Buſſes to others, ſo as they be employed in the ſaid Fiſheries only; with ſome other Benefits relating to the Tonnage Bounty, and to their fiſhing at other Stations than thoſe directed by former Acts, *&c.*"

And alſo the *Whale Fiſhery*.

In this ſame Year 1755, [28th *George* II.] by an Act of the *Britiſh* Parliament, *for continuing, explaining and amending the ſeveral Acts made for the farther Encouragement of the Whale Fiſhery*, &c. it is [*inter alia*] enacted,

"I. That every Ship employed in that Fiſhery ſhall have on board an Apprentice, indentured for *three* Years at leaſt, for every *fifty* Tons Burthen; who ſhall be accounted as one of the Number of Men who by Law ought to be on board ſuch Ship.

"II. That no Ship employed in the ſaid Fiſhery, above the Burthen of 400 Tons, ſhall be intitled to a larger Bounty than a Ship of 400 Tons would be entitled to.

"III. Ships under 200 Tons Burthen ſhall hereafter be entitled to the Bounty of *forty* Shillings *per* Ton, as well as thoſe of 200 Tons and upwards, are entitled to by former Statutes."

The great mercantile City of *Liſbon* almoſt totally deſtroyed by an Earthquake; relieved by the Liberality of his *Britannic* Majeſty.

☞ On the 1ſt of *November*, in this Year 1755, that great Metropolis and mercantile City of *Liſbon* began to be almoſt utterly overturned and deſtroyed by repeated Shocks of Earthquakes for ſeveral ſucceeding Days: Whereupon the King and Parliament of *Great Britain*, to teſtify their great Compaſſion for the Sufferers, and in general their great Regard for the King of *Portugal* and his Subjects, ſpeedily ſent thither 100,000 *l. Sterling*, for the Relief of the diſtreſſed ſurviving Inhabitants of *Liſbon*, in Money and Proviſions.

The great Increaſe of the *French Eaſt-India* Commerce.

During the Courſe of the Year 1755, we were adviſed from *Port L'Orient*, that no fewer than twenty-five *French Eaſt India* Company's Ships had ſailed thence for *India* and *China*, which ſhews the vaſt Increaſe of the *French Eaſt Indian* Commerce in a few Years Space.

A brief View of the *Engliſh Eaſt-India* Company's Circumſtances.

The *Engliſh Eaſt-India* Company's Diſputes with the *French* Company in *India*, which had brought on the Loſs of *Fort St. George*, our principal Settlement there, (though afterward reſtored by the laſt Treaty of *Aix la Chapelle*) having occaſioned a large Debt on that Company in *India*, their neceſſary Payments alſo of many Subſidies to the *Nabobs* and other great Officers in *India*, for keeping them in our Company's Intereſt, together likewiſe with the military Force they were at this Time obliged to keep up in *India*, having obliged the Company, toward the Cloſe of the Year 1755, to take the Reſolution of reducing the Dividend on their transferrable capital Stock, from 8 to 6 *per Cent.* from and after *Chriſtmas* 1755, even although no fewer than twenty-one of their Ships had returned ſafe from *India* within the Compaſs of the Year 1755; their ſaid firſt reduced Half-year's Dividend of 3 *per Cent.* was paid at Midſummer 1756, even although the Cargoes of all the ſaid returned Ships were valued at two Millions and upwards.

A. D. 1756

Britain's Declaration of War againſt *France*, and its Cauſes.

On *Tueſday*, the 18th of *May* 1756, War was declared by the King of *Great-Britain* againſt *France*; the Depredations and Violences of the latter in *America*, rendering that Meaſure abſolutely neceſſary, in Vindication of the Honour of the *Britiſh* Crown and Nation, and for the Safety and Protection of the *Britiſh American Colonies*.

Minorca Iſle ſubdued by *France*.

On the 29th of *June*, in the ſame Year, *Fort St. Philip*, the only defenſible Place in the Iſland of *Minorca*, ſurrendered to the *French*.

Sundry good *Britiſh* Statutes this Year enacted for the better ſupporting of the War, and the Encouragement of the *Britiſh* Commerce and Navigation.

In this ſame Year 1756, the 29th Year of King *George* the Second, ſundry good Laws were made by the *Britiſh* Legiſlature, not only for the better ſupporting of the War againſt *France*, but for the Encouragement and Regulation of the *Britiſh* Commerce and Navigation in general, *viz.*

" 1. Such as, the 5th public Act, *to enable Foreigners to ſerve as military Officers in* America.

" 2. The 11th, *for ſupplying of Mariners on board Ships of War and Merchant-ſhips.*

" 3. The 15th, *for granting Bounties on* Britiſh *and* Iriſh *Linens exported.*

" 4. The 23d, *for encouraging of Fiſheries in* Scotland.

" 5. The 26th, *for ſecuring and encouraging the Trade of his Majeſty's Sugar-colonies in* America.

" 6. The 33d, *for regulating Workmens Wages*, &c. *employed in the Woollen Manufacture.*

" 7. The 34th, *for the Encouragement of Seamen, and the more ſpeedy manning of the Royal Navy.*"

All which, though of a public Nature, are not ſo important as to be even barely abridged in ſo general a Work as ours.

1757

The farther great Increaſe of the *Linen* Manufacture of *Scotland*.

By an authentic Account of the Amount of the Linen Cloth, ſtamped for Sale in *Scotland*, from the 1ſt of *November* 1756 to the 1ſt of *November* 1757, it amounts to no fewer than 9,764,408⅞ Yards, valued at 401,511*l.* 9*s.* —½ *Sterling* Money: And that in the ſaid Year 1757, the ſaid Linen Manufacture in *Scotland* had been increaſed 1,217,255¼ Yards, valued at 33,789*l.* 18*s.* —¾*d.* more than in the preceding Year.

Laws made in *Great-Britain*, this Year, for Relief from the great Dearth of Corn, &c.

The Year 1757 proved to be an extremely ſcarce Year all over *Europe*, not only for Wheat-Corn, but for ſundry other Proviſions, whereby the Poor of *Great-Britain* ſuffered not a little for their daily Suſtenance, and even Perſons of middling Circumſtances were put to a conſiderable additional Expence; many Graziers, Butchers, Bakers, Fiſhmongers, &c. taking (we fear) too much Advantage of the general Dearth.

Rates of Wheat, *per* Quarter.

And whereas the Price of *Wheat* in *England* has, throughout this Work, been made one nearly-adequate Rule [at leaſt more than that of any one other ſingle Article of Food or Proviſions whatever] from the *Norman* Conqueſt downward, of judging of the Dearneſs or Cheapneſs of Living in general, as *Bread* and *Flour* are eſſentially neceſſary to every human Creature from the higheſt to the loweſt; and as 3*s.* 6*d.* *per* Buſhel, or 1*l.* 8*s.* *per* Quarter, is deemed a low or cheap Price for *Wheat*; and that 5*s.* *per* Buſhel, or 40*s.* *per* Quarter has uſually been deemed the *Medium* or middling Price, we ſhall here exhibit the Rates of *Wheat* at *London*, in every Month of the ſaid Year of Dearth 1757, as ſold at the *Corn-Exchange* in *Mark-lane*, viz.

In *January* 1757, *per* Quarter, *Wheat*,	from	£ 2	9	to	£ 2	10	
February, - - - - - - - - - -	from	2	7	to	2	11	
March, - - - - - - - - - -	from	2	6	to	2	14	
April, - - - - - - - - - - - - - - - - - -					3	4	
May, - - - - - - - - - - - - - - - - - -					3	4	
June, - - - - - - - - - -	from	3	7	to	3	12	
July, - - - - - - - - - - - - - - - - - -					2	18	
Auguſt, - - - - - - - - - - - - - - - - - -					1	14	
September, - - - - - - - - - - - - - - - -					2	8	
October, - - - - - - - - - - - - - - - - -					2	6	6
November, - - - - - - - - - - - - - - - -					2	2	
December, - - - - - - - - - - - - - - - - -					2	2	

For the remedying of that ſore Evil, many Expedients were debated, both within and without Doors; which at length produced the following Statutes, of the ſaid 30th Year of King *George* the Second, *viz.*

" An Act to prohibit, for a Time to be limited, the Exportation of *Corn*, *Malt*, *Meal*, *Flour*, " *Bread*, *Biſcuit*, and *Starch*.

" II. An Act to diſcontinue (for a limited Time) the Duties upon *Corn* and *Flour* imported, " &c.——

" III. An Act to prohibit the Exportation of *Corn*, *Grain*, *Meal*, *Malt*, *Flour*, *Beef*, *Pork*, *Bacon*, " &c. from *America*, unleſs to *Great-Britain* or *Ireland*; and to permit the Importation thereof " into *Great-Britain* and *Ireland* in neutral Ships, &c.——

A. D. 1757

" IV. An Act to continue the laſt-named Act, for diſcontinuing the Duties upon *Corn* and " *Flour* imported, *&c.*——

" V. Alſo an Act for continuing an Act of this ſame Seſſion, to prohibit, for a limited Time, " the making of Low Wines and Spirits from *Wheat*, *Barley*, *Malt*, &c. or from any Meal or " Flour."

1758

The Scarcity of Proviſions in *Great-Britain* occaſions a Law, permitting the Importation of Salt Proviſions from *Ireland*.

☞ By a Statute of the next Seſſion of Parliament, of the 31ſt Year of King *George* the Second, the before-named Statutes for remedying the Dearth of Corn and other Proviſions, are farther prolonged to the 24th of *December* 1758.

And by another Statute of the ſaid 31ſt Year of King *George* the Second, the permitting the Importation of ſalted Beef, Pork, and Butter, into *Great-Britain* from *Ireland*, at the Time of ſo great a Dearth of all Kinds of Proviſions, was judged at that Time to be of great Advantage to both Kingdoms; and therefore the ſame was hereby ſo permitted to be imported for ſix Months, from *Midſummer* 1758, free from the Payment of all Subſidies, Cuſtoms, *&c.* excepting 1*s.* 3*d.* *per Cwt.* for ſuch Beef and Pork imported, and 4*d.* *per Cwt.* on ſalted Butter; for the Benefit of the Salt-duty; [altered next Seſſion to 3*s.* 4*d.* *per* Barrel for ſalted Beef, Pork, or Butter; and 1*s.* 3*d.* *per Cwt.* for dried Beef-Tongues, or dried Hogs-Meat; in order to be adequate to the Duty payable for ſuch Quantity of *Salt* as is requiſite to be uſed in curing and ſalting thereof.

A Law made in *Great-Britain* for regulating the Aſſize of Bread, *&c.*

In the ſame Seſſion of Parliament was paſſed, *An Act for the due making of* Bread; *and to regulate the Price and Aſſize thereof: And to puniſh Perſons who ſhall adulterate Meal, Flour, or Bread.* This Act was principally occaſioned by Accounts daily publiſhed of certain Bakers mixing Lime, Alum, and other unwholſome Ingredients (in that Time of Scarcity) in their Bread. The Legiſlature therefore took that Matter into their ſerious Conſideration, and took this Opportunity likewiſe of examining an Act of the 51ſt of King *Henry* III. intitled, *Aſſiza Panis et Cerviſiæ*, [*i. e.* the Aſſize of Bread and Ale] and another Act of the the 8th Year of Queen *Anne*, *To regulate the Price and Aſſize of Bread*; whereby ſo much of the before-named Act as related to the Aſſize of Bread was repealed. Which Act of Queen *Anne*, with ſeveral Alterations and Amendments made thereto by ſome ſubſequent Acts, was continued until the 24th of *June* 1757, and to the End of the then next Seſſion of Parliament. This preſent Statute, therefore, reduced into one Act all the ſeveral Laws in Force, relating to the due making, and to the Prices and Aſſize of Bread, all preceding Statutes being hereby repealed: And *new* Tables for the Aſſize and Prices of the various Kinds of Bread were therein promulgated, as alſo what relates to the Prices of the three Sorts of Wheat, Wheaten, and Houſhold Flour, of Rye and Rye-meal; of Barley and Barley-meal; of Oats and Oat-meal; of white Peaſe and white Pea-flour or Meal; and of Beans and Bean-flour. Sundry Clauſes were alſo added, for preventing of Frauds in the Prices of Corn, Flour, and Meal; and for puniſhing of any Bakers who ſhall mix different Sorts of Flour or Meal in their Bread, or ſhall put into their Bread any unwholſome Ingredients. Alſo Meal or Grain of different Kinds, not to be ſold as if of one only Kind: And many other uſeful Regulations for the ſaid Purpoſes, needleſs here to be enlarged on.

The Melioration of the Harbour of *Dover*, farther legally encouraged.

The Harbour of *Dover* ſtill wanting additional Improvements, (which, it is too much to be apprehended, it will ever want) notwithſtanding ſundry former Statutes for that End, and particularly that of the 11th and 12th of King *William* the Third, whereby ſeveral Duties were laid on Coals and on Ships and Veſſels, for raiſing a Sum, not exceeding 30,100*l.* As alſo by an Act of the 2d of Queen *Anne*, and by the 2d and 4th of King *George* the Firſt, *&c.* And that the Truſtees for *Dover* Harbour have borrowed 3000*l.* more on the Duties in thoſe Acts ſpecified, which is not as yet repaid.——And as it would tend greatly to the Preſervation of his Majeſty's Ships of War, and to the Protection and Encouragement of Trade, that the ſaid Harbour ſhould be effectually repaired; but the Money ariſing by the Rates and Duties granted for that End, not being ſufficient, it was therefore now enacted, by the 31ſt of King *George* the Second, " That from and " after the Expiration of the former Term, one Moiety of the former Rates and Duties ſhall be " continued for the Term of 21 Years longer, applicable to the Support of *Dover Harbour*, and " for diſcharging the before-named Debt of 3000*l.* *&c.*" It is much to be wiſhed, (though little to be expected) that this Harbour, ſo happy in Point of Situation, may at length anſwer the great Expence beſtowed on it.

Sundry uſeful *Britiſh* Statutes for the Advancement of naval Affairs and Commerce.

Sundry other uſeful Statutes were made in the ſame 31ſt Year of King *George* the Second, and the ſame Seſſion of Parliament; as,

I. *For the Benefit and Encouragement of Seamen employed in the Royal Navy, and for eſtabliſhing a regular Method for the punctual, frequent and certain Payment of their Wages, and for enabling them more eaſily and readily to remit the ſame for the Support of their Wives and Families; and for preventing of Frauds and Abuſes attending ſuch Payments.* [10th public Statute of this Seſſion.]

II. *To permit the Importation of ſalted Beef, Pork, and Butter, from* Ireland, *for a limited Time.* Proviſions ſtill continuing dear in *England*. [The 28th public Statute.]

III. *An Act for the due making of Bread; and to regulate the Price and Aſſize thereof; and to puniſh Perſons who ſhall adulterate Meal, Flour, or Bread.* [The 29th public Act.]

Milford Haven's great local Advantages, for which

IV. *An Act for applying a Sum of Money towards carrying on the Works for fortifying and ſecuring the Harbour of* Milford, *in the County of* Pembroke. The Preamble whereof ſets forth, " That " this Harbour is more conveniently ſituated for the *fitting out of Fleets, and ſtationing of Cruizers,*

“ than any other Harbour in this Kingdom; and from the many great local Advantages attending
“ it, would, if properly fortified and ſecured, greatly tend to facilitate the naval Operations of this
“ Kingdom, hitherto too frequently retarded, and ſometimes intirely fruſtrated, from the Want
“ of ſuch a Port of Equipment.—10,000*l.* was therefore to be iſſued for making a Beginning to
“ the ſaid Work, and for purchaſing neceſſary Lands, *&c.* for that End;” much to the Credit of our own Age, after having ſo long and often talked of it in this and the preceding Century. It is allowed to be the very beſt Haven in *Great-Britain*; ſince, according to thoſe who have ſurveyed it, 1000 Sail of Ships may ſafely ride in it, at a convenient Diſtance from each other; it has thirteen Roads, ſixteen Creeks, and five Bays; all known by their reſpective Names; its Situation is moſt happy, clear of the ſo often-experienced Inconveniencies of both *Portſmouth* and *Plymouth*, by being without the Channel; and is for that Reaſon alone of ſuch Advantage to us as will overbalance any Expence which its fortifying, *&c.* may occaſion, more eſpecially in Time of any War with the more Southern Nations of *Europe.* [37th public Act.]

And it is to be fortified, &c.

V. *An Act for veſting certain Meſſuages, Lands, Tenements, and Hereditaments; for the better ſecuring his Majeſty's Docks, Ships, and Stores at* Portſmouth, Chatham, *and* Plymouth; *and for the better fortifying the Town of* Portſmouth, *and the Citadel of* Plymouth; *in Truſtees, for certain Uſes; and for other Purpoſes therein mentioned.* [38th public Act.]

Act for better fortifying *Portſmouth*, *Chatham*, and *Plymouth*.

By a Statute of the Year following, Compenſation was to be made to the Proprietors of ſuch Lands as were purchaſed for the Purpoſes of the laſt-named Act. Which five very well-judged Statutes are unneceſſary to be enlarged on in this Work.

About this Time, an ingenious Piece was publiſhed at *Paris*, intitled, *Les Interêts de la France mal entendus.* [i. e. *The true Intereſt of France not rightly underſtood*] principally deſigned for promoting the Huſbandry and Agriculture of that Kingdom, alleged, very truly by the Author, to have been too much neglected, both in the Reign of the preſent *French* King, and alſo by his Predeceſſor *Louis* the Fourteenth, for the Sake of Manufactures and of military Glory, whilſt *France* remained dependant on *England* for their very Bread or Corn: “ He ſuppoſes, for Ar-
“ gument's Sake, the Value of the Riches of *France* to be *one thouſand Millions of Livres*, which
“ would produce fifty Millions of Livres yearly Intereſt, which being divided among ſeventeen
“ Millions of People,” [the Number of Souls or People he ſuppoſes to be at this Time in *France*]
“ it would ſupply 59 Sols (or two Livres nineteen Sols) towards the Subſiſtence of each indivi-
“ dual Perſon. He alſo ſuppoſes the whole Expence of every one of the ſaid ſeventeen Millions
“ of People, on an Average, to be 160 Livres yearly, which, at 10½ *Sterling per* Livre, is, in
“ *Engliſh* Money, 7*l.*” [whether he borrowed this Computation from our *Engliſh* political Writers, or not, it exactly correſponds with them in this reſpect.] “ Upon this Suppoſi-
“ tion, *France*, for ſupplying her full Subſiſtence, ſhould receive from its Agriculture the
“ yearly Value of 2720 Millions of Livres, unleſs ſupplied by Art and Induſtry. Of the ſeven-
“ teen Millions of People, he ſuppoſes twelve Millions to reſide in Cities and great Towns, whilſt
“ the Country wants People to till the Ground. That this Defect is, in Part, owing to Cardinal
“ *Richlieu*'s Syſtem, in re-uniting the ſupreme Authority in one ſingle Point, the *King:* Whereas,
“ before, *France* was divided into many Sovereignties, under particular Lords, which kept the
“ People at a greater Diſtance from each other.———But *now* Men crowd to Court, from
“ whence flow all Favours.——Another Cauſe is the unequal Diſtribution of Lands.——And
“ that, were all the Lands of *France* equally divided, there would be nine Acres and an half for
“ each Perſon.”

An ingenious Eſſay on *France*'s Neglect of Agriculture, whilſt ſhe depended on *England* for her Bread or Corn.

This Eſſay is rather a curious and fanciful Piece of Speculation, than a Scheme intirely reducible to Practice: Yet ſundry uſeful Inferences may be drawn, by Stateſmen, *&c.* from ſuch politico-arithmetical Eſſays.

In this ſame Year 1758, by the diligent and provident Application of his *Britannic* Majeſty, and his Miniſters; the good Fortune of the Nation, in its *American* Provinces, began to be conſpicuous againſt *France*;

Britain's great Succeſs during the Year 1758.

I. By our maſtering the Town and Fort of *Louiſbourg*, with the Iſles of *Cape-Breton* and *St. John*: Whereby we were once more put in Poſſeſſion of the Key to the Trade, Navigation, and Fiſhery of *North-America.* And without which Key conſtantly remaining in our Hands, (or at leaſt its not remaining in the Poſſeſſion of any other Power, and moſt eſpecially of *France*) neither our Continent Colonies, nor our *Newfoundland* and *New-England* Fiſheries, can ever long remain ſafe and proſperous.

Louiſbourg and *Cape-Breton*, the Key of *North-America*, once more maſtered by *Great-Britain.*

II. And to add to our good Fortune, in this ſame Year 1758, the Forces in the Province of *New-York* took and razed the *French* Fortreſs of *Frontenac* on the Lake *Ontario*, as alſo *Fort du Queſne* on the River *Ohio*, which the *French* had taken from us two Years before, which latter Fort has been rebuilt by *us*, by the new Name of *Pittſburg*. Both which Fortreſſes were perfidiouſly built by the *French*, through our own Supineneſs, on the Territory of our ſaid Province of *New-York*, *and in Time of Peace!*

The Forts *Frontenac* and *Du Queſne* recovered from *France.*

III. Laſtly, to crown the Glory and Felicity of this Year, and juſt at the very Cloſe of it, a Squadron of our Navy, with ſome Land-forces on board, maſtered the Iſland of *Goree*, lying near the Mouth of the vaſt River *Senegal*; (known to the Ancients by the Name of the River *Niger*) we having ſome Months before alſo taken from *France* their Forts in the ſaid River, to which the ſaid Iſle of *Goree* was deemed a Protection and Security. By theſe two laſt-named Conqueſts we have acquired a new and very conſiderable Branch of Commerce in poſſeſſing the intire Trade for *Gum*

The *French* Forts on the River *Senegal*, and the Iſle of *Goree* on the *African* Coaſt, maſtered by *Great Britain*, with its happy Conſequences.

Senega

A. D. 1758

Senega (or *Senegal*), before ſolely enjoyed by the *French* on that River and Coaſt, a Drug extremely uſeful and neceſſary in our Silk Manufactures, *&c.* There are alſo ſundry other uſeful Drugs to be had there, as well as Gold-Duſt; and probably alſo this Conqueſt will prove an Addition to our Slave Trade.

1759

A Prohibition of the Exportation of Corn continued for a limited Time; yet is again repealed in this ſame Seſſion of the *Britiſh* Parliament.

Proviſions ſtill continuing dear, an Act paſſed in the 32d Year of King *George* the Second, *For continuing, for a farther Time, the Prohibition of the Exportation of Corn, Malt, Meal, Flour, Bread, Biſcuit, and Starch*; and alſo to continue *the Prohibition of the making of Low-Wines and Spirits, from Wheat, Barley, Malt, or any other Grain, Meal, or Flour, as alſo from Bran.*

Yet, by a ſubſequent Act, of the ſame Seſſion of Parliament, (by Reaſon of a better Crop of Corn, *&c.*) the ſaid Prohibition of the Exportation of Corn, *&c.* and of the Payment of any Bounty on Exportation thereof, was to ceaſe from and after *Lady-day* 1759.

Live Cattle permitted to be imported from *Ireland* into *Great-Britain* and alſo Tallow; both Duty free, for five Years.

By another Statute, of the ſaid Seſſion, the free Importation of all Sorts of live Cattle from *Ireland* to *Great-Britain* was permitted for the Space of *five* Years, from and after the 1ſt of *May* 1759; exempted from the Payment of all Subſidies, Cuſtoms, *&c.*

And by the very next Statute it was enacted, That the Duties payable upon *Tallow* imported from *Ireland* ſhould be diſcontinued, from the ſaid 1ſt of *May* 1759, for the Space of *five* Years; its Preamble importing, “That it may tend to the Eaſe of the Public and Advantage the Revenue, by reducing the high Price and encouraging the Conſumption of *Candles* in this Kingdom.

Milford-Haven has 10,000 *l.* more granted by Parliament for fortifying and ſecuring it.

By an Act of the *Britiſh* Parliament, of the 32d of King *George* the Second, *For applying a Sum of Money granted in this Seſſion of Parliament towards carrying on the Works for fortifying and ſecuring the Harbour of* Milford, *in* Pembrokeſhire, a ſecond Sum of 10,000*l.* was granted for farther carrying on the ſame.——And an Account of the Application of the Monies appropriated towards carrying on the ſaid Works is hereby directed to be laid before both Houſes of Parliament, within twenty Days after the Opening of every Seſſion.

The Prohibition of the Importation of *Cambricks* and *French Lawns* farther enacted, on certain Conditions.

The *Britiſh* Acts of Parliament, of the 18th and 21ſt Years of King *George* the Second, for prohibiting the Wearing and Importation of *Cambricks* and *French Lawns*, not having proved effectual for preventing the fraudulent Importation thereof; it was, in this 32d Year of King *George* the Second, enacted, *For the more effectual preventing the fraudulent Importation of Cambricks and* French *Lawns*, “1. That, from the 1ſt of *Auguſt* 1759, none ſuch ſhall be imported, unleſs they be packed in Bales, Caſes, or Boxes, covered with Sack-Cloth or Canvas, containing each one hundred whole Pieces; otherwiſe to be forfeited. 2. *Cambricks* or *French Lawns* ſhall be imported for Exportation only, to be lodged in the King's Warehouſes, and not to be delivered out but under the like Security and Reſtrictions as prohibited *Eaſt-India* Goods.——And no Cuſtoms or Duties whatever ſhall be paid or ſecured thereon, other than Half the old Subſidy, which is to remain by Law, after the Goods are exported again,—— *&c.*”

A *Britiſh* Statute againſt fraudulently carrying from *Leghorn*, *French Woollen* Goods to *Turkey*, under the Name of *Engliſh*.

The Importation of Woollen Broad-Cloth, of the Manufacture of *France*, into any Ports of the *Levant* Seas on behalf of *Britiſh* Subjects, being not only a manifeſt Diſcouragement and Prejudice to the Woollen Manufactures of *Great-Britain*, but is likewiſe a Means of affording Relief to the Enemy. An Act therefore of this 32d Year of King *George* the Second paſſed, *For the better preventing their Importation into the Ports of the* Levant *Sea, on behalf of* Britiſh *Subjects: And for the more effectual preventing the illegal Importation of* Raw-Silk *and* Mohair-Yarn *into this Kingdom.*

“Iſt, No ſuch Woollen Goods of *French* Manufacture ſhall be ſo imported within the Limits of the Charter of the *Engliſh Turkey* or *Levant* Company, on Account of any *Britiſh* Subject.

“IIdly, Nor ſhall any Woollen Broad-Cloth, or other *Britiſh* Woollen Goods, be imported to any Place within the Limits of the *Turkey* Company's Charter, except directly from this Kingdom on Account of any *Britiſh* Subject, unleſs the Importer ſhall produce a Certificate to the *Britiſh* Ambaſſador, or the Conſul, Vice-Conſul, or other proper Officer appointed by the *Levant* or *Turkey* Company, at the Port where ſuch Goods ſhall be imported, upon Oath from the Exporter or Shipper at the laſt Place of Exportation, That the ſame were brought or received from *Great-Britain*. In which Certificate ſhall be the Name of the Ship and of the Maſter, as well as the Time when imported; alſo the Bill of Lading from *Great-Britain*.——otherwiſe to be deemed *French*, and to be accordingly confiſcated.

“IIIdly, All *Britiſh* Merchants in *Turkey* ſhall, before his exporting any Goods from thence, make Oath before the *Britiſh* Ambaſſador, or Conſul, *&c.* That the ſame were not purchaſed with the Produce of *French* Woollen Goods: And the Importer thereof into *Great-Britain* ſhall there alſo make the like Oath.”

☞ This Act was occaſioned by Diſcoveries very lately made of *Britiſh* Subjects fraudulently ſhipping from *Leghorn* Quantities of *French Woollen Cloths* for *Turkey* under the Denomination of *Engliſh*, to the great Detriment of the *Britiſh* Woollen Manufactures.

And alſo for preventing *Raw-Silk*, &c. brought from *Turkey*

By the ſaid Act alſo, Proviſion was made againſt another fraudulent Practice, *viz.* Whereas the *Woollen Manufactures* of *France* are of late Years ſent to *Turkey*, in great Quantities; and the *French*, in return thereof, bring back *Raw-Silk* and other Commodities to *Marſeilles* and other

Ports,

A. D. 1759

Ports, which have afterward been carried thence into *Italy*, from whence they were afterward ſhipped for *Great-Britain*, in *Engliſh* Ships; greatly to the Diſcouragement of the *Britiſh Woollen Manufactures* and to the Advancement of thoſe of *France*; Meaſures were therefore hereby laid down for preventing both the ſaid Abuſes. But this Act was to continue in Force during the War with *France*, and no longer."

to *France* and thence carried to *Italy*, from being thence brought to *Great-Britain*.

There being an unuſual Scarcity of *Gold* and *Silver* at this Time in *England*, partly occaſioned by much Money's being carried out of the Nation, on Account of our expenſive Wars in *Germany* and *America*, &c. and partly by the large Demand for the current Service of the Year 1759; the *Bank of England*, for the better accommodating of the Public in their Receipts and Payments, did, in *April* 1759, iſſue Caſh-Notes for 15 *l.* and for 10 *l.*; which have proved very convenient for Payments both in Gold and Silver in making up of larger Sums. Poſſibly, that *Bank*, without any great Inconveniency to themſelves, and with conſiderable Conveniency to the Public, [more eſpecially in the Country, now that the forging or altering them is rendered ſo difficult, if not quite impoſſible] might iſſue Notes as low as 5 *l.*; but lower than that Sum would probably be attended with real Inconveniences, in a Country of ſo extenſive an inland Commerce: Although (as we have elſewhere obſerved) Notes of the two incorporated *Edinburgh Banks*, even ſo low as *twenty Shillings Sterling*, are circulated all over that Country, and prove extremely uſeful in Fairs, and Country Places.

New *Engliſh* Bank-Notes of 15 *l.* and 10 *l.* are now iſſued for public and private Conveniency.

In the Month of *May*, in the ſame Year, the fine and fertile *French Weſt-India* Iſle of *Guadaloupe*, after having held out ever ſince *February* preceding againſt a *Britiſh* Sea and Land Force, ſurrendered to our Troops by Capitulation. It is by ſome computed to produce no leſs than 40,000 Hogſheads of Sugar, one Year with another: But this is ſince known to be exaggerated.

The *French* Iſle of *Guadaloupe* ſurrendered to the *Britiſh* Forces.

In that ſame Month and Year, the foreign News-papers acquainted the Public, That the King of *Denmark*, having ordered an Account to be taken of the Number of Men, Women, and Children, throughout all his extenſive Dominions of *Denmark*, *Norway*, *Holſtein*, the Iſlands in the *Baltic*, and the Counties of *Oldenburgh* and *Delmenhorſt*, in *Weſtphalia*; they amounted to 2,444,000 Souls. It does not thereby appear, that his *Daniſh* Majeſty's Subjects in *Iceland* are included in this *Cenſus*; though, conſidering the Barrenneſs of that Iſle, and its lamentably cold Climate, they can be but few in Number.

A *Cenſus* taken of all his *Daniſh* Majeſty's Subjects in this Year 1759.

We had public Advices, in this Year 1759, from *Charles-Town*, in *South-Carolina*, of a very hopeful Proſpect in that Province of the gradual and conſiderable Progreſs and Increaſe of the Production of *Raw-Silk* there, and in the adjoining Province of *Georgia*, *viz.* "In the Year 1757, "1,052 Pound Weight of *Raw-Silk Balls* were received at the *Filature* in *Georgia*: And the next "Year produced no leſs than 7,040 Pound Weight thereof. And that, in this Year 1759, there "has been received at *Savannah*, the Capital of *Georgia*, conſiderably above 10,000 Pound "Weight of *Raw-Silk*, although the Seaſon has not been favourable. This great Increaſe of "that rich, new, and valuable Production in thoſe Provinces is owing to the increaſed Number "of Hands in raiſing the ſame."

The great Increaſe of the Production of *Raw Silk* in *Carolina* and *Georgia*.

We cannot more emphatically deſcribe the Triumphs or Glories of the *Britiſh* Monarchy during this ſame Year 1759, than by tranſcribing Part of the congratulatory Addreſs of the Lord-Mayor, Aldermen, and Commons of the City of *London*, preſented to his *Britannic* Majeſty on the 20th of *October* 1759, *viz.* They humbly beſeech his Majeſty to accept of their moſt humble but warmeſt Congratulations upon the rapid and uninterrupted Series of Victories and Succeſſes, which, under the Divine Bleſſing, have attended his Arms both by Sea and Land, within the Compaſs of this diſtinguiſhed and ever-memorable Year! "The Reduction of Fort *Du Queſne*, "on the *Ohio*;—of the Iſland of *Goree*, in *Africa*:—And of *Guadaloupe*, with its Dependencies, "in the *Weſt-Indies*.—The Repulſe and Defeat of the whole *French* Army, by a handful of In"fantry, in the Plains of *Minden*.—The taking of *Niagara*, *Ticonderoga*, and *Crown-Point*.— "The Naval Victory off *Cape-Lagos*.—The Advantages gained over the *French* Nation in the "*Eaſt-Indies*:—And, *above all*, the Conqueſt of *Quebec*, (the Capital of the *French* Empire in "*North-America*) in a Manner ſo glorious to your Majeſty's Arms, againſt every Advantage of "Situation and ſuperior Numbers, are ſuch Events as will for ever render your Majeſty's auſpi"cious Reign the favourite *Æra* in the Hiſtory of *Great-Britain!*———Meaſures of ſuch National "Concern, ſo invariably purſued, and Acquiſitions of ſo much Conſequence to the *Power* and "*Trade* of *Great-Britain*, are the nobleſt Proofs of your Majeſty's paternal Affection, and Re"gard for the true Intereſt of your Kingdoms, and reflect Honour upon thoſe whom your Ma"jeſty has been pleaſed to admit into your Councils, or to intruſt with the Conduct of your "Fleets and Armies! Theſe will ever command the Lives and Fortunes of a *free* and *grateful* "People, in Defence of your Majeſty's ſacred Perſon and Royal Family, againſt the Attempts "of all your Enemies," &c.

A ſuccinct View of the almoſt miraculous Succeſſes of *Great-Britain*, in this Year 1759.

Quebec, in *Canada*, is maſtered by *Great-Britain*.

The Grants of the Parliament of *Great-Britain*, for the Service of the Year 1759, ſo far ſurpaſſing all former ones, we thought they well merited a Place in this Work, *viz.*

The memorable Parliamentary Grants of *Great-Britain*, for the Service of the Year 1759.

	£.	s.	d.
For 60,000 Seamen, (including 14,845 Marines) and Ordnance for Sea-Service	3,120,000	—	—

—— the Foundling Hoſpital	50,000	—	—
—— Tranſport-Service, *&c.* for Land-Forces, *Anno* 1758	667,772	—	—
—— the Colony of *Nova-Scotia* (1759)	9,902	—	—
—— the Charge thereof *Anno* 1757	11,279	—	—
—— the Civil Eſtabliſhment of *Georgia*	4,058	—	—
—— Deficiency on Wine-Licences, and Duty on Coals exported	24,371	—	—
—— Ditto on Glaſs and Spirituous Liquors	8,882	—	—
—— the *Britiſh* Forts on the Coaſt of *Africa*	10,000	—	—
To Dr. *Long*, *Lowndes*'s Aſtronomical Profeſſor at *Cambridge*, for diſcharging a Mortgage on an Eſtate demiſed by *Tho. Lowndes*, Eſquire (Inventor of a Method for meliorating Brine Salt) for the Endowment of the ſaid Profeſſorſhip, *&c.*	1,280	—	—
For Paying and Cloathing the Militia, to 25th *March* 1760	90,000	—	—
Extra-Expences of Land-Forces in 1758	466,786	—	—
Fortifying *Chatham* Dock	708	—	—
Ditto for *Portſmouth* Town	6,937	—	—
Ditto *Plymouth* Citadel	25,159	—	—
Ditto for *Milford-Haven*	10,000	—	—
Paying Debts on the Eſtate of Lord *John Drummond*	69,911	—	—
To the *Eaſt-India* Company for defending their Settlements	20,000	—	—
To the Provinces on *North-America*, for Troops raiſed by them	200,000	—	—
To Innholders who billoted the *Heſſian* Troops 1758	2,500	—	—
For augmenting the Judges Salaries	11,450	—	—
To the Widow of *N. Harding*, Eſquire, for printing the Journals of the Houſe of Commons	779	—	—
For Intereſt of Money laid out to purchaſe Lands about *Chatham*, *Portſmouth*, and *Plymouth*	1,716	—	—
For purchaſing Lands about Ditto	2,443	—	—
For defraying any Extra-Expence of the War in 1759	1,000,000	—	—
Total (*Sterling Money*; excluſive of the odd Shillings and Pence) - £.	12,749,860	—	—

1. Which Sum, in *Rubles* of *Ruſſia*, 4 *s.* 6 *d.* *per Ruble*, amounts to 56,666,044 *Rubles.*
2. In *German Florins*, at 2 *s.* *per Florin*, - - - - - - - - 127,498,600 *Florins.*
3. In *Swediſh Dollars*, at 1 *s.* 8 *d.* *per Dollar*, - - - - - - 152,998,320 *Dollars.*
4. In *French Livres*, at 10½ *d.* *per Livre*, it makes no leſs than -- 286,663,714 *Livres.*

Britiſh Weights and *Meaſures* endeavoured to be regulated by Parliament, but not compleated.

In the Spring of the Year 1758, the *Britiſh* Houſe of Commons had appointed a Committee to conſider of reducing the Weights, as alſo the Meaſures of Length and of Capacity, to a *perfect Exactneſs* and *Uniformity* throughout the Kingdom of *Great-Britain*. On the 2d of *June*, in the ſame Year, that Committee made a Report of their Progreſs; and in the following Seſſion, on the 1ſt of *December* 1758, a freſh Committee was appointed for the ſaid Purpoſe; and this Committee took very great Pains for enquiring into the original Standards of Weights and Meaſures, and into the moſt effectual Means for aſcertaining and enforcing uniform and certain Standards thereof, as appears by their Report of the 11th and 12th of *April* 1759; which Report was approved of by that honourable Houſe, and was printed and publiſhed by their Order. Yet, either by the Multiplicity of other Affairs, or through the Difficulty of perfecting what had ſo well been begun, or perhaps for both thoſe Reaſons, it is much to be regretted that hitherto nothing farther has been done therein, conſidering how requiſite and

A. D. 1759.

even neceſſary ſuch a Regulation has been long thought to be, by all thinking Perſons, who obſerve the Uncertainty, and even ſometimes Confuſion, in the Buſineſs of buying and ſelling of certain meaſurable Commodities in ſome Counties, as *Corn*, *Wool*, *&c.* and the Frauds committed, more eſpecially amongſt the lower People in the retail Way of Buſineſs! It is therefore to be hoped, That the Legiſlature, in peaceable Times, will find Leiſure to re-conſider this Affair, which, though doubtleſs attended with Difficulty, as partly appears by the laſt-named Report, will, when effectually regulated, redound very much to the Credit of the Legiſlature and to the Benefit of the Public.

Since our laſt Account of the Increaſe of the *Linen* Manufacture in *Scotland*, *Anno* 1757, we have the following moſt promiſing Accounts of the Quantity thereof made and ſtamped for *Sale*, *viz.*

The farther great Increaſe of the *Linen Manufacture* of *Scotland*.

	Yards.	Value. *l.*	*s.*	*d.*
Anno 1758 - - - - - - -	10,624,435	424,141	10	7
Anno 1759 - - - - - - -	10,830,707	451,390	17	3

☞ Thus, from the Year 1728, the Quantity has been gradually increaſing from *three Millions* of Yards, to almoſt *eleven Millions*.

We had the following Account of the *Hollanders* Whale Fiſhery in this ſame Year 1759, *viz.* That 133 Ships brought Home the Produce of 435 Whales: Which may be deemed a good Year for that Fiſhery; being ſomewhat above 3¼ Whales for each Ship.

Holland and *Hamburgh*'s Succeſs this Year 1759, in the *Whale Fiſhery*.

But the *Hamburghers* were not ſo fortunate, who in *ſixteen* Ships brought Home but 18½ Whales.

Ships arriving *at* and departing *from* the Ports following, in the Courſe of the Year 1759, *viz.*

Ships arrived at ſome Ports during the Year 1759, *viz.* *Cadiz*, *Dantzick*, *Koningſberg*, and *Riga*.

1. At *Cadiz* 602 Ships, *viz.* 114 *Engliſh*----155 *Dutch*---195 *Spaniſh*---19 *French*----23 *Portugueſe* ----17 *Swediſh*----24 *Daniſh*----13 *Genoeſe*----16 *Imperial*----2 *Venetian*----7 *Neapolitan*----13 *Raguſan* ----and 7 *Malteſe*. This much ſmaller Number than uſual (eſpecially of *Engliſh*) is owing to the preſent War.

2. At *Dantzick* 626 Ships arrived.

3. At *Koningſberg* (the Capital of *Pruſſia*) 820 Ships arrived, and 758 ſailed.

4. At *Riga* 671 Ships arrived, and 669 ſailed.

☞ From the *Dutch* News-papers we learned, That during the ſaid Year 1759, there paſſed through the *Sound*, into the *Baltic Sea*, 3,289 Ships of different Nations; and 3,568 Ships repaſſed the ſame. Now, as by far the moſt of the 2,117 Ships, ſaid to be arrived at the above-named three Cities in the *Baltic* muſt have been Part of the ſaid 3,289 Ships, the remaining 1,172 Ships muſt have been moſtly bound for *Copenhagen*, *Lubeck*, *Stetin*, *Stockholm*, and *Peterſburg*, and probably moſt of them to *Peterſburg*, the other Ports in the *Baltic*, (as *Roſtock*, *Wiſmar*, *Revel*, *Narva*, &c.) being much leſs conſiderable in Commerce. This, though but a ſhort and in ſome Senſe but a conjectural View of the Navigation and Trade to the *Baltic*, may, however, in ſome Degree enable us to form an adequate Idea of it.

A conjectural View of the Amount of the Commerce of all the chief Ports on the *Baltic* Shores; with brief Remarks.

At *Venice*, within the Compaſs of the Year 1759, there arrived Ships and Veſſels, of various Kinds and Sizes, 1781.

Shipping arrived at *Venice*, during the Year 1759.

And, in the Courſe of the ſaid Year 1759, there were born in the ſaid City of *Venice* 5,172 Children, and there died 6,852 Perſons: Which laſt Number 6,852 being multiplied by 30 the uſual Computation of Perſons, out of which laſt-named Number, one dies annually in great and populous Cities, will give 205,560, for the Number of Souls remaining alive in the ſaid City of *Venice*.

And the Births and Deaths in that City during the ſaid Year, and Number of People in *Venice*.

1760

At *Rome*, a *Luſtrum*, *Luſtration*, or *Cenſus*, of the People living in that City at *Eaſter*, in this Year 1760, was taken; whereby it appeared, that they amounted to 155,184 Inhabitants, *viz.*

Rome's Number of Inhabitants at this Time.

Secular Prieſts -	2,827
Monks -	3,847
Nuns -	1,910
Students -	7,065
Poor in Alms-houſes - - - - - - - - - - - - - - - - - -	1,470
Negroes -	7
Perſons not profeſſing the Catholic Religion - - - - - - - - - -	52
	11,178
The remaining Inhabitants, being Laity - - - - - - - - - -	144,006
Total - - - - - - - - - -	155,184 Perſons.

Which Computation nearly agrees with *Keyſler*'s, in our *Appendix*.

By a farther Account, there were born in *Rome*, between *Eaſter* 1759 and *Eaſter* 1760, 5,318 Children; and there died there 7,181 Perſons: Which laſt Number multiplied by 30 gives the whole Number of its Inhabitants, *viz.* 215,430 Perſons.

Yet,

Yet, on Account of above 11,000 Perſons grown up profeſſing Celibacy, if the Number dying yearly be multiplied by 22 it will come nearer the Truth, or 157,982 beſide thoſe of the *Jewiſh* Nation.

☞ But this laſt Calculation comprehended not only the eighty-one Pariſhes within the Walls of that City, but likewiſe a circular Diſtrict of *five* or *ſix* Miles without the City; where there are Vineyards, ſcattered Houſes, *&c.*

The Difference between the Importance of the *Britiſh Continent Colonies* and the *Iſland Colonies* ſtated.

A judicious Pamphlet appearing in Print in the Month of *April* of this Year 1760, intitled, *The Intereſt of* Great-Britain *conſidered, with regard to her Colonies*, &c. tending to ſhew the abſolute Expediency of *Britain*'s retaining the intire Country of *Canada*, as the only ſolid Safety and Security of our Continent Colonies: Without our preſuming to anticipate what our Governors ſhall determine therein in a future Treaty, we ſhall here only tranſcribe from this very able Author, his Account of the Trade of our Northern or Continent Colonies,. compared with that of our *Weſt-India* Iſles; taken from the following authentic Accounts, laid before the *Board of Trade and Plantations*, viz.

From *Anno* 1744 to 1748, incluſive, exported

	I. To the *Northern Colonies*, from *Britain*,	To the *Weſt-India* Iſlands, from *Britain*,
1744	£. 640,000	£.796,000
1745	534,000	503,000
1746	754,000	472,000
1747	726,000	856,000
1748	830,000	734,000
Total	3,484,000	3,361,000
Difference		123,000
II. From 1754 to 1758, *viz.*		
1754	1,246,000	685,000
1755	1,177,000	694,000
1756	1,428,000	733,000
1757	1,727,000	776,000
1758	1,832,000	877,000
Total	7,410,000	3,765,000
Difference		£. 3,645,000 in Favour of our *Northern Colonies.*

Remarks.

1. The odd Sums under 1,000 *l.* are omitted, as too minute in this Account.

2. This Author obſerves, That the Trade to our *Continent Colonies* in *America* is not only greater than that to our *Weſt-India Colonies*, but is alſo annually increaſing with the Increaſe of their People, and even in a greater Proportion, as the People increaſe in Wealth and in their Ability of ſpending, as well as in Numbers. But he adds, what to us appears at leaſt ſomewhat improbable, *viz.* That the Number of our People in the ſaid Northern or Continent Colonies have been obſerved to double in about twenty-five Years, *excluſive of the Acceſſion of Strangers*; for which he alſo appeals to the Accounts ſent over to the Board of Trade.

3. The vaſt annual Increaſe of our Exports to the *Continent Colonies* in the laſt-named five Years, may probably be in part owing to the Money remitted from hence in thoſe Years for the Expence of our War againſt the *French* in *Canada*, as well as to the ſaid great Increaſe of thoſe Colonies.

4. He alleges, that our Exports to the ſingle Province of *Penſylvania* have, in the laſt *twenty-eight Years*, increaſed nearly in the Proportion of 17 to 1.

5. With Reſpect to the trite Objection, That the Growth of our ſaid *Continent Colonies* may render them *dangerous*, in Reſpect of the Difficulty of retaining them in due Subjection to the *Britiſh* Empire; he (and we conceive every other judicious Perſon) thinks it ſcarcely merits an Anſwer, as we have *fourteen* ſeparate Governments there; having not only different Governors and different Conſtitutions, but likewiſe different Intereſts, and in ſome of them different religious Perſuaſions: And their Jealouſy of each other is already ſo great, that however neceſſary an Union of the Colonies has long been thought by them all, for their common Defence and Security againſt their common Enemies; yet they have never been able to effect it, nor even to agree in applying to their Mother-Country for the eſtabliſhing of ſuch an Union!

The vaſt Increaſe and Improvement of *Ireland*'s Trade and Manufactures, ſince the Acceſſion of King *George* II. and its preſent mercantile State.

Too much can ſcarcely be ſaid in Praiſe of the vaſt Improvements made in our Siſter Kingdom of *Ireland*, in Reſpect to Commerce and Manufactures, ſince the Acceſſion of his Majeſty King *George* the Second to the Throne of theſe Kingdoms. *An Eſſay on the ancient and modern State of Ireland*, publiſhed (at *Dublin* and *London*) in this Year 1760, briefly deſcribes the ſame with Juſtice and Propriety, (p. 49—50.) *viz.* " In this Reign, and not before, our *Linen* Manufac-" ture, in many Reſpects one of the moſt profitable Branches of our National Commerce, has " received all the Encouragement from *Royal Bounty* and *Parliamentary Sanction*, that could be " reaſonably hoped for.

" Perſons of the higheſt Rank, Dignity, and Fortune, were appointed *Truſtees* for the Pro-" pagation, Encouragement, and Diffuſion of this beneficial Trade throughout the reſpective " Provinces.

“ The *Linen Hall* was erected in *Dublin*, under as juſt and nice Regulations as any commercial “ Houſe in *Europe*.

“ The North of *Ireland* began to wear an Aſpect entirely new; and from being (through want “ of Induſtry, Buſineſs and Tillage) the almoſt exhauſted Nurſery of our *American* Plantations, “ ſoon became *a populous Scene of Improvement*, Traffic, Wealth, and Plenty; and is at this Day a “ well planted Diſtrict, conſiderable for Numbers of well-affected, uſeful, and induſtrious Subjects.”

“ ———We no where (abſtracted from our own Country) meet with a Set of pious Patriots “ (in the ever honourable *Dublin* Society) from their *private Funds* adorning their Country in “ general, in every Degree and Branch of Induſtry and Improvement; and inſpired with Sentiments truly public and ſocial, munificently rewarding their Countrymen, of whatſoever Denomination, without Favour or Diſtinction, for meliorating their proper Eſtates or Farms;—for “ excelling in any Production of Nature or Art;—for any Diſcovery or Invention uſeful to Mankind.” This Society, which, for ſome Years before, was merely a voluntary one, was incorporated *Anno* 1750. [☞ Here, however, our Author ſeems to have forgotten, that at *London* we have had, for a few Years paſt, [*i. e.* ever ſince the Year 1754] a more ſplendid, numerous and increaſing Society of the like Nature and Conſtitution; and alſo another for *Scotland*, at *Edinburgh*.

The juſt Commendation of the *Dublin* Society for the Encouragement of Manufactures and Commerce.

Page 60th, “ The Trade of *Ireland*, however in former Times miſerably reſtrained and limited, “ hath in this happy Reign received conſiderable Enlargements; ſuch as, the opening of ſeveral “ *Wool*-Ports.—The Bounty on *Iriſh Linens*, now our ſtaple Commodity imported into *Great* “ *Britain*, and the Immunity lately granted of importing thither *Beef*, *Butter*, *Tallow*, *Candles*, “ *Pork*, *Hides*, *Live Cattle*, &c. a Privilege that, in its Conſequences, muſt prove of ſignal Advantage to both Nations; to *this* eſpecially, as we ſhall hereby be enabled, upon any occaſional “ Emergency, to ſupply our protecting Friends, and proportionably ſtint the Hands of our Enemies, who (by the Profuſion of Wines and ſpirituous Liquors, annually exported from *France* “ to *Ireland*, in Exchange for our Beef, Butter, *&c.* to paſs over the Glut of *Teas* and *Spirits*, “ *&c.* ſmuggled thence by the *Weſtern* Runners) have conſtantly the Balance on their Side. “ Our Exports, with thoſe already mentioned, conſiſt in a few *Cheeſes*, *Salmon* and *Kelp*. But as “ our Linens are, without Queſtion, become the vital Spring of *Iriſh* Commerce, it is Matter of “ great Concern, and equal Surprize, that the other Provinces do not more *univerſally* and *effectually* follow the lucrative Example of the *North*, ſince it is evident that nothing but *equal Induſtry* can be wanting to render them *equally flouriſhing*; yet the Over-growth of *Graziers* and “ *Stock-maſters* is the ſtrongeſt Indication that can be of national Waſte and Decay in reſpect of “ Inhabitants.—Would not a Foreigner ſtart, even at our Humanity, as well as at our Want of “ national Wiſdom and Œconomy, on ſeeing the beſt arable Grounds in the Kingdom, in immenſe Tracts, wantonly enjoyed by the Cattle of a few petulant Individuals, and at the ſame “ Juncture our Highways and Streets crowded with Shoals of mendicant Fellow-creatures, reduced, through Want of proper Suſtenance, to the utmoſt Diſtreſs. Would not a *Frenchman* “ give a Shrug extraordinary, at finding in every little Inn, *Bourdeaux*, *Claret*, and *Nantz* Brandy, “ though, in all Likelihood, not a Morſel of *Iriſh* Bread. It is much to be hoped, that when the “ Spirit of Tillage ſhall become more general, we may have a ſufficient Plenty of Malt Liquors “ of our own native Produce.—Gardening is of late Years ſo vaſtly improved amongſt us, that “ we now have many curious Plants, Fruits and Flowers, never heard of in former Times.— “ Yet many intelligent Perſons of all Ranks complain much of the Want of ſome Eſtabliſhment “ in the Way of a *National Bank*, to ſecure popular Credit and the Kingdom from the various “ alarming Shocks it is ſo frequently incident to, on account of the Failure of *particular or private* “ *Banks*.

A juſt Cenſure of *Ireland*, for its too great Neglect of Tillage, and too much Attachment to Grazing.

Horticulture greatly improved in *Ireland*.

Ireland's Want of a *National Bank* complained of.

From *Ireland* we have farther received the following diſagreeable Accounts, from a judicious private Hand; *viz.*

The freſheſt State of *Ireland*'s Linen Manufacture.

I. That ſince the Year 1757, the Quantity of the Exportation of their Linens has been gradually leſſening; and the following is its State for two Years paſt; *viz.*

	L.	s.	d.
Linens of all Sorts exported for one Year, ended at *Lady-day* 1759, 14,093,431 Yards; which valued, at a Medium, at 16 Pence *per* Yard, comes to - - - - - - - - -	939,562	1	4
Ditto in 1760, 13,375,456¼ Yards, valued at ditto *per* Yard, - - -	891,697	1	8
717,974¾ Yards, decreaſed. Valued at ditto, - - -	47,864	19	8

Poſſibly the annual Increaſe of the Linen Manufacture of *Scotland* may partly, if not entirely, account for this Decreaſe in *Ireland*.

☞ That the Quantity of *Iriſh* Linens ſo exported, is excluſive of what is conſumed within that Kingdom. And that the Quantity of *Linen Yarn* annually exported to *Great Britain* is nearly equal in Value to the Yarn that is conſumed, or wove up into the ſaid exported Linens.

Our ſaid Correſpondent has tranſmitted to us, by Way of Anſwer to our Requeſt, of knowing how many Cities there may be in *Ireland*, of 20,000 Inhabitants and upwards, the following Account for the Year 1760; *viz.*

Cities in *Ireland* exceeding 20,000 Inhabitants.

1. *Dublin* City, in the Year 1760, contained 13,461 Houſes. (The Author of *the new Geography of* Ireland, printed at *Dublin*, *Anno* 1752, gives to *Dublin* City no fewer than 19,352 Houſes; in which ſurely he has greatly overſhot himſelf;) which firſt-named Number, multiplied by ſeven, or allowing ſeven Perſons to each Houſe, on an Average, being very probably near the Truth, makes its People amount to 94,227.

[This Account of *Dublin*'s Magnitude by no Means agrees with the generally received Rule of multiplying the total Number of Perſons dying annually, by 33, if in ſmall and healthy Places, or in the open Country; or by 30, if in great Cities, where Debauchery and the Uſe of ſpirituous Liquors are prevalent. Seeing all the Mortality-bills which we have met with of *Dublin* come ſhort of 2000 Perſons yearly; which laſt Number being multiplied even by 33, [the healthieſt Number] gives but 66,000 Perſons: We have therefore Ground to conclude, that in this, and many other Inſtances, the Accounts received of the annual Mortality-Bills in general, are far from being to be depended on; as in the Inſtances of *Newcaſtle*, *Mancheſter*, *Liverpool*, *Birmingham*, *&c.* at Home, and of *Hamburgh*, and other Cities beyond Sea, plainly enough appears.

2. *Cork* City contained 8,268 Houſes, and, by the ſame Computation, 57,876 Inhabitants.

[*Cork* City in *Ireland* has long been famous for her immenſe annual Exportations to foreign Parts, and more eſpecially to our own *American* Iſland Colonies, of Salt Proviſions, *viz. Beef*, *Pork*, and *Butter*, alſo of *Cheeſe*, *Hides*, &c. The ſaid *Iriſh* Geographer gives to *Cork* 8726 Houſes.]

3. *Limerick* City contained 3,640 Houſes, and 25,480 Inhabitants.

[Of *Limerick* City, finely ſituated on the great River *Shannon*, for the *Weſt-India* and other Trades, the like may be ſaid as of *Cork*, though not in ſo great a Degree. The above-quoted *Iriſh* Geographer gives to *Limerick* 3,959 Houſes.]

4. And *Waterford* City contained 3,284 Houſes, and 22,988 Inhabitants.

[*Waterford* is alſo a well-traded Port, on the Eaſt Side of *Ireland*, with a conſiderable Reſort of Shipping. The above-quoted *Iriſh* Geographer gives to *Waterford* but 2,637 Houſes.]

Parliamentary Supplies, their Amount for this Year 1760.

The Supplies granted by the Parliament of *Great Britain* for the Service of the Year 1760, amounted to ſo vaſt a Sum as 15,503,564 *l.* 15 *s.* 9 *d* ½.

The annual Dividends on the *Dutch Eaſt* and *Weſt-India* Companies capital Stocks. With Remarks.

In the former Part of this Year 1760, the *Dutch Eaſt-India* Company divided 15 *per Cent.* amongſt their Proprietors for the preceding Year's Dividend. And as that Company's capital Stock uſually ſold at from 397 *per Cent.* to 410, we will ſuppoſe 400 *per Cent.* to be the mean Price, (for the Sake of a round Number) then the Purchaſers at this Time made 3¾ *per Cent.* of their Money; which, conſidering the fluctuating State of ſuch trading Societies, proceeding from various Loſſes, *&c.* is far from an alluring Dividend.

In this ſame Year we were informed, that the *Dutch Weſt-India* Company divided 2½ *per Cent.* for one Year paſt, their long decayed Stock uſually ſelling at from 32 to 33 *per Cent.* Theſe Dividends being duly conſidered, we are not to think it ſtrange that the moneyed People of *Holland* are ſo deeply concerned in the *Britiſh* national Funds, even though at the low Intereſt of 3 *per Cent.* as the ſaid Intereſt is ſo certainly and punctually paid, without any Riſque, excepting the fluctuating of the daily Market Prices of the ſaid Funds, and the Commiſſion to their Agents here.

The laying farther Duties on *Britiſh-made Spirits*, its ſalutary Effects.

The high Prices of ſpirituous Liquors manufactured in *Great Britain*, wiſely occaſioned by ſome late Statutes, having greatly leſſened the Conſumption thereof amongſt the Commonalty, and thereby contributed very much to their Health, Sobriety and Induſtry; for the Prevention of the Return of former Miſchiefs, an Act of Parliament paſſed in this 33d Year of King *George* II. *for preventing the exceſſive Uſe of Spirituous Liquors, by laying additional Duties thereon*:—And *for encouraging the Exportation of* Britiſh-*made Spirits*, &c.—Which Law has farther contributed to the ſaid ſalutary End, though needleſs to be enlarged on in this Work.

Sundry other good Laws made in this Year, in Behalf of Commerce, and for the Eaſe and Safety of the People of *Great Britain*, and more particularly of *London*.

Sundry other good Laws were made in the ſaid Seſſion of Parliament, for the Eaſe of Commerce, and Conveniency and Safety of the People: Such as, 1*ſt*, That for farther extending the Time limited for the Importation of *Salted Beef*, *Pork* and *Butter* fom *Ireland*; ſtill farther continued by the Seſſion *Anno* 1761. 2*dly*, The removing the Gun-powder Magazin from its preſent Situation at *Greenwich*, where it was ſo dangerous, to *Purfleet*, a Place of greater Safety. 3*dly*, For farther enlarging and improving the Fortifications and Docks of *Portſmouth*, *Chatham*, and *Plymouth*. 4*thly*, For farther preventing of Frauds relating to the Cuſtoms, and the granting Liberty to export the Rice of and from *Carolina*, directly to any Part of *Europe*, South of *Cape Finiſterre*, in Ships navigated according to Law. And 5*thly*, That for widening of certain Streets, Lanes, *&c.* in the City of *London*, and for opening certain new Streets, and clearing away of ſundry Nuiſances therein, for the Conveniency of Carriages and Paſſengers; inſomuch, that the ſaid noble City already begins to wear a new and more elegant Face, by its old and narrow Gates being removed, new and airy Openings made, and many more intended. Whereby, it is to be hoped, her moſt wealthy Citizens will no longer have Reaſon to remove into the Weſtern Suburbs, under Pretence of the Want of free and freſh Air, but will end their Days with Comfort and Satisfaction, in the Places where Providence had bleſſed their Induſtry with plentiful Fortunes.

His Majeſty of *Great Britain*, toward the Cloſe of this Year, incorporated *Fort Marlborough*, at or near *Bencoolen*, in the Iſland of *Sumatra* in the *Eaſt-Indies*, by the Name of the *Mayor and Aldermen of Fort* Marlborough. Yet in this ſame Year the *French* found Means to ſurprize this Place.

Fort Marlborough in the *Eaſt-Indies* now incorporated.

The ſame worthy *Dutch* Merchant, who had ſupplied us with a Liſt of the Number of People contained in each of nineteen of the moſt principal Towns of the ſingle Province of *Holland*, which we have given in our Appendix, obliged us alſo with the current Prices of the *Dutch Eaſt-India* and *Weſt-India* Companies reſpective Capital Stocks, during nine Months of the preſent Year 1760, *viz.* from *January* to *September*, both included; during which Time the higheſt Price of their *Eaſt-India* Company's Stock was 413 *per Cent.* and fluctuated between that Price and 382, its loweſt Price: Difference 31 *per Cent.* And in the ſaid Time, the higheſt Price of their *Weſt-India* Company's Stock was 33¼ *per Cent.* and its loweſt Price was 29¾, the Difference being 3½ *per Cent.*

The current Prices of the *Dutch Eaſt-India* and *Weſt-India* Companies Stocks.

On the 8th of *September* 1760, the Town of *Montreal*, together with the reſt of *Canada*, was by Capitulation ſurrendered by the *French* Governor *Vaudreuille*, to Major-General *Amherſt*, Commander in chief of the Forces of his *Britannic* Majeſty.

Montreal, and all the reſt of *Canada* conquered by the *Britiſh* Arms; with brief Obſervations on its future Conſequences.

From this Acquiſition, how vaſt an Addition of Territory has accrued to the *Britiſh* Empire in *America*, how much greater Safety and Security have our ancient Continent Colonies hereby obtained, in removing from behind them ſo enterpriſing, reſtleſs, and ſhameleſsly perfidious a Nation? And, which is of much more Importance to us, hereby alſo we become poſſeſſed of all the *Fur* and *Peltry* Trade of that Continent which we did not before enjoy, in Exchange for our coarſe Woolen and other Manufactures, Iron Tools of many Kinds, Kitchen and Houſhold Furniture, with other Copper and Braſs Utenſiis, Lead-ſhot, Gun-powder, Firelocks, Swords, &c. [but we wiſh we could not add, *Rum* in great Quantities, ſo greatly debauching the Morals, &c. of the *Indians*.] How great an Increaſe of our national Commerce then muſt this Acquiſition be, even in our Days? and how much more will it not probably be improved in future Ages, when our *Indian* Traders and Wood-rangers will undoubtedly diſcover many new Nations to traffic with, very far back, or Weſtward, into that vaſt Country; until they at Length (and it is to be hoped very ſoon) ſhall open or diſcover a Way to the Ocean of *Japan* and *China*? A Diſcovery which (in the Womb of Providence) may, and probably will, be attended with great, and perhaps very ſurpriſing Alterations in the Courſe of Commerce; a Diſcovery too, which will infallibly enable *us* to determine the ſo long controverted, and ſo frequently in vain-attempted Point, of a *North-weſt Paſſage* by Sea to the ſaid Eaſtern Parts of *Aſia*, and the extreme Weſtern Parts of *America*, by a ſhorter and ſafer Courſe than from *Hudſon*'s Bay, without any future freſh Attempts from ſo miſerable a Shore, where it is at preſent ſo unlikely ever to be found. And well worth any reaſonable Expence it will be found to be, to ſet about ſuch a Weſtern Journey, with *Indian* Guides, as ſoon as poſſible.

That Part of *Sweden*, ſituated at the farther North End of that Kingdom, and known by the Name of *Lapmarck*, adjoining to *Lapland*, has very lately been ſo much improved and civilized, that in the Diet of *Sweden*, at the Cloſe of this Year 1760, the Speaker of the Houſe of *Peaſants* [*i. e. Farmers*] tells their King, in Expreſſion of their Gratitude for his Goodneſs and Care of that northern Part of his Dominions, "That thoſe Parts which have hitherto remained *wild, uncultivated*, and moſtly uninhabited, wear at preſent a quite different Face, being now covered "with Dwellings, and its Lands cultivated; and for the firſt Time (ſays he) ſince the Creation "of the World, this new People appear in the Diet with *us*, by their Repreſentatives. How "would it rejoice our Hearts, to ſee our dear Country extend its Bounds more and more, "by the draining of Moraſſes, and other Lands covered with Water, and by the peopling of "Deſarts."

Sweden's late Improvement of its northern and uncultivated Parts.

The following Mortality Accounts, &c. of foreign and ſome *Britiſh* Places, for or during the Year 1760, are all that we have been able to procure; and even ſome of thoſe are doubtful to be entirely depended on, *viz.*

At *Amſterdam*, *Anno* 1760. Buried, 7,700 Perſons.———Ships arrived in the *Texel*, 1,412 of different Nations.

Mortality Bills, *Anno* 1760, of *Amſterdam*, &c.

At the *Hague*, in the Year 1760. Buried, 1,090 Perſons.

At the *Hague*,

At *Hamburgh*, in its five Pariſh Churches. Chriſtened, 2,681 Children, (948 Couple married) and 1922 Perſons buried. [But this Account of Burials from the *Dutch* News-papers, concerning *Hamburgh*, is excluſive of its Suburbs.]

And at *Hamburgh*.

At *Vienna*, during the Year 1760, *viz.* Born, 5,193. Buried, 6,320.

Vienna.

At *Stockholm*. Born, 2,120. Buried, 3,378.

Stockholm.

At or in the entire Iſle of *Sealand*, including the capital City of *Denmark*, *Copenhagen*. Born, 9,545. Buried 10,014 Perſons. It is generally ſaid there are about 900 Pariſhes in this fruitful Iſle of *Sealand*; and as there are alſo ſundry Towns and Villages in it, this *Dutch* Account cannot be exact, without making *Copenhagen* leſs conſiderable than *Stockholm*, the Capital of *Sweden*, which alſo the *Danes* themſelves, whom we have conſulted, readily acknowledge: Yet *Copenhagen* is doubtleſs the finer City of the two.

Copenhagen, &c.

Paris.

At *Paris.* Born, 19,058, (of which Number there were about 5000 Foundlings) Buried, 18,446.

London.

At *London*, (by the Pariſh Clerks printed Account) Born, 14,951, [excluſive of Foundlings] Buried, 19,830 Perſons.

Dublin.

At *Dublin.* Born, 1,715. Buried, 1,993; (and by a Medium of three Years, 1,882⅔ buried.)

Norwich.

At *Norwich.* Born, 1,035. Buried, 1,064. (Decreaſed in the Burials, 363 Perſons.)

Liverpool.

At *Liverpool.* Born, 774. Buried, 717. (Decreaſed in the Burials, 264.)

Newcaſtle.

At *Newcaſtle* upon *Tine.* Born, 688. Buried, 522.

The City of *Glaſgow*, in the Year 1759, buried 1034 Perſons; but for this Year 1760 we have ſeen no Account; yet in 1761, their Mortality Bill was but 905 Perſons.

The Towns of *Mancheſter* and *Birmingham*, have each of late Years been ſaid to have buried about, or ſomewhat above 900 Perſons yearly; yet *Mancheſter* is by moſt People ſaid to be conſiderably larger than *Birmingham*: And with reſpect to both Places, and alſo to *Liverpool*, *Norwich*, and *Newcaſtle*, we are perſuaded the yearly Mortality Accounts are much under-rated; which Conſideration will, we hope, excite a legal or authoritative Enquiry into this Subject.

☞ It is much to be wiſhed, that our own great and manufacturing Towns of *Exeter*, *Taunton*, *Froom*, *Devizes*, *Worceſter*, *Birmingham*, *Mancheſter*, *Leeds*, *Halifax*, *Sheffield*, *Coventry*, *Woolverhampton*, *Norwich*, *Colcheſter*, *Canterbury*, &c. were legally obliged to tranſmit to the Board of Trade and Plantations, exact annual Accounts of their Burials and Births; ſeeing an obvious good Uſe might be made thereof.

Scotland's further Increaſe of her Linen Manufacture every Year hitherto.

Scotland's Linen Manufacture ſtill continues to increaſe by large Strides every Year.

For, during the Year 1759, there was ſtamped for Sale, [beſide the very conſiderable Quantities manufactured yearly by private Families, for their own Uſe,]

	Yards.		Value. *l.*	*s.*	*d.*	*Sterling.*

Increaſed in the Year 1760,	917,021	Increaſed in Value,	71,762	13	1	

1761

The Amount of the Supplies voted by Parliament for the Serviee of the Year 1761.

On the 19th Day of *March* 1761, an End was put to the 11th *Britiſh* Parliament; at the Concluſion whereof it appeared, that there had been actually granted for the Supplies of the Year 1761, ſo vaſt a Sum, as would formerly [*i. e.* but half a Century ago] have been thought impoſſible for the *Britiſh* Nation to have raiſed in *one* Year, *viz.* no leſs than 18,816,019 *l.* 19 *s.* 9¾ *d.* Sterling, for the Services of that Year, and for certain Arrears incurred in ſome former Years. We ſhall here give our Readers the ſeparare Heads of ſo vaſt and unparalleled an Expence, as publiſhed in the common News-papers, being well worth the recording, as a matchleſs Proof of the Increaſe of our Riches by Commerce, and of what the *Britiſh* Nation can do upon a great Emergency, though indeed not what, in Times of Tranquillity, it can prudently pretend to do: *Viz.*

If under the Year 1728, we took the Liberty to recommend *national Frugality*, as the beſt Means for being eaſed of national Incumbrances, how much greater Reaſon have we now to urge ſuch-like ſalutary Meaſures, when the preſent national Debt is increaſed to at leaſt double of what it was in that Year.

National Frugality once more recommended as the beſt Means to be eaſed of national Debts.

By the firſt Statute of the firſt Year of the Reign of his *Britannic* Majeſty King *George* the Third, (intitled, *An Act for the Support of his Majeſty's Houſhold, and of the Honour and Dignity of the Crown of* Great-Britain) it was, in Subſtance, enacted, "That the Revenue of his "Majeſty's Civil Liſt (or the Support of his Houſhold, *&c.*) be a complete annual Sum of *Eight* "*Hundred Thouſand Pounds*, (payable quarterly) clear of all Incumbrances, and to ariſe out of "the *Aggregate Fund*, (of which the Poſt-Office's unappropriated Revenue to conſtitute a Part, "after the preſent legal weekly and annual Payments thereout ſhall be ſatisfied.) The ſaid Civil-"Liſt Revenue to be, during his Majeſty's Life, made up as follows, *viz.* from the 25th of *October* "1760, the Day of the Demiſe of his late gracious Majeſty King *George* the Second, *viz.*

His *Britannic* Majeſty King *George* the Third's Civil-Liſt Revenue is fixed by Parliament.

I. Out of the *Aggregate Fund*, for the preſent, the clear Sum of - - - £ 723,000 during the Continuance of the following Annuities, *i. e.* of 50,000*l.* to her Royal Highneſs the Princeſs Dowager of *Wales.*—Of 15,000 to his Royal Highneſs the Duke of *Cumberland.*—And of 12,000*l.* (Total 77,000*l.*) to her Royal Highneſs the Princeſs *Amelia.*

II. His Majeſty to have the ſaid Annuities added to the before-named annual Sum of 723,000*l.* as they ſhall reſpectively become vacant, ſo as at length the Total of the ſaid three Annuities, amounting to the Sum of - - - - - - - - - - - - 77,000

ſhall, with the ſaid 723,000*l.* conſtitute the clear annual Sum of - - - - - - - £ 800,000

Saving, however, to his Majeſty the Revenue of the Dutchy of *Cornwall*, and the Duties and Revenues payable in *Scotland* to his late Majeſty during his Life, and which are hereby continued during the Life of his preſent Majeſty.

The permitting the Importation of ſalted *Beef*, *Pork*, and *Butter*, from *Ireland*, into *Great-Britain*, having been found beneficial, the Continuance thereof was, by a Statute of this ſame firſt Year of King *George* the Third, Cap. IV. farther prolonged to the 24th of *December* 1761; notwithſtanding which the Rates of Fleſh-Meat at *London* ſtill continued to be ſo much higher than in former Times, as, in many Mens' Opinion, ſeemed to merit the particular Conſideration of the Legiſlature.

The Importation of ſalted *Beef*, *Pork*, and *Butter*, from *Ireland* to *Britain* farther continued.

1761 The urging Exigencies of the Nation, in ſo expenſive a War, obliged the Legiſlature to what otherwiſe would have ſeemed a Hardſhip on the labouring Part of the People of *Great-Britain*, viz. by a Statute of the firſt Seſſion of Parliament, and in the firſt Year of his Majeſty King *George* III. Cap. vii. *Anno* 1761, intitled, *An Act for granting to his Majeſty an additional Duty upon ſtrong Beer and Ale; and for raiſing the Sum of twelve Millions, by Way of Annuities and a Lottery, to be charged on the ſaid Duty; and for further encouraging the Exportation of ſtrong Beer and Ale.*

A View of the new Duty of 3*d.* *per* Barrel on ſtrong Beer and Ale, and of the 12 Millions to be thereby raiſed.

I. An additional Duty, by Way of *Exciſe*, of three Shillings *per* Barrel was, from and after the 24th of *January* 1761, to be paid by the Brewers of all Beer and Ale brewed for Sale, above ſix Shillings the Barrel.

II. For the Barrel of *Two-penny Ale* [of *Scotland*] deſcribed in the 7th Article of the *Treaty of Union*, there ſhall be paid ſuch a proportional Part of three Shillings, as two Shillings bear to four Shillings and Nine-pence.

III. Strong Beer or Ale brewed after the 24th of *January* 1761, may be exported as Merchandize, to foreign Parts; for which an Allowance of eight Shillings *per* Barrel ſhall be made to the Brewer, by Way of Drawback.

IV. Moreover, one Shilling *per* Barrel exported is hereby to be allowed, by Way of Drawback, proved to have been brewed, after the 24th of *January* 1761, from malted Corn, when Barley is at twenty-four Shillings *per* Quarter or under.

☞ It was by many hoped, that theſe two Clauſes of this Act might have reaſonably contented the *London* Brewers, ſo as to prevent their raiſing on the Victuallers the Price of their ſtrong Drink; and might alſo prevent their brewing the ſame in any reſpect weaker than formerly: Both which would equally bear hard on the labouring Poor. But the Event has not anſwered that Expectation.

It is almoſt ſuperfluous to remark, that of the ſaid twelve Millions, 11,400,000*l.* are at 3 *per Cent.* in redeemable Annuities; and that the remaining 600,000*l.* was to be raiſed by Way of Lottery, of 60,000 Tickets, at 10*l. per* Ticket: Each of the Blank Tickets to be intitled to 6*l.* 3*s. per Cent.* Annuity, and the Prizes alſo to be a 3 *per Cent.* Annuity. And for the Encouragement of Subſcribers to the ſaid twelve Millions, a long Annuity for 99 Years (from the 5th of *January* 1761) of 1*l.* 2*s.* 6*d. per* each 100*l.* of the ſaid 11,400,000*l.* 3 *per Cent.* redeemable Annuities was allowed to them.

The Statute of the Year 1733, for encouraging the *Britiſh* Sugar Colonies is farther prolonged.

The *Britiſh* Statute of the 6th Year of King *George* the Second, Cap. xiii. *Anno* 1733, *For the better ſecuring and encouraging the Trade of his Majeſty's* Sugar-Colonies *in* America; already exhibited by us under the ſaid Year, being now near expiring, after ſeveral ſubſequent Acts for its Continuance; is, by a Statute of this firſt Seſſion of the firſt Year of King *George* the Third, Cap. ix. farther continued to *Michaelmas* 1763, and from thence to the End of the then next Seſſion of Parliament.

Hog's lard and Greaſe are now added to the former Law to diſcontinue the Duties on Tallow from *Ireland.*

And by Cap. x. of the ſaid Seſſion of Parliament, the Act of the 32d of King *George* the Second, *To diſcontinue for a limited Time the Duties payable on Tallow imported from* Ireland, having been found of great Utility and Benefit to the Public; and, if extended to *Hog's-Lard* and *Greaſe*, would be of further Utility; wherefore the ſaid Act is now accordingly extended to *Hog's-Lard* and *Greaſe*, during the Continuance of the ſaid Act. [Whereby it is to be hoped the late extravagant Prices of *Tallow-candles*, which ſo much affect the Manufacturers and the labouring Poor, may be reaſonably reduced.]

The Duties for the Encouragement of the *Britiſh* Coinage of Money, are farther continued.

And, leſt the Importers of *Gold* and *Silver* into the Mints of *England* and *Scotland* ſhould be diſcouraged through any Deficiency of the Revenue eſtabliſhed by ſundry Laws, *For the Encouragement of the Coinage of Money*, an Act of the ſaid Seſſion, Cap. xvi. now paſſed, farther to continue the Duties for that End.

Cities and Towns of *Great-Britain* [*London* excepted] which contain upward of 20,000 Inhabitants.

Having, under the preceding Year, given a brief Account of the four principal Cities of *Ireland*, in reſpect of Magnitude and Commerce, we ſhall, under this Year, exhibit the beſt Account we could procure, of all the Cities and Towns of *Great-Britain (London* excepted) which contain upwards of 20,000 Inhabitants, *viz.*

I. *Briſtol* is univerſally allowed to be the largeſt City in *Great-Britain*, next after *London.* The anonymous Author of *England's Gazetteer*, publiſhed *Anno* 1751, makes her to contain 13,000 Houſes and 95,000 Souls. When the Author of our Work was there in the Year 1758, he perambulated it for two ſucceſſive Days, and from a near Examination of the Number of Houſes on *new* Foundations, and even of intire *new* Streets, erected ſince the ſaid Year 1751, he imagined he could not heſitate in concluding it to contain about 100,000 Souls, or to be about the Magnitude of that Part of *London* which is contained within her ancient Walls. It is confeſſed, that *London*, within that limited Compaſs, appears to be more populous, or to have more People appearing abroad in her Streets; but that we apprehend to be occaſioned chiefly by its Communication with her vaſtly-extended Suburbs, her immenſe Commerce and Shipping, the greater Reſort of Foreigners, and the near Reſidence of the Court, Nobility, Gentry, and Lawyers: Whereas in the Streets of *Briſtol*, which are more remote from the Harbour and Shipping, the Inhabitants are moſtly either private Families living on their Means, or elſe Manufacturers and Workmen of many various Kinds employed altogether or moſtly within Doors. We have met with ſome *Iriſh* Gentlemen who will needs have the City of *Dublin* to be larger than *Briſtol*, for which they allege the like Reaſon as above-mentioned for *London* within her Walls; and to which, we conceive, it may be anſwered, that, *Dublin* being the Reſidence of the chief Governors; of all the public Offices and Officers; of the Guards, the Nobility and Gentry, with their numerous Retinues, and of the Courts of Juſtice, as well as of the Parliaments; theſe may occaſion a greater Appearance of People in her Streets, without her being really larger than *Briſtol.*

II. *Edinburgh*, being the uſual Reſidence of the Courts of Juſtice of *Scotland*, of the Police, the Boards of Cuſtoms and Exciſe, of Lawyers attending on Pleas, beſide Merchants, Manufacturers, *&c.* and of a learned and well-frequented Univerſity; with all its Suburbs and its proper Port of *Leith*, may fairly be allowed to contain at leaſt 60,000 Inhabitants.

III. *Norwich* is by many thought to contain upwards of 7,500 Houſes, many of which are crowded with Inmates of manufacturing People; if therefore eight People be allowed, on an Average, to each Houſe, it may contain 60,000 Souls. Or if, according to others, there be only 7000 Houſes, and that ſeven Perſons to each Houſe be ſufficient, then 49,000 may be nearly the Number of its Inhabitants. But we conjecture the firſt-named Computation neareſt to the Truth. We may here, by way of Corollary, remark, that *Norwich* has, for many Ages, and more eſpecially for two Centuries paſt, been very eminent for the nobleſt Manufacture of the fineſt Stuffs in the

A. D. 1761

the World, of various Kinds, with which ſhe not only ſupplies our own People in immenſe Quantities, but likewiſe moſt foreign Nations, and alſo our *American* Colonies; whereby her Manufacturers accumulate much Wealth.

IV. *Mancheſter*, in *Lancaſhire*, merely as a Town, (though without being ſo much as a Corporation) has probably more Inhabitants than any other not already mentioned, and abounds ſo much with great Variety of excellent Manufactures of Cottons, Tickens, *&c.* as to employ many Thouſands of Journeymen-weavers, beſide other Workmen, Women, and Children, conſtantly employed, both for the foreign and Home Demand of thoſe Goods: Inſomuch that *Mancheſter* is ſwelled to the Bulk of a great City; many reckoning it to contain from 40 to 45,000 People.

V. *Liverpool*, (in the ſame County) in point of a vaſtly-extended foreign Commerce and mercantile Shipping, is long ſince become undoubtedly the greateſt and moſt opulent Sea-port in the Kingdom, next after *London* and *Briſtol*; probably employing about 300 Sail of her own greater and leſſer Shipping, moſtly in the *Guinea* and *American* Trades, and is now ſaid to be thrice as large and populous as it was at the Acceſſion of the late King *William* and Queen *Mary* to the Crown. In ſhort, this moſt induſtrious People extend their Commerce to all Parts where they are not prevented by excluſive Companies, and is thought to contain at this Time from 30 to 35,000 Inhabitants.

VI. *Birmingham*, in *Warwickſhire*, (though ſtill alſo, like *Mancheſter*, an unincorporated Town) is, through the general Increaſe of our national Commerce, gradually grown up (more eſpecially of later Years) to the Magnitude of a conſiderable City; by means of her vaſt, numerous, and moſt ingenious Manufactures of Iron, Steel, and Braſs, or Hard-ware, in an almoſt-endleſs Variety; ſuch as, enamelled, landſchaped, and poliſhed Steel Snuff-boxes, Keys, Locks, Hinges, Buckles, Buttons, *&c.* not only for ſupplying ourſelves and our own foreign Plantations, but almoſt all the reſt of the World therewith. This very buſy Place is reckoned to contain at leaſt 30,000 Inhabitants.

VII. In much the ſame Sort of Employment has the populous Town of *Sheffield* been more or leſs famous, even as far back as above four Centuries paſt, partly by means of the *Iron Stone* in its Vicinity, but of late much more by the general Increaſe of the Nation's foreign Commerce. It has been peculiarly famous for the Manufacture of Knives and other Cutlery-ware, as far back as the Poet *Chaucer's* Time, (in the Reign of King *Edward* the Third) their Knives being by that Poet (as ſtill by the common People farther North) called *Whittles*. There are above 600 Maſter-cutlers there, who are a Corporation, by the Name of the *Cutlers* of *Hallamſhire*, of which Diſtrict in *Yorkſhire Sheffield* is the principal Town. *Sheffield* Town is reputed to be two Miles in Length and one in Breadth, and to employ about 40,000 Perſons in her Iron Manufactures, though not all living within the Town. They have likewiſe a conſiderable Trade in this Town for Corn and Alum; and are more particularly noted for making of the beſt of Workmens Files and other Iron Tools for various Handicrafts. Yet ſo little curious are its Inhabitants in *ſpeculative Reſearches*, that we have not been able to learn, with any Preciſion, the probable Number of the Inhabitants of ſo populous a Town, as diſtinguiſhed from the reſt of *Hallamſhire*; though from ſundry Circumſtances they may very probably conſiderably exceed 20,000 People.

VIII. *Newcaſtle upon Tine* has been eminent, for ſundry Centuries paſt, for its immenſe and almoſt inexhauſtible Staple of *Pit-coal*, called at *London Sea-coal*, becauſe coming thither only by Sea. It ſupplies not only *London*, and many other Parts of the Kingdom, with that moſt neceſſary Fuel, but likewiſe ſundry foreign Parts therewith, moſtly in her own ſtrong and numerous Shipping, in the Lading of all which from the Pits to the Ships at *Shields*, they employ 5 or 6000 Men called Keelmen: Here is alſo a great Manufacture of Glaſs Bottles, and another of Hard-ware or wrought Iron of many Sorts. It is alſo noted for its Grind-ſtones, of which great Quantities are exported beyond Sea. But beyond all other national Benefits, the Coal-trade of this Town is peculiarly and eminently uſeful, on any Emergency, for its great Number of thorough-bred Mariners for manning our Navy-Royal. It has long been a very populous Place, and, including its Suburbs of *Gateſhead* and *North* and *South Shields*, may probably contain about or near 40,000 Inhabitants.

IX. *Glaſgow* is a beautiful and increaſing City of *Scotland*, abounding in many profitable Manufactures, more eſpecially of the Linen Kind, in great Variety and Beauty. She has alſo a great Number of good Shipping, trading (from her Port of *Greenock*) as well to our *Weſt-India Sugar-Iſles*, as alſo to our Continent-Colonies, more eſpecially to our two Tobacco Provinces: Whereby ſhe is now ſaid to be arrived to the Magnitude of 26 to 27,000 Inhabitants, who are generally reckoned eminent for Induſtry and a prudent Œconomy.

☞ Theſe we apprehend to be [with *London*] all the Cities and Towns of *Great-Britain* which, in reſpect of Magnitude, may certainly contain *upward of* 20,000 Inhabitants within their reſpective Liberties, Boundaries, and Precincts. Yet there are many other Cities and Towns of *England*, which nearly approach to that Number, as may in Part be ſeen in our Appendix.

On the 15th of *January* 1761, his *Britannic* Majeſty's Naval and Land-forces, jointly with thoſe of our *Eaſt-India* Company, made themſelves Maſters of the moſt important City and Port of *Pondichery*, the principal Settlement of *France* in *Eaſt-India*, and the Center of all their Commerce there. The great Significance of which Conqueſt all the World is ſo well acquainted with, and the Loſs of which their *Eaſt-India* Company has already ſo ſadly felt, that it is quite unneceſſary to enlarge upon it.

Pondichery, the principal Port of the *French* in *Eaſt India*, is conquered by the *Britiſh* Forces.

Belle-Iſle, on the Coaſt of *Bretagne*, is conquered by *Great-Britain*.

His *Britannic* Majeſty's Forces by Sea and Land having invaded the Iſle of *Belle-Iſle*, on the Coaſt and in Sight of the Province of *Bretagne*, its very ſtrong Citadel, called *Palais*, ſurrendered to our Troops on the 7th Day of *June* 1761. It is almoſt ſuperfluous to remark, how great a Mortification and Humiliation this Conqueſt was to *France*, and how much this Iſland now became, in our Hands, a Bridle to all the remaining Trade and Navigation on the greateſt Part of the Weſt Coaſt of that Kingdom.

Dominica Caribbee Iſle conquered from *France* by *Great-Britain*.

In *July* 1761, we had an Account of the *Britiſh* Sea and Land Force having (on the 4th of *June*, his *Britannic* Majeſty's Birth-day) maſtered the Iſland of *Dominica*, which was deemed one of the four neutral Iſles in the *Weſt-Indies*, although *France*, notwithſtanding, had planted and in part fortified it: It now contained about 500 *French* Inhabitants, beſide Negroe-Slaves, and a conſiderable Number of native *Caribbeans*.

South Carolina's great Exports in only ten Months Space.

Notwithſtanding the Calamities of *South-Carolina*, during the greateſt Part of this Year 1761, occaſioned by their War with the *Cherokee Indians* againſt their Back-Settlements, yet that beautiful and fruitful Province improves ſo faſt, that in only ten Months, *viz.* from *November* 1760 to *September* 1761, we had an Account publiſhed of the following exported Articles, *viz.*

From the Port of *Charles-Town* cleared out.

	Barrels
Rice,	100,000
Pitch,	6,376
Tar,	931
Turpentine,	4,808
Oranges, (and 161,000 looſe)	144
Pork and Beef,	1,149
Bacon,	13

Indico, 399,366 Pound-weight,
Deer-ſkins, 422 Hogſheads, 331 Bundles, and 300 looſe,
Tanned Leather, 5,869 Sides,
Peaſe and Corn, 11,126 Buſhels,
Bees-wax, 6,721 Pound-weight,
Caſk-ſtaves, 236,850 Pieces,
Shingles, 522,167 Pieces,
Boards, Timber, &c. 466,186 Feet,
Hoops, 29,600 Pieces.

Beſide ſmaller Articles, as, Tobacco, Furs, Raccoon-ſkins, Roots, and Seeds of various Kinds; Candles, Butter, Reeds, Raw-hides, Tallow, Hogs-Lard, Myrtle-wax, Oil of Turpentine, Roſin, Soap, Trunnels, &c.

Births and Burials at *Amſterdam* during the Year 1761.

The Chriſtenings, at *Amſterdam*, in the Year 1761, 4,480, and Burials 7,700.

☞ The great Number of *Jews* and of other Perſuaſions, who do not chriſten nor regiſter their Children, occaſions ſo great a Difference between the Births and Burials in that City.

And Ships arriving there in the ſaid Year.

Ships arriving at *Amſterdam*, during the Year 1761, were 1,508 Ships.

The *Dutch Eaſt-India Company*'s Privileges prolonged for thirty Years.

Our Accounts from *Holland*, at the Cloſe of this Year 1761, acquaint us, that the States-General had then renewed the excluſive Privileges of their *Eaſt-India* Company, for thirty Years longer.

Mortality-Bill at *Koningsberg*, during the Year 1761.

At *Koningsberg*, (the Capital City of *Brandenburgh Pruſſia*) during the Year 1761, there were born 1,780, and buried 1,770 Perſons: Which Number, multiplied by 30, dying yearly in large Cities, makes 53,100 Inhabitants. Or, by 33, gives 58,410 Inhabitants.

And Ships failed thence within this Year.

Sailed from thence, during the Year 1761, 944 laden Ships.

Rome's Mortality-Bill, and Number of Inhabitants; with Remarks.

At *Rome*, by a late Liſt of her Inhabitants, *Anno* 1761, there were of Males,	90,239 Perſons
Of Females,	67,219
Total Inhabitants,	157,458

Of which Number there were then, of

Biſhops,	42

Genoeſe,	2	
Savoyards,	1	
Neapolitan,	5	
	494 Ships.	

1762 In *February* of this Year 1762, his *Britannic* Majeſty's Forces, by Sea and Land, made an intire Conqueſt of the very important Iſland of *Martinica*, which the *French* had ſo well ſupplied and fortified, as to have boaſted, it could not be maſtered by any Force we could ſend againſt it. It is well known to be the richeſt, moſt populous, and beſt-cultivated Colony which *France* had ever poſſeſſed in the *American* Seas. Its Productions are the ſame as thoſe of our own *Weſt-India* Sugar Iſles, and in a ſuperior Degree. It had grievouſly diſtreſſed our *American* Commerce with their numerous Privateers, which determined his Majeſty to ſend ſuch a Force againſt it as could hardly fail of Succeſs: A Force ſo great as perhaps never before was ſeen at one Time ſo far from *Europe*, and which therefore ſtruck the greater Terror in our Enemies, and has raiſed the Reputation and Glory of the *Britiſh* Empire to the higheſt Degree.

The moſt important *Weſt-India* Iſland of *Martinica* conquered by the *Britiſh* Arms, from *France*.

In the Month of *March*, the *Dutch Eaſt-India* Company's General Court agreed to make a Dividend on their Capital Stock of 15 *per Cent.* to be paid to their Proprietors in the Month of *May* following, the current Price of that Company's Capital Stock being 332 *per Cent.*

The *Dutch Eaſt-India* Company divides 15 *per Cent.*

The moſt induſtrious and ſuperlatively mercantile Town of *Liverpool* was by this Time increaſed in Buildings and People ſo much, that they found themſelves obliged to apply to Parliament for their being enabled to erect two more Pariſh-churches and Cemeteries to the former *four*; which accordingly paſſed into a Law in the Spring of this Year.

The Town of *Liverpool* has two new Pariſhes added to her former *four*.

The King of *Spain* having, in this ſame Year, moſt unprovokedly, joined *France* in a Declaration of War againſt *Great-Britain*, and at the ſame Time (equally unprovoked) againſt *Portugal*, which ſhe had moſt unaccountably invaded; it was reſolved by his *Britannic* Majeſty to augment the powerful Land-force which had conquered *Martinica*, and alſo the naval Force which had ſo bravely co-operated in the Conqueſt of that Iſland: And to ſtrike ſuch a Blow as *Spain*, in *America*, had never felt before: And with ſuch an Army and Navy as *America* had never ſeen before. With this unheard-of Force in the *Weſt-Indies*, they landed on the great Iſland of *Cuba*, and attacked the Town and Port of *Havannah*, although its Fortifications were ſo many and ſo ſtrong as to have till then been univerſally judged impregnable, more eſpecially as the Sailors of eleven

The moſt important City and Port of *Havannah*, and the *Spaniſh* Ships and Treaſure there, are maſtered by the *Britiſh* Land and Sea-Forces.

Spaniſh Line of Battle Ships lying in the Harbour, joined ſtrenuouſly in the Defence of the Place; notwithſtanding all which the *Britiſh* Land-Forces, commanded by the gallant Earl of *Albemarle*, aſſiſted by our Navy and our moſt intrepid Sailors, commanded by the no leſs gallant Sir *George Pococke*, Vice-Admiral, maſtered at length, on the 13th of *Auguſt*, that immenſely ſtrong City, the Key of the Treaſures of *Mexico* and *Peru*; not only with all the Treaſure in that City, but with all the Royal Navy lying in its Harbour, and a great Number of richly-laden Merchant-Ships, and an immenſe Quantity of rich Merchandize in the King's and Merchants Warehouſes there: After which they made themſelves Maſters of all the other Forts, *&c.* of that great Iſland. So important a Conqueſt (with its Conſequences, and with the grievous Mortification thereby given to the Court of *Spain*) is eaſier to be conceived than fully to be deſcribed by *us*, being in fact the moſt momentous Acquiſition we had till then ever made in *America*.

St. John's Harbour and Fort at *Newfoundland* is ſurprized by the *French*, who are diſpoſſeſſed thereof in the ſame Summer.

In the Summer of this ſame Year 1762, the *French* ſurprized and maſtered the Harbour and Fort of *St. John's*, in *Newfoundland*, where they did much Miſchief to the Shipping, Warehouſes, *&c.* But Lord *Colvil* and Lieutenant-Colonel *Amherſt*, from *New-York* and *Halifax*, in their Turn, ſurprized the *French* there, in this ſame Summer, and maſtered the ſaid Fort, making 800 *Frenchmen* Priſoners, with all their Stores, *&c.* And though the *French* had four Ships of War there, having more Cannon, Tonnage, and Sailors in them than Lord *Colvil*'s four Ships had, yet they made all Haſte to get home to *France*, before his Lordſhip could get up to them. And thus an End was put to the ſhort-lived Triumph of *France* on that Account.

Exchequer, 5th of *January*, 1762.

An Account of the Public Debts of *Great-Britain*, ſtanding out at the *Exchequer*, on the 5th of *January*, 1762, *viz.*

Debts ſtill remaining and payable at the *Exchequer*, viz.	Principal Debt.			Annual Intereſt, or other Charges payable for the ſame.		
	l.	*s.*	*d.*	*l.*	*s.*	*d.*

33. Ditto of Grants for the Year 1761	112,613
34. To the Truſtees of the *Britiſh Muſeum*	2,000
35. For paving, &c. the Streets of *Weſtminſter*, and *Middleſex* Out-Pariſhes contiguous	5,000
36. For Printing the Journals of the Houſe of Commons	1,500
Total, (excluſive of the odd Shillings and Pence)	£. 18,305,235

N. B. There was beſide, a Sum of 2,114 *l.* granted to make good a Penſion paid to the Right Honourable Mr. *Onſlow*, and a yearly Penſion of 3,000 *l.* was granted to him, for his own and his Son's Life, out of the *Aggregate Fund*, free of all Taxes, Fees, &c. whatever.

Ways and Means for the Year 1762, *viz.*

	l.	*s.*	*d.*
1. Land-Tax, at 4 *s.* in the Pound	2,000,000	—	—
2. Malt Duty	750,000	—	—
3. By *Exchequer-Bills*, to be current after *March* 26th, 1763	1,500,000	—	—
* 4. By 9,600,000 *l.* Capital Annuities, on every 80 *l.* paid in, at 4 *per Cent.* (for 19 Years, and then to be reduced to 3 *per Cent.*) with an Addition of 1 *per Cent. per Annum* for 98 Years on every 20 *l.* paid in	12,000,000	—	—
5. Out of the *Sinking-Fund*	1,009,217	2	8
6. Surplus repaid out of the *Civil Liſt* Revenue of *George* IId.	115,000	—	—
7. Savings on Sums formerly granted for unembodied Militia, which was paid for as embodied	170,000	—	—
8. Surplus of 3 *d. per* Buſhel on Malt	73,678	—	—
9. Vote of Credit, to be charged on next Year's Aids	1,000,000	—	—
	£. 18,617,895	2	8

N. B. The Surplus of *Ways and Means* is applicable to pay the Deficiency of the Land-Tax and Malt-Duty of the Year 1761.

* The Fund for the above 12,000,000 *l.* charged collaterally on the *Sinking-Fund*, conſiſts of certain unappropriated Surpluſſes of Duties on *Spirituous Liquors*, an additional Duty on *Spirituous Liquors*, and on Houſes and Windows, where the Windows do not exceed *fifteen* to a Houſe.

A new Duty alſo was granted on certain Law-Admiſſions, for anſwering the additional Salaries to the Judges.

By a Statute of the ſaid 2d Year of King *George* the Third, (Cap. vi.) " *For the more eaſy victualing of his Majeſty's Ships, Tranſports*, &c. *in his Service*," ſalted Beef, Pork, and Butter, are permitted to be imported from *Ireland* Duty-free, and for none other Purpoſe, for *one* Year, to end on the 24th of *December* 1762.

Iriſh ſalt Proviſions are permitted to be imported free of all Duty, for the Uſe of the Navy-Royal, to *Chriſtmas* 1762.

By another Statute of the ſaid 2d Year, (Cap. xv.) " *For the better ſupplying the Cities of* London " *and* Weſtminſter *with freſh Fiſh*; *and to reduce the preſent exorbitant Price thereof*; *and to protect and* " *encourage Fiſhermen*; any Perſon whatever may buy at any Market, Sea-Coaſt, Port, or River, " all Sorts of ſizeable Fiſh; and may ſell the ſame in thoſe Cities, paying the cuſtomary Dues, " (except in *Covent-Garden* Market.)—The Fiſh-Carriages ſhall be numbered, and entered in the " *Hackney-Coach Office*;—and may travel on *Sundays* and Holidays, and to be uſed for *Fiſh-Carriage* " *ſolely*.——No Proprietor of ſuch Fiſh ſhall break Bulk, nor ſell any Fiſh, till brought to the " reſpective Markets, and there firſt publicly expoſed to Sale, [*Salmon* and *Lobſters* excepted.]— " *Mackrell* may (as before the making of this Act) be ſold on *Sundays*, either before or after Divine " Service.——Fiſhmongers and others ſhall not buy any of the ſaid Fiſh, to be divided by Lots or " Shares, in order to be retailed again, but what ſhall be for his own Sale or Uſe only, on Pain " of 20 *l.*——For preventing of engroſſing of large Quantities of Fiſh, the Quantities of the " Lots are hereby limited; for Inſtance, freſh Salmon, Sturgeon, large Cod, &c. by *the ſingle* " *Fiſh*,—large Haddocks not to exceed *four in one Lot*,—and ſo of other Sorts of Fiſh.——Out " of this Act are excepted *ſalt or dried Fiſh*, *Oyſters*, *Carp*, and *Tench*." ☞ This Statute and its diſintereſted and expenſive Execution is much to the Honour of the moſt worthy and noble Society for Arts, Manufactures, and Commerce.

The new Statute for the Land-Carriage of freſh Fiſh, for the Benefit of *London* and *Weſtminſter*.

For preventing the fraudulent Exportation of the current Coins of *Denmark*, his *Daniſh* Majeſty, in the Month of *October* laſt, 1762, directed the Loan-Bank, for current Caſh-Notes, to exchange their 100 Rixdollar Notes for Notes of 50, 10, or 1 Rixdollar: And not to pay to any one Perſon above one Crown in Specie. The ſaid Loan-Bank's Capital Stock conſiſts of 500,000 Rixdollars, each being of the Value of about 4 *s.* 6 *d.* Sterling. Their Notes are received even in Payment of the Royal Revenue.——They lend out Money on Pledges, not exceeding 100 Rixdollars, at an Intereſt of 4 *per Cent.*

A brief Account of the Loan Bank at *Copenhagen*.

South-Carolina's Exportations, from *December* the 23d, 1761, to *September* the 1ſt, 1762, *viz.*

Rice, - - - - -	62,288 Barrels.	Timber, &c. - -	103,293 Feet.
Indieo, - - -	249,000 lb. wt.	Oranges, - - - - -	4 Barrels.

Thus this fine Province continues to increaſe its Exportations from Time to Time, to the Satisfaction of all who wiſh well to the Public.

Preliminary Articles of Peace, between his *Britannic* Majeſty, on one Side, and the moſt *Christian* and *Catholic* Kings, on the other Side; ſigned on the 3d of *November* 1762, and ſince ratified by the three High Contracting Parties, *viz.*

Article I. A Suſpenſion of Hoſtilities.

II. *France* renounces and guarantees to *Great-Britain* all *Nova-Scotia* or *Acadia*, and likewiſe *Canada*, and the Iſle of *Cape-Breton*, and all other Iſlands in the Gulph and River of *St. Lawrence.*

III. The *French* ſhall have the Liberty of fiſhing and drying on a Part of the Coaſts of the Iſland of *Newfoundland*, as ſpecified in the XIIIth Article of the Treaty of *Utrecht*;—and the *French* may alſo *fiſh* in the Gulph of *St. Lawrence*, ſo as they do not exerciſe the ſame but at the Diſtance of *three Leagues* from all the Coaſts belonging to *Great-Britain*, as well thoſe of the Continent, as thoſe of the Iſlands in the ſaid Gulph.—And as to what relates to the Fiſhery out of the ſaid Gulph, the *French* ſhall exerciſe the ſame, but at the Diſtance of *fifteen Leagues* from the Coaſts of the Iſle of *Cape-Breton.*

IV. *Great-Britain* cedes to *France*, to ſerve as a *Shelter* for the *French Fiſhermen*, the Iſlands of *St. Peter* and of *Miquelon*; and *his moſt Chriſtian Majeſty* obliges himſelf, on his *Royal Word*, not to fortify the ſaid Iſlands, nor to erect any other Buildings thereon, but *merely* for the *Conveniency of the Fiſhery*; and to keep only a Guard of *fifty* Men for the Police.

V. *Dunkirk* ſhall be put into the State fixed by the laſt Treaty of *Aix la Chapelle* and by former Treaties.

VI. The Confines between the Dominions of *Great-Britain* and *France* on the Continent of *North-America* ſhall be irrevocably fixed, by a Line drawn along the Middle of the River *Miſſiſippi, from its Source*, as far as the River *Ibberville*, and from thence by a Line drawn along the Middle of this River, and of the Lakes *Maurepas* and *Pontchartrain, to the Sea*; and to this Purpoſe, the *moſt Chriſtian King* cedes in full Right, and guaranties to his *Britannic* Majeſty, the River and Port of *Mobile*, and every Thing that he poſſeſſes on the left Side of the River *Miſſiſippi*, except the Town of *New-Orleans* and the Iſland on which it is ſituated, which ſhall remain to *France*; provided, That *the Navigation of the River of Miſſiſippi* ſhall be *equally free* to the Subjects of *Great-Britain* and *France*, in its whole Breadth and Length, *from its Source to the Sea*, and that Part *expreſsly* which is between the ſaid Iſland of *New-Orleans* and the *right Bank* of that River, as well as the Paſſage both *in* and *out* of its Mouth.——And the Veſſels belonging to the Subjects of either Nation ſhall not be ſtopped, viſited, or ſubjected to the Payment of any Duty whatſoever. The Stipulations in favour of the Inhabitants of *Canada*, inſerted in the IId Article, ſhall alſo take place, with regard to the Inhabitants of the Countries ceded by this Article. [*i. e.* That the *French* in *Canada* may freely profeſs the *Roman Catholic Religion, as far as the Laws of* Great-Britain *permit!* and may enjoy their Civil Rights, retire when they pleaſe, and may diſpoſe of their Eſtates to *Britiſh* Subjects.]

VII. *Britain* ſhall reſtore to *France* the Iſlands of *Guadaloupe*, *Mariegalante*, *Deſirade*, and *Martinico*, [in the *Weſt-Indies*] and of *Belleiſle*, [on the Coaſt of *France*] with their Fortreſſes. Provided, that the Term of *eighteen Months* be granted to his *Britannic* Majeſty's Subjects ſettled there and in other Places hereby reſtored to *France*, to ſell their Eſtates, recover their Debts, and to tranſport themſelves and Effects, without being reſtrained on Account of their Religion, or any other Pretence, except for Debts, or criminal Proſecutions.

VIII. *France*

A. D. 1762

VIII. *France* cedes and guarantees to *Great-Britain*, the Iſlands of *Granada* and the *Grenadines*, with the ſame Stipulations in favour of their Inhabitants, as are inſerted in the IId Article for thoſe of *Canada*. And the Partition of the Iſlands called *neutral* is agreed and fixed, ſo that thoſe of *St. Vincent*, *Dominico*, and *Tabago* ſhall remain in full Right to *England*; and that of *St. Lucia* ſhall be delivered to *France* in full Right: The two Crowns reciprocally guaranteeing to each other the Partition ſo ſtipulated.

IX. *Great-Britain* ſhall reſtore to *France* the Iſland of *Goree*: And *France* cedes and guarantees *Senegal* to *Britain*.

X. In *Eaſt-India*, *Great-Britain* reſtores to *France* the ſeveral Comptoirs which that Crown had on the Coaſt of *Coromandel* and of *Malabar*, and in *Bengal*, in the Condition they now are, on Condition, that the moſt Chriſtian King renounces the Acquiſitions which he has made on the Coaſt of *Coromandel* ſince the Commencement of Hoſtilities between the two Companies in the Year 1749. And *his moſt Chriſtian Majeſty*, on his Side, ſhall reſtore all that he ſhall have conquered from *Great-Britain* in the *Eaſt-Indies* during the preſent War: And he alſo engages not to erect any Fortifications, or to keep any Troops, in *Bengal*.

IX. The Iſland of *Minorca* and Fort *St. Philip* ſhall be reſtored to his *Britannic* Majeſty, in the ſame Condition they were in when conquered by *France*.

XII. *France* ſhall reſtore all the Countries belonging to the Electorate of *Hanover*, to the Landgraviate of *Heſſe*, to the Duke of *Brunſwic*, and to the Count of *La Lippe-Buckebourg*;—and the Fortreſſes ſhall be reſtored in the ſame Condition as when conquered by *France*;—and Hoſtages ſhall be reſtored without any Ranſom.

XIII. After the Ratification of the Preliminaries, *France* ſhall evacuate the Fortreſſes of *Cleves*, *Weſel*, and *Guelders*, and other Countries belonging to the King of *Pruſſia*: And the *Britiſh* and *French* Armies ſhall evacuate all the Countries of *Weſtphalia*, *Lower Saxony*, *Lower Rhine*, *Upper Rhine*, &c. and in all *Germany*; and each ſhall retire into their own Countries. And both Crowns ſtipulate and promiſe, not to furniſh any Succour, *of any Kind*, to their *reſpective Allies*, who ſhall continue engaged in the preſent War in *Germany*.

XIV. The Towns of *Oſtend* and *Nieuport* ſhall be evacuated by *France*, immediately after the Signature of the preſent Preliminaries.

XV. The Deciſion of the Prizes, made on the *Spaniards* by *Britiſh* Subjects in Time of Peace, ſhall be referred to the Courts of Juſtice of the Admiralty of *Great-Britain*, conformably to the Rules eſtabliſhed among all Nations; ſo that the Validity of the ſaid Prizes between the *Britiſh* and *Spaniſh* Nations, ſhall be decided and judged according to the *Law of Nations*, and according to Treaties, in the Courts of Juſtice of the Nation who ſhall have made the Capture.

XVI. His *Britannic* Majeſty ſhall cauſe all the Fortifications to be demoliſhed which his Subjects ſhall have erected in the *Bay of Honduras*, and other Places of the Territory of *Spain*, in that Part of the World, four Months after the Ratification of the definitive Treaty. And his Catholic Majeſty ſhall not, for the future, ſuffer the Subjects of his *Britannic* Majeſty, or their Workmen, to be diſturbed or moleſted, under any Pretence whatſoever, in their Occupation of cutting, loading, and carrying away Logwood: And, for this Purpoſe, they may build, without Hindrance, and occupy, without Interruption, the Houſes and Magazines neceſſary for them, for their Families, and for their Effects: And his ſaid Catholic Majeſty aſſures to them, by this Article, the *entire Enjoyment* of what is above ſtipulated.

XVII. His *Catholic* Majeſty deſiſts from all Pretenſions which He may have formed to the Right of Fiſhing about the Iſland of *Newfoundland*.

XVIII. The King of *Great-Britain* ſhall reſtore to *Spain* all that he has conquered in the Iſland of *Cuba*, with the Fortreſs of the *Havana*. And that Fortreſs, as well as all the other Fortreſſes of the ſaid Iſland, ſhall be reſtored in the ſame Condition they were in when they were conquered by his *Britannic* Majeſty's Arms.

XIX. In conſequence of the Reſtitution ſtipulated in the preceding Article, his Catholic Majeſty cedes and guarantees, in full Right, to his *Britannic* Majeſty, all that *Spain* poſſeſſes in the Continent of *North-America*, to the Eaſt or to the South-eaſt of the River *Miſſiſippi*. And his *Britannic* Majeſty agrees to grant to the Inhabitants of this Country, above ceded, the Liberty of the *Catholic Religion*: He will, in conſequence, give the moſt exact and moſt effectual Orders, That his *new Roman Catholic Subjects* may profeſs the Worſhip of their Religion, according to the Rites of the *Roman* Church, *as far as the Laws of* Great-Britain *permit*. His *Britannic* Majeſty farther agrees, That the *Spaniſh* Inhabitants, &c. may retire, in all Safety and Freedom, whereever they pleaſe; and may ſell their Eſtates, provided it be to his *Britannic* Majeſty's Subjects, and tranſport their Effects as well as their Perſons, without being reſtrained in their Emigration under any Pretence whatſoever, except Debts or Criminal Proſecutions. The Term limited for this Emigration being fixed to the Space of eighteen Months, to be computed from the Day of the Ratification of the definitive Treaty.———And his Catholic Majeſty ſhall have Power to cauſe all the Effects that belong to him, either Artillery or others, to be carried away.

XX. The King of *Portugal*, his *Britannic* Majeſty's Ally, is expreſsly included in the preſent Preliminary Articles. And their *moſt Chriſtian* and *Catholic* Majeſties engage to re-eſtabliſh the ancient Peace and Friendſhip between them and his *moſt Faithful* Majeſty: And they promiſe,

Iſt, That there ſhall be a total Ceſſation of Hoſtilities between the Crowns of *Spain* and *Portugal*, and between the *Spaniſh* and *French* Troops, on the one Side, and the *Portugueſe* Troops, and thoſe of their Allies, on the other, immediately after the Ratification of theſe Preliminaries: And that there ſhall be a like Ceſſation of Hoſtilities between the reſpective Forces of the *moſt Chriſtian* and *Catholic* Kings, on the one Part, and thoſe of the *moſt Faithful* King, on the other, in all other Parts of the World, as well by Sea as Land: Which Ceſſation ſhall be fixed on the ſame Epochs, and under the ſame Conditions as that between *Great-Britain*, *France*, and *Spain*; and ſhall continue till the Concluſion of the definitive Treaty between *Great-Britain*, *France*, *Spain*, and *Portugal*.

IIdly, That all his moſt Faithful Majeſty's Fortreſſes and Countries in *Europe*, which ſhall have been conquered by the *Spaniſh* and *French* Armies, ſhall be reſtored, in the ſame Condition they were in when they were conquered. And that, with regard to the *Portugueſe* Colonies in *America*, or elſewhere, if any Change ſhall have happened in them, all Things ſhall be put again on the ſame Footing they were before the preſent War.

And the moſt Faithful King ſhall be invited to accede to the preſent Preliminary Articles as ſoon as ſhall be poſſible.

XXI. All the Countries and Territories which may have been conquered, in any Part of the World whatſoever, by the Arms of their *Britannic* and *moſt Faithful* Majeſties, as well as by thoſe of their *moſt Chriſtian* and *Catholic* Majeſties, which are not included in the preſent Articles, either under the Titles of Ceſſion, or under the Title of Reſtitutions, ſhall be reſtored without Difficulty, and without requiring Compenſations.

XXII. —— It is agreed, That the *Britiſh* and *French* Troops ſhall proceed, immediately after the Ratification of the Preliminaries, to the Evacuation of the Countries which they occupy in the Empire, or elſewhere, conformably to the XIIth and XIIIth Articles.

The Iſland of *Belleiſle* ſhall be evacuated ſix Weeks after the Ratification of the *definitive Treaty*, or ſooner, if it can be done.

Guadaloupe, *Deſirade*, *Mariegalante*, *Martinico*, and *St. Lucia*, three Months after the Ratification of the *definitive Treaty*, or ſooner, if it can be done.

Great-Britain ſhall likewiſe, at the End of three Months after the Ratification of the *definitive Treaty*, or ſooner, if it can be done, enter into Poſſeſſion of the River and of the Port of *Mobile*, and of all that is to form the Limits of the Territory of *Great-Britain*, on the Side of the River *Miſſiſippi*, as they are ſpecified in the VIth Article.

The Iſland of *Goree* ſhall be evacuated by *Great-Britain* three Months after the Ratification of the definitive Treaty; and the Iſland of *Minorca* by *France* at the ſame Epoch, or ſooner, if it can be done. And, according to the Conditions of the IVth Article, *France* ſhall enter into Poſſeſſion of the Iſlands of *St. Peter* and of *Miquelon* at the End of three Months.

The Comptoirs in the *Eaſt-Indies* ſhall be reſtored ſix Months after the Ratification of the definitive Treaty, or ſooner, if it can be done.

The Iſland of *Cuba*, with the Fortreſs of the *Havana*, ſhall be reſtored three Months after the Ratification of the definitive Treaty, or ſooner, if it can be done: And at the ſame Time *Great-Britain* ſhall enter into Poſſeſſion of the Country ceded by *Spain*, according to the XIXth Article.

All the Fortreſſes and Countries of his *moſt Faithful* Majeſty in *Europe* ſhall be reſtored immediately after the Ratification of the definitive Treaty: And the *Portugueſe* Colonies which may have been conquered, ſhall be reſtored, in the Space of three Months in the *Weſt-Indies*, and of ſix Months in the *Eaſt-Indies*, after the Ratification of the definitive Treaty, or ſooner, if it can be done. In conſequence whereof the neceſſary Orders ſhall be ſent by each of the High Contracting Parties, with reciprocal Paſſports for the Ships which ſhall carry them, immediately after the Ratification of the definitive Treaty.

XXIII. All the Treaties, of what Nature ſoever, which exiſted before the preſent War, as well between their *Britannic* and *moſt Chriſtian* Majeſties, as between their *Britannic* and *Catholic* Majeſties, as alſo between any of the above-named Powers and his *moſt Faithful* Majeſty, ſhall be, as they are in Effect, renewed and confirmed, in all their Points, which are not derogated from by the preſent Preliminary Articles, notwithſtanding whatever may have been ſtipulated to the contrary by any of the High Contracting Powers. And all the ſaid Parties declare, That they will not ſuffer any Privilege, Favour, or Indulgence, to ſubſiſt, contrary to the Treaties above-confirmed.

XXIV. The Priſoners made reſpectively by the Arms of their *Britannic*, *moſt Chriſtian*, *Catholic*, and *moſt Faithful* Majeſties, by Land and by Sea, ſhall be reſtored reciprocally, and *bonâ fide*, after the Ratification of the definitive Treaty, without Ranſom, paying the Debts they have con-

A. D. 1762 tracted, during their Captivity. And each Crown ſhall reſpectively pay the Advances which ſhall have been made for the Subſiſtance and Maintenance of their Priſoners, by the Sovereign of the Country where they ſhall have been detained, according to the Receipts and atteſted Accounts, and other authentic Titles which ſhall be furniſhed on each Side.

XXV. In order to prevent all Cauſes of Complaints and Diſputes which may ariſe, on Account of Ships, Merchandizes, and other Effects, which may be taken at Sea, it is reciprocally agreed, That the Ships, Merchandizes, and Effects, which may be taken in the *Chanel* and in the *North Seas* after the Space of Twelve Days, to be computed from the Ratification of the preſent Preliminary Articles, ſhall be reciprocally reſtored on each Side.

That the Term ſhall be Six Weeks for the Prizes taken, from the *Chanel*, the *Britiſh Seas*, and the *North Seas*, as far as the *Canary Iſlands* incluſively, either in the *Ocean*, or in the *Mediterranean.*

Three Months from the ſaid *Canary Iſlands* as far as the *Equinoctial Line*, or *Equator.*

Laſtly, Six Months beyond the ſaid *Equinoctial Line*, or *Equator*, and *in all other Parts of the World*, without any Exception, or other more particular Deſcription of Time and Place.

XXVI. The Ratifications of the preſent Preliminary Articles ſhall be expedited in good and due Form, and exchanged in the Space of One Month, or ſooner, if it can be done, to be computed from the Day of the Signature of the preſent Articles.

In Witneſs whereof, We, the under-written Miniſters Plenipotentiaries of His *Britannic* Majeſty, of His *moſt Chriſtian* Majeſty, and of His *Catholic* Majeſty, in Virtue of our reſpective full Powers, have ſigned the preſent Preliminary Articles; and have cauſed the Seal of our Arms to be put thereto.

Done at *Fontainbleau*, the 3d Day of *November*, 1762.

Bedford, C. P. S. (L. S.) *Choiſeul, Duc de Praſlin.* (L. S.) *El Marq. de Grimaldi.* (L. S.)

Declaration, ſigned at *Fontainbleau*, the 3d of *November*, 1762, by the *French* Plenipotentiary, relating to the XIIIth Article of the Preliminaries.—His *moſt Chriſtian* Majeſty declares, That, in agreeing to the XIIIth Article of the Preliminaries, ſigned this Day, He does not mean to renounce the Right of acquitting his Debts to His Allies; and that the Remittances, which may be made on his Part, in order to acquit the Arrears that may be due on the Subſidies of preceding Years, are not to be conſidered as an Infraction of the ſaid Article.

In Witneſs whereof, I, the under written Miniſter Plenipotentiary of his *moſt Chriſtian* Majeſty, have ſigned the preſent Declaration; and have cauſed the Seal of my Arms to be put thereto.

Done at *Fontainbleau*, the 8th Day of *November*, 1762.

Choiſeul, Duc de Praſlin. (L. S.)

Theſe Articles were ratified the 22d of *November*, 1762.

As the Completion of the *definitive Treaty* between *Great-Britain*, *France*, and *Spain*, may require ſome Time longer; and that, poſſibly, it may differ in ſome Reſpects from the intire Tenor of the ſaid Preliminary Articles, we ſhall cloſe this ſecond Volume of our *Chronological* Work with an Extract from the reſpective humble Addreſſes of Thanks of both Houſes of Parliament to his *Britannic* Majeſty, for his graciouſly communicating to them the ſaid Preliminary Articles, *viz.*

1. The *Houſe of Lords*, in returning his Majeſty their Thanks for the important Communication graciouſly made to them of the ſaid Preliminary Articles, thus expreſs themſelves, on the 10th of *December:* " The great Object of the War ſo fully anſwered.——A vaſt Extent of Empire added to the *Britiſh* Crown——new Sources opened for the Trade and Manufactures of this Nation——and Stability and Duration inſured, under the Bleſſing of Providence, to theſe great and national Advantages," &c.

2. The *Houſe of Commons*, on the 13th of that Month, return his Majeſty their moſt humble and hearty Thanks, for his moſt gracious Condeſcenſion, in ordering the ſaid Preliminary Articles of Peace to be laid before them.—They thus expreſs themſelves, *viz.* " We aſſure your Majeſty, That we have conſidered them with our beſt Attention: And, altho' to make Peace and War be your Majeſty's juſt and undoubted Prerogative; yet, knowing how agreeable it muſt be to your Royal Mind, to be informed of the grateful Senſe your People entertain of the Juſtice and Wiſdom of your Meaſures, and of your unwearied Attention to their Welfare; your faithful Commons are impatient to expreſs their Approbation of the advantageous Terms upon which your Majeſty hath concluded Preliminary Articles of Peace; and to lay before your Majeſty the hearty Applauſe of a faithful, affectionate, and thankful People.——The Succeſſes with which Divine Providence hath bleſſed your Arms,—hath procured ſuch ſolid, and, in all human Probability, ſuch permanent Advantages for this Nation, that we are no leſs ſenſibly affected with that humane Diſpoſition which induced your Majeſty to put an End to a long, bloody, and expenſive, though glorious and ſucceſsful War.——We are convinced, That Poſterity, from their own Experience, will hereafter agree with *us* in eſteeming that Peace to be no leſs honourable than profitable, by which there will be ceded to *Great-Britain* ſuch *an Addition of Territory*, attended with ſo *great an Extenſion of our Commerce.*"

The End of the SECOND VOLUME *of our* Hiſtorical *and* Chronological *Work.*

	—	—— which new Company ſettles at *Madagaſcar*, but is ſoon ruined by the old Company, Vol. ii. p. 60.
	1638	—— the old Company is again licenced to export foreign Gold inſtead of Silver, Vol. ii. p. 64.

Eaſt-

CHRONOLOGICAL INDEX.

A.M.	A.D.	
	1640	*Eaſt India* Company, *Engliſh*, falls into a declining State, Vol. ii. p 69.
	1647	——— is much ſunk and decayed, Vol. ii. p. 80.
	1651	——— it ſettles on the Iſle of *St. Helena*, Vol. ii. p. 87.
	1652	——— its Affairs in a very bad Condition, Vol. ii. p. 89.
	1654	——— its Diſputes with the *Dutch* Company adjuſted; the ſpecific Demands of both Companies being exhibited, with the final Award of the Arbitrators, Vol. ii. p. 92, 3.
	1655	——— it is diſſolved by the Protector *Cromwell* for four Years, and its Trade laid open, Vol. ii. p. 95. 103.
	1657	——— it is again re-eſtabliſhed by *Cromwell*, Vol. ii. p. 103.
	1660	——— its once famous Diſpute with *Skinner*, an Interloper, Vol. ii. p. 113.
	1661	——— its new Charter, Conſtitutions, *&c.* Vol. ii. p. 114.
	——	——— how it obtained Poſſeſſion of *Bombay*, Vol. ii. p. 119.
	——	——— its Joint ſtock was not, as in our Days, transferable; and how its Trade was now managed, *ibid.*
	1664	——— it loſes *Poleroon* Iſle to the *Dutch*, Vol. ii. p. 126.
	——	——— its capital Stock has a Valuation made of it at this Time; and the great Dividends made thereon in only a Year and a quarter, Vol. ii. p. 126, 7.
	1665	——— it loſes *St. Helena* Iſle to the *Dutch*, but is retaken the ſame Year, Vol. ii. p. 127.
	1667	——— *Poleroon* Iſle is now confirmed to the *Dutch* Company, Vol. ii. p. 133.
	1668	——— how it came abſolutely to inherit *Bombay*, *viz.* by a ſecond Charter, Vol. ii. p. 139.
	1670	——— its moſt judicious Vindication by Sir *Joſiah Child*, Vol. ii. p. 143, 4.
	——	——— a remarkable Account of her ſending Weavers, Dyers, *&c.* to *India*, *ibid.*
	1671	——— its prudent Contract with the King of *Golconda*, Vol. ii. p. 149, 50.
	1673	——— is at great Expence in *India* by *England*'s War with *Holland*, yet ſhe now has *St. Helena* Iſland confirmed to her by a royal Charter for ever, Vol. ii. p. 155.
	——	——— much Clamour now and long after raiſed againſt it, on account of *Eaſt-India* Manufactures imported, and of Bullion exported thither, *ibid.*
	1676	——— its fourth Charter of Confirmation; yet ſundry unreaſonable Clamours are raiſed againſt it, Vol. ii. p. 160.
	——	——— its capital Stock is now doubled, *ibid.*
	1677	——— its Vindication from unjuſt Clamours; and the Arguments for a Joint-ſtock, in oppoſition to a regulated Company now by ſome propoſed, Vol. ii. p. 163, 4.
	——	——— it has as yet no Trade to *China*, Prices of its Stocks, *&c.* Vol. ii. p. 165, 6.
	——	——— a Compariſon of it with our regulated Companies, *ibid.*
	——	——— it is more national than regulated Companies are, Vol. ii. p. 166, 7.
	1680	——— a View or State of its Commerce, with the Arguments for and againſt it, and Prices of her and the *Dutch* Company's Stock, Vol. ii. p. 170.
	——	——— its Controverſy with the *London* Silk-weavers, *ibid.*
	——	——— and with the *Turkey* Company; and its juſt Vindication, Vol. ii. p. 171, 2.
	1681	——— the Patience required, and the Difficulty of bringing an *Eaſt-India* Trade to Perfection, Vol. ii. p. 172, 3, 4.
	——	——— it, at this Time, trades both to *China* and *Japan*, Vol. ii. p. 173.
	——	——— it is invaded by ſeparate Traders called *Interlopers*, Vol. ii. p. 174.
	1682	——— it is expelled from *Bantam*; but, in lieu thereof, fortifies at *Bencoolen*, and thereby preſerves her *Pepper* Trade, Vol. ii. p. 176.
	1683	——— its fifth Charter, principally deſigned againſt *Interlopers*, and for ſuppreſſing an Inſurrection at *St. Helena*, Vol. ii. p. 177.
	1683	*Eaſt-India* Company, *Engliſh*, Prices of its *capital Stock* at this Time, Vol. ii. p. 178
	1684	——— in *Sands's* Caſe it is legally made out to be a true *Monopoly*; according (more eſpecially) as, in our Days, it would be ſo deemed, as not being eſtabliſhed by Act of Parliament, Vol. ii. p. 179.
	——	——— the Amount of three of its Sales, and the Price of its capital Stock, *ibid.*
	1685	——— its Reverſe of Fortune, by means of Interlopers, Vol. ii. p. 184.
	1686	——— its ſixth Charter of Privileges, *ibid.*
	1689	——— it ſettles at *Calcutta* in *Bengal*, and that Country deſcribed, Vol. ii. p. 195.
	——	——— its *Herba Stuff* deſcribed, Vol. ii. p. 195.
	——	——— a pompous View of its now Condition, *ibid.*
	1691	——— its Affairs at this Time are in Confuſion, Vol. ii. p. 197.
	1692	——— its Vindication, by way Exculpation, from the Cenſures of a Committee of the Privy-Council, Vol. ii. p. 198.
	1693	——— its firſt Charter granted by K. *William* and Q. *Mary*, Vol. ii. p. 199.
	——	——— its firſt Charter of Regulations, Vol. ii. p. 199, 200.
	1694	——— its ſecond Charter of Regulations, Vol. ii. p. 204.
	1695	——— a *Parliamentary* Enquiry into its Affairs, and into Bribing and Corruption, Vol. ii. p. 205.
	——	——— its Dealers introduce new Terms in Stock-jobbing, *ibid.*
	1697	——— it is inſulted by the *London* Silk-weavers, Vol. ii. p. 220.
	1698	——— it is in great Trouble at this Time, being rivalled by a new Set of Propoſers to Parliament, Vol. ii. p. 221.
	——	——— Arguments in Parliament for and againſt the preſent or old Company, Vol. ii. p. 221, 2.
	——	——— the new Subſcribers prevail, and, upon advancing two Millions to the Public at 8 *per Cent.* obtain an Act of Parliament in their favour; yet the old Company in part out-wits them, Vol. ii. p. 222, 3.
	——	——— with Remarks on the new Charter, Vol. ii. p. 223, 4.
	1699	——— the bad Condition of the Trade, occaſioned by the Rivalſhip between the two Companies, Vol. ii. p. 226.
	1700	——— all its Silk Manufactures, Stuffs, and Calicoes, are now abſolutely prohibited to be worn in *England*, Vol. ii. p. 228.
	1701	——— the Rivalſhip between the two Companies and the ſeparate Traders, occaſions great Diſturbances in the Kingdom, Vol. ii. p. 230, 1.
	1702	——— an Indenture tripartite in ſome Meaſure unites the two Companies, thereby putting a Stop to much Contention, Vol. ii. p. 236, 7, 8.
	1703	——— Bullion exported from *England* to *India*, a Summary of it for ſix Years, Vol. ii. p. 241.
	1707	——— a Statute for ſecuring the Duties on *Eaſt-India* Merchandize, Vol. ii. p. 245.
	1708	——— its yearly Fund at 8 *per Cent.* (on two Millions) is now reduced to 5 *per Cent.* by a Loan of 1,200,000*l.* to the public Exigencies, without any additional Intereſt; for which Conſideration it obtains a Prolongation of its excluſive Privileges, Vol. ii. p. 246.
	——	——— the two Companies are *now* abſolutely conſolidated into one, by the Name of *The United Company trading to Eaſt-India*, *ibid.*
	1712	——— its excluſive Trade legally prolonged, and alſo the Redemption of their Fund, till *Lady-day* 1736, Vol. ii. p. 257, 8.
	——	——— its annual Exportation of Woollen Goods, *&c.* *ibid.*
	1719	——— its annual Exportation of Silver Bullion, Vol. ii. p. 284,
	1722	——— its Half-year's Dividend is reduced from 5 to 4 *per Cent.* Vol. ii. p. 309.
	1726	——— its new Charter, with Power to erect Corporations in *Eaſt-India*; with Remarks, Vol. ii. p. 313.
	——	——— it is now legally made Felony to counterfeit its Bonds, and Indorſements thereon, Vol. ii. p. 314.

A. M.	A. D.	
	1730	*Eaſt-India* Company, *Engliſh*, a new regulated one is now propoſed to Parliament, and the Advantages and Diſadvantages thereof fully ſtated; whereupon the preſent Company's excluſive Privileges were prolonged for thirty-three Years; but her Fund is now reduced, Vol. ii. p. 323, 4, 5, 6.
	——	——— its Trade and Shipping are much increaſed, and alſo its Cuſtoms paid to the Crown, Vol. ii. p. 325—6.
	——	——— the vaſt Importation of only three of their Ships from Coaſt and Bay, and the Cuſtoms thereon, Vol. ii. p. 328.
	1732	——— its General Court's ſingular Humour in relation to a Dividend, though contrary to the Opinion of their Court of Directors, Vol. ii. p. 348.
	1743	——— its excluſive Trade is prolonged to 1783, on lending a Million to the Public, at 3 *per Cent.* Intereſt, Vol. ii. p. 372—3.
	1746	——— it loſes *Fort St. George* to *France*, though it is again reſtored by the Peace of *Aix-la-Chapelle*, Vol. ii. p. 379.
	1747	——— a ſuccinct Survey of all its Forts, Factories, and Settlements in *India*, Vol. ii. p. 380—1.
	1755	——— ſhe reduces her Dividend from 8 to 6 *per Cent. per Annum*, Vol. ii. p. 408.
	1756	——— a brief View of its Circumſtances, Vol. ii. p. 408—9.

	1619	—— her Company of Trade to *Eaſt-India*, Vol. ii. p. 3.
	1624	—— is too much exalted by both *England* and *Holland*, and *Spain* too long depreſſed, Vol. ii. p. 17.
	1625	—— *three* and *one-third* of her then *Crowns* are at this Time equal to *one Pound* Sterling, Vol. ii. p. 20.
		—— ſhe and *England* plant on the very ſame Day on the Iſle of *St. Chriſtophers*; and *France* erects a *Weſt-India Company*, Vol. ii. p. 20.
		—— and ſhe erects a Company for planting the *Weſt-India* Iſles, *ibidem.*
	1626	—— a View of her former Trade with *England*, Vol. ii. p. 25.
		—— ſhe is vaſtly improved in Cardinal *Richlieu*'s Miniſtry, Vol. ii. p. 25.
		—— ſhe makes Repriſals on the *Engliſh* Ships, (being now at War with *England)* Vol. ii. p. 26.
	1627	—— her War with *England*, Vol. ii. p. 27.
	1629	—— on a Peace with *England* ſhe improves her Naval Force and Commerce, Vol. ii. p. 36.
	1631	—— her commercial Treaty with *England*, Vol. ii. p. 42 and 43.
	1632	—— and again this Year, Vol. ii. p. 43.
	1633	—— her firſt Subſidy-Treaty with *Sweden*, Vol. ii. p. 47.
	1634	—— ſhe is at this Time much improved, and the City of *Paris* enlarged, Vol. ii. p. 48.
	1635	—— her fine Manufactures, their State even in *Richlieu*'s Time, Vol. ii. p. 54.
		—— ſhe plants the Iſles of *Guadaloup* and *Martinica*, and at *Cayenne*, in the *Weſt-Indies*, Vol. ii. p. 55.
		—— ſhe ſettles in this ſame Year at *Senegal* River; but loſes to *Spain* the inſignificant Iſles of *St. Marguerite* and *St. Honorate*, on the Coaſt of *Provence*, Vol. ii. p. 56.
	1636	—— her firſt great Effort for Naval Power, Vol. ii. p. 58.
	1637	—— her *firſt Line-of-Battle Squadron* vanquiſhes that of *Spain*; from whom ſhe retakes the above-named Iſles of *St. Marguerite* and *St. Honorate*, Vol. ii. p. 58.
		—— the modeſt Motto or Inſcription on her then largeſt Ship of War, *ibidem.*
	1638	—— ſhe again vanquiſhes *Spain* at Sea, Vol. ii. p. 62.
		—— ſhe much encourages her *Weſt-India* Iſles, Vol. ii. p. 64.
	1639	—— the Occaſion of the Riſe of her modern Commerce and Navy-Royal, Vol. ii. p. 67.
	1640	—— ſhe now more viſibly gains the Aſcendant over *Spain*, Vol. ii. p. 67.
		—— ſhe plants at *Surinam*, in *South-America*; and next the *Engliſh* plant in it, *ibid.* p. 69, 70.
	1641	—— ſhe begins ſucceſsfully to undermine Part of *England*'s Commerce, Vol. ii. p. 71.
	1642	—— her vaſt Benefits from *Richlieu*'s Miniſtry; who died in this Year, Vol. ii. p. 74.
		—— ſhe is however unſucceſsful in her Trade to *Eaſt-India*, Vol. ii. p. 72 and 75.
		—— ſhe again, by Conqueſt, obtains *Rouſſillon* from *Spain*, Vol. ii. p. 74.
	1643	—— ſhe plants the Iſle of *St. Bartholomew*, Vol. ii. p. 76.
	1645	—— her commercial Treaty with *Denmark*, Vol. ii. p. 78.
	1646	—— ſhe commences her fine *Broad Cloth Woollen Manufacture*, Vol. ii. p. 79.
	1647	—— firſt plants the *Weſt-India* Iſle of *Marigalante*, Vol. ii. p. 80.
	1648	*France*'s great Conqueſts on the Side of *Germany* are confirmed to her by the *Weſtphalian* Treaty, Vol. ii. p. 81.
	1650	—— ſhe ſettles on *Madagaſcar* Iſland; but afterwards abandons it, Vol. ii. p. 85.
	1651	—— a View of her Woollen Manufacture, Vol. ii. p. 86.
	1652	—— ſhe plants *Granada*, a *Caribbee* Iſle, Vol. ii. p. 89.
	1654	—— ſhe is too much favoured by *Cromwell* againſt *Spain*, contrary to *England*'s true Intereſts, Vol. ii. p. 94.
	1655	—— her commercial Treaty with *England*, (or *Cromwell)* Vol. ii. p. 97.
		—— her Mercantile as well as political Scale preponderates in *Europe*, and particularly in reſpect of *Spain*, Vol. ii. p. 98.
	1657	—— her ſecret Treaty with *Cromwell*, againſt *Spain*, *Holland*, and *Denmark*, Vol. ii. p. 103.
	1658	—— ſhe perſuades *Cromwell* to join with her in the taking of *Dunkirk* from *Spain*, which Place is taken and delivered up to *England*, *ibidem.*
	1659	—— by her *Pyrenean* Treaty ſhe gets many ſtrong Forts to be yielded to her by *Spain*; whereby her Scale now greatly preponderates, Vol. ii. p. 104-5.
		—— by that Peace ſhe gets Leiſure to improve her *Turkey* Trade, &c. and her *Woollen* Manufactures, *ibid.*
	1660	—— ſhe firſt invades and fortifies in *Newfoundland*, Vol. ii. p. 112. And a Summary of its important Fiſhery, *ibidem.*
	1661	—— ſhe gets *Nova Scotia* ſurrendered to her by *England*, Vol. ii. p. 116.
	1662	—— ſhe erects a Council of Commerce, Vol. ii. p. 121.
	1664	—— under *Colbert*'s Miniſtry ſhe makes vaſt commercial Improvements; and firſt brings her *American* Colonies to be profitable to her; and erects her *Eaſt-India* and *Weſt-India* Companies, Vol. ii. p. 126; and that of *Senegal*, *ib.* p. 127.
	1665	—— ſhe renews her Trade to and with *Turkey*, Vol. ii. p. 129.
	1666	—— her Naval Strength's low Condition till now, *ibidem.*
	1667	—— her Peace with *England* at *Breda*, Vol. ii. p. 133.
		—— ſhe vaſtly improves her Tapeſtry and Woollen, &c. Manufactures: Yet, by Way of Contraſt, ſhe is very ſucceſsfully rivalled by *England* and *Holland* in many of her own till now peculiar and formerly gainful Manufactures, Vol. ii. p. 134.
	1668	—— by the Peace of *Aix la Chapelle* ſhe has much of the *Spaniſh Netherlands* yielded to her, Vol. ii. p. 136.
	1669	—— ſhe ſucceſsfully ſets up a Manufactory of fine Woollen Cloths at *Abbeville*, and ſends the ſame by *Marſeilles* to *Turkey*, much to the Prejudice of *England* and *Holland*, Vol. ii. p. 137.
		—— yet at this ſame Time, when ſhe abounded with many Manufactures, ſhe was in ſo great Want of mercantile Shipping, that her foreign Commerce was very much carried on by *Dutch* Shipping, *ibidem.*
		—— how ſhe made Uſe of *Engliſh Wool* in her own Manufactures, *ibid.* and p. 138.
		—— her *Eaſt-India* Company is unproſperous, Vol. ii. p. 139.
		—— ſhe abandons *Madagaſcar*, and eſtabliſhes *Port l'Orient*, *ibidem.*
	1670	—— ſhe greatly promotes her Commerce, Vol. ii. p. 145, 6.
		—— from *Canada* ſhe began already to interfere with and diſturb *England's Hudſon's-Bay* Trade, Vol. ii. p. 148.
	1672	—— ſhe ſettles on the Iſle of *Maſcareen*, which ſhe names *Bourbon*, beyond *Madagaſcar*, Vol. ii. p. 152.
		—— her farther great Improvements in Commerce, Colonies, and Manufactures, *ibid.*
		—— ſhe over-runs the greateſt Part of the *United Netherlands*, but ſoon loſes all there again, Vol. ii. p. 153, 4.
		—— her inſolent Terms propoſed to the *Dutch* on that memorable Occaſion, *ibid.*

France's

A.M. A.D.

1672 *France*'s Cônqueſt of *Burgundy*, and Part of the *Spaniſh Netherlands*, Vol. ii. p. 154.

1673 ——— her great Increaſe of naval Strength in only three Years Space, and my Lord *Arlington*'s juſt Remarks thereon, Vol. ii. p. 155.

——— ſhe unſucceſsfully attacks the *Dutch* Settlements in *Eaſt-India*, *ibid.*

1674 ——— her *Eaſt-India* Company firſt ſettles at *Pondicherry*, *ibid.*

1675 ——— is an almoſt incredible Gainer in her Trade with *England*, Vol. ii. p. 157.

——— his Penſion for Life from *Louis* XI. of *France* was 50,000 Crowns, *ibid.*
1478 ——— he diſpenſes with the Law, in favour of a private Merchant of *Hull*'s trading to *Iceland*, Vol. i. p. 295.
1480 ——— his new Alliance with the Duke and Dutcheſs of *Burgundy*, Vol. i. p. 296.
1481 ——— he has ſix Ships of War, of *his own*, againſt *Scotland*, *ibid.*
——— he allies with *Bretagne* againſt *France*, *ibid.*
1482 ——— the whole Expence of his Houſhold is but 11,000*l.* Vol. i. p. 297.
——— he is repaid, by the City of *Edinburgh*, the Money he had advanced to King *James* III. of *Scotland*, on a Marriage Contract not performed, *ibid.*
1483 ——— his new Charters to *Colcheſter*, *Windſor* and *Wenlock*, Vol. i. p. 298.
— *Edward* V. licenſes a private Merchant to trade to *Iceland*, Vol. i. p. 299.
— *Richard* III. grants a Commiſſion for Redreſs of Grievances between *England* and *France*, *ibid.*
——— he licenſes the Duke of *Norfolk* to import and diſpoſe of 100 Tons of Wine, *ibid.*
1484 ——— his yearly Penſion to Earl *Douglas*, and he relieves the much-decayed Town of *Hull*, Vol. i. p. 301.
——— makes a commercial Treaty with *Portugal*, *ibid.*
1485 ——— his Bounty to *York* City, now much decayed, and his commercial Truce with *Bretagne*, *ibid.*
——— he confirms the *Italian* Merchants in their Privileges, *ibid.*
— *Henry* VII. inſtitutes the Yeomen of the Guard, Vol. i. p. 302.
1486 ——— his great Jealouſy of Retainers, and of the Givers of Liveries, *ibid.*
1488 ——— he favours the *Italian* Merchants in their Cuſtoms, *&c.* Vol. i. p. 305.
——— makes ſeeming Preparations for ſuccouring *Bretagne*, and, for that End, leagues with the *Netherlands*, *ibid.*
1489 ——— his ineffectual Alliance for the Support of *Bretagne*, Vol. i. p. 306.
——— he ſupports and increaſes the *Engliſh* Woollen Manufacture, *ibid.*
——— he ſeemed to liſten (though too late) to *Bartholomew Columbus*'s Propoſal for Diſcoveries Weſtward, Vol. i. p. 307.
1490 ——— he obtains cautionary Towns of the Dutcheſs of *Bretagne*, for his inſufficient Aid to her, againſt *France*, Vol. i. p. 309.

A.M. A.D.

Kings of England.

1490 — *Henry* VII. in vain allies with the *Netherlands* and *Spain* againſt *France*, for the ſame Purpoſe, *ibid.*

—— he agrees to marry his Son *Arthur* Prince of *Wales*, to *Catherine* of *Spain*, and makes a commercial Treaty with *Spain*, Vol. i. p. 310.

1491 —— his moſt fatal Miſtake in *now* ſuffering *Bretagne* to be united to *France*, *ibid.*

1492 —— for a Sum of Money he makes Peace with *France*, Vol. i. p. 313.

—— he legally regulates Weights and Meaſures, *ibid.*

—— he favours the Alienation of Lands and Baronies, Vol. i. p. 314.

1495 —— the happy Marriage Contract of his eldeſt Daughter, *Margaret*, with King *James* IV. of *Scotland*, Vol. i. p. 318.

1496 —— his Charter to *Cabot*, for making new Diſcoveries Weſtward, Vol. i. p. 320.

1500 —— the Confirmation of the Contract of Marriage between the ſaid *Arthur*, Prince of *Wales*, and the ſaid *Catherine*, Infanta of *Spain*, Vol. i. p. 325.

—— the Portion with his Daughter *Margaret* to *James* IV. of *Scotland*, Vol. i. p. 326.

—— his judicious Reply to an Objection againſt that Match, *ibid.*

1502 —— his general commercial Treaty with the Arch-Duke *Maximilian*, to whom he made a Preſent of 10,000*l.* for Aid againſt the *Turks*, Vol. i. p. 330.

—— his Licence for farther new Diſcoveries by Sea, *ibid.*

—— he builds the magnificent Chapel at *Weſtminſter*, called by his Name at this Day, Vol. i. p. 331.

1504 —— he recoins the clipt Silver Money, Vol. i. p. 332.

1505 —— he was the firſt King of *England*, who coined Shillings, Vol. i. p. 333.

1506 —— his monopolizing Grant for Alum, to an *Italian*, Vol. i. p. 334.

1507 —— his commercial Patent in Behalf of the *Venetians*, *ibid.*

1509 —— his Death, and mixed Character, and the vaſt Treaſure he left at his Deceaſe, Vol. i. p. 337.

—— his Laws for humbling of the Nobility, by permitting the Sale of their Lands; his ſuppreſſing of Retainers, and his general promoting of Commerce, are thought to have made gradually a great Alteration, in the Balance of Power in *England*, between the Nobility and the Commons, *ibid.*

—— until his Reign, there were but few Brick or Stone Edifices in *England*: And of what Materials the Buildings of thoſe Times generally conſiſted, *ibid.*

poſt 1509 to 1511 — *Henry* VIII. the ſolid Arguments of ſome of his Miniſters againſt all Attempts for the Conqueſt of *France* or any other Part of the Continent, Vol. i. p. 339, 340.

—— the Tonnage, Pay, Expence, Number of Sailors, &c. of his Navy deſigned againſt *France*, Vol. i. p. 340.

1512 —— he was properly the firſt *Engliſh* Monarch who eſtabliſhed (in this and ſucceeding Years) a permanent Navy-Royal, with Commiſſioners thereof; with Docks alſo, and Wharfs, Yards, Storehouſes, &c. for his ſaid Navy, Vol. i. p. 342.

—— he alſo inſtitutes a moſt uſeful Corporation, named of *Trinity-Houſe of Deptford Strond*, for piloting of Shipping, clearing of Havens and Rivers, and for ſupplying of Light-houſes, Beacons, &c. *ibid.*

—— he alſo afterward erected two more ſuch Corporations, *viz.* at *Hull* and *Newcaſtle*, *ibid.*

1513 —— his Subſidies to the Emperor, *Spain* and the Pope, againſt *France*, Vol. i. p. 343.

—— he fortifies *Graveſend* and *Tilbury*, and builds his great Ship the *Henry Grace Dieu*, *ibid.*

1518 —— he was the firſt *Engliſh* King who correſponded with the *Switz* Cantons, Vol. i. p. 349.

A.M. A.D.

Kings of England.

1521 — *Henry* VIII. mediates in a Treaty of Neutrality for the Fiſhery, between *France* and the *Netherlands*, Vol. i. p. 351.

1523 —— his arbitrary Manner of raiſing pretended voluntary Loans, Vol. i. p. 353.

1525 —— he treats with the Queen Regent of *France*, concerning the Redemption of King *Francis* I. a Priſoner in *Spain*, Vol. i. p. 355.

—— he ſends out two Ships Weſtward for new Diſcoveries, Vol. i. p. 356.

1526 —— prudently raiſes the Prices of Gold and Silver *per* Ounce, *ibid.*

1527 —— he has a Penſion from *France*; and, on the other Hand, the Emperor *Charles* V. offers to ſell to him his Title or Right to the *Molucca* or Spice Iſlands, Vol. i. p. 357, 358.

1531 —— his ill-judged Proclamation for compelling Foreigners to lay out the Money they receive in *England* for their Merchandize, on *Engliſh* Wares, Vol. i. p. 361.

1532 —— he repairs and deepens the Harbours of *Plymouth*, *Dartmouth*, *Teignmouth*, *Falmouth*, &c. Vol. i. p. 362.

1534 —— he unſucceſsfully treats with *Lubec* and *Hamburgh*, for the Election of a King of *Denmark* to be at his Devotion, Vol. i. p. 364.

1541 —— he quite diſregards *America*, and meddles too much with the Quarrels on the Continent of *Europe*, affecting much Pomp and Pageantry, Vol. i. p. 369.

—— his diſpenſing Power in relation to Aliens Duties, is now confirmed by an abject Parliament, Vol. i. p. 370.

1544 —— he farther fortifies his Sea-ports, Vol. i. p. 372.

—— he farther raiſes the Rates of Gold and Silver *per Ounce*, to be on an Equality with other Nations, Vol. i. p. 373.

1546 —— his Portions by Will bequeathed to his two Daughters, Vol. i. p. 376.

1547 — *Edward* VIth's good Laws for applying the Revenues of Chantries, &c. toward the Improvement of his Kingdom, Vol. i. p. 378.

1548 —— alſo for Prevention of the foreſtalling of Proviſions, and the Combinations of Workmen, *ibid.*

—— alſo a Law for permitting Workmen, not Freemen, to be employed in Corporations, which Law however was repealed in the following Year, *ibid.*

1549 —— his Protection and Penſions to foreign Proteſtants, whereby many Thouſands of People came to ſettle in *England*, to the great Benefit of her Infant Commerce, Vol. i. p. 380.

1552 —— he revokes or ſuſpends the peculiar Privileges of the *Steelyard German* Merchants, Vol. i. p. 385.

1553 —— his Houſhold's annual Expence, *ibid.*

1554 — Queen *Mary* I. at firſt ratifies King *Edward* VIth's Abrogation of the *Steelyard* Merchants Privileges; but ſoon after ſuſpends that Abrogation, Vol. i. p. 385——88.

1558 —— ſhe borrows 20,000*l.* of the *Londoners*, at 12 *per Cent.* Intereſt, Vol. i. p. 393.

— Queen *Elizabeth's* moſt juſt Eulogium, *ibid.*

1560 —— ſhe makes great Preparations for War, and mightily improves her Navy, Vol. i. p. 394.

—— ſhe wiſely reforms her Silver Coins, *ibid.*

1561 —— ſhe wears the firſt Pair of Knit Silk Stockings ever ſeen in *England*, Vol. i. p. 400.

—— ſhe farther improves her Navy, and encourages Tillage of Lands, *ibid.*

1569 —— her Treaty with the Czar, in Behalf of her *Ruſſia* Company, Vol. i. p. 409.

—— her main Inducement for encouraging of Companies of Merchants, Vol. i. p. 409, 410.

A.M. A.D.

Kings of England.

1570 — Queen *Elizabeth*'s Receipts and Diſburſements for one Year, called the Revenue of *England*, Vol. i. p. 410.

1571 ——— ſhe makes a *Villain* free in one of her Manors, Vol. i. p. 413.

1573 ——— ſhe had but thirteen Ships of War, properly her own, the reſt being hired of Merchants, Vol. i. p. 414.

——— ſhe diſperſes the piratical Fleet of the *French* Proteſtants, Vol. i. p. 415.

——— her Commiſſion for making Freemen in her Manors, *ibid.*

1574 ——— ſhe raiſes Money by ſetting free the Bondmen of her own Manors, *ibid.*

1578 ——— her firſt offenſive and defenſive League with the united *Netherlands*, as a ſeparate State, Vol. i. p. 417.

——— ſhe abſolutely abrogates the peculiar Immunities of the *Hanſe* or *Steelyard* Society, Vol. i. p. 418.

1580 ——— ſhe prohibits new Foundations in *London*, Vol. i. p. 421.

1584 ——— ſhe encourages *Raleigh*'s Deſign of colonizing on the Continent of *North-America*, Vol. i. p. 426.

1585 ——— ſhe gives farther Aid to the united *Netherlands*, but refuſes the Sovereignty thereof: Yet ſhe wiſely takes Poſſeſſion of three cautionary Towns, for Security of Money lent them by her, Vol. i. p. 428.

——— her excluſive Grant of a Trade to *Morocco* for 12 Years: And again refuſes the offered Sovereignty of the united *Netherlands*, with her Reaſons for that Refuſal, Vol. i. p. 428, 429.

1587 ——— ſhe reduces the *Hanſe* or *Steelyard* Merchants Privileges to an Equality with her own Subjects, Vol. i. p. 431.

——— ſends out *Drake* to the *Spaniſh* Coaſt, where he deſtroys much Shipping, *ibid.*

——— her fine mercantile Stratagem, whereby King *Philip* II. of *Spain* was conſtrained to defer his intended Invaſion of *England* till next Year, *ibid.*

1588 ——— *Spain*'s famous unfortunate Expedition againſt *England*, in their ſo-named Invincible Armada, with *Grotius*'s Encomium on the Bravery of the *Engliſh* on that moſt memorable Occaſion, Vol. i. p. 432.

——— her whole naval Force, and the whole Number of her Merchant-ſhips and Seamen, Vol. i. p. 433.

——— ſhe diſclaims any excluſive Dominion on the Seas, though claimed by ſome of her Succeſſors, Vol. i. p. 434.

——— ſhe eſtabliſhes *Chatham* Cheſt for the Benefit of *Engliſh* Mariners, *ibid.*

1589 ——— her frugal Method of diſtreſſing *Spain*, by encouraging private Adventurers, *ibid.*

1590 ——— ſhe makes good Regulations in her Navy, Vol. i. p. 437.

1591 ——— ſhe contemns the Menaces of the *Hanſe-Towns*, Vol. i. p. 439.

1593 ——— her Commiſſions to *Raleigh* and to the Earl of *Cumberland*, for annoying of *Spain*, Vol. i. p. 440, 441.

1594 ——— her juſt Vindication to the Emperor, of her Conduct toward the *Hanſeatics*, Vol. i. p. 442.

1595 ——— her Requeſt for Leave, of *Denmark*, to fiſh at *Weſtmony* Iſle is denied to her, Vol. i. p. 444.

1601 ——— ſhe coins baſer Silver Money for *Ireland*, and ſuppreſſes Monopolies, Vol. i. p. 455.

1602 ——— her excellent Inſtructions to her Ambaſſadors going to treat of Commerce with *Denmark*, Vol. i. p. 456, 457.

——— her Complaint of her People's having extravagant *Tolls* impoſed on them by *Denmark*, at paſſing the *Sound*, Vol. i. p. 457.

——— her Proclamation for preventing her Subjects from pirating on other Nations in Amity with her, under falſe Colours, *ibid.*

——— and her Declaration, that fiſhing in the Sea ought to be free to all Nations alike, *ibid.*

A.M. A.D.

Kings of England.

1602 — Queen *Elizabeth*'s Proclamation againſt building of Houſes in *London*, on new Foundations, Vol. i. p. 458.

——— both her commercial Treaties at *Bremen* miſcarry, *viz.* that with *Denmark*, and that with the *Hanſe* Confederacy, Vol. i. p. 459.

——— her laſt naval Expedition againſt *Spain* proved, in Part, ſucceſsful, *ibid.*

1603 ——— *Ireland* is quite ſubdued: And her Death and compendious Character, *ibid.*

— *James* Iſt's pacific Diſpoſition has bad Conſequences in reſpect to Commerce and Plantations, Vol. i. p. 460.

——— he declares againſt Monopolies, though he afterward favoured them, *ibid.*

1604 ——— he prohibits the Exportation of Wool, Vol. i. p. 461.

——— his commercial Treaty with *Spain*, Vol. i. p. 466.

——— he grants an excluſive Trade to *Spain*, which he was obliged to aboliſh in the following Year, Vol. i. p. 467.

——— he licenſes a ſeparate Trade to *Eaſt-India*, contrary to the *Engliſh* Company's Charter, *ibid.*

——— his very extraordinary Proclamation concerning Tobacco, *ibid.*

——— he coins new Silver Money, (ſome of which were too minute) Vol. i. p. 467, 468.

1639 ——— being in Diſtreſs, he revokes many (but not all) of his illegal Monopolies, Vol. ii. p. 65, 66.

——— he confirms the Privileges of the Merchant-Adventurers Company, and revokes more Monopolies, Vol. ii. p. 66.

——— his Commiſſion of Inquiry into the Miſconduct of the Royal Fiſhery Company, *ibid.*

1640 ——— he buys, on Truſt, all the *Eaſt-India* Company's Pepper, and ſells it again for ready Money, Vol. ii. p. 67.

1640 ——— is neceſſitated to call a Parliament for Supplies, yet haſtily diſſolves it, Vol. ii. p. 68.

——— whereupon he takes ſtrange Methods for raiſing of Money to pay his own and the *Scotiſh* Army, *ibidem.*

——— his compulſory *Loan* from the Merchants who had lodged their Caſh in his *Mint*, by way of a *Bank*, utterly deſtroys the future Credit of the *Mint*, *ibidem.*

CHRONOLOGICAL INDEX.

A.M. A.D. *Kings* of *England.*

1640 — *Charles* I. is neceſſiated to call another Parliament in the ſame Year, wherein all Grievances are redreſſed, Vol. ii. p. 68.

——— he is conſtrained to give his Aſſent to ſundry reſtrictive Laws, though hard for him to digeſt, Vol. ii. p. 69.

——— he marries his Daughter Lady *Mary* to the *Prince of Orange*, *ibidem.*

N. B. the reſt of this unhappy Reign will be found under the reſpective Heads they belong to.

1660 — *Charles* II. has ſundry beneficial Laws made, upon his Reſtoration, Vol. ii. p. 106, *et ſeq.*

1661 ——— his ſupplemental Charter to the *Turkey* or *Levant* Company, and yields *Nova Scotia* to *France*, Vol. ii. p. 113 and 116.

——— his new Charter to the *Eaſt-India* Company, Vol. ii. p. 114.

——— he grants a Commiſſion, and great Encouragement for a new Royal Fiſhery Company, which however did not ſucceed, Vol. ii. p. 119.

1662 ——— his infinitely pernicious and diſgraceful *Sale of Dunkirk* to *France*, Vol. ii. p. 120.

——— he makes Peace with the *Barbary* Pirates, Vol. ii. p. 121.

1664 ——— his Treaty with the Duke of *Courland*, concerning *Guinea* and the Iſle of *Tabago*, Vol. ii. p. 124.

1665 ——— he erects a *Canary* Company, which he aboliſhes two Years after, Vol. ii. p. 128-29.

1667 ——— his Declaration in behalf of the *London Bankers*, Vol. ii. p. 133.

1668 ——— he inſtitutes a laudable and regular *Council of Trade*; but lays it down a few Years after, Vol. ii. p. 136.

——— his ſecond *Charter* to the *Eaſt-India* Company for *Bombay*, Vol. ii. p. 119.

——— he ſhamefully ſuffers *Spain* to be depreſſed, and the *Equilibrium* of Power between her and *France* to be broken, Vol. ii. p. 136.

1669 ——— he ſends Sir *John Narborough* unſucceſsfully to attempt a Settlement in *Chili*, Vol. ii. p. 138.

1670 ——— he alienates from the Crown the *Fee-farm Rents*, Vol. ii. p. 139.—and coins new *Money*, p. 147.

1672 ——— he ſhuts up the *Exchequer*, and ſeizes on the *Bankers Money* there; with its bad Conſequences, Vol. ii. p. 150.

——— and he ſquanders away vaſt Sums of Money; with the Hiſtory of his Dealings with the *Bankers*, Vol. ii. p. 150-51.

——— his ſhamefully joining with *France* to attack and overwhelm the *Dutch*, Vol. ii. p. 150, 152.

——— his Preamble to a ſecond new *Council of Trade* and *Plantations*; which he likewiſe lays aſide ſome Years after, Vol. ii. p. 152.

1675 ——— he ſuppreſſes all *Coffee-houſes*, and reſtores them a few Days after, Vol. ii. p. 157.

1678 ——— is a conſtant Penſioner to *France*, and a determined Foe to the Liberty and Religion of his own Kingdoms, Vol. ii. p. 167.

——— he is conſtrained by the Cries of his People, ſeemingly to treat with the *Dutch*, for obliging *France* to grant reaſonable Terms to *Spain* and the *Empire*, at *Nimeguen*; though he ſtill favoured *France*, which by that Treaty deſtroyed the *Equilibrium* of *Europe*, *ibid.* p. 169 and 170.

1680 ——— he is refuſed by his Parliament any Supply for ſupporting of *Tangier*, Vol. ii. p. 171.

1683 1684 ——— why he abandoned *Tangier*, after ſo great an Expence in fortifying it, Vol. ii. p. 178.

1685 — *James* II. has a Duty on Tobacco and Sugar ſettled on him by Parliament, Vol. ii. p. 182.

——— his ſervile Parliament's pernicious Repeal of the Prohibition of all *French* Commodities, for his Attachment to *Louis* XIV. and his Deſigns againſt the Religion and Liberties of his own Kingdoms, Vol. ii. p. 182.

——— he gets the *Poſt-Office* Revenue ſettled on him and his Succeſſors, *ibidem.*

——— his Coinage, Vol. ii. p. 183.

1686 ——— he encourages the *Algerines* to war againſt *Holland*, Vol. ii. p. 186.

1689 ——— ☞ Declaration of Rights, by an *Engliſh* Convention of the Eſtates in Parliament againſt him, Vol. ii. p. 192-93-94.

——— it is *England*'s new *Magna Charta*, *ibidem.*

A.M. A.D. *Kings* of *England.*

1701 ——— he dies; and *France* proclaims his pretended Son, as King of *Great Britain*, Vol. ii. p. 235.

1688 — *William* III. rejects the Propoſal of the *Buccaneers* of *America*, of putting themſelves and their Settlement on *Hiſpaniola* under his Protection, Vol. ii. p. 188.

1702 ——— his Death, and his Miniſters fatal Miſtake in ſuffering a large Arrear to grow up into a National Debt at his Death, Vol. ii. p. 235-36.

1702 — Queen *Anne*'s Declaration of War againſt *France*, Vol. ii. p. 236.

1713 ——— her new Miniſtry breaks up the noble Grand Alliance againſt the exorbitant Power of *France*, deſerts the *Empire* and the *Dutch*, and concludes a ſeparate Peace with *France*, Vol. ii. p. 259, 260-1-2.

1714 ——— her Indiſpoſition and Death, affects, for a ſhort Time, the National Funds, *ibid.* p. 264.

——— but all is ſet right again, and advances more than before, by the Acceſſion of

1714 King *George* Iſt, and the after more happy and firm Eſtabliſhment of the illuſtrious Houſe of *Hanover* on the Imperial Throne of the *Britiſh* Empire, Vol. ii. p. 267.

924 *Kingſton upon Thames* its Riſe, &c. Vol. i. p. 48.

1263 *Kirkwall*, the capital Town of the *Orkney* Iſles, its preſent Cathedral Church ſaid to be built by *St. Magnus*, King of *Norway*, Vol. i. p. 122.

Knights of the Croſs, *German* or *Teutonic*, their Order in *Pruſſia*,

1199 ——— the *Hanſe League*'s Grounds for chuſing the *Great-Maſter* to be their perpetual Protector, Vol. i. p. 87.

1215 ——— they, about this Time, commence their Conqueſts in *Pruſſia*, and greatly civilize *Pruſſia*, *Livonia*, &c. Vol. i. p. 106-7.

1286 ——— they purchaſe a Part of *Pruſſia* of the Marquis of *Brandenburgh*, Vol. i. p. 132.

1291 ——— how they were diſpoſed of, after the Loſs of the *Holy Land*, Vol. i. p. 135.

1346 ——— they purchaſe *Eſthonia* of *Denmark*, Vol. i. p. 176.

1391 ——— they are treated with by King *Richard* II. of *England*, Vol. i. p. 217-18.

1429 ——— *of the Golden Fleece*, inſtituted in the *Netherlands*, Vol. i. p. 258.

1099 and 1104 ——— *Hoſpitalers of St. John of Jeruſalem* [ſince of *Rhodes*, and laſt of *Malta*] their Origin, &c. Vol. i. p. 73, 75, 129, 134, and 135.

1442 ——— they accuſe the *Genoeſe* of having favoured the *Turks*, and of diſtreſſing them at *Rhodes*, Vol. i. p. 267.

1521 ——— they are expelled *Rhodes* by the *Turks*, and the Sequel of their Hiſtory to their final Settlement at *Malta*, Vol. i. p. 350-51.

1213 ——— *Port-Glaives*, a new Religious Military Order in *Livonia*, Vol. i. p. 105.

1291 *Knight-hood*, the three Religious Orders of, how diſpoſed of, on the Loſs of the *Holy-Land*, Vol. i. p. 134.

1366 ——— *Military* or *Temporal Knights*, Money raiſed by former *Engliſh* Kings by creating ſuch, Vol. i. p. 195.

1429 ——— *of the Golden-Fleece* now firſt inſtituted, Vol. i. p. 258.

1291 ——— *Templars*, how diſpoſed of after the Loſs of *Palaſtine*, Vol. i. p. 135.

1310 ——— they were at once ſuppreſſed all over *Europe*, Vol. i. p. 150.

	1466	—— her Alliance with *England*, (with Remarks) Vol. i. p. 282.
	1470	—— her Shipping, their Value *per* Ton, Vol. i. p. 287.
	1474	—— her Province of *Guipuſcoa* has ſome conſiderable Commerce with *England*, Vol. i. p. 292.

CHRONOLOGICAL INDEX.

A.M. A.D.

Spain.

1482 —— and again, at this Time, Vol. i. p. 298.

1483 —— ſhe intirely poſſeſſes all the *Canary* Iſles, and renews her commercial Intercourſe with *England*, Vol. i. p. 298, 9.

1490 —— ſhe agrees to give 200,000 Crowns with Princeſs *Catharine*, eſpouſed to *Arthur* Prince of *Wales*, Vol. i. p. 310.

—— her commercial Treaty with *England*, *ibid.*

1492 —— her Conqueſt of the only remaining *Mooriſh* Kingdom in *Spain*, *viz.* that of *Granada*; with ſome of its bad Conſequences to the Commerce in the *Mediterranean*, by giving Riſe to the Piratical Practices of the baniſhed *Moors* ſettled in *Barbary*, Vol. i. p. 311.

—— ſhe, in this ſame Year, expels her *Jews*, and thereby farther depopulates her Country. With Remarks on the Wealth and Numbers of them ſo expelled, and into what Countries they retired, Vol. i. p. 312.

—— her ſending out *Columbus*, who diſcovers *America*, Vol. i. p. 315. (Vide *America.*)

—— an Enquiry, why her Conqueſts on the *Barbary* Shores are, and probably ever will be, of ſmall Benefit to her, *ibid.*

—— the Pope's romantic Line of Partition, of *all* new Diſcoveries, to be divided between *Spain* and *Portugal*, Vol. i. p. 316.

1493 —— her Neglect of *home Manufactures* proves the Cauſe of her parting with all her *American* Treaſure as faſt as it comes in, Vol. i. p. 317.

1495 —— this Year was the laſt of her uſing *White* for *Mourning*, Vol. i. p. 318.

1497 —— ſhe conquers *Melilla* on the *Barbary* Coaſt, yet none of thoſe Conqueſts have been of ſolid Benefit to her, Vol i. p. 323.

1500 —— the above-named Marriage-contract of the Infanta of *Spain* with *Arthur* Prince of *Wales* is now confirmed, and a new commercial Treaty with *England*, Vol. i. p. 325.

1503 —— her Conjunction with the Houſe of *Auſtria* has produced great and intereſting Alterations in *Europe*, Vol. i. p. 331.

1506 —— her *Weſt-India* Houſe at *Sevil* is now erected, Vol. i. p. 334.

—— her Improvements in *Hiſpaniola*, where Sugar is firſt planted from *Braſil*; and her Pearl Fiſhery. *ibid.*

1507 —— ſhe takes *Oran* on the *Barbary* Shore, Vol. i. p. 335.

1508 —— the Quantity of Gold ſhe gets in one Year from *Hiſpaniola*, where ſhe firſt introduces the Negro Slave-Trade, Vol. i. p. 336.

1509 —— ſhe firſt plants on *Jamaica*, Vol. i. p. 338.

—— yet all her *American* Diſcoveries before the Year 1519 were at beſt but honourable, and promiſing, rather than immediately profitable. *ibid.*

1511 —— ſhe plants on the Iſle of *Cuba*, and an Account of it and its famous Port of the *Havanna*, Vol. i. p. 340.

—— her naval Force, *&c.* when combined with *England* againſt *France*, *ibid.*

1512 —— ſhe diſcovers the great River *De la Plata* in *Paraguay*, Vol. i. p. 343.

1515 —— her commercial Treaty with *England*, Vol. i. p. 345.

1517 —— her firſt unſucceſsful Attempt on *Algiers*, Vol. i. p. 347.

1519 —— her happy Diſcovery of the vaſt Riches of *Mexico*, and afterward of *Peru* and *Chili*, Vol. i. p. 349, 354.

—— ſhe ſends *Magellan* quite round the terraqueous Globe, doubtleſs the firſt who performed it of any Mortal, Vol. i. p. 349.

—— ſhe had at this Time a conſiderable Woollen Manufacture, and an Enquiry how ſhe came to loſe it, *ibid.*

—— ſhe makes a ſecond unſucceſsful Attempt on *Algiers*, Vol. i. p. 350.

1524 —— her Fleet is vanquiſhed by that of *France*, Vol. i. p. 353.

1525 —— ſhe diſcovers, and ſoon after plants *Paraguay*, Vol. i. p. 355.

1626 —— the commercial Part of her Treaty with *France* at *Madrid*, treating of her former Woollen Manufacture, Vol. i. p. 357.

1526 —— Remarks on her ancient Woollen Manufacture, *ibid.*

1527 —— her firſt unſucceſsful Attempt to plant in *Florida*, Vol. i. p. 358.

1529 —— her firſt Voyage from the South Shore of *New Spain* to the *Moluccos* or *Spice-Iſles*, and her Return back by the ſame Rout to *New-Spain*; which Voyage paved the Way for her maſtering the *Philippine* Iſles, which ſhe has held to this Time, Vol. i. p. 358.

1532 —— her Emperor *Charles* Vth's Fleet is ſuperior to that of the *Turks*, Vol. i. p. 362.

1535 —— takes *Tunis* in *Barbary*, Vol. i. p. 364.

—— founds *Buenos Ayres* in *Paraguay*, Vol. i. p. 365.

1540 —— ſhe invades *Chili*, Vol. i. p. 366.

1541 —— her unfortunate Expedition againſt *Algiers*, *ibid.*

1543 —— ſhe diſcovers *California*, Vol. i. p. 372.

1545 —— ſhe firſt accidentally diſcovers the immenſely rich Silver Mines of *Potoſi* in *Peru*, (and the brief Hiſtory of them) Vol. i. p. 374, 5.

1548 —— her political Views in being always greatly indebted to *Genoa*, with an intereſting Remark, Vol i. p. 379.

1550 —— Emperor *Charles* Vth's Edict againſt the *Netherland* Proteſtants produces bad Conſequences, Vol. i. p. 381.

1551 —— ſhe loſes *Tripoli* in *Barbary*, Vol. i. p. 382.

1553 —— ſhe pays 1000 *l.* yearly to *England* for Leave to fiſh on the *Iriſh* Coaſts, Vol. i. p. 385.

1555 —— her cruel and impolitic Butchery of ſo many Millions of *American Indians*, Vol. i. p. 391.

1560 —— her Commerce with *Antwerp*, Vol. i. p. 397.

1561 —— ſhe was probably the original Inventor of *Knit-Stockings*, Vol. i. p. 400.

1568 —— ſhe takes the Pretext, from *Genoa*'s Money ſeized on by Queen *Elizabeth* at *Plymouth*, to expel the *Engliſh* Society of *Merchant-Adventurers* from their Reſidence or Staple at *Antwerp*, Vol. i. p. 407.

—— the *Moors* ſtill remaining in the Kingdom of *Granada* make an Inſurrection, which laſts two Years; with its Conſequences, and Reflections thereon, Vol. i. p. 408.

1570 —— the *Hollanders* firſt Revolt, by their ſeizing on the *Briell*, *&c.* Vol. i. p. 410.

1572 —— *New Spain*, an *Engliſhman*'s Account of it, Vol. i. p. 414.

1573 —— ſhe conquers *Tunis*, but loſes it again, *ibid.*

1575 —— her great Dealings with *Genoa* for Loans of Money, and the Intereſt thereon, Vol. i. p. 415.

1580 —— a Remark on the elder Depredations of other *European* Nations on her *American* Territories, Vol. i. p. 421.

—— ſhe unites *Portugal* to her for 60 Years to come, *ibidem.*

1583 —— her Fleet at the *Azores* defeats that of *France*, Vol. i. p. 426.

—— ſhe was the firſt who ventured to ſend *Mediterranean* Gallies forth into the *Atlantic* Ocean, *ibid.*

1585 —— the *Spaniſh Netherlands* are not ſo well ſituated for the Fiſhery as *Holland* is, Vol. i. p. 428.

1587 —— her Coaſts are haraſſed, and much of her Shipping taken and deſtroyed, by Sir *Francis Drake*; and ſhe is obliged to defer her Invaſion of *England* to next Year, by a great mercantile Stratagem of *Walſingham*'s, Vol. i. p. 431, 2.

1588 —— her ſo called *invincible Armada*'s Defeat and Retreat; with *Grotius*'s Encomium on *Engliſh* Bravery, Vol. i. p. 432, 3.

—— that Armada's Sufferings in its Retreat, and King *Philip* II.'s magnanimous Remark thereupon, Vol. i. p. 433.

—— its Deſtruction proves a great Deliverance to the moſt Part of *Europe*, *ibidem.*

—— her general Loſs by this Diſaſter, *ibidem.*

—— her Thinneſs of People eaſily accounted for, Vol. i. p. 433.

1589 —— an abortive Attempt from *Plymouth* for privateering in the South Seas of *America*, Vol. i. p. 435.

A.M. A.D.

Spain.

1590 —— *Botero's* judicious Account of her great Cities at this Time, Vol. i. p. 438.

1598 —— at *Vervins*, Peace with her proved advantageous to *France*, Vol. i. p. 448.

—— her *Aſcendant* in *Europe*, how long its Duration held, *ibid.*

1602 —— *England*'s laſt naval Expedition againſt her, during Queen *Elizabeth*'s Reign, Vol. i. p. 459.

1604 —— *England*'s Treaty of Peace and Commerce with her, Vol. i. p. 466.

—— an *Engliſh* monopolizing Company is erected to trade to *Spain*, but is aboliſhed the Year following, Vol. i. p. 467.

—— her Cruelty to the People of *Chili* obſtructs her from intirely planting of that Country, Vol. i. p. 468.

1605 —— her ſtrict Prohibition of *Holland*'s trading to *Eaſt-India*, excites the latter to great Conqueſts there, Vol. i. p. 469.

1609 —— her very neceſſary Truce with the *Hollanders*, for twelve Years to come, Vol. i. p. 475.

—— her Declenſion, and *France*'s Superiority, begin already to be viſible, *ibid.*

—— her cogent Inducements in favour of her Truce with *Holland*, *ibid.*

1610 —— her laſt Struggle with *Holland* for recovering the *Spice-Iſlands*, Vol. i. p. 480.

1611 —— ſhe obtains *Larache* in *Morocco*, by aſſiſting the King of *Fez* to conquer *Morocco*, Vol. i. p. 481.

—— farther Remarks on her moſt impolitic Expulſion of the *Moors* and *Jews*, Vol. i. p. 481, 2.

1618 —— her whole Fleet of *Galeons* is taken by the *Hollanders*, Vol. i. p. 500.

1624 —— Reflections on both *England*'s and *Holland*'s too far depreſſing of *Spain*, and exalting the Power of *France*, Vol. ii. p. 17.

—— *England*'s Letters of Repriſals againſt her, Vol. ii. p. 19, 27.

1628 —— ſhe receives great Damage from the *Dutch* in her *Weſt-Indies*, Vol. ii. p. 32.

1629 —— ſhe diſturbs the *Engliſh* and *French* at *St. Chriſtophers* Iſland in the *Weſt-Indies*, Vol. ii. p. 37.

1630 —— her commercial Treaty with *England*, Vol. ii. p. 40.

1631 —— her Fleet is vanquiſhed by that of *Holland*, Vol. ii. p. 42.

1635 —— ſhe takes the ſmall Iſles of *St. Margaret* and *St. Honorat* from *France*, Vol. ii. p. 56.

1637 —— but ſhe now loſes thoſe two Iſles, and is vanquiſhed at Sea by *France*, Vol. ii. p. 62.

1638 —— ſhe is again beaten at Sea by *France*, *ibid.*

1639 —— her large Armada is totally vanquiſhed by *Van Trompe*, the *Dutch* Admiral, in the *Downs*, Vol. ii. p. 64, 5.

1640 —— ſhe loſes *Portugal* to the Duke of *Braganza*, by the Title of King *John* IV. Yet *Spain* ſtill retained *Ceuta*, Vol. ii. p. 67.

—— *France* already has gained too much the Aſcendent over her, *ibid.*

—— *England* has her firſt Conſul this Year at *Alicant*, Vol. ii. p. 68.

1641 —— ſhe expels the *Engliſh* from *Providence*, chief of the *Bahama* Iſles, Vol. ii. p. 71.

1642 —— ſhe loſes to *France* the Province of *Rouſſillon*, next to *Catalonia*, Vol. ii. p. 74.

1647 —— her feeble Condition at this Time, Vol. ii. p. 80.

1648 —— by the *Weſtphalian* Treaty ſhe recognizes the Seven United Provinces of the *Netherlands* to be an independent State, and yields to them other commercial Advantages, Vol. ii. p. 81.

—— ſhe agrees to the *Uti poſſidetis*, i. e. each Potentate to keep what they are now poſſeſſed of; but neither Party to reſort to the other Party's Ports in *America*, *ibid.*

—— yet ſhe is neceſſitated to employ the Ships of *Holland* for carrying on her *Weſt-Indian* Commerce, *ibid.*

1655 —— ſhe offers to *Cromwell*, the *Engliſh* Protector, to aſſiſt him in regaining of *Calais*, provided he will renounce his Connections with *France*; which he rejects for the Sake of his perſonal Intereſts, Vol. ii. p. 98.

1656 —— an authentic View of her preſent naval Strength, Vol. ii. p. 99.

A.M. A.D.

Spain.

1656 —— her Loſs of *Jamaica* obliges her to declare War againſt *England*, Vol. ii. p. 99.

—— whereupon her Plate-Fleet is deſtroyed by Admiral *Blake*, *ibid.*

1657 —— who next Year deſtroys another richer Plate-Fleet, Vol. ii. p. 101.

1659 —— her *Pyrenean* Treaty of Peace with *France* throws much more Weight into the Scale of the latter, and farther enfeebles *Spain*, Vol. ii. p. 104, 5.

1667 —— her firſt Treaty with *England* for a general Pacification in *America*, Vol. ii. p. 134.

1668 —— Money no where ſo ſcarce as in *Spain*, becauſe of her high Intereſt thereon, Vol. ii. p. 108.

—— by her Peace now with *France* at *Aix-la-Chapelle*, ſhe gives up to her a great Part of the *Netherlands*, Vol. ii. p. 136.

1669 —— ſhe is ſo feeble, as ſtill to be forced to employ *Dutch* Ships in her *American* Commerce, though ſo contrary to her ancient Maxims in that Trade, Vol. ii. p. 138.

1670 —— her memorable Treaty with *England*, uſually ſtiled the *American Treaty*, Vol. ii. p. 139, 40.

—— ſhe never can equal *England* in the Improvement of her Colonies, without changing her Conduct, Vol. ii. p. 146.

1672 —— ſhe loſes to *France* the County of *Burgundy*, and ſome more *Netherland* Towns, Vol. ii. p. 154.

1678 —— her Peace with *France* at *Nimeguen* proves a very bad one for her, Vol. ii. p. 168, 9.

1688 —— ſhe ſuffers *France* to ſettle on the Weſt End of the Iſland of *Hiſpaniola*, which ſhe is afterwards obliged by Treaty to confirm to her, Vol. ii. p. 188.

1689 —— her Grounds for joining in the grand Alliance againſt *France*, Vol. ii. p. 191.

—— her firſt *Aſſiento* with the *Engliſh* at *Jamaica*, for ſupplying her *American* Colonies with *Negroes*, Vol. ii. p. 192.

1700 —— her King (*Charles* II.'s) Death produces great Conſequences, and in *England* occaſions a great Fall of public Funds, Vol. ii. p. 228, 9.

1701 —— her bad Conduct in commercial Concerns repreſented by *France*'s Board of Trade, Vol. ii. p. 272.

1702 —— her ſaid King's Death produced the ſecond grand Alliance againſt *France*, which had ſeized on all the *Spaniſh* Monarchy for her Grandſon the Duke of *Anjou*, Vol. ii. p. 236.

1713 —— her Monarchy was to be preſerved intire, by two Proviſoes in the Treaty of *Utrecht*, Vol. ii. p. 261.

—— her *Aſſiento* Contract with the *Engliſh South-Sea* Company, for Negroes, is thereby confirmed, Vol. ii. p. 261, 2.

—— her Claim in behalf of *Guipuſco* Province to a certain old Right of fiſhing at *Newfoundland*, Vol. ii. p. 262.

1715 —— her Treaty of Peace with *Portugal* concerning Territories on the North Side of *Rio de la Plata*, Vol. ii. p. 270.

—— her general Treaty of Commerce with *Great Britain*, Vol. ii. p. 271.

1721 —— her Peace with *Great Britain*, Vol. ii. p. 304.

1727 —— ſhe in vain beſieges *Gibraltar*, Vol. ii. p. 316.

1728 —— her Peace with *England*, Vol. ii. p. 317.

1729 —— her Treaty at *Seville* with *England*, Vol. ii. p. 329.

1731 —— her *Weſt-India* Iſlands deſcribed, Vol. ii. p. 330.

1732 —— her new *Eaſt-India* Company is juſtly and effectually oppoſed by the *Dutch*, Vol. ii. p. 342.

1737 —— her Differences with *Great Britain*, concerning the Violences of her *Guarda la Coſtas* in *America*; which obliges *Great Britain* to declare War againſt her: And yet that Diſpute is ſtill left open, Vol. ii. p. 359, 60.

1739

1740 —— *England*'s Expedition againſt her in *South America*, &c. Vol. ii. p. 365.

1747 —— a View of her Settlements in *Eaſt-India*, Vol. ii. p. 382.

1748 —— ſhe abrogates the *Engliſh South-Sea* Company's *Aſſiento* Contract, Vol. ii. p. 388.

A.M. A.D.

Spain.

1748 —— ſhe is improving her Silk, Woollen, *&c.* Manufactures, Vol. ii. p. 401.

1734 *Spaniſh-Town*, a ſmall *Britiſh Caribbee* Iſland, its Number of White Inhabitants, Vol. ii. p. 351.

1299 *Spectacle-Glaſſes*, an hiſtorical Account of them, and a critical Enquiry into their Antiquity, Vol. i. p. 140.

1013 *Spice-Iſles*, [vide alſo *Molucco-Iſles*] their Hiſtory and Revolutions down to our own Times, Vol. i. p. 57.

——— Cloves known to ancient *Greece* and *Rome*, *ibid.*

1350 ——— are ſupplied by *Venice* to the reſt of *Europe*, by the way of *Egypt*, Vol. i. p. 182.

1521 ——— the ancient Routs for fetching them from *India* to *Europe*, Vol. i. p. 352.

——— *Venice*'s laſt Effort, for ſtill availing herſelf of them, *ibid.*

——— why the *Soldans* of *Egypt* and the *Venetians* were ſo provoked at *Portugal*'s poſſeſſing thoſe Spice-Iſles, *ibid.*

1603 ——— the *Hollanders* already attempt to ſettle on the Iſle of *Ceylon*, for the Cinnamon Trade, Vol. i. p. 462.

1612 ——— they conclude a Treaty with the King of *Ceylon*, Vol. i. p. 484.

1621 ——— the *Engliſh* who had ſettled at the *Banda* Iſles are driven thence by the *Hollanders*, Vol. ii. p. 7.

1622 ——— the *Engliſh* are cruelly tortured and butchered by the *Dutch* at *Amboyna*, and expelled that Iſland, Vol. i. p. 13.

1638 ——— the *Dutch* expel the *Portugueſe* from *Ceylon*, and thereby ingroſs all the beſt Cinnamon of *India*, Vol. ii. p. 62.

1708 *Spices*, the Law in *England* for garbling them is now repealed, Vol. ii. p. 245.

1730 —— their Quantity imported now in ten *Dutch* Ships, Vol. ii. p. 328.

1760 *Spirits*, *Britiſh*, *diſtilled*, are legally regulated, Vol. ii. p. 418.

——— farther reſtrained from being conſumed in *Britain*, Vol. ii. p. 418, 19.

Spitzbergen, [vide alſo *Greenland* and *Whale-fiſhing*]

1575 ——— is fiſhed at for *Whales* by *Biſcayners* earlier
1598 than any other Nation, *Norway* excepted, Vol. i. p. 415.

——— its lamentable Condition deſcribed, Vol. i. p. 448.

——— *England* commences a Whale-fiſhery to it, with a brief Deſcription of that Country, *ibid.*

1611 ——— is generally called *Greenland* by the *Engliſh*, Vol. i. p. 483.

1612 ——— the *Engliſh* drive the *Dutch* from its Fiſhery, *ibid.*

1613 ——— the *Ruſſia* Company obtains an excluſive Charter for it, Vol. i. p. 489, 90.

1614 ——— King *James* I. of *England* claims the ſole or excluſive Trade of the Whale-fiſhery there, whither both *Dutch* and *Engliſh* reſorted at this Time, Vol. i. p. 448.

1615 ——— the State of *England*'s Fiſhery there at this Time, Vol. i. p. 494.

——— is now excluſively claimed by both *England* and *Denmark*, Vol. i. p. 495.

1618 ——— the *Eaſt-India* and *Ruſſia* Companies join ſtocks for this Whale-fiſhery, Vol. i. p. 497.

1634 ——— ſeven *Dutchmen* endeavouring to *winter* there, periſh of intenſe Cold and Scurvy, Vol. ii. p. 49.

——— the impracticable excluſive Claims to this inhoſpitable Part of the World are long ſince laid aſide by all Nations, *ibid.*

1636 ——— its Fiſhery is confirmed to the *Ruſſia* Company by King *Charles* I. of *England*, Vol. ii. p. 56.

7 *Staden* (or *Stade*) in the Dutchy of *Bremen*, is ſuppoſed to take its Name from a *Roman* Fleet's being ſtationed there about this Time, Vol. i. p. 15.

1140 —— is ſaid to be a very ancient Town, Vol. i. p. 81.

1189 —— the Antiquity of the *Toll* paid by Ships to that Town, at ſailing up the River *Elbe*, Vol. i. p. 92.

A.M. A.D.

Staden (or *Stade.*)

1587 —— hither the *Engliſh* Merchant-Adventurers Society remove for ſome Years, Vol. i. p. 431.

1597 —— the ſaid Society is compelled to remove from thence, Vol i. p. 439.

Turkey

A.M.	A.C.	
		Turkey or *Levant* Company,
	1759	——— certain Frauds are detected; 1ſt, by carrying *French Woollen Goods* from *Leghorn* to *Turkey* under Colour of their being *Engliſh Goods*; and, 2dly, by bringing *Raw-Silk*, &c. from *Italy* into *England* which had been firſt imported to *Marſeilles* from *Turkey*; and remedied by a *Britiſh* Statute, Vol. ii. p. 412.
	850	*Turks*, their firſt Migration, and their Progreſs Weſtward, Vol. i. p. 42.
	1030	—— their farther Progreſs in *Aſia*, Vol. i. p. 58.
	1356	—— their firſt War with *Venice*, Vol. i. p. 165.
	1350	—— they firſt gain Footing in *Europe*, Vol. i. p. 182.
	1384	—— their farther Conqueſts from the *Greek* Empire, Vol. i. p. 212.
	1399	—— they farther ſorely diſtreſs that falling Empire, Vol. i. p. 224.
		—— yet are for a Time vanquiſhed by *Tamerlane* the *Tartar*, *ibidem.*
	1419	—— they again quarrel with *Venice*, Vol. i. p. 245.
	1434	—— their Progreſs in *Hungary*, Vol. i. p. 262.
	1453	—— they utterly conquer the *Greek* Empires, both of *Conſtantinople* and *Trebiſond*, Vol. i. p. 274.
		—— they ſoon after raviſh from *Venice* her oriental Iſles, and alſo the *Morea*, *ibidem.*
	1457	—— are forced to raiſe their Sieges before *Belgrade* and *Rhodes*, Vol. i. p. 276.
	1462	—— they conquer the *Morea* and *Negropont* from *Venice*, Vol. i. p. 278.
	1492	—— an Enquiry into the Authority aſſumed by the *Grand-Seignior* over the *Barbary Moors*, Vol. i. p. 311.
	1502	—— their Progreſs in *Hungary* induces King *Henry* the Seventh of *England* to grant the Emperor *Maximilian* 10,000*l.* towards aſſiſting him, Vol. i. p. 330.
	1516	—— they finally overthrow the *Mamcluk* Empire in *Egypt*, Vol. i. p. 346.
	1517	—— they obtain Influence over the Kingdom of *Algiers*; and become piratical at the Weſt End of the *Mediterranean*, Vol. i. p. 347.
	1521	—— they drive the *Knights of St. John of Jeruſalem* out of the Iſle of *Rhodes*, Vol. i. p. 350.
		—— their farther rapid Conqueſts from the Chriſtian Powers of *Europe*, *ibidem.*
	1529	—— their unſucceſsful Siege of *Vienna*, Vol. i. p. 358.
	1530	—— their Naval Power becomes terrible to *Chriſtendom*, by *Barbaroſſa*'s Management, Vol. i. p. 360.
	1532	—— yet their Fleet was at this Time inferior to that of the Emperor *Charles* V. and King of *Spain*; which inſulted the *Turkiſh* Coaſts, and maſtered ſome Ports there, Vol. i. p. 362.
	1533	—— the *Levantine Turks* reduce *Tunis* to be tributary to them, Vol. i. p. 363.
	1534	—— their Naval Force now firſt rendered formidable, Vol. i. p. 364.
	1535	—— *France*, the firſt of any Chriſtian Potentate, concludes a Treaty of Commerce with the *Grand-Seignior*, as *Venice* does ſoon after. *England* afterward came into Terms of Commerce at the *Porte*. The *Dutch* came in afterward; and laſt of all the *Genoeſe*, Vol. i. p. 365.
	1537	—— becoming jealous of the *Portugueſe* Succeſſes in *Eaſt-India*, they, with a ſtrong Fleet from the Ports of the *Red-Sea*, in vain beſiege the ſtrong Fort of *Diu*, near the Mouth of the River *Indus*, Vol. i. p. 367.
	1544	—— they are in Alliance with *France* againſt the *Emperor*, Vol. i. p. 374.
	1565	—— their Naval Armament is very conſiderable at their unſucceſsful Siege of *Malta*, Vol. i. p. 403.
	1570	—— they take the famous Iſland of *Cyprus* from the *Venetians*, Vol. i. p. 410.
	1571	—— their potent Navy totally routed at the famous Sea-Fight, near *Lepanto*, by the Chriſtian Fleet, under Don *John* of *Auſtria*, *ibidem.*
	1574	—— they now ſubdue *Crimea*, or *Crim-Tartary*, Vol. i. p. 415.
	1619	—— they are ſtill powerful on the Seas, Vol. ii. p. 3.

A.M.	A.D.	
	1665	*Turkiſh* Empire renews its Trade with *France*, Vol. ii. p. 129.
	1669	—— the Trade to it enriches *Marſeilles*, Vol. ii. p. 137.
		—— they take the Iſle of *Candia* from *Venice*; ſince which Period their Naval Power has gradually declined, Vol. ii. p. 138.
	1672	—— they, with great Fury, invade *Poland*, which they reduce to an annual Tribute; which, however, the *Poles* very ſoon renounce, and recover their Independency, Vol. ii. p. 154.
	1675	—— her Treaty of Commerce with *England* once more, Vol. ii. p. 158.
	1683	—— by the Inſtigation of *France*, they in vain beſiege *Vienna*, Vol. ii. p. 178.
	1731	—— in *Great-Britain*'s and *Holland*'s Guarantees of the *Pragmatic Sanction* at *Vienna*, this Year, the Houſe of *Auſtria*'s Wars with the *Turks* are expreſsly excepted out of their Guarantees, Vol. ii. p. 334-5.
	1740	—— they attempt the Eſtabliſhment of regular *Poſts* or *Carriers* in all their Dominions, Vol. ii. p. 364.
	1663	*Turn-pikes* or Toll-gates, for mending of *Roads*, the firſt erected in *England*, Vol. ii. p. 122.
		Tuſcany, (vide *Florence* and *Leghorn*.)
	1586	*Tycho-Brahe*, a famous *Daniſh* Aſtronomer, and a great Improver of Navigation, flouriſhed at this Time, Vol. i. p. 429.

V.

A.M.	A.C.	
3554	450	*VINES*, none as yet in *Egypt*, Vol. i. p. 3.

POSTSCRIPT

TO THE

SECOND VOLUME of this WORK.

THE Amount of our national Debt, on the 5th of *January*, 1763, was 122,603,336*l.* 8*s.* 2¼*d* And the annual Intereſt payable for the ſame, was, 4,409,797*l.* 13*s.* 8*d.* A Burden ſo immenſe, and ſo far ſurpaſſing all former Experience, may truly be ſaid to be more than ſufficient to ingroſs the Attention of the ableſt Stateſmen.

For the arduous Taſk of effecting the gradual Diminution, and, at Length, the final Reduction thereof; [the latter not to be hoped for in the Compaſs of one Generation] all Men are agreed, that it is indiſpenſably requiſite to be inſtantly ſet on Foot, by every poſſible and rational Means. Whereby we may, in this ſingle Reſpect, get to be upon a *Par* with neighbouring *arbitrary* Potentates, who, having no ſolid or permanent *Credit*, have therefore *no Debts* but ſuch only as they can annihilate at Pleaſure.

I. For this tranſcendently-important End, the primary Step, obviouſly occurring to every Man's Thoughts, will be the utmoſt Public or National *Frugality* or *Œconomy*; to be *ſtrictly* and *ſteadily* purſued throughout every Branch of the Revenue, wherein any poſſible *Saving* can be rendered practicable. Whereby the *Sinking Fund* may not only be ſacredly preſerved inviolable, but likewiſe gradually augmented by ſuch *Savings*. Poſſibly the Augmentation of that Fund may be accelerated by Means ſeemingly thought difficult, but which may hereafter, nevertheleſs, be rendered practicable.

II. The Sale of many large *Waſtes*, *Commons*, *Parks*, *Chaſes*, *Foreſts*, &c. (of late much talked of) might doubtleſs not a little contribute to that great End; provided it can be effected without encroaching on private Property, and likewiſe, on the other Hand, without too far affecting the Property and Prerogatives of the Crown, whoſe former Grants (more eſpecially within little more than the laſt 100 Years) have been ſo extravagant and improvident, as ſcarcely *now* to have any Thing very conſiderable left to give away. Many of thoſe former Grants were too frequently made to unworthy and all-graſping Favourites; but, this preſumed or ſuppoſed one, if practicable, is placing the Crown in the moſt reſplendent and patriotic Light imaginable.

III. The gradual Reduction (even to Annihilation) of ſundry great nominal Employments in diverſe Branches of the Revenue, and in the Law, and poſſibly alſo in ſome other Departments, being, in Fact, no other than abſolute *Lay Sine-Cures*, may poſſibly, ſooner or later, merit due Conſideration. Some curious Inquirers make the Amount of them to approach very near to 100,000*l.* *per Annum*, of one Kind or another. The Fee Simple whereof, at 3 *per Cent.* will amount to a principal Sum of 3,300,000*l.* which Saving, if practicable, would prove no inconſiderable an Increaſe to the *Sinking Fund.*

Such *Lay Sine-Cures* were in Being four hundred Years ago, and poſſibly much farther back; of which there is one pregnant Inſtance in our firſt Volume, (p. 203, 204) extracted from the undoubted Authority of the ſeventh Tome of the ſecond Edition of *Rymer*'s *Fœdera*, (fol. 38.) under the Year 1470: It is a memorable Grant from our great King *Edward* III. to his Favourite *Jeffery Chaucer* (our ancient celebrated Poet, whom that King ſtiles *his beloved Eſquire)* of the important Employment of *Comptroller of his Cuſtoms and of the Subſidy on Wool and Leather in the Port of London*; but it was on this expreſs Condition, "*That he ſhall write with his own Hand* the Regiſters or Entries belonging to his "ſaid Office of *Comptroller*; and ſhall alſo *conſtantly act in Perſon in his ſaid Office*, and not by a Deputy "or Subſtitute." By which we may learn, that this great Prince ſaw (and probably intended to prevent) the bad Tendency of ſuch *Sine-Cure* Employments.

But, leſt we ſhould be thought to preſume too far in Matters of ſuch high Importance, we ſhall, with all due Deference, ſubmit the farther Conſideration thereof to thoſe whoſe exalted Stations more immediately enable them to make ſuch-like important Regulations and Improvements for the public Benefit. And although perhaps they, in the Proſecution thereof, may encounter, for a ſhort Time, much Obloquy, Reproach and Oppoſition, from ſome *ill-judging*, and from perhaps many more ill-deſigning and intereſted Opponents; yet if, in the Iſſue, they ſhall be able to effect the Relief of the Nation, from only but ſome conſiderable Part of our almoſt inſupportable Burden, they may reſt aſſured, that their ſaid ſubſtantial Service will infallibly be tranſmitted to Poſterity with Honour and Applauſe, as the Deliverers of a grateful People.

P O S T S C R I P T.

On the 10th Day of *February* 1763, the *Definitive* Treaty of Peace was ſigned, and was ſoon after ratified, between the Crown of *Great-Britain* on one Side, and thoſe of *France* and *Spain*, on the other; alſo, at the ſame Time, between the two laſt-named Crowns and that of *Portugal*; and on the 22d of *March* 1763, the ſaid Peace was ſolemnly proclaimed at *London*.

In which *Definitive* Treaty, the moſt material Alterations from, or Explanations of, the Preliminary Articles of Peace, of the third Day of *November* 1762, are,

Dunkirk. I. That in Lieu of the Vth of the Preliminaries, relating to *Dunkirk*, the XIIIth Article of the *Definitive* Treaty ſtipulates, “ That *Dunkirk* ſhall be put into the State fixed by the laſt Treaty of *Aix-la-Chapelle*, and by former Treaties. The *Cunette*[*] ſhall be deſtroyed immediately after the Exchange of the Ratifications of the preſent Treaty, as well as the Forts and Batteries which defend the Entrance on the Side of the Sea; and Proviſion ſhall be made at the ſame Time for the Wholſomeneſs of the Air, and for the Health of the Inhabitants, by ſome other Means, to the Satisfaction of the King of *Great-Britain*.”

East-India. II. That, inſtead of the Xth Preliminary, the XIth Article of the *Definitive* Treaty ſtipulates, “ That *Great-Britain* ſhall reſtore to *France*, in the Condition they now are in, the different *Factories*” [in the Preliminary Article called *Comptoirs*] “ which that Crown poſſeſſed, as well on the Coaſt of *Coromandel* and *Orixa*, as on that of *Malabar*, as alſo in *Bengal*; at the Beginning of the Year 1749: And *France* renounces all Pretenſions to the Acquiſitions which ſhe had made on the Coaſt of *Coromandel* and *Orixa*.” [i. e. Fort *St. David* and its Dependencies.] “ And his moſt Chriſtian Majeſty ſhall reſtore, on his Part, all that he may have conquered from *Great-Britain* in the *Eaſt-Indies*, during the preſent War; and will expreſsly cauſe *Nattal* and *Tapanoully*,” [i. e. *Bencoulin*, &c.] “ in the Iſland of *Sumatra*, to be reſtored. And he farther engages, not to erect Fortifications, or to keep Troops in any Part of the Dominions of the *Subah*” [whom our common Accounts formerly called the *Nabob*] “ of *Bengal*. And, in order to preſerve future Peace on the Coaſt of *Coromandel* and *Orixa*, the *Engliſh* and *French* ſhall acknowledge *Mahomet-Ally-Khan* for lawful *Nabob* of the *Carnatick*; and *Salabat-jing* for lawful *Subah* of the *Decan*; and both Parties ſhall renounce all Demands and Pretenſions of Satisfaction with which they might charge each other, or their *Indian* Allies, for the Depredations or Pillage committed on either Side during the War.”

To this Article his Grace the Duke of *Bedford* ſubjoined a Declaration, importing, ‘ That for the preventing of all Subject of Diſpute, on Account of the Limits of the Territories of the *Subah* of *Bengal*, as well as of the Coaſt of *Coromandel* and *Orixa*, the ſaid Territories of the *Subah* of *Bengal* ſhall be reputed to extend only as far as the *Yanaon* excluſively; and that the *Yanaon* ſhall be conſidered as included in the Northern Part of the Coaſt of *Coromandel* and *Orixa*.’

III. Inſtead of the IVth Article of the Preliminaries, whereby the *French* King *obliges himſelf (only) on his Royal Word*, not to fortify the Iſlands of *St. Pierre* and of *Miquelon*; that King, by the VIth Article of the *Definitive* Treaty, “ abſolutely *engages*, not to fortify the ſaid Iſlands, *&c.* as in the ſaid Preliminary Article.”

America. IV. Inſtead of the Words of the XIXth Preliminary Article, whereby “ his *Catholic Majeſty cedes and guarantees to his Britannic Majeſty, all that* Spain *poſſeſſes on the Continent of* North-America, *to the Eaſt or to the South-Eaſt of the River* Miſſiſippi :” By the XXth Article of the *Definitive* Treaty, “ his Catholic Majeſty cedes and guaranties, in *full Right*, to his *Britannic* Majeſty, *Florida*, with the Fort *St. Auguſtine* and the Bay of *Penſacola*; as well as all that *Spain* poſſeſſes on the Continent of *North-America*, to the Eaſt, or to the South-Eaſt of the River *Miſſiſippi*: And, in general, every Thing that depends on the ſaid Countries and Lands, with the Sovereignty, Property and Poſſeſſion, and all Rights acquired by Treaties, or otherwiſe, which the Catholic King and the Crown of *Spain* have had, till now, over the ſaid Countries, *&c.* in the moſt ample Manner and Form, *&c.*”

Africa. V. Inſtead of the latter Part of the IXth Article of the Preliminaries, whereby *France* cedes, *in full Right, and guaranties, to the King of* Great-Britain, *Senegal* :” In the Xth Article of the *Definitive* Treaty, it is thus expreſſed: “ *His moſt Chriſtian Majeſty cedes, in full Right, and guaranties to the King of* Great-Britain, *the River* Senegal, *with the Forts and Factories of* St. Louis, Podor *and* Galam; and with all the Rights and Dependencies of the ſaid River *Senegal*.” Which Forts and Territory were thought ſo important by the Houſe of Commons, that, on the 30th of the ſaid Month of *March*, they paſſed a Vote of Credit for his Majeſty, to expend as far as 7,000*l.* for repairing and improving the ſame.

As we have before freely animadverted on the heavy Load of our national Debt, we ſhall now preſume, with equal Freedom, to make ſome brief Remarks on the Benefits which, we ſincerely and impartially believe, will accrue to the Kingdoms of *Great-Britain* and *Ireland*, from the ſaid Definitive Treaty of Peace, in all the four Quarters of the terraqueous Globe; from which Benefits will naturally reſult a very great Increaſe of our national Commerce and Riches, and conſequently of the national Revenue, neceſſarily increaſing the *Sinking-Fund*, and, by like Conſequence, proportionably decreaſing our public Burdens.

And, Firſt, with regard to *Aſia*; the XIth Article of the Definitive Treaty ſufficiently demonſtrates the great Superiority we have thereby obtained in *Eaſt-India*. This muſt neceſſarily produce a great Increaſe of our Company's Commerce thither, and a proportionable Increaſe of the Cuſtoms, as well as

---

[*] A *Cunette* (ſometimes called a *Cuvette*) is generally deſcribed to be a deep Trench, (moſtly a wet one) digged along the Bottom of a broader or larger dry Ditch; for rendering the Approach to the Place more difficult.

of

of our national Wealth, and of the *Sinking-Fund.* It has been very lately aſſerted and computed by Perſons of Credit, who were poſſeſſed of the beſt Means of knowing our *Eaſt-India* Company's Circumſtances, that, including the great Superiority obtained by the ſaid XIth Article, that Company's *annual Revenue in India* will now exceed 600,000*l.* A Sum ſurpaſſing all former Emoluments, and much more likely to increaſe than to diminiſh.

II. In *Africa*; our Poſſeſſion of the late *French* Settlements on the River *Senegal* affords us the profitable Command of the generally-neceſſary Article of *Gum-Senegal,* ſo indiſpenſably neceſſary for the perfecting of many *of our own* Manufactures. And by the vaſt Enlargement of our continental as well as Iſland Dominions in *America,* the Demand for *Negro-Slaves* from that and other Parts of the *African* Coaſt will undoubtedly much increaſe, and therewith that of our Shipping and Mariners; and alſo a proportionable (or perhaps greater) Increaſe of our outward-bound Cargoes, ſo much conſiſting of our own various Manufactures, for the Purchaſe of thoſe Slaves, *&c.*

III. With regard to our new Acqueſts, both from *France* and *Spain,* on the Continent of *North-America,* (or, in Effect, of the great Bulk of all *North-America)* if we look but a little Way into Futurity, it muſt afford us an almoſt unbounded Proſpect of Felicity, conſidered either in a commercial or a political View. An Empire (it may now well be literally termed) of ſo great Importance even to our preſent Generation, and much more ſo to Poſterity, as may well make us for a while forget our national Burdens, great as they are; moſt eſpecially when in our Thoughts we revolve the abject Situation we were in but little above *ſeven Years* ago, both in *Europe* and *America!* Inſulted and invaded by a perfidious Foe, even in Time of Peace, until, by a moſt auſpicious Change of Meaſures, the Conſequence of ſo noble a Change of Miniſters, whoſe Names can never [*may they never*] be obliterated from our Annals, we were, by the divine Bleſſing, amazingly extricated, not only from a diſgraceful Condition, but became, at Length, every where Conquerors, to the Extent of almoſt a Quarter of the terraqueous Globe, where we now probably have many more new Fellow-Subjects than for a long Series of Time we ſhall be able to enumerate. Subjects, who, to *us alone,* muſt now have Recourſe for all their *European* Wants, until now ſupplied by a quite interfering and contrary Means: Subjects, who, on the other Hand, muſt now neceſſarily *ſupply us alone* with all their *American* Productions, to their own much greater Emolument than under their former Situation. Such pleaſing future Proſpects muſt needs afford a large Scope for a luxuriant Imagination, much eaſier to conceive than fully to deſcribe. How great an Increaſe of Commerce and Riches, of Power and Influence muſt ſo vaſt an Extent of Country on the Continent of *America* hereafter afford to the *Britiſh* Empire!

IV. By the extenſive Province of *Florida,* now yielded to us by *Spain,* (whereof a good Part is ſaid to be very improveable, when in *Britiſh* Hands) and by the farther Addition of almoſt the only valuable Part of *Louiſiana,* our Empire in *North-America* is not only rendered vaſtly more extenſive, (and yet uniformly compact) but likewiſe extremely *ſecure,* down from our Province of *Georgia,* Southward, to the Cape of *Florida,* and thence, turning Weſtward, along the great Gulph or Bay of *Mexico,* up to the Mouth of the River *Miſſiſippi*; all which has (with reſpect to Security) *now* no other Frontier but the Ocean. An extreme Advantage this to ſo commercial a Nation! But this is not all the Benefit of ſuch large Conceſſions: For, by the Advantage of the Bay and fine Harbour of *Penſacola,* &c. we are enabled, in Time of War, to *command* the neighbouring Seas and Coaſts belonging to thoſe two Nations, with Advantages needleſs, and perhaps improper, to be enlarged on.

V. By our ſaid Treaty with *Spain,* we have effectually eſtabliſhed our (before diſputed) Right to the profitable Benefit of our (unlimitedly) cutting of Logwood on the Shores of *Campeachy*; where we are now alſo impowered to have Habitations for our People, and Storehouſes for our Goods; where alſo, in caſe of any future Rupture, it will always be in our Power to form a more *effectual* Eſtabliſhment. By this important Conceſſion, a great Bone of Contention, of near one hundred Years Standing, is likewiſe moſt fortunately aboliſhed; and therewith more and other future Advantages are in View, *than we chuſe to name.*

VI. Even with reſpect to the new Syſtem of the *Weſt-India* Iſlands, we may obſerve, that, although for our getting rid of our late moſt troubleſome Neighbours on the *American* Continent, and of our obtaining of them ſuch other important Advantages (as above) in different Parts of the World, it has been judged expedient to reſtore the *Sugar-Iſlands* we had conquered, together with one (ſo called) *neutral* Iſland, *viz. St. Lucia*; have we not, by the IXth Article of the *Definitive* Treaty, obtained the Iſlands of *Granada* and of the *Grenadines*; and likewiſe the neutral Iſles of *St. Vincent, Dominica* and *Tobago,* with the additional and permanent Benefit, of for ever annihilating the very Name or Appellation of any *neutral* Iſle in thoſe Seas? whereby each Nation's Poſſeſſions and Property there, are now diſtinctly aſcertained, and a final Period put to ſo long a Plea for Altercation.

VII. Laſtly, the effectual Demolition of the impregnable Part of the Sea-Port of *Dunkirk* will infallibly be *now* executed; not merely becauſe ſo ſtipulated, (as it has thrice before been) but becauſe we have, *in our Hands,* (what we never before effectually had) a ſure Pledge for its being effectually performed.

Unqueſtionably, theſe are moſt ſubſtantial and moſt important Advantages. And if, in any reaſonable Degree, they ſhall appear to be adequate to the Blood and Treaſure by us ſpent in procuring them; it is undoubtedly of no Kind of Conſequence to the Public in general, to inquire by whom they were obtained. Poſterity, we are certain, will be the moſt impartial Judges thereof; and to Poſterity we ſhall ſubmit the Whole, after ſubjoining, for our own innocent Vindication, that, to the beſt of our Knowledge and Belief, we are by no Means conſcious of having in any, even the leaſt, Degree, exaggerated the above-named Advantages obtained for the Public: *Such Advantages* (more eſpecially in a commercial Senſe) as this Kingdom never knew or experienced, in any Period of Time whatever, ſince it was a Nation !

We need ſay nothing of the Reſtitution of our Iſle of *Minorca*, as being generally eſteemed no more than an Equivalent for our reſtoring of the Iſle of *Belle-Iſle*; though doubtleſs a moſt favourable Equivalent for *us*.

The Money or Supply voted by Parliament, and paſſed into a Statute, for the Service of the current Year 1763, amounts to 3,500,000*l.* to be raiſed by an additional Duty on foreign Wines, and on *Cyder* and *Perry*.

Moſt glorioully to crown all our unparalleled Succeſſes and Conqueſts in our late War, Brigadier-General *Draper* arrived, on the 16th of *April* 1763, with Advice, that he, with his Majeſty's Land and Naval Forces, jointly with thoſe of our *Eaſt-India* Company, under the Command of Admiral *Corniſh*, had, on the 6th of *October* 1762, beſieged and taken the large City of *Manila*, the Capital of the great Iſland of *Luconia*, the Principal of the *Spaniſh Philippine* Iſles: And (beſide a great Booty, not as yet particularly ſpecified) the ſaid Sea and Land Commanders had agreed with the *Spaniſh* Governor to ranſom the ſaid City and Iſland for four Millions of Dollars; and that, moreover, our naval Force had made Prize of a large *Acapulco* Ship, valued at three Millions of Dollars: The farther Particulars whereof may ſoon be expected.

Thus the *Britiſh* Arms have ſurprizingly, and almoſt marvelouſly, triumphed in the very extremeſt Parts of *Aſia* Eaſtward, as well as over the great weſtern Continent of *North-America*, and alſo in *Africa* !

APPENDIX:

Comprehending certain Matters relative to the foregoing Work, which, for the moſt Part, could not properly be brought into a Chronological Method or Order. As,

I. That excellent ſmall Treatiſe which, in our Preface, we promiſed to exhibit, verbatim, in this APPENDIX, as being long ſince out of Print, and become ſomewhat ſcarce: Intitled, " OBSERVATIONS concerning the Dominion and Sovereignty of the Seas; being an Abſtract " of the Marine Affairs of ENGLAND." By Sir PHILIP MEDOWS, Knight. Section I.

To the READER.

THE Dominion of the Sea, as it is moſt apt to be made the fair Colour, and ſpecious Pretence, to a War betwixt *England* and *Holland*, when the real Cauſes of ſuch War are hidden and remote; ſo nothing will ſo effectually preſerve a laſting Union between them, by hindering the Root of Diſcord from growing again, as a true Knowledge and right Underſtanding of that Matter. About which, there are many traditional Miſtakes, and popular Errors, too current among us, and ſuch as are not of a ſimple and innocent Nature, but very dangerous, and of evil Conſequence. The Conſideration whereof gave the firſt Occaſion to the following Diſcourſe, which was compoſed ſeveral Years ſince, was read and preſented to his late Majeſty King *Charles* the Second, and well accepted by him; and has ſince remained a Manuſcript in the Hands of ſeveral Perſons of Quality. And though it might receive a new Turn and Air, more accommodate to the preſent State of Things; and though the Time when it was written, the Perſon for whom, and the Niceneſs of the Subject itſelf, obliged the Author to more of Caution and Reſerve, than perhaps would now be needful; yet he was not willing to make any Alterations in it, chuſing rather to ſpeak the Language of *Truth*, than of *Times*; for what was once true, is always ſo, though not always equally fit to be made public. But ſurely now, if ever, it is ſeaſonable to remove all Obſtacles and Impediments out of the Way of a good Underſtanding between the two Nations, when their moſt intimate Union and Conjunction is not only, as at other Times, highly expedient, but abſolutely neceſſary.

The PREFACE; ſhewing the Author's Deſign.

THE following Diſcourſe may poſſibly, upon a ſlight and ſuperficial View, ſeem to have ſome Tendency towards the Diminution of the Rights of *England*, and conſequently the Enlargement of thoſe of other Governments; but upon a ſerious and deliberate Peruſal, there will not appear any juſt Ground for ſuch Imputation. It is, doubtleſs, very commendable in a Subject, if he can, with ſound Judgment and convincing Reaſon, to advance the Pretenſions of his Sovereign amongſt foreign Nations. If it be the Part of a good Judge, *Ampliare Curiam*, it is much more of a good Subject, *Ampliare Coronam:* For we all ſhine in the Glory of the Crown that is over us, and even private Perſons have ſomething of Luſtre reflected on them, from the Honour and Grandeur of the Monarchy under which they live. Upon which Account, Mr. *Selden* has excellently well deſerved of the Public, by heightening the Sea-Sovereignty of the Crown of *England*, in his learned Book, entituled, *Mare Clauſum*; a Treatiſe ſo comprehenſive of what can be ſaid on that Argument, that he, who ſhould now write of the ſame, would certainly incur the old Cenſure of writing an Iliad after *Homer*.

But if all the Claims and Pretenſions of the Crown of *England*, ſupported by the Authorities and Allegations produced in that Book, ſhall be vouched as the proper Meaſure and Standard of Right and Wrong betwixt us and other Nations; if the controverting thereof by them, ſhall be eſteemed by us as an Invaſion and Uſurpation, and conſequently the juſt Cauſe and Foundation of a War: If what is well written muſt be fought for too, not being to be gained but by a longer Tool than a Pen, the King of *England* will unavoidably be caſt upon this hard Dilemma, either of being involved in endleſs and dangerous Quarrels with all his Neighbours abroad, or of having his Honour and Reputation proſtituted at Home, as tamely ſuffering the beſt Jewels of his Crown to be raviſhed from it, and the Regalities thereof, tranſmitted to him from his moſt noble Progenitors, to be uſurped by Foreigners. Nor does the Miſchief ceaſe here; for in caſe he ſhould at any Time enter into a War, for the more vigorous aſſerting and maintaining thoſe Pretenſions, and they not be included in the Terms and Conditions of the following Peace, the Inference will be this; That he was ſo far worſted in the War, as to be conſtrained to buy a Peace, if not by a total abandoning of them, yet at leaſt by a temporary Receſſion from thoſe Pretenſions.

Let me add one Conſideration more; if a War betwixt *England*, and any other Kingdom or State, be grounded and ſtated upon a Sea-dominion, by Help of this Advantage, an Enemy will gain the Weather-gage of us, and derive from it a conſiderable Benefit to himſelf; *Hoc Ithacus velit*——A *Dutchman* will deſire no better: For, by this means, we ſhall diſoblige and diſaffect all our Neighbours to our Cauſe and Quarrel, at ſuch a Time, when we moſt need their Friendſhip and Aſſiſtance: This will awaken Fears and Jealouſies, and ſtrongly alarm them to an early ſecuring of their own Navigation and Commerce, againſt thoſe who would impropriate the Seas. They will not ſo much regard the Juſtice of our Cauſe, as the Conſequences of our Succeſs, and will be ſure to range themſelves with Heart or Hand, or both, as Occaſion ſhall require, on that Side to which they ſhall be invited by a common and complicate Intereſt: It will not be a War betwixt this Prince and That, betwixt *Holland* and *England*, but betwixt the Continent and an Iſland, and the Queſtion will be briefly this, Whether the Iſland ſhall have the Sea to herſelf, or whether the Continent ſhall have Share with her? As this is conſonant and agreeable to Reaſon, to ſuppoſe that it will be ſo, ſo it is verified by Experience, that in Fact it has been ſo. We need look back no farther than the Year 1665. *England* was then in open War with *Holland*, and, as previous thereto, the Parliament granted a Royal Aid, the End whereof is publickly declared in the Preamble of the Act, *viz. To equip, and ſet out to Sea, a Royal Navy, for the Preſervation of his Majeſty's ancient and undoubted Sovereignty and Dominion in the Seas.* This was exactly calculated for the Meridian of *England*, it ſerved to inſpire our Captains and Officers with Honour, to animate our Seamen with Courage, to diſpoſe the whole Body of the People with Chearfulneſs and Unanimity, to undergo ſo mighty a Supply, anſwerable to the Greatneſs of the Undertaking. But it ſerved not ſo good Effects beyond Sea, as ſoon appeared; for the Balance of Succeſs had no ſooner inclined to *England*, by that ſignal Victory, obtained under the happy Conduct of his then Royal Highneſs, over the *Dutch* Fleet, commanded by Lieutenant-Admiral *Opdam*, but *France* ſtood over to *Holland*, *Denmark* was following, and had the War continued, and the Series of Succeſs not been interrupted by the Fatalities of the Plague, Fire, and other Accidents, by Occaſion whereof a Peace intervened, there had at that Time been as formidable a Confederacy and Conjunction formed againſt *England*, as that at *Cambray* againſt *Venice*.

An. 16 & 17 *Car.* II.

An. 1665.

An. 1508.

To remedy the ſaid Inconveniencies, and obviate the like, I thought it uſeful in the following Diſcourſe, carefully to diſtinguiſh betwixt the Queſtion of Right, and the Queſtion of Fact; betwixt the Pretenſions of the Crown of *England*, and the Poſſeſſions of it; betwixt what it has continually claimed and demanded as an ancient Right, and what it has been actually ſeized of, by a long, peaceable, and uninterrupted Enjoyment, which implies a Conſent and Acknowlegement on the Part of other Nations. The latter of theſe is the true Touchſtone of Wrong and Injury, for what has been anciently claimed, may have been as anciently denied, and ſo remained *Lis pendens*, a Queſtion undecided: But what has been peaceably enjoyed, and thereby paſſed into an acknowleged Right, afterwards to detain or controvert, is a manifeſt Injury and Uſurpation. And by this, we ſhall eaſily diſcern, whether the Crown of *England* maintains its Ground, or whether it has loſt any Thing of what it formerly had, by new Encroachments and Diſſeiſins, ſuch as may furniſh Matter for a juſt Reſentment and Vindication. In the mean Time, the Pretenſions of the Crown ſtand as they did; what they were, that they now are, no Diminution of them, no Derogation from them. It is Courage in a Nation ſtrenuouſly to maintain their own, and it is Juſtice rightly to diſtinguiſh their own; and the beſt Temper of Government, is, neither to do a Wrong, nor take it.

I thought it needful alſo to examine the accuſtomed Salutation at Sea, by the Flag and Topſail, and to endeavour to clear the true Significancy and Import of it, and the rather, becauſe it has been the Occaſion of ſpilling much Blood in *Europe* within theſe forty Years laſt paſt, and may be of the Effuſion of more, if a timely Remedy be not applied to ſo growing an Evil, which is almoſt become a common Make-bate betwixt the *European* Nations. And all this, partly by overſtraining a fine Thread, and laying greater Weight upon it than it will bear; but chiefly for Want of a certain and determinate Regulation; for whilſt Sea-Captains are, by the Generality of their Inſtructions, referred only to former Uſe and Cuſtom, and what that is, not diſtinctly known, many Irregularities and Indiſcretions enſue, not unlike to thoſe of ſome Gallants at Land, who think it a Point of Honour to quarrel for the Way, or juſtle for the Wall, with all they meet; but with this Difference, theſe do it only to the endangering their own Perſons, but the others to the engaging their Maſters many Times in unneceſſary Feuds and Diſputes.

This is the Mark, at which the following Diſcourſe is levelled, and by theſe Meaſures it has been guided. And the whole Deſign of it tends to this, to prevent needleſs Quarrels, and ſuch as are ſtated to Diſadvantage abroad, and to juſtify our King's Reputation againſt Cenſure and Reflection at Home. That whilſt he preſerves the public Peace, his Honour may not be impeached, nor yet his Honour (of which he has ſo quick a Senſe) be made Uſe of through miſtaken Appearances to imbroil his Peace; but be left free to ſteer an even Courſe betwixt the tender Regards of the one, and the prudential Conſiderations of the other. In order to which Deſign, it was neceſſary for me to remove ſome Obſtacles and Impediments, as I found them in my Way. To clear the true Notion of Dominion and Sovereignty in all the chief Branches and Dependencies of it. To trace Matters of Fact through the national Treaties made betwixt our Kings and other Princes. To vindicate ſome Paſſages in our Books and Rolls from Miſtakes and Miſapplications. And all this without any Vanity of refuting Mr. *Selden*, (who if he has extended the Rights of the Crown of *England* to the Wrong of other Princes, *Viderint ipſi*, let them look to it, whoſe Concern it is;) but merely in Proſecution of the Deſign of a Diſcourſe, which, beſides that it aſſerts the Honour of our King, by ſhewing in Fact, as to Sea-matters, how he maintains whatever his Anceſtors enjoyed, may, as is humbly conceived, be further ſerviceable for theſe two Ends.

Firſt, To put a Stop to ſome popular Errors, which prevail to the great Inconvenience of the King, by continual prompting and expoſing him, upon pretended Points of Honour, to a perpetual Strife with all his Neighbours, for Things not ſafe to be inſiſted on, never enjoyed, nor likely ever to be obtained.

Secondly, To pacify and allay thoſe Jealouſies, which diſpoſe foreign Princes upon all Occaſions to enter into Confederacies prejudicial to the Intereſts of *England*: For as it has been the Policy of *France* in this laſt Age, to load *Spain* with an Imputation of affecting an univerſal Monarchy: So it is the Practice of *Holland*, to charge *England* with an Affectation of a Sea-monarchy, to the Belief of which we too unwarily contribute; and under this Covert the *Dutch* advance their own Deſigns, as the *French* have done theirs under the former.

As to the Method of this Treatiſe, it is divided into theſe four general Heads.

I. What is meant by the Dominion and Sovereignty of the Seas, and what the true Notion or Idea of it is.

II. What Things are incident to this Dominion; and inſeparably follow it.

III. What the Salutation at Sea by the Flag and Topſail ſignifies, and whether it has any Relation to the Dominion of it.

IV. The whole Matter of Fact betwixt the Crown of *England*, and foreign Princes and States, in the ſeveral Incidents of Sea-dominion, is diſtinctly examined, and impartially reported.

Theſe General Heads contain ſeveral Subdiviſions, concerning the *Quatuor Maria*. *The Laws of* Oleron. *The Roll in the Tower* De Superioritate Maris. *The Fiſhery licenſed and limited*, &c.

Obſervations concerning the Dominion and Sovereignty of the SEAS, *&c.*

IT has been learnedly argued on both Sides, whether there be any juſt Dominion or Property in any Sea: For, in the primitive and natural State of Things, antecedent to humane Fact and Conſent, the whole Earth was common and undivided unto all Mankind; but then, as it was common, ſo it was without Culture, Men living upon the ſpontaneous Productions of it, in an eaſy and innocent, but rude and ſimple Manner. Their Dwellings were Tents; their Drink, Water; their Bread, Roots and Nuts; their Clothing, the Bark of Trees, or Skins of Beaſts. Wherefore, to better the Condition of human Life, by the Encouragement of ingenious Arts and Induſtry, Conſent, either expreſs or tacit, introduced Occupancy and Property, that every Man might enjoy to himſelf, as a Reward, the Benefit of his own Skill and Labour. Then were Houſes built, Fields ſown with Corn, Vineyards planted, and the Manner of Living heightened by progreſſive Steps and Gradations, from the plain State of ſimple Neceſſity, to a Degree of Convenience; from Convenience, to Delight; from Delight, to Luxury. But foraſmuch as the wide Sea is not capable of Cultivation or Improvement, by Art or Induſtry, it may therefore be reaſonably ſuppoſed, never to have been impropriated by Conſent, but left to its primitive and natural Communion.

How Dominion was firſt introduced.

Privata nulla Naturâ, ſed aut veteri Occupatione, aut, &c. Cic. *de Offic. lib.* 1.

Nam propriæ Telluris Herum Natura nec illum, nec me, nec quenquam fecit, Hor. ii. Sat. 2.

If it be objected, that ſundry People and Nations have been Lords of ſeveral Seas; as the *Athenians*, *Carthaginians*, *Rhodians*, and *Romans*: To that, will be replied, that this was Force and Empire, without Property; an Uſurpation, not a Right; and that an armed Conqueror, by the ſame Rule, that he diſpoſſeſſes what is proper, may impropriate what is common; only with this Difference, that it is extenſively more unjuſt to debar many from their common Right, than to diſſeize a ſingle Perſon of his private Inheritance.

I ſhall not enter upon the Merits of the Cauſe, as not being to my Purpoſe, but as to the forementioned Argument, how plauſible ſoever, it concludes fallaciouſly; as if that, which is but *Cauſa una*, one Cauſe, were *Cauſa unica*, the only Cauſe; whereas there may be other Reaſons and Conſiderations, beſides that of encouraging Induſtry, why Communion was changed into Property, and thoſe equally extendible to Sea, as well as Land. Poſſibly the Conſent of ſome Nations may diveſt themſelves of a joint Right, and inveſt it in one, in order to a public Benefit. And this is the beſt Part of that Title, which the *Venetian* has to the Gulph; which being a particular and remarkable Caſe, it will not be amiſs briefly to touch upon it, in the following Paragraph.

The *Ottoman* Power extending itſelf into *Europe*, to the Subverſion of the Eaſtern Empire, conquering all *Greece*, with *Macedon* and *Epirus*, and penetrating to the very Banks of the Gulph, almoſt within Sight of *Italy*: The *Italian*, and other neighbouring Princes, to interpoſe the beſt Skreen they could, betwixt themſelves and the near approaching Danger, did, by a concurring Intereſt, impatronize the *Venetian* in the Gulph, who, by Reaſon of their Potency in Shipping, and the immediate Concern of their own imminent Peril, were the moſt proper State to be made the Bulwark of *Chriſtendom* at Sea. Thus the Pope, by the Ceremony of a Ring, wedded their Duke every Year to the *Adriatick*. And in the General Council of *Lions*, in the Preſence of the Ambaſſadors of ſeveral Princes, upon Complaint made againſt the *Venetians*, for laying Impoſitions upon all Ships ſailing within the Gulph, Judgment was given in Favour of the Republic, upon Conſideration of their guarding that Sea againſt the Courſes of the Pirates and *Saracens*. And the neighbouring Princes would not ſo much as ſend a Galley, without aſking Leave of the Senate; which Reſpect was ſo providently managed by that wiſe Council, the better to aſſert their marine Sovereignty, that ſometimes they would give Leave, under ſome Reſtrictions

and

Of the Dominion of the State of *Venice* in the Gulph.

Flav. Blond. Decad. ii. 18.

Joan. Palat. de Dominio Mar. l. ii. *c.* 6.

and Conditions, as in the Caſe of the Siſter of *Uladiſlaus* King of *Naples*; ſometimes they denied Leave, as in the Caſe of *Mary*, Siſter of *Philip* King of *Spain*, in the Year 1630, whom the Senate would not permit to be tranſported from *Naples* to *Trieſte*, in the Galleys of *Spain*, but in thoſe only of the Republic. But it is to be conſidered alſo, that the Gulph of *Venice* is not a wide Sea or Ocean, nor a Streight or narrow Sea, called in Latin *Fretum*, but a *Sinus*, a Bay or Gulph, cloſed at one End; in the Bottom whereof the City of *Venice* is ſcituate, upon ſeveral Iſles or Inſulets. The Seas of *England* are of a different Nature and Condition, they are open both above and below, and they are the Midway-paſſage betwixt all the Northern and Southern Nations. The Wares and Merchandiſes of *Muſcovy*, *Poland*, *Sweden*, *Denmark*, *Norway*, *Germany*, and the *Netherlands*, are conveyed by Shipping to *France*, *Spain*, *Italy*, the *Levant*, *&c.* and ſo back again from the South to the North, through the North-Eaſt Sea betwixt *England* and *Germany*, and the Weſtern Channel betwixt *England* and *France*, which ſhews, of what Influence and Import this Dominion, on the Part of *England*, is to the reſt of the World.

CHAP. I.

What is meant by the Dominion and Sovereignty of the Seas, and what the true Notion or Idea of it is.

BEFORE I proceed, it will be neceſſary, firſt, to explain the Terms, what is meant by *Dominion*, what by *Sovereignty*, and what by the *Seas*; leſt we loſe Things in Words, and take up with Names, inſtead of Realities. By *Dominion*, is to be underſtood Property, (for ſo is that Word *Dominion* always taken in its legal Senſe) or a Right of poſſeſſing and uſing any Thing as one's own, and of excluding all others from a promiſcuous and equal Uſe thereof. That is mine, which is ſo mine, as it is not another's, *Eodem Modo*, in the ſame Manner as it is mine: And this Property is twofold, either Public or Private, for Property is not oppoſed to Public, but to Common. Public Property excludes Communion amongſt Nations; private Property, Communion amongſt Perſons. For, as particular Mannors and Tenements, divided by their reſpective Bounds and Buttles, are the private Property of particular Perſons, which they poſſeſs privatively of other Perſons. So Countries and Territories, like greater Mannors, divided each from other by Limits and Borders, are the public Properties of Nations, which they poſſeſs excluſively one of another. The whole Territory of *England* is the public Property of the *Engliſh* Nation, and this Property excludes Aliens, or all born out of the King of *England*'s Liegeance, from taking real Inheritances, or holding Lands and Tenements any-where in *England*. The ſupreme Rule and Juriſdiction in and over this Territory, is that which we call Sovereignty, and is the public Property of the King, in Right of his Crown of *England*. He is ſole Lord of this great Mannor, and all the Lands in *England* are holden, either mediately or immediately, of him. And as he is Head and chief Ruler, he bears within him the Perſon of the whole Nation, and thus all *England* is his Territorial Property. And the Royal Demeans and Poſſeſſions, annexed to the Crown, as the public Revenue thereof, and as diſtinct from the private Poſſeſſions of particular Perſons, are his Patrimonial Property. He has them in his public and politic Capacity, as King, not in his private and natural, as an individual Perſon; for Kings, as well as Subjects, may have Poſſeſſions in a private Right, as the King of *Egypt*, who bought the Lands of his Subjects for Corn, he had not thoſe Lands in Right of his Crown, as King, for he was King before he had them.

I have done with thoſe two Terms, Dominion and Sovereignty. I paſs to the third, and that is, the Sea or Seas. Whereby Sea is not to be underſtood, ſuch a collective Body of Waters, ſingly and ſolely as Waters; for the moveable inconſtant Waters, whether of Sea or River, barely as ſuch, are not a capable Subject of Property; but as Waters contained within a fixed and certain Boundary, and ſupported by a ſtanding Bottom. In the firſt Senſe, no Man goes twice into the ſame River; in the ſecond, a River is the ſame in a Succeſſion of Ages. And in this latter Senſe, the Sea, as it is a ſolid *Alveus*, or Receptacle of Waters, contained within a certain Boundary, is as truly and as properly Territory as the Land. It is *Territorium à Terra*, from the ſtanding Bottom of Earth, by which the Waters of it are ſupported, and from the unmoveable Shoars of Earth, within which thoſe Waters are contained.

Having ſufficiently explained the Terms, if one ſhould aſk me, What is meant by the Dominion and Sovereignty of the *Britiſh* Seas, which the Kings of *England* are ſaid to have continually claimed, in Right of their Crown of *England?* I would anſwer, By Dominion is meant the public Property of thoſe Seas, as Part of the Territory of their Realm of *England*, and conſequently all other Princes and People excluded, not from all, but from an equal Uſe of them. By Sovereignty is meant, that ſole ſupreme Rule and Juriſdiction, which the Kings of *England*, ſucceſſively, have over the whole Realm of *England*, of which thoſe Seas are a Part. If he ſhould further aſk me, How does this Right in the Crown of *England* appear, and by what Proofs is it evidenced? I would refer him to Mr. *Selden*, whoſe Proofs and Arguments, whether they come up to the Height of ſuch a Dominion as I have here deſcribed, which they ought to do, or elſe will fall ſhort of the Mark, is not for me to ſay; I leave that to the Judgment of his Reader, wiſhing they were ſo convincing and demonſtrative, that all other Nations, as well as our own, would reſt ſatisfied therewith. But if he aſks me of Matter of Fact, whether the Kings of *England* have, for any long Time, been in the actual and peaceable Poſſeſſion of ſuch Dominion, as a Right acknowleged by the expreſs or implied Conſent of other Nations? this I ſhall examine by and by.

But whereas I hinted before, that the Dominion of the Crown of *England* in the *Britiſh* Seas, did not exclude other Princes and States from all Uſe, but from an equal Uſe of thoſe Seas, this needs a little Explication. In order to which, it is to be conſidered, that as all Property firſt began by human Fact and Conſent, antecedent to which was Communion: So in this Conſent was implied a Reſervation and benign Exception of ſuch Uſe, as might be of great Benefit to others, without any conſiderable Damage to the Proprietor; a River, as a Fiſhery, is a private Dominion, no Man may fiſh there, without the Owner's Leave, becauſe it would be a Diminution of his Profit; if navigable, as a Way, it is public to all the Subjects of that Prince, who is Lord of the Territory; as it is running Water, it is common to Man and Beaſt to drink of it, and waſh with it. A Field is a private Property, but the Market-path over it is public, and when it was firſt made a Property, it was with Reſervation of a Path. For Fields were not diſtinguiſhed by Metes and Bounds to their reſpective Owners, with Deſign to confine every Man to his own Home, but with Exception of Liberty to paſs and repaſs in a harmleſs Manner, over each others Properties in Purſuance of their lawful Occaſions. The Sea, *ſay we*, is the public Property of the Crown of *England*; but yet, as it is a Way, it is common to the peaceable Traders of all Nations. A Path over a Field is of ſome Damage to the Soil; though compenſated with a greater Utility; but a Way over the Sea is of no Damage to the Water; and the Sea, being a fluid Body, is all Path, where a Ship can ſail, and a common Highway from one Nation to another. And this is ſo far from being a Damage to any, that it is highly beneficial to all; for as there is no Man ſo ſelf-ſufficient, as not to need the continual Help of another, ſo neither is there any Country which does not, at ſome Time or other, need the Growth and Productions of another.

Quid prohibetis Aquas? Uſus communis Aquarum eſt. Ovid.

Well then, ſince it is the Nature of Property in general, ſo to make a Thing mine, as it is not another's, *eodem Modo*, in the ſame Manner as it is mine; and the Dominion of the Sea in one Prince does not exclude another from all Uſe of it; it may not be unfitly demanded, What are thoſe proper Uſes, which are ſo peculiarly reſerved to the Crown of *England*, in Right of ſuch ſuppoſed Dominion, as that all other Nations are excluded from them? And this will lead me to the ſecond general Head which I propoſed, *viz.*

CHAP. II.

What Things are incident to the Dominion of the Sea, and inſeparably follow it.

I Anſwer, theſe three Things:

1. A Right of excluding all foreign Ships of War from paſſing upon any the Seas of *England*, without ſpecial Licenſe for that Purpoſe firſt obtained.
2. The ſole marine Juriſdiction within thoſe Seas.
3. An appropriate Fiſhery.

Firſt, All Foreigners are excluded by Virtue of ſuch Dominion from a general Liberty (without firſt aſking and obtaining ſpecial Licence) of putting out upon the *Britiſh* Seas Ships fitted and equipped for War, when and in what Number they pleaſe. The Reaſon is plain, becauſe it is the Territory of another Prince; and to enter it, without Leave, with an armed Force, and in ſuch Numbers, as may juſtly occaſion Fear and Suſpicion of Danger, is a public Hoſtility. The *Perſians* were reſtrained by Pact and League made with the *Athenians*, from entering with armed Veſſels within the *Cyanean* and *Chelidonian* Iſlands; but had the *Perſians* acknowleged the Territorial Property of thoſe Seas to have been in the People of *Athens*, there had been no Need of ſuch Pact, for in the Reaſon of the Thing itſelf, abſtracted from Covenant, it had been as much an Hoſtility to have entered thoſe Seas with a Fleet of War, as to have landed an Army upon *Attica*; for both were equally the *Athenian* Territory.

Plut. pi Cim.

Secondly, From the juridical Cogniſance of all Cauſes, Civil and Criminal, for and concerning all Matters and Things done and committed in and upon thoſe Seas, the Perſons whom thoſe Cauſes concern there abiding. The Reaſon is, becauſe Juriſdiction is an eſſential and inſeperable Part of the Sovereignty, which a Prince has within his own Territory. All Foreigners, whilſt in it, owe him a local Obedience, and are triable by his Laws, and before his Judicatories only as the ſole ſupreme Judge of the Place. And for any to appeal from him, is to ſet a Superior over him, and to exerciſe Juriſdiction within his Territory, without an Authority derived from him, is to King it in another's Kingdom, to ſet up co-ordinate Supremes within one Realm in Matters of the ſame civil Cogniſance. Which is as much a Contradiction, as to affirm many Infinites, for as the Infinity of one makes all others finite, ſo the Supremacy of one makes all others ſubordinate.

Thirdly, From a Right of fiſhing within thoſe Seas, without ſpecial Licence firſt obtained from the Lord of the Seignory, and under ſuch Conditions and Conſiderations as he ſhall think fit. The Reaſon is, becauſe this is the patrimonial Property of his Crown, and the Fiſhery is in a Manner all the Profit that his great Sea-territory yields him. The Dominion of the Sea, without an appropriate Fiſhing, is as if a Vineyard ſhould be a Property, but the Grapes common. Or like an Eſtate or Poſſeſſion of Land, veſted in one, to the Uſe of another; and ſuch we had many here in *England*, till a good Statute executed the Poſſeſſion to the Uſe, and ſo conjoined what ought not to have been divided. Nor can it be alleged, that a promiſcuous fiſhing in the Sea is of no Damage to the Proprietor, for admitting the Multitude of Fiſh to be ſo great as to ſuffice all Mens' Uſe, which is not always true, yet this will abate the Price of the Market for Sale, nor can the Fiſhery be farmed out, if Occaſion be, at ſo good Advantage. For ſo we read, that the Eaſtern Emperor let out to Farm the fiſhing in the *Ægean* Sea near *Byzantium*, at the yearly Rent of Ten Thouſand Crowns, and ſometimes more.

27 *Hen.* VIII. Cap. x.

Niceph. Greg. l. ix.

I am ſenſible, that what I have already ſaid, and Part of what follows, will be thought by ſome to run too much into the Niceties of Law and School, and that it is a Thread ſpun too fine. But without the

Help of ſuch a Thread, how fine ſoever it may ſeem, we ſhall wander without End in a Labyrinth of Phraſes and Forms of Speech, we ſhall loſe Things in the Ambiguity of Words, and miſtake Shadows for Subſtance. He who affirms a Sea-dominion, and by it underſtands any Thing leſs than Property, embraces a Cloud for *Juno*. To ride actual Maſter at Sea, with a well-equipped Fleet, or to have ſuch a Plenty of naval Stores in conſtant Readineſs, as ſhall be ſufficient to anſwer all Occaſions, is not the Dominion of the Sea: This is Power, not Property, though the Property and Honour too, *eſpecially of an Iſland Prince*, are beſt ſecured and ſupported by ſuch Power. Neither is the Honour of the Flag, and of requiring foreign Ships to lower their Sails and do a Reverence, any Part of the Dominion of the Seas, nor has any Relation to it, as I ſhall ſhew preſently. Much leſs do ſuch uſual Expreſſions and Words as theſe, the *Britiſh* Seas, the Sea of *England*, *Our Seas*, import any legal Dominion, but only denote a geographical Deſcription, as *Mare Flandricum*, *Mare Normannicum*, *Mare Aremoricum*, *Mare Aquitanicum*, and a hundred others do. And nothing more uſual, than for Seas to receive their Denominations from the Shores they roll upon; and *Our Seas* are the Seas which roll upon our Shores. But that which occaſions the ordinary and moſt frequent Miſtake, is, the Word *Dominion*, it being equivocal and of a doubtful Senſe, as the *Latin* Words *Imperium* and *Dominium* likewiſe are. For ſometimes they are taken ſtrictly and legally, denoting Property, and thus *Imperium* and *Dominium* are the ſame with public and private Property, according to that of *Seneca*, *Rex omnia poſſidet Imperio, ſinguli Dominio*, The King poſſeſſes all by his Sovereignty, and yet particular Perſons have their private Poſſeſſions too. But then again, ſometimes they are taken looſely and hiſtorically, denoting Power only and Command, as, *Pompeio datum eſt Imperium Maris intra Herculis Columnas*, The *Roman* People gave *Imperium Maris* to *Pompey*, the Command of the Sea, not the Property of it; they commiſſioned him their Admiral or General at Sea, as far as the *Streights Mouth*. Thus ſome of the *Roman* Emperors were intitled *Terræ Mariſq; Domini*, Lords or Deſpots of Sea as well as Land; ſo is *Veſpaſian* called by *Joſephus*: And yet they were but Lords in Power, not in Property; for by the very Text of the *Roman* Law, as it was afterwards compiled by *Juſtinian*, the Sea is accounted as common as the Air, and that by natural Right. And thus ſome Men underſtand no more by Dominion of the Sea, than what our uſual Sea-phraſe imports, to ride Maſter at Sea, or of the Sea. But it is one Thing to be Maſter of it in an hiſtorical and military Senſe, by a Superiority of Power and Command, as the General of a victorious Fleet is, another Thing to be Maſter of it in a legal Senſe, by a poſſeſſory Right, as the true Owner and Proprietor of it is. In like manner we ſay of a General at Land, that he is Maſter of the Field; Maſter of it in Power, not Owner of it in Title. Property is a fixed and permanent Right, a Man may loſe his Seiſin, and yet retain his Title, an Uſurper is no Owner, but Power is flitting and tranſitory, and ſo ſoon as the Poſſeſſion is loſt, the Power is gone. If we confound Power and Property, *Poteſtas & Proprietas*, by a promiſcuous Uſe of the one for the other, the Dominion of the Sea will be like that of our *Corniſhmens'* Ball, at one of their Hurlings; it is his who can catch it, ſo long as he can keep it, till another gets it from him.

Sen. de Benef. l. viii. Cap. 5.

Jure naturali communia ſunt omnium, aer, aqua profluens, & Mare. Inſt. de Rer. Div. Par. I.

Tacit. Annal. 4.

Sueton. Vit. Auguſti.

I ſhall add one Quotation more, out of the *Roman* Story, not wholly unworthy Obſervation: *Tacitus* ſays, *Italiam utroque Mari duæ Claſſes Miſenum apud & Ravennam præſidebant*: Two Fleets guarded *Italy* on both Seas, one at *Miſenum*, the other at *Ravenna*. And *Suetonius* aſcribes the firſt Inſtitution thereof to *Auguſtus*; *Claſſem Miſeni & alteram Ravennæ ad Tutelam ſuperi & inferi Maris collocavit*: The Fleet at *Miſenum* was for the Safety of the upper Sea towards *Gaul* and *Spain* Weſtwards, the other at *Ravenna* was for the Safety of the lower Sea, towards *Epirus* and *Greece* Eaſtwards. Our Kings in *England* have ſo exactly followed this Model of *Auguſtus*, that one would think, they had copied from his Original. Has *Italy* an upper and lower Sea? So has *England*: Our upper Sea is that Northwards betwixt *England* and *Germany*; our lower Sea that South-weſtward betwixt *England* and *France*. Had the *Roman* Emperors their diſtinct Fleets, one for each Sea? Our Kings had their diſtinct Admiralties, one for the North, and another for the South, reckoning North and South from the Mouth of the River *Thames*. Their Fleets were *ad Tutelam Maris*, ſays *Suetonius*, for the Safety of the Sea. Ours *ad Cuſtodiam*, ſay our Records, for the Cuſtody or ſafe keeping it, from being infeſted by Pirates (a Trade frequent in former Ages amongſt the Northern People) and conſequently for ſecuring the Navigation and Commerce of their Subjects and Allies. The two Fleets did *præſidere Italiam*, ſays *Tacitus*, guard *Italy* as a Garriſon Town does a Frontier. Ours were alſo called *Naves Præſidiariæ*, Garriſon-ſhips, to guard the open Shores and Landing-places of a large Iſland, againſt the hoſtile Inſults and Deſcent of Foreigners. They are our moveable Garriſons, our floating Caſtles, fifty of which will defend an Iſland better than five thouſand ſtanding ones built round the Shores.

Of the *Quatuor Maria.*

Beſides the two Admiralties of the North and South, the Books of our municipal Laws make frequent Mention of the *Quatuor Maria*, the four Seas, environing *England* to the Eaſt, Weſt, North, and South. For *England*, as diſtinct from *Scotland*, is a Peninſula, bounded on the North by an Iſthmus of Land and the Northern Sea. And it is obſervable, that to be *infra* or *intra quatuor Maria*, within the four Seas, is, in Conſtruction of our Law, to be within the Kingdom of *England*; and to be *extra quatuor Maria*, out of the four Seas, is equipollent to being out of the Kingdom of *England*. And it is to be further noted, that not only he who is upon the Land, but he alſo who is upon the Sea, is in our Law ſaid to be *intra Mare*, within the Sea, becauſe he has Sea ſtill before him, till he be arrived on the oppoſite Shore, and then, and not till then, he is *extra Mare*, out of the Sea, or beyond it. And when an *Engliſhman* is upon the other Shore, he is then within the Liegeance of another Prince, and therefore out of the Kingdom of *England*; but whilſt upon the Sea, he is within the Liegeance of his own Prince, and therefore within the Kingdom of *England*. For *England* is not always taken ſtrictly for the Land of it, in which Senſe the Iſles of *Jerſey*, *Guernſey*, and *Mann*, are no Part of *England*, but ſometimes comprehenſively for all the Dominions of it, and in legal Underſtanding, he is within the Kingdom of *England*, who is within the local Liegeance of the Crown of *England*.

The Uſe our Law makes of this technical Phraſe, or artificial Form of Speech, *intra* or *extra quatuor Maria*, within or without the four Seas, is this, partly to eſſoign or excuſe Men from Appearance in Courts upon Writs of Summons; for if it can truly be alleged, that the Party ſummoned is *oultre la*

Mer, beyond the Sea, this is accepted as a good Eſſoign, to ſave his Default. But principally to be a certain and regulated Diſtance, within which our Law will admit of ſome Preſumptions, which, beyond that Diſtance, it will not. For Example, if a Huſband be within the four Seas, and his Wife has Iſſue, the Law preſumes the Iſſue legitimate, and will admit of no Proof to baſtardize the Child, becauſe, within ſo little a Diſtance, Man and Wife might clandeſtinely come together, and none can ſafely ſwear they did not; but if the Huſband be out of the four Seas, the Law is otherwiſe. By the Statute of 18 *Edw.* I. a Fine, levied in the Common Bench, concludes him, who is within the four Seas, if he puts not in his Claim within a Year and a Day, becauſe the Law preſumes him near enough, to have timely Notice of ſo ſolemn an Act as a Fine is, and if he ſuffers himſelf to be forecloſed for Want of an Action or Entry, imputes it to his own Neglect. By the Statute of 4 *Hen.* VII. Cap. xxiv. the forementioned Term of a Year and a Day is enlarged to five Years: And what in the Statute of *Edw.* I. is ſaid to be out of the four Seas, is in this of *Hen.* VII. ſaid to be out of the Realm, as equipollent Phraſes, and ſignifying the ſame Thing. And if a Man be out of the Realm, what Day a Fine is levied, though it be a public Act, the Law ſuppoſes him not to have ſufficient Notice of a Thing done within the Realm, and therefore interpoſes an Exception to the ſaving of his Right. And this is all which our Law-books mean, when they ſay, the Sea of *England* is within the Realm of *England*, as in the Place quoted in the Margin. But whether the Sea be ſo within the Realm of *England*, as to be Part of the Territorial Property of it, excluſively of all other Kingdoms and States, that they meddle not with. But to be within the four Seas, and to be within the Realm of *England*, is, as to ſome Purpoſes, in Conſtruction and Intendment of our Law, one and the ſame Thing.

Coke on *Litt.* Sect. 399.

Coke 8 Rep. *Leckford*'s Caſe.

Coke on *Litt.* Sect. 439.

Our Law-books have many other Phraſes and Expreſſions of ſpecial Uſe, but yet do not reach the controverted Point betwixt *England* and other Nations. As where it is ſaid, the Sea is of the Liegeance of the King, and Parcel of his Crown of *England*, *Le Mer eſt del Liegeance del Roy, & Parcel de ſon Corone d'Engleterre.* And in another Place, it is ſaid, the Sea of *England* is within the Liegeance of the King, as of his Crown of *England*. As to the King's Liegeance, it ſtands thus in our Law; all Natives, or natural-born Subjects, or Perſons born within the King's Liegeance (for theſe do tantamount) whereſoever they are, whether at Sea or Land, in *England* or any foreign Country, *quocunque ſub Axe*, they ſtill owe a native, or natural and inſeparable Faith and Allegiance to their Liege-Lord the King. Whilſt in *England*, or upon the Seas, beſides their natural Liegeance, they are within the local Liegeance of their own Sovereign, and under his immediate Protection and Defence. But when within the Dominions of a foreign Prince, though, as to Perſons, they ſtill retain Faith to their natural Sovereign; yet, as to Place, they are out of his actual Obedience, and within the Protection of another, which draws Subjection along with it, and makes them the temporary local Subjects of that other Prince. And as this is the Caſe of *Engliſhmen* abroad, ſo is it of Aliens here in *England*. A Child born at Sea, in any of the King's Ships, or other *Engliſh* Veſſel, navigated by *Engliſh* Maſter and Crew, is a Native; if born upon the Land of *England*, in any Fort or Town poſſeſſed by an Enemy, it is born out of the King's Liegeance, and therefore an Alien. But whereas it is ſaid, the Sea is within the Liegeance of the Crown of *England*, this is to be underſtood extenſively of the Liegeance of the Crown of *England*, that it reaches to Sea as well as Land, not excluſively of the Liegeance of other Crowns, as if no Crown had Liegeance at Sea, but that of *England* only; or, as if no Foreigner, aboard his own Veſſel, within any the four Seas, were within the Liegeance of his own natural Sovereign, for this is manifeſtly repugnant to daily Fact and Experience, as we ſhall ſee anon, when I come to the Queſtion of Fact.

Coke 5 Rep. Sir *Henry Conſtable*'s Caſe, *fol.* 108. *Coke* on *Litt.* Sect. 439.

Coke 7 Rep. *Calvin*'s Caſe, *fol.* 6.

As to that other Expreſſion of the Seas being Parcel of the Crown of *England*, the forementioned Author, in the Place before cited, expounds his Meaning to be, that it is Parcel of the Inheritance of the Crown of *England*. Thus *Jetſam*, *Flotſam*, and *Lagan*, appertain to the King by his Prerogative. Goods thrown over-board, to lighten a Ship in Diſtreſs by Weather, are called *Jetſam*; Goods of a wrecked Ship, floating upon the Waters, are called *Flotſam*; Goods ſunk, with a Cork or Buoy tied to them, to direct to the Place, are called *Lagan* or *Ligan*: All theſe Goods, if the Ship periſhes, and no Owner can be proved, belong to the King in Right of his Crown, as Treaſure *trove* and *eſtrais* at Land do, and all Derelicts, whoſe Property is loſt, the Law adjudges them to the King, as Owner paramount. Alſo Royal Fiſhes, as Whales, Sturgeons, *&c.* taken by the King's Subjects on the Seas of *England*, appertain to the King by his Prerogative, but no Mention made in any of our Law-books, of an appropriate Fiſhing, excluſive of the People and Subjects of other Princes and States.

Coke in *Conſtable*'s Caſe, *ut ſupra.*

Coke Rep. 7. Caſe *de Swans*, fol. 16.

I have mentioned theſe Paſſages, which occur in the Books of our municipal Laws, becauſe, though of excellent Uſe and undeniable Verity, when fitly applied to what they are deſigned and intended, yet if miſapplied to the Caſe of the Dominion of the four Seas, as it ſtands betwixt *England* and other Nations, they may and do occaſion Error and Miſtake. Thoſe Books handle Caſes betwixt Subject and Subject, and ſometimes betwixt Crown and Subject, but not betwixt Crown and Crown, I mean betwixt *England* and other Kingdoms. Matters of this Nature muſt be looked for in the public Treaties and Tranſactions of State betwixt our Kings and foreign Princes, or in a long peaceable Poſſeſſion, which we call Preſcription; and theſe I ſhall examine by-and-by.

Thus far I have endeavoured to clear the true Notion of Sea-dominion, neither extending it to impeach the free Navigation and Commerce of peaceable Traders, due to them of natural Right, and by the Law of Nations, notwithſtanding ſuch Dominion. Nor yet making it a verbal Notion only conſiſting in Words and Forms of Speech, without any real Fruit and Effect, but have inſtanced in three weighty Things, as the inſeparable Incidents of it. I ſhould now proceed to the Matter of Fact, but foraſmuch as ſome, without Examination, take it for granted, that the accuſtomed Salutation at Sea by the Flag and Topſail, is an Act of Recognition and Acknowledgment of the Sovereign Dominion of the Sea inherent in that Prince, to whom ſuch Salutation is performed, I ſhall crave Leave to examine this in the firſt Place.

CHAP.

CHAP. III.

What the Salutation at Sea by the Flag and Topſail ſignifies, and whether it has any Relation to the Dominion of it.

THE Salutation at Sea by the Flag and Topſail, was never covenanted in any the public Treaties, betwixt *England* and other Nations, but in thoſe with the *United Netherlands* only. And never in any of them till the Year 1654. And I am inclinable to believe, that there were particular Reaſons why it was then covenanted; partly, becauſe at that Time the Royal Dignity of *England* was debaſed and diſguiſed under the obſcurer Name of a Protectorate; and they who had not refuſed it to an anciently crowned Head, might make ſome Scruple to do it to a new Republic. And partly, becauſe that War began upon a Diſpute for the Honour of the Flag. I cannot ſay it was the ſole Cauſe of the War, but it was the firſt Occaſion of it. For whilſt *Blake* was in *Dover* Road with the *Engliſh* Fleet, *Tromp* with double the Number of Ships, but not equal in Goodneſs, ſtood over from the Coaſt of *Calais* directly towards him, and came up cloſe with him, with his Flag aloft, Jacks and Pendants flying, and all the Bravery he could diſplay. *Blake* was too ſtout to brook the Affront, and ſo in plain *Engliſh* the two Generals fell together by the Ears, neither of them knowing how ſoon he might be called to a ſevere Account by his Superiors, for what he had done. But they juſtified themſelves, by caſting the Blame one upon the other, and thus the Servants Quarrel ſoon became the Maſters, and both Nations engaged in a fierce War: Which ended in 1654, and in the 13th Article of the Treaty of Peace then concluded, to prevent the like Diſputes for the future, it was covenanted, *That the Ships of the United Provinces, as well thoſe fitted for War, as others, which ſhould meet in the Britiſh Seas any the Ships of War of England, ſhould ſtrike their Flag, and lower their Topſail, in ſuch Manner as had been any Time practiſed before, under any former Government.* But whereas ſome think, that this was prejudicial to *England*, to take that by Covenant, which they held before by Preſcription; I am not ſo clear in that Opinion. For what ſtood before upon the Foot of Courteſy, or of Cuſtom at the beſt, was now confirmed by a ſupervening Contract, and paſſed into a national Law, founded upon mutual Conſent. And from the Treaty in 1654, it paſſed into that made at *Weſtminſter* by his late Majeſty in 1662; and from thence into that made at *Breda* in 1667, in which, as in the former, the Flag and Topſail are expreſsly covenanted for in the *Britiſh* Seas. But by a later Treaty, *viz.* 1673, inſtead of the *Britiſh* Seas, there is an Enlargement to the Seas, betwixt *Cape Finiſterre*, to the middle Point of the Land *Van Staten* in *Norway*.

May 1652.

Here it is to be obſerved, that in the forementioned Treaties, the Salutation by the Flag and Topſail is no where ſaid to be an Acknowledgment of the Sovereignty of the Crown of *England* in and over the *Britiſh* Seas, nor ſo much as intimated or implied; but, on the contrary, as it were on Purpoſe to prevent ſuch a Conſtruction, it is expreſly ſaid to be a Reſpect. The Words of the Treaty 1673 are theſe: *In Acknowledgment of the King of Great-Britain's Right to have his Flag reſpected, they,* i. e. *the Dutch, ſhall ſtrike their Flag, and lower their Topſail, in the ſame Manner, and with the ſame Reſpect, as hath, at any Time, or in any Place, been formerly practiſed.* It is true, it has been offered at to make this Reſpect paſs into an Acknowledgment of Sovereignty, but it was but an Offer, and ſo vaniſhed; for in the Project or Concept of 27 Articles, delivered in the Year 1653, by the then *Engliſh* Commiſſioners to the *Dutch* Ambaſſadors, in the 15th Article it was thus propoſed: *That the Dutch Ships, both Men of War and Merchants, (beſides ſtriking the Flag) ſhould ſuffer themſelves to be viſited, if required, and ſhould perform all due Offices of Honour and Acknowledgment to England, to whom the Dominion and Sovereignty of the Britiſh Seas of Right appertained.* But this Article was rejected by the *Dutch*, as were ſeveral other Propoſals of a high Nature; for it was then urged, and for ſome Time inſiſted on, that there ſhould be a *Coalition* of *England*, and the United Provinces, into one and the ſame Republic; not an Union only, but an Adunation, not a mere Coition into a ſtricter Bond and League of Friendſhip, but a Coalition of both into one Government. But this was rejected too, as impracticable.

If the Queſtion were only concerning the Antiquity of this Ceremony, how long it has been practiſed amongſt theſe *European* Nations, (for it had a Time when it firſt began, and it does not obtain univerſally) we have a Record in our Admiralty, which would be pertinent to this Purpoſe. It is an Edict or Proclamation, publiſhed by King *John*, at *Haſtings* in *Suſſex*, in the ſecond Year of his Reign, near 500 Years ſince, and is tranſcribed by Mr. *Selden* out of the Records of the Admiralty, to the following Purport: *That if any Ships or Veſſels, laden or unladen, refuſed to lower their Sails at the Command of the King's Lieutenant or Admiral, or of his Lieutenant, then to be compelled to do it by fighting them, and, if taken, their Ships and Goods to be confiſcated*; as may be ſeen more at large in the Place noted in the Margin. But the Proclamation ſays not, that this lowering of their Sails was to be done, as an Acknowledgment of the King's Dominion in the Weſtern Channel, to which Sea it eſpecially relates; and yet none could have better required it than King *John*, for he was at that Time in actual Poſſeſſion both of *England* and *Normandy*, and conſequently was actual Lord of both Shores, and might have reckoned the Channel as an Appendant and Acceſſion to the Land, and to have followed it as the Acceſſory does the Principal; as he is Lord of the intermediate River, who is Lord of both the Banks. But as this Proclamation expreſſes no ſuch Thing, ſo neither does the penning of it ſeem to incline that Way: For it mentions not Ships of War, who, as ſuch, ought the rather to be obliged to make ſuch Acknowledgment, as being moſt likely to diſpute it; but only Ships laden or unladen, *Nefs ou Veſſeaulx charges ou voide*, referring to Merchants and Traders, be their Ships light or freighted; and theſe Merchant-men are to do it, not at the Command of every-body, but *au Commandement du Lieutenant du Roy, ou de l'Admiral du Roy, ou ſon Lieutenant*, at the Command of the King's Lieutenant, or the King's Admiral, or his Lieutenant, intimating a perſonal Reſpect due to their Rank and Quality, eſpecially from ſimple Traders.

Mare Clauſum, lib. ii. cap. 26.

However, it is certain, that this honorary Reſpect or Civility, call it what you will, is no natural Expreſſion of a Subjection to a Sovereign; for it is not founded in Nature, but in Inſtitution, and is a

Practice peculiar to the Weſtern Nations; and the Modes of Reſpect are ſo various in different Countries, that what in one is a Civility, in another is a Rudeneſs. And as it is no natural Expreſſion of Subjection, ſo neither is it a neceſſary one, as it muſt neceſſarily ſignify that or nothing; for lowering the Flag or Sails, is but like uncovering the Head, by vailing the Hat or Bonnet *, which, amongſt us, is uſed as a Token of Subjection to our King, of Reſpect to our Superiors, of Civility to our Equals, of Courteſy to our Inferiors. Thus we ſee one and the ſame ſpecific Act of uncovering the Head, as it relates to Perſons of different Orders and Degrees, admits of divers Significations. Some of our Sea-captains, though irregularly enough, and for Want of explicit Orders, have required of the *Dutch* the Honour of the Flag and Topſail in the *Mediterranean* and *Baltic*, where the Crown of *England* never pretended Sovereignty. And as in the forementioned Treatiſe of 1673, it is particularly named a Reſpect, ſo it is covenanted to be done, not only within the *Britiſh* Seas, but every-where betwixt the Capes, *Finiſterre* in *Spain*, and *Staten* in *Norway*, beyond the Limits of the Sea-Sovereignty of *England*, and conſequently has no Relation to it. Beſides, this Honour to the King's Flag is required from his own Subjects, but it is needleſs to require from them an Acknowledgment of Sovereignty, to whoſe Benefit it redounds; the Import is, that Foreigners would acknowlege it, to whoſe Profit it is oppoſed.

Well then, if this Ceremony does not relate to an Acknowlegement of a Sovereignty in the Sea, what is it that it relates to? And what is the true Import and Signification of it? I anſwer, it imports theſe two Things: 1. It is *Cultus Superioris*, it is a Reverence or Reſpect performed to a Perſon of ſuperior Quality and Degree. 2. It is *Symbolum Pacis & Amicitiæ*, it is a Sign or ſymbolical Expreſſion of Peace and Friendſhip. Sometimes it ſignifies both theſe together, and ſometimes but one of them, according to the different Degrees of the Perſons performing it; but it always ſignifies one of them, and never any Thing more. The *Dutch*, and other ſmaller Republics, perform it, both as a Reſpect to the crowned Head of *England*, and as a Salutation of Peace and Friendſhip alſo. But crowned Heads cannot perform it as to one of a ſuperior Order, becauſe they are in a Parity and Equality of Degree; but they do it upon the latter Account only, as it is an Expreſſion of Peace and Amity. The *Dutch* and others do not, by the Flag and Topſail, recogniſe the King of *England* as Sovereign of the four Seas, nor acknowledge themſelves thereby his local Subjects, and their Perſons, Ships, and Goods, to be under his immediate Juriſdiction and Protection, whilſt in and upon thoſe Seas; but they acknowledge him as pre-eminent in Order and Quality, not as Sovereign over them, but as ſuperior to them in Dignity and Degree. Were I to expreſs it in *Latin*, I would do it by that old *Roman* Phraſe of *Comiter colere*, or *Obſervare Majeſtatem*, they pay Honour or Reſpect to the Majeſty of a crowned Iſland. And as to the crowned Heads, though they cannot, as I ſaid before, pay Reſpect to a Superior, becauſe of the Parity of their Degree; yet, as to the Sea-ſalutation by the Flag and Topſail, there is a Peculiarity on the Part of *England*, even in Reference to them. A foreign King, when Ships of War of another Nation approach his Havens, and come within Reach of his Caſtles, will expect, and juſtly may, that the Comer ſhould ſalute him firſt; the Gueſt or Stranger gives the firſt Salute to the Maſter of the Houſe, who thereupon re-ſalutes him, and bids him welcome. And what does this Salutation ſignify, be it by lowering Flag and Topſail, or by firing Guns, but that they are come armed before his Doors only as Friends, and without Intention of doing him Hurt? But the Peculiarity on the Part of *England* conſiſts in this; *England* is an Iſland, whoſe Frontier is the Sea, whoſe Forts and Caſtles are the Ships of the Royal Navy, which bear Analogy and Proportion to the Frontier Towns and fortified Places of inland Dominions; and therefore when met with in the Seas of *England* by the Ships of War belonging to any other crowned Head, theſe latter ought not to approach the Ships of War of *England*, who are in their Stations upon their Guard and Duty, with a Flag aloft in a Poſture of Challenge and Defiance; but do, in their Courſe and Paſſage, call to the Guard-ſhips of *England*, to tell them, *They are Friends*; and what they cannot do by Words at that Diſtance, they do by mute Signs, by ſtriking their Flag or Topſail, which in Effect expreſs thoſe Words. And when they ſalute thoſe Guarders, by diſcharging their Guns, it is, in Effect, to tell them, they were not charged againſt them; and though they ſteer their Courſe along the Coaſts of an open Iſland, yet they deſign no Hoſtility. This is no Diminution to the Majeſty of any Monarch, how great ſoever, and were the Salutation thus ſtated with crowned Heads, it would be leſs controverted, and the Crown of *England* loſe nothing by it neither.

But if the *Dutch* perform this Ceremony, as a Reſpect to a crowned Head, without Relation to a Sea-ſovereignty, why not to *France* as well as *England?* ſince they are equally crowned Heads, and one has one Bank of the Channel, and the other has the other: And what ſhall then become of the peculiar Prerogative of the Crown of *England?* This Peculiarity on the Part of *England*, as an Iſland whoſe principal Defence is at Sea, I have touched already. But as to the *Dutch* performing equal Reſpect at Sea to the Crown of *France*, as to that of *England*, I do not doubt, but they will do it when required thereto. And what Remedy is there againſt it, unleſs by Contract? for though I may not be covered when I will, yet I may put off my Hat and be uncovered when and to whom I pleaſe. The *Dutch* ſteer their Courſe by the Pole-ſtar of Trade, not by the Punctilios of Honour. And were this Conſtruction put upon their ſtriking their Flag to the Flag of *England*, that it is a Recognition of a Sea-ſovereignty; they would do the ſame to *France* the rather, and not as a Thing impoſed, but upon Choice, thereby to diſpropriate and lay common, what *England* would incloſe as her Property. Nor would it be a new
Thing for *France* to ſet up for the Honour of the Flag and Topſail, for it was expreſsly ſtipulated in *Leo ab Aitz.* Hiſt.
the 12th Article of the League offenſive and defenſive, made in the Year 1635, betwixt *Lewis* XIII. p. 177.
and the States General, that upon Occaſion of any Conjunction of the *French* and *Dutch* Fleets, *The* Dutch *Admiral ſhould firſt ſalute the* French *with Flag and Topſail, and fire his Guns, in ſuch Manner as had been practiſed towards the King of* Great-Britain *upon the like Occaſion*. And *Henry* II. and *Henry* III. of *Ludov. Servin.*
France, did both of them publiſh their Royal Edicts, one in the Year 1555, the other in 1580, com- *Placit.* II. Tom. 2.

---

* It is ſo called in the Journal of King *Edward* VI. wrote with his own Hand. The Words are theſe: "The *Flemings* Men of "War would have paſſed our Ships without vailing Bonnet, which they ſeeing, ſhot at them, and drove them at length to vail "Bonnet." See Page 11 of King *Edward's* Journal, in the ſecond Part of Doctor *Burnet's* Hiſtory of the Reformation.

manding all foreign Ships indefinitely (I ſuppoſe Traders) to lower their Topſails to the Ships of War of *France*, upon Pain of Seizure and Confiſcation; and ſome *Hamburghers* were forcibly taken, for not conforming to thoſe Edicts. But may not the preſent *French* King ſay, what *Cæſar* once did, *Sylla fecit, non ipſe faciam?* Did the two *Henrys* do this in the faint Times of their languiſhing Reigns, and ſhall not I do it, who can cover with Fleets of War the three Seas, which cover the Coaſts of *France?* I have read ſomewhere in the *French* Memoirs, I think in thoſe of the Duke *de Sully*, that the whole naval Strength of the Crown of *France*, in the Beginning of *Henry* IV. was about half a Dozen Ships of War, ſuch as they were, at *Breſt* and *Rochel*, and about a Score of Gallies in the *Mediterranean*. But this laſt-named great King dreſſed a new Plan of the *French* Monarchy, and drew out the Lines of it larger than before; and though his great Deſign was interrupted by an immature Death, and by the ſucceeding Minority of his Son, yet the great Cardinal, I mean *Richlieu*, reſumed it again.. He firſt taught *France*, that the *French Flower-de-Luces* could grow at Sea as well as Land. He decked and adorned the lofty Sterns of his new-built Ships with this prophetic Inſcription——*Florent quoque Lilia Ponto.*

Having done with the Sea-ſalutation, I come to the fourth general Head, under which,

CHAP. IV.

The whole Matter of Fact between the Crown of England and foreign Princes and States, in the ſeveral Incidents of Sea-Dominion, is diſtinctly examined and impartially reported.

I Am now upon a Queſtion of Fact only, how far this Dominion and Sovereignty in the Seas has been acknowledged, as a Right inherent in the Crown of *England*, by any of the neighbouring Nations; either expreſsly in public Treaties and Tranſactions of State, or impliedly, by an immemorial, peaceable, and uninterrupted Poſſeſſion, commonly called Preſcription. This I call the Queſtion of Fact, and diſtinguiſh it from that of Right, to which it is ſubſequent. For a Right to any Thing, in one, is antecedent to the Acknowledgment of it by another, and though his Non-acknowledgment may render it controverted, yet it may be a juſt Right and legal Claim notwithſtanding. The Right of the Crown of *England* to the Dominion of the Seas I meddle not with, it ſtands, as it did, unmoveable, like *Terminus* in the Capitol with a *Cedo Nulli*, it gives Place to none. But the Enquiry is, whether in Fact it has been conſented to by foreign Nations; by which Teſt, we ſhall be able to diſcover, whether the Crown of *England* has loſt any Thing in Matter of Sea-ſovereignty, which it formerly poſſeſſed. In order to which, I ſhall diſtinctly handle and examine the three great and inſeparable Incidents of the Sovereignty, which I before named.

1. The Excluſion of foreign Men of War from paſſing upon any the Seas of *England*, without ſpecial Licence, for that Purpoſe, firſt obtained.

2. The ſole marine Juriſdiction within thoſe Seas.

3. The appropriate Fiſhery.

Of the Paſſage of foreign Ships equipped for War over the Seas of *England*.

I begin with the firſt, and the Enquiry is, Whether any ſovereign Prince or State, having Occaſion to enter upon any the Seas of *England*, with Men of War, either in intire Fleets, or as Convoys to Merchants, have firſt aſked Leave ſo to do of the King of *England*, as the ſupreme Lord of the Territory.

I have often met with a traditional Story, both in Diſcourſe and in printed Pamphlets; that Queen *Elizabeth* having Intelligence that *Henry* IV. of *France* had a Deſign to increaſe the naval Strength of his Kingdom, and to equip a conſiderable Fleet of War, not only for the *Mediterranean*, but for the Seas alſo toward *England*, ſhe ſent to bid him deſiſt from it. That the Queen might requeſt him not to put out upon theſe Seas with an unuſual Fleet, as that which might occaſion Jealouſy in her Subjects, and oblige her to an extraordinary Expence in arming proportionably, and conſequently tend to weaken the Amity and good Aſſurance betwixt the two Crowns; I ſay, that ſhe might do this, for I do not find that ſhe did it, is neither morally impoſſible, nor wholly diſagreeable to the Practice amongſt Princes. But that ſhe did, *pro Jure*, interdict and forbid him ſo doing, as an Intrenchment and Invaſion of her Right, by entering with an armed Force upon the Territories of her Crown, without her Leave; for this I ſhall ſuſpend my Belief till better Vouchers be produced. It is too common amongſt Men, firſt, to form their Opinions, and then to ſeek their Proofs; and ſome, rather than not find them, will deviſe them.

There is another current Story of the ſame Alloy; that Queen *Elizabeth* ſeized in the Bay of *Caſcais* in *Portugal*, ſixty laden Ships belonging to the *Hanſe-Towns* of *Germany*, and afterwards confiſcated both Ships and Goods; *For having preſumptuouſly paſſed over her Seas, without firſt obtaining her Royal Permiſſion.* In this, ſeveral Miſtakes are complicated together, one in Law and two in Fact. That in Law is this; ſuppoſing the Seas to have been univerſally acknowledged as the Queen's undoubted Right, yet ought not the *Hanſeatics*, who were Friends, and peaceable Traders, and purſuing their lawful Occaſions, to have been confiſcated, for not aſking Leave of Paſſage over theſe Seas, had there been nothing more in the Caſe, becauſe they needed not in Law ſo to have done. No more than a Market-man needs aſk Leave of the Owner to paſs his Field, over which the Market-path lies. The two Miſtakes in Fact are theſe.

Cambden ad Annum 1589. *Thuan. Hiſt. lib.* xcv.

1. The ſaid ſixty Sail of Ships did not in Fact paſs the Seas of *England*, and therefore could not be confiſcated upon that Account. Mr. *Cambden*, our faithful Annaliſt, ſays expreſsly, and ſo does *Thuanus*

too, that they paſſed on the North of *Scotland*, by the *Orcades*, *Hebrides*, and great Weſtern Ocean on the Backſide of *Ireland*, a long and dangerous Paſſage, to avoid being intercepted in the Channel by the Queen's Ships.

2. The ſole Reaſon why they were confiſcated was this; becauſe they carried Goods of *Contrabanda*, prohibited Goods, *viz.* Corn, which at that Time *Spain* wanted, and naval Proviſions to the Relief of an Enemy, who at that Time was preparing a new Fleet for the Invaſion of *England*, in Revenge of the Diſgrace he had received the Year before, *viz.* in 1588. And this they did contrary to the Queen's Proclamation and monitory Letters to the *Hanſe-Towns*, whereby ſhe forbad them to ſupply *Spain*, her declared Enemy, with ſuch Proviſions, under the Penalty of forfeiting Ships and Goods. Thus the *Dutch*, in the Year 1652, when by their Intereſt and Influence in the Court of *Denmark*, they had cauſed an *Engliſh* Fleet of above twenty Merchant-men, laden with Pitch, Tar, Flax, Hemp, and other naval Stores, to be arreſted in the *Sound*, ſuppoſing that *England*, with whom they were then in War, would be diſtreſſed for Want of ſuch Proviſions, they publiſhed a Placart, forbidding all in general to import into *England* any the aforeſaid Materials, upon Pain of Confiſcation thereof, as being a Relief to an Enemy, in Things they particularly wanted for proſecuting the War againſt them. I inquire not here, *Quo Jure*, by what Right, the *Dutch* did this; and whether it was not a Violation of the free Commerce of neutral Nations. But I only inſtance in the Fact, as parallel with what the Queen did: Nay, the States did far more than what the Queen did, comes to; for they, in the Year 1599, almoſt in the Infancy of their Republic, publiſhed a Placart, forbidding all Nations any Commerce with *Spain*, not in this or that prohibited Commodity, but in all Goods and Merchandiſes whatſoever. *Vetant Populos quoſcuvque ullos Commeatus Reſve alias in Hiſpaniam ferre.* They are the very Words of *Grotius*, in his *Belgic Annals*, the eighth Book: This by the Way only.

Grot. Hiſt. de Pelus Belg. lib. viii. *Pag.* 372. *Edit. Amſtel.*

If we conſult the public Treaties, which have been betwixt *England* and other Sovereigns, concerning Ships of War paſſing theſe Seas, we ſhall find the Manner to have been as followeth. The uſual Covenants are, and have been, that the Ships of War, of either Side, may freely come into the Roads, Havens, and Rivers, each of other, provided they be not in ſuch Number as may occaſion Suſpicion; and therefore the Number is aſcertained, and not to be exceeded, unleſs to avoid imminent Danger, and in ſuch Caſe, Notice to be given thereof. For Example: In the Treaty concluded at *Madrid*, in the Year 1630, betwixt *Charles* I. of *England*, and *Philip* IV. of *Spain*, which Treaty was but a Renewal of the former made with King *James*, in the Year 1604, it is, in the 8th Article, agreed, *That it ſhall be lawful to have Acceſs unto each others Ports with Ships of War, whether they ſhall arrive there, either by Force of Tempeſt, or for neceſſary Repairs, or for Proviſion of Victuals; ſo they exceed not eight, when they come of their own Accord, nor ſtay longer than they ſhall have Cauſe. And when any greater Number ſhall have Occaſion of Acceſs, they not to enter the Port, without the Privity or Conſent of the King.* This is the Form of all the Treaties; and Articles, like to this, have been agreed betwixt *England* and *France*, and *England* and *Holland*, but they are always reciprocal; and as their Ships of War are reſtrained from Acceſs to the *Engliſh* Ports, ſo are the *Engliſh* from Acceſs to theirs in equal Manner. And it is to be noted, that the Reſtraint is only from Acceſs to each others Ports, but never any Reſtraint of foreign Ships of War from entering, in what Number they pleaſe, the Seas of *England*. Thus in the Year 1639, which was but nine Years after the Treaty aforementioned at *Madrid*, a *Spaniſh* Fleet, of above ſixty Sail, equipped for War, entered the Weſtern Channel, without Leave firſt aſked, bound for *Oſtend*, to ſupply the *Spaniſh Netherlands* with Men, Munition, and other Neceſſaries, and paſſed the Channel to the Height of *Dover*. And the *Dutch* Fleet put out in like Manner upon the North-Eaſt Sea, and fought the *Spaniſh* Fleet in the *Downs*. It is true, that Sir *John Pennington*, who then commanded the *Engliſh* Guard, endeavoured to hinder them from fighting ſo near the Ports, to the Diſturbance of the Security and Protection of them, and troubling the Commerce and Intercourſe of the King's Lieges and Allies. But no Complaint made, either then or afterwards, of the two Fleets of War entering the Seas aforeſaid, Parcel of the Dominion and Territory of the Crown of *England*, without a ſpecial Licence firſt aſked and obtained. And it would be Time miſ-ſpent, to recount how often, either *Spaniards*, *French*, or *Dutch*, have entered theſe Seas with armed Fleets and Convoys, as their Occaſions obliged them, freely, without Leave and without Controul. I ſpeak not here of the private Notices and Intimations, which one Prince may, in friendly Manner, give another, to ſatisfy him of the Reaſon of any extraordinary military Preparations, and of the Clearneſs of his Intentions towards him: But of a formal previous Leave to be aſked and obtained by a foreign Prince or State, before they put out to Sea, upon the maritime Territory of the Crown of *England*, in a warlike Equipage.

In the Year 1652, the States General gave public Notice, by their Ambaſſadors here in *England*, that they had reſolved to fit out to Sea an extraordinary Fleet of one hundred and fifty Men of War, beſides thoſe in preſent Service, for the Security and Preſervation of their Navigation and Commerce. They did not aſk Leave to do it, but firſt reſolved upon it, and then gave Notice, and they pretended this Notice was an Argument of their Sincerity and good Will, in order to prevent all Miſunderſtandings, and ſiniſter Interpretations. But they in *England* underſtood it otherwiſe, and reſented it as a Bravado and Inſult.

I Paſs now to the ſecond Incident of the Sovereignty, to examine the Matter of Fact as to that, *viz.* The Marine Juriſdiction.

Of the Marine Juriſdiction, and the Laws of *Oleron*.

It is commonly affirmed by *Engliſh* Writers, that our King *Richard* I. (the *French* give a different Account) did, in his Return from the Holy Land, make and declare certain Marine Laws, for the better Regulation of Commerce, which, from the Place of their firſt Publication, were called the Laws of *Oleron*: A ſmall Iſland, ſituate in the Bay of *Aquitain*, and a Member of that great and wealthy Dutchy, which was in the actual Poſſeſſion of King *Richard*, as his maternal Inheritance; for it came to his Father

Vide les Us & Couſtumes de la Mer, printed at *Bourdeaux* 1661.

Father *Henry* II. by Marriage with *Eleanor*, Daughter and Heir of *William* Duke of *Aquitain*. And by the Way it may be noted, that this Dutchy, either in whole or Part, continued in the Poſſeſſion of the Kings of *England* by ten Deſcents, to the 32d of *Henry* VI. near three hundred Years, though that of *Normandy* continued but five Deſcents, and ended in King *John*. But whether theſe Laws were publiſhed, as aforeſaid, by King *Richard*, or whether about ſixty Years after, as ſome printed Editions would have them, is not an Inquiry pertinent to this Place. Be it admitted, thoſe Laws were publiſhed by King *Richard*, who was actual Duke both of *Aquitain* and *Normandy*, and in Right of the latter, Lord on both Sides the *Engliſh* Channel. The great Intercourſe betwixt his *Engliſh* and *French* Subjects, and thoſe of his Allies, required a certain Rule of Sea-laws for the more ſpeedy and impartial Determination of all Controverſies, which might occaſionally ariſe. Theſe Laws of *Oleron*, as to the Main of them, are but a Tranſcript of the old *Rhodian* Laws, with ſome new Additions and Amendments, accommodated to the Practice of that Age, and the Cuſtoms of the Weſtern Nations; who thereupon might readily conform to them, as to a common Standard and Meaſure, like a Law of Nations, for the more equal Diſtribution of Juſtice amongſt the People of different Governments. But to infer from hence an univerſal Monarchy at Sea, and that King *Richard*, in Right of his imperial Crown of *England*, and ducal Crowns of *Normandy* and *Aquitain*, did, as ſole or ſupreme Legiſlator for the Marine, authoritatively impoſe Sea-laws upon the People and Subjects of other Nations, is but a ſtrained Inference. The *Romans* were far enough from yielding a Sea-ſovereignty to the little Republic of *Rhodes*, and yet were ſo well ſatisfied with the Equity of their Sea-laws, that they not only conformed to them, but incorporated them into the Body of their Digeſt. And as the *Rhodian* Laws obtained in the *Mediterranean*, and the Laws of *Oleron* in the Weſtern and *Engliſh* Seas: So the Laws of *Wiſbuy* (a Town ſituate upon the little Iſle of *Gotland*, in the Eaſtern Part of the *Baltic*, formerly under *Denmark*, now under the Crown of *Sweden*) called from thence *Leges Wiſbuicenſes*, were received by the general Conſent of the Northern Traders, as a common Meaſure for all nautic Affairs, to the Northwards of the *Rhine*, and throughout the whole *Baltic*.

Lib. 11. *Digeſt.*

Peck in Comment. ad Tit. Dig. & Cod. de Re nautica, p. 191.

That the Sea is within the Juriſdiction of the King of *England*, is a Matter unqueſtionable, not at Home only, but amongſt all Nations. His Admiral has, and ever had, through a long Series of Ages, the Conuſance of all Contracts, Pleas, and Quarrels made upon the Sea, out of the Body of any County of *England*. Which Power is enlarged by the Statute of the 15th of *Richard* II. Cap. iii. to Death, and Mayhem upon great Ships in the main Stream of great Rivers. And by the Statute of 28 *Henry* VIII. Cap. 15. a Court of Commiſſion may be held under the great Seal, *Coram Admirallo*, &c. to hear and determine all Treaſons, Felonies, Robberies, *&c.* done or committed upon the Sea. But then it is evident and undeniable alſo, that the neighbouring Kingdoms and States, who border upon the Sea, have their diſtinct Admiralties likewiſe, and have long ſince had, where their Subjects and People receive final Sentence in all maritime Cauſes, without Exception of any Seas, or without Appeal to the Admiralty of *England*, as the laſt Reſort, or as having ſupreme Conuſance of all Things done and committed in and upon the *Britiſh* Seas. If a *French* or *Dutch* Veſſel take a Pirate of what Nation ſoever, who has committed a Robbery upon the *Engliſh* Seas, they do not remit him to the Admiralty of *England*, as to the ſole Tribunal of the Place, where the Fact was done, to receive Sentence there; but they carry him before their own Judicatories, and judge him as an Enemy of Mankind by the Law of Nations. If one Foreigner does any Injury to another, be it Fraud or Violence, upon the *Britiſh* Seas, the Party injured makes not his Complaint to the Admiralty of *England*, as the proper Court, and as having the ſole juridical Conuſance of his Plea, but reſorts to the Juriſdiction of his own Sovereign, or to that of the Sovereign of the Wrong-doer, and there impleads him, and prays for Juſtice. If a *Frenchman* kill a *Frenchman*, one Alien another, upon the Land of *England*, the Fact is committed within the local Liegeance of the King of *England*, and againſt the Peace and Protection of his Crown, and therefore triable before his Courts; but if two *Engliſhmen* be under the Pay and Service of the *French* King, and one of them kill the other, aboard a *French* Man of War, within the four Seas, the *French* King's Judicature will have the Conuſance of the Crime, as done within his Liegeance, and againſt the Peace and Protection of his Crown.

Thus ſtands the Matter of Fact, as to the marine Juriſdiction, and thus it has been for many Ages; but yet there is an ancient Precedent, which ſeems to impugn ſomething that has been ſaid, and not to take Notice of it, were to report Things unfaithfully; and therefore I crave Leave to examine it. It is a Bundle or Roll in the *Tower* of *London*, ſuperſcribed *De Superioritate Maris* Angliæ *& Jure Officii Admiralitatis in eodem:* Record, I can ſcarce call it, for it is not any judicial Act or Monument of a Court of Record; and it may be read, as it is tranſcribed at large by Lord Chief Juſtice *Coke*, and by Mr. *Selden*, who highly inſiſts upon it.

Co. Inſtit. 4 *Part. Cap.* 22. the Admiralty. *Seld. Mar. Clauſ. lib.* ii. *Cap.* 27.

I ſhall abbreviate it truly; and in ſhort the Caſe was this.

Of the Roll in the *Tower*, *De Superioritate Maris*, *&c.*

A League had been concluded betwixt *Edward* I. of *England*, and *Philip the Fair* of *France*, in which it was covenanted, that each ſhould defend the other's Rights, and neither relieve the other's Enemy. After this, a War enſued betwixt *Philip* and the Earl of *Flanders*, whom *Edward* ſecretly favoured. Whereupon *Reyner Grimbald*, who was General at Sea for the King of *France*, took ſeveral Ships both of *England*, and of other Nations trading to *Flanders*, and confiſcated Ships and Goods, and impriſoned Perſons, as carrying Relief to an Enemy. Upon which, and other Complaints, Commiſſioners were appointed by both Kings, called in the Roll, writ in *Norman French*, *Auditours Deputez per les Roys d'Engleterre & de France a redreſſer les Damages faits*. The Plaintiffs, who were of ſeveral Nations, appear by their Procurators or Attorneys before the ſaid Commiſſioners, and join altogether in one Bill or Libel, as being all involved in one common Cauſe. In the Rehearſal of the ſaid Libel, it is alleged, that, *Whereas the Kings of* England, *by Reaſon of the ſaid Kingdom, from Time to Time, whereof there is no Memory to the contrary, have been in peaceable Poſſeſſion of the ſovereign Dominion of the Sea of* England, *and of the Iſles of the ſame, by ordaining of Laws*, &c. *And whereas it is covenanted in the League lately made betwixt the two Kings, that each ſhould defend the other's Rights, Franchiſes, and Liberties*, &c. *Monſieur* Reyner Grimbald,

Commander

Commander of the Fleet of the King of France, *who names himſelf Admiral of the ſaid Sea, being commiſſioned by that King to ſerve him in his War againſt* Flanders, *hath, contrary to the ſaid League, wrongfully aſſumed the Office of the Admiralty in the ſaid Sea of* England, *upon Pretence of the ſaid Commiſſion, taking the People and Merchants,* &c. *They pray, That the Perſons, Ships, and Goods, ſo taken, may be delivered to the Admiral of the King of* England, *to whom the Conuzance of the whole Matter of Right appertained.*

He who ſhall read more at large, in the Places before-quoted, the magnificent Attributes given to the Kings of *England*, of their being peaceably poſſeſſed, Time immemorial, of the Sovereign Dominion of the Sea of *England*, by ordaining Laws and Statutes, prohibiting Arms and armed Veſſels, taking Sureties, and giving Safe-guards, and ordaining all other Things neceſſary to the Preſervation of Peace and Right amongſt all People paſſing upon that Sea, *&c.* will at firſt View be ready to cry out—*Fuimus Troes! fuit Ilium!* We were *Engliſh Men! England* was! And yet perhaps no Need of ſuch Exclamation. At firſt reading, it ſeemed to me, at ſome Diſtance, like a Stone Wall athwart my Way, and no Poſſibility of paſſing farther; but, when I examined it more nearly, I found it but a Silken Curtain of ſpecious Words drawn artificially before the Eye, and eaſy to be put back by the Hand.

1. Firſt, It is to be noted, that all this is but a *Plaidoyé*, a Plea or Action, a ſupplicatory Libel, or Bill of Complaint. No definitive Sentence or Arreſt, nothing that did paſs in *rem Judicatam*. This alone, were there nothing more, is ſufficient to abate the intrinſic Value of it. The Roll makes no mention of any Deciſion given by the Delegates upon any the Matters contained in the Libel, and either none was given, which ſeems moſt probable, and thoſe Controverſies decided ſome other Way, or the Roll is left imperfect.

2. Though the Intereſſents of ſeveral Nations, as *Danes*, *Germans*, *Hollanders*, &c. ſuffered Damages by the Seizures of *Grimbald*, in like Manner as the *Engliſh* did, and therefore joined with them in the ſame Libel; yet the Libel was penned by *Engliſh* Council, as is manifeſt by the Addreſs or Direction of it; *Avous Seigneurs Auditeurs deputez*, To you, Lords Auditors deputed, *par les Roys d'Engleterre & de France*, by the Kings of *England* and *France*; where *England* has the Preference of Order to *France*, contrary to the Stile of Neutral Nations of that Age.

3. The Allegation of the Kings of *England*, having been Time immemorial in the peaceable Poſſeſſion of the Sovereignty of the Sea, was not made by the *French* Delegates in the Name of the King their Maſter, but by *Engliſh* Advocates in Favour of their Client's Cauſe. The *French* King had commiſſioned *Grimbald* to exerciſe Juriſdiction at Sea, by arreſting and confiſcating Ships and Goods, and impriſoning Perſons, for carrying Relief to the Earl of *Flanders*, his Enemy; by which Commiſſion *Grimbald* juſtified himſelf for doing ſuch Acts, as were manifeſtly repugnant to the peaceable Poſſeſſion of the ſaid Sovereign Dominion on the Part of *England*. If the King of *France* had acknowleged the Admiral of *England*, the only competent Judge of Things done and committed upon the Sea of *England*, why did he, together with the King of *England*, depute Auditors or Delegates for determining thoſe Matters then in Controverſy?

4. The Art in penning the ſaid Libel is remarkable: It affirms, the Marine Juriſdiction of the Admiral of *England*; but it does not except againſt a Power in the King of *France*, to conſtitute an Admiral with the like Juriſdiction, and that upon the Sea towards *Flanders*. For it is certain, that the Crown of *France* had Admirals before the Time of *Philip* the Fair. It is true, that great Body of the Kingdom of *France* had been cantonized and divided, after the Manner of the *German* Nations, into many *Franca Feuda*, as they called them, Free Fees, which are ſupreme and independent Sovereignties, only the Perſons of thoſe Sovereigns under a perſonal Obligation of Fealty to another. The reſpective feudatary Princes were fiduciary Homagers to the Kings of *France*, but the Crown of *France* had no Regal Juriſdiction or Authority within thoſe Principalities. Thus, the great Dukedoms of *Aquitain* and *Normandy* were under the Kings of *England*, that of *Britany* was under a Duke of its own, the Earldoms of *Provence*, *Tolose*, and *Flanders* acknowleged their own Sovereign Counts. ☞ In thoſe Days, the Crown of *France* had only a ſmall Sea-coaſt upon *Picardy*, and ſome in the *Mediterranean*: But, in the Time of *Philip* the Fair, that Crown was in the actual Poſſeſſion of all *Normandy*: And as the other Principalities became reincorporated into the Body of *France*, from whence they had formerly been diſmembered, as now they all are, excepting ſome Part of *Flanders*; that Kingdom, as it enlarged itſelf to the Sea, by the Acceſſion of many new Coaſts, ſo the Marine Juriſdiction thereof increaſed proportionably. I ſay, the fore-recited Libel does not deny a Civil Power or Capacity in the Crown of *France* to create an Admiral, and to inveſt him with Marine Juriſdiction: But the Exception is partly againſt *Grimbald*, and partly againſt his illegal Practices and Seizures, contrary to the Alliance made betwixt the two Kings. Now this *Grimbald* was a Foreigner, and a Mercenary; he was a *Genoeſe*, whom the King of *France* had hired, with ſeveral Gallies of that *Republic*, to ſerve him in his War againſt *Flanders*. The Plaintiffs, in their Libel, call him *Maiſtre de la Navy du Roy de France*, Maſter or Commander of the *French* Fleet, but would not vouchſafe him the Title of an Admiral, only *Que ſe dit eſtre Admiral* that he called himſelf an Admiral, and craftily reclaim the Conuzance of their Cauſe from him, as an incompetent Judge, to the Admiral of *England*, as an undoubted Authority, and before whom they were ſure to gain their Proceſs.

Forcat. de Gall. Imp. l. 2.

Of the Fiſhery.

I Have done with the Marine Juriſdiction, and proceed now to the third and laſt Incident of the Dominion of the Sea, and which inſeparably follows it, and that is the *ſole* Fiſhing; without which, it would be a Property without Profit, a Name without a Thing. He, who has the Soil, or Ground, has the Herbage, and other Growth of it, or elſe a Rent for it; if others may freely depaſture with him, it is a Common. The Enquiry is upon the Matter of Fact, as to *fiſhing* upon the Seas about *England*, in which, our public Treaties, made betwixt our Kings and other Sovereigns, will be our beſt Direction. And they ſtand thus: All the ancient Treaties, I could meet with, concluded betwixt the ſeveral Kings of *England* and their old Confederates the Dukes of *Britanny* and *Burgundy*, which in thoſe Ages were the moſt powerful Neighbours they had at Sea, are of the ſame Tenor, and run in the ſame Form, *viz.* They covenant on both Sides, that their reſpective Subjects ſhould freely, and without the Let or Hinderance one of another, fiſh every where upon the Seas, without aſking any Licences, Paſſports, or Safe-conducts. This is the general Form of them all. For Example: In the Treaty betwixt *Edward* the IVth of *England*, and *Francis* Duke of *Britanny*, the Article, in the *French* of that Time, runs thus: That the Fiſhermen, both of the Kingdom of *England*, and Dutchy of *Britanny*, *Purront peaceablement aller par tout ſur Mer pour peſcher & gaigner leur vivre, ſans impeachement, ou diſturber de l'une partie ou de l'autre, & ſans leur ſoit beſcigne ſur ceo requirir ſauf Conduct.* And the ſame Form had been uſed before, in the Treaty betwixt *Henry* the VIth, and the then Dutcheſs of *Burgundy*. Thus alſo in the famous Treaty, called *Intercurſus magnus*, made in the Year 1495, betwixt *Henry* the VIIth of *England*, and *Philip* the IVth Archduke of *Auſtria*, and Duke of *Burgundy*, in the 14th Article it is agreed, *Quod Piſcatores utriuſque partis poterint ubique ire, Navigare per Mare, ſecure piſcari, abſque impedimento licentia ſeu ſalvo conductu.* And this Form is alſo kept to, in the Treaty made betwixt *Henry* the VIIIth, and *Charles* the Vth, Emperor and Duke of *Burgundy*. In the Time of Queen *Elizabeth*, after that Seven of the Seventeen Provinces had ſet up diſtinct Sovereignties of their own, they ſtill enjoyed the ſame Freedom of Fiſhing, as they had done before, when united with the Houſe of *Burgundy*. And in the Treaty made betwixt King *James* of *England* and *Philip* of *Spain*, in the Year 1604, the ancient Treaties of Intercourſe and Commerce betwixt the Kingdoms of *England*, *Scotland*, and *Ireland*, and the Dominions of the Dukes of *Burgundy*, and Princes of the *Low-Countries*, are revived and reconfirmed. From whence it appears, upon the whole Matter of Fact, That the Kings of *England*, in their Treaties with other Sovereigns, not once or twice, but in a Succeſſion of Ages, not by Surprize, but deliberately, and when the Buſineſs of the Fiſhery came under ſpecial Conſultation, did not challenge to themſelves the ſole Right thereof, excluſively of all others, as being appropriated to the Crown of *England*: For had they eſteemed the Fiſhery the Property of their Crown, and all Aliens excluded from it, they would not have admitted the Subjects of *Brittany* and *Burgundy* to a promiſcuous Fiſhing with their own Subjects, without ſome valuable Conſideration had been given for it, or at leaſt ſome Licence obtained, as a beneficiary Grant derived from them, or ſome Acknowlegement made by Way of a *Salvo Jure*, a Saving, to the Right of the Crown of *England*. Elſe it would be as unreaſonable, as if a Man ſhould throw down the Incloſures of his own Ground, and lay that common which before was his Property, which is too groſs a Reflection upon the Wiſdom of thoſe Ages. And this may be farther illuſtrated by a familiar Inſtance. Suppoſe here in *England* two great Manors, and betwixt them a large Lake of freſh Water, well ſtored with Fiſh, and it can be proved, That not only Time out of Mind, the Tenants of the two Manors have promiſcuouſly fiſhed therein, but that alſo the Lords of both Manors have, in ſeveral Ages, contracted each with other, for a free Fiſhing, without Leave or Licence to be firſt aſked or obtained for their reſpective Tenants. And, in the Contract, no Exception or Reſervation is made of the Fiſhery, as Parcel of the Inheritance of one of the ſaid Manors, nor any Words creating a Tenure, whereby one ſhould hold of the other; nor expreſſing or implying, that it was but a Temporary Sufferance, that one of the Lords ſhould ſhare for a Time in the Profits of the Fiſhing, without any Share in the Fee or Inheritance of it: And this by the free Donation of the other, commonly called *De Gratia Speciali*, or for a valuable Conſideration, uſually termed, *Quid pro quo*, or to hold by ſome ſmall Acknowlegement or Tenure, as of a Pepper-Corn yearly. But the Contract ſtands on both Sides upon an equal Foot, both Lords equally giving and taking an undiſturbed Liberty for their reſpective Tenants. This, I humbly conceive, is good Evidence, that the Fiſhery lies common to both Manors. Suppoſe again, this Lake to be the Sea, and the two Manors to be two Kingdoms, and the Caſe will ſtill be the ſame.

None of our Leagues and Treaties made either with the Houſe of *Burgundy* or with the Houſe of *Auſtria*, ſince the Union of thoſe two Houſes, or with the *States-General*, ſince their Diſunion from both, have ever reſerved to the Crown of *England*, any annual Payment, Fee-Farm, or Conſideration for their Liberty of Fiſhing in our Seas. A certain Sum was never agreed, an uncertain one could never be demanded. And yet Sir *John Boroughs*, in his Book of *The Sovereignty of the Britiſh Seas*, ſays, That *Philip* the Second, King of *Spain*, obtained of Queen *Mary*, his Wife, Licence for his Subjects to fiſh upon the North Coaſts of *Ireland*, they paying yearly for the ſame *one Thouſand Pounds Sterling*; which was accordingly paid into the *Exchequer* of *Ireland*. But, inſtead of an authentic Record, he vouches only the Hearſay of Sir *Edward Fitton*, Son to Sir *Henry Fitton*, ſometime Treaſurer of *Ireland*, who, he ſays, had often teſtified it. This may the rather be ſuſpected of Miſtake, becauſe Mr. *Cambden* relates, how that Queen *Elizabeth* having ſent four Ambaſſadors, whereof one was Principal Secretary of State, and not lightly to be ſuppoſed ignorant of ſuch an Affair, to treat at *Bremen* with the Ambaſſadors of *Denmark*, upon Complaint of that King's forbidding Foreigners the Freedom of Fiſhing betwixt *Norway* and *Iſeland*, both appertaining to the Crown of *Denmark*: The Queen's Ambaſſadors openly affirmed, That the Kings of *England* had in no Time forbid the Freedom of Fiſhing in the *Iriſh Sea*, albeit they were Lords of both Banks.

Annal. Eliz. Anno 1602.

The ſaid Mr. *Cambden*, in his Deſcription of the North-Riding of *Yorkſhire*, ſpeaking of *Scarborough-Caſtle*, ſays, That the *Hollanders* and *Zelanders* take wonderful Quantities of Herring upon this Coaſt; *Cùm veniam priùs veteri inſtituto ex hoc Caſtro impetraverint:* Whereas they were wont, by ancient Uſe, to aſk Leave firſt of the Caſtle. For, ſays he, the *Engliſh* always gave Leave to Fiſh, reſerving that Honour to themſelves, but ſlothfully reſigning the Profit to others. But, all this while, he quotes no Authority neither, nor directs us to any Original Record, where we might conſult the plain Truth of the Caſe. Perhaps what he hiſtorically calls, *aſking Leave*, was but giving Notice of their Arrival, and acquainting the Governor who they were, and what their Buſineſs was upon the Coaſts, leſt, under the Diſguiſe of Fiſhermen, Pirates, and Enemies, might privily hide themſelves. And probably, he, by his Civilities to the Fiſhermen, might make ſome Perquiſites and Profits to his Place, by permitting them, as Occaſion required, to dry their Nets aſhore, to fetch Victual or freſh Water from Land, to fiſh within the Havens and Bays, where commonly the beſt-fed Fiſh are taken. But it is not likely, that the Governor of *Scarborough* had ſo indefinite a Power, as to enable him to give Leave, upon bare *aſking*, without any farther Condition or Conſideration, to all Foreigners, to fiſh at pleaſure, within the Royalties of the Crown. However, it is too manifeſt, That no Prince nor State did ever pay to the Crown of *England* any yearly Sum of Money, or other valuable Conſideration, for the Liberty of their Subjects fiſhing upon the Seas of *England*: For, had ſuch Sum been paid, it would have paſſed into the Accompt of the *Exchequer*, as a Branch of the Royal Revenue, and there remain upon Record.

As for the Caſe of my Lord of *Northumberland*, in the Year 1636, that is extraordinary, and will not paſs for a Precedent. The *Dutch* Buſſes were then required by the *Engliſh* Admiral to take Licences from him for fiſhing in the Northern Seas, and to pay moderate Rates for the obtaining thoſe Licences, which they did, to redeem themſelves from the forcible Moleſtations of a well-appointed Fleet. So that this was the Compulſory Act of private Perſons, not the Voluntary Act of the *States-General*; who were ſo far from conſenting to what was done, that they made Remonſtrances and Complaints of this Proceeding by their Ambaſſadors here in *England*.

And as it appears not by the Records of the *Exchequer*, That any Recompence was given by Foreigners for Liberty of Fiſhing within our Seas; ſo neither does it appear by any the public Treaties, That the Subjects of any foreign Prince ſhould aſk Leave for ſo doing, by Stipulation and Contract, though they were ſure to have it without paying any Thing, only, by the bare aſking, to keep in Memory a perpetual Acknowlegement of a beneficiary Grant derived from the Crown of *England*, as Supreme Lord of the Fee. On the contrary, the Treaties caution for a Liberty of Fiſhing, *abſq; Licentia*, without any Leave or Licence firſt to be aſked. And yet *England* has aſked Leave, and covenanted ſo to do, of a foreign Crown. I would not have mentioned this, had it been a Secret; but it is a Thing public and in Print. By Treaty made and concluded in the Year 1490, betwixt *Henry* the Seventh of *England* and *John* the Second King of *Denmark*, which Treaty was afterwards renewed betwixt our *Henry* the Eighth and their *Chriſtiern* the Second, *Anno* 1523, it was mutually covenanted, That the Liegemen, Merchants, and Fiſhermen of *England*, ſhould fiſh and traffic upon the Northern Sea, betwixt *Norway* and *Iſeland*; but under a *Proviſo* of firſt aſking Leave, and renewing their Licences from ſeven Years to ſeven Years, *de Septennio in Septennium*, from the Kings of *Denmark* and *Norway* and their Succeſſors: They are the Words of the Treaties. But as Navigation enlarged, and *England* grew more opulent in Trade, and potent at Sea, all this is gone into utter Diſuſe and Diſcontinuance; and the Kings of *England* may with better Right prohibit the Subjects of *Denmark* from paſſing the *Engliſh Sea* or *Chanel*, without ſpecial Licence firſt obtained, than the Kings of *Denmark* can, the Subjects of *England* from paſſing the ***Northern Sea*** betwixt ***Denmark*** and ***Iſeland***.

Vid *Cambd. Annal. ad Anno* 1600.

There is a Record, which Mr. *Selden* quotes out of a Parliament Roll of King *Richard* the Second, is very remarkable. It is a Grant in Parliament of an Impoſition, according to certain Rates and Proportions, upon all Veſſels paſſing or fiſhing within the Admiralty of the *North*, *viz.* Upon the Sea Northwards from the Mouth of the *Thames*. The Rates were as follow;

Vid. *Mar. Clauſ.* l. 2. cap. 15.
Rot. Parl. 2. *Ric.* 2. *art.* 39. *in Schedula.*
About *Anno* 1380.

1. To take of every Ship, going and coming upon that Sea, *Six Pence* a Ton for the Voyage.

2. To take of every Veſſel fiſhing for Herring, *Six Pence* a Ton by the Week.

3. To take of Veſſels fiſhing for other Fiſh, *Six Pence* a Ton for every Three Weeks.

4. Of Ships laden at *Newcaſtle* with Coals, *Six Pence* a Ton for every Three Months.

5. To take, of all other Ships paſſing the Sea within the ſaid Admiralty, laden in *Pruſſia*, *Norway*, *Sconen*, or elſewhere in thoſe Parts, *Six Pence* a Laſt for the Voyage.

Some collect and infer from hence, (I confeſs, I cannot) That King *Richard*, by Aſſent in Parliament, did impoſe theſe Rates, not only upon Subjects, but Foreigners, for trading and fiſhing within the *North-Eaſt Sea*, as Part of the Territorial Property of the Crown. Were it ſo, it would be a Matter of mighty Weight and Moment. But it is queſtionable, Whether thoſe Words of Univerſality, *Cheſcun Nief & cheſcun Veſſeau* (for the Roll is wrote in *Norman French*) every Ship and every Veſſel, ought not to be reſtrained to *Engliſh* Veſſels only, and not extended to thoſe of Foreigners. And if extended to Foreigners, ſince the Grant is ſaid to be made, *per l'Advis des Marchands de Londres & de autres Marchands vers la North*, it is worthy the conſidering, Whether thoſe Words, *other Merchants towards the North*, are not in like Manner to be extended to Foreigners as well as Natives; that is to ſay, to *Hanſeatics*, and all other Merchants, whether *Engliſh* or others, dwelling or trading towards the North; who, having often Occaſion to paſs and repaſs the Northern Sea, at that Time infeſted with Rovers, adviſed the ſaid Grant: Which Word implies a Requeſt or Deſire, ſomewhat more than a bare Conſent. And what was this Impoſt for, which they adviſed might be laid upon all their Ships and Veſſels? The Roll tells us expreſly, That it was *pur la garde & tuition du Mier*, &c. for the Guard and Security of the Sea and of the Coaſts of the Admiralty of the North, with two Ships, two Barges and two Ballengers, armed and arrayed for War. And it is moſt probable, That not the King himſelf, but private Perſons, commiſſioned from him, undertook, at their own Expence, to equip and arm the ſaid Veſſels, for the Benefit of the Merchants, and Security of their Commerce, and by this rated Impoſt to be reimburſed their Charge, and rewarded for their Service. This may be collected from the firſt Article in the Roll, where there is an Exception of Ships laden with Merchandizes in *Flanders*, bound for *London*, and laden with Wool and Skins at *London*, or elſewhere within the Admiralty of the North, to be unladen at *Calais*, of which Ships the *Six Pence per* Ton aforeſaid was not to be required. But then it follows, *Les queux Niefs les Gardeins de la dicte Mer ne ſeront tenus de les Conduire ſans eſtre allouez*, The Guardians of the ſaid Sea were not obliged to give Convoy to thoſe Ships, without an Allowance in Conſideration thereof.

So that upon the whole Matter, here is nothing that relates to the Dominion of the Sea; for the Impoſition upon the Ships and Merchandizes was not *Jure Coronæ*, in Right of the Crown, for paſſing over the Diſtricts or Fiſhing within the Royalty of it, but *Ratione Oneris*, in Conſideration of a Charge, which ſome Perſons ſuſtained; and that by Contract, to preſerve and defend the Freedom and Security of Navigation and Commerce. And it was very juſt and reaſonable, That what was undertaken for a common Good and Benefit, ſhould be ſupported and defrayed by a common Charge and Contribution. The Roll does not ſay, That the Impoſt was granted to the King, as an additional Revenue to his Crown, but it was for the Guarders of the Sea, to reimburſe their Expence, and recompenſe their Service. And the Caſe is parallel with this: Suppoſe the *Hamburgers* and other *Hanſeatics* trading to the *Streights*, who have very ſmall or no Convoy of their own, and apprehenſive of the Courſes of the Rovers of *Africa*, the *Turks* and *Moors*, ſhould contract with the King of *France*, or others commiſſioned from him, to ſupply them with Convoy from the Mouth of the *Streights*, till they are arrived at the reſpective Ports whither they are bound, and in Conſideration thereof to give ſo much a Ton upon every Ship ſo convoyed. This would have no relation to any Sovereignty in the Crown of *France*, in and over the *Mediterranean Sea*, but would be a particular Contract only a *Quid pro quo*, ſomething to be done, and ſomething to be received in Conſideration of ſo doing.

Plin. l. 19. & lib. 6. cap. 22.
Demoſth. in Leptin.
Toll in the *Sound.*

There want not Examples in Hiſtory of thoſe, who have exacted Tribute upon all paſſing certain Seas adjacent to their Territories, and yet not as proprietary Lords of thoſe Seas neither, but only as Protectors and Defenders of the Navigation thereof. Thus the *Romans* impoſed a Tax upon all Ships ſailing in the *Erythræan* or *Red Sea*, towards the Maintenance of a Maritime Force, for the Repreſſion of Piratical Excurſions. And the *Athenians* did the ſame in the *Helleſpont*. Thus the Duties in the *Sound*, payable to the Kings of *Denmark*, began at firſt, not on Account of any Sovereignty over that Sea, but becauſe thoſe Kings were at the Charge of maintaining continual Fires upon the *Col* and *Annot*, and floating Tons or Buoys upon the Sands, as a Direction to Merchants in that dangerous Entrance into the *Baltic:* For which, was anciently paid them at *Cronenburg-Caſtle*, in the *Sound*, no more, till new Exactions crept in, than a Roſe-Noble for an empty Ship, and if laden, a Roſe-Noble more for her Lading. Nor could any refuſe Payment, pretending, that he had an able Pilot, and needed not the Direction of the King's Fires: For 'tis not reaſonable, that the Contumacy of one or more particular Perſons ſhould fruſtrate or evacuate a public Benefit.

In the Seventh Year of King *James*, *Anno* 1609, a Proclamation was publiſhed of high Importance, inhibiting all Perſons, of what Nation or Quality ſoever, not being natural-born Subjects, from fiſhing upon any the Coaſts and Seas of *Great-Britain* and *Ireland*, and the Iſles adjacent, without firſt obtaining Licences from the King, or his Commiſſioners, authorized in that behalf; and thoſe Licences to be renewed yearly. This was the firſt that ever I could meet with of this Nature: Not but that particular Fiſhermen of *Diep*, *Calais*, *Bruges*, &c. have ſometimes, both before and ſince, taken Licences here in *England* for their Fiſhing: But then they did it, either as an abundant Caution, or to gain an indefinite Liberty of fiſhing every-where, cloſe upon the *Engliſh* Shores, and within the Friths, Bays, and Havens, without Fear of Moleſtation: And they did it *ex proprio motu*, without the Privity and Knowlege of their Sovereigns; and paid nothing for it to the Treaſury of *England*, only gave Fees and Gratuities to the Secretaries, and others, for Diſpatch of their Licences. But here is a Royal Edict, or Law, by way of Premonition to all the neighbouring Princes and States, together with their Subjects, to take Licences of the King, or his Commiſſioners, for fiſhing upon any Coaſts and Seas of *Great-Britain*; the Number of their Ships and Veſſels, together with their Tonnage, to be ſpecified, in order to a rateable Compoſition to be paid yearly into the *Chequer* of *England*. And King *Charles* the Firſt, in the 12th Year of his Reign, *Anno* 1636, publiſhed another Royal Proclamation to the ſame Tenor alſo. By which Acts, thoſe two Kings kept up the continual Claim of the Crown of *England*, to a ſole and appropriate Fiſhery in the *Britiſh* Seas, and conſequently to the Sovereignty and Dominion thereof; but neither of thoſe public Edicts obtained, from any of our Neighbours, their due and juſt Effect. Thus ſtands the Caſe of the Fiſhery.

The Reaſonableneſs of a limited Fiſhing.

And thus I have gone over all the chief Branches of the Sovereignty, and have faithfully related the Matter of Fact, and how the Practice is, and has been, betwixt us and our Neighbours, in reference to them all; not ſo fully indeed, and amply, as I might, but ſufficiently to my Purpoſe, who deſigned not a Volume, but an Abſtract. There is ſtill one Thing behind, concerning the Fiſhery, which I ſhall mention, and ſo conclude. It is by way of Temperament or Relaxation, and yet without renouncing any Thing: It is a *Medium* betwixt graſping at *all* and holding *nothing*; it is what would greatly accommodate *England*, if it can be obtained, or if a proper Seaſon preſented for offering at it: I ſay, a Seaſon, or fit Conjuncture. For what in Natural Philoſophy, amongſt Chymiſts, is a juſt Degree of Heat, neceſſary to the Production of all great and admirable Effects, *that* in Politics, amongſt Stateſmen, is a fit Conjuncture. The Temperament or Expedient, which I mean, is briefly thus: A Limited Fiſhing; not a Licenſed, but a Limited one, without Licence. This hath both a Foundation of ſolid Reaſon to ſupport it, and is backed alſo with Precedents and Authorities, ſufficient to vindicate it from the Imputation of a new Project. The Reaſonableneſs of it may be thus ſhewn. The Sovereignty of any Sea, and the Right of the ſole Fiſhing in it, are ſo intimately connexed, yea, ſo coeſſential one to the other, that he who controverts the one, will infallibly diſpute and opiniaſtre the other; but he who acknowleges one of them, will by a neceſſary Conſequence yield both. And yet it is a Thing undoubted, and never brought into Queſtion by any; but that every Prince, whoſe Country adjoins to the Sea, and whoſe Shores are indented with Bays, Creeks, Havens, and Rivers, has ſome Portion of the Sea belonging to him in Property, as an Acceſſion of the Land, or appendant to it, or rather incorporated with it, like Veins and Arteries, integral Parts of the ſame Body.

[illegible] *Mar. Clauſ.* l. 2. cap. 22.

The forementioned King *James*, in the ſecond Year of his Reign, *Anno* 1604, cauſed a Sea-chart to be publiſhed, deſcribing all the Coaſts round *England*, by ſtreight Lines, drawn from one Promontory or Foreland to another, and all that was intercepted and included within thoſe Lines, was called the

King's Chambers and *Royal Ports*. And in the Proclamation publiſhed the ſame Time, and which refers to the ſaid Sea-chart, they are called *The Places of the King's Dominion and Juriſdiction*; and all Hoſtilities betwixt Foreigners in War one with another, but in Amity with *England*, forbidden within thoſe Precincts. Our Law alſo makes a conſiderable Difference betwixt Havens, Rivers, Creeks, and Bays, and the *Altum Mare*, or High Sea; for the firſt are reckoned *infra Corpus Comitatus*, as the Law-phraſe is, Parts and Members of the Counties of *England*; and all Pleas of Contract, and other Things done there, are triable by Verdict, and determinable at common Law. But the Court of Admiralty holds Plea and Conuſance of all Things done upon the High Sea, as being out of the Body of any County, and conſequently from whence no Jury can be returned for Trial of Iſſues.

V. Co. Juriſd. of Courts, Cap. 22.

If there be no certain Standard in Nature, whereby to aſcertain the preciſe Boundaries of that peculiar Marine Territory, I am now ſpeaking to, which belongs to every Prince in Right of his Land; yet, by Treaty and Agreement, they may eaſily be reduced to Certainty. For, as to the Judgment and Opinion of private Perſons, we cannot fetch from thence any true Meaſure; for though they all agree unanimouſly, that there is ſomething due of Right, yet they vary in the *Quantum*, or how much. *Baldus* reckons one hundred Miles at Sea, as the Diſtrict of the adjacent Land. *Bodin* affirms it for a received Law amongſt Nations, that the Prince, whoſe Country abuts upon the Sea, ſhould have ſixty Miles Juriſdiction from the Shore, and that it was ſo adjudged in the Caſe of the Duke of *Savoy*. Another Doctor will tell us, that ſo much of the Sea appertains to the Land, as far as a Man can ſee from Shore in a fair Day. But this will not ſerve our Turn: For if a Man may ſee from *Dover* to *Calais*, I ſuppoſe the like may be done from *Calais* to *Dover*, and whoſe ſhall the Sea be betwixt? Therefore the ſureſt Way is, to preſcribe the Limits of fiſhing betwixt neighbouring Nations by Contract, and not by the leſs certain Meaſure of Territory. For if no Bounds be fixed, how many Inconveniencies, and what a licentious Extravagance, may ſuch a Liberty run into? Why may not the *Dutch*, as formerly they have done, dredge for Oyſters upon the Coaſts of *Eſſex*, within the Fiſheries of private Perſons, and within Streams and Waters appertaining to particular Manors, by Grants from the Crown? Why may they not fiſh within the Mouth of the *Thames?* Or within our Creeks, Havens, and Rivers, as far as ſalt Water flows? Or to the firſt Bridge, if they will pleaſe to ſtop there? Is it reaſonable, that there ſhould be no Diſtinction, as to fiſhing, between Native and Alien? Why then do they challenge to themſelves thoſe ſmaller Seas and Inlets within the *Vly* and *Texel*, and all other Streams, which, breaking in at a ſtrait Neck or Iſthmus of Land, form *Peninſulas* of Waters, and, in the Nature of ſtanding Lakes, are incloſed within the Banks of thoſe *Low Countries?* The States there farm out the Fiſhing of the South-ſea or *Zuyder*, and other Streams, to their own People and Subjects, under the Reſervation of a yearly Rent to be paid therefore, and conſequently exclude all others from it. I hint theſe Things, only to ſhew the Reaſonableneſs of a limited Fiſhing; and as to the Authorities by which it is ſtrengthened, I ſhall touch upon them alſo.

Bald. ad L. de Rer. Dom.

Bod. de Republ. lib. i. *Cap.* 10.

It was anciently covenanted betwixt the Crown of *Scotland* and the *Netherlands*, that they ſhould not fiſh within fourſcore Miles from the *Scottiſh* Shores. My Author is *Welwood*, a *Scotch* Lawyer, in a little Tract of his, which I have read, *De Dominio Maris*, in the third Chapter: His Words are, *Non poſſum præterire, quod ante Sæculum hoc poſt cruentiſſimam ex Occaſionibus Maritimis Diſcordiam inter Scotos Batavoſque, Res in hunc Modum compoſita fuit, ut Batavi impoſterum abſtinerent ab Oris Scoticis ad octuaginta ſaltem milliaria.* Here the Diſtance from the Shores of *Scotland*, which Foreigners were to obſerve in their fiſhing, is ſet very large, no leſs than fourſcore Miles.

In the ſecond Year of King *James*, Commiſſioners were appointed and authorized, under the Great Seals of *England* and *Scotland*, to treat and conclude an Union betwixt the two Kingdoms. And in the Articles for regulating Trade betwixt them, it was, amongſt other Things, mutually agreed, that the fiſhing within the Friths and Bays of *Scotland*, and in the Seas within fourteen Miles Diſtance from the Coaſts of that Realm, where neither *Engliſh* nor other Strangers have uſed to fiſh, ſhould be reſerved and appropriated to *Scotchmen* only. And ſo reciprocally on the Part of *England*, *Scotchmen* to abſtain from fiſhing within the like Diſtances off the Coaſts of *England*. But if *Engliſh* and *Scots*, who, though the two Kingdoms be *ſui Juris* and independent one upon another, are tied together in the ſame common Bond of Allegiance to one and the ſame Prince, be excluded from fiſhing within fourteen Miles from each others Coaſts, how much more reaſonable is it, that Aliens and Foreigners ſhould be obliged to keep the like Diſtances?

Spotiſwood's Hiſtory of *Scotland*, *p*. 483.

King *James* finding, that his forementioned Proclamation, in the ſeventh Year of his Reign, for a licenſed Fiſhing, was not ſeconded by a ſuitable Compliance on the Part of the neighbouring Nations, did about nine Years after, by Way of Expedient, propoſe a limited Fiſhing inſtead thereof. For thus I find it in a Letter from Secretary *Naunton* to the Lord *Carlton*, *Engliſh* Ambaſſador at the *Hague*, bearing Date *January* 21ſt, 1618. He acquaints him, how the King had, by him the ſaid Secretary, deſired of the Commiſſioners of the States, then reſiding at *London*, that they would write to their Superiors, to publiſh a Placart, prohibiting any their Subjects to fiſh within fourteen Miles of his Majeſty's Coaſts, that Year or any Time after, until Order be taken by Commiſſioners, authorized on both Sides, for a final ſettling of the main Buſineſs. And the ſaid Ambaſſador was commanded to make the like Inſtance and Declaration to the States General, in the Name of his Maſter.

I am apt to believe, this Diſtance of fourteen Miles was the rather pitched upon, as the regulated Meaſure, which had been agreed upon betwixt the Commiſſioners of both Kingdoms in the ſecond Year of the King, as I ſaid before. I have done with the Authorities; and for the better Elucidation of what I have ſaid, ſhall briefly ſum it up into a fictitious Article ſuppoſed to be made betwixt *England* and *Holland*.

“TO maintain a due Diſtinction betwixt Natives and Foreigners, in fiſhing upon the Coaſts of their reſpective Sovereigns; and to prevent the manifold Inconveniencies, which occaſionally ariſe by a promiſcuous and unlimited Fiſhing; it is mutually covenanted, concluded, and agreed, that the People and Subjects of the *United Netherlands*, ſhall henceforth abſtain from fiſhing within any the Rivers, Friths, Havens, or Bays of *Great-Britain* and *Ireland*, or within the Diſtance of Leagues from any Point of Land thereof, or of any the Iſles thereto belonging; under the Penalty and Forfeiture of all the Fiſh, that ſhall be found aboard any Veſſel doing to the contrary, and of all the Nets, Utenſils, and other Inſtruments of Fiſhing. The like Diſtances, and under the ſame Penalties, to be kept and obſerved by the Subjects of his Majeſty of *Great-Britain* and *Ireland*, from any of the Coaſts belonging to the *United Netherlands*. But beyond thoſe Precincts and Limits, that the People and Subjects on both Sides be at Freedom to uſe and exerciſe Fiſhing where they pleaſe, without aſking or taking Licences or Safe-Conducts for ſo doing, and without the Let, Hinderance, or Moleſtation one of another. Saving always the ancient Rights of the Crown of *England*, and that nothing herein contained be interpreted or extended to any Diminution or Impeachment thereof, but that they remain in the ſame Force and Virtue, as before this Agreement.”

The Article is penned indifferently on both Sides, and ſo much the better, becauſe the Equality of it is an Argument of its Equity; yet I could inſtance in ſeveral Benefits, which would redound to *England* from ſuch an Article, were it paſſed into an Agreement, but they are not proper to be mentioned in this Place; and therefore I ſhall here conclude with this brief Apology, that what I have written, is for the Juſtice and Honour of the Government, the Conſervation of the public Peace, the Maintenance of an inviolable Amity with our Allies, and is moſt humbly ſubmitted to better informed Judgments.

SECT. II.

Of the Importance and Dignity of Merchants.

HAVING, in the preceding Work, ſufficiently diſplayed the immenſe Benefits of Commerce to Mankind, it remains, as it were by Way of Corollary, briefly to obſerve, that *Commerce*, whether *foreign* or *domeſtic*, whether in *Groſs* or by *Retail*, neceſſarily implies the main and important Inſtruments thereof, to be *Merchants*. Doctor *Godolphin* might well have ſaved himſelf the Trouble (in his Preface to *A View of the Admiralty Juriſdiction)* of quoting of *Baldus*, a famous Civilian, in ſaying, what ſurely every one will readily admit to be true, “*That the World could not live without Merchants.*” The firſt and moſt obvious Idea of a City, Town, or Village, is an Aſſemblage of People of various Conditions, ſeated together for their mutual Conveniency: Which Conveniency is alone to be ſupplied by the Inſtrumentality of Merchants. A City or Town therefore, or even barely (though in a leſſer Degree) *a Village*, is a *mere Non-entity*, excluſive of the Aid of *Merchants:* As a Country without Cities, Towns, or Villages, creates the Idea of a *Wilderneſs*.

In ſundry free States in *Europe*, their Sovereigns or Governors are moſtly either actual Merchants themſelves, or at leaſt are deſcended from ſuch, and enjoy the Eſtates and Dignities acquired by the Commerce of their Progenitors. Of this laſt-named Claſs are likewiſe in *England* the following noble Families, *viz.*

Engliſh Peerages, &c. ſprung from Merchants.

1. *Coventry*, Earl of *Coventry*, deſcended from Sir *John Coventry*, Mercer, Lord-mayor of *London*, *Anno* 1425.

2. *Brown*, Viſcount *Montacute*, deſcended from Sir *Stephen Brown*, Grocer, and twice Lord-mayor of *London*, viz. *Annis* 1438 and 1448.

3. *Legg*, Earl of *Dartmouth*, deſcended from *Thomas Legg*, Skinner, once Lord-mayor of *London*, who (according to *Collins*'s Peerage, Vol. III. P. 100) married *Elizabeth*, Daughter of *Thomas Beauchamp*, Earl of *Warwick*.

4. *Capel*, Earl of *Eſſex*, deſcended from Sir *William Capel*, Draper, and Lord-mayor of *London*, *Anno* 1503.

5. *Dormer*, Lord *Dormer*, deſcended from *Ralph Dormer*, Mercer, and Lord-mayor of *London*, *Anno* 1529.

6. *Oſborn*, Duke of *Leeds*, deſcended from Sir *Edward Oſborn*, Cloth-worker, and Lord-mayor of *London*, *Anno* 1583.

7. *Cranfield-Sackville*, Duke of *Dorſet*, deſcended from Sir *Lionel Cranfield*, a Merchant of *London*, who, for his great Abilities, was preferred by King *James* I. to the high and moſt honourable Office of his *Lord High-Treaſurer*, and was by that Prince alſo created Earl of *Middleſex*; and by his great Grandſon King *George* I. the preſent noble Deſcendant was created Duke of *Dorſet*.

The following Peerages are become extinct very lately, *viz.*

Two Peerages extinct.

8. *Rich*, Earl of *Warwick* and *Holland*, deſcended from Sir *Richard Rich*, Mercer, and Lord-mayor of *London*, *Anno* 1441.

9. *Holles*,

9. *Holles*, Duke of *Newcaſtle*, deſcended from Sir *William Holles*, Lord-mayor of *London*, *Anno* 1539. [☞ The preſent noble Duke of that Title, although he writes himſelf *Holles-Pelham*, as collaterally deſcended from the former, is lineally deſcended (as I have been told) from Sir *John Pelham*, Lord-Treaſurer to King *Henry* IV.]

N. B. There were other Peerages (*now* extinct) whoſe Poſſeſſors were deſcended from Merchants; as, *De la Pole*, Earl of *Suffolk.*——*Boleyn*, Earl of *Wiltſhire.*——*Hicks*, Viſcount *Campden.*——*Cromwell*, Earl of *Eſſex*, &c. And leſt any of the noble Families above-named ſhould queſtion the Truth of their ſaid Genealogies, (though far from being diſhonourable) we ſhall, in our own Vindication, acquaint them, that we have faithfully tranſcribed the Accounts hereof from an *Octavo* Pamphlet in our Poſſeſſion, publiſhed ſo lately as *Anno* 1750, intitled, "*A Treatiſe on Trade, or the Antiquity and Honour of Commerce.*" Sundry Peers there alſo *are*, and others lately *were*, who, though originally created or ennobled from their own Eminence in the Profeſſion of the Law, were, however, deſcended from *Merchants* and eminent Traders. Many other Perſons might be named, who, though not Peers, were, from Merchants, advanced to the Dignity of Privy-Counſellors, and other high and honourable Stations, by our Kings. Laſtly, Were we yet farther to extend our Inquiries into all the Inter-marriages of our Nobility with the Daughters of *Merchants* and eminent *Traders*, whereby ſo many ſhattered Eſtates have been effectually repaired, it would not only take up more Room than was intended by this ſhort Eſſay; but might poſſibly alſo give Offence where none is intended.

SECT. III.

Of the various Cauſes of the Riſe and Increaſe of great and populous Cities.

ALTHOUGH it be true, (as we have obſerved in the preceding Section) that all Cities whereever ſituated, and whatever their Condition may be, principally and neceſſarily owe their Origin and progreſſive Support and Increaſe to *Merchants* and *Commerce*: Yet there is a very conſiderable Difference between mere Royal or Princely Cities, and Cities advanced to Greatneſs by Commerce and Induſtry alone. The former Sort may be conſidered to be, in a great Degree, peopled and ſupported by the Reſidence of the Sovereign and Nobility,—the national Courts of Juſtice,—Guards and Garriſons;—and by thoſe Means having many Places of public Entertainment and Diverſion,—Societies for the Advancement of polite and uſeful Knowledge,—many great and elegant Palaces, Churches, Convents, Theatres, Statues, Fountains, Columns, Pyramids, Obeliſks, Bridges, Hoſpitals, Infirmaries, Schools, Libraries, Pictures; and, in fine, by every other Thing that can attract the Admiration, feed the Fancy, and delight the Senſes of both the greater and ſmaller People, not only of their own Nation, but of Men of Quality and Wealth from other Nations; although perhaps without foreign Commerce, or much Home-manufactures. This was eminently the Character of ancient *Athens*, *Corinth*, and *Rome*; as it is at preſent, more eminently than any where elſe, of modern *Rome*, *Venice*, *Florence*, *Paris*, &c.

Theſe, and ſuch-like, are the Qualifications which conſtitute a truly-great and magnificent City: And whilſt their reſpective Nations continue gradually to increaſe in Proſperity and Wealth, ſuch a Capital City will be conſtantly increaſing in its People, as well as in its Decorations and Embelliſhments of every Kind; as is at preſent ſo viſibly the happy Caſe of the ſuperb Metropolis of the *Britannic* Empire, wherein many of the before-recited Qualifications [though we cannot ſay all] are conjoined to and with a matchleſs foreign Commerce, ſalubrious Air and Water, an eaſy Approach, and a ſufficient Plenty of all other good Things.

On the other Hand, Cities arrived at Greatneſs, or rather *Magnitude*, merely from their happy Situation for, and great Succeſs in Commerce and Manufactures, (more eſpecially if that Riſe has been ſudden) the Ornaments, Decorations, and other polite Embelliſhments of ſuch Cities, even though arrived at a great Degree of Magnitude and Populouſneſs, will uſually be fewer and leſs conſiderable: Such Places therefore will attract few People to viſit them, but merely on the Score of Commerce. Such, for Inſtance, may in ſome Meaſure be ſaid to be the Caſe of *Peterſburgh*, the upſtart Capital of *Ruſſia*, deſpotically or *compulſively* made ſo, on commercial as well as on political Conſiderations, within the Compaſs of the preſent Century; though, in almoſt all other Reſpects, moſt diſagreeably ſituated and circumſtanced. Such (we are ſorry to ſay it) is partly the Caſe of ſome few of the very beſt-traded and moſt populous Places in *Great-Britain*, moſtly riſen up within the laſt three Centuries, whoſe Wealth and Plenty are apparent in almoſt every Countenance, but with little of any Thing like Embelliſhment and Elegance for attracting of Strangers to viſit them; and from whence, ſuch as, through Accident or Neceſſity, have viſited them, we have often known to return with a coarſer Character of them than they really deſerved, merely for Want of that Elegance they had expected in ſuch large, wealthy, and populous Places. This Conſideration properly conſtitutes the very juſt Diſtinction which the judicious *Botero* has made (as we have partly noted under the Year 1590) between a *great* City and a *large* City; a Difference as great as there is between a plain and uneducated Trader, and an accompliſheſt and polite Gentleman. Which Cities nevertheleſs (though properly to be termed mere *mercantile* ones) do, in Fact, obviouſly contribute much more to national Proſperity, (though not perhaps ſo much to national Fame) than thoſe termed *Royal* or *Princely* Cities.

Under the ſaid Year 1590, in our foregoing Work, we gave from the ſaid *Botero*, (an eminent *Italian* Author of the 16th Century) a View of the Magnitude, *&c.* of moſt of the capital and principal Cities of *Chriſtendom*, all but thoſe within the *Baltic* Sea, which that able Author ſeemed to think were then ſcarcely worth his Regard. But we are ſorry to ſay, that we have not been ſufficiently enabled, from modern Travellers, to give ſo exact an Account as we earneſtly deſired to have done, of the preſent or

modern

modern State (in Point of Commerce and Populouſneſs) of many foreign Cities: Moſt of thoſe Travellers contenting themſelves with tireſome and tedious Accounts of their Churches, Monaſteries, Paintings, and Palaces, without giving us any Thing conſiderable on what ought ever to be eſteemed a moſt eſſential Part of ſuch Deſcriptions, *viz.* the mercantile and political State of thoſe Cities, *i. e. The Number of their Inhabitants—their principal Staple Manufactures—and whether on the Increaſe or on the Declenſion*; and, in general, the true Light in which thoſe Cities and Countries ſtand in relation to other Nations. Since *Botero* wrote, (above 170 Years ago) we may obſerve ſundry vaſt Alterations in the Condition of Nations, and particularly of their Capital Cities: Thus *Venice*, then eſteemed to conſiſt of near 200,000 Inhabitants, has for ſome Time been in a retrograde State; and the like of *Genoa*, and alſo of *Prague* the Capital of *Bohemia*, likewiſe in a declining State; as is alſo *Liſbon*, ſince the *Engliſh* and *Dutch* have driven the *Portugueſe* out of their vaſt *Eaſt-India* Commerce: Whereas, on the other Hand, the Cities of *Milan* and *Naples* have, ſince *Botero*'s Days, almoſt doubled the then Number of their Inhabitants; and *London*, which then contained little more than one third Part of the *then* Inhabitants of *Paris*, appears at this Day rather to outdo that proud City, not only in Riches, but even probably in Number of Inhabitants. Moreover, the two Capital Cities of *Denmark* and *Sweden* are at this Time become ſo conſiderable, not only in Point of their public Edifices and Ornaments, but alſo in the Number of their Inhabitants, as now well to merit a Place in ſuch Inquiries.

The national Controverſy diſcuſſed, whether *London* or *Paris* be the largeſt City.

Let us now, however, briefly examine the preſent Magnitude of the two moſt famous Cities of *Europe*, *London* and *Paris*, by what has hitherto been eſteemed the moſt juſt and equitable Rule of determining the Magnitude of Cities, *i. e.* by their annual Bills of Mortality. And as many Authors, who have gone before us on this Subject, ſeem agreed, that in ſuch great and populous Cities there die annually a thirtieth Part, (or one out of thirty) of their whole Inhabitants, we will firſt try that Rule, *viz.* Iſt, On a *Medium* of *ſix* ſucceeding Years for the Mortality of *London*.

1ſt Computation.

I. *Anno* 1755,	buried at *London*,	21,917 Perſons
1756,	- - - - - - - -	20,872
1757,	- - - - - - - -	21,313
1758,	- - - - - - - -	17,576
1759,	- - - - - - - -	19,604
1760,	- - - - - - - -	19,830
	Total,	121,112

Annual Medium of *ſix* Years, - - - - - - - 20,185 dying yearly at *London*.
30 or the 30th Part of the People.

Total Inhabitants of *London*, 605,550 by this 1ſt Computation.

But if multiplied by 33, as others conjecture to be the Number dying annually in *London*, or the 33d Part of its Inhabitants,

Then 20,185
Multiplied by 33 the 2d Rule.

Gives the total Inhabitants of *London*, 666,105 by this 2d Computation.

2dly, Computation for *Paris*.

II. There died in *Paris* in the ſix following Years, as we had them caſually, and at different Times, from the *Paris* News-papers, *viz.*

Anno 1733,	- - - - - - -	17,406
1750,	- - - - - - - -	18,084
1756,	- - - - - - - -	17,236
1757,	- - - - - - - -	17,237
1758,	- - - - - - - -	21,120
1759,	- - - - - - - -	18,446
	Total of ſix Years Deaths,	109,529 at *Paris*,

Yearly Medium of ſix Years at *Paris*, 18,254
Multiplied by 30 the loweſt Rule,

Total Inhabitants of *Paris*, 547,620 by the ſaid loweſt Rule,
Fewer People at *Paris* than at *London*, 57,930 by this Computation.

Total People at *London* (as above), - - - - - - - 605,550 by the 1ſt Rule,

But if the Medium of the yearly Deaths at *Paris* - - 18,254
be multiplied by - - - - - - - - - - - 33 the 2d Rule;

Then the total Inhabitants in *Paris*, by the 2d Rule, - 602,382
Fewer People in *Paris* than in *London*, - - - - - - 63,723

Total People in *London*, as above, - - - - - - 666,105

3dly, and laſtly, The beſt Account of the Magnitude of *London* and *Paris*.

As by Reaſon of ſo many additional Hoſpitals for the ſick Poor of *London*, within the laſt thirty Years, the yearly Mortality Bill has ſenſibly decreaſed, whilſt the Town has moſt viſibly been increaſing, there are ſome who think that there dies not above one Perſon in thirty-five yearly; they therefore reaſonably conclude, that *London*'s Inhabitants may *now* amount to 760,000: Whereas many of the Deaths in *Paris* are of the aged Religious of both Sexes: Yet, ſay they, on Account of ſecret Murders, *&c.* at *Paris*, may not *Paris* be concluded to contain 700,000 Souls; and this may probably be nearer the Truth than either of the above Computations.

1. The ſaid ſix Years Mortality-Bills of *London* are copied from the yearly Bills publiſhed by the Company of *London* Pariſh-Clerks. Remark 1.

2. It is indeed ſtill almoſt the general Opinion, that the true annual Mortality of *London* is by no means kept exact by the ſaid Company of Pariſh-Clerks, who are ſaid to omit many Deaths in Families of different Perſuaſions, diſſenting from the eſtabliſhed Church. Remark 2.

3. But, without farther inſiſting on what we are not properly able to prove, if our Accounts of the annual Deaths at *Paris*, which we took from the *Paris Gazettes*, be exact, it will follow, that, as there are many Thouſands of religious or eccleſiaſtical Perſons of both Sexes in *Paris*, who are liable to Mortality like other People, and doubtleſs are included in thoſe annual Accounts, there muſt needs be many more *Lay* Inhabitants in *London* than in *Paris*, and conſequently a much ſmaller Number of uſeleſs Mouths and Hands in the former than in the latter City. And thus we have, as impartially as we were able, diſcuſſed the national Controverſy [for ſuch it has been called] concerning the Magnitude of theſe two illuſtrious Metropolis's, from real Facts with regard to *London*, and, as we ſuppoſe, alſo in reſpect to *Paris*: In both which Cities, we ſhall here but juſt remark, that there are made the fineſt and moſt exquiſite Manufactures, of almoſt all Kinds, that can be named in the known World, and therefore needleſs, as well as almoſt endleſs, to be enumerated; and with reſpect to the Vaſtneſs of the naval Commerce of *London*, enough has been already ſaid, in the Body of our Work, on that moſt important Subject. Remark 3.

We have received, from a worthy and judicious *Dutch* Merchant, an exact Computation, not long ſince made in *Holland*, which he ſays was taken by public Authority, of the Number of Inhabitants of the undernamed nineteen Cities of the Province of *Holland*, viz.

	Inhabitants.	
Amſterdam.	241,000	Of 20,000 Souls, and upwards.
Leyden,	70,000	
Rotterdam,	56,000	
Haarlem,	50,000	
Hague,	38,000	
Delft,	25,000	
Tergow,	20,000	
Dort,	18,000	Under 20,000 Inhabitants.
Alkmaar,	15,000	
Hoorn,	12,000	
Enkhuyſen,	11,000	
Gorcum,	6,600	
Schiedam,	8,000	
Brille,	5,000	
Edam,	4,000	
Purmerend,	2,600	
Modenblick,	2,500	
Schoonhoven,	2,500	
Monikendam,	2,000	
Total Inhabitants of 19 Towns, in the ſingle Province of *Holland,*	589,200	

☞ *Amſterdam* (as we have ſeen) has had many and conſiderably-different Computations of the Number of its Inhabitants, ſome even as high as to 300,000: Yet we are inclined to think, the above Computation ſtill comes the neareſt to Truth, though made thirty Years ago; and the like may be probable of moſt of the other Cities and Towns of that Republic, and probably alſo of many of the Cities and Towns throughout the reſt of *Chriſtendom*. Nevertheleſs, we may be frequently miſguided by ſuperficial Travellers, who, coming to lye a Night or two, or even longer, at a populous Place, where ſeeing many public Edifices and Streets, they too often pronounce at Random on this Subject, or elſe often take the Report of others, who, though Inhabitants of the Place, may be very incompetent Judges of ſuch Matters. How widely different (for Inſtance) do many of the Natives of *London* ſpeak of the Magnitude of the Place in which they have ſpent their whole Lives, for Want of due Attention, Judgment, and Obſervation? How vaſtly different (for one Inſtance) are the Accounts of different Travellers concerning the Magnitude of the famous City of *Nurenberg*, in *Germany*, as will be ſeen farther on in this Supplement?

SECT. IV.

The Politico-Commercial Geography of EUROPE:

OR,

A compendious and comparative View of the various Productions, Trades, Manufactures, Exportations, Populouſneſs, and Power, of the ſeveral Potentates, Republicks, and States thereof: And likewiſe of the Commerce, Magnitude, and People, of their moſt conſiderable Cities and Towns.

Extracted from the beſt modern Accounts thereof; and more particularly from the *Engliſh* Tranſlation, *Anno* 1762, in ſix *Quarto* Volumes, of the new Geography of *Europe*, juſt publiſhed, in *High Dutch*, by Doctor *Buſching*, Profeſſor of Philoſophy in the Univerſity of *Gottingen*.

WITH a more eſpecial Regard to the preſent commercial Condition, Magnitude, and Importance of the moſt conſiderable Cities and Towns of *Europe*, it may be needful to premiſe,

I. That, beſide the fine and judicious Diſtinction of *Botero*, betwixt a *large City* and a *great City*, [mentioned, in the Body of our Work, under the Year 1590] another Diſtinction may be equally eſſential, *viz.* between a great many ſeemingly-large Cities in *Popiſh* Countries, which nevertheleſs are very thinly inhabited by trading and induſtrious People; and very many *Proteſtant* Cities and Towns, which, though ſtanding on much leſs Ground, are nevertheleſs crowded with many more Traders, Manufacturers, and other induſtrious Inhabitants. Thus, in *Poland*, *Germany*, *Italy*, *France*, *Spain*, and *Portugal*, many of their larger Cities are conſtituted or conſiſt, for the moſt Part, with eccleſiaſtical Edifices, as Cathedral, Collegiate, and Pariſh Churches, large Abbeys, Convents, Nunneries, Chapels, and Chantries; Epiſcopal and Deanry Palaces, and Prebendal Houſes, with all their extenſive Gardens, and other Outlets; although, beſide the Habitations of their more immediate and numerous Dependants, there may be very little to be found therein of any Thing like Manufactures or Commerce. Such, for Inſtance, is the City of *Munſter* in *Germany*, the City of *Bourges*. in *France*, and many others which might be named. Even in Proteſtant Countries, and particularly in our own Nation, no adequate Judgment can be formed (as elſewhere noted) of the Populouſneſs or *real* Magnitude of ſundry Places, merely from either their greater or their leſſer Number of Pariſh Churches and Chapels; of which, *York* City, *Oxford*, *Cambridge*, &c. on the one Hand; and the extenſive Liberty of *Weſtminſter*, *Briſtol*, *Liverpool*, *Mancheſter*, *Newcaſtle-upon-Tine*, *Birmingham*, *Glaſgow*, &c. on the other Hand, are obvious Inſtances.

II. It may alſo be herein farther proper to be obſerved, that when, under the Deſcription of any particular City or Town, no Mention ſhall happen to be made of the peculiar Trade or Manufacture of ſuch Place, the Reader is naturally to be referred to the Account, previouſly exhibited, of the general Trade, Productions, and Manufactures, of the Country or Province, under which ſuch City or Town is ranked.

Ruſſia.

With reſpect to the Commerce of *Ruſſia*, in general it is allowed to be very advantageous to her; many in our Days being of Opinion, that her annual Exports amount to four Millions of Rubles, and that her Imports exceed not three Millions; whereby ſhe gains annually from the reſt of the World one Million of Rubles, or 225,000*l. Sterling*: [valuing a Ruble at 4*s.* 6*d. Sterling*:] But this is little more than a random Conjecture; there being others, who think that *Ruſſia* gains conſiderably more on the general annual Balance of her Commerce, and that *Great-Britain* is the moſt conſiderable Loſer of any Nation of *Europe*, in her Trade to *Ruſſia*: Which Loſs to us is likely to continue, until we can bring our *American* Continent Colonies to ſupply us with all the naval Stores we neceſſarily require; and alſo until we can ſupply ourſelves with all the Linen, Thread, Pot-aſh, *&c.* which we are now labouring gradually to effect, from *Scotland*, *Ireland*, and *Britiſh America*.

Its Productions.

Ruſſia's Productions and Exports, in general, are many, and very valuable, *viz. Furs* and *Peltry* of various Kinds, *red Leather*, *Linen*, *and Thread*, *Iron*, *Copper*, *Sail-cloth*, *Hemp and Flax*, *Pitch and Tar*, *Wax*, *Honey*, *Tallow*, *Iſing-glaſs*, *Lintſeed Oil*, *Pot-aſh*, *Soap*, *Feathers*, *Train Oil*, *Hogs-Briſtles*, *Muſk*, *Rhubarb*, and other Drugs, *Timber*, and alſo *raw-Silk*, from *China* and *Perſia*.

Her *European* Commerce.

Her foreign Commerce with the reſt of *Europe* is much increaſed ſince her Conqueſts from *Sweden* of *Livonia* and eſpecially *Ingria*, and ſince the eſtabliſhing of her new Emporium of *Peterſburgh*; whereby her naval Intercourſe with the reſt of *Europe* is made much more ſhort and eaſy.

Her *Aſiatic* Commerce.

Ruſſia carries on a Commerce over Land, by Caravans, to *China*, chiefly with Furs: And they bring back from thence Tea, Silks, Cotton, Gold, *&c.*——To *Bochara*, near the River *Oxus*, *Ruſſia* ſends her own Merchandize, in Return for *Indian* Silks, curled Lamb-ſkins, and ready Money; and alſo from the annual Fair at *Samarcand*.——She trades to *Perſia*, by *Aſtracan*, croſs the *Caſpian* Sea, for raw and wrought Silk.

Archangel her only Sea-port of Communication with *Europe*, till *Peterſburgh* was built.

Before her late Conqueſts from *Sweden*, her only Port of naval Communication with *Europe*, was *Archangel*, in the *White Sea*; it is a long and tempeſtuous Voyage from moſt Parts of *Europe*. That famous Port-Town is about three *Engliſh* Miles in Length, and one in Breadth, altogether built of Wood, excepting her Merchants-Exchange, which is a Stone-Building. The gradual Increaſe of *Peterſburgh* has, in ſome Meaſure, decreaſed the Trade of *Archangel*, which, however, ſtill exports a great Quantity of the before-named Merchandize.

Kola, in *Ruſſian Lapland.*

In *Ruſſian Lapland*, there is a ſmall and inconſiderable Port named *Kola*, in the North Latitude of about 69 Degrees, on a Bay of the Northern Ocean, ſince the Year 1554 frequented annually by ſome few *Dutch* Shipping; who bring thence only ſome Peltry, and ſalted and dried Salmon; but this being in ſo barbarous a Country, has little Connexion with the general Commerce of *Ruſſia*.

Moſcow City, on the *Oka*, which runs into the great River *Volga*, and other Towns of *Ruſſia*, briefly deſcribed.

Moſcow, a far inland Place, moſtly built of Timber, (excepting the Palaces, Churches, Convents, and the great Fortreſs of *Cremlin*) is by ſome ſtill thought to be the largeſt City of *Europe*, and particularly ſaid to be ſo by Dr. *Buſching*; who adds, That it has 1,600 Churches and Convents, and forty-three public Places or Squares: That its Inhabitants conſiſt of Stateſmen, Nobility, and their Retinues; of Merchants, Soldiers, Prieſts, Monks, Nuns, and their Servants; Mechanics, Carriers, Sledge-drivers, Labourers, *&c.* But that, ſince the Building and Increaſe of *Peterſburg*, *Moſcow* is greatly declined, and therefore is now by him ſuppoſed to be reduced to about 150,000 People; yet others think it has many more. *Buſching* makes the Merchants Exchange to contain about 6,000 fine Shops. Here is the Scene of Trade, vaſt Numbers of Merchants and Traders, and particularly thoſe to *China*.——*Moſcow*'s modern Condition is indeed hard juſtly to deſcribe; few Voyagers giving themſelves the Trouble of viſiting it. The Grandeur of its many Palaces, Cathedrals, Convents, *&c.* and the Meanneſs of the Bulk of the Houſes, carrying much ſeeming Inconſiſtency, even by *Buſching*'s and other modern Accounts: Yet, upon the whole, there are probably many more Inhabitants in it than the laſt-named, otherwiſe able Author inconſiſtently makes it contain, after telling us, that *it is the largeſt City in Europe.* In the Year 1755 it had an Univerſity erected in it. Here is a *Silk* Manufactory, vaſt *Artillery* Magazines, Hoſpitals, Squares, and mercantile Storehouſes, *&c.* Within the Circle of *Moſcow* ſtand Abundance of Towns.——The following conſiderable Places are in *Ruſſia*, *viz.* *Tula*, a trading City on the River *Upa*, and contains 144 Churches and Convents. Here are great Quantities of Fire-Arms and *Ruſſia* Leather made.——*Lower Novogrod* lies on the *Volga*. Its Shops are richly furniſhed with all Sorts of foreign and native Merchandize.——*Rezan*, formerly a noted Place, is much decayed, from having been deſtroyed by the *Tartars* about 200 Years ago.——*Smolenſko*, a large Town on the *Dnieper*, has conſiderable Commerce, both by Land and River Carriage.——*Kiow*, the Capital of the *Don-Coſſacs*, ſtands likewiſe on the *Dnieper*, and is a large irregular City, filled with Churches, Convents, Shops, and Tradeſmens Houſes.——*Woronitz* ſtands on a River running into the River *Don*; is a large and populous Place. It was here that *Peter the Great* firſt made a large Dock-yard for Ship-building, in order to obtain a Naval Sovereignty on the *Euxine* or *Black Sea*: But, although he failed therein, and was afterward obliged to yield up to the *Turks Azof*, [or *Azow*] near the Mouth of the great River *Don*, and alſo *Taganrok*, on the *Palus Mæotis*, whereby he was precluded from the *Black Sea*: Yet *Woronitz*, (or *Veronitz*) is ſaid to be ſtill a Place of conſiderable Trade, by Means of the ſaid River *Don*.——*Novogrod-weliki*, or *Great-Novogrod*, is an ancient, large, and celebrated City, on the navigable River *Wolcow*, juſt where it runs out of the *Ilmen* Lake, and afterward diſembogues into the *Finland* Gulph, was once a moſt eminent Staple and *Emporium* of the *Hanſe Towns*, till the Year 1490, (as related in our Work under that Year; but is now much decayed. Yet it is ſaid the beſt red *Ruſſia* Leather is ſtill manufactured here.——*Pleſcow*, on the River *Welika*, is ſaid to be a Place of conſiderable Trade.——*Twer*, a large Town on both Sides of the River *Volga*, has ſeventy Churches and Convents, and carries on a conſiderable Trade in Corn.

Tula.

Lower Novogrod.

Rezan.

Smolenſko.

Kiow.

Woronitz.

Great-Novogrod.

Pleſcow.

Twer.

☞ There are vaſt Deſarts in *Ruſſia*, eſpecially in its Northern and North-eaſtern Provinces; and in many Parts of it the People are ſtill *Pagans*. Not one-third Part of the Country is ſufficiently peopled, nor cultivated: So that, if there be *nine* or *ten Millions* of People in all the more ancient Empire of *Ruſſia*, as it ſtood before the Conqueſts made in the former Part of this XVIIIth Century, it is probably as much as can be reaſonably computed.

Ruſſia's moſt important Conqueſts from *Sweden* by *Peter the Great*, are, 1ſt, The fine and well cultivated Country of *Livonia*, containing many good Towns, Villages, and Farms: But as the commercial Part of Geography is ſolely our preſent Province, we ſhall confine our Enquiries to ſuch Places as more immediately are connected therewith.

Livonia's Product and Commerce. (To *Ruſſia*)

Livonia, or *Liefland*, (including *Lettenland* and *Eſthonia*) affords all the Neceſſaries of Life in great Plenty, being moſtly a fertile Soil; and in a plentiful Year exports many thouſand Laſts of *Rye* and *Barley* to *Holland*, *Spain*, and other Parts, and is therefore ſtiled the Granary of the North; though *Poland* ſurely with more Reaſon and Eminence merits that Character. It has great Plenty of Horned Cattle and Horſes, (but the Wool of their Sheep is ſaid to be ſo coarſe as to reſemble Goats Hair.) From hence immenſe Quantities of Flax, excellent Hemp, (uſually called *Riga Rine Hemp*) Lintſeed, Leather, and Skins are exported, by Ships from *Britain*, *Holland*, *France*, and other Parts. Yet, from the many cruel Wars, and the Devaſtation of ſo many of their Towns and Villages, it is thinner of People than from ſo large and fine a Province would otherwiſe be expected.

Riga, its Capital.

Riga, its Capital, is ſituated on the River *Duna*, or *Dwina*, near the *Baltic Sea*, and has long been famed for Commerce and Opulence, having handſome Houſes of Stone; and, by Means of an excellent Harbour, carries on a great Trade of Exportation of Hemp, Flax, Ship and Houſe Timber, Naval Stores, Iron, Cordage, Corn, Furs, *&c.* to the above-named Countries, ſome think, in Summer, by about 500 Ships, and to and from *Ruſſia* by Sledges in Winter. It is well fortified, contains ſix *Lutheran* Churches, and is a reaſonably large City; though we have not met with any Computation of the exact Number of its Inhabitants.

Revel.

Revel is a ſtrong and opulent City on the *Baltic* Shore, a Place of conſiderable Commerce, much after the Manner of *Riga*. It is the Capital of that Part of *Livonia* called *Eſthonia*. Here a Part of the *Ruſſian* Navy is uſually ſtationed.

Narva

Narva.

Narva ſtands on a River of the ſame Name, diſemboguing into the Gulph of *Finland*; and, though not large, it carries on a Naval and Land Commerce, of the like Kind with *Riga*.

IIdly, The Conqueſt of *Ingria*, (or *Ingermanland*) adjoining to *Livonia*, or the Government of *Peterſburg*, though not ſo good a Country as *Livonia*, contains the following Places, *viz.*

Kronſtadt.

Kronſtadt, built by the Czar *Peter the Great*, on a ſmall Iſland, eight Leagues by Water from *Peterſburg*. Its People conſiſt of about 20,000, of Burghers, Sailors, and Soldiers. It is the principal Station for the moſt Part of the *Ruſſian* Navy, and is therefore made very ſtrong.

Peterſburg.

Peterſburg, (in Latitude 59 Deg. 57 M.) the uſual Reſidence of the *Ruſſian* Court, State-Offices, &c. Till the Year 1703 there were only two ſmall Fiſhing-Huts on the wateriſh and ſwampy Spot, where this great City now ſtands, on both Sides the River *Neva*, and conſequently in both Provinces of *Ingria* and *Carelea*, between the Bottom of the *Finland* Gulph and the Lake *Ladoga*; Part of this City is alſo built on ſeveral ſmall Iſlands formed by the Branches of the River *Neva*, ſo as to appear like ſeveral diſtinct Towns rather than one ſingle City. *De Dieu*, the *Dutch* Reſident, wrote to his Maſters concerning the Magnitude of this City, *Anno* 1721, which he then, probably, exaggerated. Mr. *Salmon*'s *Modern Gazetteer* ſays, there were no leſs than 60,000 Houſes built within three or four Years after the Foundation was laid, (if he has not, through Miſtake, added a Cypher too much.) Dr. *Buſching*'s ſeems the moſt moderate Account of its Magnitude, *viz.* That it is about *ſix* Miles every Way, and contains about 8,000 Houſes; of which Number about 600 are of Stone, and the reſt are of Timber; and it may contain above *one hundred thouſand People*. It has neither Gates nor Walls; only in the Middle of the City there is a ſtrong and beautiful Fort. The Admiralty and Dock-yards are alſo fortified.

Its extenſive Commerce, reſpecting all the before-named Commodities of *Ruſſia*, renders it of great Importance; a vaſt Number of foreign Shipping frequenting it in Summer, as to a Mart for all *Ruſſian* Merchandize; and in Winter 3,000 Sledges, each drawn by one Horſe, are employed for Paſſengers in its Streets. There are about twenty *Ruſſian* Churches, four *Lutheran* Churches for the *Germans*, and ſeveral *Calviniſt* ones for the *French* and other Ptoteſtants, and ſome alſo for *Roman* Catholics. It has an Univerſity, ſeveral Academies, Hoſpitals, Convents, &c.

Wiburg.

IIIdly, In *Carelia*, alſo conquered by the great *Peter*, ſtands the Town of *Wiburg*, its Capital, formerly deemed the Bulwark of *Sweden* on the Side of *Ruſſia*. It is ſituated on the Gulph of *Finland*, and carries on a conſiderable foreign Trade in Tar, and ſundry Sorts of Timber, &c.

The Dutchy of *Courland.*
Mittau.
Libau.

Weſt of *Livonia* lies the Dutchy of *Courland*, which, with *Samogitia* and *Semigallia* properly, is ſubject to its own Dukes; though too much under the Influence of *Poland* or elſe of *Ruſſia*; but the latter more eſpecially of late Years. Its Commodities are much the ſame as thoſe of *Livonia*. *Mittau*, the Capital, and the uſual Reſidence of its Prince, on the River *Aa*, is a pretty extenſive Town, of about 12,000 Inhabitants; having two *Lutheran* Churches, one *Calviniſt* Church, and one *Popiſh* one; and affords much the ſame Merchandize as *Livonia* for Exportation.——*Libau*, a City and Port of good Trade, on the *Baltic* Shore; having one *Lutheran* and one *Popiſh* Church, and two Schools. It conſiſts intirely of wooden Houſes. Dr. *Buſching* thinks, that annually above 150 Ships uſually arrive at *Libau*, to load Pot-aſh, Goat-ſkins, Timber, Hemp, Flax, and other Naval Stores, Lintſeed, and other bulky Merchandize.

The Kingdom of *Pruſſia.*

Weſt of *Courland* lies *Brandenburgh-Pruſſia*, or the Kingdom of *Pruſſia*. Its principal Commodities for Commerce are, Corn and *Buck Wheat*, in great Quantities, Hemp and Flax, Pitch, Pot-aſh, Wax, Honey, Sturgeon, Hops, Pit-coal, Amber, Seeds of Flax and Hemp, Caviar, Tallow, Hogs-briſtles, and Timber of many Kinds. The Inhabitants of this Kingdom were, by Dr. *Buſching*, computed to amount to 635,998 Perſons capable of bearing Arms: And, if ſo, it muſt then be more populous than is generally imagined.——Since the Year 1719, it is computed that about 34,000 Coloniſts have removed thitherward from *France*, *Switzerland*, and *Germany*: Of which Number 17,000 were *Saltzburgers*. Theſe Emigrants have built 400 ſmall Villages, 11 Towns, 86 Seats, and 50 new Churches, and have founded 1,000 Village-Schools, chiefly in that Part of the Country named *Little Lithuania*.——That their Manufactures are continually increaſing, *viz.* Glaſs, Iron-works, Paper, Gunpowder, Copper and Braſs Mills; Manufactures of Cloth, Camblet, Linen, Silk, Stockings, &c.——That the King of *Pruſſia* has conſtituted a Board for Commerce and Navigation, having the Cognizance of all Caſes relative to Trade and Commerce.

Koningsberg.
Pillau.
Memel.

Koningsberg, its capital City, is ſituated on the River *Pregel*, a large and beautiful City, ſeven Miles in Circumference; containing about 3,800 Houſes and 60,000 People; [by which Computation of Dr. *Buſching*'s there muſt be very near ſixteen Perſons, on an Average, in every Houſe.]——*Koningsberg* has ever made a conſiderable Figure in Commerce and Shipping; its River being navigable for Ships; of which 493 foreign ones arrived here in the Year 1752, beſides 298 Coaſters; and that 373 Floats of Timber were in the Compaſs of that Year brought down the *Pregel*: Of which ſee more in the Body of our Work under the Year 1749.——*Pillau*, (near *Koningsberg*) is a ſtrong City, and has a fine Harbour, famous for the beſt Sturgeon, from the Roe of which Fiſh *Caviar* is made. Veſſels of the greateſt Burden are here cleared and take in their Ladings, which have not Water enough in the *Friſchaf* to carry them up to *Koningsberg!* *Anno* 1720, King *Frederic William* induced 20,000 Proteſtant *Switzers*, *French*, *Palatines*, and *Franconians*, to ſettle in *Pruſſia*, at the Expence (ſays Dr. *Buſching*) of *five Millions* of Rixdollars. And *Anno* 1732, 350,000 Dollars were farther diſtributed to a freſh Colony of 12,500 *Saltzburgers*; by which, and ſuch-like wiſe and ſalutary Meaſures, *Pruſſia* has been well peopled and cultivated, ſo as in Length of Time to have made ample Returns to his ſaid Majeſty for the ſaid Expence.——*Memel* is a well fortified trading Sea-port, of above 400 Houſes; to which, *Anno* 1752,

70

Tilſit. *Inſterburg.*

70 Ships arrived, and 69 ſailed to foreign Parts; whither they carried and ſtill annually carry great Quantities of Flax, Hemp, Linen, Thread, and Lintſeed.——*Tilſit*, an inland Town, is next to *Koningsberg* the largeſt and moſt opulent of this Kingdom, carrying on to *Koningsberg* the greateſt Trade in thoſe Commodities; having about 600 Houſes and 7,000 Inhabitants, (ſays Dr. *Buſching*) being near twelve Perſons to each Houſe.——And *Inſterburg*, on the *Pregel*, contains 350 Houſes and 3,000 Inhabitants; having a Granary and Salt-Factory.

POLAND, LITHUANIA, *and* POLISH PRUSSIA.

Poland, Lithuania, and Poliſh Pruſſia.

The Soil of theſe three Countries (ſays Dr. *Buſching* and many others) is ſo exceeding fertile, and yields ſuch Plenty of Grain, that near 4,000 Veſſels and Floats, moſtly laden with Corn, come annually down the *Viſtula* to *Dantzic*, from *Podolia*, *Volhinia*, the *Ukrain*, and from other Parts of *Great* and *Little Poland*. So that *their* Harveſts make ample Amends for the ſuperior Labour which Agriculture requires.

Jews their great Number in Poland.

Poland, properly ſpeaking, has not any Manufactures of her own: All her Merchandize being exported *raw* or *unwrought*; to her great Shame. Eccleſiaſtical Bigotry (as will ever be the Caſe every where) is of infinite Detriment to her Commerce. And, maugre all her *natural Advantages*, ſhe is conſtantly ſinking deeper into Poverty. *Poland*, however, exports Grain of all Kinds, Flax, Hemp, Lintſeed, Hops, Honey, Wax, Tallow, Hides, Leather dreſſed after the *Ruſſian* Manner, Pitch, Pot-aſh, Maſts, Ship and Houſe Timber, Horned Cattle, Horſes, *&c.* All which, nevertheleſs, are greatly overbalanced by her Imports. *Poland* is ſaid to have two Millions of *Jews*, in her Villages alone, excluſive of their great Numbers in Cities and Towns; who carry on the Bulk of her Commerce; whilſt her Clergy are poſſeſſed of Two-thirds of her Lands and Revenues.

1. *Warſaw*, on the River *Viſtula*, lying almoſt in the Center of *Poland*, is the Royal Reſidence. It has ſeveral elegant Stone Buildings and Palaces, many fine Churches and Convents; but little of any Thing like Commerce.

2. *Cracow*, its Capital, is the largeſt and beſt built City in *Poland*, ſtands alſo on the *Viſtula*, with an Univerſity. Yet, although it has rich *Salt Mines* in its Vicinity, its Commerce is very inconſiderable; and (as *Morery* and *Collier* juſtly remark) it is, from various Cauſes, a declining City. It is ſaid to have no fewer than fifty Churches and Convents.

3. *Lemberg* is a large City, the Capital of *Red-Ruſſia*: But whence the Opulence which ſome Authors pretend it to be poſſeſſed of proceeds, we ſhall not undertake to find out.

4. *Kaminiec*, the Capital of *Podolia*, the beſt frontier Fortification of *Poland*, on the Side of *Turkey*; but, poſſibly for that Reaſon, it cannot thrive in Commerce.

Lithuania. Wilna.

1. Of *Lithuania*, *Wilna* is the capital City. It is very large, but has often been deſtroyed by Fire: Yet its Inhabitants have ſome conſiderable in-land Trade on its navigable River, of the ſame Name, running into the *Baltic* Sea, whereby they ſend their Merchandize as far as *Koningsberg*. Yet its Trade is ſaid to be moſtly managed by Foreigners, its Natives being poor and lazy. Its private Houſes are generally of Timber, but its public ones are of Stone or Brick, ſuch as its Churches and Convents, both of the *Roman* and *Greek* Communion, and alſo thoſe of the Nobility.

Grodno.

2. *Grodno* is alſo a large Place, and the next beſt to *Wilna*, and has alſo a good inland Trade.

Mobilow, and Witepſk.

3. 4. *Mobilow* is a handſome trading Town, on the River *Nieper*; as is alſo *Witepſk*, a fortified inland trading Town, on the *Duna*.

Dantzic.

The famous City of *Dantzic* is the Capital of that Part of *Poliſh Pruſſia* named *Pomerania*, and alſo of the whole Province; ſituated on the River *Viſtula*, about four *Engliſh* Miles before it falls into the *Baltic* Sea. It is ſtill a moſt eminent commercial City, although it ſeems to be ſomewhat paſt its meridian Glory, which was probably about the Time that the Preſident *de Thou* wrote his much eſteemed *Hiſtoria ſui Temporis*; wherein, under the Year 1607, he ſo highly celebrates its Commerce and Grandeur. It is a Republic, with a ſmall adjacent Territory about forty Miles round it, under the Protection of the King and Republic of *Poland*. Its Magiſtracy and the Majority of its Inhabitants are *Lutherans*, although the *Romaniſts* and *Calveniſts* be equally tolerated in it. It is large, rich, beautiful, and populous, having twenty-ſix Pariſhes, with many Convents, Hoſpitals, *&c.* The older Authors make her Inhabitants amount to 200,000 in Number; but later Computations fall very conſiderbly ſhort of it, as appears by its annual Bill of Mortality exhibited by Dr. *Buſching*, who tells us, That in the Year 1752 there died there but 1,846 Perſons. Its own Shipping is numerous, but the foreign Ships conſtantly reſorting to it are more ſo, whereof 1,014 arrived there in the ſaid Year 1752: In which Year alſo 1,288 *Poliſh* Veſſels came down the *Viſtula*, chiefly laden with Corn, for its matchleſs Granaries; from whence that Grain is diſtributed to many foreign Nations, *Poland* being juſtly deemed the greateſt Magazine of Corn in all *Europe*, and *Dantzic* the greateſt Port for diſtributing it every where: Beſide which, *Dantzic* exports great Quantities of Naval Stores, as Oak-plank, Deal, Pitch and Tar, Maſts, Cordage, Hemp and Flax; alſo Tallow, Hides, Furs, Honey, Wax, Sturgeon, Amber, Hops, Iron, Copper, Lead, Glaſs, Earthen Ware, Saltpetre, Pot-aſh, Linen, fine diſtilled Strong-waters, Salt, Opium, Vitriol, Vermillion, Beer, *&c.* Dr. *Buſching* affirms, That it appears from ancient Records, as early as the Year 997, "That *Dantzic* was a large commercial City, and not a Village or inconſider-" able Town, as ſome pretend." *Vide* its Foundation, as exhibited in the Body of our Work, under the Year 1169.

Thorn.

Thorn, higher up on the *Viſtula*, is deemed the moſt ancient Town of either of the *Pruſſia's*, and, next to *Dantzic*, is the faireſt and largeſt one of *Poliſh Pruſſia*. By Means of *Thorn* all the Merchandize of *Poland* is conveyed down the *Viſtula* to *Dantzic*. The Bulk of its Inhabitants are *Lutherans*, who have ſeveral Churches, and alſo the Magiſtracy and Univerſity. The *Romaniſts* have alſo ſome Churches, Convents, and a Jeſuits College. Yet *Thorn* is conſiderally decayed in Point of Commerce, compared to what it was in elder Times.

Elbing.

Elbing is the next beſt Town in *Poliſh Pruſſia*, ſtanding on a River of the ſame Name, running into a Bay of the *Baltic*, called the *Friſch-haf*. It is a large and ſtrong Place, of conſiderable Trade, having nine *Lutheran* Churches, one large Popiſh one, a *Calviniſt* and *Mennonite* Place of Worſhip. Its Trade is much in the Manner of thoſe of *Brandenburgh Pruſſia*, *viz.* Naval Stores, Hemp, Flax, Timber, Pot-aſh, &c.

☞ Theſe three Cities laſt mentioned are called the three great Towns of *Poliſh Pruſſia*; and, not longer enduring the Tyranny of the *Teutonic* Knights, they, in the Year 1454, revolted from them, and put themſelves under the immediate Protection of *Poland*, and ſo they remain to the preſent Time; and for that Reaſon they enjoy greater Privileges than any other Towns whatever, both in reſpect to Freedom and Commerce; and indeed are all that, in a commercial Senſe, are of any great Importance in *Poliſh Pruſſia*.

SWEDEN.

Sweden's modern Materials for Commerce:

And Number of her People.

Sweden, although in general it be very mountainous and rocky, affords nevertheleſs, many Tracts of level Lands proper for Agriculture. Of all its Provinces *Gothland* produces the moſt Grain, *viz.* Wheat, Rye, Barley, Oats, Peaſe and Beans. *Sweden* alſo (according to Dr. *Buſching*) has Cryſtals, Amethyſts, Topaſes, Porphry, Lapis Lazuli, Agate, Cornelian, Marble, and other Foſſils. But the Bulk of *Sweden*'s Wealth proceeds from her Mines of Silver, Copper, Lead and Iron; of this laſt-named Metal there are reckoned 450 Forges, Hammering-mills and Smelting-houſes. That Author tells us, They have a Kind of a *Gold-mine*, which, from the Year 1741 to 1747, produced 2,398 Gold Ducats, each worth 9*s.* 4*d.* Sterling (a poor Produce truly!) He thinks, that the Produce of her Iron-mines conſtitutes Two-thirds of the national Revenue. Some have reckoned the whole Number of People to be *three* Millions; but others, not above *two* Millions.... A ſmall Number this, for ſo vaſt an Extent of Country! Some of its Pariſhes are as extenſive as the intire Province of *Holland*, though ſcarcely containing ſeventy Farms, with perhaps not ſo many wretched Cottages as there are Towns in that opulent Province! The Bulk of the *Swediſh* Commonalty ſubſiſt by Agriculture, Mining, Grazing, Hunting, and Fiſhing. Their Materials for Traffic are the bulky and uſeful Commodities of Maſts, Beams, Deal-boards, and other Sorts of Timber for Shipping; Tar, Pitch, Bark of Trees, Pot-aſh, Wooden Utenſils, Hides, Flax, Hemp, Peltry, Furs, Copper, Lead, Iron, Cordage, and Fiſh.

Sweden's ancient State.

Riſe of her Commerce and Manufactures.

A few Centuries backward *Sweden* had no Manufactures; and in thoſe Times the *Hanſe-Towns* exported from *Sweden* the very crude Ore of their Copper and Iron, which they refined, and manufactured into various Utenſils and Tools, which they ſold again to the *Swedes*. The Inhabitants of their Coaſts were all Fiſhermen; and their Towns had no Artificers. In the Reign of their King *Guſtavus* the Firſt, ſurnamed *Vaſa*, who reigned from the Year 1523 to 1559, the *Swedes* firſt began to work their Metals and Wood at Home; and about the Middle of the XVIIth Century they began to ſet up ſundry Kinds of Manufactures, by the Help of *Hollanders* and *Flemings*, *viz.* Glaſs, Starch, Tin, Woollen, Silk, Soap, Leather-dreſſing, and Saw-mills. They had no Bookſellers till the Year 1647. They have ſince had Sugar-baking, Tobacco-Plantations, and Manufactures of Sail-Cloth, Cotton, Fuſtian, and other Stuffs; of Linen, Alum, Brimſtone, Paper-mills and Gunpowder-mills; vaſt Quantities of Copper, Braſs, Steel, and Iron, are now wrought in *Sweden*. They have alſo Founderies for Cannon, Forgeries for Fire-arms and Anchors, Armories, Wire and Flatting Mills: Mills alſo for Fulling, and for Boring, Stamping, &c. Of late alſo they build many Ships.

Her twenty-four Staple Towns.

They have certain Towns which are allowed to import and export Merchandize in their own Ships; and theſe are termed *Staple-Towns*, being twenty-four in Number: But the other Towns, which, though near or even upon the Sea-Coaſt, have no foreign Commerce, and are therefore called *Land-Towns*.—— Others are termed *Mine-Towns*, as belonging to ſome Mine Diſtrict.

Her Commerce increaſes.

By a Report from their *Board of Trade* to the Dyet of the Kingdom, *Anno* 1752, it appears, That their Commerce had been conſiderably increaſed of late Years, and that their Manufactures were alſo conſiderably improved, to the farther employing of their People, and leſſening of the Importation of foreign Merchandize; moſt Part of which is, moreover, imported in *Swediſh* Shipping, which alſo are the chief Exporters of the Home-products and Manufactures. Yet, upon the whole, Dr. *Buſching* thinks, That the *Swediſh* Imports do ſtill in Value exceed their Exports; chiefly occaſioned by the very neceſſary Importation of Corn and other Proviſions, which might be much leſſened, if the *Swedes* would more aſſiduouſly apply to the Increaſe of Agriculture and the Fiſhery.

The chief Staple Towns of *Sweden* are *Stockholm* and *Gottenburg*. We ſhall treat of them as they lie, from the Weſt to the Eaſtward.

1. *Gottenburg* is a fortified modern-built Town, the uſual Station of their *Eaſt-India* Shipping; and is the principal and moſt opulent Place in *Sweden* next after *Stockholm*. It contains about 13,000 Inhabitants, is neatly built, and has ſeveral Quays and Docks, and a College of Admiralty, and has alſo a Squadron of the Royal Navy uſually ſtationed there. It is well frequented by Merchant-Ships, ſo much the more as it lies without the *Sound*, and is therefore free from that *Toll*.

2. *Carleſcroon*, built on a little Iſle on the *Baltic*, joined to the Continent by a long Bridge. It is a ſtrong Town, has a good Harbour, and is therefore the uſual Station of moſt of the Navy-Royal. It conſiſts of 5,000 Inhabitants; which, as Towns generally go in *Sweden*, is deemed a very conſiderable and important Place; has a Royal Dock-yard, Royal Store-houſes, *&c.*

Bank of *Stockholm.*

Stockholm's Magnitude, *&c.*

3. *Stockholm*, (in North Latitude 59: 20) the Capital of the Kingdom, ſtands partly on Iſlands and partly on Peninſula's. It is the Reſidence of the Court, of the College of Commerce, of the National Bank, the Fund whereof (according to Dr. *Buſching*) conſiſts of about ſix Millions of Silver Dollars, of each 1 *s.* 6⅔ *d.* Sterling, in all 466.666 *l.* 13 *s.* 4 *d.* Sterling, (if he was rightly informed) beſide current Bills, to the Amount of *ſeventy* Millions. Which Bank has been of great Utility to the Crown and Kingdom, by advancing conſiderable Sums for the Service of the Public. Here is an Inſurance-Office, and a *Levant* Company. It contains twenty Pariſh Churches, in what is called the City alone, and above 5,000 Houſes, moſt of which ſtand on Piles, though intirely built with Stone, and are generally four or five Stories high, ſome of which are covered with Iron or elſe with Copper Plates, as others are with Tiles. Beſide theſe, there are a great Number of Timber Houſes in the Suburbs. And the Number of its Inhabitants who pay Taxes is computed to amount to 60,000. The *Danes* themſelves acknowledge this City to be ſomething larger than their own Capital of *Copenhagen*, ſo that *Stockholm* may be reaſonably ſuppoſed to contain 100,000 People. Here indeed is carried on the moſt Part of the Trade of the Kingdom, which well accounts for its Magnitude. Here alſo are its Navy and Admiralty Offices, the Royal Arſenal and Dock-yards; alſo a Royal Academy of Sciences, one for Military Architecture, and one for Painting and Sculpture, a College of Phyſicians,—an Inſurance-Office from Fire,—and a Cuſtom-houſe.——Her foreign and domeſtic Commerce is very conſiderable: Here is an excellent Harbour, where the largeſt Ships may lie cloſe to the Houſes; yet, by Reaſon of certain Rocks, its Entrance is ſomewhat difficult, though the Society of Pilots ſupplies that Inconveniency. Here are Sugar-houſes, Glaſs-houſes, Manufactures of Porcellane, Woollen, Silk, Cotton, Canvas, Parchment. In her Docks are many Ships conſtantly built. The principal Exports from hence are, Copper and Iron in great Abundance, Steel, Braſs, Latten-wire, Iron and Braſs Cannon, Maſts, Planks of Oak and Deal, Hemp, Tallow, Honey and Wax, Hides and Furs.

Her Commerce.

4. *Upſal* is a very ancient and conſiderably large City, with an Univerſity. It was anciently the principal Reſidence of the Sovereigns of *Sweden*. All its Buildings, however, are of Wood, the Cathedral and a few Stone Houſes excepted. It has three Churches: Which is all we can ſay about it, as it is no maritime Place.

5. *Gefle*, a Sea-port, on the Weſt Side of the Gulph of *Bothnia*, is a populous Town, and carries on a very advantageous Trade, with many Ships. It has a Dock for Shipping, a Cuſtom-houſe, an Arſenal or Magazine, a Gymnaſium, or Seminary for Youth, a Caſtle, and an Hoſpital. Yet Dr. *Buſching* thinks, That Two-thirds of its People are Fiſhermen; but the moſt principal are Traders and Manufacturers, though he does not tell us what they deal in; though probably it is in Timber, Metals, Hemp, and Peltry.

Abo is a Sea-port, the Capital of the great Dutchy of *Finland*, ſeated at the Point of the Angle formed by the Gulphs of *Bothnia* and *Finland*, and the moſt conſiderable Place in that Dutchy. It has a Caſtle and a commodious Harbour, and carries on a briſk Trade in Linen, Corn, Proviſions, and Timber.

Of the long-ſince united Kingdoms of DENMARK *and* NORWAY.

Denmark.

Although in the laſt Century there were ſcarce any Manufactures carried on in *Denmark*, (which were originally introduced (ſays *Buſching*) ſo late as King *Frederic* IV. who died *Anno* 1730, and by his Son King *Chriſtian* VI. who died *Anno* 1746.) yet there are now Artiſts of extraordinary Skill at *Copenhagen*; and at preſent every Branch of the mechanical Arts is well executed in *Denmark*.—Gold and Silver Lace, Silk Stuffs and Velvets, Woollen Cloths and Stuffs, Stockings, Tapeſtry, Hats, baſtard and genuine Porcellane, Fire-arms, Paper and Copper Mills, Iron Wares, one *Silk* and two *Cotton* Printing-houſes; with Manufactures alſo of Soap, Steel, Starch, Glue, Lacker, Sugar, Tobacco, *&c.* The Lace of *Jondern*, and the Gloves of *Randern* and *Odenſee*, are known to be excellent in their Kinds.——No foreign Manufactures are allowed to be imported into *Denmark*; and ſince the Year 1736, the wearing of Jewels, Gold and Silver Stuffs, and foreign Lace, have alſo been prohibited. In the Year 1738, a general Warehouſe was opened at the Exchange in *Copenhagen*, to which Manufacturers bring all the Wares which they cannot diſpoſe of in other Towns, and are paid ready Money for them. And from this Warehouſe the Goods are delivered out on Credit to Retailers. King *Frederic* IV. (who began his Reign in the Year 1699) may be deemed the real Founder of the *Daniſh Commerce*; the ſtrict Application to which partly appears by the great Number of their Ships annually paſſing the *Sound*; thoſe of the Year 1752, amounting to 850 Sail; and partly, alſo, from the ſeveral opulent Companies which have from Time to Time been eſtabliſhed at *Copenhagen*. The principal of theſe is the Royal *Aſiatic* Company, firſt erected in the Year 1716, which trades to *Tranquebar*, on the Coaſt of *Coromandel*, and alſo to *China*. [Here our Author, Dr. *Buſching*, was probably ignorant, that the *Danes* have been ſettled at the ſaid Fort of *Tranquebar* ever ſince the Year 1617, as in the Body of our Work under that Year.]

Bank of *Copenhagen.*

In the Year 1747, there was a general trading Company erected by Charter, for trading to *Spain*, *France*, the *Mediterranean*, the *Baltic*, and alſo to *Greenland* for Whale-fiſhing.—The incorporated *Iceland* and *Finmark* Company have monopolized the Trade to thoſe two Countries to the Year 1771. In *Denmark* (ſays our ſaid Author) the Imports always exceed their Exports; but in *Norway* it is quite the Reverſe. In the *Aſſignation*, *Exchange*, or *Loan-Bank*, at *Copenhagen*, eſtabliſhed *Anno* 1736, its Bank-Notes are drawn for 100, 50, and 10 Rixdollars, and paſs in all the King's Dominions as current Specie: Their Capital Stock being 500,000 Rixdollars, each worth 4 *s.* 6 *d.* Sterling. They lend out

Money (not under 100 Rixdollars) at 4 *per Cent.* Intereſt, on depoſiting a ſufficient Pledge, [in this reſembling the Royal Bank of *Edinburgh*, and with much the ſame Capital Stock.] At *Copenhagen* there is an Inſurance-Office for Ships; the Number of which, coming annually into that Port, is ſo very conſiderable (according to Dr. *Buſching*) that above 3,000 Veſſels, greater and ſmaller, laden with all Kinds of Merchandize, more eſpecially Proviſions, Timber, and Materials for Building, were entered at their Cuſtom-houſe in the Year 1752. [Here we may venture to preſume, that at leaſt three Parts in four of that Number muſt have been what we call, at *London*, *ſmall Craft*, or poſſibly many of them mere open Boats.]

The preſent *Daniſh* Fleet conſiſts of 34 Ships of the Line, 16 Frigates, and about 50 Gallies; and their Seamen about 4,400: But the Number of regiſtered Seamen, with which, on any Emergency, their Fleet may be manned, is about 24,000.

Copenhagen's Deſcription and Commerce.

1. *Copenhagen*, the capital City, on the fine Iſland of *Zealand*, makes a magnificent Appearance at a Diſtance. It is very ſtrong, contains four Royal Caſtles or Forts, ten Pariſh Churches, and nine other Churches of *Calviniſts* and other tolerated Perſuaſions, both *French* and *Dutch*, and ſundry good Hoſpitals. There is a conſiderable Number of public and private Palaces, above 4,000 Burghers Houſes, ſeveral of which are inhabited by *ten* or more Families; 11 Markets, or public Areas or Squares, 186 Streets, and according to ſome, near 100,000 Inhabitants. Since the Year 1746 its annual Bills of Births has amounted to at leaſt 2,592, and in ſome Years to 2,813 Perſons; and of Burials from 2,594 to 3,386; [which pretty well anſwers to our uſual Computation of 1 out of 33 dying annually in healthy Years.] Its principal Streets are built of Brick, but the Lanes moſtly of Timber: They are illuminated with Lanthorns; and the City may be deemed one of the moſt beautiful and magnificent Places in *Europe*. My Lord *Moleſworth*, about *ſixty* Years ago, reckoned it nearly equal to our City of *Briſtol*. *Copenhagen* has an Univerſity: It has one of the fineſt Harbours in *Europe*; and although it admits but of only one Ship to enter into it at a Time, it is however capable of containing 500. There are Canals in ſeveral of its Streets, as in *Holland* and *Hamburgh*, for Ships to lie cloſe to the Houſes.—Its Naval Arſenal far exceeds that of *Venice*.—Its Trade is conſiderably increaſed of late Years. In it are many Manufactories of Silk and Woollen Stuffs and Cloths, fine Linen, Gold and Silver Lace, Porcellane, *&c.* From hence, and from other *Daniſh* Ports, they export Horſes, Wheat, Barley, Rye, Butter, Tallow, Stock-fiſh, Train-Oil, Pitch and Tar, Iron and Timber; beſide great Numbers of horned Cattle, vended to *Holland* and other Parts.

2. *Helſinore* is a Town of ſome conſiderable Commerce: Here is paid the *Toll* for Ships paſſing the famous *Sound*, at its Royal Caſtle of *Kronenburgh*: At *Helſinore* all Nations trading into the *Baltic* have, for that End, their Conſuls. It is the beſt Town in the ſaid Iſle of *Zealand*, next to *Copenhagen*.

3. *Roeſkild*, in the ſame Iſland, was once the Capital of *Denmark*, and is ſaid to have been anciently of ſuch Magnitude as to have contained 27 Churches and Convents within its Walls; but ſince the Reformation of Religion, and the Increaſe of *Copenhagen*, it is become a mean Place.

In the great Peninſula of JUTLAND.

1. *Aalburg*, in *North-Jutland*, is a large, populous, and ancient City, and, next to *Copenhagen*, is the moſt opulent and beſt built one of the whole Kingdom. Here is a Merchants Exchange, and a ſafe Harbour, from whence are exported great Quantities of Herring, Grain, Fire-Arms, Saddles, and Gloves.

2. *Wiburg* has three Pariſh Churches, and twenty-eight Streets and Lanes, yet was anciently more conſiderable than at preſent.

3. In *South-Jutland*, or the Dutchy of *Sleſwick*, is the Town of *Appenrade*, one of the beſt and moſt flouriſhing of that Country. It ſtands on a Bay of the *Baltic*; is noted for Ship-building, and a conſiderable Trade.

NORWAY, *with the Iſles of* Ferroe *and* Iceland, *and the Country of* Groneland.

Norway is for the moſt Part a rocky, mountainous, and barren Country; though with here and there ſeveral fertile Parts. Its Scarcity of Bread-Corn is in ſome Meaſure compenſated by its immenſe Quantities of excellent Timber, chiefly of the Fir and Pine Kinds; which they export to many Parts of *Europe* in ſuch Quantities, that the Fir Timber alone is ſaid to bring in a Million of Rixdollars annually, *viz.* for Maſts, Beams, Balks, and Deal-boards, with other Houſe and Ship Timber. In other Parts, as in the Diſtricts of *Bergen* and *Drontheim*, they export vaſt Quantities of ſalted Fiſh in Barrels, and alſo *Cod*, ſplit and dried in their cold Air, merely without any Salt, called *Stock-fiſh*; alſo pickled and dried *Salmon*, much Train-oil, or Whale-oil; immenſe Quantities of Marble; alſo Touch-ſtone, Alabaſter, Slate, Mill-ſtones, Agate, and Jaſper. They have alſo Pearl-fiſheries, two *Silver* Mines, five *Copper* Mines, and fifteen very profitable *Iron* Mines, with ſome Lead and Alum Mines. Yet they have not Salt enough of their own Produce to ſupply their large Fiſheries.

Their beſt Cities and Towns are,

1. *Chriſtiana*, the capital and beſt City of the Kingdom. It is regularly built, at the Bottom of an Inlet or Bay; is of a conſiderable Extent, and carries on a great Trade.

2. *Kongberg* is a flouriſhing Town of about 11,000 People, owing to a very rich Silver Mine diſcovered in the Year 1623, which gave Birth to this Town, immediately peopled with *German* Miners.

Dr.

Dr. *Buſching* thinks, that no fewer than 3,500 Perſons, Officers, Artificers, and Labourers are employed on this Mine; which alſo produces ſome Gold.

3. *Bergen* is the largeſt City, and enjoys the greateſt Commerce of any Place in *Norway*. Its Harbour is defended by Forts, and by neighbouring Mountains. All its ſix Churches, public Edifices, and moſt of the Houſes along the Strand or Shore, are built of Stone; although, till of late, they were moſtly built of Timber: In Times preceding the Reformation, it is ſaid to have contained thirty Churches and Convents. It carries on a very great Trade in Furs, Stock-fiſh, Tallow, Hides, and Timber.

4. *Drontheim*, a Sea-port on the River *Nid*, is well fortified, has now but two Churches, (though in Times of Popery it had ten Churches and five Convents.) It, however, carries on a conſiderable Trade in Timber, Fiſh, Tallow, and Copper; and they have lately erected a Sugar-houſe. Here is a fine Cathedral-School, a Seminary for Miſſionaries, an Orphan-houſe, a Workhouſe, and an Hoſpital.

The *Norwegian* Iſlands.

Ferroe Iſles.

1. The *Ferroe* Iſles lie in the Northern Ocean, about 170 Leagues South of *Iceland*, (and not quite half ſo much Weſtward from his *Britannic* Majeſty's *Shetland* Iſles) and ſomewhat farther to the Weſt of *Norway:* They are twenty-five in Number, though only ſeventeen of them are inhabited, lying between the Degrees of 61 deg. 15 m. and 62 deg. 10 m. They are, in effect, ſo many ſolid Rocks, the Surfaces whereof are covered with Earth to the Depth of an Ell; which ſhallow Soil is ſo fertile as to yield twenty for one in Corn.—— Their Paſtures are excellent, eſpecially for Sheep; in the numerous Flocks of which the Wealth of the Inhabitants conſiſts.——Their Merchandize ſold to Foreigners, are, Salted Mutton, Gooſe-Quills, Eider-Down, Feathers, Knit Woollen Waiſtcoats, Caps and Stockings, Tallow, *&c.* Their Religion is *Lutheran*; and but ſeven Preachers, under a Superintendant, have the Care of thirty-nine Churches.——In *Stromoe*, the largeſt Iſle, there is a ſmall Town named *Thorſhaven*, defended by a Fort, where there is a little School; and this Place is the common Market for all thoſe Iſles.

Iceland Iſland.

2. The Iſland of *Iceland* lies about 120 *Norway* Miles diſtant Weſtward from *Drontheim*, and about 60 Southward from *Greenland:* It is moſtly a mountainous Country, yet there are Roads practicable for a Horſe in all Parts of the Iſland. Carriages were formerly uſed, but are now laid aſide, as the Trouble attending them was too great.——Every Year ſome Hundreds of Pack-horſes come over the Mountains from the *North*, to the trading Places in the South Parts of the Iſland, laden with Butter, Woollen Manufactures, *&c.*——*Iceland* has many fiery Irruptions, beſide the famous burning Mountain of *Hecla*.

Its Productions.

No Corn will grow in *Iceland*, wherefore the Commonalty content themſelves without it, by means of dried Fiſh and Fleſh, and of a certain Sea Vegetable dried at the Fire.——They have Plenty of Sheep, for whoſe Benefit Nature ſeems to have provided Shelter, in Winter and other ſevere Weather, by the many large Caves in the Earth, whither they retire.——They have alſo Plenty of Horſes, which, though ſmall, are full of Spirit, and lie in the open Air all the Year round, excepting ſuch as are broke for the Saddle; and in Winter they ſubſiſt only on what Fodder they can ſcrape from under the Ice and Snow, as do likewiſe the Sheep when the Snow is not very deep, and the Weather happens to be fair and mild. But if the Sheep happen to be ſurprized by a great Snow, they immediately form themſelves into a cloſe compacted Body, by laying their Heads together in the Centre, till their Owners come to help them; though ſometimes they periſh before Relief comes, through the Weight of the Snow.——Their Oxen and Cows, in the South Parts, are fed with Fiſh-bones, and the Water in which the Fiſh is boiled.——Here are no Hogs; and tame Poultry are too expenſive to be generally kept; but there is Plenty of Wild-fowl. The uſual Food is freſh and dried Fiſh, dreſſed with Butter, with Milk, Oatmeal, and Fleſh; and their common Drink is Milk, or Milk and Water; though the more wealthy are fond of Beer and ſpirituous Liquors; and the *moſt wealthy* ſometimes purchaſe Red and White *French* Wines.

Iceland's Commerce.

The Commerce of *Iceland* is now confined to a Company at *Copenhagen*, eſtabliſhed by a Royal Charter, *Anno* 1733, who annually ſend twenty-three Ships thither; ſome to *Fiſh* Ports, others to *Fleſh* Ports. The Cattle are delivered to the Factors at the *Fleſh* Ports; and at the Fiſh-Ports the Factors purchaſe all the ſound dried Cod and Ling, and alſo the Train-Oil, according to the fixed Rate. The *Icelanders* either barter their Commodities for thoſe of *Denmark*, or elſe receive *Daniſh* ready Money for them.—— Accounts are kept here, and all Calculations are made by Fiſhes, forty-eight of which being deemed equal to a Specie Dollar.——Their general Exports are chiefly dried Fiſh, ſalted Mutton and Beef, Butter, Train-Oil, Tallow, coarſe and fine Jackets of their Woollen Cloth called *Wadmal*, Woollen Stockings and Gloves, Red-Wool, Sheep-ſkins and Lamb-ſkins, Fox-Tails, Feathers, and Quills. They have a Printing-Preſs at *Hoolar* or *Holum*; and in every Biſhop's See there is a public *Latin* School, as a Seminary for the Clergy, from whence they go to the Univerſity of *Copenhagen*. The Number of the Inhabitants of *Iceland* is about 50,000.

They have no Towns, properly ſo called, nor ſcarcely any deſerving the Name of a Village.

This Account of *Iceland*, given by Dr. *Buſching*, is by far the beſt hitherto publiſhed.

Old-Greenland.

Greenland, (by which we by no Means underſtand *Spitzbergen*, but the Country often named or called *Old Greenland*), as far as is hitherto certainly known, is probably a Part of, or joined to the great Continent of *North-America*. In the Body of our Work, under the Year 817, is ſeen how early ſo inhoſpitable a Country was known to and planted by the *Norwegians*.——That, *Anno* 1070, it was by them chriſtianized; and that it was unaccountably loſt about the Year 1348: And that, after ſome fruitleſs Attempts, it was again re-colonized by *Denmark* in 1751. It has at preſent, (ſays Dr. *Buſching*) four *Daniſh* Colonies, and one *Moravian* Colony, where there are Chriſtian Congregations and Miſſionaries:

And the *Greenland* Company of *Copenhagen* [eſtabliſhed *Anno* 1751] ſend thither three or four Ships annually, for the Trade of Peltry, Whale-fins, and Train-Oil.

GERMANY.

Its comparative Magnitude in reſpect to *France*.

This Country (according to Dr. *Buſching*) is 1000 ſquare *German* Miles [each equal to four *Engliſh* ones] larger than *France*, with all its modern Acquiſitions.

Germany's Rivers.

Woods.

The Rivulets running down from the *Alps* into the *Rhine* convey with the Sand many Particles of *Gold*. ——*Chryſtal* is alſo found in the *Upper Rhine*.——Plenty of Fiſh in all its Rivers, and of the beſt and greateſt Variety of Timbers in its Foreſts and Woods.——Many Olive-Trees; and intire Woods of Cheſnut and Walnut-Trees. In her Woods alſo are made much Potaſh, Pitch, and Charcoal. In ſome Parts, for the Cultivation of *Silk*, there are great Numbers of white Mulberry-Trees.

Its Soil, and its native Productions.

Its ſoil produces all ſorts of Grain in great Plenty, of which conſiderable Quantities are exported.

Materials for Commerce.

Its native Materials for Commerce are Hemp, Flax, Hops, Aniſe, Cummin, Tobacco, Saffron, Madder, Truffles; Variety of excellent Roots and Pot-herbs. Fine Fruits, equal to thoſe of *France* and *Italy*.—Excellent *Rheniſh*, *Moſel*, *Muſcadel*, and other *Wines*, ſome of which exceed thoſe of *France* and *Hungary*.—All Sorts of good Cattle in the greateſt Plenty, alſo the beſt of Cheeſe and Butter.—Tame and wild Fowl of the beſt Kinds.—Salt Springs.—Pearls, various precious Stones.—Vitriol, Allum, Saltpetre, Pit-coal, black and yellow Amber, Sulphur, Quick-ſilver, Virgin-Silver, Cinnabar, Arſenic, Cobalt, Antimony, and Lapis Calaminaris.——Of Metals, ſhe has Iron, Steel, Copper, Lead, and Tin: alſo Loadſtone.

Number of its People.

Dr. *Buſching* thinks it very probable, that *Germany* contains 24 Millions of People, ſuppoſing *France* to contain 20 Millions. Yet others think, that *Germany* does not contain above 20 Millions, and *France* ſcarcely 17 Millions; more eſpecially conſidering her late ruinous Wars.

Exportations.

Germany is doubtleſs very advantageouſly ſituated for Commerce, lying in the Middle of *Europe*,— open to three different Seas, having many Rivers navigable a vaſt Way up into its inland Parts; from whence come down, and are exported to other Countries, Corn, Tobacco, Horſes, Lean Cattle, Butter, Cheeſe, Honey, Wax, Wines, Linen and Woollen, Yarn, Ribbons, Silk and Cotton Stuffs, Toys, Turnery Wares in Wood, Metals, and Ivory, Goat-ſkins, Wool, Timber, both for Ship-building and Houſes, Cannon and Bullets, Bombs and Bomb-ſhells, Iron-plates and Stoves, Tinned Plates, Steel Work, Copper, Braſs-wire, *Porcellane* the fineſt upon Earth, Earthen Ware, Glaſſes, Mirrors, Hog's Briſtles, Mum, Beer, Tartar, Smalts, Zafer, *Pruſſian* Blue, Printers Ink, and many other Things.

The Circle or *Upper Saxony*.

In order to the mercantile and political Deſciption of this large Empire, we ſhall begin with *Upper Saxony*, as lying remoteſt and fartheſt North in reſpect to us.

UPPER-SAXONY.

The Electoral Dominions of his *Pruſſian* Majeſty in *Germany* are,

Pruſſian-Pomerania.

I. *Brandenburg* (or Eaſtern) *Pomerania* yields Plenty of all good Things, Wine only excepted; as, Timber both for Houſes and Shipping, Pitch and Tar, Flax and Hemp, Grain of all Kinds, and Salt-works. Its Geeſe are famous for the Largeneſs of their Size, and dried *Pomeranian* Geeſe, Hams, Sauſages, and Salmon, are eſteemed the beſt in all *Germany*. Its extended Coaſt along the *Baltic* Shore, to the Confines of *Poliſh Pruſſia*, as well as on the Eaſt Coaſt of the great River *Oder*, is extremely beneficial to Trade and Navigation.

Stettin's great Exportation in one Year.

Of the Places of *Pruſſian* or *Brandenburg Pomerania*, where Manufactures flouriſh, the principal are, *Stetin*, (the capital City of the whole Dutchy of *Pomerania*) *Stargard*, *Colberg*, *Coſlin*, *Camin*, and *Corlin*. The Commerce of *Stettin* may be gueſſed at, (ſays Dr. *Buſching*) from whence, in the Year 1756, there were exported to *England*, *Holland*, *France*, *Spain*, *Denmark*, *Norway*, *Sweden*, *Mecklenburg*, *Pruſſia*, *Dantzick*, *Lubeck*, and *Hamburg*, 10,089 Pound Weight of *Blue-Starch*, [though not a Manufacture of this Country, but imported,] 72,210 Pounds of *Antimony*, 1,171 Hundred Weight of *Arſenic*, 106 Hundred Weight of *Tin-Plates*, 106 Pieces of *Dimity*, 251 Pieces of *Flannel*, 107 Tons of *Lapis Calaminaris*, 6649 half Cheſts of Glaſs, 17,608 Rix-dollars worth of *Holland* Glaſs, 33,186 of *Cords* [ſo the *Engliſh* Tranſlation has it] of Wood for Fewel, 130,966 Rix-dollars worth of Timber for building, 1401 *Schock* [" a *Schock*" (ſays the Tranſlator) "*is any Number of Sixty*," which is quite unintelligible] of Guiacum, 2598 *Schocks* of Clap-boards, 30 Maſts, 5179 Planks, 8916 Rix-dollars worth of Ship-Timber, 22,861 *Schocks* of Pipe-ſtaves, 8108 *Schocks* of Hogſhead-ſtaves, 32,814 *Schocks* of Ton-ſtaves, 22526 Rix-dollars worth of Haberdaſhery-Wares, 24 Cheſts of Cord, 436,960 Stone-blocks, 639 Hundred Weight of Glaſs, 147 Tons of *Potaſh*, 408 Hundred Weight of Madder, 1830 Hundred Weight of Scythes, 233 Tons of Sope, 5812 Hundred Weight of Tobacco, 3448 Pieces of Woollen Cloth, and 775 Hundred of *Poland* Wool: All which Goods were exported in 1671 Veſſels, beſide 97 which went away in Ballaſt.

Stetin's Magnitude.

The Tranſlator has, we imagine, rightly named them *Veſſels*, as probably many of them were of ſmall Burden. This brief Catalogue of Merchandize gives a very favourable *Idea* of the Commerce of *Stetin*, as well as a View of the Productions of *Pomerania*. That City is ſeated on the Left of the *Oder*, and is large, handſome, and well-fortified; has a Chamber of Commerce, a royal *Gymnaſium* or capital School, and an Arſenal; has ſeven *Lutheran* Churches, a *French Calviniſt* Church, and a *Popiſh* one;

a Court of Admiralty, a Dock for Shipping, many and great Variety of Manufactures, and an extenſive foreign Commerce: In its Caſtle all the Courts and Colleges of the Province have their Meetings and Records. This City, and all the Countries betwixt the Rivers *Pene* and *Oder*, with the Iſles of *Wollin* and *Uſedom*, were yielded for ever by *Sweden* to the King of *Pruſſia*, by the Treaty of *Stockholm*, *Anno* 1720; in Conſideration whereof, the King of *Pruſſia* paid 200,000 Rix-dollars to *Sweden*.

2. *Anclam*, on the *Peine*, contains two Churches, and has improved its Commerce ſince it came under the *Pruſſian* Dominion.

3. The Iſland of *Uſedom*, with a Town of the ſame Name, and the *Peinemunder Schanz*, commanding the Entrance into the *Peine*. On the North Side of this Iſle, next the *Baltic*, ſtood the once famous Town and Port of *Winet*; which with much adjoining Land was ſwallowed up by an Inundation in the VIIIth or IXth Century, or, as others write, was deſtroyed by the *Danes*. Dr. *Buſching* relates, that, at low Tides in the *Baltic*, ſome Ruins of that Place are ſtill viſible, at the Diſtance of half a *German* Mile from the Iſland.

4. In the Iſle of *Wollin*, North of the *Friſch-haff*, ſtands its chief Town named *Wollin*, on the Scite of the ancient City of *Julin*, once ſo famous for Commerce; though of a very obſcure Origin. [See our main Work, under the Years 1080 and 1182.]

5. *Damm*, a ſmall Town, in which is a fine Steel Manufacture.

6. In what is called the proper Dutchy of *Pomerania*, lies *Stargard*, the Capital of the Eaſtern *Pomerania*, having, by means of the River *Ibna*, a Communication with the *Baltic* Sea. It is large, well built, has four Churches, and ſome charitable Foundations, ſeveral good Manufactures, and a conſiderable Commerce.

7. *Cammin*, with its Suburbs, makes at preſent a good Figure, by means of its Navigation, Fiſhing, and Agriculture.

8. *Belgard*, in the County of *Caſſubia*, has a Caſtle and Provoſtſhip, with a good Trade.

9. And the like of *New Stetin*, built after the Model of the capital City of that Name.

10. *Rugenwald*, on the *Baltic* Shore, is a large and well-built Town; and

11. *Rummelſburg*, a Town where there is a *Cloth Manufacture*.

12. *Stolpe*, a Town having two *Lutheran* Churches, and one *Calviniſt* one. It has a great Linen Trade, and deals largely with *Dantzick*, from which it is diſtant about fifteen *German* Miles. Here are made very curious Toys in *Amber*.

13. *Colberg*, a well fortified and conſiderably large Town, on the *Baltic* Shore, (of which it gave ſufficient Proof in the Year 1761, when beſieged and taken by the *Ruſſians*.) By means of its good Woollen and Linen Manufactures, its Trade with neighbouring *Poland*, and by its numerous Shipping, it is at preſent in a thriving Condition; having four Pariſh-Churches, and being noted alſo for the profitable Salt-Pits in its Neighbourhood.

14. *Coſlin*, a fair and newly re-built Town, with ſome Manufactures; and

15. *Corlin*, a ſmall Place, having, however, ſome good Woollen Manufactures.

This is the epitomized Subſtance of the preſent State of the *Pruſſian*, and by far the beſt Part of the large Dutchy of *Pomerania*; which, according to Dr. *Buſching*, at preſent yields about five Times as much Revenue to its Sovereign, as does the *Swediſh* Part of *Pomerania*.

Swediſh Pomerania.

II. *Swediſh Pomerania* was originally larger than at preſent.

1. In it lies the Principality and Iſland of *Rugen*, with ſeveral adjacent Iſles, containing twenty-ſeven Pariſhes. That Iſle has, in ancient Times, made a much greater Figure than at preſent. It abounds in Grain and Cattle; but *Bergen*, its chief Town, though the Seat of its Government, is both open and ſmall.

Straelſund.

2. On the Continent oppoſite to and about an *Engliſh* Mile diſtant from *Rugen*, ſtands the ancient, and once much more famous than at preſent, City and Port of *Straelſund*, the Capital of *Swediſh Pomerania*, of old an eminent Member of the *Hanſeatic* League. At preſent its Citizens ſtill form a numerous Body, amongſt whom are many ſubſtantial Merchants. Here is a *Gymnaſium*, or illuſtrious Academy. Its principal Commerce is in Corn, Pitch, Tar, Roſin, Hides, Tallow, Honey, and Wax. It is almoſt, however, needleſs to add, that this City has greatly declined ſince it loſt its more free Condition.

3. *Gripeſwald*, a Sea-port and Univerſity, (once a Hanſe-Town;) it has three Pariſh-Churches, and a good Trade in Corn, Hides, and Tallow.

4. *Wolgaſt*, is a decayed Sea-port Town, which, after many Diſaſters, has ſtill ſome Commerce.

Dr.

Swediſh Pomerania, its Revenue.
Pruſſian Pomerania's Revenue,
The Number of People in both *Pomerania*'s.

Dr. *Buſching* thinks, that the intire Revenue of *Swediſh Pomerania* does not exceed 124,000 Rix-dollars; whereas that of *Pruſſian Pomerania* may amount to 800,000 Rix-dollars: That, in the intire Dutchy, there are twenty-eight Towns: And that, in common Years, there die annually 12,000 Perſons; which, multiplied by 33, makes the whole Number of Inhabitants to amount to 396,000, and not 460,000, as that Author's Computation makes them amount to.

The Electorate of *Brandenburg*.

In general it may be obſerved, (with Dr. *Buſching*) That the *Mark* or Marquiſate of *Brandenburg*, under King *Frederick-William*, and his great Son, King *Frederick* II. has acquired a new and more pleaſing Form. Agriculture has, under the Reigns of thoſe two great Princes, been almoſt marvelouſly improved;—waſte and barren Lands have been cultivated;—ſuperfluous Woods grubbed up, and Villages erected in their Stead;—deep Moraſſes drained, and rendered fertile. Its remaining Woods and Foreſts rendered more ſerviceable, not only for common Fuel, but for Glaſs-houſes, Forges, Charcoal, Tar, Pot-aſh, Houſe and Ship-Timber, the latter partly exported to *Hamburg*, *Holland*, and other Countries. Here grow, in Abundance, Millet, Buck-wheat, Flax, Woad, and Tobacco.—From their fine Wool many good Manufactures have been eſtabliſhed.—The Culture of *Silk* has ſucceſsfully been propagated, and is conſtantly increaſing. This Country alſo produces *Alum*, *Saltpetre*, *Amber*, Porcellane Earth, and Iron-Stone. The *Elbe* and *Oder*, two of the greateſt and moſt navigable Rivers in *Germany*, running through this Marquiſate, are of very great Benefit.——The great Elector *Frederick-William* did, in ſix Years Time, *viz.* between 1662 and 1668, join the Rivers *Spree* and *Oder*, by means of a Canal three *German* Miles [or twelve *Engliſh* Miles] in Length.——The *Havel* and *Oder* have been joined by his preſent Majeſty, between the Years 1743 and 1746, by a Canal having thirteen Sluices. And the ſame great Prince, between 1743 and 1745, cauſed a Canal to be dug 4¼ *German* Miles in Length, with three Sluices on it, from the River *Elbe* to the River *Havel*; whereby the Water-carriage between *Berlin* and *Magdeburg* is ſhortened about one half, and nine different Bridges are laid over it. Moreover, what is called the *Oder* Canal, runs out of the *Oder* at a certain Place, and, for the like ſhortening of the Water-Paſſage, enters that River again; which Canal was opened *Anno* 1753. There are alſo diverſe inland Lakes, between which a Communication has been made by means of Canals and Sluices. Theſe are truly magnificent Works. Yet we have ſtill more to relate.

Brandenburg's vaſt Improvements within an hundred Years paſt.

It ſeems, that, by Wars, Famine, and Peſtilence, this Country was become much thinned of Inhabitants; for the ſupplying of which, and out of Regard to his diſtreſſed *Proteſtant* Brethren, the Elector *Frederick-William* invited the *French* Refugees, driven from home by their King *Louis* XIV. to come and ſettle here, where he beſtowed on them conſiderable Benefits and Immunities, which were farther enlarged by his Son *Frederick* I. created King of *Pruſſia*; whereby many hundreds of Families were induced to ſettle here. Moreover, ſince the Year 1688, ſundry *Lorrainers*, *Walloons*, *Switzers*, *Bohemians*, and other *Germans*, have been kindly received here. By all which Acceſſions, the Number of this Marquiſate's Inhabitants were, in the Year 1756, computed to amount to 800,000, the Majority of which are of the *Lutheran* Communion.

The Marquiſate of *Brandenburg* is vaſtly improved by the Acceſſion of *French* Refugees.

Thoſe *French* Refugees have introduced many fine and profitable Manufactures into this Country, to which they were formerly utter Strangers; principally at *Berlin* and *Potſdam*: As Woollen Cloths, and Stuffs of many Kinds;——wrought Silks and Silk Stuffs, Velvets, Tapeſtries, Gold and Silver Lace, &c.

Its modern Materials for Commerce.

In this Marquiſate are made Alum, Saltpetre, Gunpowder, fine Porcellane, wrought and caſt Iron, Steel and Braſs Work, Military Weapons of all Sorts, excellent Mirrors; here alſo are Sugar-houſes, wrought Leather, and Tobacco Plantations. At *Berlin* alſo are excellent Painters, Engravers, Statuaries, Enamellers, Jewellers, Goldſmiths, Mathematical and other Inſtrument Makers. By all which Means, a Saving is not only made of much Money kept at home, but very large Quantities of the before-named Merchandize are exported to foreign Countries, to a great Amount, through the Conveniency of the above-named Rivers and Canals.

The Number of his whole People.

Computation of the Number of *all* the People in his *Pruſſian* Majeſty's Dominions,

Dr. *Buſching* ſays he is well informed, That in all his *Pruſſian* Majeſty's Dominions, on a Medium of ſix Years, from 1750 to 1756, there are annually chriſtened 166,567 Children; and about 125,348 Perſons die annually; therefore, according to him, this laſt Sum, multiplied by 38, gives the whole Number of his Majeſty's Subjects to be 4,763,224. Yet we are apprehenſive, that this is a conſiderable Miſcomputation, if we are to be guided by moſt other careful Obſervers, and that even in healthy Years and Countries, there probably dies one out of 33, but in great and voluptuous Cities one out of 30, and that, even allowing the Multiplier to be 33, the Number of People will be only 4,136,484, in all that King's Territories; although that Author obſerves, that ſome have eſtimated them to amount to five Millions of People.

and of his intire annual Revenue.

Our ſaid Author informs us, That the intire annual Revenue of his *Pruſſian* Majeſty's Territories are computed to amount to near 20 Millions of Dollars, or between 4 and 5 Millions *Sterling*.

I. In the *Old Mark* (or Marquiſate) are the following Towns, *viz.*

1. *Stendal*, its chief Town, (formerly a Member of the *Hanſe* League) contains four Pariſh Churches. Here the *French* Refugees have introduced ſundry good Manufactures.

2. *Soltwedel* has alſo four Pariſh Churches; and a good Manufacture of Cloth, Frizes, Serges, Stockings, and Linen; and ſells much Beer to other Parts. It was alſo formerly a *Hanſe* Town.

3. *Gardelegen* has two Churches, four Hoſpitals, (two of which alſo have Churches or Chapels.) It has a *Cloth Manufacture*.

Upper Saxony. The Electorate of *Brandenburg.*

In the Diſtrict of *Prignitz*, are,

4. *Perlberg* has two Churches, and 369 Dwelling-houſes, but no particular Manufacture.

5. *Havelberg*, on the *Havel*, diſtils and vends great Quantities of Brandy, makes many Knit-Stockings, builds many Boats for the *Elbe*, on which it ſends down vaſt Quantities of Cord-Wood.

II. In the *Middle Mark*, are,

1. *Brandenburg*, on the *Havel*, contains four Churches, and about 1200 Inhabitants. A ſmall Colony of *French* Refugees have here introduced Manufactures of Woollen Cloth, Fuſtian, and Canvas; and, in general, a tolerable Trade by Land and Water; having been formerly a *Popiſh* Biſhoprick, it has ſtill a *Proteſtant* Chapter.

2. *Potſdam*, on the *Havel*, beſide having a favourite royal Palace, has alſo many fine Houſes, and four Churches. Its large Orphan-Hoſpital maintains and educates 2000 Children of Soldiers of both Sexes, having both a *Lutheran* and *Calviniſt* Preacher. At this fine Town is a great Foundery for Artillery; alſo ſundry Manufactures of Silk, Velvet, *&c.* Here alſo are noble Conveniencies for the Horſe and Foot-Guards.

3. *Spandau* is a very famous Fort, has an excellent Foundery for Artillery, is a thriving little Town, with a Spinning and Correction-Houſe.

Berlin.

Berlin's very great and numerous Manufactures, and its vaſt Increaſe in about ſeventy Years.

4. *Berlin*, on the River *Spree*, is the capital Reſidence of the King, and the Head of all his Dominions; one of the largeſt, fineſt, and moſt populous Cities in *Germany*; containing many fine Palaces, (beſide the King's) and many beautiful Streets and Squares, with twenty-five Churches, *viz.* fourteen *Lutheran* and eleven *Calviniſt* ones, and alſo one *Popiſh* Church: It has ſundry polite Academies, Theatres, Schools, and two Libraries. Here were reckoned, (ſays Dr. *Buſching*) in the Year 1755, 5826 Houſes, and (including the Garriſon, their Wives and Children) it then contained 126,661 Inhabitants. It has many excellent and important Manufactures and rich Fabrications. In *Coln*, on the other Side the River, is the King's Palace, and many other fine ones.——— ☞ The great Increaſe of *Berlin* is almoſt intirely owing to the *French Proteſtant* Refugees, who are here in vaſt Numbers, and have ſeveral Churches. It was they who firſt brought Manufactures and Trade into great Credit; ſeeing, till then, there were but about 14,000 People in *Berlin*, *i. e.* till about the Year 1690. In the Year 1755, there were no fewer than 443 Silk-Looms, 149 of half Silks, 2858 Looms for Woolen Stuffs, 453 for Cotton, 248 for Linen, 454 for Lace-Work, 39 Frames for Silk Stockings, and 310 for Worſted ones. They have here Manufactures of Tapeſtry, Gold and Silver Lace, Mirrors, *&c.* Here alſo are many charitable Foundations, and very prudent Regulations: Here alſo are ſeveral Salt and Sugar-Houſes.

In its Neighbourhood are ſundry ſmall Towns, in one of which, named *Strauſberg*, the Inhabitants are moſtly Clothiers, ſupplying a great Part of the Army with *Bayes:* Near it alſo are Braſs-Works, Black and white Tin-Plate, and poliſhed Steel Manufactures. The River *Spree*, communicating by Canals both with the *Elbe* and *Oder*, brings up to *Berlin* great Barks continually from *Hamburg* and other Cities.

Remarks on *Berlin*'s vaſt Increaſe, with a Compariſon between it and *Peterſburg*'s more rapid Progreſs.

We are principally indebted to Dr. *Buſching*'s new Geography, for this fine Account of *Berlin*'s vaſt Improvements in ſo ſhort a Space, which, as well as that of *Peterſburg*, may ſhew what wiſe and reſolute Meaſures can effect when ſteadily purſued, for the Advancement of Commerce and Riches, and the Increaſe of uſeful Subjects. A manifeſt Difference is, however, obſerveable between the Advancement of the ſaid two Cities; the latter rapidly, compulſively, and arbitrarily effected, and therefore more likely to be leſs permanent; ſince a future equally deſpotic Monarch may poſſibly diſlike the Situation of ſo damp and cold a Place, and, by the Return of the Court to *Moſcow*, or to ſome other City, much of the Commerce of *Peterſburg* may be diſſipated; whereas the Advancement of *Berlin*, though not ſo rapid as the other, has been brought about by well-concerted, kindly and gently-attractive Meaſures, and therefore more likely to prove durable.

In the Circle of *Lebus*, lies,

1. *Francfort* on the *Oder*, (once a Hanſe Town) having an Univerſity, three *Lutheran* and two *Calviniſt* Churches. It has a tolerable Trade in Linen and Woollen Goods, and has two annual Fairs to which many *Jews* reſort from *Poland.*

2. *Lebus* is an inconſiderable Town on the *Oder.*

3. *Ruppin* has above 800 Burghers, (as Dr. *Buſching*'s *Engliſh* Tranſlator darkly expreſſes it) two *Lutheran* Churches, and one *Calviniſt* one. It deals largely in Woollen Cloth of its own Manufacture, and likewiſe in Grain and Beer.

4. At *Nieuſtadt* is a Glaſs-houſe, and alſo one for caſting of Mirrors.

In the *Ucker-Mark*, the only City of Eminence, in a mercantile Senſe, is *Prenſlow* its Capital, on the *Ucker.* It is large and well built, and has a numerous *French* Colony. It contains ſix Churches; has a good Manufacture of Woollen Cloth, and a large Trade in Corn, Tobacco, and Cattle.

The *New-Mark* contains,

1. *Cuſtrin*, its Capital, on the *Oder*, is an exceeding ſtrong Town, having three Churches, two Hoſpitals, and a Workhouſe, though little of any Thing commercial.

2. *Landſberg*, on the *Warta*, is well built; has three Churches, and ſome fine Woollen Manufactures.

3. *Croſſen*, Dutchy, was formerly, as well as *Sileſia*, (of which ſome deem it a Part) ſubject to *Poland.* The Town of that Name ſtands on the *Oder*, and has two *Lutheran* Churches, and one *Calviniſt* Church:

It has ſome Woollen and Linen Manufactures, and makes ſome Wine in its Neighbourhood, though not eſteemed very good.

4. *Cotbus*, near the River *Spree*, has three *Lutheran* and two *Calviniſt* Churches, and ſome good Woollen Manufactures, and certain charitable Foundations.

I. In *Upper-Saxony* Circles, all its *twenty-two* States or Sovereignties are *Proteſtant*, the Electoral Houſe of *Saxony* [of late Years] excepted.

The Electorate of *Saxony*'s Productions,

The Electorate of *Saxony*, taken in general, is one of the beſt Countries in all *Germany*, abounding in all Kinds of Grain, Fruits, Corn, Metals of all Kinds but Gold, Antimony; [the *Silver* Mine near *Friburg* (according to Mr. *Nugent*'s *Grand Tour)* produces, every fifteen Days, to the Value of 20,000 Dollars] Pitch and Tar, Hops, Flax, Wine, (though chiefly only in *Miſnia)* Tobacco, Aniſe, Saffron, Pit-coal, Fullers Earth, *Porcellane*, Marble, precious Stones, [as *Diamonds*, Topazes, Hyacinths, Rubies, Granates, Amethiſts, Sapphires, (ſays Dr. *Buſching)* Opals, Cornelians, Agates, and Jaſper] Salt-works, Cinnabar, Sulphur, Quickſilver, Amber, and Cobalt, whereof Smalt, or a blue Colour, is made in vaſt Quantities, and in the greateſt Repute, much of which is exported, to great Profit.

and its Number of Towns and Villages. Its Manufactures, and other Materials for Commerce.

This Electorate contains 210 walled Towns, 61 Market-Towns, and about 3000 Villages. The *Manufactures* here are fine and coarſe Linen and Thread in great Quantities, Ticking, Canvas, Fuſtians, Cottons, fine Lace, Ribbons, Paper, the fineſt Porcellane, Glaſs of many Kinds, Variety of Iron, Steel, and Braſs Manufactures, Gold and Silver-Stuffs, Woollen Cloth, Flannels, Frizes, Stuffs, Stockings, Fabricks of Silks, Velvets, Pluſh, Handkerchiefs, Hats, Gloves, Caps, fine Tapeſtry, Starch, and many other Articles: By all which an important foreign Commerce is carried on.

Revenue of the Electorate of *Saxony*.

Mr. *Nugent*, in his *Grand Tour*, thinks the Revenues of this Electorate may amount to near eight Millions of Rix-dollars; but Dr. *Buſching's* Opinion is, that they are between ſix and ſeven Millions; we will therefore ſuppoſe them only to be ſix Millions; at 4*s.* 6*d. per* Dollar, it amounts to 1,350,000 *l. Sterling*.

In the proper Dutchy of *Saxony*, lie,

1. *Wittenberg*, near the *Elbe*, has a famous Univerſity; and, though not large, has an Arſenal and Fortifications; but nothing memorable in reſpect to Commerce.

2. *Herzberg*, deals in Wool, and has Woollen Manufactures, and *Saltpetre* Works.

Thuringia.

In the Landgraviate of *Thuringia*, lies,

1. *Weiſſenfels*, a well built and fortified City on the *Sala*, having three Churches, and has Manufactures of Silk and Velvet, with ſome charitable Foundations.

2. *Langenſalza*, on the *Salza*, has two Churches, and about 900 Houſes: Its Manufactures conſiſt in Half-Silks and Woollen Stuffs, and it deals in Corn and Grain.

3. The City and Territory of *Erfurth*, though lying in *Thuringia*, is ſubject to the Elector of *Mentz*; the City is large, but not populous, and, like other Places under the Sovereignty of Eccleſiaſtical Princes, is crowded with Cloiſters, Abbeys, Nunneries, Collegiate and other Churches and Chapels, a Jeſuits College, four *Popiſh* Pariſh Churches, and ſix *Lutheran* Churches, and an improved Univerſity for both Religions. Its chief Trade is in Corn, Wine, and Woad for Dyers.

4. *Weimar* has two Churches, is the Head of a Principality or Dutchy named *Saxe-Weimar*. It deals largely in Wines, Corns, and Hops.

5. *Jena* is the only good Town in the Principality of *Eiſſenach*, which now belongs to the Duke of *Saxe-Weimar*. It has a celebrated Univerſity; it ſtands on the River *Saale*, is well fortified, has three Churches, and the pleaſant Vale in its Vicinity produces much Wine. Mr. *Nugent*, in his *Grand Tour*, ſays, that *Lutheran* Students from *Livonia*, *Poland*, *Sileſia*, and *Hungary*, ſtudy here for its Cheapneſs.

Coburgh is the chief and only good Town of a Principality of that Name, (now partly annexed to the Electoral Houſe of *Saxony*.) It has four Churches; has a Gold and Silver Stuff Manufactory, one of Porcellane; and has, in its Neighbourhood, Plenty of Corn, Cattle, Wine, Iron, Stone, Marble, and Pit-coal.

In the Principality of *Saxe-Hilburghauſen* ſtands *Hilburghauſen*, on the *Werra*, the Ducal Reſidence. It has two *Lutheran* Churches, and one *Calviniſt* Church, has a Ducal Palace, and many handſome Houſes; but is not remarkable for Commerce.

The Principality of *Saxe-Gotha* abounds in Grain and Fruits. *Gotha*, its Capital, is one of the beſt and handſomeſt Towns in *Thuringia*, having four Churches, and about 2000 Houſes, a *Gymnaſium illuſtre*, (or illuſtrious School) and many charitable Foundations. It has a conſiderable Trade in Woollen and other Manufactures, as have ſome other ſmaller Places in this Principality. It deals alſo in Woad and Beer, and has a Foundery for Cannon, *&c.* In this City alſo there is a Laboratory, a Muſeum, an Armory, and a fine Ducal Palace. This Prince is the Chief of the *Erneſtine* Line of *Saxony*, and is, by ſome Authors, ſaid to have ſo large a Revenue as 200,000 *l. Sterling per Annum*, being the moſt powerful of all the *Saxon* Princes next to the Electoral Family: He is lineally deſcended from the Elector *Frederick Magnanimus*, who was deprived by the Emperor *Charles* V. ſince which Time the *Albertine* Line has enjoyed the Dignity of the Electorate.

The Principality of *Altenburg*, (is now in the Electoral Family of *Saxony*.) *Altenburg*, its Capital, is moderately large and populous; has two Churches, ſundry charitable Foundations, an illuſtrious School or *Gymnaſium*: It has ſome Gold and Silk Stuff Manufactures, Salt and Iron Works, ſome Woollen Manufactures. Here, and at its ſmaller Towns, are Potters and Curriers; and the Country abounds in Corn and ſtrong Cattle, and alſo in Copper and Vitriol.

N. B. Al-

N. B. Although the before-named five Principalities are ſaid to lie within the Electorate of *Saxony*, the Reader needs not to be told, that three of them are no Part of the proper Dominions of the Elector, as before is ſhewn, but are ſubject to their own independent Princes.

The Counties of *Stolberg* and *Wernigerode* in *Thuringia*, do both belong to the Count of *Stolberg*, the latter being a Fief of *Brandenburg*.

1. *Stolberg* Town is the Place of Reſidence of the Count, having two *Lutheran* Churches. And the Town of *Wernigerode* has four *Lutheran* Churches: In it is a great Trade in the Brewery and Diſtillery Buſineſs: Here alſo are Manufactures of Woollen Goods: Here alſo are Iron-Mills, Flating-Mills, Paper and Powder-Mills; alſo Copper-Mines.

In the Lordſhips of the Counts of *Reuſſen* in *Voigtland* are Mines of Silver, Copper, Iron, Lead, and Alum.

1. The Town of *Greitz* has two *Lutheran* Churches, a Palace, an Orphan-houſe, a great School, and other Foundations. And its Trade conſiſts in Stuffs, and ſome other Manufactures.

2. *Gera* has five Churches, a *Gymnaſium* or illuſtrious School, and, for its Beauty, is called *Little Leipzig*. It has good Manufactures of Cloths, Stuffs, and Stockings; of which much is exported: Here alſo are Iron Mills.

3. *Schleitz* is a Town of three Churches, and has a Woollen Manufacture.

In the Lordſhips of the Counts of *Schonburg*, in the Margraviate of *Miſnia*, are fourteen Towns; in which all Sorts of Manufactures flouriſh, according to *Buſching*; who, however, has not been at all particular therein.

The Marquiſate of *Luſatia* is a *Lutheran* Country and Province, ſubject to the Elector of *Saxony*, lying North of the Kingdom of *Bohemia*. It produces Grain and Pulſe, Flax, Hops, Alum, Tobacco, Iron, and ſome Wine. Its numerous and very good Woollen and Linen Manufactures are of great Importance to thoſe Towns, wherein (according to Dr. *Buſching*) they have flouriſhed ſo early as the XIIIth Century.

The former Perſecutions of Proteſtants in *Bohemia* and *Sileſia* forced great Numbers of them to withdraw to, and ſettle in *Upper Luſatia*, where they founded many Villages, and propagated the Linen Manufactures, particularly fine Table-Linen and Tickings. Here are alſo good Manufactures of Hats, Stockings, Paper, Gun-powder, Leather, Iron, Wax-bleaching, Glaſs, *&c.* Yet all thoſe Manufactures are, in ſome Degree, decreaſed of later Times, as one Nation or People are conſtantly juſtling another out of Commerce and Manufactures.

In *Upper Luſatia* are,

1. *Bautzen*, the Capital of the whole Marquiſate. It is conſiderably large, well built and inhabited; having ſeveral Churches, Hoſpitals, and Workhouſes; has a conſiderable Trade in Linen, Hats, Stockings, Gloves, Cloth, Fuſtian, *&c.*

2. *Gorlitz*, though not the firſt in Rank, is, however, eſteemed the largeſt Town in all *Luſatia*, having ſix Pariſh-Churches, and ſeveral Hoſpitals; and a conſiderable Cloth-Manufacture.

3. *Zittaw* is alſo a fine and good Town, having ſeveral Churches and Hoſpitals; and has good Manufactures of Woollen, Linen, and Blue Paper.

In *Lower Luſatia* are the five Circle (or Diſtrict) Towns of *Luckau*, *Guben*, *Lubben*, *Kalaw*, and *Spremberg*; moſt of which Towns, though not quite ſo conſiderable as the foregoing ones, are, however, Manufacturing Places. *Sorau* is likewiſe a good Town, with five Churches, and manufactures much Woollen Cloth, Yarn, and Linen.

In the excellent Country of *Meiſſen* or *Miſnia* are,

1. *Meiſſen*, on the *Elbe*, is a well fortified Town; it has four Churches and ſeveral Schools. ☞ It is *Miſnia.* here that the chief Manufacture of the fineſt *Porcellane* on Earth is carried on, though beſt known abroad by the Name of *Dreſden Porcellane*, much finer and dearer than what comes from *China*.

2. *Dreſden*, the Electoral Capital, is one of the fineſt Cities in all *Germany*, pleaſantly ſeated on both *Dreſden.* Sides the River *Elbe*. Beſide its Fortifications, and the noble Palace of the Elector, (in which are vaſt Collections of the richeſt Curioſities) here are very many grand and magnificent Buildings, both public and private; many Churches and charitable Foundations. And, what is moſt to our Purpoſe, here are Iron, Copper, and Silver Foundaries; Marble-Works, Mills for boring and for poliſhing of Mirrors; many rich and fine Manufactures of Woollen Cloth and Stuffs, and of Stockings, *&c.* Linen, Lace, Embroidery, fine cut Glaſſes, *Spaniſh* Leather, Gold and Silver Stuffs, Founderies for Bells, Cannon, *&c.*—Moſt excellent Performances in Statuary, Painting, Enamelling, and Carving. Moreover, by means of the *Elbe*, a conſiderable foreign Commerce is from hence carried on.

Dreſden (according to Dr. *Buſching*) may, with all its Suburbs, contain 90,000 People; but, according to Mr. *Nugent*'s *Grand Tour*, 110,000.

3. *Pirna*, on the Left of the *Elbe*, is a very ſtrong Town; has two Churches; and, by means of that River, carries on a conſiderable Trade: Its neighbouring Quarries of what they call *Sand-ſtone*, cut into large Blocks for Statuaries, are much exported to foreign Parts.

4. *Groſſen-Hayne*, on the *Roder*, has three Churches, and ſome Manufactures of Woollen Cloth,

Stockings,

Stockings, and Gloves. It was at this Town that the fine Green Colour for dying was of late Years invented, known in foreign Parts by the Name of *Saxon Green*.

5. *Torgau*, on the *Elbe*, is a good Town, with a Citadel, and three Churches; and has Manufactures of Woollen Cloth, Silk, and Velvet.

6. *Oſchatz* has three Churches, and has Woollen and other Manufactures.

The Circle of *Leipzig* contains,

Leipzig.] 1. *Leipzig*, one of the fineſt, politeſt, and moſt celebrated Cities in *Germany*. It ſtands on the little River *Pleiſs*, which is not navigable; yet is one of the moſt principal trading Towns in all *Germany*, enjoying in general not only an important foreign Trade, but likewiſe particularly at its three celebrated annual Fairs, to which Dealers from all Parts of *Europe* reſort, both for foreign and domeſtic Merchandize. It has a fine Exchange, a ſtrong Citadel, a Cloth-hall, and all Sorts of Manufactures of Gold, Silver, Silk, Woollen, and Linen; Velvets, Tapeſtry, Cotton-printing, Leather, *Pruſſian* Blue, Stockings, *&c.* Mr. *Nugent*'s *Grand Tour* makes the Number of People within its Walls amount to 40,200, beſide thoſe in its populous Suburbs; and ſays, that its great Merchants Houſes look like princely Palaces: It contains nine *Lutheran* Churches, a *Popiſh* Chapel, and a large Room for the public Worſhip of the *French Calviniſts*. Ever ſince the Year 1701, (ſays Dr. *Buſching*) its Streets have been provided with above 700 Lamps. Beſide its many ſtately Edifices, here is a moſt famous Univerſity conſiſting of ſix Colleges.

2. *Grimma* has three Churches. Its principal Trade conſiſts in Timber, Woollen Cloth, and Thread, the latter much eſteemed at *Leipzic* Fairs and in foreign Parts: Here is a Flannel Printing-houſe, this Town having been the firſt Place in *Saxony* that imitated the *Engliſh* Flannel.

3. *Leiſznig* has two Churches, and Manufactures of coarſe Woollen Cloth, Stockings, Lace, Linen, Fuſtians, Hats, Combs; alſo Yarn and Linen Bleaching.

4. *Debeln* has three Churches, and Manufactures of coarſe Woollen Goods, of fine Hats, fine Linen Damaſk and Ticking.

5. *Rochlitz*, a Town of the like Magnitude and Manufactures.

6. *Wurzen*, on the River *Muldau*, has three Churches. Here are many Houſes for Cloth-dying, Stockings, and Linen-bleaching.

Theſe ſix Towns are much given to the Woollen and Linen Manufactures; for which Ends they alſo have Soap-making. Fullers Earth is dug in this Country.

In the Circle of *Erſgebirg* are,

1. *Freyberg*, on the *Muldau*, is the principal *Mine-Town* of this Electorate. It contains about 2000 Houſes, and, in the Year 1725, contained 60,000 Inhabitants. This Town is ſtrongly fortified; has eight Churches: It has the Direction of all the Mines of *Saxony:* The *Silver* Mines here are the moſt profitable of any in *Miſnia*, and are as ancient as the Year 1171: Here alſo are Mines of Copper, Tin, and Lead; the neat Profits of all which Mines did, in the Year 1630, yield no leſs than 3,725,337 Florins, and from that Year to 1708, upwards of nine Millions of Rix-dollars. Here alſo is a Foundery for Cannon and for Bells; a Sulphur and Vitriol Houſe, and Manufactures of Thread and Lace. Here (ſays Dr. *Buſching)* is a Gymnaſium with eight Teachers, a public Library, and ſeveral charitable Foundations.

2. *Chemnitz* was of old an Imperial City. It is at preſent a good Town, having a Citadel, and three Churches; and has many Stuff and Linen Weavers; as has likewiſe ſundry ſmaller Towns in this Diſtrict.

3. *Altenburg*'s rich Tin-Mine is thought to yield the beſt *Tin*, next to thoſe of *England* and *Bohemia*. Here alſo are many other ſmall Mine-Towns, where Silver, Lead, and Tin are digged, and where Sulphur, Vitriol, Alum, and Arſenic are prepared; where alſo are Iron-Forges, and black and white Tinned Iron-Plates, ſent in great Quantities to *Leipzig*, and thence down the *Elbe* to *Hamburg*, and thence again to *Amſterdam*, *London*, and other Parts. Here alſo are made coarſe Cloth, Lace, *&c.* Many of thoſe Mine-Towns were originally peopled in the XVIIth Century, by perſecuted Proteſtants, driven out by the Bigotry of the Houſe of *Auſtria* from the neighbouring Parts of *Bohemia*.

4. *Zwickaw*, on the *Muldau*, (formerly alſo an Imperial City) is ſtill one of the largeſt Towns in *Miſnia*, having a Citadel, and three Pariſh Churches: It has a Manufactory of Woollen Cloth,—of Wool-Cards,—and Shoe-Leather.—Here alſo they trade in Timber, Iron, Pit-coal, Sand-Stone, Marble and Corn.

In *Voigtland* Circle is *Plauen*, the Head-Town of it, having a Citadel, and two Churches. Its Manufactures are of Woollen and Cotton; and here alſo is Cotton-printing. Here are alſo ſome few ſmaller Towns, dealing in Woollen Cloth and Braſs-Wares, and having many Iron Founderies.

Newſtadt, on the *Orla*, is the Head of its Circle, has a Citadel and two Churches; and *Weyda* the like: At theſe two are manufactured fine Calimancoes, Camblets, and other Woollen Stuffs.

In the *Foundation* (as it is called by the *Saxons)* of *Merſeburg* is *Merſburg*, a Town on the *Sala*, has a *Lutheran* Chapter, a Cathedral, and three Pariſh-Churches, although its principal Trade conſiſts only in a Kind of ſtrong Beer, which is exported to many diſtant Parts. In this Diſtrict are ſome other ſmall and inconſiderable Towns and Villages.

In the Biſhoprick of *Naumburg* is,

Naumburg, on the *Sala*, having a *Lutheran* Chapter, three Churches, and a Citadel: It has an annual Fair, with conſiderable Privileges. And *Zeits*, on the *Elſter*, has four Churches, and a Woollen Manufactory.

In the Principality of *Anhalt*, are Mines of Lead, Copper, Iron, and Silver; alſo Coals, Sulphur, Alum, Vitriol, and Saltpetre: Here are alſo Grain, Hops, and ſome Wine.

Deſſau, its Capital, has two *Calviniſt* Churches, and one *Lutheran* Church, ſundry charitable Foundations, and the Prince's Palace. Here are good Manufactures of Woollen Cloth, Stockings, and Hats. *Bernburg*, on the *Sala*, is the Capital of a Principality of that Name, contains three Churches: And *Cothen* and *Zerbſt* are alſo pretty good Towns: Where are Manufactures of Gold and Silver Stuffs.

Quedlinburg, an ancient imperial Abbey, which embraced *Lutheraniſm*, *Anno* 1539, is under the Patronage of the King of *Pruſſia*. The Abbeſs, as ſuch, is a Princeſs of the Empire, having a Seat and Vote in the Dyets.

Quedlinburg City, on the *Bode*, has a Court of Juſtice belonging to the Abbey, and a Magiſtracy ſubject to the Abbey; has four or five Churches, and ſeveral charitable Foundations: But we have no particular Account of its Commerce.

Arnſtadt on the *Gera*, the Head of the Principality of *Swartzburgh*, has three Churches; and has ſome Braſs, Iron, and Saltpetre Works.

Frankenhauſen has four Churches and ſome charitable Foundations. Its numerous Salt-works are ſome of the moſt famous in all *Germany*, and are the principal Means of its Proſperity.

The County of *Mansfield* contains ſome Mines of Copper and of Silver Ore. The Town of that Name is now quite inconſiderable; but the Town of *Eizleben* has four Pariſh-churches and one Thouſand Houſes; ſome hundreds of which (ſays Doctor *Buſching*) are Brewhouſes.

The Circle of LOWER SAXONY.

The Dutchy of *Mecklenburgh* is generally *Lutheran* in Religion, interſperſed with ſome *Calviniſt* *Mecklenburgh.*
Churches.

It abounds in many large and ſmall Lakes, and in large and deſolate Heaths, Moors, Woods, Fens, and Quarries. Half the Country is of a ſandy Soil; and even its Paſtures and Meadows make but an indifferent Appearance, when compared with thoſe of *Holſtein* and *Pomerania*, on each Side of it. Others indeed (ſays Doctor *Buſching*) ſpeak more favourably of this Country. It contains Salt-ſprings, Alum, Iron, and ſome Copper. It has ſome Woollen Manufactures, tanned Leather-dreſſers.—It exports Corn, Flax, Hemp, Hops, Wax, Honey, Wool, Timber, Cattle, Butter, and Cheeſe. The intire annual Revenue of *Mecklenburgh-Schwerin* is eſtimated at 300,000 Rix-dollars:——That of the *Strelitz* Line about 126,000 Rix-dollars. To the *Strelitz* Line alſo belong the ſmall Town and Principality of *Ratzburg*.

Towns in *Mecklenburgh-Schwerin*, are,

1. *Schwerin*, the Ducal Reſidence, on a Lake of the ſame Name. It is built nearly ſquare. *Schwerin.*

2. *Domitz*, a ſmall fortified Town, at the Confluence of the *Elde* into the *Elbe*, where a Toll of very conſiderable Produce is collected.

3. The Bailiwick of the Church-village named *Mecklenburgh*, in the Neighbourhood of *Wiſmar*, once a great Town, which, ſince the building of *Wiſmar*, has inſenſibly dwindled to a mean Village. In this Neighbourhood are Salt-works and Alum.

4. *Guſtrow*, the beſt Town of its Diſtrict, containing a Cathedral, a Pariſh-church, and a ducal Palace.

5. *Roſtock*, though a free and imperial City, (and formerly a famous *Hanſe-Town*) is ſituated within *Roſtock.*
this Dutchy, on the River *Warno*; and is by far the largeſt Town in both Dutchies, and thought to be nearly equal to *Lubec* in Magnitude. Its Haven has a ſmall Town, named *Warnemund*, very convenient for Commerce. *Roſtock* has an Univerſity, partly ſubject to the City, and, in Part alſo, ſubject to the Duke; it has ſeven Churches, a *Lutheran* Convent for young Ladies Natives of this City, and ſeveral other charitable Foundations. It ſtill carries on a conſiderable Commerce, and has a Diſtrict with ſome ſmall Towns and Villages circumjacent. One of its chief Trades is in fine Beer.

6. *New Brandenburgh* has two Churches and a Grammar-ſchool, and great Quantities of Hops are raiſed in its Neighbourhood.

7. *Strelitz*, though in a marſhy Neighbourhood, is the Reſidence of the Duke of that Name; but is *Strelitz.*
not eminent for Commerce.

Wiſmar.

8. At the Peace of *Weſtphalia*, the once-eminent City of *Wiſmar*, in this Dutchy, was ceded to the Crown of *Sweden*. Notwithſtanding its great Declenſion from its ancient Glory, when it was the Rendezvous of the *Hanſeatic* Fleets, it has ſtill ſix Churches, a Grammar-ſchool, with eight Maſters; and ſtill enjoys a moderate Trade, being one of the beſt and largeſt Places in all theſe Countries, ſituated on a Bay of the *Baltic* Shore. It has a ſmall Diſtrict of Villages and Farms, and was very ſtrong till unfortunately diſmantled by the *Danes*, *Anno* 1717, in their War with *Sweden*. It is at preſent principally noted for brewing of excellent *Mum*.

Holſtein.

The Dutchy of *Holſtein*, with the Lordſhip of *Pinneberg*, and the Town of *Altona*, have ſeveral Manufactures, particularly at *Altona* and *Gluckſtadt*; beſide the very numerous and important ones of the City of *Hamburgh*; which City, and that of *Lubec*, do however ſupply the Inhabitants with the Bulk of foreign Merchandize.

Holſtein's Exports.

Holſtein's Exports are Grain, Malt, Starch, Rape-ſeed, horned Cattle, Horſes, Fiſh, Poultry, Sheep, Butter, and Cheeſe.

Daniſh Holſtein.

As *Holſtein* partly belongs to *Denmark*, and partly to the preſent Empreſs of *Ruſſia*, we ſhall follow Doctor *Buſching*'s Method in its Deſcription, beginning with what belongs to *Denmark*.

1. *Gluckſtadt* is a well-built Town and Fortreſs, in a marſhy Situation, on the Right of the *Elbe*, in which is a *Lutheran*, a *Calviniſt*, and a *Romiſh* Church, and a *Jews* Synagogue, and has ſome foreign Commerce.

2. *Itzehoe* has two Churches, and ſome charitable Foundations; it ſtands on the navigable Part of the River *Stor*, [which gives Name to that Part of *Holſtein* named *Stormar*.] At this Town King *Chriſtian* VI. inſtituted a College of Commerce, in the Year 1738.

3. *Rendsburgh*, a Town and Fort on the River *Eyder*, of two Pariſh-churches, and ſix hundred Houſes, a Royal Armory and Granary. Here alſo are ſundry other inconſiderable Towns in *Wagria* County, in a marſhy Soil.

Ducal *Holſtein.*

The Ducal [or *Ruſſian*] *Holſtein*, Doctor *Buſching* thinks to be about half as much as *Daniſh Holſtein*, above deſcribed; yet it brings in a Revenue of 200,000 Rix-dollars.

Kiel.

1. *Kiel*, its Capital, is ſituated on a Bay of the *Baltic*, with a convenient Harbour. It is a well-built populous Town, is pretty well frequented by Ships from *Sweden* and other Parts, has a ducal Palace, two Churches, a Chapel, and Univerſity. "The Proſperity of this Town," (ſays Doctor *Buſching*) "is not a little promoted by the annual Meetings of the Nobility and Perſons of Wealth in *Holſtein* and "*Sleſwig*, for the transferring, placing out, and re-demanding of their Monies; this pecuniary Inter-"courſe laſting eight Days: And at the ſame Time alſo is held a conſiderable Fair." *Kiel* was anciently a *Hanſe-Town*.

☞ In *Holſtein* are ſeveral *Lay-Lutheran* Convents for Ladies, under the Direction of *Lady-Abbeſſes* or *Prioreſſes*, who ſtill poſſeſs all the old Privileges of the Times of Popery, as well as the old Revenues and Juriſdictions over their Villages and Farms; being literally more uſeleſs Drones than even the real Nuns of Popiſh Convents.

In *Ducal Holſtein*, there are ſundry other ſmall Market Towns, of little Importance; which therefore we paſs over, as well as many Villages.

In the County of *Pinneberg*, which is neither reckoned in *Ducal* nor *Daniſh Holſtein*, lies the Town of *Altona*, belonging to *Denmark*, in a moſt delightful Country, on a high Shore of the Right of the *Elbe*, not above a Cannon-ſhot from the City of *Hamburgh*. It contains above 3000 Houſes, and upwards of 30,000 Inhabitants. It has two *Lutheran* and two *Calviniſt* Churches, two *Mennonite* Churches, one *French Calviniſt* Church, and one Popiſh Church, beſide ſome other Sects, here wiſely permitted the free Exerciſe of their Religion, as are alſo the *Jews*, who are very numerous here, and have a large Synagogue; for which, and for their intire Protection, they pay to the Crown 2000 Ducats annually. Here is a Royal illuſtrious School, an anatomical Theatre, and ſundry charitable Foundations. In this ſad Eye-ſore to *Hamburgh*, is a great Variety of Manufactures and Fabrications; three Docks for Ship-building, its Trade being very conſiderable. It was but a Village till after the Year 1640, when, together with the Town and Lordſhip of *Pinneberg*, it came under the Dominion of *Denmark*, when it ſoon increaſed to a Town; and, in 1664, it obtained a Charter of Incorporation. It is ſaid to bring in to that Crown a yearly Revenue of 27,000 Rix-dollars, more likely to increaſe than diminiſh.

There are two noble and free Imperial Cities ſtill to be deſcribed, which, though belonging to neither *Daniſh* nor *Ducal Holſtein*, are nevertheleſs ſituated within the Bounds or Compaſs of that Country, *viz.*

The famous City of *Hamburgh.*

The Imperial, free, and *Hanſeatic* City of *Hamburgh* ſtands on the Verge of that Part of *Holſtein* called *Stormar*, about eighteen *German* [or about ſeventy-two *Engliſh*] Miles from the Influx of the great River *Elbe* into the Ocean. That River (the ſmall Iſles in it being included) is at this City about a *German* Mile in Breadth; and, beſide its forming two ſpacious Harbours, runs through moſt Parts of the City in Canals, wherein the Ships moſt conveniently lye before the Merchants Doors. In theſe Canals, as well as four *German* Miles up that River, above *Hamburgh*, the Tide ebbs and flows twice in twenty-four Hours: In this Reſpect ſaid to excel all other *European* Rivers. Over thoſe Canals are eighty-four Bridges, on ſome of which are Houſes on each Side, as if they were only ſhort croſs Streets; in this, as well as in other Reſpects, reſembling the City of *Amſterdam*. In the numerous Streets and more numerous

merous Lanes of this City, many Families live together in one Houſe; inſomuch that the Circuit of this City is by no means proportioned to the Number of its Inhabitants: For round its Ramparts it is but an eaſy two Hours Walk, or, according to Mr. *Nugent*'s *Grand Tour*, about ſix *Engliſh* Miles in Compaſs: Yet, within that Compaſs, the Number of its Inhabitants is eſtimated to be 100,000, excluſive of the many *Jews* living here, [and ſurely there is nothing extraordinary in all this Computation.] Mr. *Nugent* (in our Opinion nearer the Mark) thinks that City contains 30,000 high Houſes, and, allowing only ſix Perſons to each Houſe on an Average, then there ſhould be 180,000 People in *Hamburgh*, including the *Jews*. On a Calculation taken of the Inhabitants of *Hamburgh*, (ſays Doctor *Buſching*) compared with thoſe of ſeveral other large Cities, and made from their Regiſters of Births and Burials, they are found to be to thoſe of *Paris* as 1 is to 4;—to thoſe of *Amſterdam* as 4 is to 7;—to thoſe of *Vienna* as 8 is to 13;—and to thoſe of *Copenhagen* nearly on a *Par*. Yet after all this, it muſt be admitted that there is great Uncertainty in the exact Magnitude, *&c.* of all great Cities. This City's Regulations, for preventing of Fires,—in Point of Proviſion for the Poor,—for Ideots, Lunatics, and for Proſtitutes, are greatly admired by Strangers, as well as its many Alms-houſes and Hoſpitals,—its Schools for the Education of poor Children,—for providing Plenty of all Things eatable, in ſix large Market-places,—its Store-houſes, Docks, and Yards, for Ship-building,—its Armory and Arſenal, *&c.* Theſe are all great in their ſeveral Kinds, as are alſo their Churches; inſomuch that *Hamburgh* is juſtly eſteemed a very well-regulated Republican Conſtitution, with its ſmall adjacent Territory, and as independent as its more potent Neighbours will permit it to be. It has however one eſſential Miſtake in its Conſtitution, [of which Miſtake its too near Neighbour makes conſiderable Advantage] in not admitting the free Exerciſe of their Religion to any Perſuaſion but their own *Lutheran* one, excepting at the Chapels of foreign Miniſters, and at our *Britiſh* Factory of the Merchants-Adventurers Company, which here enjoys many valuable Privileges. Near the Mouth of the *Elbe*, *Hamburgh* poſſeſſes the Bailiwic and Caſtle of *Ritzbuttel*, with a few adjoining Hamlets, and a ſpacious Haven called *Cuxhaven*, where, in caſe of Storms, Ships find a ſafe Retreat; and on a little fortified Iſland near it, called the *Nieuwerk*, are Beacons and a Light-houſe, for the Safety of Shipping; and (by *Denmark*'s Permiſſion) they maintain another Light-houſe on the Iſland of *Helegland*, near the Mouth of the *Elbe*; by means of that great River, *Hamburgh* ſupplies a very great Part of *Germany* with all Kinds of foreign Merchandize; by the Rivers *Havel* and *Spree*, and by a Canal from the *Spree* into the *Oder*, its Commerce is extended from *Brandenburgh* into *Sileſia*, *Moravia*, *Auſtria*, and *Poland*: This City may indeed be termed the Magazine of *Germany*, and in ſome Meaſure alſo of the other Countries on the *Baltic* Shores. Of its numerous Manufactures, Sugar-refining is a principal one; alſo Manufactures of Woollen, Linen, Stockings, Cotton, wrought Silks, Gold-Thread, Ribbons, Velvets, *&c.* Its vaſt Dealings in Wines, Tobacco, Drugs, Spices, Metals, Grain, Leather, Timber of many Sorts, Fiſh, Train-Oil, Furs, Skins; the Multitude of its real Merchants and Brokers, (*Jews* as well as Chriſtians) are beſt to be judged of at their Exchange Time.——There is a ſtanding Commiſſion of Merchants, for the Examination of commercial Concerns, named the *Commercium*, at the Place next the Exchange, where the *Commercial Library* is kept; and if (ſays Doctor *Buſching*) the Books of this Library are not very numerous, they are nevertheleſs all valuable for their *Uſefulneſs*.——The *Specie-Bank* was erected *Anno* 1619, and for its prudent Regulations and inviolated Credit, is by no means inferior to any, even the moſt flouriſhing. Its Granaries are always kept well ſtocked, for ſupplying the Poor at low Rates. Here is an illuſtrious School, with ſix Profeſſors, who read Lectures as in *Univerſities*, and has a large Library. The ordinary military Force of the City conſiſts of twelve Companies of Foot and one Troop of Dragoons, beſide an Artillery Company, and a nightly Guard, which parades, and is ſtationed every Evening, and in the Night calls the reſpective Hours. Within the Juriſdiction or Territory of *Hamburgh*, which is about ten Miles in Circuit, are ſeveral Pleaſure-houſes, Villages, and Eſtates; and the little Town of *Bergedorf* with the *Veerlande*, are held in common with *Lubec*, with which City *Hamburgh* has a Communication by a Canal to the River *Trave*. *England* ſupplies *Hamburgh* and other *Hanſe-Towns* with immenſe Quantities of woollen Goods, Tin, Lead, Tobacco, Hard-ware, *Eaſt-India* and *American* Productions, *&c.* according to ſome, to conſiderably more than 100,000*l.* *per Annum*; whilſt others (we doubt too exaggeratingly) carry it much farther, even to ſeveral Hundred Thouſands. Upon the whole, the Commerce of this ſingle City alone may be truly ſaid to ſurpaſs that of ſome conſiderable Kingdoms; and *Britain*'s being ſo eminently intereſted therein has occaſioned our ſo fully enlarging thereon.

The *Lutheran* Archbiſhoprick of *Lubec* lies in that Part of *Holſtein* more anciently named *Wagria*. The Archbiſhop is always elected, by its Chapter, either out of the Royal Family of *Denmark*, or the Ducal Family of *Holſtein*. His Place of Reſidence is at *Eutin*, a ſmall Town, pleaſantly ſeated on a Lake; but neither he nor his Chapter have any Authority in *Lubec*, although the Collegiate Church lies within that City. To its Chapter, however, belong ſome Bailiwics and Villages in their Territory.

Lubec City and Territory.

The free, beautiful and imperial City of *Lubec* ſtands on the River *Trave*, which, above the City, receives the *Steckenitz*, by means whereof it communicates with the River *Elbe*; and below it, it receives the *Wakenitz*, iſſuing from the Lake of *Ratteſburg*, and joining the *Schuartau*, in its Progreſs, it falls into the *Baltic* at *Travemund*, the proper Port of *Lubec*. By means of thoſe ſeveral Streams, long and flat-bottomed Veſſels paſs from the *Baltic* along the *Trave*, the *Steckenitz*, and the *Elbe*, into the *German* Ocean.

Lubec is a well fortified City, and though much decayed from its priſtine Grandeur, is ſtill rich and potent in Shipping and Commerce. It has about twenty *Lutheran* Churches, with lofty Steeples, with one *Calviniſt* and one *Romiſh* Church, a *Lutheran* Nunnery, many Hoſpitals, and other charitable Foundations. *Lubec* was anciently (and is ſtill) the Head of the *Hanſeatic* Confederacy, where their ſeveral Deputies uſed to meet. And although the great Bulk of that Confederacy be long ſince diſſolved, yet the Remains of it ſtill ſubſiſt in the Confederacy of the three Cities of *Lubec*, *Hamburgh*, and *Bremen*, under the Deſignation of the *Hanſeatic* Union; they negociate commercial Treaties with foreign States, and are even in modern Treaties, between other Potentates, frequently included therein, and had their Agent or Envoy at the famous Treaty of *Utrecht*, *Anno* 1713. And the preſent Emperor *Francis* (according

cording to Doctor *Buſching)* in his Capitulation, (as it is ſtiled) on his Acceſſion to the Imperial Throne, ſolemnly engaged, " To countenance, ſupport, and defend, in their Navigation, Traffic, Rights, and " Immunities, according to the *Inſtrumentum Pacis*, all trading Towns in general, particularly the above- " named three Cities, from whoſe maritime Commerce the Public reaps ſuch great Advantages." *Lubeck*'s above-deſcribed Situation is extremely commodious for Commerce. It has a Garriſon of 800 Men; was the firſt City of the North or middle Parts of *Europe* that erected *Water-Conduits* in their Streets, with Pipes for ſupplying of private Houſes therein; which Conveniency was very early followed by *London* and other Cities. *Lubec* has alſo divers good Manufactures: Amongſt the Dependancies of this famous City is *Travemund*, a ſmall Town with a Fort, Garriſon, and a Light-houſe, at the Influx of the *Trave* into the *Baltic*, beſides ſundry other Bailiwicks and Villages, comprehended in its Territory, of about 60 *Engliſh* Miles in Circuit: *Bergedorf* is a ſmall Town on the *Elbe* belonging (as we have related) in common to *Lubec* and *Hamburgh*, with a Toll-houſe and Ferry. *Lubec* (according to Mr. *Nugent*'s *Grand Tour)* is two Miles in Length, and one in Breadth, and is deemed the neateſt City of all the North Parts of *Germany*. It has a Stadthouſe, wherein are repoſited the Archives of the *Hanſe-Towns*; an Exchange, and an Arſenal; and Mr. *Nugent* thinks it has ſtill 150 Ships of its own, trading to all the Ports within the *Baltic*, &c. of whoſe Merchandize they have always here large Magazines. *Lubeck*'s chief Home-commodity is Corn, and alſo Beer, which is in ſuch great Eſteem, that much of it is exported to foreign Parts, and is alſo uſed medicinally for Wounds and Bruiſes.

Sax-Lauenburgh.

Above the Territory of *Hamburgh* lies the Dutchy of *Sax-Lauenburgh*, ſubject to the Elector of *Hanover*. Doctor *Buſching* thinks it contains 36,000 People, but has no Manufactures, and only exports Corn, Butter, and Cheeſe, Wool, Wood for Fuel, and ſome Fiſh. It has two ſmall Towns, *viz. Ratzburgh*, a ſtrong Place on an Iſland in a Lake; and *Lauenburgh* near the *Elbe*, on which it has ſome Trade in Corn and Wood; with ſundry Villages.

☞ In all the Dominions of the Electorate of *Hanover*, there were in the Year 1756, computed to be near 750,000 People, living in 58 Cities, 60 Market Towns, and very many Villages, and ſingle Farms. In general, its ſeveral Countries yield Plenty of all the Neceſſaries of Life; Grain and Pulſe, good Fruits, Flax, Hemp, Madder, Woad, Tobacco, Wood, Horſes, Sheep, horned Cattle, Sulphur, Vitriol, Marble, Stone, Coal, Iron, Lead, Copper and Silver-mines, very rich Salt Springs, alſo Manufactures of Starch and Powder, Linen, Thread, and Damaſk, Ribbons, Lace, Carpets, Cotton worked up into Gloves, Stockings, Caps, and Dimities; tanned Leather, Woollen Cloths, and Stuffs of various Kinds, Silk Manufactures, Silver and Gold Thread, Sugar-Refineries, Glaſs-houſes, Paper and Powder-mills, Iron, Copper, and Braſs Manufactures, Fire Arms, Wax Bleaching; and many other Manufactures and Productions.

We are next to croſs the River *Elbe*, into the Dutchy of *Bremen* and Principality of *Verden*, ſubject to the Elector of *Hanover*; and we will firſt ſurvey the free and imperial City of *Bremen*, the third and leaſt of the ſtill remaining *Hanſe Towns*.

Bremen City.

The City of *Bremen* lies moſtly on the North or right Side of the River *Weſer*. " In the Year 1744," (according to Doctor *Buſching)* " all its Buildings and Inhabitants were [ſomewhat remarkably] num- " bered, whereby its Magnitude may be nearly aſcertained, *viz.* In the old and new Town were counted " 4,778 inhabited Houſes, and 565 other Buildings, ſuch as, Meuſes, Brewhouſes, Storehouſes, *&c.* " alſo 387 inhabited Cellars.———4,099 married Couples; that is to ſay, 1,589 *Calviniſts*, 1,772 *Lu-* " *therans*, 629 mixed; 81 Papiſts, and 28 mixed:———218 Widowers; 1,239 Widows; 233 ſingle " Men Houſekeepers, and 359 ſingle Women Houſekeepers. In the old Town, which is the largeſt " and moſt populous, are four capital *Calviniſt* Churches, as alſo the Cathedral poſſeſſed by the *Luthe-* " *rans*; there alſo is the Convent of *St. John* with its Church, the celebrated academical Gymnaſium of " the *Calviniſts*, with its ſpacious Library; the Pedagogium, the Town-hall, the Exchange, the Ar- " mory; the Hoſpital with its Anatomical Theatre; the Correction-houſe, Work-houſe, Fulling-mill, " *&c.* In the new Town and Suburbs are three more *Calviniſt* Churches, the *Calviniſt* being the Reli- " gion of the Magiſtrates, and conſequently the eſtabliſhed Religion, though in Point of Numbers the " *Lutherans* nearly equal them." By this Account it is probable, that the City and Suburbs of *Bremen* may nearly contain fifty Thouſand Inhabitants, more or leſs. They maintain a Garriſon of about ſix Hundred Men: Here are ſeveral good Manufactures, and a very conſiderable foreign Commerce; they exporting great Quantities of ſtrong-Beer, Corn, Minerals, pickled and dried Salmon, Lampreys, Wool, great Quantities of *Oſnaburg* Linens, particularly to *England*, in Return for Woollen Goods, *&c.* Timber, Leather, paving ſquare Stones; and is now, in the Opinion of ſome, probably the next beſt Port in *Germany*, after *Hamburgh*, in Point of foreign Commerce; though others think, *Stettin* and *Lubec* may vie with it in that Reſpect. Yet Ships of Burden are obliged to lade and unlade at a Place three or four *German* Miles farther down the *Weſer*.———The Elector of *Hanover*, as Sovereign of the Dutchy, pronounces Sentence in capital Caſes, with certain Ceremonies. To this City belongs a Territory, containing ſundry Villages, particularly *Vegeſack*, a Village having a Harbour on the *Weſer*.

The Dutchy of *Bremen*, and Principality of *Verden*.

The Dutchy of *Bremen* and Principality of *Verden* are, in general, flat, ſwampy, and level Countries, watered on three Sides, by the Ocean, and by the *Elbe* and *Weſer*, (excepting the ſmall Bailiwic of *Ritſbuttel*, ſubject to *Hamburgh)* and on the Eaſt bordering on the Dutchy of *Lunenburg*. Beſide Cordage and Linen, they make ſundry Sorts of Woollen Cloth, Flannel, Kerſies, *&c.* at *Scharmbeck*. At *Aumund* they have a Sugar-refinery and a Porcelane Manufacture. Beſide *Bremen*,

Here is, 1ſt, the ſmall fortified Town of *Stade* or *Staden*, on the River *Schwinge*; it is about an *Engliſh* Mile up from the *Elbe*, has three Churches, and a Latin School, where formerly ſtood a Monaſtery; yet it is conſiderably decayed from what it once was.

2. *Buxtebude* is at preſent a ſmall open Town near the *Elbe*, having only one Pariſh Church, to which belong three Paſtors.

The Dutchy of *Verden*, though reckoned within the Circle of *Weſtphalia*, yet being joined with the Dutchy of *Bremen*, under one *Hanoverian* Regency, we judged it beſt to come in here. It is a healthy high Land. *Verden* Dutchy.

Verden is a decayed Town, of four Churches, on the *Aller*, and neither it nor the few other Towns in this Country, nor its many Villages, are particularly eminent in a commercial or manufactural Senſe. What Manufactures they have is chiefly Linen and Thread. *Verden* Town.

In the Principality of *Lunenburgh-Zell* (ſubject to the Elector of *Hanover*) are three large Towns, *viz.* *Lunenburg*, *Velſen*, and *Zell*, with eleven ſmaller, and thirteen Burghs, or large Villages.

1. *Lunenburg*, with its fortified Capital, has 3 Pariſh-churches, about 1,300 Houſes, and near 9,000 Inhabitants; with 3 Hoſpitals, a princely Palace, and Town-houſe, a Library, an Armory, an Houſe of Correction, and an Academy. Here are 54 Salt-houſes without its Walls, containing 216 Pans of Salt, each Salt-houſe being eſtimated at 40,000 Rix-dollars annually. *Lunenburg* exports Salt, Lime, Beer, Wax, Honey, Wool, Flax, Linen, and Frize. Merchandize are brought thither from all Parts of *Germany*, and forwarded eight Miles down the River *Elmenau*, to *Hamburgh*, and alſo up the River *Achſe* to *Lubec*.

2. *Velzen*, a Town on the ſaid River *Elmenau*, which was navigable from hence to the *Elbe*; inſomuch that Ships from *England* (according to Doctor *Buſching*) formerly traded here; and its ancient Harbour is ſtill to be ſeen: In the great Church alſo is ſhewn a Ship of gilded Copper, being a Preſent to the Town from the *Engliſh*. It has three Churches, and as many Alms-houſes; though the Town is much declined. Its Neighbourhood produces very fine Flax: Our ſaid Author alleges its having acceded to the *Hanſeatic* Confederacy, in the Year 1451.

3. *Zell*, a fortified and well-built Town on the River *Aller*, lower down running into the *Weſer*, and here begins to be navigable. It contains about 1,400 Houſes, has a Town-houſe, an Armory, a ducal Palace, ſeveral Churches, Hoſpitals, and other charitable Foundations. Here are Manufactures of various Kinds, particularly in Gold and Silver, in good Eſteem even in other Countries.

4. *Haarburg*, a Town of 472 Houſes, beſide thoſe of the Nobility; on a ſmall River running into the *Elbe*; has a Bailiwic and Villages, with a Fort or Caſtle between it and the *Elbe*, a Pariſh-church, and Latin School: But it is too near to *Hamburgh* to make any Figure in Commerce, although an unſucceſsful Attempt, for that Purpoſe, was made in the Reign of King *George* I. Here is, however, a conſiderable Wax-bleachery, a Sugar-refinery, a Starch Manufactory, and Manufactures of Ribbons, Cottons, Stockings, Hats. It has a conſiderable Trade in Ship-timber to *Holland*, and has Wool-combing, and Diſtillery. *Haarburg* is indeed very commodiouſly ſituated for Trade, and for a Navigation down the *Elbe* into the Ocean: Two Paſſage-boats go every Day between it and *Hamburgh*, which City it ſupplies with many Sorts of Proviſions, it lying oppoſite to that City. In its Fort is a Garriſon-church, a Prince's Palace, an Armory, Magazine, and Barracks, and other Buildings.

5. *Danneberg*, a ſmall and decayed Town near the *Elbe*; Beer-brewing being now its only Trade.

6. Here we cannot well forget the poor Remains of the once-great City of *Bardewic*, on the *Elmenau*, near to *Lunenburg*. In the firſt Volume of our Work, under the Year 1189, we have related its Deſtruction by the great *Henry*, ſurnamed the *Lion*, Duke of *Bavaria*, *Saxony*, *Brunſwic*, &c. And although its preſent Condition be very low, yet Doctor *Buſching* thinks its Circuit far exceeds that of *Lunenburg*, although, excluſive of the Buildings appertaining to the Churches, the School, and Abbey, its other Houſes are not above 106 in Number: It is very ancient, was once a large City, and had nine Churches. ——Its Abbey, upon the Reformation, turned *Lutheran*, whereupon its Canons and Vicars became ſecular, and were confirmed in their Poſſeſſions. *Bardewic.*

In this Dutchy are many ſmall Burghs and Villages, wherein great Quantities of coarſe Linen and Thread are made, and are ſold at *Hamburgh*.

In the Principality of *Grubenhagen*, is its Capital,

1. *Eimbeck*, a ſtrong Town on the *Ilme*, near where it falls into the *Leine*. Here are Manufactures of Woollen Cloth and Stuffs of many Sorts, Dimity, after the *Berlin* and *Engliſh* Manner. It contains 754 private Houſes, and 77 public Edifices, beſide 814 Granaries, Stables, *&c.* three or four Churches, a Grammar School with ſeven Maſters; an Orphan-houſe, an Hoſpital, and two Poor-houſes; beſide a *Lutheran* Cathedral Church, with a Senior, nine Canons, and five Vicars.

2. *Oſterode*, a Town of 582 Houſes, not far from the famous *Hartz* Foreſt, has a Caſtle, and three Pariſh-churches; a large Granary for the Uſe of the Miners on the *Brunſwic* Part of that Foreſt. It is noted for its fine Woollen Cloths, great Quantities of Iron and Copper Ore, and a Quarry of Alabaſter.

3. *Harzeberg*, a large Town on the *Sieber*, having a fine Manufacture of Arms, and other Iron-works, of which great Quantities are exported. Here alſo are many Linen Looms.

A Deſcription of only Part of the famous *Hartz* Foreſt.

The *Hartz* Foreſt is a mountainous Tract about 50 *Engliſh* Miles in Length, and 20 in Breadth: But we here only treat of that Part of it which belongs to *Brunſwic* and *Lunenburg*. Its Abundance of Wood is here the more valuable, as without it the many Mines and Forges could not ſubſiſt.——Its Minerals are yellow Oker, Vitriol, Sulphur, Saltpetre, Lapis Calaminaris, Zink, Cobalt, (of which Powder-blue is made) Lead, Borax, Iron, Copper, Braſs, and Silver; and alſo ſome Gold.——The Produce of the Mine-works, in or about the Year 1724, amounted to about 706,000 Rix-dollars, groſs Amount; but the net Money coming to the Sovereign amounted to but 136,000; and to the other Proprietors or Sharers, 120,000: And in the *Upper Hartz* the Sovereign had 53,000 net. And the whole Gold in the intire *Hartz* was 2,880 Rixdollars, and in Silver 425,274 Rix-dollars net.——The other Products of this uncommon Foreſt, the Mine-offices at *Hanover* and *Wolfenbuttel* take at a ſtipulated Price, making their Returns in Tallow, Leather, and other Neceſſaries for the Mine-works.

The Inhabitants of this romantic Country conſiſt of Miners, Labourers in the Smelting-houſes, Woodhewers, Carriers, and the Sovereign's Officers and Servants, with Clergy, Schoolmaſters, Artificers, *&c.*

1. *Clauſthal*, the chief Town of this Foreſt, is a ſpacious open Mine Town, of above 900 Houſes, and 10,000 Inhabitants; having two Churches, an Orphan-houſe, and Grammar School.

2, 3, 4. *Altenau*, *St. Andreaſberg*, and *Cellerfeld*, are ſmaller Mine Towns; the two latter however containing each about 550 Houſes: In each Town is a Houſe for ſmelting of Silver. There are alſo ſundry ſmaller ſmelting Towns in this Diſtrict.

In the Principality of *Calenberg*, is,

I. *Gottingen* Quarter.

Gottingen City contains about 1000 Houſes, and has one of the beſt-conſtituted Univerſities in all *Germany*, firſt erected by King *George* II. *Anno* 1734, by the Name of the Univerſity of *Georgia-Auguſta*.

This City abounds with good Manufactures of fine Woollen Goods, Silk and Worſted Stuffs, Ribbons, Stockings, Leather, *&c.* but it has ſorely ſuffered by having been twice poſſeſſed by *French* Troops. Here are five Pariſh-Churches. Since the Erection of its Univerſity, it has been much embelliſhed with new Buildings, its Streets finely paved, and in Winter illuminated: Here alſo is a *Calviniſt* Church, and ſundry charitable Foundations. It ſtands on a Canal named the *New Leine*, which communicates with the River *Leine*; and ranks as the chief of four larger Towns of this Principality.

II. The *Hanover* Quarter contains,

Hanover City.

1. *Hanover*, the capital City of the Principality of *Calemberg*, and of the whole Electorate. It ſtands on the left Shore of the River *Leine*, is well fortified, and contains about 1,200 Houſes, of which many are Palaces, and many more are large and handſome Edifices. Here is a fine newly-erected Electoral Palace, in the Church of which is kept a Treaſure of great Value, conſiſting of Reliques, Gold and Silver Plate, and Gems, collected by the great Duke *Henry the Lion*, in his Journey to the Eaſt, in the Year 1171, *&c.* In this City is the Elector's Armory, fine Stables, *&c.* and four Pariſh-Churches, ſundry Hoſpitals, and other charitable Foundations; a *French Calviniſt* Church, a *Romiſh* Church, and a *Jews* Synagogue. Here are alſo Abundance of fine Manufactures of the Woollen, Linen, Silk, and Cotton Kinds, and ſundry Artificers, Painters, and other Artiſts, of various Kinds. Its Neighbourhood makes a fine Appearance, with the Palace and elegant Gardens of *Herenhauſen*, beſide the many elegant Country Seats and pleaſant Gardens.

3. *Nordheim* is the third, in Order, of the four greater Towns of this Principality, ſituated on the *Ruhme*, which runs into the *Leine*. It contains 500 Houſes, and, beſide a ſecularized *Lutheran* Abbey, has one Pariſh-Church, and ſome charitable Foundations. It alſo enjoys ſome Manufactures.

III. In the *Hamelen* and *Lauvenau* Quarter, is,

4. *Hamelen*, a fortified Town on the Right of the *Weſer*, being the fourth in Rank, amongſt the four larger Towns of the Principality of *Calemberg*. It contains two Churches, 600 Burghers Houſes, beſide about 50 eccleſiaſtical and other public Edifices, a *French Calviniſt* Church, and ſundry charitable Foundations. Here are Silk-manufactures, Stockings, alſo Linen and Thread, of which they export a great deal: A ſecular *Lutheran* Lay-abbey here retains all its ancient Eſtates and Prerogatives. Amongſt the leſſer Towns is *Munden*, on the River *Fulda*, ſoon falling into the *Weſer*, containing 670 Houſes, two *Lutheran* Churches, and one *Calviniſt* one; has Silk and Damaſk Manufactures, Vinegar-makers, *&c.* It has a conſiderable River-Navigation and Trade on the *Fulda* and *Weſer*, to and from *Caſſel*, *Thuringia*, *Saxony*, *Francfort*, &c. Yet ſo unreaſonable are the old Monopolies, that none but Burghers of *Munden* muſt trade or navigate up the *Fulda*. In this Quarter are many ſmaller Towns and Villages, in which their chief Manufactures are Thread and Linen, of which they ſend great Quantities to *Bremen* and *Hamburgh* for foreign Exportation.

Theſe are all the more immediately contiguous Territories belonging to the Electorate of *Hanover*.

The Dutchy of *Brunſwic* and Principality of *Wolfenbuttel*.

In the Dutchy of *Brunſwick* is the Principality of *Wolfenbuttel*, and alſo Part of the famous *Hartz* Foreſt, and of the Mine and Salt-works there, held in common with the Elector of *Brunſwic-Lunenburgh*, of which we have already treated ſufficiently. The South Part is mountainous, but with great Plenty of

Timber and Iron, alſo Glaſs-houſes, and a fine Porcelain-manufacture. The North Parts abound in Grain, Flax, Hemp, Fruits; and of late *raw Silk* has been cultivated by Duke *Charles*, who, in the Year 1750, made a navigable Canal between *Wolfenbuttel* and *Brunſwic*.

Brunſwic City.

1. The City of *Brunſwic* is a large fortified Place, the capital Reſidence of the Sovereign. It ſtands on the River *Ocker*, has an Univerſity erected by Duke *Charles*, *Anno* 1745: Here are many noble Structures, and polite as well as charitable Foundations and Theatres, two Gymnaſiums, ten *Lutheran* Churches, one *Dutch*, and one *French Calviniſt* Church, and a *Roman Catholic* Church. The City has a Variety of ingenious Artizans, and ſeveral Manufactures and Fabrications; has two very conſiderable annual Fairs. It was of old a principal or Head Town of the *Hanſeatic* League, in thoſe Times governed in the Form of a Republic. This City is alſo famous for the Liquor called *Mum*, of which, and of tanned Leather, they export great Quantities.

Wolfenbuttel.

2. *Wolfenbuttel* is a conſiderable fortified Town, ſtanding on the River *Ocker*, but in a low and marſhy Country, yet contains many ſightly Houſes: The Gymnaſium here is ſtiled the Duke's great School: Here is one of the nobleſt Libraries in all *Europe*, ſeveral Churches, a Caſtle, Armory, and ſundry charitable Foundations, with ſome Manufactures. Both in *Brunſwic* and *Wolfenbuttel* (as well as in many other Parts of *Lower Saxony)* are ſeveral *Lutheran* ſecularized Convents and Nunneries, performing no religious Offices, though enjoying all their ancient Revenues and Prerogatives. In this Principality are ſundry Iron and Braſs Founderies, Copper flatting Mills, Salt-works, Braſs Wire-works, *&c.*

3. *Helmſtadt*, though not eminent for Commerce, is famous for its Univerſity; has three Pariſh-Churches, and other public and charitable Foundations.

Halberſtadt.

The Principality of *Halberſtadt* is ſubject to the King of *Pruſſia*. It is a level and very fertile Country in Grain, Cattle, Sheep, and Flax; here are nearly an equal Number of *Lutherans*, *Calviniſts*, and *Roman Catholicks*. It contains ſeveral Towns and a great Number of Burghs and Villages. Its Woollen Manufactures are in a thriving Way. This Principality (Doctor *Buſching* thinks) yields to the King of *Pruſſia* a Revenue of about 500,000 Rix-dollars.

1. *Halberſtadt*, its Capital, was in Times of Popery, an eminent Biſhopric; and although its induſtrious Lay Inhabitants do not at preſent exceed 1,300 in Number, (ſays Doctor *Buſching)* yet it is plentifully ſupplied with Eccleſiaſtics and their Retinues; for it has a large Cathedral, with a Dean, a Senior, ſixteen Canons, four of which are Popiſh, and the reſt are *Lutheran*, eight minor Canons, and twenty-two Elects: Sixteen Churches, of which four are *Lutheran* Collegiate ones, and moſt of the reſt alſo are *Lutheran*; one *German*, and one *French Calviniſt* Church. Here are three Popiſh Convents of Monks, and two Nunneries; alſo a *Jewiſh* Synagogue; and many Schools and charitable Foundations. In the Year 1758, the *French* treated this Place in their wonted Manner, by demoliſhing moſt of its Walls and Gates. Of its Commerce little can be ſaid, excepting what Manufactures have been introduced by the *French* Refugees, being ſuch as they have propagated in the other *Brandenburgh* Dominions.

2. *Aſcherſleben* forms the ſecond State Town of this Principality, having three Churches; one of which is uſed by both the *Lutherans* and *Calviniſts*.

3. And *Oſterwic*, on the River *Ilſe*, is its third municipal Town; and has ſeveral Woollen Manufactures.

Dutchy of *Magdeburgh.*

The Dutchy of *Magdeburgh* contains 29 Cities, 6 Towns, and 431 Villages; and yields a Revenue of above 800,000 Rix-dollars to his *Pruſſian* Majeſty. Its chief Places are,

City of *Magdeburgh.*

1. The ancient and *ſtill* noble City of *Magdeburgh* on the *Elbe* is one of the principal trading Cities of *Germany*, as alſo a very ſtrong and capital Fortreſs. It is well-built, and its Cathedral-ſquare is ſo ornamented with large and elegant Houſes as to make a grand Appearance. In it is the King's Palace, the *Lutheran* Cathedral, three collegiate *Lutheran* Churches, and ſix other *Lutheran* parochial Churches, a *Lutheran* Lay-convent; three *Calviniſt* Churches, *(viz.* a *German*, *French*, and *Walloon* one) an Hoſpital, Alms and Orphan-houſe, maintained at the King's Expence; an Armory and a Town-houſe. In this City is a conſiderable Variety of Manufactures, much propagated and improved by the *French* Refugees kindly received here in great Numbers, *viz.* All Sorts of Woollen Cloths and Stuffs, whole and half Silk Stuffs, Cotton, Linen, Stockings, Hats, fine Gloves, Tobacco, and Snuffs, and immenſe Quantities of Salt-works. Its Situation on the *Elbe*, and being the Road between *Lower* and *Higher Germany*, are very advantageous to its Commerce; here being great Magazines of various Merchandize brought hither up the *Elbe* in flat-bottomed Veſſels from *Hamburgh*, and from hence carried over Land to *Leipzig* and other Parts; on the other hand, there are vaſt Quantities of Timber brought hither down the *Elbe* for *Hamburgh*. This, in ſhort, is one of the beſt and moſt beneficial Provinces of the King of *Pruſſia*.

2. *Burg* is a Town with four Churches, and ſome good Woollen Manufactures.

3. *Hall*, on the River *Saale*, is a fortified City, containing 14,000 Inhabitants, beſide its Garriſon and noted Univerſity; having three *Lutheran*, and two *Calviniſt* Churches, a *Romiſh* Chapel, and a *Jews* Synagogue; a *Lutheran* and a *Calviniſt* Gymnaſium, each having a Library; a free ſecular Nunnery of *Calviniſt* Ladies. The *Calviniſts* here are poſſeſſed of two Hoſpitals, an Alms-houſe for the *French Calviniſts*, and other Charity Foundations. Here are various Manufactures; as Cloths, Woollen and Silk Stockings, Gloves, printed Flannels, Frizes, Fuſtians, Porcelain, *Hungary* Water, Starch, Powder, Gold, Silver, and Silk Ribbons, fine red and yellow *Turkey* Leather, Pewter-buttons, *&c.* Salt Springs, from which vaſt Quantities are exported to many Parts.

Glaucha, juſt without its Walls, is chiefly famous for its celebrated *Orphan-houſe*, founded by the famous and pious Doctor *Franke*, near the Cloſe of the laſt Century, of which much has been publiſhed in ſundry Languages.

Biſhopric of *Hildeſheim.*

In the Biſhopric of *Hildeſheim* is much Flax, Hops, and Salt, and alſo Iron-founderies. All its Towns, and moſt of its Nobility and Villages, are *Lutheran*; as, on the other hand, the Sovereign-Biſhop, the Chapter, the Convents, and almoſt all the epiſcopal Officers, part of the Nobility, Towns and Country, are *Catholics*. Here are but few Manufactures, excepting ſome good Linen, and ſome coarſe Woollen, Stockings, and Porcelain, with all Kinds of Iron Wares. It exports Corn, Wool, Timber, Linen, Thread, Salt, Hops, *&c.*

City of *Hildeſheim.*

1. *Hildeſheim* is a conſiderably large City; and although its Magiſtrates and moſt of its Burghers be *Lutherans*, yet in it is a College of *Jeſuits*, an Abbey, a great Cathedral and Chapter, with ſix Convents; here are however eight *Lutheran* Pariſh-Churches, and a *Lutheran* Gymnaſium, alſo a *Jewiſh* Synagogue. The City was the capital Reſidence of the great Duke *Henry the Lion*, from whom the *Brunſwic* Family is deſcended; and the Elector of *Brunſwic* ſtill retains the hereditary Patronage of it; and, as ſuch, keeps in this City a Company of Foot-ſoldiers, though paid by the City, which acknowledges the Biſhop for its Sovereign, but pays him no Homage; neither does he ever reſide here. The other Towns are inconſiderable.

The Principality of *Blankenburg* lies partly in the *Hartz* Foreſt, and belongs to the Duke of *Brunſwic-Wolfenbuttel:* Without that Foreſt, it has good Corn-land, and in the Foreſt fine Marble, Woods, and Iron-ore.

Goſlar.

1. The imperial City of *Goſlar* lies on the River *Goſe*, running into the *Ocker*, near *Hartz* Foreſt. It has four *Lutheran* Pariſh-Churches, and three *Lutheran* Convents. Its chief Support is from the neighbouring Mines, and for ſupplying of Beer and other Proviſions to that Foreſt.

Mulhauſen.

The imperial City of *Mulhauſen*, in *Thuringia*, lies on the River *Unſtrut*; it has two *Lutheran* Churches, a *Popiſh* Nunnery, and a ſmall Diſtrict in the Country.

Nordhauſen.

The imperial City of *Nordhauſen*, in *Thuringia*, contains ſeven *Lutheran* Churches, a *Romiſh* Convent, and an Orphan-houſe. It carries on a good Trade in Corn to the *Hartz* Foreſt, diſtils great Quantities of Brandy, and is noted for its curious Works in *Marble* and *Alabaſter*.

Circle of *Weſtphalia.*

The Circle of *Weſtphalia* is very extenſive, and, like moſt other Countries, of various Soils; ſome Parts are very fertile, whilſt others are barren, heathy, and mountainous. It contains ſeveral good Cities and Towns, and a vaſt Number of Burghs and Villages.

Paderborn City and Biſhopric.

1. *Paderborn* is a very ancient and neat City and Univerſity, in a fertile Neighbourhood. It has a large territorial Biſhopric. The City contains a Cathedral and two Pariſh Churches, an Abby, a Jeſuits College, and five Convents. It formerly carried on a great Trade, but at preſent it is much decayed; what they have is chiefly of the Linen Kind. The other Places of this Biſhopric are inconſiderable.

The very large Biſhopric of *Munſter* contains many Towns, Burghs, and Villages, and is much employed in the Linen Manufactures. Its Extent is about 100 Miles in Length and 60 in Breadth; and Revenue near 300,000 Rixdollars to the Biſhop.

Munſter City and Biſhopric.

1. *Munſter*, its capital City, near the River *Ems*, is a very large walled City, much more eminent for its great Number of Churches, Abbies, Cloiſters, and other Eccleſiaſtical Foundations, than for Commerce or Manufactures; inſomuch that its vaſt Number of Eccleſiaſtics, with their Dependents, is alone ſufficient to conſtitute a large City, as it truly is; being thought to contain near 100,000 People.

2. *Coesfeldt* is the next beſt Town in this Biſhopric; has two Pariſh Churches, a Jeſuits College, and five Convents. It was of old a *Hanſe-Town*; but now much decayed.

The Biſhopric of *Liege*, although by many reckoned in the *Auſtrian Netherlands*, (wherein we have in part treated of it, for Contiguity's Sake) lies within the Circle of *Weſtphalia*. It has a fertile Soil, and in ſome Parts of it yields Wines reſembling the middling Sort of Wines of *Champagne* and *Burgundy*; and has alſo conſiderable Mine-Works of Iron, Copper, and Lead; and yields Pit-coal and Marble. It is the Third in Rank of the great *Weſtphalian* Biſhoprics. It is ſubject to its own elective Biſhop and Prince; who (according to *Morery*) claims a Right or Sovereignty over 52 Baronies, 18 walled Towns, and 400 Villages.

Liege City and Biſhopric.

1. *Liege*, [in *Dutch* named *Luyck*] its Capital, is a very large and well fortified City, on the Left of the River *Maeſe*; contains a Cathedral, 7 Collegiate and 32 Pariſh Churches, 5 Abbies for Men, and a like Number for Women, 32 Cloyſters of both Sexes, 2 Colleges of Jeſuits, 10 Hoſpitals, beſide other charitable Foundations. The Manufactures here are very conſiderable; conſiſting of Serges and other Stuffs; all Sorts of military Weapons, Nails, and Leather; great Numbers of Brewers, its Beer being much exported all round the Country; there is Pit-coal in its Neighbourhood, with which they ſupply *Holland* very much.

2. *Huy*, on both Sides the *Maeſe*, has one Collegiate and 14 Pariſh Churches, ſeveral Chapels, 18 Convents, and ſundry Hoſpitals: And, although its Fortifications (through Jealouſy) have been razed, it ſtill contains many fine Edifices. It has Iron-works, and Paper-mills in its Neighbourhood; which yields Corn, Wine, Alum, Sulphur, and Pit-coal.

3. *Dinant*, higher up the *Maeſe*, is fortified; has 8 Churches, 6 Cloiſters, a Jeſuits College, and ſome Hoſpitals. Its principal Trade is in Leather.

The Biſhopric and City of *Oſnaburg*.

The Biſhopric of *Oſnaburg*, (or *Oſnabruck*) lies North of that of *Munſter*, between the Rivers *Weſer* and *Ems*; being (according to *Moll*) about 45 *Engliſh* Miles in Length, and 25 in Breadth. It conſiſts of Heath-lands, but little Wood; affording Salt, Pit-coal, and much Marble. The People are chiefly employed in ſpinning of Linen Yarn and Thread, and the Manufacture of vaſt Quantities of coarſe Linen, bearing the corrupt Name of *Oſnbrigs*, to the Value (according to Dr. *Buſching*) of above a Million of Rixdollars annually; ſold to the *Engliſh*, *Dutch*, and *Spaniards*, for their *Guinea* and *Weſt-India* Commerce.

The City of *Oſnaburg* is a neat well-built Place. Here are ſome coarſe Woollen Manufactures, and a very great Linen Trade; alſo here are the beſt *Weſtphalia Hams*. Its private Houſes are about 1,200 in Number, beſide many fine public Edifices; a Cathedral and a Collegiate Church, a College of Jeſuits; and two *Lutheran* Churches, two Convents, and ſundry Hoſpitals or Alms-houſes.——The Revenue of its Biſhop is reckoned between *twenty and thirty thouſand Pounds Sterling*.

Its Revenue.

Principality of *Minden*, and Counties of *Ravenſberg*, *Lingen*, and *Tecklenburg*.

The Principality of *Minden* is ſubject to his *Pruſſian* Majeſty. It abounds in much Grain, Flax, and Pit-coal; and exports much coarſe Linen and Linen Yarn; makes Linſey-woolſey Cloth; has Soap and Sugar Houſes; Breweries and Diſtilleries. Under this Principality are comprehended the Counties of *Ravenſberg*, *Lingen*, and *Tecklenburg*, which are great Linen Countries.

***Minden* City.**

At the City of *Minden* is an ancient Cathedral Church, (believed to have been the Palace of Duke *Wittikind*, conquered by the Emperor *Charlemagne*) two Popiſh and four Proteſtant Churches, ſome Popiſh Cloyſters and charitable Foundations. Here is a Stocking Manufacture, beſide the more conſiderable ones of Linen, Thread, *&c.* above ſpecified.

[The Dutchy of *Verden* (though within this Circle) is already named next to that of *Bremen*, in *Lower Saxony*, for a Reaſon there exhibited.]

The Dutchy of *Cleve*.

The Dutchy of *Cleve* (belonging to the King of *Pruſſia*) has a rich Soil, abounding in Corn, Cattle, *&c.* and its People are induſtrious and much given to Trade, (like their near Neighbours of the *United Netherlands*) which is much advanced by the Navigation on the *Rhine* and *Maeſe*.

Cleve is a moderately large Town, containing five Churches and three Convents: And of late it has ſtruck into a Silk Manufacture: But,

Weſel is the largeſt and ſtrongeſt Town of this Dutchy; has ſeveral Popiſh and Proteſtant Churches and Convents. It has ſome Commerce, being commodiouſly ſituated for that End, on the Eaſt Side of the *Rhine*.

The County of *Mark* (ſubject to the King of *Pruſſia*) has a moſt fertile Soil; abounds in Grain, Pulſe, Flax, Hemp, Iron, Salt, Coals, Lead, Copper, and ſome *Silver* Ore.

1. *Ham*, is its capital Town, moderately large, having three Churches. It is famous for its fine Linen Bleacheries.

2. *Altena*, the largeſt Town in this County, deals much in Iron and Wire.

3. *Iſerlon* (or alſo ſimply named *Lon*) is a Place of good Trade, though in a mountainous Country; having five Churches. Its Manufactures are ſundry Sorts of Works of Iron, and of Braſs-wire, Needles, Balance-Beams, Buckles; Woollen Stuffs, and ſmall Silk Manufactures.

In this County are ſundry leſſer Towns and many Villages; whoſe Inhabitants are much employed in Iron-works, and ſome in coarſe Woollen Cloths.

The Dutchies of *Juliers* and *Berg*.

The Dutchies of *Juliers* (or *Gulick*) and *Berg* (ſubject to the *Elector-Palatine*) have generally a fruitful Soil. Much Corn and Wood, and their excellent Horſes are exported to *France* and other Countries: Much Linen is alſo made here, known by the Name of *Gulicks*.

***Juliers*.**

Juliers (or *Gulick*) the Capital of the firſt-named Dutchy, has three Churches. [And here we may note, That all the laſt-named Dutchies and Counties are almoſt equally intermixed with Popiſh, *Lutheran*, and *Calviniſt* Churches; although the firſt-named is apt to get Ground of the two latter, for Reaſons well known.]

The *Dutchy* of *Berg* is generally mountainous, intermixed with many fruitful Spots toward the *Rhine*; yielding ſome Wine. Here are great Quantities of Timber, Iron and other Ores, and Pit-coal.

***Duſſeldorf*.**

Duſſeldorp (or *Duſſeldorf*) is the beſt Town in this Dutchy. It is not large; but is ſtrong and populous. It ſtands on the *Rhine*, and ſends much Corn down that River: Is intermixed with Popiſh and Proteſtant Churches, has a Jeſuits College and ſome Convents.

In this Dutchy are many ſmall Towns, and very many Villages, wherein are carried on Manufactures of coarſe Linen and Woollen, and alſo metallic Works.

Aix la Chapelle.

The Imperial City of *Aix la Chapelle*, [in *Dutch* named *Acken*] lies between the Dutchies of *Juliers* and *Limburg*; and is a large and beautiful City. It was formerly, and for a long Time, reckoned the principal City of the Empire, and the uſual Reſidence of its Emperors; having to this Day the Cuſtody of Part of the Jewels of the Empire, which are uſed at the Coronation of the Emperors; which Coronations were formerly wont to be performed here; where alſo *Charlemagne*'s Sword is kept. Here are 30 Churches, 21 Convents, and many charitable Foundations.——The City's Territory is called the *Kingdom of Aix la Chapelle*, lying quite round it, and containing about 3,000 Subjects. Yet Mr. *Nugent*, in his *Grand Tour*, ſays, it conſiſts of 200 Villages. In the City and its Territory are many Manufacturers of Cloth, and of Copper and Braſs. Although there are many Proteſtants in this City, they are not permitted the public Exerciſe of their Religion, but (like *Cologne* and ſome other Places) are obliged to go an Hour's Journey for that End. Here are rich Mines of Lead, Vitriol, Sulphur, Coals, and Calamy-ſtone. It is under the Protection of the *Elector-Palatine* as Duke of *Juliers*. Its mineral Fountains draw hither a great Concourſe of People from all Parts.

The Town and ſmall Principality of *Meurs* abounds in Corn, Cattle, and Veniſon, and belongs to the King of *Pruſſia*; and is environed with the Dutchies of *Berg* and *Cleve*.

Meurs, its only Town, is fortified, but in no other Reſpect eminent.

The Electorate and Archbiſhopric of COLOGNE.

Its Countries lie not contiguous, nor all of them in this Circle; but are, as to many of them, ſeparated from each other by foreign Territories. The principal and longeſt or fartheſt connected Part of it lies on and near the *Rhine*, which River ſeparates it from the Dutchy of *Berg*, and is above *twenty German* (or eighty *Engliſh*) Miles in length.

1. The Country properly called the Dutchy of *Weſtphalia*, which is about 10 *German* Miles in Length and 8 in Breadth, is for the moſt Part ſubject to the Elector of *Cologne*, beſide ſundry other leſſer Proprietors of Baronies, *&c.* But, although it has 25 ſmaller Towns, and 10 Burghs or Market-Towns, there ſeems to be no one Place in it of any great Significancy in reſpect to Commerce or Manufactures.

Cologne.

2. The Imperial City of *Cologne* on the *Rhine* is one of the largeſt Cities of *Germany*; containing a Grand Cathedral, 10 Collegiate Churches, 19 Pariſh Churches, and about 50 Chapels, 4 Abbies, 17 Monaſteries, 39 Nunneries, and 16 Hoſpitals. It is the principal Staple for *Rheniſh* Wines, and was of old a principal and important Member of the *Hanſeatic* Confederacy: And although it continues ſhamefully to force its numerous Proteſtant Inhabitants to reſort to *Mulheim*, in its Neighbourhood, for the Exerciſe of their religious Worſhip, (by which Bigotry, we have ſhewn, under the Year 1688, they have ſo greatly thinned their Inhabitants;) yet, through the Happineſs of its Situation, they have ſtill ſome Manufactures of Ribbons, Ferrits, *&c.* and a conſiderable Trade down the *Rhine* to *Holland*; although, for the above Reaſon, it is become little better than a mere City of Eccleſiaſtics and eccleſiaſtical Edifices; and for that Reaſon, and from the Multitude of the Reliques of *Saints*, has obtained the Appellation of the *Holy-City*; ſome Travellers having related, that there are in it as many Churches and Chapels as there are Days in the Year. It ſwears Allegiance to every new Elector, ſo long as he continues to protect them in their juſt Rights, Privileges, and Immunities.

Dortmund Imperial City.

The Imperial City of *Dortmund* lies within the County of *Mark*; and contains four *Lutheran* Churches, three Convents, and an *Archigymnaſium* or illuſtrious School. It was formerly a *Hanſe-Town*. It Territory has ſeveral Villageſhips and Peaſantſhips ſubject to it.

The County of *Scauenburg*, on the *Weſer*, belongs partly to *Heſſia*, partly to *Lunenburg*, and partly to the Count of *Buckeburg*; of which little more needs or rather can be ſaid.

The Counties of *Oldenburg* and *Delmenhorſt*, belong to the Crown of *Denmark*. They lie near the South Side of the *Weſer*.——The Town of *Oldenburg* is fortified, and has three Churches; and *Delmenhorſt*, though ſmall, yet is fortified: But here is nothing eminent in a commercial Senſe.

Lippe County.

The County of *Lippe* (ſubject to its own Count) is partly ſurrounded by the Biſhopric of *Paderborn*; [within which, nevertheleſs, lies the County of *Sternberg*, ſubject to the Elector of *Brunſwic Lunenburg*; wherein much Linen is made.]

1. *Lemgow*, its beſt Town, has three Proteſtant Churches; alſo ſome Woollen Manufactures: But, though it was formerly a *Hanſe-Town*, it is now ſomewhat decayed.

Lipſtadt.

2. *Lipſtadt* (though giving Name to this County) is a ſtrong Town, ſubject to the King of *Pruſſia*, and carries on a good Trade in preparing of Timber for building of Veſſels on the *Rhine*; with which River it has a Communication by the River *Lippe*, on which it is ſeated.

The County of *Bentheim* belongs to its own Proteſtant Prince, and adjoins weſtward on the *Netherland* Province of *Overyſſel*. It is pleaſant and fertile. Its People trade in Yarn, Linen, Wool, Honey, Cattle, Wood, and Stone; chiefly tranſported to *Holland*.

Bentheim, its chief Town, is a pretty large Burgh, containing two Churches.

East-Frieſland.

The Principality of *Eaſt Frieſland* (ſubject to the King of *Pruſſia*) lies in a low and moiſt Air, much reſembling its near Neighbour *Netherland Provinces*; having fat and rich Paſture-Lands, for the breeding of large Cattle, Oxen, and Sheep. Many of its Horſes are carried to *Rome*, and there ſold at high Prices for Coaches. It alſo has fine Linen Manufactures.

Embden. *Embden*, its Capital, is a large and ſtrong Sea-port, of conſiderable Commerce, on the River *Ems*; having ſeveral Pariſh Churches, and an *Aſiatic* or *Eaſt-India* Company, erected *Anno* 1750, by his preſent *Pruſſian* Majeſty.

In this Principality are two other Towns, ſeveral Burghs, and many Villages; but all the Trade thereof centers in *Embden*.

Tecklenburg County. The Counties and Towns of *Tecklenburg* and *Lingen* (ſubject to his *Pruſſian* Majeſty) lie next to the Biſhopric of *Oſnaburg*. They abound in Corn and Cattle, Pit-coal and Stone, as well as in large Manufactures of Linen, well known by the Name of *Tecklenburg Linen*.

Lingen Town and County. *Lingen* is a Town of three *Calviniſt* Pariſh Churches; and is the beſt Town here: But the *Roman Catholics* being numerous here and in other neighbouring Parts, his late *Pruſſian* Majeſty (*Frederic-William*) granted them a limited Toleration.

Ravenſberg County. *Ravenſberg* (a County likewiſe ſubject to the King of *Pruſſia*) lies ſurrounded with the Biſhoprics of *Munſter* and *Paderborn*. Moſt of the People are employed in the ſpinning, weaving, and bleaching of fine and coarſe Linen, ſent all over *Europe* and alſo to *America*.

1. *Bielfeld*, its chief Town, contains four Churches of different Perſuaſions, a Chapel, a Convent, ſome charitable Foundations, and about 800 private Houſes. This Place has a very great Linen Manufacture; and likewiſe ſome Manufactures of Woollen Cloth, Stuffs, and Stockings. It was once a *Hanſe-Town*.

2. *Herford* is likewiſe a good Town, nearly as large as the other. There are ſundry other Burghs and Villages in this County principally employed in the Growing of Flax and in the Manufacture of Linen.

Hoy Town and County. The County of *Hoy*, near the River *Weſer*, (belonging to the Elector of *Hanover*) is much employed in the *Linen* Manufacture. Its Capital, *Hoy*, contains one Pariſh Church and a Citadel.

The ſmall adjoining County of *Diepholtz* is alſo much occupied in the *Linen* Manufacture; and is likewiſe ſubject to the Elector of *Hanover*.

Diepholtz Town and County. *Diepholtz*, its principal Town, is a large Burgh; and there are here ſundry other leſſer Towns and many Villages.

Spiegelberg County. The ſmall County of *Spiegelberg* belongs to the Prince of *Orange*, Stadtholder of the *United Netherlands*; under the Superiority of the Elector of *Hanover*. But it is no way eminent for Commerce; any more than the County and Town of *Rietberg*, near the former County, belonging to Count *Kaunitz-Rietberg*.

Pyrmont County. The ſmall County of *Pyrmont* (next to the Territory of *Hanover*) belongs to the Prince of *Waldeck*; who hereby enjoys a Revenue of 30,000 Rixdollars, or 6,750 *l.* Sterling; ariſing principally from its excellent mineral Springs and Salt-works.

Pyrmont, its only Town, has nothing in it relating to our Subject; but its Citadel is reckoned ſtrong. Here are a few Villages in this County.

Siegen-Naſſau Town and County. The Principality of *Naſſau-Siegen* belongs to the Prince of *Orange*, to whom it yields a Revenue of 100,000 Rixdollars, [or 22,500 *l.* Sterling.] It is very woody and mountainous; though it has ſome good arable Lands, and numerous Iron-works. Iron Forges and its Manufactures conſtitute the principal Trade of this County, and of its capital Town of *Siegen* and its Villages.

Naſſau-Dillenburg, The Principality of *Naſſau-Dillenburg* lies next to the former, and is alſo ſubject to the Prince of *Orange*. It contains five Towns and two Burghs, beſide Villages; and is alſo much the ſame in Point of Soil and Productions as the former. Here are many Iron Forges, Copper and Lead Mines, alſo ſome Silver and Vitriol.

Its chief Town, *Dillenburg*, is fortified; contains but one Church, two princely Palaces, and a large Park. This County is ſaid to yield a Revenue of about 160,000 *German* Florins, [which, at 2*s.* 4*d.* each, amounts to 21,333 *l.* Sterling.]

And Naſſau-Hadamar. The ſmall County and Town of *Naſſau-Hadamar* belongs likewiſe to the Prince of *Orange*, with ſome other ſmall Towns and Villages: But neither Dr. *Buſching*, nor any other Author we know of, has acquainted us with the Revenue of this County; which, probably, may therefore be but inconſiderable.

The Circle of the LOWER RHINE.

It conſiſts of Part of the Eſtates of the three Spiritual or Eccleſiaſtical Electors—of the Duke of *Aremberg*—of the *Elector-Palatine*—of the Prince of *Taxis*, and others.

The Lands of the Elector of *Mentz* afford much and excellent *Rheniſh* Wine, Corn, Salt, Iron Mines, Almonds, Cheſnuts, Flax, and Tobacco; and Manufactures of Woollen Stuffs, Linen, Glaſs, and Porcellane.

Mentz.

1. *Mentz*, its capital City, is ſituated on the *Rhine* where the River *Meine* falls into it; is a ſtrong and populous old-faſhioned City, with a lofty Cathedral, 7 Collegiate Churches, 7 Pariſh Churches, a Jeſuits College, 16 Convents, 6 Hoſpitals, a Work-houſe, and an Univerſity.——It is a Place of great Trade, more eſpecially in Wines; having alſo Manufactures of Stuffs and Stockings.

2. *Aſchaffenburg*, one of the beſt Towns in this Archbiſhopric, is the uſual Reſidence of the Elector for Part of the Summer Seaſon, in its Citadel.

3. The City and Territory of *Erfurt*, in *Thuringia*, already deſcribed under *Upper Saxony*, where it is ſituated.

4. The Country of *Eichsfeld* produces Corn, Cattle, Flax, and Tobacco; and manufactures great Quantities of Serge and Linen. It contains 4 Towns and 150 Villages.

Duderſtadt, its beſt Town, is noted for Beer-brewing, and dealing in Tobacco, *&c.*

Bonne.

5. *Bonne*, upon the *Rhine*, is a Town and Fortreſs, being the uſual Reſidence of the Elector of *Cologne*; (though not in the Circle of *Weſtphalia.)* It is not large; but has many good Houſes in it. Here are ſeveral Cloiſters, three Churches, and a Jeſuits College. It is not eminent for Commerce, though ſo happily ſituated; becauſe of its being, in Time of War with *France*, too much expoſed.

Andernach, *Rens*, &c. are ſmall but ſtrong Towns, likewiſe ſituated on the *Rhine*. [And we may here remark, for the Information of ſome Readers, that in Dr. *Buſching*'s and other Deſcriptions of Towns in *Germany*, the Word *Town* generally is to be underſtood to mean a walled and fortified Place, and not an open Borough.]

Nuyz.

In the Lower Archbiſhopric of *Cologne* is *Nuys*, or *Neuſz*, a ſmall fortified Town near the *Rhine*, carrying on a briſk Trade in Deal-boards and Pit-coal.

The Palatinate of the *Rhine*.

The Palatinate of the *Rhine*, or the Country of the *Elector Palatine*, [otherwiſe known by the Name of the *Lower Palatinate*, to diſtinguiſh it from that called the *Upper Palatinate*, in the Circle of *Bavaria*] produces good Corn, Fruits, good *Neckar* and *Rheniſh* Wines; fine Paſturage, Cattle, Tobacco.

Manheim.

1. *Manheim* is the modern Place of Reſidence of the *Elector Palatine*. It is a ſtrong Fortreſs, near the Influx of the *Neckar* into the *Rhine*; and is now become one of the fineſt Towns in *Germany*. In it is one Popiſh Church, a College of Jeſuits, two Proteſtant *Calviniſt* Churches, two Convents, and a *Jews* Synagogue. In it alſo are ſundry good Manufactures.

Heidelberg.

2. *Heidelberg* is the ancient principal Town of this Electorate; although, through many grievous Misfortunes, and more eſpecially by the moſt barbarous Ravages of the *French*, it is now but ſmall, though ſince finely rebuilt. It contains ſeveral Churches, for *Romaniſts*, *Calviniſts*, and *Lutherans*; a Jeſuits College and Church; alſo ſix Cloiſters. Many other of the good Towns of this Country were ſo miſerably ravaged by Count *Tilly*, the Imperial General, in the former Part of the XVIIth Century, and by the *French* toward the latter Part of that Century, that they have not as yet been able to recover their former happier Condition: In moſt of which Towns the three Religions have Churches. Here fine *Muſcadel* Wines are produced; and therein are ſome Manufactures. In this Palatinate alſo is the Principality of *Aremberg*, and of *Tour* and *Taxis*; the Seignory of *Beilſtein*, belonging to *Naſſau-Orange Dietz*; the County of *Lower Iſenburg*, and the Burgraviate of *Reineck*.

The Revenue and Extent of the *Palatinate* of the *Rhine*.

According to Mr. *Nugent*'s *Grand Tour*, the *Elector Palatine*'s annual Revenue is eſtimated at 300,000 *l.* Sterling. The Palatinate is about 100 *Engliſh* Miles in Length, and from 50 to 70 Miles in Breadth; and is one of the moſt fruitful and pleaſant Provinces of *Germany*.

The Electorate and Archbiſhopric of *Treves*.

The Dominions of the Archbiſhopric and Electorate of *Trier*, or *Treves*, are moſtly mountainous and woody; yet in many Parts there is good arable Land; and it produces vaſt Quantities of Wines of the *Moſelle*. This Archbiſhopric has been greatly abridged by the Conqueſts of *France*.

The City of *Treves*.

1. *Treves*, on the *Moſelle*, its capital City, has a Cathedral, three Collegiate and five Pariſh Churches, three Colleges of Jeſuits, thirteen Convents, and an Univerſity: But, it being ſo much at the Mercy of *France*, whenever that reſtleſs People think it for their Intereſt to invade *Germany*, no conſiderable Commerce can be expected in it.

Coblentz.

2. In the Lower Archbiſhopric ſtands the ſtrong Town of *Coblentz*, near the Confluence of the *Moſelle* into the *Rhine*. It contains three Churches, a Jeſuits College, and ſeven Convents. The Fort named *Ehrenbreitſten*, oppoſite to *Coblentz*, is deemed the important Key to the Rivers *Rhine* and *Moſelle*, and conſequently to the Trade in Wines, *&c.* on thoſe two Rivers. Here are many ſmall Towns, Burghs, and Villages, held in common by the Elector of *Treves* and the Prince of *Naſſau Dietz*; in which Parts they raiſe much Flax, and dig up Copper and ſome Silver.

We have not met with any Computation of the Revenue of this Electorate; but we apprehend, (for the above Reaſon) that it is the leaſt conſiderable of the three Eccleſiaſtical Electors.

A View of the Dominions and Cities which *France* has raviſhed from the Circle of the *Upper Rhine*.

The Circle of the *Upper Rhine*, has had almoſt all its Territories and States on the other Side of the *Rhine* gradually raviſhed from the *German* Empire by *France*, *viz.* the greateſt Part of the Biſhoprics, and their reſpective metropolitan Cities of *Straſburg*, *Metz*, *Toul*, *Verdun*; the Archbiſhopric of *Bezançon*, the Dutchy of *Lorrain*, [at firſt reckoned in this Circle, but afterward annexed to the Circle of *Bur-*

gundy] the princely Abbies of *Murbach* and *Munſter*, the County of *Bitch*, and the *Land-Vogtey* of *Hagenau*, which comprized the ten ancient Imperial Cities of *Alſace!*

Nevertheleſs, this Circle has ſtill remaining to it many noble and fine Territories.

1. Of the Biſhoprics of *Worms*, *Spire*, *Straſburg*, and *Baſil*, (all on or near the *Rhine)* and the Provoſtſhip of *Weiſſenburg*, nothing material relating to our general Subject can be ſaid.

2. That of the Biſhopric and Abbey of *Fulda* lies next to *Heſſia*. *Fulda* Biſhopric and Abbey.

Fulda, a fortified Town, lies on the River *Fulda*, of which we can ſay nothing farther conſiderable than that it has an Abbey, a Palace for the Biſhop, two or three Churches, a Jeſuits College, an Univerſity, and a Nunnery; and ſundry ſmall adjacent Burghs and Villages.——And much the ſame may be obſerved of the Principality of *Heiterſheim*—the Abbey of *Prum*—the Priory of *Odenheim*—the Dutchies of *Simmeren* and *Lauteren*—and the Counties of *Veldenes* and *Lautereck*; only that there is here to be found excellent Wines: And the like may be ſaid of the Dutchy of *Deux-Pons*, (or *Zweybrucken*, its *German* Name.) *Fulda* Town.

The two Landgraviates of *Heſſe* are in a great meaſure hilly and woody, intermixed with fruitful Vallies, abounding in excellent Cattle and Corn, and in ſome Parts with good Wine; with Mines of Silver, Copper, Iron, Lead, Alum, Vitriol, Salt-Springs, Pit-coal, Sulphur, Marble, and Alabaſter. Here are Manufactures of Cloth of Gold, of Linen and Woollen Cloth, Stockings, Hats, Paper, Gloves, &c. more eſpecially at *Caſſel*, which has alſo a fine *Porcellane* Manufacture. The Country and Houſe of *Heſſe*.

Heſſe-Caſſel, or *Lower Heſſe*, is *Calviniſt*, and is the largeſt and moſt powerful; its annual Revenue being by Mr. *Nugent*'s *Grand Tour* reckoned 120,000 *l.* Sterling. *Heſſe Caſſel*.

1. *Caſſel*, its Capital, on the River *Fulda*, contains five Churches; and, beſide the before-named Manufactures, has a Manufactory of Braſs and Copper. The new Town was built and is principally inhabited by *French* Refugees, who introduced ſundry Manufactures there, eſpecially of the Woollen Kinds.

2. *Marpurg* (in *Upper Heſſe)* is its Capital, and is a noted *Calviniſt* Univerſity; has four *Calviniſt* Churches. *Marpurg*.

3. In the *Wetterau* lies the County and Town of *Catzenelbogen*; with good Agriculture, ſome Wine, and Woollen Manufactures.

4. *Rhinfels*, a ſtrong Fortreſs on the *Rhine*.

The Landgrave of *Heſſe Darmſtadt* is of the *Lutheran* Perſuaſion. He poſſeſſes a fine Country, abounding in excellent Wines, Fruits, and Corn: Here are alſo ſome Woollen Manufactures.

1. *Darmſtadt*, its Capital, on the *Lahn*, is fortified. It has but one Church, and therefore cannot be large. Here is alſo the Prince's Palace, and ſome Charity-Foundations. *Darmſtadt*.

2. *Gieſſen*, a fortified Town on the River *Lahn*, with an Univerſity and two *Lutheran* Churches.

3. *Hirchfeld*, contains a Cathedral, a Town Church, a Palace, an Hoſpital well endowed, and an illuſtrious School or *Gymnaſium*.

4. *Philipſthal* is only to be here mentioned as being the Reſidence of an Appanage-Branch of the Houſe of *Heſſe Caſſel*.

The Revenues of the Landgrave of *Heſſe Darmſtadt*, according to *Nugent*'s *Grand Tour*, amount to 100,000 *l.* Sterling.

Trarbach, on the *Moſelle*, is a Fief of the Elector of *Trier*; was once a good Fort, till diſmantled by the *French*. It has one Pariſh Church, which is uſed in common by *Papiſts* and *Lutherans*.

The Principalities and Houſe of *Naſſau* lie in the Country called the *Wetterau*; which though moſtly woody and mountainous, has nevertheleſs fine arable and meadow Lands.

The County of *Naſſau-Dietz* lies on the *Lahn*; and, for its great Fertility, is called the *Golden Country!* It is a Fief of the Elector of *Trier*. *Naſſau-Dietz*.

1. *Dietz*, on the *Lahn*, has two *Calviniſt* Churches and one for *Lutherans*. *Dietz*.

2. *Naſſau* is a ſmall Town on the *Lahn*, having but one Pariſh Church, common to both *Calviniſts* and *Lutherans*. *Naſſau*.

3. The County of *Naſſau-Weilburg* has a Silver, a Copper, and an Iron Mine-work.

Weilburg is a handſome Town on the *Lahn*. *Weilburg*.

The County of *Naſſau-Saarbruk-Uſingen*, on the *Saar*, contains,

1. *Wiſbaden*, a handſome, populous, and thriving Town, chiefly ariſing from its celebrated warm Baths, and its being the Seat of the Regency.

2. *Saarbruck*, on the *Saar*, is a ſmall Town, with one *Calviniſt* and one *Lutheran* Church; and there is actually a Brief now collecting, from Houſe to Houſe, all over [*Great*] *Britain*, by the Authority of his *Britannic* Majeſty, for erecting a Church and School for the Uſe of the *Calviniſts* at *Saarbruck*, who, for the quiet Enjoyment of their Religion, are retired out of *France*, *Lorrain*, &c. which is like to meet with great Succeſs.

Waldeck.

The ancient County of *Waldeck* belongs to its own Prince: It lies South of *Heſſe*; and abounds in Grain, Cattle, and in Mines of Iron, Lead, Copper, and ſome Gold, equal in Goodneſs to that of *Hungary*.

1. *Corbach* is its principal Town, having two *Calviniſt* Churches.

2. *Waldeck* is a little Town, with ſome Fortifications.

With ſeveral other ſmall Burghs and Villages.

Hanau County.

The fine County of *Hanau-Munzenberg* lies in the *Wetterau*, near *Frankfort* on the *Meine*, along which River it moſtly lies. It is ſubject to the Landgrave of *Heſſe-Caſſel*; and is remarkably fertile in excellent *Grain*, Wines, and Fruits: It has a Silver and a Copper Mine, and ſome Salt-works. It contains five Towns, and ninety-ſix Villages.

Hanau Town.

Hanau, its fortified capital Town, has an Univerſity, a Palace, one *Calviniſt* and one *Lutheran* Church, in the old Town. The new Town was intirely raiſed, about the Year 1597, by the *Proteſtant Walloons*, or *Flemiſh Refugees*, to whom great Encouragement was given for their ſettling in this Country, having therein a *French* and a *Dutch* Church; and where they have introduced ſeveral Kinds of Woollen Manufactures, Grograms, Silk and Worſted Stockings, Callicoes, and Porcellane. Here is a Wax-Bleachery, and a Tobacco-Roll Manufacture. This Town deals much in Timber brought down the *Mayne*, and in rough and caſt Iron, Meal and Corn. Trade and Manufactures flouriſh here very much, becauſe every one has full Liberty to trade at Pleaſure: The *Jews*, in this flouriſhing Town, live in a particular Quarter of it; and are allowed Schools for the Education of their Children. This Freedom from the Reſtraints of excluſive and monopolizing Corporations and Communities, is the Glory as well as the enriching of this and ſuch other Places, whoſe Sovereigns have Wiſdom and Foreſight ſufficient to ſee their true Intereſts, in point of Commerce, Wealth, and Power.

The Lordſhip of *Hanau-Lichtenberg* lies moſtly in *Upper Alſace*, and therefore unhappily brought under the Yoke of *France*; what Part of it ſtill remains to the Empire, is ſubject to *Heſſe-Darmſtadt*, conſiſting only of a few Villages.

The Principality of *Solms*,—the County of *Konigſtein*, and of *Upper-Yſenburg*, all lie in the *Wetterau*, near the *Rhine* and the *Mayne*; but contain nothing very particular to our Purpoſe, reſpecting either Commerce or Manufactures, excepting very good Wines. Yet ſuch of them as are Proteſtant having admitted ſome of the *French* Refugees to ſettle with them, thereby have been introduced certain *French* Manufactures. It would be to ſmall Purpoſe to deſcribe, by Name, all the Lordſhips and ſmall Independencies of the Country of the *Wetterau*, and ſome other Parts of this Circle, as of very little Importance to our main End.

The Imperial City of *Worms*.

Yet we muſt remark, that the Imperial City of *Worms*, near the *Rhine*, after having been deſtroyed by the *French*, *Anno* 1689, has been moſtly rebuilt with Advantage. It is a free State of the Empire: Its Magiſtrates are *Lutheran*; but the Papiſts have the Cathedral, with four Collegiate and four Pariſh Churches, a Jeſuits College and Gymnaſium, alſo ſix Convents. Here are three *Lutheran* Churches, and three for the *Calviniſts*. In its Vicinity grows the delicious *Rheniſh* Wine, which, for its Excellence, has the Appellation of *our Lady's Milk*.

The Imperial City of *Spire*.

The imperial City of *Spire* takes its Name from a ſmall River, falling into the *Rhine* a little lower. It was likewiſe moſt barbarouſly deſtroyed by the *French*, *Anno* 1689, and lay waſte till after the Peace of *Ryſwick*, when it was begun to be rebuilt. The Choir of its Cathedral (ſays Dr. *Buſching*) "is beautifully repaired. ☞ But the ſuperb marble Monuments of eight Emperors and three Empreſſes here, "were broke in Pieces by the *French*, who opened and pillaged the Vaults, and threw about the Bones "of the *illuſtrious Dead!*" *Spire* is one of the original imperial Cities. Beſide the Cathedral, here are ſeveral Popiſh Churches, a Jeſuits College, and ſeveral Convents and Nunneries. The *Lutherans* outnumber all its other Inhabitants, have two Churches and a *Gymnaſium*; and its Magiſtrates are alſo *Lutheran:* Yet it pays Homage to its Biſhop upon every new Acceſſion; and, in return, he binds himſelf not to infringe its Liberties.

Friedberg Imperial City.

The imperial City of *Friedberg*, in the *Wetterau*, ſtands in a very fertile Country; though it is now much decayed, (as is alſo the Caſe of the moſt Part of the other imperial *German* Cities) yet it is ſtill a free *Lutheran* Town; but is not at preſent eminent for Commerce.

The Imperial City of *Wetzlar*.

The free imperial Town of *Wetzlar* lies alſo in the *Wetterau*; its Magiſtrates, and moſt of its Burgers, are *Lutherans*. Yet the principal Church is in common for both *Papiſts* and *Lutherans*. The Papiſts alſo have a Convent, a Jeſuits College, and a Church. The *Lutherans* have two other Churches, and the *Calviniſts* have one Church. Hither, in the Year 1693, was removed from *Spire*, (for the Reaſon to be be ſeen under the then Condition of that City) the *imperial* Chamber, ever ſince held in the Town-houſe of *Wetzlar*.

The Circle of *Franconia*.

The Imperial City of *Franckfort*.

The Circle of *Franconia* contains,

1. The free and imperial City of *Franckfort*, on both Sides of the *Mayne*, is juſtly celebrated for its Commerce. It contains about 3000 Houſes, and many fine Palaces belonging to various Princes and Lords, beſide three Squares.——It is the uſual Place of the Election and Coronation of a *King of the Romans*. In the Fair-Time, (laſting three Weeks, twice in the Year) here are Toy-ſhops under the Arches of the Town-houſe; and over thoſe Arches is the Hall where the Emperor uſually dines on his Coronation-day.——Amongſt the Archives, in the Town-houſe, is kept the famous *Golden Bull* of the Emperor *Charles* IV. being a Parchment-Book of forty-three Quarto Leaves, containing the fundamental Inſtitutes of the Empire: It is kept in a Caſket of Gold, and may be termed the *Magna Charta* of *Germany*, written in *Latin* Capitals.——This City has an Exchange for Merchants.——The Magiſtrates and other City-Officers are *Lutherans*, that being eſteemed there the eſtabliſhed Religion; but, although the *Calviniſt* Traders are numerous here, they are ſo uncharitable as not to allow them a Church within their City; wherefore they are obliged to go a *little Way* out of Town, (ſays Dr. *Buſching*) but, according to Mr. *Nugent*, three Miles off, to a Village named *Bokenheim*, in the County of *Hanau*, for their public Worſhip.——Moſt of the beſt Churches, with the Cathedral, are poſſeſſed by the *Roman* Catholicks, who likewiſe have ſeveral Convents here. There are, however, ſeveral *Lutheran* Churches, and two *Lutheran* Nunneries for Ladies of Quality, a *Lutheran* Gymnaſium or Univerſity, and a Seminary for *Lutheran* Divines: Alſo a City-Library, ſundry Hoſpitals, and other charitable Foundations.

Franckfort's convenient Situation in ſo fine and rich a Part of *Germany*, and its two celebrated annual Fairs for all Kinds of Merchandize, and remarkably ſo for printed Books in all Languages, renders it, in point of Traffic, one of the principal Places in *Germany*. [Mr. *Keyſler*, in his Travels, *Annis* 1730 *& ſeq*; thinks, that ten Millions of Rix-dollars would hardly purchaſe the Merchandize expoſed to Sale at one of thoſe Fairs.] Its Silk Manufactures are very conſiderable; here are alſo Manufactures of Tobacco and Porcellane. This City has a Territory round it, containing one walled Town, and ſeveral Villages, Seats, and Farms, where much Wines are made; and alſo a Foreſt.

Being a fortified City, it maintains its own Garriſon; and the annual Revenue of the City is computed at 600,000 Gilders, equal to 70,000 *l. Sterling*.

In the extenſive Biſhopric of *Bamberg* are eighteen Burghs and fifteen Market-Towns; it is ſo fertile in Grain, Fruits, good Wines, Saffron, fine Liquorice, Lemon and Orange-Trees, as to be ſtiled, by ſome, the *Little Italy* of *Germany*.

Bamberg Biſhopric and City.

Bamberg, its capital City, is well built and populous, is ſituated near the River *Bednitz*: But, as too often happens to Cities ſubject to Eccleſiaſtical Sovereigns, there is little to be ſaid of its Commerce; there are, however, in this City, a Cathedral, Abundance of fine Houſes, Churches, and Convents; and alſo ſome charitable Foundations.

Wurtzburg City and Biſhopric.

Wurtzburg is another large and princely Biſhopric, and its capital City, of the ſame Name, on the *Mayne*, is fortified, has a large Cathedral, an Univerſity, two Collegiate and ſeveral Pariſh-Churches and Convents.

This Biſhopric is very fertile in Corn, Fruits, and Wines, of which laſt the very beſt in all *Franconia* grows near this City. Formerly, Proteſtantiſm prevailed much here; but, living under an Eccleſiaſtical Prince, it could not long do ſo; accordingly, the remaining *Lutheran* and *Calviniſt* Churches are continually preferring to the Diets of the Empire, their grievous Complaints of Oppreſſion and Injuſtice; but to very little Effect!

Principality of *Brandenburg-Bareith*.

The Principality or Margraviate of *Brandenburg-Bareith*, [or, as Dr. *Buſching* writes it, *Bayreuth*] produces all Kinds of Neceſſaries, Wine only excepted. In it are Mines of Silver, Copper, Lead, Iron, Antimony, Cryſtal, Vitriol, Sulphur, *Terra Sigillata*, Marble, *&c.* It contains ſixteen walled Towns, and twenty-ſix Market-Towns.

1. *Bareith*, its Capital, contains three Proteſtant Churches, [*viz.* two *Lutheran* and one *Calviniſt*] and a Popiſh Chapel.

Erlang.

2. *New Erlang*, (called alſo, from the Margrave's Name who founded it, *Chriſtian Erlang*) is quite a modern Town, ſprung up, or rather founded, ſo lately as the Year 1686, lying cloſe to *Old Erlang*: Its Exiſtence and Increaſe has been intirely owing to the Acceſſion of the *French* Proteſtant Refugees, upon the Repeal of the Edict of *Nantes*. It being built, as it were, all at once, its Streets are therefore very ſtreight, broad, and regular, ſo as to be now eſteemed one of the fineſt Towns in *Germany*. Here are four Churches, and a newly built Palace for the Sovereign; alſo an Univerſity removed hither from *Bareith*, *Anno* 1743.

The *French* Refugees have ſet up ſome conſiderable Manufactures here, chiefly of the Woollen Sort; alſo Stockings and Hats, *&c.* It is ſurrounded with a Wall, *&c.*

3. *Old Erlang* (a very ancient Place) has but one *Lutheran* Church. Here is a College of Commerce.

Here are ſome other Towns in which the *French* Refugees have eſtabliſhed Manufactures, and have ſeparate Churches for themſelves.

The Revenue of this Principality is reckoned, by Mr. *Nugent*, in his *Grand Tour*, to amount to 500,000 Crowns; [but what ſort of *Crowns* he does not tell us.] He ſays, that the Family of *Bareith* became extinct in the Year 1726; and that his Couſin, the Marquis of *Culembach*, ſucceeded to it.

4. *Culembach*, a ſtrong Town, on the River *Mayne*, is deſcribed by Mr. *Nugent*, as not far from its Source; and that, at this City, are kept the ancient Records of the Houſe of *Brandenburg*. It has ſuffered much by Fire, particularly it was almoſt thereby deſtroyed in the Year 1708.

5. *Hoff* has four Churches, a Gymnaſium, and a good Woollen Manufacture, and fine Marble; of both which a great deal is exported.

6. *Wunſiedel* has a Manufactory in dyed Woollen and Linen Stuffs, and deals in wrought Plate.

Biſhopric and City of *Aichſtet*.

In the Biſhopric of *Aichſtet* are ten Towns, beſide one Market-town, and many Villages. *Aichſtet*, its Capital, has a Cathedral, a College of Jeſuits, ſeveral Pariſh-Churches, and Convents; yet is no way eminent for Commerce.

The Circle of the *Upper Rhine*. *Anſbach* Country.

The Principality of *Onolſbach* or *Anſbach* is *Lutheran*, and extends quite to the Gates of *Nurenberg*. It abounds in Grain, Fruits, Tobacco, Wines, and Iron-Mines. It contains ſixteen Burghs, and ſeventeen Market-towns; has Manufactures of Woollen Cloth, Tapeſtry, Stuffs, Stockings, Gold and Silver Lace, Wire, Needles, Porcellane, Looking-glaſſes, Leather, *&c.*

Anſbach Town.

1. *Anſbach*, its Capital, has ſeveral Churches, a *Gymnaſium illuſtré*, and ſome charitable Foundations, a Prince's Palace, a Porcellane Manufacture, *&c.*

2. At *Swabach* are two or three Churches, and ſome charitable Foundations; with Manufactures of Gold and Silver Lace, Iron-wire, *Spaniſh* Steel, Pencils, and Braſs-Buttons: Here are Model-Cutters and Needle-makers of great Fame; Manufacturers of fine Metal Shoe-Buckles, Stocking-weavers, of whom there are 200 Maſter-Workmen in this Town, employing 300 Looms or Frames; Tobacco-Spinners, fine Tapeſtry-Weavers, and Manufactures of Woollen Cloth and Stuffs, which Manufactures have been much improved ſince the firſt Settlement here of the *French* Refugees, in the Year 1686.

3. *Hoffmarkfurth* is a large, commercial, and very populous Place, on the *Rednitz*; where there are great Numbers of *Artiſans* and Mechanicks; being ſuch as cannot be received into the *Gilds* and *Fraternities* of *Nurenberg*, as the Laws of the *German* Empire are framed, where the Dues run ſo high; where alſo the *Jews* are ſo very numerous as to make a third Part of the Inhabitants, having here a great School and a *Printing* Preſs. The Inhabitants of this Town are partly Subjects of *Anſbach*, partly of *Nurenberg*, and partly alſo of the Chapter of *Bamberg*.

4. *Roth*, though but a ſmall Town, has Manufactures of Stockings, *Spaniſh* Lace and Stuffs.

5. *Steſſt*, a Market-town, ſeated on the River *Mayne*, has greatly proſpered ever ſince the Year 1726, when Immunities were promulgated for the Benefit of all ſuch Manufacturers and Merchants as inclined to ſettle in it.

Smalkald.

In the Prefecturate of *Smalkalden*, lies the Town of *Smalkald*, ſituated near the *Thuringian* Wood: It is a conſiderably large, thriving, and populous Town, belonging to the Landgrave of *Heſſe-Caſſel*, having two Churches: Its Salt-pits, and the neighbouring Mines of Iron and Steel, with their Forges, occaſion this Town to reap conſiderable Advantages; and a great Trade is here carried on in *Iron* and *Steel* Wares.

Nurenberg. The very various Computations of its Magnitude conſidered.

The free Imperial City of *Nurenberg* is a very large well-built City, ſtanding on the *Regnitz*, which runs through the Middle of it; over which, excluſive of diverſe Wooden Bridges, are laid ſix Bridges of Stone: It has double Walls, fortified with ſeveral ſmall and large Towers, and a broad and deep Ditch, about a *German* Mile, or four *Engliſh* Miles, in Circuit. It contains above 500 Streets, and 8000 moſtly large Stone Houſes; but the Number of its Inhabitants is not proportioned to the Largeneſs of the Town; for though, in many Houſes, there may reſide two or three Families, (according to Dr. *Buſching*) yet in moſt there is but one; and ſeveral Houſes remain uninhabited. On the other hand, Mr. *Keyſler*, in his Travels, *(Annis* 1730 *& ſeq;)* makes *Nurenberg*'s Dwelling-houſes to amount to 21,000 in Number, which (he adds) are inhabited by 75,000 Families. Now, if this laſt Account be near the Truth, then, on the moderate Computation of four Perſons to each Family, the Number of its Inhabitants would be 300,000. Theſe two Authors, being both *Germans*, and Gentlemen of Education and Abilities, whoſe Employments and Situations, ſo near to *Nurenberg*, one would imagine, muſt have enabled them to be well acquainted with the Magnitude of ſo famous a Place; yet it is truly ſurprizing, that there ſhould be ſo vaſt a Difference between their Accounts as almoſt three is to one, in reſpect to the Houſes in it; and almoſt ten to one, in reſpect to the Number of Inhabitants, allowing four Perſons, as above, to be in each Family. A third Author, (Mr. *Nugent*, in his *Grand Tour*, ſecond Edition, *Anno* 1756) thinks *Nurenberg* may contain 550 Streets and Alleys, wherein are 60,000 Inhabitants. So great a Diſparity is there, for the moſt Part, in the different Accounts of Voyagers, relating to the Magnitude of moſt of the greater Cities of *Europe*, probably occaſioned by their negligently taking up with merely a tranſient View of ſuch Places, as they paſs through them, or the vulgar Report of ſome of their Inhabitants. Let us then ſuppoſe, with Mr. *Nugent*, that there may be, in each of thoſe 550 Streets and Alleys, 40 Houſes, on a Medium, or 22,000 Houſes in all; and, as many of them are large and lofty, they may, on a like Medium, contain ſix Perſons in each Houſe, then there may be in this City about 132,000 Inhabitants, nearly equal to the City of *London* within its Bars; which Suppoſition ſeems to us to be nearer the Truth than any of the three above-named Computations. Dr. *Buſching* relates, That the Magiſtrates, and almoſt all its Inhabitants, are *Lutherans.*——That it has ſix Pariſh-Churches, with ſtated Preachers; beſide eleven

other

other Churches and Chapels, in which ſometimes Deacons, and ſometimes Candidates for the Prieſthood preach.——That the few *Calviniſts* reſiding here have a Preacher of their own, perform divine Service out of this City, in an Houſe ſeated in a Garden; and that the *Roman* Catholick Service is tolerated in the *Teutonic* Houſe.——That its *Lutheran* Clergy conſiſt of ſix chief Preachers, thirty-five Deacons, and two Vicars. Mr. *Nugent* thinks it excels all the Cities in *Germany*, in reſpect to the Fairneſs of its Streets, the Uniformity of its Buildings, and its Induſtry. Dr. *Buſching* ſays, the Council-houſe is one of the moſt magnificent in all *Germany*.——That it has many Hoſpitals and other charitable Foundations, beſide a *Gymnaſium*, and many private Schools.——That, in the Church of the *Holy-Ghoſt* are repoſited the principal Part of the Jewels of the Empire, ſuch as the Crown, Sceptre, Sword, and Imperial Apple, never ſhown but to Perſons of great Diſtinction.——That its large Arſenal is well ſupplied with all the Implements of War; the Military Force of the City, in Time of Peace, conſiſting of ſeven Companies of Foot, of each 100 Men, and, in Time of War, of each 185 Men, with two Companies of Cuiraſſiers, and two of Invalids.——Here alſo is a Citadel or Imperial Fortreſs.——That, out of the Burgherſhip, twenty-five Standards are always kept in Arms, each conſiſting of between 3 and 400 Men, excluſive of 200 Gunners, and two Companies of the Town's Cavalry.——That its ingenious Artiſts, and Handicrafts-People in Ivory, Wood, Metal, Clock-work, *&c.* have long been moſt famous everywhere, and that numberleſs ingenious Things, at very low Prices, are exported all over the World; and that, although thoſe Curioſities, Toys, *&c.* do not at preſent bring in ſo much Money as they formerly did, yet thoſe Articles are ſtill very conſiderable, as this City continues to be one of the greateſt trading Towns in *Germany*.——That Geography is much indebted to the celebrated Shop for Land-Charts or Maps, eſtabliſhed here, by *Homman*, which Shop is alſo a real Ornament and a great Honour to the City; which has ten Market-places, and thirteen public Baths.——That the River *Pegnitz* is let into the City, by twelve large Arches under its Walls, and let out again by the like Number of Arches, after running through the Middle of the City; and on its Stream there are ſixty Mills for Corn and Paper, and the making of Sword-blades, Knives, *&c.* with much Diſpatch and Art.

The Territory belonging to *Nurenberg* contains in it two conſiderable Imperial Foreſts; alſo ſeveral good ſmaller Towns, Citadels, and Villages.

From the ancient Burg-graves of *Nurenberg* is deſcended the preſent Royal and Electoral Houſe of *Brandenburg*, as alſo the Princes of *Bareith* and *Anſpach*.

Swabia Circle.

The Circle of *Swabia* is particularly remarkable for containing very many free Imperial Cities, *viz.* *Augſburg* and *Ulm*, (Places of the greateſt Eminence) *Eſzlingen*, *Reutlingen*, *Nordtlingen*, *Hall*, *Neberlingen*, *Rothweil*, *Heilbron*, *Gemund*, *Memmingen*, *Lindau*, *Dinkenſbuhl*, *Biberach*, *Ravenſburg*, *Kempten*, *Kaufbeuren*, *Weil*, *Wangen*, *Yſni*, *Leutkirch*, *Wimpfen*, *Giengen*, *Ppfullendorf*, *Buchhorn*, *Aalen*, *Bopſingen*, *Buchau*, *Offenburg*, *Gengenbach*, *Zell*, [the laſt three ſtiling themſelves *the United Towns*, as *Eſzlingen*, *Nordtlingen*, *Hall*, *Heilbron*, *Memmingen*, and *Lindau*, are called *the ſix Correſponding Towns*, of which *Ulm* is perpetual Director:] Many of which Towns, with the pompous Name of free and Imperial Cities, (like ſeveral of the *Royal Burghs* in *Scotland*) are now ſo mean and inconſiderable, whatever they might anciently have been, as ſcarcely to merit to be mentioned.

The Dutchy of *Wurtenburg*.

The Duke of *Wurtenburg* is the moſt conſiderable Potentate in this Circle.

In this Duchy were numbered, in the Year 1754, 477,115 Inhabitants, which are, ſince then, ſuppoſed to have gradually increaſed. This Dutchy contains 68 Cities and Towns, 1200 Burghs, Market-Towns, and Hamlets. The eſtabliſhed Religion is *Lutheran*; but the Duke *Charles-Alexander* has embraced the Catholick Religion; although, in the Years 1729, 1732, and 1733, that Prince gave formal Aſſurances to the States, That no Change nor Innovation ſhould be made in the *Lutheran* Eſtabliſhment. And Duke *Charles-Eugene*, *Anno* 1750, did the like. But, alas! what free People can ſafely rely on ſuch Declarations, when a *Prieſt* or *Jeſuit* muſt be ſuch a Prince's *Ghoſtly Father!*

In this Dutchy are Manufactures of *Porcellane*, Glaſs, fine Gold and Marbled Paper, Damaſked Linen, *&c.*

At *Tubingen*, and other Towns, are good Manufactures of Linen and Woollen, Cotton-printing, Hats, Stockings, *&c.*

Stutgard.

Stutgard, Capital of the Dutchy of *Wurtenburg*, though not large, yet contains five *Lutheran* Churches: Here are Manufactures of Silks, Stuffs, Stockings, Porcellane, Glaſs, Ribbons; and excellent Wines, and ſome Salt Springs.

Tubingen, on the *Neckar*, has an Univerſity, and a Woollen Manufacture.

Montbeillard has three Proteſtant Churches, and a *Gymnaſium*.

Baden-Baden.

The fine Marquiſate of *Baden-Baden* lies along the Eaſt Side of the *Rhine*, abounding in Corn, Wine, Flax, Hemp, Wood, *&c.* yet has no Town, nor any Manufactures of Eminence.

Baden-Dourlach.

The Marquiſate of *Baden-Dourlach*, lying on the Eaſt Side of the *Rhine*, has an Exuberance of good Wine, Corn, Flax, Hemp, Horſes, ſeveral Iron-works; yet ſcarce any peculiar Manufactures, nor Towns of any Eminence.

Augſburg Imperial City.

The fine, large and ſtrong, free, Imperial City of *Augſburg* is ſituated on the River *Lech*, which runs into the *Danube*. It has a grand Cathedral, in which is fourteen Chapels, ſix Popiſh Pariſh-Churches, two Abbeys, eight Convents; ſix *Lutheran* Pariſh-Churches, and a *Lutheran Gymnaſium*, or great School;

ſundry Hoſpitals, and other charitable Foundations. It has the fineſt Town-houſe in all *Germany*.—On its fine *Aqueducts*, for the Conveyance of Water into it, are ſeveral Mills for *Corn*, *Sawing*, and for Flating and Smelting of Metals.—Its *Burghers* are computed to amount to 6000. [What Dr. *Buſching* here means by the Word *Burghers*, he has not clearly explained, though probably is thereby meant what in *England* is called *Freemen* of Cities and Towns.] *Augſburg* has very long been celebrated for its curious Artiſts in Gold, Silver, Clock-work, Tin, *&c.* and its Commerce is ſtill conſiderable; although formerly it was much more ſo, whilſt the Merchandize of *Eaſt-India* continued to be brought to it from *Venice*, before the *Portugueſe* diſcovered the Way by Sea to *Eaſt-India*.

Here is a great *Wine* and *Salt* Office, with vaſt Magazines of *Rheniſh*, *Moſelle*, and *Tyrol* Wines. They deal here conſiderably in Banking, and are famous for their *Goldſmiths* Ware, with which they ſupply a great Part of *Germany* and *Poland*; and are even ſaid to outdo *Nurenberg* in *Clock-work*, fine Steel Chains, and Iron-works; and it is ſtill one of the largeſt and fineſt Cities in all *Germany*. Its Magiſtracy is half *Lutheran* and half *Catholick*. It has a conſiderable circumjacent Diſtrict, and ſome Villages. Its Biſhop is a Prince of the Empire, as indeed all other Biſhops are within the *German* Empire.

Ulm Imperial City.

The free, Imperial, and fortified City of *Ulm* is deemed the Capital of the Circle of *Swabia*, ſituated on the *Danube*. Its Magiſtracy, and moſt of its Inhabitants, are *Lutheran*. Here are ſeveral *Lutheran* Churches, and ſundry good ſecular Edifices, beſide the Town-houſe and Arſenal. It maintains ſix Companies of Soldiers for its Guard. *Ulm* trades conſiderably in Linen, Cotton, Clock-work, and in great Quantities of Wines brought thither from the *Rhine*, the *Neckar*, the Lake of *Conſtance*, and the *Valteline*, and thence carried farther up the *Danube*. *Ulm*'s Territory is about twenty-four *Engliſh* Miles in Length, and ſixteen in Breadth.

Many inconſiderable Imperial Towns in *Swabia*.

Here are Abundance of leſſer Imperial Cities in this Circle, as *Memingen*, partly *Lutheran* and partly Catholick, ſaid to carry on a good Trade with *Switzerland* and *Italy*, in Salt, Linen, Hops, Corn, Paper, *&c.* Yet moſt of the reſt already named, are ſcarcely otherwiſe conſiderable but merely in Name, without being eminent either for Commerce or Manufactures.

The Circle of *Bavaria*.

In the Circle of *Bavaria* is,

Saltzburg Archbiſhopric.

1. The very extenſive Archbiſhopric of *Saltzburg*, (which terminates Eaſtward on *Auſtria*, and Southward on *Tyrol*) conſiſts intirely of Mountains, deep Valleys, and narrow Paſſes; whereby they are conſtrained to have all their Corn from the *Electorate* of *Bavaria*: Yet they have Plenty of *Hay* of a peculiar Excellence, and their Horſes are much eſteemed for their Beauty and Hardineſs.——Their Salt, of various Colours, is hewn out of ſubterraneous Places, and then diſſolved in freſh-water Pits, of the Brine whereof the fineſt Salt is made, and much of it exported to *Bavaria* in Exchange for *Corn*, purſuant to an ancient Compact between the Electorate and this Archbiſhopric.——Here alſo are very conſiderable Mines (ſays Dr. *Buſching*) of Gold, Silver, Copper, Lead, Iron, and *Lapis Calaminaris*, a great deal of Braſs and Steel being here made, and an almoſt incredible Quantity of Swords, Sabres, Bayonets, Muſkets, Cannon, and Mortars. And, although this Country be altogether inland, there are in it ſuch important Materials for Commerce as are more than ſufficient to enable it to grow opulent and populous. It contains ſix Cities and twenty-five Market-towns. Such, nevertheleſs, are the Miſchiefs of Eccleſiaſtico-*temporal* Dominion over the Laity, that theſe Sovereign Archbiſhops have oppreſſed, and at length gradually extirpated, their formerly numerous Nobility, and have annexed their Eſtates to the Clergy. Theſe Eccleſiaſtical Tyrants have, moreover, by all the various Means of Oppreſſion and Cruelty, driven out, in our own Days, great Numbers of their *Lutheran* Subjects, no fewer than 30,000 of ſuch, in the Year 1732, being diſperſed into the Proteſtant Countries of *Germany* and *Pruſſia*, and ſome of them even as far as the *Britiſh* Continent-Colonies of *America*. In all which Parts they have been received with that Benevolence and Encouragement which their great Reſolution and *Chriſtian* Magnanimity juſtly merited! And, ever ſince that Period, their Emigrations have ſtill continued, to the great Depopulation of the Country. Thus, wherever Eccleſiaſtical Deſpotiſm prevails, the ſole Conſideration is the propagating the Power of the Clergy, though to the Ruin of the Country.

This Archbiſhop is ſo conſiderable a Prince, that his Aſſeſſment, in the Matricula of the Empire, is equal to that of an Elector, being 60 Horſe and 277 Foot, or 1828 Florins; and to the Chamber of *Wetzlar* he pays 608 Rixdollars annually: Mr. *Keyſler* thinks his Revenues amount to no leſs than 800,000 Rixdollars, [or about 180,000 *l. Sterling*.]

The City of *Saltzburg*.

1. *Saltzburg*, [or, as often written, *Salzburg*] its well fortified capital City, contains thirty Churches, beſide its great Cathedral, a grand Palace for the Sovereign, an Univerſity, ſeveral Convents, and Hoſpitals, and ſome good Palaces: It is well ſituated for Trade, upon the River *Salza*, which runs into the *Inn*, which falls into the *Danube* at *Paſſau*. Yet none of our Voyagers write any Thing particular of its Manufactures or Commerce.

2. *Gaſtein*, a Market-town, is noted for its warm Bath, and for its Lead, Silver, and Gold Mines.

The Electorate of *Bavaria*.

In the proper Electorate and Dutchy of *Bavaria* are reckoned 35 walled Towns, 95 Market-towns, and 11,700 Villages; and, in what is called the *Upper Palatinate*, (alſo ſubject to the Elector) are 13 walled Towns, and 28 Market-towns; and, in all the Electorate, 1500 Pariſhes, beſide very many Convents with Chapels.

Its Trade.

Manufactures have of late been cultivated here, *viz.* coarſe Woollen Cloth, Stuffs, and Stockings; alſo Silks, Velvets, Tapeſtry, good Clocks, Watches, *&c.* Yet not ſo conſiderable, but that ſtill its principal Exports conſiſt only of Grain, Cattle, Timber, Salt, and Iron.

Its fortified capital City is *Munich*, on the River *Izer*, containing 40,000 Inhabitants, ſeveral fine Churches, Convents, Palaces, and Hoſpitals, beſide the Electoral Palace. At its annual Fairs are ſold vaſt Quantities of Salt, Wines, *&c.* And here are Manufactures of Wool, *Silk*, *Tapeſtry*, and *Velvet*.

Munich.

2. *Ingolſtadt*, a ſtrong and populous City on the *Danube*, has five Churches, a College and Gymnaſium of Jeſuits, three Convents, and an Univerſity; and, as it has the Privilege of a Staple, its happy Situation on ſo noble a River gives it great Commercial Advantages.

3. *Friedberg*, a Town of two Churches, is noted for its Clocks and Watches.

4. *Waſſerburg*, a Town of four Churches and ſeveral Convents, has a conſiderable Trade in *Salt*; as have alſo all thoſe of *Fraunſtein* and *Reichenball*, [the *latter* having a very extraordinary Machine for carrying its Salt-Springs over ſome high Mountains, to a conſiderable Diſtance.]

In the *Lower Bavaria* is,

1. *Landſhut*, an open well-built Town on the *Iſer*, having two Electoral Palaces in it, a Jeſuits College and Church, (the Steeple of which is deemed the higheſt in *Germany*) one Pariſh-Church, and ſix Convents.

2. *Straubing* is a well-built Town on the *Danube*, with two Churches, four Convents, and a Jeſuits College.

In the *Upper Palatinate* is *Amberg*, its fortified Capital, and the largeſt Town in the ſaid Palatinate, on the River *Vils*; but its Commerce is no where ſaid to be remarkable.

Amberg.

The City of *Freyſing*, the Capital of the Sovereign Biſhopric of that Name, has a Cathedral, four Collegiate and two Pariſh-Churches, with ſundry Convents and charitable Foundations.

In the Dutchy of *Newburg*, ſubject to the *Elector-Palatine*, is *Newburg*, its Capital, a neat but ſmall fortified City, on the *Danube*. Of its Commerce or Manufactures we have very little Account; only Mr. *Nugent* relates, that Wines are ſold weekly in its Markets.

Newburg.

The noble, free, and Imperial City and Biſhopric of *Ratiſbon*, [otherwiſe called *Regenſburg*] ſtands at the Confluence of the *Danube* and *Regen*. The City is large and populous: Its Magiſtrates and Burghers are *Lutheran*, as are moſt of its Churches. Yet here is a Jeſuits College, a Popiſh *Scottiſh* Cloyſter, a Collegiate Church, and ſeveral Convents and Hoſpitals. The Diets of the Empire have been held here for about 100 Years paſt, to the conſiderable Emolument of this City. Here is a ſtrong palatable Wine, and an important Salt-Staple and Trade: And from this City large Quantities of Corn, Wood, and Proviſions of all Kinds, are continually ſent down the *Danube* to *Vienna*.

Ratiſbon, Imperial City and Biſhopric.

In the Biſhopric of *Paſſau* is the City of *Paſſau*, on the *Danube*, at the Confluence of the River *Inn* on the South Side. It contains a Cathedral, and ſeveral Churches and Convents. Its very happy Situation for Trade would naturally give Ground for conjecturing it had ſome Share of it, yet there does not ſeem to be any thing conſiderable of it here; for which we can no otherwiſe account, than that it is abſolutely ſubject to an Eccleſiaſtical Sovereign. Its Biſhop's Territory extends about twenty Miles on the North Side of the *Danube*.

Paſſau.

The Kingdom and Electorate of *Bohemia* may be truly ſaid to be a much decayed Country, ſince it came under deſpotic Government. By reaſon of its former Diſtractions, it is far from being what it was 150 Years ago, when it was computed to contain above three Millions of People.

Bohemia Electorate and Kingdom.

Prague, its celebrated Capital, according to Mr. *Keyſler*'s Travels, (as we have ſeen) contains 100,000 Inhabitants. But Dr. *Buſching*'s Account reduces it to 70,000 *Chriſtians*, and 13,000 *Jews*, the latter dealing much in Jewels; who adds, that, although its Commerce is not conſiderable, yet it contains ninety-two Churches and Chapels, and about forty Cloiſters.

Prague.

Here are many other walled Towns and Burghs; yet it does not appear, that any of them are eminent either for Commerce, or for Manufactures.

In *Bohemia*, however, is very good *Tin*, good Silver Mines, precious Stones of various Kinds,—Plenty of Corn, Cattle, Alum, and Glaſs-Manufactures, and ſome good Wines.

Moravia, generally eſteemed a Part of *Bohemia*, has ſome Manufactures of Woollen, Iron, Glaſs, Paper, Gun-powder, *&c.* and ſundry good walled Towns and Burghs, though none eminent in a commercial Senſe, but

Moravia Province.

1. *Olmutz*, its ſtrong and extenſive Capital, containing a Cathedral, twenty-ſix Churches, ſeven Chapels, nine Convents, ſeveral Hoſpitals, and an Univerſity.

Olmutz.

2. *Brinn*, a large walled Town, ſaid to have more Trade than even *Olmutz* itſelf.

3. *Iglau*, a ſtrong and populous Town, has ſoome good Woollen Manufactures.

The great and extenſive Province of *Sileſia* has been uſually deemed to belong to the Kingdom of *Bohemia*, but is at preſent ſubject to the King of *Pruſſia*, and not now comprehended in any particular

The large Province of *Sileſia*.

Circle

Circle of the *German* Empire: It borders Weſtward on *Bohemia*, and Eaſtward on *Poland*, to which laſt Kingdom it anciently belonged.

It abounds in all Neceſſaries, and in many valuable Productions: As Flax, Hops, Madder, Tobacco, Tar, Pitch, Turpentine, Pitcoal, Mines of Silver, Copper, Lead, Tin, and Iron, good Wool; and in good Years its Wine, when kept for ſome Years, proves good. Of late alſo Raw-Silk is cultivated.

The great River *Oder* traverſes this Country from End to End, for about 200 *Engliſh* Miles in Length, and the Country may be about 70 Miles in Breadth. The *Oder* firſt becomes navigable at *Ratibor*.

People, their Number. Dr. *Buſching* thinks, that the People of *Sileſia* may exceed a Million and an half, ſo that it exceeds, in that Reſpect, ſome Kingdoms of *Europe*. Yet when he computes, (or rather ſuppoſes) *That, out of thirty-eight Perſons, there die four annually,* he (*or perhaps only thro' Miſtake his Engliſh Tranſlator*) ſeems to be out of all rational Probability; for, in another Part of his Work, he only ſuppoſes *one* to die annually out of *thirty-eight*, upon which Computation alſo we have elſewhere animadverted. Beſide the Clergy, the People of this Province conſiſt of Princes, Dukes, Counts, Barons, Gentry, Citizens, and Peaſantry; and the Bulk of its People are of both Religions, *i. e. Catholics* and *Lutherans*; beſide there being here alſo many *Calviniſt* Congregations. At *Breſlau* there is alſo a *Greek* Church, and a *Jews* Synagogue; as there are alſo in ſome other Parts. But whilſt this Country was in the Poſſeſſion of the Houſe of *Auſtria*, the Proteſtants were grievouſly haraſſed, though contrary to ſolemn and repeated Stipulations!

Its principal and very univerſal Manufactures conſiſt of Thread, and of Linen of various Kinds and Fineneſs, Twine, Linen-printing, Canvas, Buckrams, plain, ſtriped, and flowered Veils, very fine *Turkiſh* Thread, Lace, Paper, Woollen Cloth and Stuffs, Stockings, Hats, Linſey-Woolſeys, plain and figured Fuſtians, Calamancoes, Pluſh, Cotton, and other Stuffs, Glaſs-houſes, Leather-dreſſing, Powder-mills, Iron-mills, and Manufactures of Iron of many various Sorts.

Sileſia's principal Exports are, Madder, Mill-ſtones, Linen, Thread and Yarn, Woollen Cloths, Paper, Wax, Honey, and Leather.

Its Imports are, *Poliſh* Wheat, Salt, Wines, Spices, Drugs, Fabricks, *&c.*

Dr. *Buſching* thinks, that, ſince *Sileſia* has been ſubject to the King of *Pruſſia*, Commerce has been conſiderably improved by that Monarch's excellent Regulations.—And he ſubjoins, that it is generally ſuppoſed, that all *Pruſſian Sileſia*, in Conjunction with the County of *Glatz*, brings in above four Millions of Rixdollars *per Annum*; a Revenue ſurpaſſing that of ſundry *European* Kingdoms!

Breſlau. 1. *Breſlau*, its capital City, on the *Oder*, which runs cloſe by the Walls, is, with all its Suburbs, two *German* Miles [or eight *Engliſh* Miles] in Circumference. It has ſundry large and regular Squares, and its main Streets are broad; beſide many ſtately public Edifices, it contains Numbers of very elegant Houſes. It has about fifteen Popiſh Pariſh-Churches, three Abbeys, and thirteen or fourteen Convents; about nine *Lutheran* Churches, one *Calviniſt* Church, one *Greek* Church, and a *Jews* Synagogue. Its Univerſity is under the Government of the *Jeſuits*; but the *Lutherans* have two flouriſhing Gymnaſiums, under the Direction of eleven Profeſſors; and they have alſo a Grammar-School. Here is an Archiepiſcopal Cathedral and Palace, a fine Merchants Exchange, two Armories, a College of Phyſicians, and many State-Offices. Its Magiſtracy is *Lutheran*. It is at preſent the Centre of all the Trade of *Sileſia*, has two Fairs yearly, at which vaſt Quantities of Merchandize are ſold to the *Poles* and *Hungarians*.

Sileſia contains 150 Cities and walled Towns, beſide Market-towns, and about 4000 Villages: It has a conſiderable Advantage in Trade, by having a Communication, by Water, with *Hamburg*; and its Manufactures of Linen and Thread are exported in great Quantities to *England* and *Holland*.

2. *Brieg* on the *Oder*, is one of the largeſt and ſtrongeſt Cities of *Sileſia*.

In it is an Abbey, a Jeſuits College, and a Convent; two *Lutheran* Churches, and their Gymnaſium: And here is manufactured good Woollen Cloth.

3. The like may be ſaid of *Strehlen*, which has diverſe good Woollen Manufactures, two *Lutheran* Churches, and a Convent.

4. *Schweidnitz*, the Capital of its own Principality, is a ſtrong Fortreſs, [however unaccountably ſurprized by the *Auſtrians*, in the Year 1761, though ſince retaken.] It has one Jeſuits Pariſh-Church, College, and Seminary; alſo another Popiſh Church, and four Convents; and one *Lutheran* Church without the Gates.

5. 6. *Landſhut* and *Reichenbach* are Towns having conſiderable Manufactures of Linen, Canvas, and Fuſtian.

7. *Javer*, the Capital of its Principality, has two *Romiſh* Churches, and one *Calviniſt* Church.

Hirchberg is one of the fineſt, moſt populous, and opulent Towns here, where every Year many Thouſand Pieces of Linen Veils, and other Linen Goods are whitened; it being next to *Breſlau*, the principal Place of Commerce in all *Sileſia*.

8. *Schmeidberg* is an open free Mine-Town, of conſiderable Trade, more eſpecially in the Iron-Manufactures; and alſo in Linen and Linen Damaſk, and in half and whole Silk-Damaſks.

9. *Lignitz*, the Capital of the Province of that Name, is one of the beſt Towns in *Sileſia*, has a Collegiate Church, (which, in 1698, was taken from the *Lutherans*, and given to the Jeſuits, who have alſo a College here.) Here are ſome *Romiſh* Churches and Convents; yet the *Lutherans* have ſtill two Churches. Here is a good Trade in Cloth and Madder.

10. *Goldberg* has one parochial *Lutheran* Church, and two *Romiſh* Convents. It had formerly a Gold Mine.

11. *Lubeh* has many Cloth-workers, and its Pariſh-Church and School are *Lutheran*. And the like may be ſaid of *Parchwitz*.

12. *Wolaw*, the chief Town of the Principality of the ſame Name, having one Popiſh Church and Convent, one *Lutheran* Pariſh-Church and School.

13. In *Steinau* is a *Lutheran* Pariſh-Church, and a Popiſh Chapel; therein are good Cloth Manufactures.

14. In the Principality of *Glogau* is *Great Glogau*, its Capital, [there being another of the Name in *Upper Sileſia*] has a Popiſh Abbey, another Church, a Jeſuits College, two Convents, a *Lutheran* Church and School, and a *Calviniſt* Church, for the Uſe of the Court, conſecrated *Anno* 1751.

15. *Grunberg* and *Schwibus* have good Woollen Cloth Manufactures, with each a *Romiſh* and a *Lutheran* Church.

16. *Neyſze*, a very ſtrong Town, the chief of a Principality of the ſame Name, and on a River of that Name, has a Popiſh Collegiate Church, and one other Church, an Abbey, a Jeſuits College, and five Convents.

17. *Ziegenhals* is remarkable only for its Manufactures of beautiful Glaſſes.

18. The Principality of *Oels* has *Oels* its chief Town, containing two *Lutheran* Churches, and one Popiſh Church.

The Principality of *Sagan* has,

19. *Sagan*, its chief Town, contains a Palace, an Abbey, a Convent, a Jeſuits College; alſo a *Lutheran* Church and School, for which Privilege, (ſays Dr. *Buſching*) the *Lutherans* advanced to the Emperor a Loan of 50,000 Florins, beſide a Donation of 10,000 more. [Of this Kind of Indulgences to the *Lutherans* in *Sileſia*, by the *Auſtrian* Family, for pecuniary Conſiderations, there are ſundry other Inſtances, by Dr. *Buſching*; but we give this one Inſtance, to diſplay the Spirit of ſo jeſuited a Family, regardleſs of the moſt ſolemn Stipulations made in Behalf of their Proteſtant Subjects.] Here are ſeveral Iron Mills, and one Copper Mill.

The Principality of *Munſterberg* produces all Sorts of Grain, Flax, Hemp, Hops, and good Cattle.

20. *Munſterberg*, its chief Town, has two *Romiſh* Churches, a *Lutheran* Oratory, and one of *Bohemian Calviniſts*. The Culture of Hops is its chief Employment.

21. In the Principalities of *Trachenberg* and *Carolaith*, and the Lordſhip of *Wartenberg*, there is nothing properly relative to our main Subject; only in the laſt-mentioned Lordſhip we find there were formerly thirteen *Lutheran* Churches, of all which they were deprived in the Year 1654.

The Principality of *Oppeln*, though the largeſt, is, ſeemingly, the pooreſt Principality; the greateſt Part of its People are *Poles*, and the reſt are *Germans* or their Deſcendents.

Oppeln, on the *Oder*, though its chief Town, yet little elſe can be ſaid of it, but that it is a decayed Place, occaſioned by various Calamities, more eſpecially by Fires, which is alſo the Caſe of many other Towns in *Sileſia*, their Houſes being moſtly Timber. Yet here is a Collegiate Abbey, a Pariſh-Church, a Jeſuits College, and two Convents.

The ſmall Principality of *Ratibor* produces all Sorts of Grain and Fruits.

Ratibor, its Capital, lies on the *Oder*, has two Churches and four Convents; yet nothing reſpecting Manufactures or Commerce can be ſaid of this Place.

The Principalities of *Troppau* and *Jagerndorf* are fertile Countries, lying contiguous to and once belonging to *Bohemia* or *Moravia*; they are partly ſubject to the King of *Pruſſia*, and partly to *Auſtria*.

1. *Troppau*, a Town on the River *Oppa*, is eſteemed the Capital of *Upper Sileſia*; it has three Parochial Churches, a Jeſuits College, and four or five Convents. It was moſtly deſtroyed by Fire, *Anno* 1758, according to Dr. *Buſching*.

2. *Jagerndorf*, a Town likewiſe on the *Oppa*, has two Churches and one Convent.

The Principality of *Teſchen* borders on *Moravia*, *Poland*, and *Hungary*.

Teſchen, its fortified Capital, ſtands on the River *Elſa*, in a very fertile Soil, has two Popiſh Churches and a College of *Jeſuits*. In its Suburbs is a *Lutheran* Church, wherein divine Service is performed both in the *German* and *Poliſh* Languages; and alſo a *Lutheran* School; [both which coſt the *Lutherans* a Donation of 10,000 Florins to the Emperor.]

☞ In this Principality ſtands a ſtrong Fort for the Defence of the famous Paſs of *Jablounka*, at the very Entrance into the Kingdom of *Hungary*.

Glatz. The Sovereign County of *Glatz* lies between *Sileſia*, *Bohemia*, and *Moravia*, ſurrounded with rugged Mountains, though in itſelf a fine Country, having Plenty of Corn, Pit-coal, Quarries of Stone and Marble, Jaſper, Topazes, and Cornelian, with Mines of Silver and Copper. Its Manufactures are conſiderable in Thread and Linen.

1. *Glatz*, its capital Town, is very ſtrong, ſituated on the River *Neyſz*; its Pariſh-Church is poſſeſſed by the *Jeſuits*, who alſo have a College and Seminary; there is another Church and Convent in its Suburbs.

2. *Reiners*, a ſmall open Town, noted for good Cloth and Pluſh, and Paper-making. The laſt (ſays Doctor *Buſching*) by no means inferior to that of *Holland*.

3. *Wunſchelburg*, a fortified Town, having divers Woollen and Linen Manufactures.

4. *Newrode* has Manufactures of Cloth and Stuffs.

Circle of *Auſtria.*

The Circle of AUSTRIA

Abounds in Corn, Cattle, Horſes, Saffron, and, toward the Frontiers of *Hungary*, an excellent Sort of Wine; it has alſo a rich Silver Mine, firſt begun to be worked ſo lately as the Year 1754.

Vienna. *Vienna* is the magnificent and ſtrongly-fortified Metropolis of both *Upper* and *Lower Auſtria*. It has a noble Univerſity. Here the rich and fine Manufactures have, of late Years, been much improved and increaſed: Particularly thoſe of Silk, Gold, and Silver Lace, Woollen and Linen Cloths, Stuffs, and Stockings; Mirrors, and other Plate Glaſs, Manufactures of Braſs and Porcelain, *&c.* And the Importation of foreign Manufactures is almoſt totally prohibited. *Vienna* (according to Doctor *Buſching*) conſtantly increaſes in its Commerce; and, *Anno* 1704, a Bank for Exchanges and Loans was erected, which, in 1706, was *wiſely* put under the Management of her own Magiſtrates: And the Court of Commerce here was, in the Year 1753, declared to be a peculiar *Aulic* Tribunal. It is not our Province nor Intention to give a particular Deſcription of ſo vaſt a City, wherein (according to *Buſching*) its numerous Churches and extenſive Cloyſters, with their Gardens and Walks, occupy almoſt a ſixth Part of the whole City. It has fifteen Squares, very many fine Palaces, and various Academies for all the fine Arts. Its Suburbs are very much larger than the Town itſelf; they have a Citadel, and are, in ſome Meaſure, fortified, and contain many Palaces, Churches, Cloyſters, Gardens, *&c.* Here are two imperial Palaces; and the many high Colleges, Boards and Judicatories here, do not a little enhance its Credit and Splendor. Here are ſundry large and particular Libraries, and the Vaſtneſs of the imperial Library exceeds both the *Vatican* and royal *French* Libraries. Theatres, Cabinets of Rarities, Arſenals, and in ſhort, every other Requiſite to conſtitute a *great City*, are here to be found.

Vienna's principal Exports are Wine, Saffron, Gunpowder and Alum: It lies on a Branch of the *Danube*; the Suburbs are much larger than the ancient City; and both together may contain about 180,000 to 200,000 Inhabitants, according to Doctor *Buſching*: Amongſt whom are all Kinds of Artiſts and Manufacturers: So that the principal Commerce of *Auſtria* does in a Manner ſolely center at *Vienna*. In peaceable Times, here may be ſeen *Turks*, *Tartars*, *Greeks*, *Hungarians*, *Spaniards*, *Italians*, *French*, *Polanders*, &c. all in their ſeveral Habits. Yet the Trade of *Vienna* (ſays the ingenious Mr. *Keyſler*, in his Travels, *Anno* 1731) is little anſwerable to its Largeneſs and its convenient Situation; partly owing to heavy Duties and Impoſts.

Lints. 2. *Lints*, [or *Linz*] in *Upper Auſtria*, on the *Danube*, is its capital Town, and is well-built and populous; it has two Churches and ſix Convents; has ſome conſiderable Trade, and ſome Woollen and Silk Manufactures, and ſeveral conſiderable Fairs.

In theſe Parts are many ſmall fortified Towns, and very many Burghs or Market Towns, of which we can ſay very little in reſpect to our main Subject.

Stiria Dutchy. The Dutchy of *Stiria* lies to the South of *Auſtria*, and, though very mountainous, abounds in Corn, Wine, Salt, and Cattle, as well as in the beſt of Iron and the fineſt of Steel, with Copper, Lead, and ſome Silver.

Gratz. *Gratz*, its Capital, is a large fortified Town, having a conſiderable Number of Churches, Chapels, and Convents: But of its Commerce or its Manufactures, or of that of any other Place in this Dutchy, there is very little to be ſaid.

The Dutchy of *Carinthia* lies Weſt of *Stiria*, is very woody and mountainous, and its Productions nearly the ſame as in *Stiria*.

Clagenfurt is its principal Town, is well-built, has ſix Churches, and ſeveral Monaſteries; but we know as little of its Commerce and Manufactures as of the before-named City of *Gratz*.

Carniola Dutchy.

The Dutchy of *Carniola* lies South of *Carinthia* and *Stiria*, and, although extremely mountainous, abounds in fine Fruits, and exports excellent Wines, Grain, Iron, ſome Copper, and Lead, Timber for Ship-building, Linen, Oil of Olives, Quickſilver, and coarſe Woollen Stuffs.

Labach, (or *Laybach*) its chief Town, has a Cathedral and ſeveral Churches and Convents, with ſome Trade, as not being far from the Gulph of *Trieſte* on the *Adriatic* Sea.

Trieſte is a Town on the *Adriatic* Sea: The preſent Empreſs-Queen, *Maria-Thereſia*, has fortified it, and beſtowed on it ſundry Immunities, even ſo far as to be, in *ſome* Reſpects, a free Port; ſo that many Ships reſort to it with Merchandize, and re-lade the Merchandize of the neighbouring Countries. It has a Cathedral, and ſeveral Churches and Convents.

Fiume, (otherwiſe called *St. Veit*) on a Bay of the *Adriatic* Sea, is populous, has a collegiate Church, and ſeveral Convents, a College of *Jeſuits*, (as we may be certain to find in every tolerable Town belonging to the Houſe of *Auſtria*.) From hence (ſays Doctor *Buſching*) large Quantities of Merchandize are exported, which are brought from *Hungary*, &c. for which End the Emperor *Charles* VI. repaired the Roads leading to it.

This Dutchy of *Carniola* abounds with many ſtrange Caves, Caverns, Lakes, &c. of very extraordinary Kinds, and ſurprizing Qualities; but theſe are foreign to our main Purpoſe.

The adjoining County of *Goritia* (or *Gorz*) produces much *Raw-Silk*, Corn, and good Wine.

Goritia, its chief Town, has ſeven Convent-churches, nine Chapels, and a *Jeſuits'* College.

The *Anterior Auſtria* contains,

I. The County of *Tirol*, which, though very mountainous, which (like the *Alpes*) has the Summits of thoſe Mountains conſtantly covered with Snow, yet is nevertheleſs very fertile, and abounds in rich Mines.——All the fine Fruits and Wines of *Italy* grow here; alſo much Flax and Silk; here alſo are various precious Stones, Salt-pits, Mines of Silver, Copper, Lead, Alum, and Vitriol.

1. *Inſpruck*, on the River *Inn*, its Capital, is a large City, containing many fine Churches, Convents, and Palaces, a *Jeſuits'* College, and an Arſenal. This Place has a very gainful Trade in *Salt*.

2. *Bolzano* is a large, though open Town, famous for its four annual Fairs, much frequented by Merchants from *Germany* and *Italy*. In *Tirol* are ſundry leſſer Towns and Burghs, ſome of which drive a good Trade in Silk, &c.

3. The Biſhopric of *Trent* lies within the ſaid great County of *Tirol*, and is ſubject to *Auſtria*. The City of *Trent* lies on the River *Etſch*, bordering on the *Venetian* Territories: It is an old-built City, having a Cathedral, three Pariſh-churches, a fine *Jeſuits* College, and two Convents; but is not eminent in a commercial Senſe. And the like may be ſaid of the neighbouring Biſhopric and City of *Brixen*.

The County of *Bregents* (or *Bregentz*) has a capital Town of the ſame Name, ſtanding on the *Boden Sea*, or *Lake of Conſtance*; it is chiefly noted for good Iron-works, and for much Timber felled in its Woods, and exported to *Switzerland* and *Swabia*.

Auſtrian Territories in *Swabia*.

The *Auſtrian* Territories in *Swabia* are, in many Places, interſected by other Territories.

Conſtance.

Conſtance, [*Coſtanz*, or *Coſtnitz*, as Doctor *Buſching* variouſly writes it] an ancient City on the South-weſt Shore of the Lake of that Name, otherwiſe called the *Boden Sea*, near where the River *Rhine* iſſues out of that Lake, after paſſing through it. Its People are ſaid to be moſtly Proteſtants, although there be in it a Popiſh Cathedral, a College of *Jeſuits*, and three Convents.

In *Auſtrian Briſgau*, ſtand the once-ſtrong Fortreſſes of *Friburg* and *Old Briſac*; both which Towns are now of ſmall Significance, as being diſmantled. Here are many other detached Towns and Burghs, belonging to the Houſe of *Auſtria*, but not ſignificant enough to be particularly ſpecified.

The Circle of *Burgundy*, or the *Auſtrian Netherlands*.

The Xth and laſt *Circle* of the *German* Empire is ſtiled the *Circle of Burgundy*; but as the greateſt Part of it has been raviſhed from that Empire, at different Times, it is now become little more than a mere Name. It contained, 1ſt, The Dutchy and County of *Burgundy*; 2dly, The Dutchy of *Lorrain*; 3dly, The XVII Provinces of the *Netherlands*; 4thly, The Electorate of *Treves*; 5thly, The Biſhopric of *Liege*; and, 6thly, The Dutchies of *Juliers* and *Berg*. The firſt and ſecond are poſſeſſed by *France*, as alſo a conſiderable Part of the third. Of the ſaid third, the Republic of the *Belgic* Provinces have got ſeven intire Provinces, and ſome Parts of four more, (*viz.* of *Flanders*, *Brabant*, *Limburg*, and of the upper Quarter of *Gelderland*.) The fourth has partly been curtailed by *France*, and the reſt is annexed to the Circle of the *Lower Rhine*. The Biſhopric of *Liege*, from the fifth, is annexed to the Circle of *Weſtphalia*; though commonly reckoned in the *Netherlands*: And the ſixth is alſo annexed to the Circle of *Weſtphalia*. So all that properly remains of this Xth Circle is only ſuch Part of the ten Provinces of the *Netherlands* as now remains under the Subjection of *Auſtria*, and which we are next to deſcribe, *viz.*

1. The

Auſtrian Flanders. 1. The *Auſtrian* Part of *Flanders*. Its Soil is particularly fertile, and is proper for Agriculture, Flax, and Paſturage for the breeding of Cattle, Horſes and Sheep, and for the fineſt Butter and Cheeſe. It has alſo Plenty of Sea and River Fiſh, Fruits and Garden-ſtuff. This Province is finely cultivated to the very utmoſt Degree of Perfection, and is extremely populous; containing ſixty-two walled and open Towns, and many hundreds of Villages. It is well known that this Province was the earlieſt of any Country, without the *Mediterranean*, which fell into the Manufacture of both Woollen and Linen Cloth, which they held and increaſed for ſeveral Centuries, until other Nations have gradually almoſt beat them out of both the one and the other.

Their principal Cities and Towns, are,

Gaunt. 1. *Gaunt*, (or *Ghent*) on the River *Scheld*, the Capital of this Province. It is ſtill a very large City, with a ſtrong Citadel, though much declined from its ancient Opulence and Splendor; has thirteen Market-places, a grand Cathedral, a Collegiate and ſix Pariſh-churches, two Abbeys, two *Jeſuits* Colleges, ſeven Monaſteries, and twenty-two Nunneries, beſide many Chapels and Hoſpitals. It has ſtill a conſiderable Linen Manufacture, called *Ghentings*, with others of Woollen Cloth and Stuffs, as alſo of Silk. It is happily ſituated by means of its many navigable Canals, as well as Rivers, for a Trade for Corn, *&c.* by its Communication with other Towns and with the Ocean. Its Walls are ten Miles in Circuit, has many fine Streets and Buildings, although there be many void Spaces within its Walls.

Courtray. 2. *Courtray* (or *Cortryck*) contains one Pariſh-Church, a *Jeſuits* College, eight Convents, and ſome Hoſpitals. It is famous for its fine Linen Manufactures. And Mr. *Nugent* thinks, that here they make the fineſt Table-Linen of any Place in *Europe*.

Dendermond. 3. *Dendermond* has two Pariſh-Churches, and ſix Convents: Its Neighbourhood yields Plenty of Grain, Hemp and Flax.

Bruges. 4. *Bruges* is a large, ſtrong, and well-built (almoſt round) City: It was formerly of great Renown for Commerce almoſt beyond any other in *Europe*, tho' now much decayed. It has ſo many well-contrived Canals as enables it to hold a Communication with *Gaunt*, *Oſtend*, and *Sluyce*, and conſequently with the Sea, from which it is but three Leagues diſtant. Here is a Cathedral, two collegiate and five Pariſh-Churches, many Chapels, a *Jeſuits* College, thirty-one Convents, and ſundry charitable Foundations; and it has ſtill ſeveral good Manufactures of fine Woollen Stuffs, Tapeſtry, Fuſtians, worked Cottons, Linen and Lace; having ſixty-eight Companies of Artificers, each having a ſeparate Hall. *Sluyce* was its ancient Harbour until it fell into the Hands of the *Dutch*, when the *Brugians* digged another Canal, from *Oſtend*, of ſeven Miles in Length, up to the City, navigable for Ships of 200 Tons Burden. It ſtill continues to have a Trade in *Spaniſh* Wool, *&c.* and has in it many noble Structures.

Ypres. 5. *Ypres* is a ſtrong and famous City, having a Cathedral, five Pariſh-Churches, a *Jeſuits* College, fourteen Convents, and ſundry charitable Foundations. Its Woollen Manufactory, which (like the reſt of *Flanders*) was much celebrated of old, is now much decayed; but its Manufacture of *Table Linen* is ſtill conſiderable; and it is probable, that the Sort of *Table Linen* which in *England* is called *Diaper* was originally ſo named from this City; [as much as to ſay *Toil d'Ypres.*] At its annual Fair in *Lent* much Silks and Says are vended. *Ypres* is one of thoſe three called in Records, the three good Towns of *Flanders*; *Ghent* and *Bruges* being the other two.

Popperingen. 6. *Popperingen* is a Burgh, containing three Churches and as many Convents; has ſome Woollen and much Linen and Tapeſtry Manufactures, having ſtill a Woollen-Cloth-hall and a Bay-hall.

Tournay. 7. *Tournay* is a large, ſtrong and elegant City, containing ſeventeen Pariſh-Churches, many Convents and charitable Foundations. Its Manufactures are Tapeſtry Bed-curtains, Coverlits, and other worked Stuffs.

Oſtend. 8. *Oſtend* is a ſmall but ſtrong Sea-port, at the Mouth of the River *Guele*, chiefly memorable for its Harbour's Conveniency, in reſpect of Packet-boats and other Veſſels correſponding with the *Auſtrian Netherlands*.

Nieuport. 9. *Nieuport*, a Sea-port with no very good Harbour, and therefore principally inhabited by Fiſhermen.

☞ The other Towns of this and the other *Netherland* Provinces, under the Dominion of *France*, ſhall be deſcribed with that Kingdom.

Auſtrian Hainault.

AUSTRIAN HAINAULT, *viz.*

The Province of *Hainault* [called in *Dutch Hennegau*] has Plenty of Corn, Cattle, Sheep, Wool, Pit-coal, Timber, Iron, Marble, *&c.* It contains twenty-four Towns, and ſome hundreds of Villages. What *France*'s former and later Conqueſts have ſtill left to the Houſe of *Auſtria*, are,

Mons. 1. *Mons* [in *Dutch* named *Bergen*] is the largeſt, faireſt, and principal Town of the whole Province, containing 4,600 Houſes, 6 Pariſh-Churches, a *Jeſuits* College, and ſeveral Convents. It is a Place of good Trade in Woollen Stuffs and other Merchandize.

Aeth. 2. *Aeth* is a ſtrong little Town, having ſome good Linen Manufactures.

3. *Leſſines*, a ſmall Town, where much Linen is made.

4. *Enghien* is a ſmall Place, with a Tapeſtry Manufacture. Beſide, here are ſome other inconſiderable Places.

Namur Province.

The Province of *Namur* is intirely *Auſtrian*. It is very mountainous and woody; its principal Riches conſiſt in Iron and Steel; tho' here are alſo Lead, Pit-coal, Marble; and all Sorts of Grain in its flatter Parts.

Charleroy.

1. *Charleroy*, though intended merely for a Fortreſs, has, nevertheleſs, Numbers of Iron melting-houſes for Mills, Forges for Cannon, and other Iron Manufactures: So that Mr. *Nugent* thinks it reſembles *Birmingham* in *England*.

Namur.

Namur is a very ſtrong City, with a ſtronger Citadel. It ſtands on the River *Meuſe*, (or *Maeſe*) has a Cathedral, ſix Pariſh-Churches, a *Jeſuits* College, and thirteen Convents; and, being principally deſigned for a Fortreſs, we can ſay nothing particular concerning its Trade or Commerce.

AUSTRIAN BRABANT.

Auſtrian Brabant.

The greateſt *natural* Wealth of this Province conſiſts in *Flax*. It has nineteen walled Towns, and many Burghs and Villages.

Louvain.

1. *Louvain*, on the River *Dyle*, is, in point of Precedence, the firſt City of *Brabant*, once very opulent and very large. Its noble Manufactures of Woollen and Linen, in the former Part of the 14th Century, maintained upwards of 150,000 Workmen, though probably not all within its Walls; until, in the Year 1380, (or according to others 1382) the Cloth-weavers making an Inſurrection there, for which many of them were puniſhed, the reſt withdrew into *England* and other Parts, and thereby loſt that great Trade. It is eaſy to imagine the preſent ſad Condition of a great City thus permanently deprived of ſuch vaſt Manufactures, and therewith of its Wealth and People; ſo as now to be but the mere Shadow of what it once was. It is, however, a walled City of ſix Miles Circumference; but within the Walls there are Hills, Meadows, Vineyards, and Gardens. Here are, however, ſome few Manufactures both of Woollen and Linen, beſide their Beer, of which they vend much all over the Country. *Louvain* alſo has long had a very noble Univerſity, containing many Colleges, [*Morery* reckons them but 20; *Buſching* ſays 41; and *Nugent* 60 Colleges.] Here alſo are 30 Convents. Mr. *Nugent* relates, that it has nine Markets in it, fourteen Water-mills, and has ſtill 126 Streets; yet he adds, that, although nine Miles in Compaſs, there is ſcarce a third Part of it filled up with Houſes.

Bruſſels.

2. *Bruſſels* is the ſecond City in Rank: And, being the Seat of Government for all the *Auſtrian* Provinces, it has long been a large, beautiful, and populous City, with many fine and magnificent public and private Edifices; has nine Pariſh-Churches, and thirty-four Convents, including the *Jeſuits* College. It is ſtill eminent for its Manufactures of fine Camblets, Lace, and Tapeſtry; and by its Canals into the River *Scheld*, it has a conſiderable Commerce with other Parts. According to Mr. *Nugent*, here is an Office for lending Money on Pledges, at moderate Intereſt; alſo a Foundling-hoſpital, and a Convent for the Reception of *penitent Courtezans*.

Antwerp.

3. *Antwerp*, on the *Scheld*, is the third in Rank, containing ſtill many magnificent Edifices, both public and private.

From *Louis Guicciardin*'s Deſcription of it, in the 16th Century, we have, under the Year 1585, given a View of it when in its Meridian Glory. At preſent it has 22 Squares, above 200 Street, a fine Cathedral, four Collegiate and four Pariſh-Churches, four Abbeys, and a *Jeſuits* College, ten Monaſteries, and nineteen Nunneries, a ſtately Stadt-houſe, and a Merchants Exchange, which was the firſt Structure of that Kind in all *Europe*, upon the Model of which thoſe of *London* and *Amſterdam* were built. For above the Space of an intire Century it was one of the moſt trading Cities that ever exiſted. It is true, *Guicciardin*, in the Height of its Glory, does not make it much exceed 100,000 ſettled Inhabitants; but Doctor *Buſching*, in his *New Geography*, relates, that, about the Middle of the 16th Century, there were in it computed upwards of 200,000 Inhabitants and Strangers. We have ſeen how much it ſuffered in the Year 1576, and its miſerable Ruin, *Anno* 1585. By the Treaty of *Munſter*, *Anno* 1648, between *Spain* and *Holland*, it was ſtipulated, that no large Ship ſhould be permitted to ſail up to this unfortunate City.——Nevertheleſs, *Antwerp*'s modern Tapeſtry and Lace-manufactures are ſtill very fine; and they have an Inſurance Company: And ſoon after the great Loſs of their Commerce, the *Antwerpians* began to turn their Thoughts to *Banking* and *Exchanges*; as well as to *Jewelling* and *Painting*; in all which they excel, even in our own Times.

Mechlin.

The City of *Mechlin*, [denominated *the Fair*] on the River *Dyle*, running into the *Scheld*, is a well-built Place, with broad and clean Streets, an archiepiſcopal Cathedral, ſix Pariſh-Churches, twenty-two Convents, and a *Jeſuits* College. It is eminently celebrated for its Manufactures of the fineſt Lace, alſo for Linen, tanning of Leather, Corn, Blankets, Thread, Founderies for Bells and Cannon.

Auſtrian Limburg.

In the Dutchy and Province of *Limburg*, *Limburg*, its chief Town, is all that is left to the *Auſtrians*, and is a Place of little or no commercial Significancy. The reſt of this Province, as *Valkenburg*, *Rolduc*, and *Dalem*, are to be found under the Deſcription of the *United Netherlands*.

Auſtrian Luxemburg.

Auſtrian Luxemburg (or *Lutzelburg*) has good Corn, Cattle, *Moſelle* Wine, many Iron-works, and Founderies for Cannon. *Luxemburg*, its Capital, is a very ſtrong, though ſmall Place, having been much contended for between the two great Houſes of *Auſtria* and *Bourbon*. It has a *Jeſuits* College, and ſome Convents, but is not a commercial Place. Here are many ſmall Towns and Villages, but they are too near the Frontiers of *France* to enjoy any Thing conſiderable like Commerce or Manufactures, as having been ſo often ravaged by ſo reſtleſs a Nation.

Ruremond.

Auſtrian Guelderland contains the ſtrong Town of *Roermund*, or *Ruremond*, on the River *Roer*, which here runs into the *Maeſe*. It is the largeſt Place in this Dutchy; but as it has ſo frequently been beſieged and taken, it is of no Note in Commerce. In this Country are alſo ſundry Villages. The ſtrong Town of *Gueldres*, and ſome leſſer Towns and Villages, in what is called the upper Quarter of *Guelderland*, belong to the King of *Pruſſia*, but are not memorable in a commercial Conſideration.

And this is all that is left of what may *now* be properly called the Circle of *Burgundy*.

Reaſons why *Germany* has, in this Appendix, been more enlarged on than other Countries.

☞ Two very obvious Reaſons have naturally led us to be more copious on the *German* Empire than on any other Country of *Europe*, *viz.* Firſt, The great Number of independent States and of free Imperial Cities with their Diſtricts; each of which have generally (more or leſs) required a diſtinct Conſideration, as well in a political as in a commercial Senſe.

Secondly, The vaſt Improvements, within the Compaſs of one Century paſt, in Manufactures, manual Arts, Agriculture, and Water-carriage, for the Conveniency of Commerce; principally effected in the more Northern Circles, and eſpecially in thoſe of *Upper* and *Lower Saxony*, in a very great Degree occaſioned by the Acceſſion of ſo great a Number of ſober, uſeful, ingenious and induſtrious Foreigners, which required a more particular Animadverſion; whereas in all, or moſt of the other ſingle States and Monarchies of *Europe*, there is a Kind of Identity or Sameneſs to be found in moſt of the above Particulars, as well as in their Religious and Civil Œconomy; which Countries therefore do not require ſo particular an Enlargement as *Germany* ſeemed abſolutely to demand.

The European Territories of the STATES-GENERAL *of the* UNITED NETHERLANDS.

Notwithſtanding all that may be ſaid of the low, moiſt, and marſhy Soil, and of the thick Air of the moſt Part of the ſeven United Provinces of the *Netherlands*, and of their Heaths and barren ſandy Downs, and that they in general are unable to afford ſufficient Suſtenance, and leaſt of all Corn, for their numerous Inhabitants; yet ſuch Diſadvantages may be ſaid to be well compenſated by their moſt extenſive foreign Commerce and Navigation, immenſe Fiſheries, rich Paſtures ſupplying vaſt Quantities of excellent Butter and Cheeſe, of which great Quantities are exported; the Cheeſe, particularly of the *Texel* and *Edam*, being famous all over *Europe*. *Holland* has an infinite Number of good Sheep, bearing excellent Wool: In *Gelderland* grows Tobacco, *&c.* and *Zealand*, good Madder, and has Salt made from Sea-water; *Zutphen* alſo yields ſome Iron-Stone. They have moſt convenient Water-carriage beyond any other Country of *Europe*, and a happy Situation for an eaſy Communication with other Nations.

The Seven United Provinces, according to Doctor *Buſching*, contain 113 Cities and Towns, 1,400 Villages, and about two Millions of Inhabitants; beſide the 25 Towns, and the People in what is called the Lands of the *Generality*, or conquered Countries and Towns of other Parts of the *Netherlands*. The vaſt Populouſneſs of the United Provinces, and eſpecially of that of *Holland*, beyond any other Country in *Europe* of ſo ſmall an Extent, is principally owing to the very great Variety of their Manufactures, Fabrications, and other manual Improvements, as well as to the great Extent of their foreign Commerce, Navigation, and Fiſheries; whereby ſuch Numbers of People are employed and maintained at Home, in numberleſs Ways, ſuch as, their Pottery, Tobacco-pipes, Delft-ware, finely refined Salt; their Oil-mills, Starch-manufactures—their Improvements of the raw Linen-Thread of *Germany*—their Hemp and fine Paper-manufactures—their fine Linen and Table Damaſks—their Saw-mills for Timber for Shipping and Houſes, in immenſe Quantities—their great Sugar-baking—their vaſt Woollen, Cotton, and Silk Manufactures—Wax-bleaching—Leather-dreſſing;—the great Quantity of their Coin and Specie, aſſiſted by their Banks, moſt eſpecially by that of *Amſterdam*—their *Eaſt-India* Trade—and their general Induſtry and Frugality. Yet we doubt it cannot be denied, that, great as their Commerce, Manufactures, and Fiſheries are, they have, for ſome Time, been in a retrograde State; by ſome imputed to the too general Relaxation of their priſtine Frugality; though, by others, much more owing to the great Improvements made by other Nations, almoſt every-where, in their Commerce, Navigation, Manufactures, Fiſheries, *&c.*

The Province of *Holland*.

We ſhall begin with the moſt opulent Province of *Holland*, and with

The City of *Dort*.

1. *Dort*, (or *Dordrecht*) the firſt City, in point of Seniority or Precedency, of that Province.

This City was the ancient Place of Reſidence of the Earls of *Holland* and *Zealand*. Doctor *Buſching* relates, that in the Year 1732, it was computed to contain 3,954 Houſes and 18,000 Inhabitants. It has a moſt commodious Harbour and conſiderable Trade, eſpecially in Grain, *Rheniſh* and other Wines, in Timber brought rough down the *Rhine* in Summer, and here, at its many Mills, ſawed and prepared for various Uſes.

Harlem.

2. *Haarlem*, the ſecond Town (in point of Precedence) of this Province, enjoys a Communication with *Amſterdam* and *Leyden*, by means of two ſpacious Canals; and in the ſaid Year 1732, contained 7,963 Houſes and 50,000 Inhabitants. Its Manufactures of Woollen Cloth, Silk, and Linen, though ſtill conſiderable, are yet greatly declined from what they formerly were. It employs many People in the bleaching of their famous and fine Linens, Tapes and Thread.

Delft.

3. *Delft*, the third in Rank, is a fine Town, and in the ſaid Year 1732, contained 4,870 Houſes and 25,000 Inhabitants. This City is properly the Arſenal for the whole Province of *Holland*, having, for that End, four Powder-magazines. Its fine earthen Ware is famous all over *Europe*; and it was formerly noted for its Woollen Cloth and Beer.

Delfſhaven,

Delftſhaven, near it, is a large, flouriſhing Town on the *Maeſe*, with a good Harbour; at which lye the *Eaſt-India* Ships, Herring-buſſes, *&c.* belonging to the City of *Delft*.

Leyden.

4. *Leyden* is the fourth in Rank, and in Magnitude is the largeſt and fineſt of the Province, next after *Amſterdam*. It contained in the ſaid Year 1732, 10,891 Houſes, and, at only ſix Perſons to each Houſe, comprehends 65,346 Perſons, yet others make them 70,000. Doctor *Buſching* thinks its formerly celebrated Woollen Cloth Manufactures, which annually amounted to 100,000 Pieces of Cloths, Stuffs, and Camblets, are leſſening very much. Since the 12th. Century, *Leyden* has been four Times enlarged. Mr. *Nugent* reckons in it 180 Streets. Its famous Univerſity has ſometimes had 2,000 Students, though uſually not near ſo many. And its Orphan-hoſpital contains 900 Children.

Amſterdam.

5. *Amſterdam*, the fifth in Rank, is, beyond Compare, the firſt in Commerce, Opulence, and Magnitude, of all theſe Provinces. It is ſituated at the Influx of the little River *Amſtel*, running through it; and although, by Reaſon of the Shallowneſs of the *Pampus*, (the only Paſſage leading up to it out of the *Zuyder Zee)* it might be thought but indifferently ſituated for maritime Commerce, as Ships of Burden muſt be lightened in order to paſs through it, and muſt afterward wait for an eaſterly or north-eaſt Wind to go through the *Marſdiep* into the North-ſea; yet ſo far the Situation of *Amſterdam* is advantageous, that the other Towns of the Province can eaſily ſend their Merchandize thither, and receive Returns, and that, with a fair Wind, it is but a few Hours Paſſage to or from all the Ports of *North-Holland*, *Frieſland*, *Overyſſel*, and *Gelderland*. In the ſame Year 1732, its Houſes were numbered, and amounted to 32,685; and its Inhabitants (according to Doctor *Buſching)* were at moſt 200,000.---That from 1747 to 1752, (comprehending the Space of ſix Years) the Burials here were, at a Medium, 8,247 yearly. Now as in large and very populous Cities, it is generally computed that one out of thirty Perſons die annually, then, by multiplying 8,247, by 30, the Number of this City's Inhabitants will come out to be 247,410 Perſons, which comes much nearer the moſt uſual Computation of *Amſterdam*'s Inhabitants, *i. e.* about 250,000 or 260,000 Perſons. Yet others, as we have ſeen, compute them no higher than 241,000. The ſaid Author thinks it the greateſt trading City in *Europe*; though poſſibly, all Things conſidered, the City of *London* may merit the Preference, more eſpecially of later Times. To ſay that *Amſterdam* abounds in Merchants, Manufacturers, and Artificers, is ſaying no more than what the famous Aſtronomer, *Copernicus*, ſaid of it 250 Years ago, when it was much leſs conſiderable; “ That at *Amſterdam* all Men were employed in trading.” [*Ubi Nemo non Mercaturam exercet.*] In *Collier*'s Tranſlation and Additions to *Morery*'s hiſtorical Dictionary, this great City is juſtly celebrated for its vaſt Numbers of Ships and Seamen—its infinite Quantities of all Kinds of Merchandize whatever, from all Parts of the World—its fine Canals and Bridges, ſpacious and neat Streets, Piazzas and Churches—its infinite Magazines of naval Stores—its Docks and Wharfs, and its Store-houſes of all Kinds of Merchandize, worthy of the higheſt Admiration—her numerous Hoſpitals, and other charitable Foundations—her moſt famous *Bank*, thought to contain the greateſt Treaſure upon Earth, [of which we have treated at large under the Year 1609]—its moſt magnificent *Stadt-houſe*, which (according to Sir *William Temple)* is thought to have coſt in all about three Millions *Sterling*; and the Beauties and Architecture whereof have long ſince required, and have had an intire Volume fully to deſcribe them.

Gouda.

6. *Gouda*, (or *Tergow*) on the little River *Gouwe*, is the ſixth City in Rank. In the ſaid Year 1732, it contained 3,974 Houſes and 20,000 People. Moſt of the Veſſels employed in the Trade between *Holland*, *Zealand*, and the *Auſtrian Netherlands*, paſs through this Place, ſteering their Courſe from the *Gouwe* into the *Yſſel*, and through the latter into the *Merwe*. Thread, Cordage, and Tobacco-pipes, are its proper Manufactures.

Rotterdam.

7. *Rotterdam* is a large, opulent, and great commercial Port and City, ſecond to none in the Province, in this Reſpect, but to *Amſterdam:* It lies on the *Maeſe*, which here receives the *Rotter*. By the deep Canals which run up into the Heart of this City, Ships of great Burden lade and unlade at the Merchants Doors. It is, in a great Degree, a Staple for Wines from *France* and *Germany*; and it is alſo the Place of the greateſt Reſort of Shipping to and from *Great-Britain* of any Port of the *Netherlands*. Here are Refiners of Salt, and many Manufacturers in Glaſs. By means of the *Rhine* and *Maeſe*, this City alſo carries on a great inland Commerce into *Germany*, and to the north Parts of *France*. In 1732, its Houſes were computed to amount to 6,621, and its Inhabitants to 56,000.

Gorcum.

8. *Gorcum*, (on the *Merwe)* the 8th Town in Rank, contained in the ſaid Year, only 1,398 Houſes and 6,600 People. It is a fortified Town, and carries on a great Trade in Corn and Salmon.

Schiedam.

9. *Schiedam*, on the *Maeſe*, where the River *Schie* is by a Sluyce conveyed into it, contains 1,584 Houſes and 8,000 People; it has many Herring-buſſes, for the Benefit whereof its People are much employed in the making of Nets.

Schonhoven.

10. *Schonhoven*, on the River *Leck*, has but 2,500 Inhabitants. And,

The *Briel.*

11. *Briel*, (or *Brill)* on the Iſle of *Voorne*, near the Mouth of the *Maeſe*, has about 4,000 People. Theſe two are indeed but inconſiderable Towns, tho' they are both well fortified. And although theſe *eleven* Towns are all that, in *South-Holland*, are privileged to ſend Deputies to the Aſſembly of the States of the Province of *Holland*, yet therein there are other good, and ſome ſtrong Towns, which have not that Privilege.

The *Hague.*

1. The *Hague* is a large and beautiful Town, though without either Walls or Gates: In the ſaid Year 1732, it was found to contain 6,164 Houſes, many of which are finely built, beſide its public and national Edifices. It is a Place of much public Buſineſs and Splendor, where the Aſſemblies of the States-General, the States of *Holland*, the Councils of State and of War, and many other national Offices are kept, and where all foreign Ambaſſadors and Envoys uſually reſide. The *Hague* therefore being the Seat

Seat of Government, though no Sea-port, nor famed for any particular Manufacture, is a Place abounding in all Neceſſaries and Conveniencies whatever, and has a great Circulation of Money, being indeed the moſt magnificent open Town, or the moſt illuſtrious Village, in the known World, containing no fewer than 50,000 Inhabitants: Yet ſome compute 12,000 People fewer in Number.

Vlardingen.

2. *Vlardingen* is a large Town, ſituated on the *Maeſe*, from whence there ſail annually a greater Number of Herring-buſſes than from all the other Ports of the *Netherlands:* For in the Year 1753, the total Number of thoſe Buſſes, from all the United Provinces, were 173, of which 112 belonged to *Vlardingen.*

Maeſland-Sluyce.

3. *Maeſland-Sluyce* is a large Village, on a Branch of the *Maeſe*, whoſe Inhabitants are chiefly employed in the Herring and Whale Fiſheries.

The *South-Holland* Iſles.

The Iſles belonging to *South-Holland*, at or near the Mouth of the Rivers *Maeſe* and *Leck*, are *Yſſelmond*, *Voorn*, [on which ſtand the Ports of *Briel* and *Helvoetſluyce*] *Stryen*, *Flaaque*, and *Goerce*; none of which are conſiderable enough to require any particular Deſcription.

North-Holland.

North-Holland (otherwiſe called *Weſt-Frieſland)* is the much ſmaller Part of the Province, and contains the following principal Places, *viz.*

Alkmaar.

1. *Alkmaar*, the firſt in point of Rank, contained in the Year 1732, 2,581 Houſes and 15,000 People. It carries on a large Trade in Grain, fine Cheeſe and Butter.

Hoorne.

2. *Hoorne*, on the *Zuyder Sea*, has a convenient Harbour, and contained in 1732, 2,817 Houſes and about 12,000 Inhabitants. Here is an *Eaſt-India* Chamber, and an Admiralty-college, held here alternately with *Enkhuiſen* and *Medenblick*; it is alſo the Seat of the Mint. Here alſo are Ships of War as well as Merchant-ſhips built: It trades much in Butter and Cheeſe, and alſo they trade with *Denmark*, from whence they bring back lean Black Cattle to be fattened in their rich Paſtures.

Enkhuiſen.

3. *Enkhuiſen*, in 1732, contained 2,600 Houſes and 11,000 Inhabitants; it ſtands on the *Zuyder Sea*, and is well fortified. Here they build many Ships, and thence formerly they were wont to ſend out annually four or five hundred Herring-buſſes, [now, as we have juſt ſeen, more than all the Provinces together ſend out] at preſent only ſixty on that Fiſhery. Here is likewiſe an *Eaſt-India* and *Weſt-India* Chamber, a Cannon-foundery, and Salt-works.

Edam.

4. *Edam*, on the *Zuyder Sea*, has about 1,000 Houſes, and 4,000 People, was once famous for its Cheeſe. Its Ship-building and Timber Trade is conſiderable, and it has ſome Salt-works.

Monikendam.

5. *Monikendam*, on the ſame Sea, is a decayed Port, having about 700 Houſes and 2000 People; its Port is now choaked up with Sand.

Medenblik.

6. *Medenblik*, on that Sea, and of about the ſame Bigneſs, to Appearance; its principal Trade is in Timber from *Norway*. It contains about 2,500 People.

Purmerend.

7. *Purmerend* is the 7th and laſt of the voting Towns of *North-Holland*, having about 600 Houſes, and about 2,000 Inhabitants; its Trade being in Cheeſe and Cattle.

Beſide theſe, there is,

Sardam.

8. *Sardam*, a large and wealthy Town, on the *Zuyder Sea*, where many rich Merchants reſide, and deal largely in Timber, Grain, and Train Oil: Their Ship-building is very conſiderable, though not ſo vaſt as formerly, when it was ſaid to have been able to build as many Ships in a Year as there are Days in it. Beyond all, it is moſt remarkable for the vaſt Multitude and Variety of its Wind-mills;—as, Saw-mills—Oil-mills—Peaſe-mills----Colour-mills----Paper-mills----Fulling-mills----Snuff-mills----Coffee-mills—Muſtard-mills, *&c.*—ſo as to be really aſtoniſhing, if their Number be ſo many (according to Doctor *Buſching)* as 2,300. This Place too is alſo ſo conſiderable as to have in it Printers and Bookſellers.

Texel Iſle.

The Iſle of *Texel* is very near this Continent, and is fertile in Corn, and Sheep with good Wool. Here is a commodious Road for Shipping, the Rendezvous of all the *Eaſt-India* Ships from *Amſterdam*, *Hoorn*, and *Enkhuiſen*, being ſafe under the Cannon of a Fort, whilſt waiting for their laſt Orders, or for a fair Wind. The other Iſles of *Flieland*, *Schelling*, &c. are inconſiderable, and are all ſuppoſed to have been once joined to the main Land.

The Province of *Zealand.*

The Province of *Zealand* conſiſts intirely of Iſlands, formed by the Branches or Sea-ſtreams of the River *Scheld*, and were probably once joined to the Province of *Flanders*. They are very fertile in excellent Wheat, Fruits, fine Paſtures covered with fine Sheep. Here is Plenty of all Kinds of Proviſion and Fiſh, and are only wanting in Fuel, with which (eſpecially Turf) they are forced to be ſupplied from other Provinces, and with Coals from *England* in great Quantities. The whole Province contains 11 Towns and 110 Villages; and its People are eſteemed the moſt wealthy of all the *Netherlands*, owing to their happy and very convenient Situation for maritime Commerce.

The Iſle of *Walcheren* is the moſt populous of thoſe Iſles, and contains three good trading Towns, *viz.*

1. *Middelburg*, the Capital of the whole Province, is a large, fine, and ſtrong City, and a Place of great maritime Commerce and Shipping, with a conſiderable Share of the *Eaſt* and *Weſt-India* and other

Trades. It has, at its Harbour's Entrance, the Fort of *Rammekins*, (which was one of the three cautionary Places pawned to Queen *Elizabeth*) here are no fewer than twenty Churches, and many rich Merchants. It is the Staple for the Wines of *France*, *Spain*, and *Portugal*.

2. *Fluſhing* is a well fortified and extremely well ſituated Town for maritime Commerce, even beyond any other Town in the *Netherlands*, having two Harbours, the old one ſerving for Merchant-ſhips, the other is capable of admitting up to the Town a Fleet of 80 of the largeſt Ships of War, and here is a large Dock for Shipping.

3. *Veere* (called alſo *Kampveer*, *Campveer*, and *Ter Veere*) is ſmaller than *Fluſhing*; yet it enjoys a conſiderable Trade, more eſpecially with *Scotland*, which has many of its People reſiding here, with a Church and Miniſter for their Nation, paid by the States of *Zeeland*: Here is alſo a Conſul called the *Judge-Conſervator* of the *Scottiſh* mercantile Privileges in the *Netherlands*; which is (and for ſome Centuries paſt has been) an Office of Dignity, and is always appointed by the King of *Great-Britain*.

Neither Doctor *Buſching*, nor any other Author we have met with, has given us the Number of Houſes or Inhabitants in theſe *Zeeland* Cities: Nor indeed in many other Cities they pretend to deſcribe in ſundry other Parts of *Europe*.

In this Iſland are alſo many large Villages.

South-Beveland is the largeſt and pleaſanteſt of all the *Zeeland* Iſles: It has *Goes* (or *Tergoes*) a pretty good Town, with a conſiderable Trade; and alſo many Villages.

North-Beveland has only Villages on it.

Zirikzee.

Schouwen has the very ancient Town and Port of *Zirikſee*, formerly a Place of great Commerce, by its Fiſhery, Salt-mines, and foreign Trade: It has ſtill about 80 Ships of its own, trading to *Spain*, *Portugal*, &c. its principal Commodities conſiſting in Salt, Mead, and immenſe Quantities of Oyſters.

Duiveland has only Villages on it.

Ter-Tholen has on it a Town of the ſame Name, being the fourth and laſt of the four Towns of *Zeeland*.

The Province of *Utrecht* has the City of,

Utrecht.

1. *Utrecht*, for its Capital, in a healthful Situation, and is allowed to be a fine ancient City, ſituated on the Channel of the old *Rhine*. It is ſtrong and large, has many fine Churches, and a noble Univerſity. Its Market-place or Piazza is very fair, and is the Center of ſeveral long Streets, inhabited by many Perſons of Rank and Quality. Here is a good inland Trade, and a Manufacture for Silk-throwing.

Amersfort.

2. *Amersfort* ſtands on a navigable River falling into the *Zuyder Sea*, and is the next beſt Town of this Province, carries on a naval Communication with *Amſterdam*, in *German* Merchandize, brought to it by Land-carriage. Here are ſome newly-eſtabliſhed Manufactures of Dimity and Bombazin. In this Province is produced much Tobacco.

The Province of *Frieſland.*

The Province of *Frieſland* reſembles *Holland* in its many Canals, (having undoubtedly been originally conjoined to it, before the Irruption of the Ocean into the Place now termed the *Zuyder Sea*) and in the Fertility of its Soil. It has a greater Proportion than *Holland* of good Wheat and Pulſe, breeds large and excellent Horſes, of which great Numbers are exported to *Germany* and other Parts. It has 11 Towns and 336 Villages, and is noted for its various Woollen Stuffs, and much more ſo for its Linen, the fineſt in *Europe*, ſome of which (according to Doctor *Buſching*) has been ſold at 12 *Dutch* Guilders [or about 20 Shillings, *Sterling*] *per* Ell. Its principal Town and Seat of the Government, is,

Leeuwarden.

1. *Leeuwarden*, three Miles in Compaſs, having, by its many Canals and Streams, a conſiderable Commerce with *Holland*, *Embden*, *Bremen*, and *Hamburgh*, although it has no Harbour.

Harlingen.

2. *Harlingen*, a Sea-port, is its next beſt Town; here is the Admiralty-College for this Province; and it makes great Quantities of Salt.

Franeker.

3. *Franeker* is a handſome Town and an Univerſity, though in Point of Commerce it is inconſiderable, as are all the other Towns and Villages, as alſo the two Iſles on its Coaſt.

The Province of *Groeningen.*

The adjoining Province of *Groeningen* very much reſembles *Frieſland*, in its Soil, low Situation, and its many Canals and Dykes. It has three Towns and 165 Villages.

Groeningen.

Groeningen, its Capital, is the Seat of Government, ſtands on the River *Hunſe*, which brings large Ships up to it. It has a good Trade, is large, wealthy, and well inhabited, and has alſo an Univerſity. By means of its Canals, the *Dollert* Sea, and the neighbouring River *Ems*, it has a conſiderable Commerce. It has three Churches, twenty-ſeven ſpacious Streets, and was formerly a *Hanſe-Town*.

Drenthe.

The Country of *Drenthe*, ſouth of and adjoining to this Province, though it has no Right to have any Repreſentatives to the States General, yet is under their Protection. It is merely an inland and a marſhy Country.

Aſſen, its chief Town, is well built; and *Coevorden* is a very ſtrong Place, in the Middle of a Moraſs, near the Frontier of *Germany*.

The Province of *Overyſſel*.

The Province of *Overyſſel* has 16 Towns and but 80 Villages; for, being more barren, it is not ſo well inhabited nor cultivated as moſt of the other Provinces. Here are three of its Towns that ſend Repreſentatives to the Aſſembly of the States-General, *viz.*

Deventer.

1. *Deventer*, on the *Yſſel*, is a ſtrong Town, having four Churches; it is populous, though not very large, is the Seat of Government, and has a very good Trade: Its Beer is ſo very good, that a great deal of it is exported. Here is an Iron-foundery. It was of old a *Hanſe-Town*.

Zwolle.

2. *Zwolle* is the fineſt and richeſt Town in the Province, has a naval Communication and Trade down the *Yſſel* into the *Zuyder Sea*, and is a very ſtrong Place. Its chief Trade is in Timber. It was anciently a *Hanſe-Town*.

Campen.

3. *Kampen*, (or *Campen*) near the Mouth of the *Yſſel*, is ſmaller than the other two Towns; and, although it has ſtill ſome Trade, yet its Harbour on the *Zuyder Sea* is much choaked up, ſo that it is now a decaying Town, though anciently it had a conſiderable Trade, and was a Confederate of the *Hanſeatic* League.

The other Places are inconſiderable.

The Province of *Dutch Gelderland*.

The Province of *Dutch Gelderland*, including its Appurtenance the County of *Zutphen*, has the beſt Air of any of the Seven United Provinces, and its Soil is moſtly good. Its principal Towns are,

Nimmegen.

1. *Nimmegen*, a ſtrong Fortreſs on the River *Waal*, being the utmoſt eaſtern Boundary of the *Netherlands*. It contains two *Dutch* Churches and one *French Calviniſt* one, one *Lutheran* Church, five Popiſh Churches, and ſundry Hoſpitals. It was formerly a *Hanſe-Town*, and an Imperial City. It is the Seat of Government, has a Canal to *Arnheim*, and has a good Trade to ſome Parts of *Germany*; it alſo trades in fine Beer-brewing, fattening of Cattle, and exporting of its fine Butter into all the other Provinces.

2, 3. *Bommel* and *Tiel* lye both on the *Waal*, but are both decayed and inconſiderable Places.

Zutphen.

4. *Zutphen* is a large and ſtrong Town on both Sides the *Yſſel*; it was of old a *Hanſe-Town*, and had a great Trade, ſince ſomewhat decayed. It now contains five Proteſtant Churches and one Popiſh Church, a Gymnaſium or great School, ſeveral Hoſpitals and other charitable Foundations and public Edifices.

5. *Arnheim* is a ſtrong Town on the *Rhine*, containing three *Dutch Calviniſt* Churches, and one *Lutheran* Church; but in reſpect of Commerce, it is much decayed from what it once was.

6. *Harderwyk*, a Port Town on the *Zuyder Sea*, and an Univerſity. This is alſo a decayed Town, yet ſtill carries on a conſiderable Trade in Corn, Timber, and the Fiſheries.

Theſe three laſt-named Towns have ſcarcely recovered the Damages done by the *French* in the Year 1672.

The *Generality Lands*.

The *Generality Lands* are ſuch Parts of the other Provinces as the *Seven United Provinces* have ſubdued by their joint Arms; and therefore have this Name given them, as belonging jointly to all the *United Netherlands*.

Bois-le-Duc.

1. In *Dutch Brabant* is the Quarter of *Bois-le-Duc*, as the *French* call it, or, in *Dutch*, *Hertogenboſch*. It is a ſtrong and moderately large Town, on a navigable River, which runs into the *Scheld* at Fort *Crevecœur*. Its Trade and Navigation are conſiderable, which are much aſſiſted by the many Canals in its Neighbourhood.

Oſterwyk.

2. *Oſterwyk* Quarter is much employed in the Woollen Manufactures; and the Town of that Name has ſix Villages in its Precinct.

3. *Eindhoven* is an open Town, chiefly employed in the Woollen Manufacture. It, as well as *Grave* and *Ravenſtein*, belong to the Prince of *Orange*.

Breda.

4. *Breda*, a fortified Town, of 1,500 Houſes, according to Dr. *Buſching*, (2,200 Houſes, according to Mr. *Nugent*'s *Grand Tour*.) It belongs to the Prince of *Orange*: But, although it has a Communication with the Sea by a ſmall navigable River, its Commerce and Woollen Manufactures are greatly decayed.

Willemſtadt and *Steenbergen*.

5. The Lordſhip and ſtrong little Town of *Willemſtadt* has only about 100 Houſes in it, though a good Sea-port. It belongs alſo to the Prince of *Orange*; as does likewiſe *Steenbergen*, another ſtrong little Town of about 150 Houſes.

Bergen-op-Zoom.

Bergen-op-Zoom is a very ſtrong Town, with 1,100 Houſes. It communicates with the River *Scheld* by the Means of its good Harbour. Although the Marquiſate or Territory of *Bergen-op-Zoom* belongs to the *Elector Palatine*, yet the Town itſelf is ſubject to the *States-General* of the *United Provinces*.

Fort *Frederic-Henry* and Fort *Lillo*, both lying on the *Scheld*, below *Antwerp*, [and intended as Bridles to that City] are alſo garriſoned by the *States-General*.

Maeſtricht.

Maeſtricht, in the Biſhopric of *Liege*, on both Sides the River *Maeſe*, is one of the ſtrongeſt Fortreſſes belonging to the *States-General:* That Part of it ſtanding on the Right of the *Scheld* is called *Wyk*, and is joined to *Maeſtricht* by a grand fortified Stone-bridge. It is one of the principal Keys on the *Maeſe*. The Houſes within its Walls are about 3,000. Its Woollen Manufactures, once ſo conſiderable, are now much decayed. The Sovereignty of the Town belongs jointly to the *States-General* and the Biſhop of *Liege*. It contains four Proteſtant Churches, and ſix Popiſh ones, eight Convents of Monks, eleven Nunneries, and a College of Jeſuits; with ſundry other fine public Edifices. Its Magiſtracy conſiſts of an equal Number of *Calviniſts* and *Romaniſts*, and the latter muſt be Natives of the Biſhopric of *Liege*.

Valkenburg, *Rolduc*, and *Dalem*, three ſmall Towns in the Dutchy of *Limburg*, belong partly to the *States-General*, with Part of their Dependencies; though but of little Importance; as does likewiſe a Part of what is called the *Upper-Quarter* of *Gelderland*, viz.

1. *Venlo*, a ſtrong Town, on the *Maeſe*, containing about 900 Houſes, but nothing of Commerce.

2. *Stevenſwaerd*, a ſtrong Fort on an Iſland in the *Maeſe*, for preſerving the Communication between *Venlo* and *Maeſtricht*.

Dutch Flanders.
Sluyce.

Dutch Flanders contains *Sluyce*, its largeſt Town. It was formerly the proper Sea-port of *Bruges*; but when it fell into the Hands of the *Dutch*, the *Brugians* digged a Canal from their City to *Oſtend*, and thereby made the latter their Sea-port. The once famous Harbour of *Sluyce* is now ſo choaked up as to admit only ſmall Veſſels; and its Air is ſo unhealthy that the *Dutch* Garriſon is changed every Year. The Iſle of *Cadzant*, on this Coaſt, has been partly ſwept away by the Sea; but what remains is now fenced with ſtrong Dykes; and yields excellent Wheat. On it are ſettled great Numbers of *French* and *Saltſburg* Refugees.

Cadzant Iſle.

Biervliet.

2. *Biervliet*, a ſmall Town on the *Weſt Scheld*, is now much fallen from its ancient Greatneſs, by Inundations.

Hulſt.

3. In the Bailiage of *Hulſt* ſtand the ſmall Towns of *Hulſt* and *Axel*, both well fortified.

Sas van Ghent and *Axel*.

4. *Sas van Ghent* is a ſmall Fortreſs on a Branch of the *Weſtern Scheld*, below the City of *Gant*. Here alſo are Numbers of other inconſiderable Places belonging to the *Dutch*.

The *Netherland Barrier-Towns.*

☞ *N. B.* By the Barrier-Treaty, between the *Emperor* and the *States-General*, *Anno* 1715, the *Dutch* were to garriſon *Namur*, *Tournay*, *Menin*, *Furnes*, *Ypres*, *Warneton*, and *Fort-Knoque*. And the ſaid two Potentates agreed to keep up 40,000 Men therein, on the Probability of a War, and *more* if an actual War. But, ſince then, that Treaty ſeems to be little regarded on either Side, and great Negligence has enſued, which both Parties may ſome Time or other repent of: But this is not our proper Subject, any farther than the general Freedom of *Europe*'s Commerce may hereafter be affected by it.

The Kingdoms of GREAT-BRITAIN *and* IRELAND.

The Iſland of *Great-Britain* may be conſidered both in a *geographical* and *mercantile* Senſe, as comprehending two diſtinct Parts, *viz. England* the richer and greater, and *Scotland* the ſmaller and leſs conſiderable Part: although in a *legal* and *political Senſe* thoſe two Parts have been indiſſolubly united *fifty-five* Years ago.

England's Quality and Productions.

I. *England* is the more level and fertile Part of this noble Iſland, and *Scotland* more mountainous, and in its Northern and North-weſtern Parts more cold and barren, though enjoying a more pure and healthy Air.

England is often ſubject to Damps, Fogs, and much variable Weather; yet the Country is uncommonly fertile, almoſt always abounding in Plenty of Corn, and excellent Vegetables and Fruit; in Cyder, Perry, Saffron, Liquorice, Woad, excellent Timber both for Houſe and Ship Building, as alſo for Fuel; almoſt inexhauſtible Pit-coal; the fineſt Paſtures, Horſes, and horned Cattle; and Sheep, a moſt profitable Article beyond any other, on Account of the nobleſt Manufacture upon Earth. *England*'s Mines and Manufactures are alſo very conſiderable; and her *Tin-Mines* of *Cornwall* have not their Parallel in any other Part of *Europe*, nor perhaps in the whole World. In her Mountains are found Marble, Alabaſter, Cryſtal, Alum, and Vitriol; her Sea-Coaſts and Rivers abound in the greateſt Quantities of the beſt Kinds of Fiſh.

Scotland's Quality and Productions.

II. In *Scotland* they are making many Improvements in Agriculture, and in the greater Production of Hemp and Flax, for farther increaſing their already extenſive very fine and valuable *Linen* Manufacture. It alſo abounds in Horned Cattle, Sheep, and a ſmaller Breed of hardy Horſes; in vaſt Quantities of Pit-coal, better than that of *England*; and in Plenty of Lead, of Salmon in its Rivers, and an inexhauſtible Abundance of *Fiſh* in her Seas.

Ireland's Quality and Productions.

III. *Ireland*, though abounding in Lakes and Bogs, is nevertheleſs a noble Iſland. Agriculture is beginning to be improved, and its Cultivation of *Hemp*, and yet more of *Flax*, is become very conſiderable; alſo her *Linen* Manufacture is grown almoſt to be a Prodigy, even in a few Years Space.

People of *Britain* and *Ireland* computed.

Dr. *Buſching* makes the Inhabitants of *Great-Britain* amount to *nine Millions*, which is probably near the Truth; and the People of *Ireland* are nearly computed at 2,250,000.

England's foreign Commerce is immenſe!

ENGLAND.

ENGLAND.

England's Commerce To *Turkey,*

1. To *Turkey*, *England* ſends Woollen Cloths, Tin, Lead, and Iron, ſolely in her own Shipping; and brings thence Raw-Silk, Carpets, Gauls, and other dying Drugs, Cotton, Fruits, medicinal Drugs, Coffee, &c. Dr. *Buſching* relates, That a very eminent *Turkey* Merchant at *London* aſſured him, *That the Balance of this Trade in* England's *Favour was, to his certain Knowledge, near* 600,000 *l. per Annum*; which we heartily wiſh may be true! though we have too much Ground to doubt it.

To *Italy,*

2. To *Italy*, *England* exports Woollen Goods of various Kinds, Peltry, Leather, Lead, Tin, Fiſh, and *Eaſt-India* Goods; and brings back raw and thrown Silk, Wines, Oil, Soap, Olives, Oranges, Lemons, Pomgranates, dried Fruits, Colours, Anchovies, &c. And the ſaid Author thinks, the Balance of this Trade, *in Favour of Italy*, cannot be leſs than 200,000 *l. per Annum.*

To *Spain,*

3. To *Spain*, *England* ſends all Kinds of Woollen Goods, Leather, Lead, Tin, Fiſh, Corn, Iron and Braſs Manufactures, Haberdaſhery Wares, Aſſortments of *Linen* from *Germany* and elſewhere for her *American* Colonies; and receives in return, Wines, Oils, dried Fruits, Oranges, Lemons, Olives, Wools, Indico, Cochineal, and other dying Drugs, Colours, *Gold* and *Silver* Coin, &c. And is, doubtleſs, a gainful Trade for *England*, though not ſo greatly ſo as it was formerly, before other Nations, and more eſpecially *France*, interfered ſo much of late Years.

To *Portugal,*

4. To *Portugal*, *England* ſends moſtly the ſame Kinds of Merchandize as to *Spain*; and makes Returns in vaſt Quantities of Wines, with Oils, Salt, dried and moiſt Fruits, dying Drugs, and *Gold* Coins; and, undoubtedly, much to *England*'s Advantage.

To *France,*

5. To *France*, *England* ſends much Tobacco, Lead, Tin, Flanels, Horns, and ſometimes Corn; and always much Money at the Long-run. And brings Home, in a Smuggling Way, a much greater Value in Wines, Brandies, Linen, Cambricks, Lace, Velvets, and many other prohibited Fopperies, Brocades, &c. always very conſiderably to *England*'s Diſadvantage. But as there is no commercial Treaty ſubſiſting between *England* and *France*, not even in Time of Peace, *England*'s juſt Loſs cannot be aſcertained.

To *Flanders,*

6. To *Flanders*, *England* ſends Serges, Flanels, Tin, Lead, Sugars, and Tobacco; and makes Returns in fine Lace, Linen, Cambricks, &c. to *England*'s Diſadvantage (according to Dr. *Buſching*) to the Amount of 250,000 *l.* Sterling yearly.

To *Germany,*

7. To *Germany*, *England* ſends Cloths and Stuffs, Tin, Pewter, Sugars, Tobacco, and *Eaſt-India* Merchandize: And brings thence vaſt Quantities of Linen, Thread, Goats-ſkins, Tinned-plates, Timbers for all Uſes, Wines, and many other Articles: And Dr. *Buſching* thinks the Balance againſt *England* may amount annually to 500,000 *l.*

To *Norway,*

8. To *Norway*, *England* ſends a ſmall Quantity of Tobacco, and of Woollen Stuffs; and (it is ſaid) 150,000 *l.* in Money; and brings thence vaſt Quantities of *Deal* and other Timber.

To *Sweden,*

9. To *Sweden*, *England* ſends ſome few Manufactures, and about 200,000 *l.* annually in Money; and brings back from thence much Iron, Timber, Tar, Copper, &c.

To *Ruſſia,*

10. To *Ruſſia*, *England* ſends Woollen Cloth and Stuffs, Tin, Lead, Tobacco, Diamonds, Houſhold Furniture, &c. And makes Returns in Hemp, Flax, Linen, Thread, Furs, Pot-aſh, Iron, Wax, Tallow, &c. And by this Trade *England* loſes (according to the Opinion of ſome) 400,000 *l.* annually.

To *Holland,*

11. To *Holland*, *England* ſends an immenſe Quantity of many Sorts of Merchandize; ſuch as all Kinds of Woollen Goods, Hides, Corn, Coals, *Eaſt-India* and *Turkey* Merchandize, Tobacco, Tar, Sugar, Rice, Ginger, and other *American* Productions: And makes Returns in fine Linen, Lace, Cambricks, Thread, Tapes, Incle, Madder, Boards, Drugs, Whalebone, Train-oil, Toys, and many other Things. And the Balance is uſually ſuppoſed to be much in Favour of *England.*

To *Ireland,*

12. To *Ireland*, *England* ſends almoſt all Kinds of Merchandize, (Linen and Woollen Stuffs and Proviſions alone excepted;) and, doubtleſs, reaps great Advantages thereby. Although, of late Years, *Ireland*'s great and increaſing Importations of Linen into *England* may, in Time, turn the Balance againſt *England*, notwithſtanding the great Sums of Money ſpent in *England* by *Ireland*'s Abſentees.——*Ireland* moreover enjoys the Benefit of a direct Commerce to moſt Parts of *Europe*, *viz.* with the *Netherlands*, *France*, *Spain*, and *Portugal*, with her Hides, Tallow, ſalted Beef, Pork, and Butter. The Returns whereof helps to pay to *England* what they have from thence.

And, beyond all, To her own *American Plantations,*

13. But the moſt important and advantageous Commerce of *England* is that carried on to her own Colonies in *America*. There it is that *England* [and *Scotland* alſo ſince her Union with her] finds the vaſt and conſtantly increaſing Vent of her Product and Manufactures of almoſt every Kind, both of her own and thoſe of every other *European* Country. And from thence ſhe returns with the various Productions of *America*; Tobacco, Sugars, Rice, Ginger, Indigo, Drugs, Logwood, and Money, which our own Colonies got from the ſundry *European* Nations holding Colonies in *America.*

To *Guinea,*

14. To the Coaſt of *Guinea*, *England* ſends ſundry Sorts of coarſe Woollen and Linen, Iron, Pewter, Braſs, and Hardware Manufactures, Lead-ſhot, Swords, Knives, Fire-arms, Gunpowder, Glaſs Manufactures, &c. And, beſide its drawing no Money out of the Kingdom, it ſupplies her *American* Colonies with Negro Slaves, amounting in Number to above 100,000 annually; and moreover brings home to

to *England* Gold-Duſt, dying and other Drugs, Red-wood, *Guinea*-Grains, Ivory, *&c.* This Trade therefore is extremely profitable to *England.*

To *Eaſt-India*, &c.

To *Arabia*, *Perſia*, *Eaſt-India*, and *China*, *England* ſends much foreign Silver Coin and Bullion, and ſundry *Engliſh* Manufactures of Woollen Goods, and of Lead, Iron, and Braſs: And brings Home from thoſe remote Regions, Muſlins and Cottons of many various Kinds, Callicoes, raw and wrought Silk, Chints; Teas, Porcellane, Gold-Duſt, Coffee, Saltpetre, and many other Drugs, *&c.* And ſo great a Quantity of thoſe various Merchandize are re-exported to foreign *European* Nations, as more than abundantly compenſates for *all* the Silver Bullion which *England* carries out!

Annual *Balance* of *England*'s foreign Commerce.

Now, if (as ſome compute) *England*'s annual Exports do amount to near *ſeven Millions Sterling*, and that her annual Imports do not exceed *five Millions*; of which five Millions above one Million is re-exported, then may the general annual Balance in Favour of *England* be about or near *three Millions Sterling*; ☞ or, in other Words, ſo much is the annual Profit of *England by its foreign Commerce.*

Its ſeveral Counties and Places of Trade briefly deſcribed.

In order for a Deſcription of its ſeveral Parts, we ſhall begin with

Cornwall.

I. *Cornwall:* This County's Mountains ſupply an immenſe Quantity of excellent *Tin*, and alſo ſome *Copper.*——Its beſt Towns are, *Falmouth*, a pretty modern Town, and though become of later Years larger than moſt other Towns of this County, yet ſends no Members to Parliament. It has a good Harbour, ſome foreign Commerce; and is finely ſituated for the Station of the Packet-boats to *Spain* and *Portugal.*——*Penzance* is a well-built and populous Sea-port Town, of conſiderable Commerce.——And of *Truro* the like may be ſaid, it having three Pariſh Churches.——*Launceſton*, though the County-Town, is ſomewhat decayed. A neighbouring Hill is noted for its *Corniſh Diamonds.*——Weſtward from the Land's-End lie the Iſles of *Scilly*, ſix in Number: *St. Mary's* is the beſt and moſt fertile of them, and has a good Harbour.

Towns and Commerce of *Devonſhire.*

Plymouth.

II. *Devonſhire* has both Tin and Lead Mines, with Manufactures of the fineſt Serges or Perpetuanos, Kerſies, Bonelace, and excellent Cyder.——*Plymouth* is a large Town, with a noble Harbour, a large Royal Dock for Ships of War, a Royal Citadel, and other Forts and Batteries; and with the Buildings and People, and its extenſive Dock, may probably contain about 20,000 People.—*Dartmouth* is a flouriſhing Port of Trade, with a good fortified Harbour. Theſe two lie on the *Engliſh Channel.*——*Biddeford*, on the *Briſtol Channel*, and *Barnſtaple*, near it, are both handſome Sea-port Towns, with good Harbours; the former chiefly trades in *Fiſh*, the latter in *Wines.*

Exeter.

Exeter is a large, opulent, and ancient commercial City, on the River *Ex*, containing twenty-two Churches and Chapels, five Meeting-houſes, and ſeveral Hoſpitals and other Charity-Foundations, containing about and ſome ſay more than 20,000 Inhabitants. It is eminent for its great Trade in fine Perpetuanos and Serges, to the Value (as commonly ſaid) of 600,000 *l. per Annum*, and has alſo a good foreign Commerce. Mr. *Salmon*, in his *Modern Gazetteer*, obſerves, "That it is generally ſtiled the "*London of the Weſt*, there being no City between that and the Land's-End, which lies about 100 Miles "weſt of it." Ships of 150 Tons may unlade at its Quay, but larger ones lie at *Topſham*, three Miles down the River.——*Torrington*'s Trade is conſiderable to *Ireland.*——*Lundy-Iſle*, in the *Briſtol Channel*, though five Miles in Length and two in Breadth, is ſurrounded with Rocks, and of no Importance.

Dorſetſhire, and its Towns and Commerce.

III. *Dorſetſhire* abounds in Corn, Cattle, Sheep, Hemp, Flax, and Timber; ſo pleaſant a County as to have been ſometimes ſtiled the *Garden of England.*——*Lyme* is a decayed Sea-port.——*Bridport* is chiefly noted for the great Quantities of *Cordage* and *Match* for the Navy.——*Weymouth* and *Melcomb-Regis* are two populous Sea-port Towns joined together by a Bridge over the little River *Wey*. They carry on a conſiderable foreign Commerce, and are under one Magiſtracy, though each of them ſends two Repreſentatives to Parliament.——*Dorcheſter*, the County-Town, is large, though an inland Town; and, for ſix Miles round it, the Country has been ſaid to feed 600,000 Sheep.——*Pool* is a conſiderable Port for Shipping and Commerce, chiefly in the *Newfoundland* Fiſhery. Its Oyſters are reckoned the beſt and largeſt in *Great-Britain.*——*Blandford*, a well-built inland Town, ſurpaſſes all *England* in fine *Lace*, has ſome Woollen Manufactures, and is noted for good Malt.——*Shaftſbury*, a good Town, with four Pariſh Churches.——*Sherburn*, a large Town, containing 1,300 Houſes and 10,000 Inhabitants. Its modern Manufactures are Buttons, Lace, and Haberdaſhery Wares, wherein it carries on a good Trade.

Somerſetſhire, and its Towns and Commerce.

IV. *Somerſetſhire* lies on the *Briſtol Channel*; it abounds in Corn, fine Cattle, Sheep, Lead, Copper, *Lapis Calaminaris*, Woad for Dyers, and *Briſtol Stones* reſembling Diamonds. Its Manufactures are very important, conſiſting of fine Cloths, Serges, and Druggets: It is alſo famous for the beſt and largeſt Cheeſes, by ſome eſteemed equal to *Parmezan* Cheeſe, and alſo for Cyder.——Its beſt Towns are, *Bridgwater*, a Sea-port of conſiderable Commerce, and about 4,000 Inhabitants.——*Taunton*, a much larger Town, on the River *Tone*, navigable from thence to *Bridgwater*. It contains about 20,000 Inhabitants, many of whom are wealthy, as this Place has very conſiderable Manufactures of Serges, Druggets, and other Woollen Stuffs.——The ſmall City of *Wells* has about 4,000 Inhabitants: It lies at the Foot of *Mendip-Hills*, famous for their *Lead Mines*. Bone-lace, and the Knitting of Stockings and Caps are its only Manufactures.——*Froom*, or *Frome*, is a fine and large Woollen manufacturing Town, of 13,000 Inhabitants.

Briſtol City and County.

V. The renowned commercial City of *Briſtol* is ſeparated by the River *Avon*, between the two Counties of *Somerſet* and *Glouceſter*; yet, being a County of itſelf, it is no Part of either of thoſe Counties. A conſiderable Part of it lies on the South Side of that River, and a ſtill larger Part on the North Side of it; having a Communication by three Stone-bridges, alſo by a Draw-bridge for letting of Ships up into the Harbour, called the *Back*, or the little River ſtiled the *Froom*. It is by far the largeſt City in *Britain*, next after *London*; containing above 13,000 Houſes, and about 100,000 Inhabitants; both which are conſtantly increaſing. It is ſaid by ſome to employ 2,000 maritime Veſſels of all Sizes, Coaſters, as well as Ships employed in foreign Voyages. It has many very important Manufactures: Its Glaſs-bottle and Drinking-glaſs one alone occupying fifteen large Houſes. Its Braſs-wire Manufactures are alſo very conſiderable. It contains twenty-one Churches, beſide its Cathedral, and ſeven or eight Meeting-houſes; has a moſt extenſive Quay, with Dock-yards, &c. for Ship-building; ſundry good Hoſpitals, in all eighteen in Number, and many Alms-houſes and other charitable Foundations. Inſomuch, that this City, for its prudent Regulations is perhaps out-done by none, and for its vaſt Commerce, Wealth, and Shipping, by very few trading Cities in all *Europe*.

Bath is a Place of no Commerce nor Manufactures, wherefore we paſs it over, as well as ſundry other inconſiderable Places in this and other Counties.

VI. *Wiltſhire* is a fertile County, greatly abounding in Woollen Manufactures, more eſpecially at the Towns of *Chippenham*, *Malmſbury*, *Calne*, *Devizes*, *Bradford*, *Trowbridge*, *Weſtbury*, *Marlborough*, *Warminſter*, as alſo at many populous Villages.

Saliſbury is a fine and well-built City, having a fine Town-houſe, a ſpacious Market-place, a noble Cathedral, four other Churches and about 10,000 Inhabitants. Here are ſeveral flouriſhing Manufactures, particularly fine Flanels, Long-clothes, called *Saliſbury Whites*, for the *Turkey* Trade; alſo Druggets and Bone-lace.——*Devizes*, a neat and flouriſhing Town, eminent for its Woollen Manufactures; has three Churches and 6,000 Inhabitants.——And *Marlborough*, another woollen-manufacturing Town, of two Churches, and near as populous as the *Devizes*.

VII. *Hampſhire*, on the *Engliſh Channel*, abounds in Corn, Wool, Iron, and Timber. *Ringwood* and *Fordingbridge* are both good woollen-manufacturing Towns.

1. *Wincheſter* is a very ancient but a decayed City, occaſioned through many Diſaſters in old Times, it is about a Mile and an half in Circuit; has a Cathedral and ſix Pariſh Churches, [though formerly it had thirty-two Pariſh Churches, ſo that there is now much void Ground within its Walls] a fine College, for the Education of Youth for the Univerſity, three Charity-Schools, a Palace begun, but never finiſhed, by King *Charles* the Second, and going to ruin. Here is an Hoſpital and an Infirmary; but here are ſcarcely any conſiderable Manufactures; but it has ſtill a conſiderable Trade in Wool-ſtapling. The City is well-frequented by genteel Company.

2. *Andover* is a populous Town, abounding in Woollen Manufactures, particularly fine Shalloons. It deals largely in Malt; and its famous annual Fair, named *Weyhill*, is moſt eminent for Hops, Sheep, and Cheeſe.

Portſmouth.

3. *Portſmouth* is a regularly fortified and moſt famous Sea-port Town. It has a very ſpacious Harbour, in which a thouſand Ships may ride at Anchor, a moſt extenſive Dock-yard, for the Conſtruction and Repairs of the Royal Navy, fine Rope-yards, vaſt Storehouſes, a Cooperage, Victualing-office, Gun-wharf, moſt convenient Houſes alſo for the numerous Officers and Maſter-Workmen: All which form a Kind of diſtinct Town. And the adjoining Streets on the Place called the *Common* form another conſiderable Town. Moreover, the Town of *Goſport*, intirely depending on *Portſmouth*, and lying on the South Side of the Harbour, forms alſo a conſiderable Town. So that the whole taken together may fairly be preſumed to contain at leaſt 20,000 People; above 1,000 Men being conſtantly kept in the King's Pay in and about the Harbour.

4. *Southampton* is a large and beautiful Town, and was formerly a very flouriſhing Town and Sea-port, containing five Pariſhes. Its principal Trade at preſent is with the Iſles of *Jerſey* and *Guernſey*, and in *French* and *Port* Wines.

Wight Iſle is a Part of *Hampſhire*. Its moſt thriving and increaſing Sea-port Town is *Cowes*; where, in Time of War, is the Rendevouz of Merchant-Ships waiting for Convoy.

The Iſles of *Jerſey*, *Guernſey*, *Alderney*, and *Sark*.

VIII. Oppoſite to *Hampſhire*, Southward, lie the Iſles of *Jerſey*, *Guernſey*, *Alderney*, and *Sark*, on the Coaſt and in Sight of *Normandy*, being all that remains to *England* of that large Dutchy. Dr. *Buſching* was miſled in ſaying, that thoſe Iſles belong to *Hampſhire*; they being intirely independent of any County, and are governed by their own ancient Laws and Cuſtoms, under a Chief Governor, appointed by his *Britannic* Majeſty. They live happily under the Dominion of *England*; are well defended by Forts, Batteries, and Ledges of Rocks; and in all of them together there are about twenty-four Pariſhes, 40,000 Inhabitants, and a few ſmall trading Towns, in Wines, coarſe Woollen Stockings, &c. and have Plenty of Corn, Fiſh, and Cyder.

IX. *Berkſhire*, a delightful and fruitful Country.——1. *Reading*, its County Town, on the *Thames*, is large and wealthy, has three Churches and as many Meeting-houſes. It contains at leaſt about 8,000 People, and carries on a great Trade with *London* in Malt and Flour.——2. *Abington* is a good Town, eminent for its Corn-Market, and the vaſt Quantities of Malt with which, by Means of the *Thames*, it ſupplies *London*.——3. *Newbury* deals alſo in Malt, and has ſtill ſome Woollen Manufactures, although the Bulk of them is long ſince removed farther Weſt.

4. *Windſor* is a handſome Market-Town, on the *Thames*, plentifully ſupplied with all Neceſſaries; but chiefly eminent for its Royal Palace, Foreſt, and Park.

X. *Surrey* is a pleaſant County. *Guildford* being its reputed County Town, ſtanding on the River *Wey*; which, being navigable from it to the *Thames*, ſerves to convey much Ship-Timber, &c. to *London*. It has three Churches, a Meeting-houſe, three Charity-Schools, and other Charity-Foundations, and is a well-

well-built Town.—*Kingſton*, up the *Thames*, is a large Market-Town:—And *Richmond*, a delightful Royal *Villa*, with a fine Park.——*Southwark*, though uſually deemed a Part of the great Contiguity of *London*, or one of its great Suburbs, yet is within this County; and its Contiguity ſtretches along the *Thames* from *Deptford-Bridge* to *Vauxhall*, above ſix Miles in Length, though very narrow in ſome Parts, and at other Parts ſcarcely contiguous, containing very many opulent People, and many Thouſands of induſtrious Inhabitants, and various Manufacturers.

XI. *Suſſex*, on the *Engliſh Channel*, oppoſite to *France*, is abundant in fine *Oak* Timber, and in Iron-mines, worked with very great Benefit.——*Chicheſter* City is its chief Town, having a Cathedral and five Pariſh Churches. Its principal Trade is in Corn for Exportation, and in Malt and Needles. Its Harbour is neither good nor large; though it has not much foreign Trade, it is nevertheleſs eſteemed a well-built City.

Lewes is a conſiderably large Town, with ſix Pariſh Churches; and along its River are ſeveral Iron-works, and Founderies for Cannon.

XII. *Kent*, a noble and fertile County.

Canterbury, its ancient Capital, is a decayed City; having a fine Cathedral and fourteen Pariſh Churches. Here are ſtill ſome Silk Manufactures carried on by the Poſterity of the *Walloons*, and of the *French* Refugees. It has ſeveral fine Remains of ſtately Eccleſiaſtical Buildings, with Part of its ancient Walls: Poſſibly there may be near 20,000 People ſtill left in it. Its Neighbourhood is noted for the beſt *Brawn*, and alſo for great Quantities of excellent Hops.

Sandwich is a greatly decayed Sea-port, its Harbour being much choaked up with Sand; yet it has ſtill ſome coaſting Trade; has three Churches, three Hoſpitals, and five Charity-Schools, a Cuſtom-houſe, and a *Quay*; and has ſtill a Woollen Cloth Manufactory.

Deal is within little more than a Century paſt become a large Town, occaſioned by the *Shipping* uſually ſtopping in the *Downes*; yet it has no Harbour, but merely an open Beach.

Dover, an ancient and open Sea-port, oppoſite to that of *Calais* in *France*. Its Harbour is a dry one, and is only capable, at High-water, of receiving middling Merchant-Ships. Of its ancient ſeven Pariſh Churches two only remain. Here is a Cuſtom-houſe, and a Victualing-office for the Royal Navy; yet it is a Place of no conſiderable foreign Commerce. Its huge Caſtle ſtands too high to do much Execution againſt Shipping. Here are held the Courts relating to the *Cinque Ports*, it being the chief of them. In Time of Peace there goes from hence a Packet-Boat twice every Week to *Calais*, in Sight of it, with the Mails for *France*, &c.

Sheerneſs is a regular Fortreſs, having ſome few Streets within it. It commands the Entrance into the River *Medway*; and the Channel here is ſo ſoft and deep as to be deemed one of the moſt commodious Stations upon Earth for a Royal Navy.

Rocheſter City is at beſt but a mean Place, having only one Church, a Town-houſe, a mathematical School, and an Alms-houſe: Yet, if the adjoining Town of *Chatham*, with its Dock-yards and vaſt Storehouſes for the Equipment of the Royal Navy, be included; and if the Town of *Stroud*, at the farther End of its fine Bridge, be included, thoſe three Places together may very well be deemed to contain 20,000 Inhabitants.

Chatham is the principal Dock-yard for the Royal Navy, being ſupplied with immenſe Quantities of all Kinds of Naval Stores, and whatever elſe may be requiſite for the Equipment of a Royal Fleet. It has an *Ordnance-Office*, a *Victualing-Office*, and an *Hoſpital*;—handſome and convenient Houſes for the ſeveral Officers. And the intire Oeconomy here is ſo much improved of late Years, that it may be pronounced truly admirable!

Chatham, on the *Medway*, its immenſe Naval Stores and Accommodations for the Equipment of a Royal Navy.

Woolwich, on the *Thames*, has alſo a Royal Dock-yard for the King's Ships, and an eminent Foundery and vaſt Magazine for Cannon, Mortars, Bomb-ſhells, and Bullets. Here alſo is a Royal Artillery Academy, with a conſtant Artillery Guard, and Houſes for the Officers, in the Place called the *Warren*.

Deptford alſo nearer *London* (formerly called *Weſt Greenwich*) is become a large and populous Town, intirely raiſed by its noble Dock-yard for the Building and Repair of his Majeſty's Ships. It contains two Churches, a Meeting-houſe, a College for the Corporation of *Trinity-Houſe* for Pilots and Pilotage; a moſt uſeful Inſtitution. This lately-raiſed Town contains more Houſes and People than are to be found in ſome Cities.

Greenwich, late a Royal Village, now a Market-Town, nearly adjoining to *Deptford*, is no otherwiſe eminent than as it contains the moſt beautiful Hoſpital upon Earth, for the Reception of ſuperannuated Mariners, who had ſerved in the Royal Navy; and we wiſh that Charity could be fully extended to all maimed and worn-out Mariners throughout the *Britiſh* Dominions in the Merchants Service.

Ramſgate, near the *Downs*, is a ſmall Harbour; for the Improvement whereof ſo great a Sum as 50,000 *l.* has in a few Years paſt been expended, though hitherto to little Effect.

Maidſtone is a genteel and conſiderable Town, ſituated on the *Medway*, above *Rocheſter*. It deals very much in Hops, makes a great Deal of Linen-Thread, and its Neighbourhood produces great Numbers of the fineſt and largeſt Cattle, and greatly abounds in Corn, Cherries, and other Fruits.

XIII. *Mid-*

XIII. *Middleſex* is a ſmall but pleaſant and fertile County.

London.

London, its auguſt and matchleſs Capital, is not to be deſcribed in leſs than a very conſiderable Folio Volume: Yet we may ſummarily obſerve, ☞ That it contains 128 Pariſh Churches, and near as many Proteſtant Diſſenting Meeting-houſes and Chapels, of various Denominations, beſide five Foreign Churches, or private Popiſh Chapels, and *Jews* Synagogues. It contains 3 Colleges, 13 Hoſpitals, and almoſt 100 Alms-houſes; 15 Colleges (called Inns) for Lawyers, 27 Squares, and 131 Charity-Schools. In point of Opulence, Commerce, Populouſneſs, and Extent, (including *Weſtminſter* and all its other Suburbs) we apprehend it may fairly be deemed the firſt City in *Chriſtendom*, if not on the whole Earth.

Brentford, on the *Thames*, is a large Market-Town: And there are in this County great Numbers of large and beautiful Villages on every Side, chiefly filled with the Country-Houſes of Perſons of Quality and Diſtinction, Merchants, and wealthy Citizens, in conſiderably greater Numbers than the *Environs* of *Paris*, or of any other Metropolis in *Europe*!

XIV. *Eſſex* abounds with the fineſt Manufactures of *Bays*, and with fine Saffron, and Oyſters.

Colcheſter, its chief Town, is an ancient, large, and populous Place, with a Harbour for ſmall Veſſels, Ships of Burden being obliged to load and unload three Miles below the Town. It has long been eminent for its fine Manufactures of Bays and Serges, [in which Manufactures this ſingle Town has been ſaid formerly to have returned 1,500,000*l.* annually] and for excellent barrelled Oyſters, ſent to many diſtant Parts. It contains eight Pariſh Churches, five Diſſenting Meeting-houſes, three Hoſpitals, and Alms-houſes, two Grammar-Schools, a Free-School, two Charity-Schools, a Work-houſe, and other public Edifices: And in the Town and its Liberties they reckon no fewer than 40,000 People.

Harwich is a ſmall but handſome Sea-port, having an excellent Harbour, defended by *Landguard Fort*, on the *Suffolk* Side. Here is a Dockyard for Ship-building, with Store-houſes, *&c.* where a fine new King's Ship of 70 Cannon was very lately launched. It is the Station for the Packet-boats between *England* and *Holland*: Yet there is very little foreign Commerce carried on here.

Cogſhal and other ſmall Places in this County are alſo noted for their Manufactures of Bays.

XV. *Suffolk* produces *Hemp*, and all Sorts of Grain and excellent Cattle.

Ipſwich, its Capital, is an ancient decayed Town, although it has ſtill twelve Pariſh Churches, two Chapels, a Free-School, a Harbour and Yard for Ship-building. It alſo retains ſtill ſome Woollen and Linen Manufactures.

Sudbury was one of the firſt Places where King *Edward* the Third eſtabliſhed his new Woollen Manufactures, where they are ſtill well kept up. It has three Pariſh Churches.

Bury, or *St. Edmund's-Bury*, is a moſt pleaſant and regular Town, with two large Churches, two Charity-Schools, and a *Latin* School. Its wholeſome Air occaſions its being inhabited by many Gentry, being by ſome called the *Montpelier* of *England*. But its only Manufacture is the ſpinning of *Woollen* nd *Worſteds*.

Woodbridge is a Sea-port of ſome maritime Trade to *Holland*, *Newcaſtle*, and *London*, in Timber, Cordage, Corn, Salt, Hemp, Butter, Cheeſe, *&c.*

XVI. *Norfolk*'s Productions are Corn, Wool, Honey, and Saffron; and its chief Manufactures are fine Woollen, and Half-Silk Stuffs, and Stockings.

Norwich.

1. *Norwich* is its ancient, large, and populous Metropolis, the Center of all the Manufactures and inland Commerce of this County. It contains a Cathedral, thirty-two Pariſh Churches, and ſeveral Diſſenting Meeting-houſes, beſide two Churches for the *Walloons* and *Flemings*, whoſe Privileges are inviolably continued to them. To the *Flemings* and *Walloons*, who fled hither from the Perſecution of the *Duke d'Alva*, and were encouraged to ſettle here by Queen *Elizabeth*, are owing the principal and vaſt Increaſe of its fine Crapes and other light Manufactures, which are ſaid to employ 120,000 Perſons in and near this City; and *Norwich* buys up Quantities of fine Yarn, which is ſpun in ſundry other more Northern Counties. The Inhabitants of *Norwich* are computed to amount to 60,000, and its Houſes to about 8,000. Here is the Remains of a Palace, and Caſtle, now the County-Gaol, alſo a Guild-hall, a Market-houſe, a Shire-hall, four Hoſpitals, twelve Charity-Schools, ſix Bridges croſs the River *Yare*, with many good Edifices. This City is of great Service to *Yarmouth*, its proper Sea-port, not only for exporting its excellent Stuff, *&c.* Manufactures, beyond Sea and to *London*, but likewiſe by the vaſt Quantities of Wine, Oil, Coals, Fiſh, and other heavy Goods, which ſo populous a manufacturing City as *Norwich* conſtantly conſumes. The perſecuted *Flemings*, driven out by *D'Alva*'s Cruelty, firſt taught *Norwich* to make *Says*, *Bays*, *Serges*, *Shalloons*, and other fine Stuffs; and they afterward fell into the Manufactures of *Camlets*, *Crapes*, *Druggets*, &c. in which they are ſaid to return 200,000*l.* annually, and their Stocking Manufactures are ſaid to be valued annually at 60,000*l.* more.

2. *Yarmouth* is a handſome and populous Town, with a good Harbour, and one of the fineſt Quays in all *Europe*. Its Herring Fiſhery is very great, employing 150 Veſſels therein, whereof about 50 are uſually laden to *Genoa*, *Leghorn*, *Naples*, *Meſſina*, *Portugal*, *Spain*, and *Venice*; from hence alſo are exported all Kinds of Stuffs made at *Norwich*, and other Parts, to *Holland*, &c.——*Yarmouth* imports from *Norway*, and the Ports of the *Baltic*, *Pitch*, *Tar*, *Timber*, *Hemp*, *Flax*, *Iron*, &c. and, ſince the Decline of *Ipſwich*, it has been the principal *Rendevouz* of the *Newcaſtle* Colliers and other Shipping paſſing be-

tween the North and South Parts. It alſo deals conſiderably in Coals and Malt. It was formerly reckoned to have 1,100 Ships of its own. Here is a fine Town-houſe and Cuſtom-houſe, and many handſome Buildings belonging to Merchants.

3. *Lynn*, or *Lynn-Regis*, otherwiſe called *King's-Lynn*, is a handſome, wealthy, and populous Sea-port Town, with conſiderable Shipping and Commerce, ſituated at the Mouth of the River *Ouſe*; and may contain about 2,400 Houſes, three Churches, a Chapel, a Free-School, a Work-houſe, two Hoſpitals, two public Libraries, two Diſſenting Meeting-houſes, an Exchange, a Cuſtom-houſe, and a Quay for Shipping. There are ſundry other ſmaller Towns in *Norfolk*, which are chiefly noted for Woollen Stuffs.

Both in *Norfolk* and *Suffolk* the Sea has encroached on ſome of their ancient Sea-port Fiſhing-Towns, now much decayed; whilſt ſundry other in-land Towns are much increaſed by the Woollen Manufactures.

XVII. *Cambridgeſhire*, and what is called the *Iſle of Ely*, [though in no other Senſe an Iſle than in its being a very marſhy Country ſurrounded by the *Ouſe* and other Waters] are chiefly noted for very good Paſturage, Corn, and Saffron.

1. *Cambridge*, a large Town, in a fertile but damp and flat Situation. The Deſcription of its noble Univerſity is not properly within our preſent Province. The Town has fourteen Pariſh Churches, and owes its Greatneſs intirely to the Univerſity.

2. *Wiſbich*, a Sea-port Town, has ſome Shipping and foreign Commerce.

As for *Ely*, though a Biſhop's See, it is not a City, becauſe not a Corporation; but a mere Village, in a wateriſh and unhealthy Situation.

XVIII. *Huntingdonſhire* is partly marſhy, though with fine Paſturage, Corn and Cattle. Its fenny Situation, like Part of *Cambridgeſhire*, affords great Plenty of fine freſh-water Fiſh and Wild-fowl.

Huntingdon, the Shire-Town of this ſmall County, on the River *Ouſe*, was in old Times much more conſiderable; but at preſent conſiſts only of one very long Street; with a good Market-place and Town-hall, with two Churches, but no conſiderable Manufacture, and merely a thorough-fare Town. Neither is there any other Town of Conſideration in this County, excepting *Godmancheſter* (very near to *Huntingdon)* which, tho' larger than *Huntingdon*, is chiefly noted for Maltſters and ſome coarſe Woollen Goods.

Godmancheſter.

XIX. *Bedfordſhire* is an in-land County, fertile in Grain and Cattle.

Bedford, its Shire-Town, on the *Ouſe*, is a large, populous, and well-built Town, with five Churches, a Free-School, a Charity-School, and ſeveral Alms-houſes. It has a great Trade in Corn ſent down the *Ouſe* to *Holland* by the Shipping of *Lynn*. Other Materials for Commerce formerly were Womens Straw-hats. Here is alſo good *Fuller's Earth*, ſo neceſſary for the Woollen Manufacture. Here is no other Place of Conſequence in this County.

XX. *Hertfordſhire* is in general a fertile in-land Country, plentiful in Corn and Cattle.

Hertford, its Shire-Town, has two Churches, and *St. Albans* has three Churches; yet neither of them, nor any other Town in this County, are noted for any conſiderable Manufacture. Yet they carry a great Deal of *Corn*, *Meal*, and *Malt* up to *London*, not only by the River *Lea*, from *Ware*, but likewiſe by Waggon-carriage from ſeveral other Parts of this County.

XXI. *Buckinghamſhire* has Plenty of Cattle and Sheep; and has good Bone-lace and Paper Manufactures, the former at *Buckingham* Town, *Newport-Pagnel*, *Marlow*, &c. though in other Reſpects no very conſiderable Towns.

Aileſbury is the largeſt and beſt Town in the County; and makes much fine Lace, and its famous *Vale* produces excellent Wool.

XXII. *Oxfordſhire* is a fine and fertile County.

1. *Oxford* City is large and well built, on the River *Iſis*. It is not our Province to deſcribe the illuſtrious Univerſity, to which the City owes it Original and Increaſe. Here are thirteen Pariſh Churches, beſide the Cathedral, three Charity-Schools, an Hoſpital, a fine Shire-Hall, *&c.* Yet, notwithſtanding the happy Situation of this City in a moſt plentiful Country and on a navigable River, it is, in a great Meaſure, deſtitute both of Commerce and Manufactures.

2. *Woodſtock*, a ſmall Market-Town, is only noted for a Manufacture of Watch-Chains and other Steel Wares, as alſo for Gloves and other Leather Manufactures.

3. And *Witney* is famed for its fine Blanket Manufacture.

4. And *Bampton*, for the greateſt Trade in Skins of any Part of the Kingdom.

XXIII. *Glouceſterſhire* is a fine and fruitful County, eminent for the numerous Sheep-Walks on its *Cotſwold* Hills or *Downs*, and for the fineſt of *Wool*. In its Plains there is Plenty of Corn and Timber; and it produces vaſt Quantities of Cheeſe and excellent Cyder.

1. *Glouceſter City* ſtands on the *Severn*, being a legal Sea-port, though ſo far up that River: And, although the City of *Briſtol* always has, and probably ever will, intercept and prevent its being conſiderable for naval Commerce, it has however a Cuſtom-houſe, to which Ships of a moderate Burden come up. Here are five Pariſh Churches, a Cathedral, an Infirmary, and ſundry other Hoſpitals, Charity and other Schools. It is a clean well built Place: yet its beſt Manufactures are Pins and Bell-founding.

2. *Cirenceſter* was anciently more flouriſhing than at preſent; yet it ſtill carries on a conſiderable Trade in *Wool*, and alſo in ſundry Woollen Manufactures: And, though no Corporation, it has one Free-School, two Charity-Schools, and ſome Hoſpitals and Alms-houſes; being even at this Time a larger Place than are ſundry Corporation-Towns.

3. *Tewkſbury* is a large and populous Town, on the River *Severn*, having great Manufactures of Woollen Cloth and Stockings.

4. *Newnham*, alſo on the *Severn*, has a great many Iron-works, and Woods near it; and is remarkable for having had the firſt Glaſs-houſe of any in *England*.

5. 6. *Painſwick* and *Stroud* are both good Woollen-manufacturing Towns; and the latter is famous for its *Scarlet-dye*; owing (they ſay) to the peculiar Qualities of the ſmall River of the ſame Name.—— Almoſt all the other leſſer Towns in this County have conſiderable Manufactures of Woollen, and alſo of Cheeſe.

XXIV. *Monmouthſhire*, on the other or weſt Side of the *Severn Frith*, or *Sea*, is mountainous and woody, yet not unfertile.

1. *Monmouth*, its Shire-Town, lies at the Confluence of the Rivers *Mynwy* and *Wye*; having a Harbour, and carrying on a good Trade with *Briſtol*. It is a moderately large and well-built Town.

2. *Newport*, on the River *Uſk*, has a Harbour and ſome naval Trade, being a pretty large Town.

3. *Pontypoole*, on the ſame River, is noted for its Iron Slitting-mills, its Manufacture of Iron Snuff-boxes, *&c.* And more lately for its fine Manufacture of *Tinned Iron Plates*, ſo much improved, and ſo univerſally in uſe for Kitchen-Furniture, and many other Purpoſes.

4. *Chepſtow*, on the *Wye*, has a Harbour, and a good Trade in Corn and Coals.

5. *Abergavenny* is a large and populous in-land Town, dealing much in *Flannels*.

XXV. *Herefordſhire* abounds in Corn, excellent Wool, Timber, Cyder and Salmon.

1. *Hereford City*, on the River *Wye*, is of a moderate Size, but neither populous nor beautiful; and is much decayed from what it anciently was: Yet has ſtill two Pariſh Churches, beſide its Cathedral; one Hoſpital and two Charity-Schools. Its Manufactures are only a ſmall Trade in Gloves and other Leathern Wares.

2. *Leominſter*, on the River *Lugg*, is a large and well-built Town. Its *Wool* and *Wheat* are reckoned the *beſt* in *England:* And it has ſeveral Mills and other Machines for its Woollen and Leather Manufacture.

XXVI. *Worceſterſhire* abounds in Corn, Cattle, Sheep, Fruits, River-Fiſh, and in divers Salt-Springs and Salt-Pits at ſundry of its Towns; [the Names of which here, as well as in the adjoining County of *Cheſhire*, end in *wych*, as *Droitwych*, *Middlewych*, *Nantwych*, &c.] Its beſt Towns are,

Worceſter City. 1. *Worceſter City*, ſtanding pleaſantly on the River *Severn*, contains about 2,000 Houſes, with a Cathedral and twelve Pariſh Churches, three Grammar-Schools, ſix Charity-Schools, ſeven Alms-houſes, an Hoſpital, and a Guild-hall; and may contain about or near 20,000 Inhabitants. It has divers Manufactures of fine Cloths, and of Gloves. Here is a Cuſtom-houſe and Quay, to which many Veſſels of ſmall Burden come up.

2. *Droitwych* has four Pariſh Churches, and is famous for its white Salt-pits.

3. *Bewdley* is a good Town, on the *Severn*, dealing largely in Corn, Iron Wares, Salt, Hops, Leather, *Mancheſter Goods*, &c. carried down the *Severn* to *Glouceſter* and other Parts.

4. *Kidderminſter* is a populous Town, having a conſiderable Trade in Woollen Cloths and Stuffs.

5. *Stourbridge*, on the River *Stour*, is a thriving Town, having Manufactures of Woollen Cloth, Iron, and Glaſs; and alſo a peculiar Kind of Clay or Earth for making the beſt *Crucibles*. Here is a well-endowed Grammar-School, and Library, and yet has but one Pariſh Church.

XXVII. *Warwickſhire* is a good in-land County.

1. *Warwick*, its County-Town, on the *Avon*, is a neat and pretty Place, having two Churches, three Free-Schools, an Hoſpital for decayed Gentlemen, and a Caſtle the Seat of the Earl *Brook* and *Warwick*.

2. *Coventry*, a large and populous City, having three Churches, ſeveral Meeting-houſes, a Free-School, and an Hoſpital. It had formerly a good Manufacture of Woollen Cloth; but at preſent Tammies and Ribbons are its chief Manufactures.

3. *Birmingham* is the largeſt Town in this County, moſt populous and moſt thriving, and yet is not a Corporation, (nor are its People by any Means deſiring to be ſuch.) It is not only all over *England*, but it may be ſaid likewiſe all over *Europe*, that it is eminent for its almoſt endleſs Variety of excellent and ingenious *Hardware* Manufactures; of vaſt Variety of Snuff and Tobacco Boxes, Buttons, Shoe-Buckles, Tweeſers, *&c.* with many other Sorts of Steel and Braſs Wares. For which End it is ſupplied with very cheap Coals, and all other Neceſſaries in great Plenty. It has three fine Churches, ſeveral Diſſenting Meeting-houſes; and, having lately had many new Streets added to it, it may probably contain about 30,000 Inhabitants; and at preſent much more likely to increaſe than to diminiſh.

XXVIII. *Northamptonſhire* is a very populous in-land County, extremely fruitful.

Northampton Town is a pleaſant Place, having four Pariſh Churches, two Diſſenting Meeting-houſes, two Hoſpitals, an Infirmary, and a Charity-School: Yet it has no conſiderable Manufacture, being only noted for Shoes, of which many are exported, and has alſo a Stocking Manufacture, and very good Horſes; where is the greateſt Horſe-Market in *England*. Yet *Kettering* and other neighbouring Towns; though ſmaller, carry on a more conſiderable Trade in Corn, Lace, and Shalloons, and other light Woollen Goods.

The City of *Peterborough*, though not large, drives a conſiderable Trade in Corn, Malt, and ſundry Sorts of Woollen Manufactures.

XXIX. *Rutlandſhire* is the very ſmalleſt County in *England*, remarkably abounding in Corn, black Cattle, and Sheep. It has only two ſmall Towns, *Oakham*, and *Uppingham*, Places of little Conſideration.

XXX. *Leiceſterſhire* is very fertile in Corn, Cattle, and Sheep with fine long Wool.

Leiceſter, its Shire-Town, is conſiderably large and populous, having at preſent three Pariſh Churches, [It had once 32 Pariſh Churches about the Time of the *Norman* Conqueſt; but ſubſequent Misfortunes have ſo greatly reduced their Number] three Hoſpitals, and a Charity-School. It carries on a great Trade in Stockings, Corn, and Cattle. The Stocking-frame Trade having in ſome Years yielded 60,000 *l. per Annum.*

XXXI. *Lincolnſhire*, a large County, with a very various Soil.

1. *Lincoln* City, on the River *Witham*, is an old and much-decayed Place, wherein, ſo lately as the Reign of King *Edward* VI. there were ſaid to be *fifty-two* Pariſh Churches, afterward reduced to *eighteen*, and ſince to its preſent Number of *thirteen* mean Churches. It has a ſtately Cathedral and four Charity-Schools, though but little Trade or Manufactures of any Sort.

2. *Stamford*, on the *Welland*, is a well-built and populous Town, having ſix Pariſh Churches. Its principal Trade is in Malt, Free-ſtone, and Pit-coal.

3. *Grantham* is a good Market-Town.

4. *Boſton*, a Sea-port-Town, at the Mouth of the *Witham*, is well built; and has ſome foreign Trade in *Portugal* Wines, *&c.*

XXXII. *Nottinghamſhire* is a fine County, and has in it many Woods, Foreſts, and Coal-pits.

1. *Nottingham*, ſituated on a Rock near the River *Trent*, is one of the fineſt and pleaſanteſt Towns of the whole Kingdom. It is wealthy and populous, has three Pariſh Churches and two Meeting-houſes. Its principal Manufactures are Stockings, for which it is very famous; it has good Earthen-ware; and is alſo very famous for its excellent *Malt* and *Ale*.

2. *Newark*, on the *Trent*, is a wealthy Town, and deals much in Corn, Cattle, and Wool.

XXXIII. *Derbyſhire*, though (like moſt other Counties) it has a various Soil, has however Plenty of Corn and Wood, with many Mines of Iron, Lead, Coal, and Marble.

Derby, its Shire-Town, lies on the *Derwent*, is well built and populous, having five Pariſh Churches. It is a Staple for *Wool*, and is noted for good Malt and fine Ale, the latter being exported in great Quantities. Here alſo is the moſt famous and ſurpriſingly extenſive Machine, late Sir *Thomas Lombe*'s, for throwing or twiſting of Silk, of a moſt curious Conſtruction, and a national Benefit. Here is no other Place eminent for Manufactures or Trade.

XXXIV. *Staffordſhire* is in ſome Parts barren, mountainous, and woody; in other Parts it has good Corn and Paſture; and particularly abounds in Mines of Iron and Coal.

1. *Stafford*, its County-Town, has two Churches, and ſome good Linen Manufactures; but in other Reſpects is no way eminent.

2. *Litchfield*, on the *Trent*, is a City, with a Cathedral and three Pariſh Churches. It lies low, and its greateſt Ornaments are the Edifices in what is called the *Cloſe*, viz. the Epiſcopal Palace, Prebendal Houſes, *&c.* But here are no Manufactures nor Commerce worthy of mention.

3. But

3. But *Woolverhampton* is a wealthy and populous Town, filled with Manufactures of the fineſt Lockſmiths Work in *England*, and other Kinds of Hardware.

XXXV. *Shropſhire* (or the County of *Salop)* is a pleaſant and fertile Country, abounding in Corn, Coals, Iron, and Wood.

1. *Shrewſbury* (or *Salop)* is a large, pleaſant, and well-built Town, with five Pariſh-Churches, and ſeveral Diſſenting Meeting-houſes; it is pleaſantly almoſt ſurrounded by the River *Severn*, over which it has two Stone-Bridges. It has large Manufactures of *Flannel*, called here *Welch Cottons*, and alſo of Cloth; and is noted for its *Cakes* and *Brawn*: And is ſaid to have more Gentry inhabiting it than any other mere Country-Town.

2. *Bridgnorth* ſtands alſo on the *Severn*, and is a tolerably large and handſome Town, with two Churches: It is noted for its Manufactures of Muſkets and other Iron Wares, as well as for Woollen Cloth, Stockings, and Leather.

XXXVI. *Cheſhire* is moſtly a level Country, abounding in Corn and Cattle of all kinds, and in Salt-Works.

1. *Cheſter* City on the River *Dee*, has Walls intirely round it, a Garriſon, a Cathedral, and ten Pariſh-Churches; and drives a very conſiderable Trade with *Ireland*. This City is large and populous, poſſibly containing near upon 20,000 People. It is computed annually to vend 30,000 Tons Weight of its excellent *Cheeſe*, each conſiſting of 20 Hundred Weight. *Nantwich* and *Middlewich* are two Salt-work Towns.

XXXVII. *Yorkſhire*, by far the largeſt County in *England*, is, in general, extremely fertile and plentiful in all the Neceſſaries of Life. Out of its forty-nine Towns, the following ones are the principal, *viz.*

1. *York* City ſtands on the River *Ouſe*, upon which Ships of ſeventy Tons Burden ſail up almoſt to the Bridge. *York* is very much decayed, and fallen from its ancient Splendor and Magnitude. It has ſtill ſeventeen Pariſh-Churches, though twenty-eight nominal Pariſhes, and a moſt noble *Gothic* Cathedral. It ſtands on more Ground than the City of *Briſtol*; although, in Point of Trade, Wealth, and Number of Inhabitants, (which falls ſhort of 20,000) it be greatly inferior to it; yet it is a pleaſant and noble City, with many fine public and private Edifices. It has ſtill in it a *Cotton* Manufacture, and ſome Trade by Water-Carriage on the *Ouſe*.

2. *Halifax*, upon the River *Calder*, is a very populous and very wealthy Town, eminent for its extenſive Woollen Manufactures, though we have no where met with a particular or late Account of its Magnitude, any farther than that, beſide its ancient Mother-Church, it has in its vaſtly large Pariſh, twelve Chapels, two of which (ſays the *Theſaurus Geographicus*, publiſhed *Anno* 1695) are parochial, which we do not well underſtand. It may probably contain about 20,000 Inhabitants.

3. *Leeds* is a very populous, large, and wealthy Town, having three Churches, and ſeveral diſſenting Meeting-houſes. It is moſt famous for its immenſe Woollen-Cloth Fair, where, ſay ſome, 20,000*l.* worth of Cloth is often ſold in an Hour's Time, and much of it ſhipped off at *Hull* for foreign Parts, its River being navigable by Boats to *Wakefield*, *York*, and *Hull*.

4. *Wakefield*'s Woollen Manufactures have of late ſo much increaſed it, as to be computed more populous than *York* City.

5. *Sheffield* is a very large Town, eminently famous, ever ſince King *Edward* III.'s Reign, for its Cutlery Ware; in which it is ſaid to employ 40,000 People, though not all living within the Town.

6. *Hull*, on a River of its Name, falling there into the *Humber*, is a fine old fortified Town, with a conſtant Garriſon in its Citadel.

This flouriſhing Place, ſo happily ſituated, enjoys a very large foreign Commerce, and a numerous Shipping, more eſpecially employed to the *Baltic*, and to the Northern Kingdoms, for Naval Stores, *&c.* and alſo in the Fiſheries to *Iceland* and *Greenland*: And, although it has but two Churches, (beſide ſeveral Meeting-houſes) yet it is extremely populous. It has a Cuſtom-houſe, an Exchange, a Trinity-houſe for Pilotage, a Store-houſe for Lead, a Granary for Corn, ſundry Hoſpitals and Alms-houſes, a Free-School and Charity-School. It has alſo a large inland Trade with ſundry neighbouring Counties, by means of the ſeveral Rivers at and near it. *Hull* alſo deals largely in Corn, has much Sail-Cloth manufactured at its Trinity-houſe, and Lead. Its Cuſtoms, by its foreign Trade, is reputed to amount to from 30 to 40,000*l.* It may probably contain near 20,000 Inhabitants.

7. *Burlington*, (or *Bridlington)* is a large and wealthy Sea-port Town, having a good Trade, and a ſafe Harbour, near the famous Promontory called *Flamborough-Head*.

8. *Richmond* is a large and populous inland Town, with Walls, and a Caſtle: It has two Churches; and it deals largely in the lighter Woollen Manufactures.

9. *Scarborough* is a good Seaport Town, with a ſafe Harbour and a good Trade. It is employed ſo much in the fiſhing for Cod, Herrings, *&c.* as to be able, not only to ſupply the neighbouring Countries, but alſo to ſend conſiderable Quantities beyond Sea. It likewiſe deals largely in the Coal-Trade. Its Harbour,

Harbour, and that of *Yarmouth*, are deemed the two beſt on this Side of *England*, for Shelter in Caſe of a Storm.

10. *Whitby* is a good Town, and has an excellent Harbour on the River *Eſk*, where are built a great many of the beſt Ships for the Coal-trade. Here are *Alum* Works, and a Cuſtom-houſe: And it is believed there are near 200 Ships belonging to this thriving Town.

Theſe ten Inſtances may ſuffice; yet doubtleſs there are ſeveral of the other leſſer Towns of this County, which may have ſome conſiderable Woollen, Iron, *&c.* Manufactures, needleſs here to be ſpecified.

XXXVIII. In the County or Biſhopric of *Durham*, the principal Commodities or Productions are, *Iron*, *Lead*, and *Coals*, and ſome *Linen* Manufactures at *Darlington*.

1. The City of *Durham* is an inland City, on the River *Wear*, has a Cathedral and ſix Pariſh-Churches; over that River, *Durham* has two noble Stone-Bridges. Yet it is not eminent either for Manufactures or for Commerce.

2. *Stockton*, leſs than a hundred Years ago, had ſcarcely any other Houſes but of Clay and Thatch, but is now well built, and drives a great Trade in Lead and Butter.

XXXIX. *Northumberland* yields excellent Mines of Coals and Lead.

1. *Newcaſtle*, on the North Side of the River *Tine*, is its ſtately and opulent Capital, over which River there is here a good Stone-Bridge. This Town is a County within itſelf, is extremely populous, having ſeven Churches, beſide Chapels and Meeting-houſes; has ſeveral Charity-Schools, and a large Hoſpital. The River *Tine* is its extenſive and ſafe Harbour; from whence almoſt incredible Quantities of Coals are conſtantly ſhipped off for *London*, and other Parts of *England*, as well as to foreign Parts. It is, moreover, in other Reſpects, a Place of very conſiderable foreign Commerce; has ſeveral Glaſs-houſes, a conſiderable Manufacture of Hardware, and the beſt Grindſtones in all *Europe*. *Newcaſtle* builds many Ships for the Coal-trade. Seven Miles down the River, the large Village of *North-Shields* is the noted Station for the Coal-Ships, where they take in their Ladings from the numerous Lighters called *Keels*, conſtantly going thither for that End, navigated by above 4000 Keelmen. Here is a fine Exchange, a Cuſtom-houſe, Manſion-houſe for the Mayor, a Surgeon's Hall, *&c.* and ſundry other public and private Edifices. Merchant-Ships of conſiderable Burden come up to its fine Quay, but moſt of them remain at *Shields*, ready to go out to Sea; where, at the Mouth of the *Tine*, there is a Fort well planted with Cannon, and a Garriſon. *Newcaſtle*, with *Shields*, is by many thought to contain above 30,000 People.

2. *Berwick*, at the Mouth and on the North or *Scotch* Side of the River *Tweed*, is a walled Town, with a ſtrong Caſtle and Garriſon, has two Churches. Here is great Plenty of Proviſions, vaſt Quantities of Salmon pickled for the *London* Market: Here is a Manufacture of Worſted Stockings, and an Exchange for Merchants: Yet Ships of large Burden cannot get into its Harbour, by Reaſon of a Bar at its Entrance.

XL. *Lancaſhire* is in ſome Parts fruitful, in other Parts marſhy, and in ſome other Parts ſtony and barren. Its chief natural Productions are Corn, Coals, and excellent Hemp.

1. *Lancaſter*, its County-Town, is a Sea-port, though capable only of Ships of about 70 Tons Burden: Yet, with ſuch Ships, it carries on a thriving Trade with our *American* Colonies, in Manufactures of Woollen, Hardware, *&c.* It has a Cuſtom-houſe and a Caſtle.

2. *Preſton*, a very handſome and thriving Town.

3. *Mancheſter*, on the *Irwell*, is a large, beautiful, and extremely populous Place: And though, in Point of Government, it is really but a Village, as having no higher Magiſtrate than a Conſtable; yet, in Magnitude, elegant Buildings, and Number of Inhabitants, it ſurpaſſes all the Towns, and even all the Cities of *England*, three only excepted. It is eminently famous for the Skill and Induſtry of its People, in many Kinds of Manufactures of Cotton, Dimities, Tickings, *&c.* and is by ſome ſaid to contain upwards of 30,000, and ſome others think 40,000 People. Yet, beſide ſeveral Meeting-houſes, and ſome private Popiſh Maſs-houſes, it has but one large Collegiate Church, and one Pariſh-Church. It has a College, an Hoſpital, a Library, a Free-School, and ſeveral Charity-Schools.

4. *Warrington* is a populous Market-Town, and is eminent for its Trade in Linen and Malt.

5. *Liverpool* is a large and fine Sea-port Town, at the Mouth of the River *Merſee*, with a convenient Harbour, and a fine wet Dock. It has ſo vaſt a foreign or naval Commerce, more particularly in the *Guinea* and *Weſt-India* Trade, as even to vie with, and in ſome Branches to exceed the City of *Briſtol* itſelf. It had but three Pariſh-Churches till the Year 1762, when two more were added by Act of Parliament: Here are alſo ſeveral Meeting-houſes; a Cuſtom-houſe, an Exchange, ſundry Alms-houſes, and a Work-houſe. Its Harbour is defended on the South Side by a Caſtle, and on the Weſt by a Tower, and has an Act of laſt Year's Seſſion of Parliament for making farther Improvements at it. It may have about 300 Ships and Veſſels, great and ſmall, belonging to it, including coaſting as well as foreign Trade; is thought to contain about 30,000 Inhabitants; and both it and *Mancheſter* are conſtantly increaſing, not only in ſingle Houſes, but even in intire new Streets.

XLI. *Weſtmoreland* lies (as its Name imports) moſtly in a marſhy or mooriſh Country, and other Parts of it are mountainous.

1. *Appulby*, eſteemed the County-Town, is a decaying Place, with two Churches: It is waſhed by the River *Eden*, and has very little of any thing like Trade or Manufactures.

2. But *Kendal* is a much more conſiderable Place in point of Trade, Buildings, and the Number and Wealth of its Inhabitants, and is alſo greatly inriched by its Woollen Cloth Manufactures, known for four Centuries paſt by the Name of *Kendal Cloths*, and by its Druggets, Stockings, and Hats, although it has but a ſmall Harbour on the River *Can*. It has but one Pariſh-Church, but it is ſaid to have no fewer than twelve Chapels, and may therefore probably have near 20,000 Inhabitants.

XLII. *Cumberland*, on the *Iriſh* Sea, abounds in Pit-coal, Copper, and Lead.

1. *Carliſle* is a ſmall walled and garriſoned City, on the River *Eden*; has a Cathedral, and two Pariſh-Churches. It has a ſmall Manufacture of Fuſtians; but, although it be a Sea-port, it has no foreign Commerce.

2. *Penrith*, uſually pronounced *Perith*, is a well-built and populous inland trading Town, eminent for Tanners, and for Corn and Cattle.

3. *Keſwick*, a ſmall Market-town, is no otherwiſe remarkable than for its Black-Lead Mine, by ſome, through Miſtake, ſaid to be the only one of the Kind in all *Europe*.

In the Principality of WALES are twelve Counties, *viz.* ſix in *South-Wales*, and the like Number in *North-Wales*. The whole Country is ſo vaſtly improved ſince its complete Union with *England*, as to have quite another Appearance at preſent than 200 Years ago. Its Lands well cultivated, its Towns well built and inhabited; and, although it be moſtly mountainous, it nevertheleſs affords Plenty of all the Neceſſaries of Life, either in reſpect to Corn or Cattle: It has alſo Plenty of Wood, Coals, and Turf for Fewel, and for working its Mines. The whole Principality probably containing 300,000 People.

In *South Wales*, we ſhall begin with

I. *Pembrokeſhire* is in general very fertile: It has a remarkable Kind of Fewel named *Culm*, being the Duſt of Pit-coal made up into Balls, affording a bright, laſting, and pleaſant Fire, much uſed by the Gentry.

1. The Town of *Pembroke* ſtands on one of the many Creeks of *Milford-Haven*, [one of the largeſt and ſafeſt Havens in all *Europe*, which is now fortifying by Authority of the Legiſlature, not only to be a ſafe Retreat for our Navy in Time of War, as well as for our Merchant-Ships, but likewiſe for Docks, Storehouſes, *&c.* for the Navy-Royal.] This Town of *Pembroke* has two Churches, a Cuſtom-houſe, and a conſiderable naval Commerce.

2. *Tenby* (or *Tenbigh*) has a good Herring-Fiſhery, and exports large Quantities of Coals.

3. *Haverford-weſt* is a rich and populous Sea-port Town, with a conſiderable Trade: It has four Churches, a Cuſtom-houſe, and commodious Quay for Shipping.

4. *St. David's* is a ſmall City, [ſo called as being a Biſhop's See and a Corporation] on the Sea-coaſt; but being a barren Country, it is much decayed.

II. *Caermarthenſhire* is one of the moſt fruitful Counties of *Wales*, with Plenty of Corn, Cattle, Salmon, Wood, Pit-coal, and Abundance of Lead.

Caermarthen, its Shire-Town, and its only good one, ſtands on the River *Towy*, which brings Ships up to it: It is a thriving, well-built, polite, and populous Place, with a good Trade, ſo as it may be juſtly reputed the Capital of *South-Wales*, it being the chief Reſort of the Gentry of thoſe Parts.

III. *Glamorganſhire* is partly mountainous, and in ſome Parts very fruitful.

1. *Swanſey* is a neat Sea-port Town, with a good Harbour, and carries a great Trade in Coals and *Culm*, having alſo ſome Copper-Works.

2. *Caerdiff*, a handſome, populous, and trading Sea-port.

3. *Landaff*, though a Biſhop's See, is but a mere Village, having no Corporation.

IV. *Brecknockſhire* has high Mountains, and conſequently deep Vallies; producing Corn, Cattle, and Fiſh.

Brecknock Town has three Churches, and ſome Trade in Woollen Cloth.

V. *Cardiganſhire*, on the *Iriſh* Channel, produces Grain, Cattle, Fiſh, Silver, Lead, and Copper.

1. *Cardigan* Town is reaſonably large and well built, has a very briſk Trade with *Ireland* from its River *Tivy*. And here they are ſaid to catch the fineſt Salmon in all *England*.

2. *Aberyſtwith* is a Town of ſome Trade, and is populous.

VI. *Radnorſhire* is one of the leaſt fertile of any in this Principality.

1. *Radnor* is but a mean Place; but,

2. *Preſteing* is a neat Town, dealing much in Corn and Malt;—and,

3. *Knighton* in much the ſame; as alſo in Cattle, Hops, *&c.*

In *North-Wales*,

VII. *Montgomeryſhire*, an inland County, and very mountainous.

1. *Montgomery* Town is a Place of no Eminence; but,

2. *Welchpool* is a pretty little Town, and has a good Manufacture of Flannels.

VIII. *Merionethſhire*, on the *Iriſh* Sea, though almoſt wholly mountainous, has ſome Cotton Manufactures, infinite Numbers of Sheep on its Mountains; but not one Town of any Note, though *Harlech* Caſtle is called its Shire-Town.

IX. *Flintſhire* is a ſmall County, bordering on *Cheſhire*; and, though mountainous, produces Cattle, Pit-coal, Lead, and Mill-ſtones; yet has no Town of any Account, although *St. Aſaph* be the See of a Biſhop, but is no Corporation.

X. *Denbighſhire* is a large and fertile Valley.

1. *Denbigh* Town is pretty large and populous, though noted only for Tanners and Glovers;—but—

2. *Wrexham* is the largeſt Town in all *North-Wales*, being populous and well built; and has a great Trade in *Flannels*.

XI. *Caernarvonſhire* has many very high Mountains, and diſmal Rocks. Yet, in the maritime Parts, it is tolerably fertile and well inhabited.

1. *Caernarvon* Town, ſituated on the Streight of the Sea which divides this Shire from the Iſle of *Angleſea*. It is ſmall, but well built.

2. *Bangor*, an ancient City on the ſame Streight of the Sea, anciently of great Account, but now a ſmall Town; all its Dignity at preſent being derived from its being a Biſhop's See, and as ſuch, jointly with its being a Corporation, aſſumes the Appellation of a City.

3. *Aberconway*, though ſo lately founded as the Reign of King *Edward* II. is grown up into a handſome Town.

XII. *Angleſey* Iſland and County is divided from the main Land by the above-named narrow Streight of the Sea.

Beaumaris, its Shire-Town, has a pretty good Harbour for Ships; and, by its Trade, is become a pretty wealthy Place.

The little Iſle of *Holy-head* is divided from *Angleſey* by a ſmall Streight, and is only remarkable for being the uſual Station of the Packet-boats to and from *Ireland*.

Man Iſle, lying over-againſt *Lancaſhire*, in the *Iriſh* Sea, though properly of no County of *England*, is nevertheleſs ſubject [as to its *Dominium directum*] to the Crown and Kingdom of *Great Britain*, as its Lord Paramount; but, with reſpect to its immediate Property and Revenue, [or its *Dominium utile*] it belongs to the Duke of *Athol*. Its Soil is fertile in Grain and Cattle of all Sorts: Their Products for Exportation conſiſt of Wool, Hides, and Tallow, which they exchange with foreign Shipping for Commodities they may have occcaſion for from other Parts. Its *Metropolis*, properly ſpeaking, as having a Caſtle and Garriſon, is *Caſtletown*; but *Douglas* is the beſt Town and Harbour, as being moſt frequented by Shipping. ☞ As this Iſland is the Means of much detrimental and illegal Smuggling-Trade, to the Prejudice of the national Revenue and Commerce, it ſeems to require the Conſideration of the Legiſlature, to reduce it cloſer to the Dominion of the Kingdom and Crown, ſo as to be ſubjected to the Laws as much as any other Part of *Great Britain*.

SCOTLAND.

Its nautral Productions are Corn and Pulſe of all Kinds, horned Cattle, ſmall hardy Horſes, Sheep, Hogs, Wool, Flax, Iron, Lead, Marble, Peltry, Slate, and Hemp.

It is uſually divided into thirty-one Shires and two Stewartries, and may contain 1,500,000 People, *viz.*

I. *Berwick-*

I. *Berwickſhire*, [or, in the old Stile, the *Merſe*] on the *German* Ocean, next to *Northumberland*, is fertile in Corn, and Paſturage. Its beſt Towns are,

1. *Dunſe*, a Place of the beſt Trade of this County.

2. *Kelſo*, a pretty Market-town on the *Tweed*, in a pleaſant Part of the Country; and,

3. *Lauder*, a *Royal Burgh*, [*i. e.* a Corporation immediately depending ſolely on the Crown, without any ſort of Subjection or Dependence on any Subject] with but few Manufactures.

☞ The Reader needs ſcarcely to be told, that the Town of *Berwick* upon *Tweed* was long ſince reduced to the Subjection of *England*, as a ſeparate Dominion.

Lothian, (divided into *Eaſt* and *Mid-Lothian*) the moſt fertile, pleaſant, and moſt populous Part of *Scotland*.

II. *Eaſt-Lothian* contains,

1. *Dunbar*, a well-built Royal Burgh, and a well-known Sea-port, with a good Harbour, and ſome conſiderable naval Commerce.

2. *Haddington*, a Royal Burgh, with ſome inland Trade in Corn, *&c.*

3. *Preſton-pans*, *Cockenny*, and *Seton*, Towns chiefly eminent for their Salt-works.

III. *Mid-Lothian* contains,

1. *Muſcleburgh*, a Royal Burgh and Sea-port, having ſome proſperous Woollen Manufactures.

2. *Edinburgh*, the Capital of *Scotland*. It is large, well built, and populous, having eleven large Pariſh-Churches, and about as many Epiſcopal Meeting-houſes; an eminent Univerſity, ſeveral large and well endowed Hoſpitals, a ſtately Royal Infirmary, an Exchange, a Royal College of Phyſicians, with a Phyſic-Garden; a noble and ſtrong Caſtle, with a Garriſon, a fine Royal Palace, and many handſome Palaces of the Nobility. The ſpacious Town and Port of *Leith*, containing two Pariſh-Churches, with a fine Quay and Pier running a great Way into the Sea, is the proper Port of *Edinburgh*; which has no inconſiderable foreign Trade, and a large coaſting Trade; and with *Leith*, and its other Suburbs, may fairly contain 60,000 People. *Edinburgh* is, moreover, the Seat of Government of the chief Courts of Law, and Boards of Revenue; and as it has many Perſons of Quality and Figure always reſiding in it, with ſuch Qualifications it is, and always will be, deemed a Place of polite Reſort, and moſt agreeable Converſation; even notwithſtanding the Objections of certain Inconvenſencies attending ſuch Perſons as may be neceſſarily obliged to live in the central and cloſer Parts of ſo populous a Place. [Vide *Botero*'s fine Diſtinction between a *large City* and a *great City*, *ſub Anno* 1594, of this Work.]

IV. *Linlithgowſhire* (otherwiſe called *Weſt-Lothian)* contains,

1. *Borrowſtonneſs*, on the River *Forth*, is a Port of good Commerce and Shipping; and, next to *Leith*, carries on the greateſt Trade to *Holland* and *France* of any in *Scotland*.

2. *Linlithgow*, a well-built Town, having a conſiderable Linen Manufacture, and a ruinous Royal Palace.

V. The Shire of *Tweeddale* has good Paſturage, and great Plenty of Sheep, whoſe Wool is in good Eſteem. Yet *Peebles*, on the *Tweed*, though its Shire-Town, is but an inconſiderable Place.

VI. *Selkrig* Shire and Town has nothing in it very remarkable.

VII. *Teviotdale* (or *Roxburghſhire.)*

Its beſt Town is *Jedburgh*, a Royal Burgh, having ſome good Woollen Manufactures.

VIII. *Dumfries-ſhire* is a good Country.

Dumfries, its County-Town, is a large improving Sea-port, on the *Iriſh* Sea; has two Pariſh-Churches, a conſiderable Number of good Ships, with a proportionable Share of foreign Commerce, and about 6000 Inhabitants.

IX. *Kirkcudbright* Stewartry is a large and fertile Country.

Kircudbright, its chief Town, has a good Harbour at the Mouth of the River *Dee*, and lies very commodious for Commerce.

X. *Wigtonſhire* contains,

1. *Wigton*, its Shire-Town, which, though it has a Harbour, has little Commerce. Here alſo is,

2. *Whitbern*, a *Royal Burgh.*

3. *Port-Patrick*, a ſmall Town, with a tolerable Harbour, being the uſual Port of Paſſage to *Belfaſt*, and other Parts of the North of *Ireland*.

Theſe two Counties are comprehended in the old Country of *Galloway*; which large Country of *Galloway* gives the Title of Earl to one of the noble Families of *Stewart*; although Dr. *Buſching*'s Map-maker has not ſo much as found a Place for its ſaid ancient Name on his Map of *Scotland*.

XI. The Shire of *Air* has its Shire-Town of the ſame Name; which carries on a tolerable Trade, with ſome Shipping.

2. *Irwin* is a ſmall Sea-port, with ſome Ships and Commerce.

XII. *Renfrewſhire* is pleaſant, rich, and populous, has

1. *Greenock*, a well-built Sea-port, with a good Share of foreign Trade, and the largeſt Herring-Fiſhery of any on the Weſt Coaſt of *Scotland*.

2. *Paiſley*, a large inland Town, of late Years become eminent for its fine Linen and Long-Lawn Manufactures.

3. *Renfrew* is ſmall, and not conſiderable.

XIII. The Shire of *Lanerk* or *Clydeſdale*, a fine and wealthy Country, has

1. *Lanerk*, its Shire-Town, ſtanding on the fine River *Clyde*.

2. *Hamilton*, a ſmall, but well-built and pleaſant Town, on the *Clyde*, having a fine Linen Manufacture, and a noble Palace of the Dukes of *Hamilton* near it.

3. *Glaſgow* is a large and beautifully built City, ſituated in a Plain along the River *Clyde*, in a very fertile Country. It is a City of very conſiderable foreign as well as domeſtic Commerce, having many good Ships trading to our *American* Colonies, and to many other Countries. It has many excellent Manufactures of various Kinds. It has ſeven Churches. Its proper Harbour lies ſome Miles lower down the River, at a Place named *Newport-Glaſgow*; yet ſmaller Veſſels can come up to the City, which has a moſt thriving Univerſity; and the City may poſſibly contain near 30,000 Inhabitants.

XIV. *Stirlingſhire* is a fine fertile Country, on and near the River *Forth*.

Stirling, its capital Town, ſtands on a fine Eminence, having a Stone-Bridge croſs the *Forth*. It is a large and well-built Town, with a ſtrong Royal Caſtle. Ships of ſmall Burden come up with the Tide to its Bridge. *Stirling* has very conſiderable Manufactures of Shalloons and Serges.

XV. The ſmall Shire of *Clackmannan* is a good and fertile Country, and abounds in Pit-coal beyond any other Part. Its Towns are,

1. *Alloa* or *Alloway*, a ſmall Town, with a good Harbour on the *Forth*, and ſome Commerce.

2. *Culroſs*, a Royal Burgh, on the Frith of *Forth*, with a tolerable coaſting Trade.

XVI. *Fifeſhire*, on the Frith of *Forth*, contains much Coal, and a conſiderable Number of ſmall Towns along the Sea-coaſt, with Shipping belonging more or leſs to each of them.

1. *Burntiſland* is a Royal Burgh, having a fine Harbour, and a conſiderable Linen Manufacture.

2. *Kirkaldy* is the moſt populous and thriving Burgh on all the Coaſt of *Fife*, having a conſiderable foreign Commerce, and much Shipping.

3. *St. Andrew's*, its Shire-Town, is much declined from its ancient Splendor; though it ſtill has an Univerſity, and a ſmall Harbour, but without Shipping.

XVII. The little Shire of *Kinroſs* has in it only the ſmall Town of the ſame Name, but of little Significance.

XVIII. *Dunbartonſhire*, [or *Lenoxſhire*, the ancient Appellation of it] is properly very highland and mountainous; yet has good Paſturage, and ſome fertile Spots for Tillage.

Dunbarton Town ſtands on a Bay of the Sea, formed by the Rivers *Clyde* and *Leven*; it had once a conſiderable Trade, but is now ſo much decayed as to be principally eminent only by its very ſtrong Royal Caſtle, on a high Rock, having a ſmall Garriſon.

XIX. The Shire of *Bute* conſiſts only of the Iſlands of *Bute* and *Arran*, lying in the Frith of *Clyde*. On the former ſtands the Royal Burgh of *Rothſay*. At both theſe Iſles there is a great *Herring-Fiſhery*, and their Rivers abound with Salmon and other Fiſh.

XX. *Argyleſhire*, a large highland or mountainous Country, abounding in Cattle and Sheep.

1. *Inverary*, its Shire-Town, is a Royal Burgh; as is alſo

2. *Campbelton*, with a good Harbour, and ſome Shipping, eſpecially well ſituated for and employed in the *Herring* and *Greenland* Fiſheries.

The Iſlands of *Ilay* and *Jura*, in this ſame County, yield Plenty of Corn and Cattle, Lead-Mines, and Lime-ſtones; but there are no Towns worth noting.

☞ Along the Weſt Coaſt there are Abundance of Iſles, and ſome of conſiderable Compaſs; which, for want of due Plantation, Cultivation, and Improvement, are hitherto no otherwiſe remarkable, than on account of their moſt convenient Situation for the Fiſheries for Herring, Cod, *&c.* which there ſo much abound; and which another Generation may poſſibly make of much more ſubſtantial Benefit than has hitherto been known. This Coaſt ſeeming to be like a rich Mine ſcarcely explored, and left for future Improvement. They are well known by the general Name of the *Hebrides* or *Weſtern-Iſles*; but they have no Towns worth particular Notice.

XXI. *Perthſhire* is a large County, with various Soil, though it has Plenty of Paſture, Corn, Cattle, Sheep, Flax, *&c.*

1. *Perth*, its Shire-Town, pleaſantly ſeated on the large and fine River *Tay*; it has ſome foreign Commerce to *Norway*, the *Baltic*, and other Parts, and a very improving Linen Manufacture in and near it.

2. *Dunkeld*, farther up the *Tay*; it is the beſt Market-town in the Highlands, for Linen, Wool, *&c.*

3. *Dumblain*, a little pleaſant Market-town.

4. *Abernethy*, a ſmall Town, ſaid to have been the uſual Reſidence of the *Pictiſh* Kings.

XXII. The Shire of *Forfar* [or *Angus*, its more ancient Appellation] is a fertile County in Corn, Cattle, Fruits, *&c.* and much Linen Manufactures.

Forfar is but an inconſiderable Place; but

1. *Dundee*, its proper Capital, is a large and populous Town, near the Mouth of the River *Tay*: It is a Town of conſiderable Trade, exporting much Linen, Grain, Herrings, Peltry, *&c.* to ſundry foreign Parts: It has three Churches; and may contain about 10,000 Inhabitants.

2. *Montroſe*, a pretty little Town, with a fine Harbour, good Shipping, and a conſiderable foreign Commerce.

3. *Aberborthick* is a Sea-port and Royal Burgh, though it has but ſmall maritime Commerce.

4. *Brechin*, a ſmall inland Royal Burgh, of little Trade.

XXIII. *Kincardineſhire* [or *Merns*, its ancient Name] has but an indifferent Soil, without any Town of conſiderable Note, and only along its Coaſt a Number of ſmall Sea-ports, with ſome coaſting and fiſhing Veſſels, and ſome light and cheap Woollen Manufactures, of which they export ſome to *Holland* in their ſaid Veſſels.

XXIV. *Aberdeenſhire* comprehends the anciently-named Countries of *Marr*, *Buchan*, *Garioch*, ſtill known by thoſe ancient Appellations amongſt the Natives. It is a large County, and produces Plenty of Grain, Cattle, Sheep, Wool, Peltry, *&c.* It is extremely well ſupplied with the beſt of Sea-fiſh on its own Coaſt, whereof a great deal is exported to *France* and *Italy*; and its Rivers, running into the *German* Ocean, are replete with an Exuberance of Salmon, Trout, *&c.* This County has very much Linen and ſlight Woollen Manufactures, and is moſt famous for its very fine knit Stockings.

1. *New Aberdeen*, the Shire-Town, at the Mouth of the River *Dee*, is a large well-built City, and has a good dry or Tide-Harbour: In it are, three Churches, and ſeveral Epiſcopal Meeting-houſes, a conſiderable Degree of foreign Commerce, and much Shipping, a well-frequented Univerſity, and above 12,000 Inhabitants.

2. *Old Aberdeen*, near a Mile diſtant, though almoſt joined to the other, by means of a long Village depending on neither of them, is a moderately large Market-town, but has no Haven. In each of theſe two Places there is a well-endowed College, both together being termed the Univerſity of *Aberdeen*, although quite independent on each other.

3. 4. *Kintore* and *Inverurie* are two ſmall inland Royal-Burghs on the River *Don*, of little Trade.

5. And *Old-Meldrum*, though no Corporation, is a better Town than either of them, having good Woollen Manufactures, and a very great Trade in Wool and Linen.

6. *Peterhead*, a Sea-port, with a good Trade for Grain and Fiſh, and ſome Shipping for *Norway*, *&c.*

XXV. *Banffſhire* has plenty of Grain, Cattle, Sea and River Fiſh, and a conſiderable Linen Manufacture.

1. *Banff*,

1. *Banff*, its Shire-Town, a ſmall Royal Burgh, and Sea-port, though of but ſmall Commerce.

2. *Fraſerſburgh*, a Port-Town, with a good Harbour, and ſome Trade to *Norway*, with Meal, Malt, and Grain.

3. *Portſoy*, a pretty Village, having a good Fiſhery and a conſiderable coaſting Trade.

XXVI. and XXVII. The Shires of *Elgin* and *Nairn* conſtitute both Parts of the fine and plentiful Country having the ancient Appellation of *Murray* or *Moray*, moſtly a plain level Country, abounding with the fineſt Wheat (beyond many Counties of a more ſouthern Situation) and other Grain, with great Plenty of all other Neceſſaries, as Cattle, Sea and River Fiſh.

1. *Elgin*, its ancient Shire-Town, is a Royal Burgh, but no Sea-port; yet has ſome Manufactures.

2. *Nairn*, a ſmall Royal Burgh, having an Harbour, and ſome coaſting Trade.

XXVIII. *Inverneſs-ſhire* contains the Town of that Name, having a good Harbour, a fine Stone-Bridge over its River *Neſs*, and a thriving foreign and coaſting Trade. In it are two Churches.

At the Weſt-Highland Town of *Maryburgh*, or *Inverlochy*, ſtands a Royal Fort, with a Garriſon, named *Fort-William*, where are ſome Shipping, chiefly for ſupplying the Garriſon and Neighbourhood with Neceſſaries.

XXIX. and XXX. The Shires of *Cromarty* and *Tayne* conſtitute the largeſt County in *Scotland*, known ſtill by its ancient Appellation of *Roſs*; in it are many upland Parts, and on its Weſt Sea-coaſts, a rugged, rocky, and mountainous Country, but is better toward the Eaſt Sea-coaſt.

1. *Cromarty* is a ſmall Royal Burgh, with one of the beſt Harbours in *Great Britain*, admirably well fitted for Trade and Fiſhery; but has very little Commerce, excepting a mere coaſting Trade.

2. *Tayne*, a ſmall Sea-port, with ſome coaſting Trade.

3. *Chanry*, a ſmall Town, with a Harbour, but very little Trade.

4. *Dingwall*, a ſmall Sea-port Town on the Bay of *Cromarty*, of little Trade.

To this extenſive County belongs the large and tolerably well peopled Iſland of *Skye*, divided from the Weſt Shore of the Country by a very narrow Strait of the Sea.

From this Iſle is carried on a very great *Herring-Fiſhing*, and alſo from ſome neighbouring Iſles. *Skye* has ſo much Grain as to be enabled therewith to ſupply a good Part of its neighbouring Continent.

Round the yet larger Iſle of *Lewes*, (and its many *Bays*) lying farther Weſt in the Ocean, there is an Exuberance of the beſt of Fiſh of all Kinds, as Herring, Cod, Ling, Skate, Haddock, *&c.* It is reckoned near 100 Miles in Length, ſtretching from South to North, including its South Part called *Harris*, joined to it by a narrow Iſthmus: [But ſurely, alſo, *South* and *North Uiſt*, (ſeparated from *Lewes*, indeed, by but narrow Streights) muſt be included in ſo large a Length as this Extent.]

☞ In Times of Peace and Tranquillity, would it not well merit the ſerious Conſideration of our Legiſlature, to improve and better people ſuch vaſt Tracts of Land, and thereby add much Strength and *real* Dominion to our *Britiſh* Empire? And, as ſo many Thouſands of Highlanders muſt be diſmiſſed upon the Reduction of our Forces, what Part of the Earth can be ſo proper for them to be ſettled in as their own native Climate, with ſome reaſonable Encouragement till they can help themſelves?

XXXI. The Shire of *Sutherland* (or *Dornoch*) produces ſmall Cattle, Sheep, Wool, Hides, Skins, Tallow, and immenſe Quantities of both Sea and River *Fiſh*; yet has no Town of any Note but *Dornoch*, which is, however, but an inconſiderable one, though a Royal Burgh!

Strathnavern, a Part of the Weſt Side of this Shire, is very mountainous, and has only ſmall Villages in it.

XXXII. The Shire of *Caithneſs*, which joins with *Bute* for ſending one Repreſentative to Parliament, though the fartheſt North County of the Iſland of *Great Britain*, is yet a better Soil than ſome Counties more ſoutherly, and they ſpeak the *Engliſh* Tongue, to the very fartheſt Point of the Land, more intelligibly than in ſeveral other Counties.

1. *Wick* is its Shire-Town, and a Royal Burgh, with a good Harbour, but little Trade.

2. *Thurſo*, a ſmall Sea-port, with a tolerable Harbour pointing to *Pentland Frith*, which ſeparates the *Orkneys* from the Continent.

Here is *Dungsbay* [i. e. *Duncanſbay*] *Head*, projecting North-eaſt into the ſaid *Frith*, and is the very fartheſt Promontory or Point of Land of the whole Iſland of *Great Britain* Northward.

XXXIII. The *Stewartry* (or *Shire*) of *Orkney* and *Shetland*, conſiſts of the two great Cluſters of Iſles going reſpectively by thoſe two general Appellations, in the Northern Ocean.

That of *Orkney* conſiſts of twenty-eight Iſles, though not all intirely inhabited. The largeſt and beſt inhabited, being twenty-four Miles in Length, is named *Pomona*, (for what Reaſon it is ſomewhat hard to gueſs) and,

and, conſidering its very northern Latitude, is well cultivated and fertile. Its chief Town is *Kirkwall*, a Royal Burgh, having ſome Trade and ſmall Shipping. The Products here conſiſt of Grain, Cattle, Hides, Tallow, Lead, Salt, coarſe Cloth, and Stockings, Bed-feathers, ſalt Fiſh, *&c.* And the other leſſer Iſſes are generally well enough ſupplied with Grain, Cattle, Fiſh, *&c.*

That of *Shetland* contains forty-ſix Iſles, beſide what, in the old *Norvegian* or *Norſe* Language, are called *Holms*, (*i. e.* mere Rocks.) The largeſt has obtained the obvious Name of *Mainland*, (or, as ſome *Dutch* Maps call it, *Hetland)* being near ſixty Miles in Length, and ſixteen in Breadth. People here are, for the moſt Part, employed in Fiſhing, knitting of Stockings, or in making a coarſe Kind of Woollen Cloth, with which they ſupply the *Dutch* and other foreign Fiſhing-Veſſels. Here are two ſmall Towns, *Lerwick* and *Scalloway*; the former being the chief, lies near the noted Harbour or *Sound* called *Braſſa-Sound*, and conſiſts of about 300 Stone Houſes, there being no Timber to be found here growing, nor any Sort of Fruit growing higher than their Garden-Walls, becauſe of their nipping Froſts. Moſt of their other Iſles are inhabited, and many of them have Pariſh-Churches. The *Hollanders* and *Hamburgers* Herring-buſſes drive a conſiderable Trade with the Natives, for their coarſe Woollen Goods, in exchange for their Money, Liquors, *&c.* and Ships from *Ireland*, *Scotland*, and *Orkney*, bring them Meal, Barley, and Malt. *Scalloway* is a ſmaller Place on the ſame chief Iſle.

IRELAND.

The Kingdom of *Ireland* is a fine and fertile Iſland, abounding in all the Neceſſaries and Conveniencies that a reaſonable Man can wiſh for, Wine only excepted. In it are to be found ſundry large and opulent Cities, a great Number of handſome and well-traded Towns, and many valuable Materials for Commerce.

I. Of the four great Diviſions of the Kingdom, we ſhall begin with that which is beſt inhabited, *viz.* the fine Province [once Kingdom] of *Leinſter*, on its Eaſt Side directly oppoſite to *Wales.*

In this Province are contained,

1. *Dublin*, its ſuperb Capital, and the famous Metropolis of the whole Kingdom. Of this City it has been very frequently and confidently aſſerted, That, ſince the Year 1711, or, as others, three Years later, or ſince the Acceſſion to the Crown of the illuſtrious Houſe of *Hanover*, it has ſo rapidly increaſed, as, in ſo ſhort a Space, to have added to her Suburbs no fewer than 4000 Houſes, and 30,000 Inhabitants. As it is the Seat of Government, it may eaſily be ſuppoſed to have in it many noble Edifices, Corporation-Halls, Hoſpitals, Charity-Schools, Alms-houſes, beſide fourteen Pariſh-Churches, many Proteſtant Meeting-houſes, and even more Popiſh Maſs-houſes; (by them called Chapels.) An Archbiſhopric, one Cathedral, and one Collegiate Church; a Royal Caſtle, a thriving Univerſity, ſeveral fine Squares, and ſundry beautiful Bridges croſs its River *Liffy*. It ſtands in ſo good a Country as enables it to export many Materials for Commerce, and particularly great Quantities of Salt Proviſions, Hides, Tallow, Butter, and Cheeſe, but principally of late Years an almoſt incredible Quantity of Linen of various Sorts, to the great enriching of *Ireland*. *Dublin*, therefore, with all ſuch Advantages, cannot fail to have a great Commerce, and a numerous Shipping; and may probably contain about 100,000 Inhabitants; much about the Size of *Stockholm*, *Copenhagen*, *Berlin*, *Marſeilles*, and our own *Briſtol.*

2. *Wexford*, a large, well-built, and well-traded Sea-port, with a good Harbour and Shipping.

3. *Kilkenny*, a pleaſant and reaſonably large inland City, and ſome conſiderable Commerce.

4. *Roſs*, a Town, with a tolerably good Trade.

5. *Trim*, on the *Boyne*, has alſo a tolerably good Trade.

II. The Province of *Ulſter* lies to the North of *Leinſter*. Here it was that *Ireland*'s vaſt Linen Manufactures took its Riſe amongſt the *Scots* long ſettled there, and where it ſtill moſt peculiarly flouriſhes beyond any other Part of that Kingdom. This alſo is the only one of *Ireland*'s four capital Provinces wherein the *Proteſtants* out-number the *Papiſts*; occaſioned by the Deſcendents of the numerous *Scots* who long ago ſettled and were often recruited here, being all Proteſtants; and they equally outdo their *Popiſh* Neighbours in Point of Sobriety and Induſtry. The beſt Places here are,

1. *Drogheda*, (otherwiſe written *Tredagh)* a ſtrong and populous Town at the Mouth of the River *Boyne*, has a good Harbour, and carries on a good Trade with the North Part of *England.*

2. *Armagh* is eſteemed the moſt fertile County in *Ireland*, yet the Town, (or, if it will pleaſe better, the City of that Name) though the Seat of an Archbiſhop, who is Primate of all *Ireland*, is at preſent a poor Place, or mere Village, having in Queen *Elizabeth*'s Time been deſtroyed by the Rebel *O-Neale*, and has never ſince been able to recover its ancient Luſtre.

3. *Belfaſt*, a good Sea-port and trading Town at the Mouth of the *Lagenwater.*

4. *Downpatrick* has a flouriſhing Linen Manufacture.

5. *Carickfergus* (or *Knockfergus)* is by ſome deemed the capital Town of the Province, has a good Harbour and Caſtle, but little Commerce. Theſe Places lie oppoſite the North Parts of *England.*

6. *Derry* [or *Londonderry*, as it is moſt uſually called] ſtands on *Lough-Foyl*, is a ſtrong little City, having ſome Linen Manufactures, with ſome Commerce and Shipping. And this extreme North Part of *Ireland* is ſituated ſo near to *Scotland*, that they are in Sight of each others Coaſts.

6. *Donnegal*, the County Town of the ſame Name, (otherwiſe called the County of *Tyrconnel)* is a Place of ſome Trade; as is likewiſe *Enniſkilling*. All which Places, and many more, (tho' leſs conſiderable ones) are chiefly, and moſt induſtriouſly, employed in the Manufactures of Linen and Linen Thread, to the great Benefit of the whole Kingdom, which, by its vaſt annual Exportations of Linen into *England*, is enabled to pay for the great annual Importations from *England* into *Ireland*; and likewiſe to render the Money conſtantly drawn from *Ireland* into *England* by her Abſentees, leſs grievous to her.

III. The Province of *Connaught*, lying on the Weſt Side of *Ireland*, is, in ſome Parts, very fertile, but, in others, it is covered with Woods and Bogs. It lies moſtly Weſt of the great River *Shannon*, and is the leaſt *populous*, leaſt *induſtrious*, and moſt *Popiſh*, of any of the four capital Provinces of *Ireland*. Its beſt Places are,

1. *Sligo*, on a Bay of that Name, having a Caſtle and a convenient Harbour.

2. *Athlone*, a fortified Town, on the River *Shannon*, with a Market.

3. *Roſcommon*, a Market-town, with a Fair.

4. *Galway*, a good Town, the Capital of *Connaught*, a Biſhop's See, with a fine Harbour, and ſome ſmall Commerce.

5. *Tuam*, though an Archbiſhopric, is merely a Village.

IV. The Province of *Munſter* is the moſt Southern Part or Diviſion of *Ireland*; and, next after *Dublin*, has the four beſt Places of that Kingdom, for foreign Commerce and Shipping, *viz*.

1. *Cork*, by far the nobleſt City next to *Dublin*; whether conſidered in reſpect to Magnitude, Riches, Commerce or Shipping; every one of which are truly great. More eſpecially its Commerce to our *American* Plantations is exceeding great, for Salt Proviſions of all Kinds, but Fiſh.

2. *Waterford*, the third City of *Ireland* in the four before-named Reſpects, [but not, as *Buſching*'s new Geography alleges, the ſecond City of the Kingdom.]

3. *Limerick* is a handſome, populous, well-traded and ſtrong City, on both Sides the *Shannon*, a Place of good Commerce and Shipping.

☞ The preciſe Magnitude, or the Number of People in theſe three Cities, (as they truly merit to be denominated) we have exhibited (with *Dublin)* in the Body of our Work, under the Year 1760.

4. *Kingſale* is a populous and ſtrong Town, with an excellent Harbour and conſiderable Commerce and Shipping: And it is, moreover, occaſionally a Station for the Navy-Royal; for which End there reſide at this Port proper naval Officers, Storehouſes, *&c.*

5. *Caſhel*, a Place of ſome Conſideration; the See of an Archbiſhop.

6. *Clonmell*, a fortified and Parliament Town.

7. *Kilmallock*, a good Town.

8. *Dingle*, a good Market Town.

9. *Youghall*, a well-inhabited Town, with a good Harbour, and ſome Trade and Shipping.

10. *Baltimore*, a ſmall Town with a good Harbour.

Many of the Places in *Ireland* where Cathedrals are placed, (as alſo ſeveral of thoſe in *Scotland*, where formerly there were ſuch) being no better than *mere Villages*, we have not therefore honoured them ſo far as to term them Cities; ſince, without being ſo much as a Corporation in an *Engliſh* legal Senſe, they cannot, by any Propriety, be termed Cities, as we have already noted under *Ely* and *Landaff*.

FRANCE.

France is undoubtedly one of the fineſt Countries upon Earth, in point of Soil, Climate, and Fertility. Yet, like all other extenſive Countries, it has many barren Tracks and Mountains. In ſome Parts it yields an Exuberance, and in all a Sufficiency of the Neceſſaries and Conveniencies of Life. Corn, excellent Wines, Salt, Olives and their Oil, Cyder in her northern Provinces, many Kinds of fine Fruits in general, and *Bourdeaux* exports whole Ship-loads of Prunes.——Capers are chiefly in the Country about *Toulon*.——Flax and Hemp in the *French Netherlands*, and other Parts.——Wool in moſt Provinces.——Silk, cultivated with great Succeſs in *Provence* and *Languedoc*.——In *Normandy* and *Auvergne*, Plenty of horned Cattle and Mules.——In *Burgundy*, *Normandy* and *Alſace*, the ſtrongeſt Horſes.——*France* is ſupplied with Ship-timber from *Alſace*, *Burgundy* and *Lorrain*, and more eſpecially, alſo, from the *Pyrenean* Mountains; yet it is ſaid, that in the other Provinces, a Scarcity of Timber, and of Wood for Fuel, begins to be ſenſibly felt.——*France* boaſts of Mines of Copper, Lead and Iron, and alſo ſome Silver Mines and Marble Quarries.——In all Parts they make Saltpetre. Theſe we may term her natural Products. Her Manufactures and Improvements are very numerous. The ſingle City of *Tours*, in King *Louis* XIV.'s Reign, abounded ſo much in the Silk-manufacture, as to have had 8,000 Looms and 800 Mills conſtantly employed.——In *Lyons* (according to Doctor *Buſching)* there were formerly 18,000 Looms, but were in the Year 1698 decreaſed to 4,000, [doubtleſs owing to their expelling their in-

France's general and particular Productions and Manufactures.

duſtrious Proteſtants, and to *France*'s War with *England*, *Holland* and *Germany*.] Their woollen Cloths and Stuffs more eſpecially at *Abbeville* are ſaid to be little inferior to thoſe of *England* and *Holland*, aſſiſted by the clandeſtine Importation of *Engliſh* Wool.——*Abbeville* is alſo noted for its Manufactures of Linen, Sail-cloth and Soap.——*Auvergne* for fine Thread, Lace and Stuffs, and for Paper accounted the fineſt in *Europe*.——*Niſmes* for fine Serges and Stuffs.——*Cambray* for Cambricks, and *St. Quintin* for Lawns.——In *Picardy* are the fineſt Glaſs-Manufactures.——In other Parts are fine Manufactures of Gold and Silver Stuffs, Embroideries, ſewing Silk, Sattins, Crapes, Laces, Toys, millenary Wares, Tapeſtries, Pluſh, Hats, Parchment, Hard-ware, Pot-aſh, Pitch, Oils of Olives, Turpentine, Lintſeed and Almonds, Brandy, Raiſins, &c. For her inland Trade, her navigable Rivers and Canals, more eſpecially that called the *Canal Royal*, in *Languedoc* are great Conveniencies. *France*'s coaſting Trade, from one Port to another, is alſo very conſiderable.—Her foreign Trade extends, or lately did extend, and, we may be aſſured, will again very ſoon extend, to every Part of the known World, either by Land or by Sea. Her Land Trade to *Switzerland* and *Italy* is by the Way of *Lyons*.—To *Germany*, through *Metz* and *Straſburgh*.—To the *Netherlands*, through *Liſle*.—To *Spain*, (a moſt profitable one) through *Bayonne* and *Perpignan*. As for her naval Commerce, her Ports in the Channel and on the Weſtern Ocean are frequented by all the trading Nations of *Europe*, to *France*'s very great Advantage, more eſpecially reſpecting what is carried on with *England*, *Holland*, and *Italy*.——The Trade from her *Mediterranean* Ports (more particularly from *Marſeilles*) with *Aſia* and *Africa*, has long been very conſiderable. The Negroe Trade from *Guinea* ſupplies her Sugar Colonies; beſide the Gold, Ivory and Drugs got from thence.—And her *Eaſt-India* Commerce, till lately, has been extremely proſperous.

France produces within herſelf moſt of the Materials for Ship-building.——*Deſlandes* lately made the Number of her Seamen to be 70,000, as they were before her laſt War with *England*.——Before her laſt two Wars ſhe was in a formidable naval State; but it will require great Expence, and much Time and Application, to reſtore her Marine to its former Condition.

Number of *France*'s People, &c.

Although the People in *France* have frequently been computed to amount to twenty Millions, yet all its extenſive Provinces are not ſufficiently peopled, occaſioned by its long and ruinous Wars, and the Expulſion of ſo vaſt a Number of her Proteſtant Subjects, whereby her People are thought by ſome to be reduced to ſeventeen Millions. Her Eccleſiaſtics are computed to amount to above 190,000 Perſons, with an annual Income of a great Deal above one hundred Millions of Livres. Her Convents, of both Sexes, are about 1,200 in Number.

French Netherlands.

To begin with the *French Netherlands*:

French Flanders.

French Flanders contains the Caſtellany and City of *Liſle*, [or *Ryſſel*] which is not only a moſt extenſive and important Fortreſs, with an excellent Citadel, but is a large City containing near 100,000 People, 30 Churches, (ſays Doctor *Buſching*, 50 ſays Mr. *Nugent*) and many Convents. *Liſle* carries on a great Trade in Manufactures of Silk, Camblets, Cloths, Stuffs, Linen, &c. and is ſo fine a City as to be termed *Little Paris*.

2. *Douay*, a moderately large and ſtrong Place, with eight Churches, ſeveral Convents, and an Univerſity. At its annual Fairs are vended great Quantities of Worſted Camblets and other Stuffs.

3. *Cambray*, on the *Scheld*, is a large and ſtrong City, having ten Pariſh-Churches, &c. It was long famous beyond any other Place, for the fine Linen to which it gave its Name, though of late it is ſaid, other Parts in this Reſpect excel it.

4. *Dunkirk* is an exceeding ſtrong Place, with a fine Citadel; its Harbour is extremely improved, having two Moles of Piles forming a Canal in the Sea, of 1,000 Fathoms in Length and 40 in Breadth, ſo as a Ship of 70 Cannon may paſs through it, and at the End of each of thoſe Moles are Batteries, and other Forts and Caſtles were erected on each Hand, betwixt all which Forts, Ships were to paſs in their Way to the Harbour, contiguous to which was a large Baſon: It had a flouriſhing Trade; and Doctor *Buſching* relates, that in the Year 1706, it contained 1,639 Houſes, and 14,274 Inhabitants.——For the Safety of *England*'s Commerce, however, *France* was obliged to ſtipulate, at the Peace of *Utrecht*, *Anno* 1713, to deſtroy all *Dunkirk*'s Fortifications, and at her own Charge alſo to fill up its Harbour. *Anno* 1717, it was ſtipulated, at the *Hague*, betwixt *England*, *France* and *Holland*, that the large Entrance to the new Sluyce at *Mardyke* ſhould be intirely demoliſhed, and that no Harbour, Sluyce nor Baſon, ſhould ever be made either at *Mardyke* or at *Dunkirk*, nor within two *French* Leagues round. Notwithſtanding all which, *France*, as uſual, egregiouſly trifled with ſuch Stipulations. At the laſt Peace of *Aix-la-Chapelle*, *Anno* 1748, thoſe Demolitions were again ſtipulated to be performed; but ſhe was ſo far from doing it, that underhand ſhe began ſome new Works, the Town was again fortified on the Land-ſide, the Baſon was widened and rendered as commodious for Shipping as ever before, and all this done in the Face of the whole World; and ſo it remains to this Day. Yet, by the Vth Preliminary Article, it is again to be demoliſhed, as formerly ſtipulated.

5. *Graveline*, a ſmall but ſtrong Town.

6. *Bourbourg*, a ſmall Town, much reduced by the Calamities of War, &c. though it has ſtill two Convents.

7. *St. Wynoxberg*, a ſtrong Place: And,

8. *Caſſel*, the Capital of a large Caſtellany containing ſundry little Towns.

2. *French Hainault* contains,

1. *Valenciennes*,

1. *Valenciennes*, a large, ſtrong and populous Town, on the *Scheld*, with a conſiderable Trade in Manufactures of Linen, Silk, Mohair-Goods and Tabbies. And it has many Churches and Convents.

The *French* Part of the County of *Namur* contains only,

1. *Charlemont*, a fortified little Place: And,

2. *Givet*, a modern handſome Town, regularly fortified.

The whole *Netherland* Province of *Artois* is intirely poſſeſſed by *France*, and is one of its fineſt Provinces. It is fertile in Grain, Flax, Hops, and Wool, has conſiderable Linen Manufactures, Tapeſtry, *&c.*

1. *Arras*, its Capital, is a large, ſtrong and fine City, formerly peculiarly eminent for its fine Tapeſtry-Hangings, named from this City, as being here invented: Although in our Days they come ſhort of thoſe of *Paris*, *Bruſſels* and *Antwerp*. This City has alſo Manufactures of Sayes, and other light Woollen Stuffs, Linen, *&c.* And Mr. *Nugent* thinks that the Churches and Chapels are above 100, including thoſe of their many Convents.

2. *St. Omer* is alſo a conſiderable Place, and of ſome Trade, having a Cathedral, and ſix Pariſh-Churches, two Colleges of *Jeſuits*, a celebrated Abbey, and ſeveral Convents.

3, 4. *Aire* and *Bethune* are very ſtrong Fortreſſes, but little is to be found in them of Commerce or Manufactures, though they contain many Churches and Convents. Only *Bethune* has two conſiderable annual Fairs.

The adjoining Province of *Picardy* is a fine Country.

1. *Amiens* is its chief City, and is a large and beautiful one on the *Somme.* Here are manufactured great Quantities of Ferret-ribbons, half-Silk Stuffs, Linen, Soap, and ſundry other Manufactures. It is populous, and has many Churches and Convents.

2. *St. Quentin* is likewiſe a conſiderable Place, with many Churches and Convents: But is principally noted for the vaſt Quantities of its Manufactures of *Lawn*, which employ great Numbers of People.

3. *Abbeville*, on the *Somme*, the Tide riſing ſix Foot here, it has a great Trade in Grain, Oil, Flax, Cordage and Soap. And its fine Woollen Cloth Manufacture has been famous ever ſince the Year 1665, when it was firſt eſtabliſhed by *Van Roble* from *Holland.*

4. *Calais*, though not large, yet carries on a conſiderable Trade in Wines, Brandies, Salt and Flax.

Iſle of France.

The next adjoining Province, Southward, is that called the *Iſle of France*, and is doubtleſs a fine and pleaſant Country, replete with all Neceſſaries and Conveniencies.

Paris, a ſummary View of it.

Paris, its Capital, and alſo the Capital of the whole Kingdom, is a moſt ſuperb and magnificent City. Its Streets (according to Doctor *Buſching*) are computed to amount to 912. And its Houſes from four to ſeven Stories high, to above 20,000, excluſive of Churches, Chapels, Convents, Colleges, Communities, Warehouſes and Shops. Doctor *Buſching* adds, (in which either he, or elſe his *Engliſh* Tranſlator, is undoubtedly miſtaken) that the Number of its Inhabitants cannot greatly exceed 400,000. For from the Year 1728, to the Year 1736, the Medium of her annual Bills of Mortality was but 17,800: And (continues he) it is calculated, upon very probable Computations, that of 25 Perſons in this City, one dies yearly. [This is contrary to our moſt uſual Computations in *England*, *viz.* that even in great and populous Cities there dies but one out of 30 yearly.] Poſſibly, however, our ſaid learned and otherwiſe judicious Author, may have taken into this Computation the great Number of Murders and of Foundling Children there, which may perhaps bring his Suppoſition nearer to Fact: But as, under the Years 1760 and 1761, we have more fully handled this Particular, we muſt refer thereto.

We ſhall not ſo much as offer at a full Deſcription of this truly great City, of which enough is publiſhed in all *European* Languages; our Province being circumſcribed within the narrower Bounds of commercial Conſiderations, we ſhall only very briefly obſerve, that [although we cannot join abſolutely with one of King *Francis* I.'s Miniſters, who being aſked by the Emperor *Charles* V. then at *Paris*, which was the fineſt City of *France?* replied, *Orleans:* And, upon that Emperor's Surprize, anſwered, like a true *Frenchman*, that *Paris* was rather a *World* than a ſingle City!] *Paris* has in it all the uſual Allurements of great and magnificent capital Cities, and perhaps more than moſt others have, for attracting the Reſort and Admiration of Foreigners, from almoſt all the different Countries of *Europe*; either reſpecting its public and private Edifices, Squares and Streets, or the Amuſements of Plays, Operas and Maſquerades, the Splendor of the Court of ſo potent an abſolute Monarch, *&c.* And is, for thoſe and ſuch-like Reaſons, not only reſorted to, (with which we do not find Fault) but too long reſided in by many of our young Nobility and Gentry, not ſeldom to the Diſſipation of their Eſtates, and too often of their Morals and Principles. Here are to be found the fineſt Manufactures of Gold and Silver Stuffs, the fineſt Tapeſtry of the *Gobelins*, the moſt ſplendid Equipages, the moſt exquiſite Paintings, Sculpture, Embroidery and Statuary; and with all thoſe Allurements, are to be ſeen much Poverty and the other Concomitants of abject Deſpotiſm.

☞ And here we may add, that, as we have, in this brief Introduction to the commercial Deſcription of *France*, given a ſummary View of its principal Manufactures, Productions and Commerce; and have, in

A neceſſary Remark concerning the external Shew or Appearance of moſt Cities in *Popiſh* Countries, compared with thoſe in *Proteſtant* Countries.

in the following Account, exhibited likewiſe a ſummary View of its principal Cities and great Towns, both inland and maritime; we may, for Brevity's Sake, be excuſed from the particular Deſcription of ſundry leſſer Cities and Towns, moſt of which diſplay little elſe but a Kind of ſplendid Poverty, after abſtracting from ſuch Places their Cathedrals, Churches, Abbeys and Convents; although, in point of the Compaſs of Ground they may ſtand on, they would, in other Countries, paſs for very conſiderable Places. We have made much the ſame Remark concerning *Munſter* in *Germany*, which might likewiſe be made of ſundry other Cities of that and other Parts of *Chriſtendom*, where Popery is triumphant, and their Clergy rich and numerous; whereas in Proteſtant Countries it may be obſerved, that, as there are few eccleſiaſtical Edifices in their Cities and Towns, but what are for God's Worſhip in a parochial Way, ſuch Places do not generally appear ſo ſplendid, although they may contain much more of Wealth, Commerce and Manufactures than thoſe other Places, gay in external Appearance, though, in Reality, their Lay-Inhabitants are oft-times found to be poor and abject even in *France*, and much more in *Spain*, *Portugal* and *Italy*.

The *Environs*, or Country about *Paris*, is allowed to be conſiderably leſs populous than the Environs of *London*. In the ſaid Province, named the Iſle of *France*, are ſeveral Towns, though with ſmall Commerce, as, *Corbeil*, its principal Trade being in Skins.——*Senlis*, in Wool.——*Compiegne*, chiefly trading in Corn, Wool and Timber.——*Noyon*, its principal Trade is in Grain, though it has no fewer than ten Pariſh-Churches, beſide a Cathedral, two Abbeys, two Convents, *&c.* Many of the reſt of its Cities and Towns, are only generally deſcribed by the Number of their Churches, Convents and Abbeys, without any Thing relative to Commerce or Manufactures, and therefore we think it beſt to ſay nothing of them; and the like may be ſaid of very many called Cities and great Towns, in the other Provinces of *France*.

Beauvais, however, is a conſiderable City in this Province, wherein is a very conſiderable Manufacture of Tapeſtry and of Woollen Cloths and Serges. It contains a Cathedral, ſix Collegiate-Churches, thirteen Pariſh-Churches, three Abbeys, *&c.*

Dourdan, a ſmall Town, famous for its Manufacture of Silk and Woollen Stockings.——*Melun* trades to *Paris* in Corn, Meal, Wine and Cheeſe.

In the Government of *Champagne* and *Brie*, is,

1. *Rheims*, its large capital City, it carries on a conſiderable Trade in the excellent Wines of this Province, and in Woollen and Silk Stuffs, and fine Ginger-bread. Beſide its grand Gothic Cathedral, it has many fine Pariſh-Churches, three Collegiate ones, five Abbeys, a fine College of Jeſuits, nine Convents, and ſundry Charity Foundations.

2. *Troyes*, though ſomewhat decayed, has ſtill fourteen Churches, and carries on a Trade in Linen and Canvas, in Flax and Hemp, Canvas, Fuſtians, Serges, Tapeſtry, Needles, Grain and Wine.

3. *Langres* is noted for much Cutlery Wares.

4. *Meaux*, the Capital of the Province of *Brie*, (which was once a large Foreſt) its Traffic is principally in Grain, Wool and Cheeſe.

5. *Sedan* (once a famous Academy of the *French* Proteſtants) has Manufactures of Cloth and Serge.

The Government of *Metz* comprehends the other two Cities of *Toul* and *Verdun*, all, with their Diſtricts and leſſer Towns, conquered from the *German* Empire.

Metz is a large and ſtrong City, at the Confluence of the *Moſelle* and *Seille*, it has three Chapters, ſixteen Pariſh-Churches, beſide Convents, *&c.* and ſome conſiderable Trade in Salt-works, *&c.* Here are great Numbers of *Jews*, who have a Synagogue in it. The other Towns in this Diſtrict have ſome inconſiderable Trade.

Toul and *Verdun* are alſo large Cities and Biſhopricks, and were formerly Imperial Cities.

Lorrain and *Bar* are Countries fertile in Grain, and have alſo Mines of Iron, Copper, Tin and Silver; they have alſo many profitable Salt-ſprings.

Nancy, its capital City, has ſix Churches and nineteen Convents.

In the Government of *Burgundy*.

In *Burgundy* Dutchy there is a great Fertility of Corn and Fruits, and excellent Wines.

Dijon, its Capital, is a large and ſtrong City, having a Parliament, ſixteen Churches, and many other public Structures. It deals much in *Burgundy* Wines. Other leſſer Towns here deal alſo in Wines, and have ſome Woollen Manufactures and Salt-works.

In *Burgundy* County, or *Franche Compté*, is *Bezançon*, its Capital, and is large, fair and ſtrong, containing many Churches, Convents and other public Edifices. It deals largely in Wines and excellent Corn. It contains a famous Univerſity, and is the Seat of a Parliament. Here alſo are many leſſer Towns, dealing in Hemp, Wines, and Minerals of various Kinds.

The Government of *Alſace* is doubtleſs a fine Country, abounding in Grain, Fruits, Wines, Flax, Hemp, Tobacco, Tartar, Saffron. It alſo has Mines of Silver, Iron, Lead and Copper. It is ſaid to contain 1,000 Market-towns and Villages, and half a Million of People.

Straſburgh, its (once renowned) Capital, ſtands on a Branch of the left Side of the *Rhine*, and was (whilſt a free Imperial City) large and populous. It at preſent contains about 3,200 Houſes, 4,300 Families, and 40,000 Inhabitants. It is much declined in Commerce and Wealth, ſince it fell into the Poſſeſſion of *France*, as have alſo the ten lately Imperial Cities of this great Province, for the ſame Reaſon.

The Government or Province of *Normandy* is one of the moſt fertile in *France*, abounding in Grain, Fruits, Flax, Hemp, Salt, Iron and Copper Mines, Woad and other Vegetables for Dyers, fine Paſtures and good Cattle. They have little and alſo very indifferent Wines, ſo that their uſual Drink is Cyder and Perry.

In *Upper Normandy* is,

1. *Caudebec*, a ſmall but populous Sea-port, on the Right of the River *Seine*; once famous for a Manufacture of Felt-hats, and it has ſtill ſome naval Commerce.

2. *St. Valery*, a large Market-Town, having a ſmall Harbour on the *Engliſh* Channel.

3. *Dieppe*, on the ſame Coaſt, eminent for Sea-faring People, and for Lace-manufactures and Ivory-works: Some think it contains 30,000 Inhabitants.

4. *Rouen*, on the *Seine*, is the Capital of *Normandy*, the Seat of a Parliament, and Univerſity, a large and populous City, containing 7,200 Houſes, 36 Pariſh-Churches, and 56 Convents. It has a very conſiderable Commerce, both maritime and inland; Veſſels of 200 Tons can ſail up with the Tide to its great Quay. It is a Magazine of valuable Merchandize to be diſperſed over a great Part of *France*. It contains 125 Streets, beſide Squares and public Edifices.

5. *Caen* is the ſecond Town in *Normandy*, containing 12 Churches, an Univerſity, and 14 Convents; its principal Trade is in Woollen Cloth, Stuffs and fine Linen; which alſo, though in a leſſer Degree, are the Manufactures of other ſmaller Towns of this Province.

6. *Bayeux*, on the River *Aure*, has 17 Churches, and ſundry Convents and Hoſpitals, but thin of Inhabitants, becauſe of little Commerce.

7. *Le Havre de Grace* is a ſtrong Town, at the Mouth of the *Seine*, with a good Harbour; it was firſt built by King *Francis* I. and its Proſperity has proved the Ruin of its Neighbour *Harfleur*.

The large and fine Province of *Bretagne* contains many good Cities and Towns, *viz.*

1. *Rennes*, an inland City, on the River *Villaine*, being the Capital of this Province, and is large and populous.

2. *Nantes*, on the great River *Loire*, is one of the moſt conſiderable trading Cities in the Kingdom, being large and well ſituated for naval Commerce; it has a great Trade to the *French American* Colonies, as alſo to *Spain*, *Portugal* and other Parts. Ships of great Burden can get no farther up the *Loire* than to *Painbeuf*, a Market-town, where their Cargoes are put into ſmaller Veſſels, and carried up to *Nantes*.

St. Malo, a ſmall but ſtrong and populous City, on a little rocky Iſland in the Sea, but joined to the Continent by a fortified Mole and Cauſeway. In peaceable Times it carries on a conſiderable Trade with *England*, *Holland* and *Spain*; and in Time of War is conveniently ſituated for privateering, as *Engliſh* Traders have often fatally experienced; and is commonly termed one of the Keys of *France*.

4. *Vannes*, a conſiderable Sea-port on *Morbian Bay*, but though it has a very good Harbour, it is not particularly eminent for Commerce.

5. *Port Louis* had its preſent Name and Fortifications from King *Louis* XIV. its former Name having been *Blavet*, ſeated on a River of that Name: Its preſent Trade is in Eels and Pilchards.

6. *Port L'Orient* is a modern Town near *Port Louis*, higher up the oppoſite Side of the River *Blavet*; ſolely deſtined for the Reception and Conveniency of the *French Eaſt-India* Company's Shipping, Warehouſes, naval Stores, Docks, Wharfs, *&c.* and well fortified.

7. *Morlaix* is a ſmall Sea-port privateering Town, in War Time, and in peaceable Times carries on ſome naval Commerce.

8. *Breſt* is a ſmall but very ſtrong Town and Port, with a moſt ſpacious and fine fortified Road and Harbour, the beſt and ſafeſt in all the Kingdom: Yet its Entrance is difficult, by Reaſon of many Rocks lying under Water. At *Breſt* is a Court of Admiralty, an Academy for Sea-officers, Docks and Magazines for all Kinds of naval Stores, Rope-yards, Sail-lofts, Storehouſes, *&c.* Inſomuch that it may now be termed the capital Receptacle on the Ocean for the Navy-Royal of *France*, and is admirably well adapted for that End.

The ſmall Iſles of *Oueſſant*, or *Uſhant*, lye near *Breſt* Bay, on one of which there is a Light-houſe for the Conveniency of Ships going into or coming out of *Breſt*, and a Fort.

Belle-Iſle is, on all Sides, environed with Rocks, excepting at its three Landing-places; at one of which lies its fortified Town of *Palais*.

The ſmall Iſle of *Sain*, on this Coaſt, is very dangerous, by Reaſon of Rocks and Shallows about it.

And the Iſle of *Bas*, lying oppoſite to the City of *St. Pol de Leon* on the Continent, forms a fine Road. All this Coaſt abounds in Pilchards.

In this noble Province there are more good Ports, either adapted for War or for Commerce, than in any other of the Kingdom.

In the inland Counties of *Maine* and *Perche*, is,

1. The City of *Mans*, containing 16 Pariſh-Churches, 12 Convents, and other public Edifices, and 15,000 Inhabitants, but nothing elſe memorable.

2. *Mortagne* has 4 Churches and as many Convents, and has ſome conſiderable Manufactures of coarſe Linens.

In the Government of *Poictou*, are,

1. *Poictiers*, its Capital, an inland City, on the River *Clain*; it is of a large Extent, and full of Churches and Convents. Its Manufactures are Gloves, Combs, Woollen Caps and Stockings for the *American* Colonies.

2. The Iſles of *Noirmoutier* and of *Yeu* lye on this Coaſt; the former is populous, and has two little Towns; but the latter has nothing memorable.

The Government of *Orleanois*, though intirely inland, yet, by means of the great River *Loire*, it carries on the moſt extenſive Trade, in its Kind, of any Part of the Kingdom, and by means alſo of the Canal of *Briaire*, begun by King *Henry* IV. and compleated by his Son *Louis* XIII. by which the *Loire* is joined with the *Loing*, which falls into the *Seine*, whereby a Water-communication is formed between the Countries on the *Loire* and the City of *Paris*: Alſo by means of another Canal, beginning a ſmall Way above the City of *Orleans*, being in Length about 18 Leagues, with 30 Sluyces on it, and ending in the *Loing*. This was begun in 1682, and compleated in 1692.

1. The City of *Orleans* ſtands on the *Loire*, over which it has a fine Stone Bridge. It is one of the largeſt Cities of the Kingdom, though, for the moſt Part, but meanly built. It contains 22 Pariſh-Churches, and many Convents, Hoſpitals, and other public Edifices, an Univerſity, a Cathedral, *&c.* Its Situation, in the Midway up the *Loire*, renders it the Magazine of almoſt the whole Trade of the Kingdom, more eſpecially reſpecting Grain, Wines, Brandy and Spices. Here is alſo a conſiderable Trade in Stockings and Sheepſkins, and here alſo are ſome Sugar-bakers. Other conſiderable Cities in this Province are *Chartres*, *Blois* and *Vendome*, of which we can ſay little, conſidering they lye in ſo fine a Province, but that they abound in Churches and Convents.

The Government of *Saumur*, (on the *Loire*) contains *Saumur*, its Capital, much more opulent when poſſeſſed by the Proteſtants, than at preſent, though it ſtill has three Pariſhes and nine Convents; but nothing memorable in a commercial Senſe.

The Government of *Anjou*, Eaſt of *Bretagne*, produces Grain, Flax, Coals, Iron and Saltpetre, has for its Capital,

Angers, a large and populous City, with a Cathedral, 16 Pariſh-Churches, and many Convents. Mr. *Nugent* makes its Houſes amount to 9,000, and its Inhabitants 36,000. It has Manufactures of Serges, Camblets, and other Stuffs, and a conſiderable Trade in general.

The Government of *Nivernois*.

It is an inland Country, lying on the Weſt Side of *Burgundy*, and produces Wines, Grain, Fruits, ſome Iron-mines, and Plenty of Wood and Pitcoal.

Nevers, on the *Loire*, is its only conſiderable City; has eleven Pariſh-Churches, a Cathedral, and ſeveral Convents. It is celebrated for its Porcelane and Glaſs-manufactures and Enamel-works.

The Government of *Bourbonnois* has Corn, good Wine and Fruits, and is eminent for its Mineral Waters.

Moulins, its beſt Town, has nothing eminent in a commercial Senſe.

The Government of *Berry* lies South of the *Orleanois*; and, beſide Grain, produces Wine, which in ſome Parts is ſaid to be equal to that of *Burgundy*; alſo good Wool, Hemp and Flax.

1. *Bourges*, its Capital, has ſo many Collegiate and Pariſh-Churches, Convents, Abbeys, *&c.* that the Clergy and their Dependants conſtitute the Majority of its Inhabitants; and therefore has very little of any Thing like Commerce.

2. *Chateaux-Roux* has four Churches, three Convents, and a conſiderable Woollen Cloth Manufactory.

The Government of *Touraine* lyes Weſt of *Orleanois*, and is ſo delightful a Country as to be termed the *Garden of France*, abounding with Grain, Wines, fine Fruits, Iron and Copper.

Tours, its Capital, on the *Loire*, is a large City, having conſiderable Manufactures of Cloth of Gold, Silk, and Woollen Cloth.

From the Money firſt coined here, and ſtill current throughout *France*, aroſe the Denomination of Livres, Sols, and Deniers *Tournois*.

The Government of *Auvergne*, an inland Country, South of *Bourbonnois*; its lower Part is fertile, and abounds in Grain, Wine, Fruits, Forage, Saffron and Hemp: But *Upper Auvergne* is cold, its Mountains Tops being covered with Snow ſeven or eight Months in the Year, and yet is ſaid to have excellent Paſtures. This Country carries on a great Trade in Manufactures of Silk, Woollen Cloth and Stuffs, beautiful Laces, and Paper deemed the fineſt in *Europe*.

1. *Clermont*, the Capital of *Lower Auvergne*, is a fine, large and well-built City, a Cathedral, with many Churches and Convents.

2. *St. Flour*, in the Upper Province, ſtands on a Mountain; yet its Carpets, Woollen Cloths, and Knives, are much eſteemed, as are alſo thoſe of *Aurillac* and *Clermont*.

The Government of *Limoſin*, Weſt of *Auvergne*.

Limoges, its Capital, is but a mean Place; yet in ſome other ſmaller Towns, here are Manufactures of Woollen Cloth and Paper.

In the Government of *La Marche*, Weſt of *Auvergne*, there are no eminent Towns, yet they have ſome Manufactures of Tapeſtry.

The Government of *Saintonge* and *Angoumois* is ſituated to the North of the great River *Garonne*; abounds in Grain, Wines and excellent Salt.

1. *Saintes*, Capital of *Saintonge*, on the *Charente*, is but a mean Town.

2. *St. Jean d'Angely* makes Woollen Stuffs and fine Brandy.

3. *Angouleſme*, on the *Charente*, has a Cathedral, 12 Pariſh-Churches, 10 Convents, a *Jeſuits'* College, and a general Hoſpital. The Country of *Angoumois* adjacent produces Grain, *Spaniſh* Corn, Wine, Saffron, ſome excellent Iron-mines, and fine Paper.

The Government of *Aunis* lies South of *Saintonge*. It is reckoned a barren Part of *France*, and yet produces good Grain and Wine, and the very beſt of Salt; it has many Swamps in it, yet good Harbours along its Coaſt, particularly,

1. *Brouage*, a ſtrong but ſmall Sea-port, moſt eminent for its excellent Salt, made in its neighbouring Salt-marſhes, in vaſt Quantities; as has alſo *Marennes*, another Sea-port, which produces excellent Wine.

2. *Rochfort*, a modern ſtrong-built Town, on the River *Charente*; has an excellent Dock for Shipping, large Magazines of naval Stores, a Royal Marine Academy, and an Hoſpital for Seamen.

3. *Rochelle*, a famous Sea-port, the Capital of *Aunis*, has a good Harbour, though rather a fine than a large City: Here is an Admiralty, a Chamber of Commerce, a Sugar-Refinery. *Rochelle* carries on a great Commerce in Wines, and alſo more eſpecially to the *French American* Colonies, and their *African* Settlements.

The Iſles on this Coaſt, are,

1. *Oleron*, famous for its ancient Sea-Laws, as it is, to this Day, for good Seamen. It is a fruitful Iſland.

2. *Rhee* has Plenty of Wine, and very good Brandy, exported from its ſmall fortified Town named *St. Martin's*.

3. *Aix Iſle*, at the Mouth of the *Charente*, on which there was a Fort for the Defence of the Entrance to that River, till it was demoliſhed, *Anno* 1757, by the brave Captain *Howe*.

The Government of *Lyonois* produces Grain, Wine, Fruits, Copper and Vitriol.

1. *Lyons*, its great Capital, may, next to *Paris*, be deemed the largeſt, and, for an inland City, the richeſt and moſt trading City of the Kingdom. It is ſeated at the Confluence of the two famous Rivers *Rhoſne* and *Saone*, having two wooden Bridges over the latter, and one of Stone over the *Rhoſne*. In point of Magnitude, it is about a fourth Part of *Paris*; has two fine Squares, a fine Town-houſe, an Exchange, a fine Arſenal, many Churches, Convents and Hoſpitals. The Bulk of its Inhabitants are Manufacturers of Gold, Silver and Silk Stuffs, and of Gold and Silver Lace. Formerly the Looms in and about this City amounted to about 18,000; but in the Year 1698, their Number was found to be reduced to 4,000; though it is ſtill in great Repute for the before-named Manufactures, and for the beautiful Luſtre of its Bombazins. Its Trade, in brief, extends not only all over *France*, but even to *Spain*, *Italy*, *Switzerland*, *Germany*, the *Netherlands*, and [according to Doctor *Buſching*] to *England*.

2. *St. Eſtienne de Furens*, a large and populous Town, and carries on a great Trade in Hardware, being their principal Manufacture.

In the Government of *Guienne* and *Gaſcony*.

The Country abounds ſo much with Vines, that they ſtand propped, almoſt like Trees, in the open Fields.

1. *Bourdeaux*, its Capital, on the River *Garonne*, is a City of great Commerce, where (for its Preſervation and Improvement) the *Engliſh*, *Dutch*, *Danes*, *Hamburghers*, and *Lubeckers*, though Proteſtants, are connived at in the private Exerciſe of their Religion in their own Houſes, as are likewiſe the *Portugueſe Jews*. *Bourdeaux* is reported to export annually 100,000 Tons of Wine; beſide Brandy, Cheſnuts, Prunes, Figs, and many other Sorts of Merchandize. That City is thought to contain about 50,000 Inhabitants.

2. At *Blaye*, on the *Garonne*, going up to *Bourdeaux*, Ships are obliged to leave their Cannon and Arms, till they return: And the *Garonne* being there very wide, there is a Battery on an Iſland, beſide a Fort on either Shore. At *Bourdeaux* is an Univerſity and a Parliament; it has many fair Streets, Markets, Churches, Convents and charitable Foundations.

3. The leſſer Towns of *Aiguillon*, *Clerac*, *Marmande*, &c. carry on a conſiderable Trade in Hemp, Tobacco, Grain, Wine and Brandy.

4. *Montauban* is a large, handſome and polite City, on the River *Tarne*; its principal Trade conſiſting in Silk and Woollen Stuffs: It contains about 18,000 Inhabitants.

Gaſcony conſtitutes the South Part of this Government, of which

Bayonne is a conſiderable fortified Sea-port, with a fine Harbour, and well frequented by Shipping. It has a conſiderable Trade in Wines, in *Spaniſh* Wool brought over the *Pyrenean* Mountains on Mules, in Return for *French* Sugars. Hither alſo is brought down in Floats, from the Rivers running between the *Pyrenean* Mountains, Timber for Ship-building, thence afterward ſent to *Breſt* and other Ports.

In *French Navarre* and *Bearn*, the only Town of Note, is,

Pau, its Capital, which produces good Wine, and has a Woollen Manufacture.

In the Government of *Languedoc*, the fineſt Province in *France* for Health and Fertility, there is Abundance of Corn, Wine, Oil, Fruits, Salt, Saffron, Glaſs, Soap, Marble, Metals, and Minerals: But its Coaſts are dangerous, and want good and ſecure Harbours. The grand Royal Canal of this Province, intended to join the Ocean with the *Mediterranean* Sea, from *Toulouſe* to *Agdé* on the *Mediterranean*, ſo as Ships might paſs from one Sea to another, was executed between the Years 1666 to 1680; a Work much to the Credit of *Louis* XIV. Yet it is doubted by ſome, whether the Expence of keepit in Repair does not over-balance its Advantages.

1. *Toulouſe*, its Capital, is pleaſantly ſeated on the *Garonne*, which ſome think is, next to *Paris*, the largeſt City in *France*, having a great Number of fine Churches, Convents, *&c.* Yet its Trade is but inconſiderable, being chiefly in *Spaniſh* Wool, *Bergamo* Carpets, and ſome ſlight Woollen Stuffs. Here is a famous Univerſity: And at Half an Hour's Diſtance below *Toulouſe* (ſays *Buſching)* the celebrated Royal Canal before-mentioned joins the *Garonne*, which here becomes navigable.

In ſeveral leſſer Towns of this noble Province there are fine Woollen and Silk Manufactures; as at *Clermont*, *Alais*, *Marvejols*, &c. and excellent Wines.

2. *Montpelier*, next after *Toulouſe*, is the largeſt City of this Province; and, by Means of the River *Lez* and the Lakes near it, carries on, at the Harbour of *Cette*, the greateſt maritime Trade of this Province, tho' not of very great Conſideration, *viz.* Wines, and (in good Years) Corn for *Italy* and *Spain*, Oils and Cloth to *Switzerland*, *Germany*, and the *Levant*,—dried Cheſnuts and Raiſins to *Tunis* and *Algiers*. *Montpelier*'s principal Staple is *Verdigris*, in which it carries on a very conſiderable Trade, as alſo in *Aqua Vitæ*, and *Hungary* and *Cinnamon Waters*, Fuſtian, and Woollen Carpets.

3. *Nimes* is likewiſe a large City, having ſuch a Number of Manufactures of Cloth and Silk, (and of Stuffs, formerly known by the Name of *Serge de Nimes)* as exceeds that of all the reſt of the Province.

Narbon and *Beziers* ſtand pleaſantly, but have little Commerce. But *Beaucaire* has a *Fair*, which holds for ten Days, and is very famous for the vaſt Quantities of *raw Silk* ſold at it. And at *Alais* the Quantity of *unwrought Silk* carried out of it yearly is ſaid to amount to 1,200,000 Pound Weight.

In the County of *Rouſſillon*, its Capital, is the ſtrong Fortreſs of *Perpignan*, a Frontier on the Side of *Spain*; but neither in it, nor in any other Part of this County, is there any memorable Commerce nor Manufactures.

In the Government of *Provence* are,

1. *Aix*, its capital City, and an Univerſity. It is large, fair, and well-built, having in it ſeveral fine Churches, Convents, *&c.* Its Neighbourhood yields good Wine and incomparable Oil of Olives, with which it drives a great Trade. Here alſo are ſome Stuffs manufactured.

2. *Arles* is a large City on the *Rhoſne*; but (according to Dr. *Buſching*) is no way remarkable for Trade or Manufactures, having an unhealthy Situation.

3. *Marſeilles* is a large, opulent, and ancient City, being one of the greateſt in *France*, conſiſting of near 100,000 Inhabitants. Here the Royal Gallies are uſually built and ſtationed; but its Harbour cannot admit of Ships of above 600 Tons Burden. Here is a large Arſenal, Store-houſes, Docks, *&c.* for the King's Gallies. Gold and Silver Stuffs are here manufactured: But this City's higheſt Renown is from its great maritime Commerce; ſeeing almoſt all the Trade of *France* with *Spain* and *Italy*, and the intire Commerce with the *Levant* is carried on from *Marſeilles.*

To *Italy*, *France* ſends Cloths, Serges, Honey, Prunes, Figs, Capers, Olives, Oil, Sail-cloth, *Aqua Vitæ*, and Cotton Manufactures; and brings back Rice, Corn, Sulphur, Aniſe, Manna, and Silk; leaving a Balance in Favour of *Italy* of 200,000 Livres (ſays Dr. *Buſching.*) [A Balance ſurely ſo ſmall as may be difficult to aſcertain.]———To *Spain*, *France* exports all Kinds of Linen, Silk, and Woollen, Gold and Silver Stuffs, Thread and Lace, with ſeveral other both Home and *Levant* Commodities, to the Amount of above *nine* Millions of Livres: but its Imports from *Spain* are leſs by *two* Millions. [This is indeed a conſiderable Balance in Favour of *France.*]———*Marſeilles*'s Trade for *raw Silk*, &c. to the *Levant*, is very great, [*i. e.* to *Salonichi*, *Athens*, the *Archipelago-Iſles*, *Conſtantinople*, *Smyrna*, *Aleppo*, *Tripoli* in *Syria*, *Candia*, *Cairo*, and *Alexandria*] both with reſpect to Exports and Imports. Nevertheleſs, *Marſeilles* lies under the Diſadvantage of having near the Entrance into its Harbour a rocky Cape of ſome Danger and Difficulty.

4. *Toulon*, a modern Sea-port of very great Conſequence, become a conſiderably large City from an inconſiderable Town, through King *Louis* the Fourteenth's Application for fortifying it and its Harbour, for the Reception and Protection of the Navy-Royal. Its old and its new Harbour lie contiguous, and, by Means of a Canal, Ships paſs from the one to the other, both of them having an Outlet into the ſpacious outer Harbour. Its Arſenal, eſtabliſhed alſo by that King, has a particular Store-houſe for every particular Ship of War, its Guns, Cordage, *&c.* being ſeparately laid up. Here are ſpacious Workſhops for Blackſmiths, Joiners, Carpenters, Lockſmiths, Carvers, *&c.* Its Rope-walk of Stone is 320 Toiſes in Length, with three arched Walks.——Its general Magazine ſupplies whatever may be wanting in the particular Store-houſes, and contains an immenſe Quantity of all Kinds of Stores, diſpoſed in the greateſt Order.

In the Government of *Dauphiné* is,

1. *Grenoble*, its Capital, a populous inland City; but not remarkable either for Trade or Manufactures.

2. *Vienne*, an ancient but decayed City, at preſent chiefly memorable for the making of Anchors, Sword-blades, and other Iron and Steel Manufactures. It has likewiſe a Paper Manufacture.

3. *Orange*, the Capital of a Principality of that Name, is not particularly remarkable for Trade, nor for Manufactures.

The ſmall Diſtrict of *Avignon* lies within the Bounds of *Languedoc*, though near this Country; but has for ſeveral Centuries been ſubject to the Papal See, governed by a Legate appointed by the Pope.

Avignon, its capital City, on the Right of the River *Rhoſne*, is reckoned a large and beautiful Place; is walled, but carries on little Traffick. But you need not doubt of its being well filled with Churches, Chapels, Abbies, Convents, Jeſuits Colleges, *&c.* alſo a Court of Inquiſition, an Archbiſhopric, and an Univerſity.

P O R T U G A L.

Portugal is conſiderably more temperate than *Spain*; yet, although the Soil be very fruitful, ſo much is Agriculture neglected, that above half the Country lies waſte, inſomuch that they are ſupplied with moſt of their Corn by Importation. It abounds indeed with good Wine, Oil, Honey, Wax, Oranges, Lemons, Pomgranates, Figs, Raiſins, Almonds, Cheſnuts, and other excellent Fruits; and much Sea-ſalt, and Sea and River Fiſh. It is in moſt Parts mountainous, and in them are contained Silver, Copper, Tin, and Iron Ores: Yet no Mines are worked in *Portugal*; and they are ſupplied more eaſily with Gold and Silver from their foreign Plantations. Here are many Kinds of Gems, a beautifully variegated Marble, good Mill-ſtones, and a remarkable Mine of *Saltpetre* on a Hill near *Liſbon*.

Number of People in *Portugal*.

Dr. *Buſching* relates, That it was carefully and very accurately computed, in the Year 1732, there were in *Portugal* 3,344 Pariſhes, and 1,742,230 Lay-Perſons, (which is but 522 Laity to each Pariſh on a Medium) beſide about 300,000 Eccleſiaſtics of both Sexes; ſo that at moſt there may be *two Millions* of People in *Portugal*.

Although the *Portugueſe* are poſſeſſed of ſome fine Materials for Manufactures, they diſpoſe of them rough to Foreigners. They are equally neglectful of Arts and Handicrafts: Yet they manufacture a little Linen, and ſome coarſe Silk and Woollen: They have a Variety of Straw-work; and they candy and preſerve ſeveral Kinds of Fruits.——Her Commerce, though ſeemingly extenſive, proves of little ſolid Benefit to her; as the *European* Nations trading with her engroſs all the Productions of her Colonies as well as her own native Commodities, as her Gold, Diamonds, Pearls, Sugars, Cocoa-nuts, fine Red-wood, Tobacco, Hides, and the Drugs of *Braſil*; her Ivory, Ebony, Spices, and Drugs of *Africa* and *Eaſt-India*; in exchange for the almoſt numberleſs Manufactures, and the vaſt Quantity of Corn and Salt-fiſh, ſupplied by thoſe *European* Nations and by our own *North-American* Colonies.

Portugal in her own Shipping has but little Trade with other *European* Nations: The principal Uſe ſhe makes of them being the carrying of ſuch great Quantities of Negroes as there is a conſtant Demand for from her noble Colony of *Braſil*, and ſome of her Shipping are alſo ſent to her *once flouriſhing* ones in *Eaſt-India*, tho' now of ſmall Importance to her. But from *Braſil* it is computed, That the King's *Fifth* of Gold alone amounts to 300,000 *l.* *Sterling* annually, or one Year with another; all the Gold of that Colony coming little ſhort of two Millions *Sterling* yearly.

Portugal's beſt Cities and Towns, beginning Northward from *Gallicia*, are,

1. *Viana*, a ſtrong and well-built Sea-port, containing about 7,000 Inhabitants; but its Harbour is only proper for the Admiſſion of ſmall Veſſels.

2. *Porto*, (or *Oporto*) on the River *Douro*, is a large trading City; but there is a Bar at its Harbour which is ſomewhat dangerous and difficult, on Account of ſome Sand-banks and certain Rocks. In Opulence, Populouſneſs, Commerce, and Beauty, it is the next City to *Liſbon*, containing (according to Dr. *Buſching*) above 20,700 Inhabitants; yet others make it conſiderably larger, even ſo far as to amount to 50,000 Inhabitants. It is here the Trade to *England* for *Portugal* Wines chiefly centers, to a great many *thouſand* Tons annually.

3. *Braga* is an inland City, containing about 12,300 Inhabitants, an ancient Archiepiſcopal Cathedral, and four Pariſh Churches, beſide Convents.

4. *Coimbra*, a pretty inland City and Univerſity, on the River *Mondega*, having nine Pariſh Churches and 11,900 Inhabitants.

5. *Liſbon* City, on the *Tagus*, in Latitude 38 Degrees, 25 Minutes, according to Dr. *Buſching*, does not at moſt exceed 150,000 Inhabitants, although others carry them to 200,000. The Air here is temperate and healthy. It had in it many fine Palaces, and other fair public and private Edifices, before moſt of them were overthrown in the calamitous Earthquake *Anno* 1755.

Its Trade, and the vaſt Navigation to and from it are ſo very conſiderable, that its Cuſtom-houſe is the principal Source of the King's *European* Revenues. Here is the grand Magazine of all the Merchandize which the *Portuguſe* import from their foreign Colonies. The Harbour is extremely ſpacious, deep, ſecure, and convenient, and has two Entrances. The City is walled, having thereon 77 Towers and 36 Gates. In its Center, on one of its Hills, ſtands a Citadel, commanding the whole City. Cloſe by the Sea, at the Diſtance of three *Portugueſe* Miles from the City, both the Entrances to the Harbour are defended by two Forts, the one, named *St. Julian*, on a Rock in the Sea, the other, named *Bogio*, to the South, is built on Piles on a Sand-bank. Two Miles from *St. Julian* and one from *Liſbon* ſtands the Fort of *Belem*, which commands the Entrance into the City, and where all the Ships coming up the *Tagus* muſt ſtop and give an Account of themſelves: And directly oppoſite, on the South Side, ſtands the Fort of *St. Sebaſtian*, on the Angle of a Mountain, all along which, a little Way on the other Side of the City, the Paſſage is defended from the Beginning of the Harbour by a Chain of twelve Forts.

6. *Abrantes*, a finely ſituated and fortified Town, higher up the *Tagus*, contains about 3,500 Inhabitants. The Country between *Liſbon* and this Town yields a moſt delicious Proſpect, is extremely fertile, and is particularly noted for the Excellence of its Peaches.

7. *Santarem*, on the *Tagus*, lies in a delightful Plain, containing a Citadel, thirteen Churches, and as many Convents; but Dr. *Buſching* (from whom we have this Account) does not tell us the Number of its Inhabitants.

8. *Setuval*, (commonly called *St. Ubes* by the *Engliſh* and *Dutch*) is a very ſtrong Town, on a ſmall Bay of the *Ocean*, with a Harbour capable of Ships of any Burden. It has four Churches and ten Convents, and a noted Salt-Office; this Place being famous for ſupplying immenſe Quantities of Salt to foreign Nations.

9. *Evora* is an inland City, with an Univerſity; having about 12,000 Inhabitants, five Churches, and ſeveral Hoſpitals and Convents.

10. *Eſtremos*, a ſtrong Town, having about 6,500 Inhabitants, three Churches, ſix Convents, and an Hoſpital.

11. *Beja* has 6,200 Inhabitants, four Churches, ſeven Convents, and an Hoſpital.

12. *Elvas*, a ſtrong frontier Town, has four Churches, ſeven Convents, and an Hoſpital.

13. *Olivença*, another frontier Town, having two Churches, one Convent, and an Hoſpital.

In the little Kingdom of *Algarve* there are vaſt Quantities of Wine, Oil, Corn, Almonds, Figs, and other Fruits.

1. *Lagos* is a ſtrong Port-Town, of about 2,600 Inhabitants, two Churches, and four Convents.

2. *Tavira*, another ſtrong Sea-port of 4,700 Inhabitants, two Churches and five Convents.

3. *Faro*, a modern Fortification and Sea-port of 4,500 Inhabitants, two Churches, four Convents, and an Hoſpital. It is ſeparated by an Arm of the Sea from *Cape St. Maries*.

PORTUGAL's *European Iſlands*, viz.

In the *Atlantic Ocean*, though, ſtrictly ſpeaking, they are not properly within the Bounds uſually deſigned to *Europe*, though near it, are the two Iſles of, I. *Porto Santo*; it is five *Portugueſe* Miles in Length and two in Breadth, its principal Town of the ſame Name containing about 600 Inhabitants.

II. *Madeira*, near the other, is eighteen *Portugueſe* Miles in Length and above four in Breadth. Its principal Town is *Funchal*. Here is a conſiderable Trade from ſeveral Nations for its very good Wines; great Quantities whereof are ſent to our *Weſt-India* Colonies, and alſo much is conſumed in *England*; the original Plants of which were brought from the Iſle of *Candia*. This Iſle is well defended by Forts.

III. The *Azores*, or *Tercera Iſles*, (called alſo the *Weſtern Iſles*) are *nine* in Number, *viz.*

1. *Santa Maria*, or *St. Maries*, has a ſmall Town named *Porto*.

2. *St. Michael*, having two principal Harbours, named *Ponta del Gada* and *Villafranca*; being the beſt peopled of all theſe Iſlands, containing about 50,000 Inhabitants; and great Plenty of Corn, Millet, and Wine. *Ponta del Gada*, its chief Town, has an open Harbour, defended by a Fort; and has three Churches and ſeven Convents.——*Villafranca* Town has two Pariſh-Churches and two Convents.——Here are alſo four other pretty good Towns.

3. *Terceira* has *Angra* for its chief Town. Dr. *Buſching* calls it a populous City, well fortified, with handſome broad Streets; and it contains a Cathedral, five Pariſh-Churches, a Poor-houſe, an Hoſpital, and eight Convents.——Here alſo are ſome other Towns in this Iſland.

4. *St. George* has three or four ſmall Villages or Towns in it.

5. *Gracioſa* has two ſmall Towns on it.

6. *Fayal*'s chief Town is *Villa de Horta*. ☞ This Iſle gives Name to ſome of the beſt Wine of theſe Iſles.

7. *Pico* is viſible at a great Diſtance, by Reaſon of its high Mountain, ſaid to be three Miles in Height. It carries on a great Trade in its excellent Wines; the principal Port-Town being *Villa das Lagens*. Here alſo is a Trade in Cedar-wood, and in a certain Red-wood highly prized.

8. *Flores Iſle* has three Roads, and two Villas or Towns.

9. *Corvo* is a ſmall Iſle; has but one Church and two ſmall Harbours.

☞ Theſe Iſles could not be ranked within any other Quarter of the Globe ſo properly as to *Europe*, although they lie ſome hundred Miles weſt from the Continent of *Europe*, and directly weſt from *Portugal*.

SPAIN.

Spain, through a Neglect of Tillage, has a Scarcity of Corn, though anciently it was noted for great Plenty of it. It however abounds in the moſt delicious Fruits, as Peaches, Olives, Figs, Lemons, Oranges, Pomgranates, Almonds, Cheſnuts, Pears, *&c.* And her *Wines* (more eſpecially her Sacks) are in great Eſteem by foreign Nations; inſomuch, that (according to Dr. *Buſching*) the yearly Value of the Wines, Raiſins, *&c.* exported from the Country about *Malaga* alone, amounts to a Million and Half of Piaſters [an imaginary or ideal Coin worth 3 *s.* 7 *d.* Sterling] or 268,750 *l.* Sterling. Some Parts of *Spain* produce *Sugar* Canes, the beſt of Saffron and Honey, *Silk* in great Abundance; Salt, more eſpecially toward the Sea-Coaſts, is in ſo great Plenty that conſiderable Quantities of it are exported. Such vaſt Flocks of Sheep are ſeen, that *Uſtariz* (a late famous politico-commercial *Spaniſh* Author) computes the Number of Shepherds in *Spain* to amount to 40,000. The beſt of their very fine Wool is that of *Old-Caſtile*. They have fine Horſes and many Mules; but few Black Cattle. *Spain*'s Mountains yield much Ship-Timber; and *Tar* and *Pitch* are made in *Arragon* and *Catalonia*. Thoſe Mountains are by ancient Authors ſaid to be very rich in Gold and Silver; but the *Spaniards* rather incline to have thoſe precious Metals from *America* than to take the Trouble of ſearching for them at home. Yet it ſeems their Iron-Mines are worked with great Skill and Succeſs. They have likewiſe Lead, Tin, Cinnabar, Quick-ſilver, Alum, Vitriol, Copperas, *Lapis Calaminaris*, Cryſtal, Diamonds, Amethyſts, *&c.*

Number of People in *Spain.*

Spain, according to *Uſtariz*, contains about *ſeven Millions and an half* of People, (though others think not near ſo many) and could well ſupport as many more, were it properly cultivated.——One of the principal Cauſes of the Thinneſs of People in the fineſt Parts of *Spain* (as in both *Caſtiles*, &c.) is the total Decay of Handicrafts and Manufactures, which formerly flouriſhed therein; alſo to the Number of Perſons in Convents reſtrained from Propagation, amounting to 200,000; beſide the Secular Clergy, amounting to 50,000 more. The heavy Taxes alſo *Uſtariz* aſſigns as another Cauſe thereof: Whilſt the mountainous Parts of *Gallicia*, *Aſturias*, *Biſcay*, *Navarr*, and *Burgos*, are ſtill the beſt-peopled Countries of *Spain*, even although from them were ſent the greateſt Number of People who firſt planted *Spaniſh America*. The Bulk of *Spain*'s People are very poor and lazy, though living in ſo improvable a Country! Other Cauſes of the great Poverty of *Spain* are, 1ſt, The draining their Country of ſo much Money for Corn, Fiſh, and many other Things from foreign Countries. 2dly, The inſatiable Avarice of the Clergy, to whom the People are mere Slaves. 3dly, Their horrible Inquiſition. 4thly, Their diſdaining to ſtoop to Handicrafts and Trades, the greateſt Part of which are in the Hands of the *French*, who are very numerous in *Spain*. Yet they are not without ſome Manufactures both of *Silk* and *Wool*; ſome of which, however, after having been ſet on Foot at a great Expence, have afterward been ruined by the Inquiſition and Monks.

Gallicia.

Spain's moſt conſiderable Cities and Towns, beginning from the North Side in *Gallicia*, are,

1. *Ferrol*, a handſome Sea-port in *Gallicia*, having a fine Harbour where Part of the Navy-Royal is uſually built and ſtationed.

2. *Compoſtella*, its Capital, is no otherwiſe eminent than for many fine Churches and Convents, but very little Commerce.

Aſturias.

In *Aſturias*, *St. Andero* has a large and well-fortified Harbour; and its Neighbourhood abounds with fine Fruits and Wine.

Biſcay.

In *Biſcay*, *Bilbao* is a famous City, on the River *Nervio*, has a fine Harbour, very much frequented by foreign Shipping. It is large and well-built, driving a great Trade in Iron, Wool, military Weapons, Saffron, and Cheſnuts; and has very cheap Proviſions.

Guipuſco.

In *Guipuſco* is the ſtrong and fine Sea-port of *St. Sebaſtian*, having neat and fine Churches, Convents, and Streets. It carries on a conſiderable Trade in Iron, Steel, and Wool; and, in the Year 1728, a Company was eſtabliſhed here, for trading in *Cacao* to the *Caraccas*, in *America*.

2. *Vitoria*, though an inland Town in this Province, has a great Trade in Iron and Steel, Wine, Wool, and fine Sword-Blades; and is therefore much frequented.

Leon.

In the Kingdom of *Leon*, intirely an inland Country, there are ſcarcely any commercial Towns. *Leon*, its Capital, is an ancient declining City. And *Salamanca*, though large and populous, is principally famous for its Univerſity, the moſt eminent of any in *Spain*, conſiſting of twenty-five Colleges.

Eſtremadura.

Of *Eſtremadura*, alſo an inland Province, next the Frontiers of *Portugal*, it may be ſaid, That the Cities and Towns of *Albuquerque*, *Badajos*, *Merida*, *Alcantara*, and *Guadaloup*, with their adjacent Countries, abound in excellent Wool, Wine, and fine Fruits; and *Albuquerque* is ſaid to have ſome Woollen Manufactures.

Andaluſia.

Andaluſia is, doubtleſs, the fineſt Province of *Spain*. It abounds in Wines, fine Fruits, Oil, vaſt Quantities of Silk, Grain, Honey, Sugar, Horſes, Metals, *&c.* and contains the following eminent and mercantile Places, *viz.*

1. *Seville*, its Capital, ſeated on the River *Guadalquivir*, is the largeſt City in *Spain*, after *Madrid*. It carries on a large Commerce, although, in the Year 1717, its famous *Contratacion-Houſe*, or Office for the Commerce to the *Spaniſh American* Colonies, was removed to *Cadiz*, and ſtill remains there. Dr. *Buſching* relates, That *Seville* and its once flouriſhing Manufactures have ſince remarkably dwindled; inſomuch, that out of 16,000 Artificers in Wool and Silk, ſcarce 400 remain there at preſent. This City and its Diſtrict are ſaid to have been more populous when ſubject to the *Moors* than at preſent. It however contains 29 Churches, 74 Monaſteries, 24 Hoſpitals, and near as many Squares or *Piazzas*; an Exchange for Merchants, and an Univerſity. And its Neighbourhood abounds in Grain, Wines, and fine Fruits, and much Oil is made here.

2. *St. Lucar de Barrameda* is a well-built but declining Town, at the Mouth of the River *Guadalquivir*, where it has a good Harbour. Its principal Trade is in Salt.

3. *Xeres* (which we commonly pronounce *Sherry*) is a large Town. Its Wines, with us called *Sherries*, are very much eſteemed and exported to foreign Parts: And its Horſes are alſo much prized.

4. *Port St. Mary's* enjoys a flouriſhing Trade; it lies at the Mouth of the little River *Guadalete*, directly oppoſite to *Cadiz*, and exceeds it in Compaſs of Ground, though ſcarcely containing 8,000 People. Here reſide, in peaceable Times, great Numbers of *Engliſh*, *French*, *Dutch*, *Genoeſe*, &c. Merchants. Its Harbour is the Rendezvous of ſome of the *Spaniſh* Gallies; and here they make great Quantities of *Salt*.

5. *Cadiz*, a moſt eminent commercial City, ſtands on an Iſland, ſeparated from the Continent of *Andaluſia* by a very narrow Arm of the Sea, over which a fortified Bridge joins it to the ſaid Continent. It is of a moderately large Circumference, and contains thirteen Convents, though it has properly but one Church, which is its Cathedral, and yet its ſettled Inhabitants are computed to be 40,000. Moſt of its Streets are narrow, crooked, dirty, and ill-paved; Houſe-Rents and Proviſions are dear, and good Water very ſcarce. Before and at the Arrival of the *American Flota*, *Cadiz* is always crowded with Strangers, to the Number, as it is ſaid, of 50,000, reſorting thither on Account of Commerce, and occaſioning an extraordinary Circulation of Money and Expence. *Cadiz* is the proper Center of the whole *Spaniſh American* Commerce. Hither other *European* Nations ſend their Merchandize, to be ſhipped off in *Spaniſh* Bottoms for *America*, ſheltered (or, as our old *Engliſh* Phraſe has it, *coloured*) under the Names of *Spaniſh* Factors. Thoſe foreign Nations have here their Agents and Correſpondents, and the Conſuls of thoſe Nations make a conſiderable Figure. *Cadiz* has been ſaid to have the fineſt Storehouſes and Magazines for Commerce of any City in *Europe*; and to it the *Flota* and *Galeons* regularly import the Treaſures of *Spaniſh America*. The proper *Spaniſh* Merchandize exported from *Cadiz* to *America* are of no great Value; but the Duty on the foreign Merchandize ſent thither would yield a great Revenue, (and conſequently the Profits of Merchants and their Agents would ſink) were it not for the many fradulent Practices for eluding thoſe Duties. The Entrance into *Cadiz* Bay and Harbour is well defended by *Fort Matagorda*, on the Eaſt or continent Side, running out on a Promontory, and by *Fort Puntal*, over againſt it, alſo running out on a Point from the Iſland. The *Spaniards* uſually call thoſe two Forts the *Puntals*, between which the Sea is ſaid to be but 500 Fathoms wide: And when an Enemy's Fleet approaches *Cadiz*, and thereupon the *Galeons*, &c. are ſaid to be placed *behind the Puntals*, it is thereby meant, that they are then out of Danger from an Attack or Aſſault.

6. The Town of *Gibraltar* is not ſo much to be conſidered, either for Extent or for Beauty, as for its Strength and Situation, which render it one of the Keys of *Spain*. And therefore the Crown of *Great Britain* has very much improved its Fortifications ſince it came under its Power, in the Year 1704.

7. *Cordova* (or *Corduba*) alſo in *Andaluſia*, is a large and beautiful inland City, ſtanding on the River *Guadalquivir*, once the Capital of a *Mooriſh* Kingdom of that Name. It ſtill enjoys a great Trade, tho' not populous proportionably to its large Extent, as having Vineyards and Gardens within its Circuit. The adjacent Mountains are covered with Vineyards and Plantations of Lemons, Oranges, Figs, and Olives; which, when in Bloſſom, diffuſe a Fragrancy all over the Country.

8. *Jaen* was likewiſe the Capital of a ſmall *Mooriſh* Kingdom of that Name. It is a populous inland City, having ſome fine Churches and Convents: and its Neighbourhood has Plenty of Corn, Wine, Oil, Fruits, and Silk.

Granada, the lateſt Kingdom of the *Moors* of *Spain*, is extremely pleaſant, healthy, populous, and fruitful, having an Exuberancy of Corn, Wine, Oil, Sugar, Silk, Flax, Hemp, and excellent Fruits; ſuch as Pomgranates, Citrons, Lemons, Oranges, Olives, Capers, Figs, Almonds, and Raiſins of two Kinds, *viz.* thoſe dried by the Sun on the Branches, and thoſe dipped in a *Lye*, made of the Aſhes of the burnt Branches, and afterward dried in the Sun. Here alſo are produced *Galls*, *Dates*, *Shumack*, &c.

1. *Granada*, its once auguſt capital City, is ſtill one of the largeſt in *Spain*; and, though an inland City, carries on a great Trade in *Silk*.

2. *Malaga* is a fine populous City, and an eminent Sea-port, ſuitable to its extenſive Commerce. Its principal Merchandize for Exportation conſiſts in Sack and other Wines, Wool, Olives, Oil, and Raiſins.

3. *Almeria* is a maritime City, and its Neighbourhood is fertile in Fruits and Oils.

Murcia was once a ſmall *Mooriſh* Kingdom. It is mountainous, yet fertile, like *Granada*, in Sugar, Honey, Silk, Rice, Salt, and fine Fruits.

1. *Carthagena* has one of the beſt Harbours of *Spain*, and yet much declined from its priſtine Grandeur. Yet here are many Mines of *Alum*; and alſo ſome Diamonds, Rubies, and other Gems.

2. *Murcia*, the Capital of this Province, is a large, well-built, and populous inland City.

Valencia was once alſo a *Mooriſh* Kingdom, along the Shore of the *Mediterranean* Sea. It abounds in Salt, Rice, Flax, Silk, Hemp, Honey, and Sugar.

1. *Valencia*, its Capital, is a pleaſant, large, beautiful, and populous maritime City, driving a conſiderable Commerce; more eſpecially in *Almonds*, for which Fruit there is always a great Demand every-where.

2. *Alicant*, a Sea-port, famous for its red and white Wines, of which very much is exported to many foreign Parts; as there alſo is of its Raiſins and other dried Fruits, Aniſeed, &c.

3. 4. 5. *Altea*, *Denia*, *Gandia*, are ſmall Sea-port Towns, trading in Wines, Silk, Flax, Honey, and Raiſins.

The Kingdom of *Caſtile*, though an inland Country, is the principal and moſt opulent Province of *Spain*. It is uſually diſtinguiſhed into *Old* and *New Caſtile*.

Old Caſtile is ſo termed for having been recovered from the *Moors* prior to *New Caſtile*, North of the other. Its Wine is eſteemed excellent, and its numerous Flocks of Sheep produce the fineſt *Wool* in *Spain*; moſtly carried to *Bilbao*, for Exportation to foreign Parts. Its beſt Towns are,

1. *Valladolid*, a large, beautiful, and populous City, being one of the ſtatelieſt in *Spain*; having fine Streets, ſplendid Palaces, ſpacious Squares, Piazzas, Fountains, and ſtately Churches, a Royal Palace, an Univerſity, and about 70 Convents.

2. *Burgos*, its capital City, is large, though irregular, and has many fine Squares, Palaces, Churches, Convents, and Hoſpitals.

3. *Segovia*, a fine, large, and populous City; having the beſt Woollen Cloth Manufacture in all *Spain*, as well as the fineſt *Wool* in its Neighbourhood; of which much is exported. It has alſo a Paper Manufacture.

4. *Avila*, a moderately large City, producing excellent Grapes, and other Fruits, and alſo ſome Manufactures.

New Caſtile has ſometimes been called the Kingdom of *Toledo*, lying South of *Old Caſtile*, and is the Center of the Monarchy of *Spain*. It is a very fruitful and healthy Country.

1. *Madrid*, its Capital and that of all *Spain*, and though an open Place, and of little Account till King *Philip* IId. made it his conſtant Reſidence; yet it is become very large, and is adorned with fine Squares, Streets, and Palaces, Churches, Convents, Hoſpitals; but it is, nevertheleſs, by no Means a neat or cleanly Place. It ſtands on the little River *Manſanares*. The Inhabitants are computed to amount to 150,000. Proviſions of all Kinds are here both reaſonable and excellent; and the conſtant Reſidence of the Court occaſions a briſk Trade and Circulation of Money.

2. *Toledo*, an ancient, populous, and fortified City, on the River *Tagus*, has ſtately public and private Edifices, many fine Churches, ſeventeen Squares, and thirty-eight Convents, *&c.* *Toledo* has been long noted for its fine Sword-blades, and alſo carries on a great Trade in Wool, Silk, and Stuffs.

3. *Guadalaxara* is no very great Place, but the adjacent Country is fertile; which Conſideration probably induced the Duke *de Riperda* to ſet up ſeveral Manufactures of Woollen Cloths and Stuffs, which then ſeemed promiſing; yet on his Diſgrace, *Anno* 1726, they fell to Decay. The Kingdom of *Spain* has for many Years been governed by foreign Projectors and State Empyrics, to the infinite Detriment of the true Intereſt of the Public.

Spaniſh or *Upper Navarre* is divided from *French Navarre* by the *Pyrenean* Mountains, amongſt which Mountains the greateſt Part of it is ſituated; and therefore its principal Wealth conſiſts in Grazing.

1. *Pampelona*, its Capital, is a Place of little Commerce; is of a tolerable Magnitude; has an Univerſity, and ſeveral Eccleſiaſtical Edifices. It is ſeated in a Plain near the *Pyrenean* Mountains.

2. *Tafalla*, a City and Univerſity, has good Wine in its Neighbourhood.

3. 4. 5. *Olita* (formerly the Reſidence of the Kings of *Navarre*) is a pretty Town in a fruitful Country; and *Tudela* and *Eſtella* are likewiſe pretty Towns.

Arragon, formerly a Kingdom, likewiſe joins the *Pyrenean* Mountains. Much of it is dry and barren, and ſome Parts uninhabited: Yet, where watered by Rivers and Springs, it produces Corn, Wine, Oil, Flax, Fruits, and Saffron.

1. *Saragoſſa*, its Capital, ſtands in a fertile Plain, on the River *Ebro*. It is a large and handſome City, containing ſeventeen large Churches, fourteen Convents, an Univerſity, and a Citadel. It enjoys a very conſiderable Trade, and is inhabited by many Perſons of Quality.

2. *Calatayud* is a good Town at the End of a charming Valley, abounding in Grain, Wine, Oil, and other Fruits.——The other Towns are inconſiderable.

The fine Principality of *Catalonia* is ſeparated from *France* by the *Pyrenean* Mountains; and, though mountainous, has many delicious Plains, ſupplying Plenty of Wine, Grain, Oil, Fruits, Flax, Hemp, Marble, Cryſtal, Alabaſter, Jaſper, Amethyſts; alſo Gold, Silver, Tin, Lead, Iron, Alum, Vitriol, and Salt. Yet it has very little Copper, neither has it any Sugar Canes, though other Provinces of *Spain* produce them. It is one of the moſt populous Provinces of the Kingdom.

1. *Barcelona*, its Capital, is a large, ſtrong, and noble Sea-port, adorned with an Univerſity, and many fine Churches, Convents, and Squares; has a conſiderable Commerce in Wines, Fruits, *&c.* and is thought to contain about 100,000 People.

2. *Tortoſa* is a large fortified City and an Univerſity, on the *Ebro*, with many Churches and Convents, and its Neighbourhood abounds in Grain, Silk, and Fruits.

3. *Tarragona* has an Univerſity, and a good Trade, though but an indifferent Harbour. Its Neighbourhood yields Corn, Oil, Flax, and very good Wine.

4. *Girona*,

4. *Girona*, a fortified inland City, has a conſiderable inland Commerce.

The *Balearic* and *Pithyuſæ* Iſles, in the *Mediterranean* Sea, *viz.* the four Iſles of *Majorca*, *Minorca*, *Yviça*, and *Formentera*, formerly compoſed the Kingdom of *Majorca*. This laſt-named Iſland abounds in Corn, Wine, Oil, Saffron, Wool, Honey, Horſes, *&c.*

Majorca, its Capital, is large, has ſtately Buildings, 22 Churches, and about 10,000 Inhabitants.

Minorca Iſle has a barren Soil, though ſome good Wine, of which when they had the *Engliſh* for their Cuſtomers, (Dr. *Buſching* thinks) they made annually 27,000*l.* Sterling. Here is alſo ſome Wool, Cotton, Salt, Capers: But its People, who are in Number about 27,000, (having in all 3,088 Houſes) are not induſtrious, and therefore are ſupplied with their principal Neceſſaries from foreign Parts, *viz.* Corn, Beef, Brandy, Linen, Stuffs, *&c.* to the Value (he thinks) of about 70,000*l.* Sterling annually.

1. *Cittadella*, its Capital, has about 600 Houſes: And, 2. The little trading Town of *Mahon* is defended by the ſtrong Fort of *St. Philip.*

The *Pithyuſæ* Iſles [ſo called by the *Greeks* from their Multitude of *Pine Trees*] are,

1. *Iviça*, which is but little cultivated, becauſe moſt of its People are employed in the *Salt* Trade, as more gainful. *Iviça*, its Capital, however, has a modern Fortification.

2. *Formentera* Iſle was formerly well inhabited, but is now quite deſerted, becauſe of the *Barbary* Corſairs continually ſwarming about it.

ITALY.

In *Italy* (according to Dr. *Buſching*) all Materials for Enjoyment, and a Variety of Delicacies, which as it were lie ſcattered here and there in other Countries, we here meet with almoſt every-where in Profuſion: Corn, rich Wines, the choiceſt Fruits, ſuch as Oranges, Citrons, Lemons, Olives, Pomgranates, Almonds, Raiſins, white Mulberry Trees, beyond Number, for producing of Silk; Sugar, Alabaſter, Jaſper, Iron, Gold, Silver, Sulphur, Alum; tame and wild Beaſts. On this Account *Italy* is juſtly ſtiled *The Parent of Plenty*; *The Source of earthly Felicity*; *The Pride of our Globe*; *The Garden of* Europe; *The Beauty of the World*;—and even *a Microcoſm within itſelf.* Yet, all its Delicacies are not orginally *Natives.* 1. The Fruit-Trees, the Produce whereof the *Latins* called *Mala*, were tranſplanted to *Italy* after the Conqueſts of the *Romans* in *Africa*, *Greece*, *Aſia-minor*, and *Syria.*——*Apricocks* (or *Abricots*) came from *Epirus*, and were called *Mala Epirotica.*——*Peaches*, [*Mala Perſica*] from *Perſia.*——*Citrons* were called *Mala Medica*, from *Media.*——*Pomgranates*, [*Mala Punica*] from *Carthage.*——And *Cheſnuts* from the Town of *Caſtania*, in the Diſtrict of *Magneſia*, in *Macedonia.*——The beſt *Pears* came from *Alexandria*, *Numidia*, *Greece*, and *Numantia.*——The firſt *Plumbs* were brought from *Armenia* and *Syria*, eſpecially from *Damaſcus*, (from whence the Name of *Damaſcens*, with us even at this Day.)——*Lucius Lucullus* was the firſt that introduced *Cherry-Trees* from *Pontus*, which ſoon after became the Growth of all other Countries throughout *Europe.*———Yet in *Italy* there is no ſmall Difference in regard to the Fertility, Wholeſomeneſs, and Pleaſantneſs of its different Provinces; in ſome of which the Number of the Inhabitants is far from being ſufficient for the Culture and Improvement of the fruitful Soil; more eſpecially in the *Papal* Territories, *&c.* where there is not a Town of any Conſequence wherein the *Eccleſiaſtics* make not *one half* or at leaſt *one third* of the Inhabitants.

To begin with that Part of *Italy* which borders on *France*, or the King of *Sardinia*'s Subjects of *Piedmont*, *Savoy*, &c. on the Continent, Mr. *Keyſlar* thinks they exceed *two Millions* of People.

The Number of the King of *Sardinia's* Subjects on the Continent of *Italy.*

The Dutchy of *Savoy* is ſo barren, rocky, and mountainous, that there are very few Materials therein for Commerce, (ſome *Wine* excepted.) *Chambery*, its Capital, is of a moderate Size, where many of their Nobility reſide. The other Towns are more inſignificant, and have nothing like Trade.

Piedmont is a fine Country, abounding in Corn, Variety of Wines, Fruits, Hemp, Cattle, (in which laſt they have a very gainful Trade.) But the moſt advantageous Trade of this Country is the Cultivation of *Silk*, reckoned the very beſt in all *Italy.*

1. *Turin*, its Capital, contains many fine Palaces, *Piazzas*, Streets, Churches, Convents, and an Univerſity; and its Inhabitants may amount to between fifty and ſixty Thouſand. It ſtands on the fine River *Po*, in a moſt pleaſant Country.

2. *Nice* is a Sea-port, of ſome Commerce, but its Harbour does not admit of large Shipping.

3. *Oneglia* is a fortified Sea-port, having a very good Oil Trade.

4. *Villa Franca* is an inconſiderable Sea-port Town.

5. *Aſti* is a large fortified Town, in a fertile Valley.

Montferat Dutchy belongs to the King of *Sardinia*, and joins to *Piedmont*; it abounds in Corn, in excellent *Muſcadine* Wine, and contains about 200 Towns and Caſtles.

Caſal, its Capital, lies on the *Po*, in a fertile Country, and is very ſtrong.

☞ *N. B.* About and ſince the Year 1703, ſeveral Diſtricts, Towns and Caſtles have, by particular Conventions, been yielded by the Houſe of *Auſtria*, to that of *Savoy*, which formerly belonged to the Dutchy of *Milan.*

The Iſland and Kingdom of *Sardinia* is not very profitable, in point of Revenue, to the Houſe of *Savoy*, ſeeing, (according to Doctor *Buſching)* after defraying the Expence of its civil and military Eſtabliſhment, the Remainder does not much exceed 100,000 Livres. It yields Plenty of Corn and Wine; but, by reaſon of its many Moraſſes, and the Mountains on the North Side of it, the Air is eſteemed very unwholeſome.

Cagliari, its Capital, has an Univerſity and an Archbiſhopric, and is the Reſidence of the Vice-Roy. It is a Sea-port, though not conſiderable for Commerce. On the Coaſts of this Iſland, at ſundry ſmall Sea-ports, there is a great Coral Fiſhery.

The *Auſtrian* Dominions in *Lombardy* conſiſt only at preſent of ſuch Part of the Dutchy of *Milan* as has not been, at different Times, yielded to the Houſe of *Savoy*, and alſo of the intire Dutchy of *Mantua.*

The Dutchy of *Milan* is moſt fertile in a Variety of excellent Productions. Corn, Rice, excellent Wines, and the fineſt of *Cheeſe*, (improperly called *Parmeſan)* which is uſed all over *Italy* in the beſt Soops. Its Paſtures are exceeding rich, and famous for breeding of Cattle and much Milk. The Trade of the *Milaneſe*, and particularly of the vaſt City of *Milan*, is very conſiderable. Much Cloth, Silk, and Linen are here manufactured, and moſtly uſed at Home; but their fine *Silk Stockings*, Gloves, and Handkerchiefs are uſually exported. *Milan* is famous for curious Works in Steel, Cryſtal, Agate, Hyacynths, and other Gems; and the Country every-where abounds with ingenious Artificers! It is ſo extremely rich and fertile as to have formerly yielded to the Kings of *Spain* a Revenue of *two Millions* of Dollars. Mr. *Nugent*, in his *Grand Tour*, makes its modern Revenue to be about 300,000 *l.* Sterling.

The City of *Milan* is ten *Italian* Miles in Circumference, containing (according to Dr. *Buſching)* 250,000 Inhabitants; yet Mr. *Keyſler* (an Author likewiſe of good Credit) computes them to be about 300,000, as does alſo Mr. *Nugent*, &c. It contains 230 Churches, (beſides its grand Cathedral) 90 Convents, 100 Chapels for religious Fraternities, and 120 Schools.

Pavia, (once the Reſidence of the Kings of the *Lombards*, though ſince much decayed) *Como*, *Lodi*, and *Cremona*, (more eſpecially the laſt, five Miles in Circuit) are very conſiderable Cities; full of Churches and Convents, having fine Buildings, and ſpacious Streets and Squares; though neither rich nor populous.

Mantua, the capital City of the Dutchy of that Name, is a fine and very ſtrong Place; crowded with Churches, Convents, and Hoſpitals. It abounds in Corn, Flax, Cattle, and Fruits; with ſome Wine: But although formerly it was ſaid to contain 50,000 Inhabitants, yet (ſince it has no longer any Court) Dr. *Buſching* thinks it is dwindled to about 16,000: Of which Number are about 5,000 *Jews*. Its general Commerce in Silk and other Manufactures, formerly ſo conſiderable, is now much decreaſed;—and its Ducal Palaces are going to Ruin.—Here are no other conſiderable Towns in this Dutchy.

The Dominions of Don *Philip*, the *Infant of Spain*, are, the Dutchies of *Parma* and *Placentia*; lying Eaſt and South of the *Milaneſe*. They have a moſt fertile Soil in Olives, Truffles, Cheſnuts, and other fine Fruits, rich Paſtures and fine Cattle; though the celebrated *(Parmeſan)* Cheeſe is no longer made here, but in the Dutchy of *Milan*, and about *Bologna* and other Parts: Yet here are very beneficial Salt-works, alſo Copper and Iron Mines.

1. *Parma* is a large and populous City. In it, Silk is a great Material for Commerce; of which much is exported, eſpecially in Silk Stockings.

2. *Placentia* (or *Placenza)* is likewiſe a large City, crowded with Churches and Convents.

3. *Guaſtalla* is a ſmall fortified Town; though neither it nor any other Place in the little Dutchy of that Name, are any way eminent for Commerce.

In the States of the Duke of *Modena* are Plenty of fine Corn, excellent Wine and Fruits.

Modena is a moderately large and populous City; and *Reggio* and *Mirandola* are ſmall but handſome and ſtrong Towns; of which we can ſay nothing more particular.

☞ There are in upper *Italy* ſundry ſmall Sovereign Principalities, as *Maſſa*, *Monaco*, and *Maſſerano*; but they are very inconſiderable: And, although they abound in Oranges, Lemons, and other fine Fruits, they are no way remarkable for Commerce.

In *Italy* are three independent Republics, *viz.*

Genoa Republic is about 150 *Engliſh* Miles in Length, along the Coaſt of the *Mediterranean* Sea, but of a ſmall Breadth; and, being in many Parts rocky, it is conſtrained to be ſupplied with Corn from other Countries. Yet it produces Oils, good Wines, and excellent Fruits, ſuch as Lemons, Oranges, Pomegranates, Olives, Figs, Almonds, alſo large Plantations of Mulberry Trees, for Silk-worms. It alſo exports Salt, Marble, *Parmeſan* Cheeſe, and Anchovies. The *Genoeſe* Manufactures are now much ſhort of their ancient Reputation; yet they ſtill manufacture fine Velvets, Pluſh, and Fuſtian, Damaſks and

and other Silk Fabricks, being ſupplied with much raw Silk from *Sicily*; Gold and Silver Tiſſues, Laces, Gloves, (though much inferior to thoſe of the *Netherlands* and *France*;) alſo the fineſt of Paper.

1. *Genoa*, its capital City, is a moſt magnificent Place; in Circuit about ten *Italian* Miles, including its Fortifications. It contains thirty-ſeven Pariſh-Churches, twenty Collegiate Churches, ſeventeen Convents, and two large Hoſpitals. Two of its principal Streets conſiſt intirely of fine Marble Palaces: Its Inhabitants may amount to 150,000, whoſe principal Manufactures are thoſe above mentioned, and they trade much in Drugs, &c. from the *Levant*; with which great commercial Materials, a very briſk Trade is carried on, more eſpecially with *Spain*. Hither the Shipping of moſt *European* Nations conſtantly reſort, particularly thoſe of *England*, *Holland*, and *France*, in great Numbers. Yet it is well known, that *Genoa* is greatly fallen from the formidable Figure its naval Power anciently conſiſted of, it being now reduced ſo low as ſix Gallies, the Complement of the largeſt of which (according to the judicious Mr. *Keyſler*) is but 100 Soldiers, and 320 Rowers; the Uſe of which, at this Time, is principally to fetch *Corn* from *Naples* and *Sicily*, and to give their Ladies an Airing. This decayed City, however, is eminent for having the richeſt Bankers in all *Europe*, and for its profitable Dealings in *Exchange*.

2. *Savona* is, next to *Genoa*, the beſt Place of this Republic on the Continent: It is conſiderably large, and its Harbour is well defended; yet, in the Year 1745, ſixteen *French* and *Spaniſh* Veſſels, laden with military Stores, were there ſunk by the *Engliſh* Bombs.

3. *Finale*, a ſtrong and conſiderable Sea-port, with a convenient Harbour. And along the Coaſt the Republic has ſundry other ſmall Towns and Sea-ports, ſome of which have good Harbours, though very little Commerce.

Corſica Iſle.

Genoa's Iſland of *Corſica* lies oppoſite to her Continent-Dominions, being about 100 *Engliſh* Miles in Length, and about 40 in Breadth. It is very mountainous, but its Plains and Valleys produce Corn, indifferent Wine, Fruits, much Olive-Oil, Alum, Iron, Salt-works, and a Coral Fiſhery. The Unhealthineſs of its Air occaſions its not being populous: For, by the once famous Baron *Theodore*'s Calculation, *Anno* 1736, its whole People amounted only to 120,000. It was anciently a ſmall Kingdom, and has long been poſſeſſed by this Republic: But that State's heavy Taxes, and their other Grievances complained of by the *Corſicans*, have long kept the Majority of them in a State of Rebellion even to this Day: And, from their Mountains, they are conſtantly making ſucceſsful Sallies on that Part of the Iſland ſtill poſſeſſed by the *Genoeſe*, who are now ſo far from making any Advantage of *Corſica*, that it is a very conſiderable annual Expence to the Republic. Its principal Town and Sea-port is *Baſtia*, the Reſidence of the *Genoeſe* Viceroy; and alſo *Calvi*, the next beſt Town and Port, both ſtill poſſeſſed by the *Genoeſe*, who alſo have Garriſons in the ſmall Towns and Ports of *Ajaccio* and *Bonifacio*. But *Corſica*, in its preſent unſettled and hoſtile Condition, cannot be ſuppoſed to carry on any Kind of regular Commerce.

VENICE.

The famous Republic of *Venice* is compoſed of ſeveral fine Provinces on the Continent of *Italy*, and of ſome Iſles in the *Adriatic* Sea; but its principal Strength and Glory is its maiden capital City of *Venice*, ſeated on ſeventy-two or more Iſles, at the Bottom of the North End of the *Adriatic* Sea; it is divided from the Continent by a *Laguna*, or marſhy Lake, of five *Italian* Miles in Breadth, too ſhallow for large Ships to navigate; yet, by the prudent Attention of the Republic, it is prevented from becoming Part of the Continent, as well as from being ever frozen, ſo as to bear an Army on it in Winter. Toward the Sea, the Acceſs to this wonderful City is likewiſe difficult; but the ſafe and navigable Parts are indicated by Piles; which, on the Approach of an Enemy's Fleet, can be cut away. And, as her Ships of War and Galleys may be fitted out very expeditiouſly from her noble Dock-yard, containing always vaſt Quantities of naval Stores, it is evident that the City, being thus ſecure from any Attempt, either by Land or Water, is ſufficiently ſtrong, though without Walls or other Fortifications.

Over its ſeveral Canals are laid 450 (or, as ſome ſay, upwards of 500) Bridges, greater and ſmaller; the Majority of them being of Stone. The City contains 70 Pariſh-Churches, 80 Convents, 17 Hoſpitals, 53 Squares, 165 Marble and 23 Brazen Statues. Its Buildings are all Stone, though the greater Part of them make but a mean Figure. Yet *St. Mark*'s Square, and ſeveral ſtately marble Palaces bordering on the great Canal running through the whole City are very fine, though moſt of them of *Gothic* Architecture. Its Inhabitants have, by ſome, been computed to amount to 200,000, though others think not ſo many. Its Trade in Cloth is ſtill conſiderable, more eſpecially of Scarlet: Silk Manufactures, Gold and Silver Stuffs, are here manufactured, and though not ſo beautiful as thoſe of *France*, they have a very good Vent in the *Levant*. Its *Brocatellas*, (a Kind of Stuff like *Brocade*) made of coarſe Silk, are much uſed for Carpets. Its Manufacture of Looking-glaſſes, and other fine Plate Glaſs, is ſtill conſiderable.

Of *Venice*'s famous *Bank*, which was the firſt of any erected in *Europe*, we have ſufficiently treated in the Body of our Work. Its ſo much celebrated Arſenal, Docks, &c. being 2¼ *Italian* Miles in Circuit, containing a great Variety of Edifices, for every thing requiſite for a Land or Sea Armament, where alſo lie the Ships of War, Galleys, &c. and the *Bucentauro*; we apprehend to be now much outdone by thoſe of *England*, *Holland*, and *France*.

There are ſundry Iſles near the City, which are fortified for its Defence, *viz.* *Murano*, *Lido*, *Malmocco*, *Paleſtrina*, *Chiozza*, &c. upon which ſome good Towns are built. On the *Venetian* Continent, one of the fineſt Countries upon Earth, are many good Cities, as

1. *Padua*, an ancient and large City and Univerſity, containing above 40,000 Inhabitants, twenty-ſix Pariſh-Churches, forty-one Convents, four good Hoſpitals, and ſundry fine Palaces. Here is a Woollen Manufacture, and its Neighbourhood yields excellent Wines, Oil, and Fruits.

2. *Rovigo*, a large but declining City.

3. *Verona*, a very large City, through which the River *Adige* runs, over which are four Stone-Bridges: It is ſtill computed to contain near 50,000 Inhabitants, though formerly it was much larger. Dr. *Buſching* thinks the Trade of this City is not ſo well improved as it might be for the ſupplying of other Countries with Olives, Oil, Wines, very good Linen, Sewing Silk, and Woollen Stuffs.

4. *Vicenza*, a City about four *Italian* Miles in Circuit, containing ſundry fine Palaces, fourteen Parochial Churches, and twenty-nine Convents; though nothing particular is related of its Commerce.

5. *Breſchia* has nineteen Pariſh-Churches, forty-five Convents, and near 50,000 Inhabitants. Its Commerce is very conſiderable, both for its Fire-arms, Swords, and Cutlery Ware, having many Iron-Mines in its Neighbourhood. Its Linen Manufactures are alſo in great Eſteem.

6. *Bergamo* is a ſtrong, large, and populous City, famous for its Sewing Silk, Iron Mines near it, ſome Woollen Manufactures, rich Wines, good Oil, and delicious Fruits.

7. *Crema*, a ſtrong City, in a very fertile Valley, having many Churches, Convents, Hoſpitals, and other elegant Buildings. It is eminent for its fine Thread and Linen Manufactures, and for its annual Fairs.

Here alſo, on this *Venetian* Territory, are ſundry ſmaller Towns, which have ſome inconſiderable Commerce.

Along the Coaſt of *Dalmatia*, the *Venetians* have a narrow Slip of Territory, with ſeveral Forts, but they are of no great Conſequence in Commerce, being purely intended as a Barrier on the Side of *Turkey*, [viz. *Zara*, *Nadin*, *Novigrad*, *Sebenico*, *Gliſſa*, *Spalatro*, *Cattaro*] which Places, however, abound in Wines, Oils, Salt, *&c.*

Caſtel Nuova alſo belongs to *Venice*, and is a Place of ſome Commerce.

On the ſame Coaſt is the litttle *ariſtocratical* Republic of *Raguſa*, tributary to the *Grand-Seignior*, to whom it pays 20,000 Sequins annually, of 9 *s.* 2 *d. Sterling* each. It is a *Popiſh* State, and its Citizens are ſaid to be almoſt all to a Man Traders, and have fine Manufactures: It has ſome few neighbouring Towns ſubject to it.

Lower down, in what was anciently called the *Ionian* Sea, the Republic of *Venice* have ſeveral Iſlands, near the Coaſts of ancient *Greece*, which are of Conſequence in a commercial Senſe. As,

1. *Zante* produces a ſtrong Wine, Oil, Figs, Raſins, *Currants*, and Salt. Here is a *Greek* Biſhop, the Bulk of its People being of the *Greek* Church. The Town of *Zante* is large and populous, and has a *Latin* Biſhop, and three Convents.

2. *Cefalonia* is a moſt fruitful Iſle, moſt of its Fruit Trees bearing twice in the Year: It produces Wine, Oils, Citrons, Oranges, Pomegranates, and Corn; more eſpecially is this Iſle famous for Currants, dried in the Sun, of which *England* takes off great Quantities annually.

3. *Corfu* was anciently named *Corcyra*. Its northern Coaſt is fertile in excellent Wines, delicious Fruits, Olives, and Grain. It is of great Conſequence to the *Venetian* State, (in regard to the *Turks*) which occaſions their conſtantly keeping an Armament in the Harbour of the City of *Corfu*, its Capital; which is well-fortified, and ſtood out ſucceſsfully a ſevere Siege by the *Turks*, in the Year 1715. At this City is an Archbiſhop, and an Academy of the Liberal Arts and Sciences.

4. *Santa Maura* is an Iſland extremely fertile in Grain, Wine, Oil, and all the richeſt Fruits before-named. Its chief and ſtrong Town, of the ſame Name, contains 5 or 6000 Inhabitants. There are ſundry other ſmaller and inconſiderable Iſles hereabout; but of very ſmall Importance.

LUCCA.

The ſmall free Republic of *Lucca* lies on the *Tuſcan* Sea: It is in Compaſs about thirty *Italian* Miles, and contains about 120,000 People in the City and its 150 ſmall Towns and Villages. Its Induſtry is extremely great, in improving every Spot of its Territory to the greateſt Advantage. It abounds in Wines, Oils, Fruits, *&c.* And, according to Mr. *Keyſler*, its intire annual Revenue may amount to 80,000 *l. Sterling*. Her military Force conſiſts of 76 *Switzers* for the Guard of the Palace, and of 500 other Soldiers.

The City of *Lucca*, the Seat of its Goverment, lies in a delightful Plain, charmingly diverſified with Villages, Seats, Summer-houſes, Vineyards, Meadows, and Corn Fields. It contains above 40,000 Inhabitants, whereof a great Part are Artiſans and Manufacturers, more eſpecially in Silk Goods, in which *Lucca* carries on a very conſiderable Trade. And their Olives and Oil are deemed the beſt in *Italy*.

TUSCANY.

The Grand Dutchy of *Tuſcany* adjoins to the Pope's Territories, and is about 116 *Engliſh* Miles in Length, and 80 in Breadth. It is a moſt delightful Country, abounding in Grain, Oil, Wines. Oranges, Lemons, and all other Kinds of rich Fruits. It has Salt-pits, Alabaſter, Lapis Lazuli, Borax, Amethyſts, Jaſper, Marble, Cornelians, Quick-ſilver, *&c.*

1. *Florence*, its Capital, is a large, moſt beautiful, and ſtill flouriſhing City, moſt delightfully ſituated between Mountains covered with Olive-Trees, Vineyards, Farms, Seats, and Villages, divided into two nearly

equal

equal Parts by the *Arno*; which, with the four Stone and Marble Bridges over it, enhances the beautiful Appearance of the City, which contains about 9000 Houſes, many of which are beautiful Stone Edifices. It has 17 Market-places, 7 Fountains, 6 Columns, 2 Pyramids, 160 public Statues, 44 Pariſh-Churches, 12 Priories, 54 Convents, 24 Eccleſiaſtical Fraternities, 37 Hoſpitals, and its Inhabitants are computed to be at leaſt 70,000; but others make them many more. To deſcribe, at large, the Beauties of its Churches, and more eſpecially of the Grand Duke's Palace, both without and within, is not our immediate Province, and would beſide take up too much Room. It was formerly a larger and more opulent City than at preſent; its now greateſt Trade conſiſting chiefly in Woollen and Silk Manufactures.

2. *Piſa*, on the *Arno*, is a decayed City, now only conſiſting of about 17,000 Inhabitants; although ſo far back as the XIth Century, it was computed to contain 150,000. Some Buſineſs is ſtill carried on in it, on account of its being the Place where the Gallies are built. Its Exchange is a fine Edifice, but there is little Buſineſs done there. Between *Piſa* and *Leghorn* is a Canal of ſixteen *Italian* Miles in Length, for the Conveniency of Traffic as well as for draining the Moraſſes.

3. *Leghorn* is a handſome City, built in the modern Taſte, and on account of its being interſected with Canals, is termed the *New-Venice*. Its Inhabitants are computed to be 40,000; of which it is ſaid half the Number are *Jews!* the greateſt Part of its Commerce going through their Hands. The Trade of this famous Port is extremely conſiderable; and is greatly promoted by the Freedom of its Port, its Sovereigns having fully experienced the ſubſtantial Benefits thereof. Proteſtants, it is true, are not here allowed the publick Exerciſe of their Religion: Yet all Sects are connived at; and the *Engliſh* being, of all foreign Nations, the beſt Cuſtomers to *Leghorn*, are allowed to have a Chaplain to their Factory there; which, in Mr. *Keyſler*'s Time, *Anno* 1730, conſiſted of thirty-ſix Families. And Proteſtants of other Nations reſort to Chaplains of Ships.

4. *Sienna* is a moderately large City, with an Univerſity: It ſtands in a healthful Air; yet, though its Houſes are elegantly built, it is but thin of Inhabitants, who ſcarcely amount to 17,000, with little Trade. It was once a free Republic, and a Place of conſiderable Commerce, till vanquiſhed by the *Spaniards*, *Anno* 1554, and by them ſold to the Duke of *Florence*.

The State of the Church, or *Papal* Territory, in general, conſiſts of a very fertile Soil. Its Harbours, both on the *Adriatic* and *Tuſcan* Seas, are very advantageouſly ſituated for Commerce. The Pope receives conſiderable Emoluments from foreign Parts;—his Dominions are viſited by Numbers of Foreigners, who expend much Money there;—and, on account of the ſuppoſed Sacredneſs of his Perſon and Character, his Government ſhould ſeem moſt eligible, and beſt calculated for the Welfare of his Subjects: Upon the Conſideration of theſe, and ſundry other Points, (ſays Dr. *Buſching*, as many others have ſaid before him) one would be apt to imagine, That, of all Countries, this ought to be the moſt flouriſhing and fortunate, were not (even but on a curſory Inſpection) the very Reverſe moſt manifeſt. The Country is but ill cultivated, very poor, and thin of Inhabitants, the City of *Bologna* alone excepted.——Trade and Manufactures totally ſtagnate:—And, were it not for the Bounty of Providence, which ſupplies the Inhabitants with Dates, Almonds, Figs, Olives, and other Fruits, and the Fruits growing ſpontaneouſly, and without the Culture of the Inhabitants, who have both Bread and Wine with but little Labour, their Sloth would abſolutely ſtarve them!

Their ſmall Inclination and Spirit for Labour is not to be wondered at, as they know, that if they have *much*, *much* will be taken from them; and that, in the End, *nothing* will be left them! The many Holidays, which are ſo great an Impediment to Trade and Buſineſs;—the great Number of young ſturdy Beggars ſtrolling about, and burdening the Inhabitants, under the Appearance of Pilgrims;—the many Hoſpitals, which confirm the People in Idleneſs;—the Multitudes of Convents, like ſo many Neſts of Drones that obſtruct the Increaſe of Inhabitants;—the inconceiveable Wealth of Churches and Convents, which lies dormant without the leaſt Advantage to the Public;—the *Inquiſition*, which will not permit the want of Inhabitants to be ſupplied by thoſe of another Religion; are ſome of the great Cauſes of the wretched Condition of the *Papal* Dominions; although there be others attended with ſtill worſe Conſequences.

No Government equals the Papal in Rigour; the *temporal Sword* being not only uſed, but alſo, on ſeveral Occaſions, the *ſpiritual one*, or the *formidable Inquiſition*.——Nothing is ſo monſtrous as the Paſſion by which moſt Popes, Cardinals, and Prelates, have been carried away for the enriching and promoting of their *Nephews* and other Relations!——And nothing is ſo vain as the Ambition of gaining for themſelves a great Name, by founding of Convents and Churches. The regular Clergy vie with each other, in the Number, Splendor, and Riches of their Convents and Churches; but it is from the Bowels of the poor Inhabitants that the Money is generally extracted for the Support of this Rivalſhip. The Legates, Governors, and other inferior Officers in the Provinces, knowing that the Duration of their Offices is but ſhort and uncertain, ſcruple at no Kind of Rapaciouſneſs! From all which Cauſes, it can no longer be a Subject of Surprize, if, throughout the whole World, there is not a more wretched People than the Pope's temporal Subjects.

The Extent of the Pope's temporal Dominions, from South to North, is about 240 *Engliſh* Miles, and the Breadth, in ſome Parts, is 120, and in others ſcarce 20 of thoſe Miles. The certain annual Income of the *Pope* is generally computed at 8,700,000 *Scudi*. Yet, (ſays Dr. *Buſching*) it is no Secret, that in the Year 1741, the Pope was indebted no leſs than fifty-ſix Millions of *Scudi*. The Revenue of the *Papal* Territories.

In the Papal Territories are ſeveral Legations or Governments, *viz.*

I. *Bolonia* (or *Bologna*) is ſaid to contain 308 Towns and Villages.

Bolonia,

Bolonia, its Capital, is, next to *Rome*, the fineſt, beſt, and richeſt City in all the *Eccleſiaſtical State*; having many fine Palaces, Churches, and Convents, and is ſo populous, that its Inhabitants amount to upwards of 80,000. This City's having long ſince voluntarily ſubmitted to the See of *Rome*, has hitherto procured her the great Benefit of having no Citadel in it;—alſo, that the Effects of its Citizens ſhall, on no Pretext, be liable to Confiſcation;—and that, in Commemoration of their former Condition of having been a *free Republic*, their Coin is ſtill ſtamped with the Word *Libertas*; and they ſtill enjoy ſome other peculiar Privileges. There is a vaſt Quantity of *Silk* twiſted in the Mills on the River *Reno*, which runs through the City. Its Manufactures of Damaſks, Sattins, Velvets, Taffaties, and Crapes, are in great Repute. It alſo carries on a conſiderable Trade in Flax, Hemp, Oil, Wine, Walnut-tree Work, Marmalade, Eſſences of all Kinds, Brandy, Soap, Snuff, Rock-cryſtal Toys, artificial Flowers, and Fruits. In one Word, *Bolonia*, in a commercial Senſe, is the Glory and Pride of the Papal Territory. *Bolonia* has likewiſe a famous Univerſity.

II. In the Dutchy of *Ferrara*, the famous River *Po* diſcharges itſelf, by ſeveral Mouths, into the *Adriatic* Sea.

Ferrara, its Capital, is a large, but poor and deſolate City on the *Po*, ſaid to have more Houſes than Inhabitants, for want of Trade and Manufactures, ever ſince it fell under the Dominion of the Papacy. Yet it has many handſome Churches, Convents, Houſes, and Palaces; and its Streets are broad and clean. It is an Archbiſhopric and an Univerſity; but was a noble and populous City under its own Dukes. Here are ſundry ſmall Market Towns in this Dutchy.

III. *Romagna*, in which is the once famous City of

Ravenna, an Archbiſhopric, and, though now mean and inconſiderable, ſcarcely containing 15,000 Inhabitants, was anciently a famous Port on the *Adriatic* Sea; but, though ſtanding on the very ſame Spot, is now near three *Italian* Miles from the Sea, occaſioned by vaſt Quantities of Mud, thrown up by the Tide, and, in proceſs of Time, forming what was once its celebrated Harbour into a Tract of cultivated Land. Yet, poor as it now is, it has no fewer than twenty-four Convents, beſide many Churches, &c. Its Houſes are old and ruinous, and Streets naſty.

Imola, *Faenza*, and *Ceſena* are ſmaller Places, with many Eccleſiaſtical Edifices, but no Trade; and the like may be ſaid of the reſt of the Places of the Legateſhip. At *Rimini*, its Harbour is choaked up with Mud in like Sort as that of *Ravenna*.

IV. The Dutchy of *Urbino* contains,

Urbino, its Capital, which, though not very large, is the Reſidence of the Pope's Legate, and of an Archbiſhopric; of Churches and Convents, doubtleſs, more than ſufficient: And here is ſtill to be ſeen the fine Palace of its former Dukes.

Peſaro is a handſome Sea-port, pretty well inhabited, and has many fine Churches, Convents, and Palaces; it is noted for the beſt Figs in all *Italy*, and for very good Wine: And *Fano* is a Sea-port for ſmall Veſſels, which is all that can be ſaid of any Place in this Dutchy.

V. *Ancona* is a Sea-port on the *Adriatic*; and, though neither ſmall nor unhandſome, yet has much leſs Commerce, and is leſs populous and wealthy than, from its happy Situation and its good Harbour, might reaſonably be expected, were it in any other Potentate's Poſſeſſion. Its Commerce, however, begins to revive, ſince the Pope has made it a free Port. It has an elegant Exchange for Merchants: It is ſaid to produce, in its Neighbourhood, the beſt and fineſt *Flax* of any Part of *Europe*. Its Commerce, for the greater Part, is managed by about 5000 *Jews*, who have a Synagogue here. And Perſons of all Religions enjoy here all Freedom, excepting the public Exerciſe of their Worſhip. It has forty-five Churches, Convents, and Hoſpitals; and, although its Trade be not very conſiderable, it has more the Appearance of a commercial City than any other Sea-port in the Dominions of the Papacy.

Fabriano, though called only a Village, is equal to many Cities; as it has two Collegiate Churches, ſeventeen Convents, ſixteen Churches of religious Fraternities, two Alms-houſes, and three Hoſpitals; and is famous for a *Paper* Manufacture. To what Purpoſe would it be for us to give an Account of ſo great a Number of other ſmall Cities and Towns within the Pope's Territories, as there is nothing of Trade or Manufactures to be found in them, nor any Thing elſe worthy of Mention, but their being crouded with Churches, Chapels, and Monaſteries, where the Clergy live in the greateſt Plenty, and the miſerable Laity in Poverty and Sloth, although the Vicinity of ſuch Places do moſtly abound with excellent Wines, Fruits, Corn, &c. chiefly for the Uſe of the Clergy. Out of many Inſtances of this Sort, which might be produced, *Viterbo* is one, which ſcarcely contains 15,000 Inhabitants, and yet has no fewer than ſixty-nine Churches, Convents, and Hoſpitals.

Civita Vecchia, however, may be mentioned, as being properly the Sea-port of *Rome*, near the Mouth of the *Tiber*, and the Station for the Pope's Gallies, being ſtrongly fortified: Yet, having little or no Commerce, it is but thinly inhabited; and has a bad Air, and a Want of good Water.

The *Campania*, or Territory of the City of *Rome*, is bleſſed with a moſt fertile Soil; but for want of due Cultivation, the Lay-Inhabitants are wretchedly poor.

Rome, its matchleſs Capital, may even now be ſaid to be the moſt marvellous City on Earth, in reſpect of Antiquities, Curioſities, pompous Ornaments, ſuperb Palaces, magnificent Churches, and many grand

grand Monaſteries; Profeſſors of all the fine Arts, being the Centre and Staple of all that is elegant in Sculpture, Painting, Architecture, &c. Such grand Embelliſhments may be truly ſaid to make modern *Rome* ſurpaſs even ancient *Rome* in all its Glory, although the latter was vaſtly more populous, and alſo ſtood on a much greater Compaſs of Ground, than does the former. Dr. *Buſching* acquaints us, That, in the Year 1714, a Liſt was taken of all *Rome*'s Inhabitants, whoſe Number was found to be 143,000; yet Mr. *Keyſler*, in the Year 1731, computes them to amount to 163,156. It is reckoned ten *Italian* Miles in Circumference, yet ſcarce half that Space is built. Beſide its wonderfully grand Papal Bazilic of *St. Peter*, the Fellow to which is not on Earth, and many Collegiate Churches, it contains 80 Pariſh-Churches, beſide many Chapels, and above 30 Alms-houſes: Moſt of its Houſes are of Brick; but thoſe of the better Sort have the Doors, Windows, and Supporters of free Stone. Upwards of two Thirds of its Houſes are the Property of Churches, Convents, and Alms-houſes; to which new Purchaſes are continually making. Its Streets are well paved, but neither carefully kept clean, nor illuminated. But it is not our Intention ſo much as to attempt a Deſcription of *Rome*'s Beauties, (which would require an intire Treatiſe) nor of its Defects. It may however be proper here to remark, That the real ſubſtantial Burghers or Citizens of *Rome* are but few in Number; and that, conſidering the Magnitude of this City, there is but little Trade carried on in it. Nevertheleſs, the ſupplying it with Neceſſaries, as well for its conſtant Inhabitants, as for the vaſt Numbers of Perſons of Rank and Fortune continually reſorting to it, and their Expence for many various Curioſities, cannot fail to occaſion the Circulation of much Money at *Rome*.

In this *Campania* are many ſmall Towns, but without the Appearance of either Commerce or Manufactures of almoſt any Kind whatever, or of any Thing elſe but Eccleſiaſtical Edifices.

The Dominions of the King of the Two SICILIES.

One of thoſe two *Sicilies* is beſt known by the Name of the Kingdom of *Naples*, and is in Length about 280 *Engliſh* Miles, and Breadth 96 to 120 *Engliſh* Miles. It is a very hot Country, with a Soil extremely fertile in Grain, Oil, delicious Wines and Fruits, Flax, Saffron, Alum, Vitriol, Sulphur, Rock Cryſtal, Glaſs Manufactures, Variety of Minerals, fine Wool, a great Quantity of Silk, of which much is exported. The Laity here are poor, but the Clergy rich, poſſeſſing near *two Thirds* of the Lands of the Kingdom; its Number of Churches and Convents being indeed aſtoniſhing!

1. *Naples*, its ſuperb Capital, contains fine and lofty Houſes, Palaces, Churches, Convents, &c. and, according to Mr. *Keyſler*, Dr. *Buſching*, and others, contains at leaſt 300,000 Inhabitants, conſiſting of great Numbers of Princes, Dukes, Marquiſes, and other Nobility, with their numerous Retinues, and a moſt numerous Clergy with their Dependents, &c. It contains, beſide 4 capital Churches; 102 Pariſh-Churches and Chapels, 130 Chapels of religious Fraternities, 149 Convents of both Sexes, 34 Alms-houſes, 11 Hoſpitals, 5 Seminaries for Eccleſiaſtics; many fine Palaces, Fountains, Statues, &c. and the Royal Palace, as well as that of the Archbiſhop, is ſurprizingly fine. Its Harbour is ſpacious, and is much frequented by Ships of many Nations. *Naples* has good *Silk* Manufactures, (of which they export not a little) and a conſiderable general Commerce, for the Advancement whereof the *Jews* were re-admitted in the Year 1740: They alſo export Oils, Sulphur, Manna, Roſemary, Anniſeed, Figs, Raſins, Tartar, Soap, Eſſences, good Wines, and fine Fruits. *Naples*, though ſcarcely half ſo large as *London* or *Paris*, is yet more beautiful than either of them. In its Neighbourhood are the Iſles of *Procita*, *Iſchia*, *Niſida*, and *Capri*, producing excellent Wines and Fruits; and on the Continent, along the Sea Shore, are the Cities of *Gaeta*, *Capua*, *Amalphi*, *Salerno*, and many more, having, however, very little Commerce, though in ſo fine and fertile a Country, and having ſuch excellent Materials for it, the City of *Naples* in a great Degree ingroſſing all the Commerce of the Weſt Coaſt; yet ſome of thoſe Parts, (as particularly *Amalphi*) were, in old Times, famous for Commerce and Navigation.

2. *Gallipoli* is a Sea-port, with ſome real Commerce, more eſpecially in great Quantities of Oils exported.

3. As is likewiſe *Otranto*.

4. *Bari* is a handſome and populous City, with a good Trade.

SICILY.

The beautiful Iſland of *Sicily* is far from being ſo well cultivated or peopled as it was in ancient Times. Its Soil is extremely fertile, producing much more Corn than its People can conſume at Home; with much of which, therefore, it ſupplies *Naples* and other Parts. It alſo abounds in excellent Wines, Fruits, Oil, Honey, Salt, Saffron, and alſo *Sugar*, chiefly produced in the Neighbourhood of Mount *Ætna*; alſo Silk in great Quantities, Gems, and valuable Stones, as Agate, Porphyry, Jaſper, Alabaſter, *Lapis Lazuli*, and Marble; being alſo rich in Metals and Minerals, as Gold, Silver, Copper, Tin, Lead, Iron: In general, this charming Iſland abounds in all Things for Delight and Ornament in the higheſt Degree; its Coaſts alſo affording a good Fiſhery for Tunnies, and its Paſtures excellent Cattle.

1. *Palermo*, its Capital, has a fortified Harbour, carries on a briſk Trade, and (according to Dr. *Buſching*) is thought to contain 120,000 Inhabitants; having many Churches, ſeventy-four Convents, and other charitable Foundations.

2. *Meſſina*, a ſtrong and beautifully built City and Sea-port, of conſiderable Commerce, containing about 20,000 Inhabitants, with many Churches, Convents, and Hoſpitals. Its Commerce principally conſiſts in Corn, good Wine, raw and wrought *Silk*, Oils, and Fruits, for Exportation.

3. and 4. *Catanea* and *Syracuſe*, near Mount *Ætna*, are both much-declined Sea-ports, though anciently of great Renown.

The ſmall *Lipari* Iſles, on the North Side of *Sicily*, have almoſt all of them *Vulcanoes*, or burning Mountains, yet ſome of them are fertile in Wines, Fruits, *&c.*

The Iſle of *Malta*, and *Gozo* near it, have no Commerce, nor Corn enough to ſupply its 60,000 Inhabitants above half the Year. It is bound, by the Grant of the Emperor *Charles* V. ever ſince the Year 1529, to hold perpetual Enmity and War with all *Mahometan* Countries. *Malta* Iſle is ſixty Miles in Compaſs, but very rocky, although many Ship-loads of Earth have been brought to it from *Sicily*, for meliorating the Soil. It has therefore neither Wine nor Wood ſufficient: Yet it has Cotton, Fruits, and Honey, good Paſtures, and conſiderable Fiſheries.

La Valetta, its principal Town, is ſo well fortified that the *Turks* at length ſeem to deſpair of attacking it with Succeſs: There are four other ſmall fortified Towns lying ſo near *La Valetta*, that they may all paſs together for one large Town. The old decayed Town named *Malta* ſtands in the Middle of this Iſland.

The Iſle of *Gozo*, ſubject to it, is thirty *Italian* Miles in Circumference, ſtrongly fortified, containing 3000 People, and ſaid to be very fertile. There is a third ſmall Iſle, lying between the other two, and commanding the Strait between them, wherefore it is well fortified. This Kind of an *Eccleſiaſtical* and Military Republic is governed by a Grand Maſter and many Knights; of which, and of their ſeveral Migrations, we have ſufficiently treated in the Body of our Work.

SWITZERLAND.

Switzerland's People, Trade, *&c.*

Its intire Confederacy (needleſs to be particularly deſcribed) has been computed to contain two Millions of Inhabitants; conſiſting of Nobility, Burghery, and Peaſantry. It is needleſs to obſerve, that it is a very mountainous, and (for the moſt Part) barren Country. Yet they are not without ſundry Manufactures of good and very ſtrong Linen, which they vend in conſiderable Quantities, even as far as *England*: Alſo Dimity, Thread, Lace, Cottons, (of which alſo they make a Kind of Muſlins) and into Stuffs for Womens Wear, and into Stockings, Handkerchiefs and Gloves. They alſo make diverſe Sorts of Silks, Velvets, Gold and Silver Brocades, Ribbons, ſundry Sorts of Woollen Manufactures, as Druggets, Calimancoes, Camblets, Damaſks, Flannels, Blankets. They are ſaid both to bleach and dye very well, and to make Paper, Hats, and Leather for all Uſes; and in ſome Parts alſo they make good Clocks and Watches, fine Earthen Ware, and many other Things. Thus the Ruggedneſs of their Country, their Scarcity of Money, and their far-inland Situation, have neceſſarily prompted them to ſerve themſelves at home with as many Neceſſaries as poſſible, whereby they may probably gain a Balance (though poſſibly but a ſmall one) from the reſt of *Europe* in their favour.

Switzerland is ſituated between *Germany*, *France*, and *Italy*, with its navigable Lakes and Rivers, more eſpecially the *Rhine* and the *Rhone*, thereby it may be ſaid to communicate both with the *German Ocean* and the *Mediterranean*: The Droves of their Pack-horſes, for the Carriage of Merchandize over their rugged Hills, utterly impracticable for Wheel-carriage, are thought to be no ſmall Conveniencies for their Traffic. Its chief Exports are, Cheeſe, Butter, Sheep, Black Cattle, Horſes, ſome Wine; alſo diverſe of its before-named Manufactures, and more eſpecially thoſe of the Linen Kinds. And its Imports are, Grain from *Germany*, Hemp, Flax, Wool, Salt, *American* and *Aſiatic* Merchandize, and ſundry Sorts of Manufactures.

The XIII. Cantons are, in point of Importance, *viz.*

Canton of *Bern.*

I. The Canton of *Bern*, which forms little leſs than one Third of the intire *Helvetic* Confederacy, and therefore is by far the largeſt of all the Cantons, and is alſo the moſt valuable. Its Vales yield an Exuberance of Grain and Fruits; and its higher Lands, rich Paſtures, covered with Cattle of all Kinds. Its Countries bordering on the Lakes of *Geneva* and *Neufchaſtel* yield, more eſpecially, the choiceſt of Wines and Fruits. This Canton is well cultivated and very populous, contains 39 Towns great and ſmall, and above 1300 Villages, and its Subjects are computed to amount to 400,000. On ordinary Occaſions they can ſend out 40,000 well-accoutred Men, and on extraordinary ones 100,000. The City of *Bern* ſtands on the River *Aar*, is large, populous, and well-built of Stone; with many fine public Structures.

The whole Canton is formed into Regiments, both Horſe and Foot: It has an Office of Ordnance, an Arſenal, and an Artillery-Corps. The principal Towns along the Lake of *Geneva* are, *Lauſanne*, a conſiderable City and Univerſity; *Vevay*, *Morges*, &c. *Arau* is noted for being the Place of Meeting of the Diets of the Proteſtant Cantons.

Zurich.

II. *Zurich*, next after *Bern*, is the largeſt and moſt powerful of all the Cantons; and is the firſt of all the XIII. Cantons in Point of Precedency. It is capable of bringing near 50,000 Men into the Field, without any Detriment either to its Agriculture or its Manufactures.

The City of *Zurich* is large, polite, opulent, and well fortified; having five Churches, an Univerſity, and many other fine public Edifices. It has all the Manufactures and Fabricks to be met with in the moſt flouriſhing Nations; ſuch as Woollen Cloths and Stuffs, Crapes, Linen, Silks, Velvets, Stockings of Silk and Cotton, Muſlins, Lawns, Gold and Silver Lace and Thread, and Founderies for Cannon, Bells, *&c.* This Canton has many good Market-towns; and particularly a large one on the *Zurich* Lake named *Horgen*, having a Cuſtom-houſe, and an Exchange for Merchants.

III. The City and Canton of *Lucern* is the chief of the Popiſh Cantons, and the uſual Reſidence of the *Pope's Nuncio.* The City has a Cathedral, ſeveral Pariſh-Churches, and four Monaſteries: It is a great Thorough-fare for Merchandize paſſing to and from *Italy*, and conſequently has ſome Commerce. Here are ſeveral leſſer Towns, and many Villages.

IV. The ſmall Canton of *Ury* (or *Uri)* lies in a rugged Country, yet abounding in Cattle, *&c. Altorff*, the Seat of Government, is well built, has a Provincial Armory and Granary, though no otherwiſe conſiderable in a commercial Senſe; although it has ſundry Market-towns and Villages.

V. The little Canton of *Schuitz*, though, on account of its Antiquity, giving Name to the intire Confederacy, has not properly any walled Town, but merely a few Burghs and Villages. It is a rugged Country like that of *Uri. Switz*, its Capital, has only one Church and three Convents.

VI. *Underwalden* is alſo a ſmall Canton, has fine Fruits and Cattle, rich Paſtures, and fertile Valleys: It has none but Market-towns and Villages. *Stantz* is its capital Town, but has nothing memorable.

VII. The very ſmall Canton of *Zug* has fine Paſtures, a Sufficiency of Grain, ſome Wine, Plenty of Fruits, and an immenſe Quantity of Cheſnuts, with which they ſupply the neighbouring Countries. *Zug*, its Capital, has one Pariſh-Church, a Priory, and two Convents; but nothing elſe memorable.

VIII. The Canton of *Glaris* is a rugged and mountainous Country; Graſiery is its principal Buſineſs, abounding in black Cattle, Horſes, Sheep, Cheeſe, Butter, and Tallow. It has ſome Manufactures of coarſe Woollen Cloth and Cottons. The major Part of its People are *Calviniſts*, the reſt *Romaniſts*; whereas the five immediately preceding Cantons are intirely Popiſh. *Glaris*, its Capital, has but one Church, equally uſed by both Religions, and is no way conſiderable. Here are ſundry other ſmall Towns and Villages.

IX. The ſmall Canton of *Baſil* (or *Baſel*, called alſo by the *French Baſle* or *Bâle)* abounds in Corn and Wine, though in ſome Parts it is rugged and mountainous, yet has fine Paſtures and Cattle. It is intirely Proteſtant; and has three Towns, and twenty-ſeven Pariſhes. *Baſil*, its Capital, is the largeſt City in all *Switzerland*, ſituated in a fertile Country on both Sides of the *Rhine.* It is well fortified, has many Churches, an Univerſity, and other fine public Structures; and is, in general, a truly polite and very fine City.

In this City moſt of the Manufactures mentioned in the Introduction to *Switzerland* are made; ſo that, with its Wines, and other Productions, *&c.* and likewiſe its happy Situation between *France* and *Germany*, *Baſil* carries on a conſiderable Traffic. They pretend here, that our preſent Rag-paper was firſt made at *Baſil*, in the Year 1417. Its ſmall Towns and Villages are ſaid to contain many Curioſities and Antiquities.

X. The Canton of *Friburg* is almoſt invironed with the great Canton of *Bern.* It produces Plenty of Grain and Fruits, and alſo ſome Wine, much black Cattle, and Cheeſe, exported in great Quantities to *France* and other Countries. The Town of *Friburg* contains ſeveral Churches and Monaſteries, though nothing elſe memorable, nor its other ſmaller Towns and Villages particularly relative to Commerce.

XI. The Canton of *Solothurn* (by the *French* named *Soleure)* contains two Towns and four Burghs. It is intirely Popiſh, excepting one Diſtrict, which is *Calviniſt.* The Town of *Soleure*, (or *Solothurn)* its Capital, ſtands in a fertile and pleaſant Country, is well fortified, has a Collegiate Church, a Jeſuits College, two Convents, and an Arſenal. It is the uſual Reſidence of the Envoy of *France* to the *Helvetic* Body; of which, and of its other leſſer Towns, Villages, and Caſtles, nothing particular can farther be ſaid.

XII. The Canton of *Schafhouſen* is intirely *Calviniſt* or Proteſtant, is a ſmall Canton, and almoſt ſurrounded by *Swabia.* It produces Corn, good Red Wine, and Paſturage. It has but two Towns and nineteen Pariſhes, beſide the Capital *Schafhouſen*, which contains five Churches, and an illuſtrious School: Which is all that is needful to be ſaid of this Canton, and its Towns and Villages.

XIII. The Canton of *Appenzell* produces good Corn, Wine, Cyder, Perry, and Flax, and has good Paſtures. According to Dr. *Buſching*, in this Canton there are no *Towns*, [*i. e.* as generally underſtood by the *Germans*, &c. having Walls and Gates] and but eight Burghs and Villages, the other Parts containing ſcattered Houſes. The intire Canton contains but twenty-three Pariſhes, whereof four, and alſo two Chapels, are Popiſh, and nineteen Churches are *Calviniſt.* The *Calviniſt* Parts of this Canton manufacture many thouſand Pieces of Linen, which are exported to *France*, *Italy*, *Spain*, and *Germany*; and the Thread here ſpun is of ſuch Fineneſs as to be ſold for upwards of ſixteen Gilders *per* Pound Weight: Here alſo are made, Crape, Fuſtian, and Woollen Cloth; and from hence are exported Cheeſe, Cattle, Horſes, Wood, and Pit-coal. The Town of *Appenzell* has one Church, two Monaſteries, an Armory, and Town-houſe.

XIV. Territories in *Switzerland*, ſubject to two or more of the thirteen Cantons jointly, *viz.*

1. The Country of *Thurgau* borders on the Lake of *Conſtance*, [or *Coſtanz*, according to Dr. *Buſching*] is populous, contains ſix Towns, ſeveral Burghs, and 170 Villages; has a third Part of its Inhabitants *Popiſh*, and two Thirds are *Calviniſt*; conſtituting forty-nine Pariſhes. This Country is ſubject to the eight ancient Cantons. It produces Grain, Wine, and Fruits. *Frauenſeld* is its chief Town, having two Churches, one for *Calviniſts*, and one for *Romaniſts.* The other numerous ſmall Towns and Villages contain nothing remarkable.

2. The Country of *Reinthal*, bordering on the *Rhine*, where that River enters the Lake of *Conſtance*, is fertile, and produces excellent Wine, and great Quantities of Cryſtal; it has but two Towns, and moſt of its People are *Calviniſts*. It is ſubject to the nine ſenior Cantons, conjointly with the Abbot of *St. Gall*. *Rheineck*, a ſmall Town, is its chief Place.

3. The Country of *Sargans* lies on the *Rhine*, and has two Towns, of which *Sargans* is the beſt, though not large. It is ſubject to the eight oldeſt Cantons: Is partly *Calviniſt*, and partly *Popiſh*. It produces Cattle, Grain, and Fruits.

4. The Country of *Gaſter* borders on *Sargans*, is ſubject to the Cantons of *Switz* and *Glaris*; but contains nothing memorable.

5. The Country of *Utznach* is alſo ſubject to the ſaid two Cantons; as is alſo the Country of *Gambs*; neither of which are any Way memorable.

6. The Town and Precinct of *Rapperſchweil*, ſubject to the Cantons of *Zurich* and *Bern*. The Town has ſome Fortifications.

7. The County of *Baden* lies on the Weſt Side of the Canton of *Zurich*, ſubject to *Zurich*, *Bern*, and *Glaris*; has three Towns, and abounds in *Iron*, *Grain*, Fruits, and good Wine. *Baden*, its Capital, is a fortified Town, having two Churches, and two Convents. It is the uſual Place for holding the general Diets or Aſſemblies of all the *Cantons*; and is moſtly *Popiſh*, intermixed with ſome *Calviniſts*. Here are ſundry Burghs and many Villages.

8. ☞ There are many other Diſtricts, called here *Free Amts*, belonging, for the moſt Part, to the eight ſenior Cantons, and containing ſundry ſmall Burghs or Parochial Villages. The fortified Towns of *Bremgarten* and *Mellingen* are alſo ſubject to two or more of the thirteen Cantons; as are alſo the Diſtricts of *Swartſenburg*, *Morat*, *Granſon*, *Eſchalens*, *Bellenz*, the ſeven *Italian* Diſtricts, *Poleze*, the Valley of *Blegno*, the Territory on the Lake *Lugano*, formerly belonging to the Dutchy of *Milan* in *Italy*, which has 106 populous Burghs and Villages; that of *Luggarus*, partly on the Lake *Maggioré*, and partly on that of *Leccarno*; that of *Menthal*, or the Valley of *Maggia*; that of *Mendriſio*, *Engelberg* Abbey, and *Gerſau*.

XV. The aſſociated Countries and Places, *viz.* ſuch as are always ſummoned to the legiſlative Diets, in Quality of *Allies*, and have a Vote therein.

1. The Abbey of *St. Gall*, lying within the Town of that Name, though divided from it by high Walls, to which it has one Gate. That Abbot is a Prince of the Empire. His Territories within *Switzerland* are,

1ſt, The Territory called of *God's-houſe*, lying North of the *Griſons* Country, conſiſting of ſeveral Villages intirely *Popiſh*.

2dly, The Country of *Toggenburg*, half *Popiſh* and half *Proteſtant*, having one ſmall Town, and ſeveral Parochial Villages.

3dly, The City of *St. Gall*, whoſe Inhabitants are *Calviniſts*, having three Churches, and a conſiderable Linen Trade.

2. The Town of *Biel* (called *Bienne* by the *French*) ſtands near the Lake of *Biel*; and, though within the Biſhopric of *Baſil*, is however *Calviniſt*, and has a Vote in the general Diets, next to the City of *St. Gall*. It has ſeveral Villages under its Juriſdiction.

3. The three *Unions* [or *Trois Droitures*] of the *Griſons* border Eaſtward on the Territories of *Venice* and *Milan*. It is a mountainous Country, though with many fruitful Valleys, which produce Grain, Fruits, Cattle, and ſome Wine. It has three Towns, and many Burghs and Villages. Here both the *Romiſh* and *Claviniſt* Religions are equally eſtabliſhed, though the latter is more numerous than the former, who are under the Biſhop of *Chur* or *Coir*.

Theſe three Confederacies (called here *Bunds*) form one united Republic, and have their proper Magiſtrates and other Officers, whoſe extraordinary Aſſemblies are always held at *Chur*; where, likewiſe, is kept the Record-Office of this Republic: But the annual general Diets are held alternately at *Chur*, *Ilanz*, and *Davos*, when they treat of their domeſtic Concerns, as well as of their Concerns with foreign Nations, and with their Allies of the *Switz* Republic.

The *Griſons* maintain no Troops; yet, as they furniſh foreign Powers with Regiments, they are never without Officers and Soldiers of Experience: So that, on any Emergency, all the three *Bunds* can bring 30,000 Men into the Field.

The principal Defence of the moſt Part of *Switzerland*, and more particularly of the *Griſons*, conſiſts in their narrow Paſſes and high Mountains; whereby a few reſolute Men can make head againſt a conſiderable Army. The *Griſons* have under their Subjection the *Italian* Countries of the *Valtelin*, *Chiavenna*, *Bormio*, &c. as their proper Vaſſals, though under certain Regulations and particular Conſtitutions.

Amongſt the *Griſons*, both the *Italian* and *German* Dialects are uſed; and Dr. *Buſching* is of Opinion, that the *German* Language is continually growing more and more into Vogue, probably proceeding from that Language's being uſed in their general State-Aſſemblies and public Inſtruments.

Chur or *Coir* is an Epiſcopal City, near the Uppermoſt *Rhine*, and is not only the Capital of one of the three *Bunds*, named of *God's-Houſe*, but alſo of the whole Republic of the *Griſons*; it is alſo a fortified City: Its Neighbourhood is finely diverſified with Vineyards, Orchards, and Corn-fields of ſome Extent. The Inhabitants of the City are all *Calviniſts*, and have three Churches: (For the Cathedral, the Biſhop's Palace, and Prebendal Houſes, ſtand on an Eminence without the City, incloſed with Walls and Gates.) Through *Chur* paſs Merchandize between *Germany* and *Italy*.

IV. The Country of *Valais* lies on the South of the Canton of *Bern*, and of the Lake of *Geneva*, and is a Confederate of the *Switz* Republic; and, though mountainous, abounds in excellent Corn, and the fineſt Fruits. *Sitten*, (called *Sion* by the *French*) its chief Town, is ſituated near the Upper *Rhone*, and is a Biſhop's See, having ſeveral Churches and Convents.

V. *Mulhauſen*, a Town of the *Suntgau* in *Alſace*, about ſix Hours Journey (ſays *Buſching*) diſtant from the City of *Baſil*, is a *Calviniſt* Town of two Churches, and has a ſmall dependent Village.

VI. The Principality of *Neuenburg*, better known by the *French* Name (of the ſame Signification) of *Neufchâtel*, and of *Vallangin*, are ſituated on the Weſt Side of the County of *Burgundy*; and, though mountainous, its Eminences, Vales, and Levels, abound in fine red and white Wine, Fruits, Corn, Hemp, and Flax. It contains three Towns, one Burgh, and twenty-five Pariſhes, with ten Chapels of Eaſe, ſixty-four Villages, beſide ſcattered Houſes. It is moſtly *Proteſtant*, and their Language is a corrupt *French*. The King of *Pruſſia* is Sovereign of this Principality: But, as being an Ally or Confederate of the *Switz* Cantons, or rather of the Canton of *Bern*, it has therefore remained ſafe and neuter in the late Wars.

The Town of *Neufchâtel* ſtands on the Lake of that Name, and has two Churches, and a *Gymnaſium* or Univerſity; and *Vallangin* is the chief Town of its Lordſhip.

VII. The very ſmall free Republic of *Geneva* is, by its Compacts with *Bern* and *Zurich*, reckoned an Aſſociate of the *Helvetic* Body.

Geneva is a moderately large, handſome, and well-fortified City, at the Efflux of the *Rhone* out of the extenſive Lake of that Name, containing about 30,000 Inhabitants: That River divides it into three unequal Parts, which communicate by four Bridges. The Inhabitants are moſtly *Calviniſts*, having ſix Churches, one Chapel, and a celebrated Univerſity.——The Purity of its Air, the Politeneſs of its Inhabitants;——the great Reſort of Perſons paſſing through it to and from *Germany*, *France*, and *Italy*;——the great Number of foreign young Gentlemen reſiding in it for academical Studies, &c.——and the Number of its fine Manufactures, Fabricks, and Works of Art and Curioſity; do all contribute to render *Geneva* exceeding delightful. Without its Walls are ſeveral Parochial Villages and Country-Seats, in a charming Country.

VIII. Laſtly, in the Biſhop of *Baſil*'s Temporalities within *Switzerland* lie,

1ſt, The Town of *Bienne* or *Biel*.

2dly, The ſmall Town of *Newenſtadt*; and alſo ſundry Villages: They are all *Calviniſts*, and Allies of the Canton of *Bern*.

HUNGARY.

This Kingdom exports excellent Wines, Oil, Saffron, Metals of Gold, Silver, Iron, Copper, Lead, and other Minerals; alſo Cattle, Leather, Wool, Tallow, Wax, &c.

1. *Preſburg*, its modern Capital, (becauſe ſo near to *Auſtria*) has ſundry Churches and Convents, but little Commerce.

2. *Buda*, its ancient Capital, is much decreaſed in Trade and Splendor; as is alſo *Peſt*, on the oppoſite Side of the *Danube*; but they are both well fortified.

3. *Tokai* (or *Tockay*) is a conſiderable Town, celebrated for the rich Wines in its Vicinity, which, in Flavour and Strength, exceed all the Wines in *Hungary*.

☞ Many of the Towns of *Hungary*, which were formerly eminent, are in our Days much decayed, by means of the Wars with the *Turks*; and the greateſt Part of their modern Trade conſiſts in their excellent Mines and various Minerals, whereby many of their Towns intirely ſubſiſt, and are therefore named *Mine-Towns*. They likewiſe have ſome excellent Drugs, and alſo numerous Vineyards.

Tranſylvania is uſually reckoned an Appendage of *Hungary*; its chief Exports are Metals and Salt to *Hungary*.

1. *Clauſenburg* is a large, ſtrong, and populous Town.

2. *Weiſſenburg*, a ſtrong and well-built City, the Capital.

3. *Hermanſtadt* is alſo a large, ſtrong, and well-built City.

But of any particular Commerce in thoſe Cities we can ſay very little.

Sclavonia Province lies between the Rivers *Drave* and *Save*.

Carlowitz, its Capital, is noted for its good Wine.

The Country of *Croatia* lies between the *Save* and the *Adriatic* Sea; but has very few if any Towns of Commerce in it; for its chief Town *Carlſtadt* (founded by *Charles*, *Arch-Duke of Auſtria*, who alſo fortified it) is merely a military Station, for the Security of other Parts of the Houſe of *Auſtria*'s adjacent Dominions.

TURKEY in *Europe*.

The Number of its People is greatly diſproportioned, both to the Extent and to the Goodneſs of the Country. This Defect is principally attributed, Iſt, To her frequent Peſtilences; IIdly, To the Practice of Polygamy, [or their having many Wives;] IIIdly, To the frequent Wars of the *Turks*; and IVthly, To the Avarice and Oppreſſion of the Governors of her Cities and Provinces. Yet they have ſome fine Manufactures, and the inland Commerce between her ſeveral Provinces is very conſiderable, but is chiefly managed by *Jews* and *Armenians*; and their Commerce with Chriſtian Nations is intirely paſſive, *i. e.* is managed by thoſe Nations, *viz. Engliſh*, *Dutch*, *French*, *Italian*, *Swediſh*, &c. Ships, reſorting to the *Turkiſh* Ports, to fetch away their after-named Commodities, in exchange for thoſe of their own reſpective Countries.

Turkey's Exports are *Silk*, *raw* and *wrought*, Carpets, Goats-Hair, and Wool; *Blue*, *Red*, and *Yellow Morocco Leather*; *Camels Hair*, Cotton-Yarn, Dimity, Burdets, *waxed* Linen, *Shagrin* Skins; Gums, Opium, Galls, and other Drugs for Dying, Painting, and Phyſic; Maſtic, Emery, *Lemnian* Bole, Pomegranate Shells, Sponges; Dates, Almonds, Coffee, Rhubarb, Turpentine, Storax, Wine, Oil, Figs, Raiſins, Mother-of-Pearl, Box-wood, Saffron, Wax, *&c.* And *Turkey* takes from *England* much Woollen Cloth and Stuffs, Tin, Lead, Iron-Ware, Sugar, and the other Merchandize of both the *Eaſt* and *Weſt Indies*; and ſome think alſo ſome Bullion.

1. Its extenſive and once illuſtrious Capital is the ever-memorable City of *Conſtantinople*, which Dr. *Buſching* makes to contain 800,000 Inhabitants, (for which Computation he quotes *Otter*) of which Number he makes the *Greeks* to be 400,000, and the *Armenians* not quite half ſo many; the reſt are *Turks* and *Jews*. Yet other Authors, for the moſt Part, do not make the People of *Conſtantinople* to exceed 600,000.

2. *Adrianople*, an inland City, is the next in point of Magnitude to *Conſtantinople*; it lies in *Romania*, and its Situation on the River *Maritz* has drawn thither People from various Nations on a commercial Account.

3. *Salonichi* [the *Theſſalonica* of the Ancients] is a celebrated trading City, on a Bay in *Macedonia*; and, beſide its great naval Commerce, it has many noble Remains of its ancient Grandeur. Here are ſaid to be above twenty *Jews* Synagogues.

4. *Scutari*, in *Albania*, enjoys a large Trade, and is well fortified.

5. *Dulcigno*, on the *Adriatic* Sea, is a ſtrong Town, with a good Harbour. Its People have been noted for their maritime Depredations.

6. *Lariſſa* in *Theſſaly*, is a good trading City, on the River *Peneus*.

7. *Livadia* is a large populous Town on the Gulph of *Lepanto*, and has ſome conſiderable Commerce.

8. *Athens* has many Remains of its ancient Grandeur, but has not at preſent above 10,000 Inhabitants.

The Iſlands of *Negropont* and *Candia* are fine Countries, with very little Commerce ſince maſtered by the *Turks*, any more than the numerous Iſles in the *Archipelago*; wherein, however, excellent Wines, and many other rich Productions, abound; and might be extremely conducive to Commerce, if in the Poſſeſſion of any People but the *Turks*; but a minute Deſcription of them ſeems ſuperfluous.

The Countries in *Europe* which are tributary to the *Ottoman Porte* are,

I. *Wallachia* Province is of the *Greek* Church, lying next the Frontiers of *Poland*.

1. *Targoviſta*, its Capital, is a Town of good Trade.

2. *Buchoreſt*, a ſtrong Place, the uſual Reſidence of its tributary Prince called the *Waywode.* It is an Archiepiſcopal See: And herein is an Academy for the Sons of Perſons of Quality.

II. *Moldavia*, next to *Wallachia*, has alſo a tributary Prince called the *Waywode* or *Hoſpodar*, and the *Greek* Church is the prevailing Religion.

1. *Jaſſy*, its Capital, ſtands on the River *Pruth*, and is a ſpacious and ſtrong Town. It is in a Neighbourhood abounding in Wine.

2. *Choczim* is a ſtrong Frontier-Town on the River *Dnieſter*.

There are ſeveral Colonies or Tribes of *Tartars*, even in *Europe*, who are ſettled in a winding Tract of Country along the *Black Sea* and the Sea of *Azoph*, from the moſt Northern Branch of the *Danube*'s Mouth to the River *Don*, being Parts of ancient *European Scythia*. Some of theſe Tribes wander about in Hordes or Clans, whilſt others are ſettled in Towns and Villages. Some alſo are immediately dependent on the *Ottoman Porte*, and others are ſubject to the *Cham* of *Crim-Tartary*, who is himſelf a Vaſſal of the *Grand Seignior*. Dr. *Buſching* acknowledges, *That he has not been able to procure any credible Accounts of the reſpective Limits of the Turkiſh Sovereignty*; and therefore *he chuſes to leave that Point in Suſpence, rather than to determine blindly*; as we ſhall likewiſe do.

Beſſarabia, a Country along the Weſt Side of the *Black Sea*, is alſo called *Badziac Tartary*. The People are moſtly wandering *Hordes* along the *Dneiſter*; their uſual Food being the Fleſh of their Oxen and Horſes, Cheeſe and Milk, particularly that of *Mares*.

1. *Kili* (or *Kilia Nova*) is alſo one of their beſt Towns, at the Mouth of the Northern or largeſt Branch of the *Danube*, where its People are employed in the making of *Salt*.

2. *Bender*, a *Turkiſh* Fortification on the *Dneiſter*.

3. *Oczakow* is a ſtrong Place at the Mouth of the *Dnieper*.

The *European Nagay Tartars* are wandering Hordes between the *Dnieper* and the Mouth of the *Don*.

The *Crimea* is a Peninſula nearly of Shape and Magnitude to the *Morea*. Its beſt Town is named *Perekop*, a ſtrong Place, on the Iſthmus which joins that Peninſula to the Continent.

Caffa is ſtill a large trading Sea-port Town, and, whilſt the *Genoeſe* held it, *viz.* till it was taken by the *Turks*, *Anno* 1474, its Commerce exceeded even that of *Conſtantinople* itſelf. It has ſtill 5 or 6000 Houſes, and is well garriſoned by the *Turks*, who here tolerate all Religions; but its Trade is much decayed.

Backſchiſarai, on the Weſt Side of this *Peninſula*, is the *Cham*'s Place of Reſidence, where he has a large Palace; and, though the Town be unfortified, it is the beſt built of any in this Peninſula.

The END of the APPENDIX.
